

THE GEORGE WASHINGTON UNIVERSITY UNIVERSITY BULLETIN

2015-2016

THE GEORGE
WASHINGTON
UNIVERSITY

WASHINGTON, DC

The George Washington University

University Bulletin

2015-2016

Columbian College of Arts and Sciences
Health Sciences Programs in the School of Medicine and Health Sciences
School of Engineering and Applied Science
Graduate School of Education and Human Development
School of Business
Elliott School of International Affairs
Milken Institute School of Public Health
College of Professional Studies
School of Nursing

This bulletin covers GW's degree programs and courses for the schools listed here, with the regulations that pertain to academic programs. For information on GW's professional schools that are not part of this bulletin, see the following websites: www.law.gwu.edu and www.smhs.gwu.edu. The website www.gwu.edu contains institutional information as well as updated and expanded information on all GW schools, departments, and programs.

Information in this Bulletin is generally accurate as of August 2015. The University reserves the right to change courses, programs, fees, and the academic calendar, or to make other changes deemed necessary or desirable, giving advance notice of change when possible.

TABLE OF CONTENTS

About the University	16	Minor in Cross-Cultural Communication	110
University Regulations	20	Minor in Sociocultural Anthropology	111
Advance Placement Equivalents	28	Master of Arts in the Field of Anthropology	112
University General Education Requirement	29	Doctor of Philosophy in the Field of Anthropology	113
Undergraduate Admissions	36	Art Therapy	113
Fees and Financial Regulations	39	Master of Arts in the Field of Art Therapy	115
Financial Aid	42	Master of Arts in the Field of Art Therapy Practice	116
Interdisciplinary and Special Undergraduate Programs	56	Biochemistry and Molecular Medicine	116
GWTeach	56	Master of Science in the Field of Molecular Biochemistry and Bioinformatics	118
Honors Program	57	Biological Sciences	118
Naval Science	60	Bachelor of Arts with a Major in Biology	125
Sustainability	60	Bachelor of Science with a Major in Biology	126
Women's Leadership Program	62	Combined Program	127
Columbian College of Arts and Sciences	63	Minor in Biology	127
General Education Curriculum (G-PAC)	75	Master of Science in the Field of Biological Sciences	127
Africana Studies	85	Doctor of Philosophy in the Field of Biological Sciences	127
Bachelor of Arts with a Major in Africana Studies	85	Biomedical Sciences	128
Minor in Africana Studies	87	Doctor of Philosophy in the Field of Biochemistry and Systems Biology	128
American Studies	87	Doctor of Philosophy in the Field of Microbiology and Immunology	129
Bachelor of Arts with a Major in American Studies	92	Doctor of Philosophy in the Field of Molecular Medicine	130
Combined Bachelor of Arts/Master of Arts in American Studies	92	Biostatistics	131
Minor in American Studies	93	Master of Science in the Field of Biostatistics	132
Master of Arts in the Field of American Studies	93	Doctor of Philosophy in the Field of Biostatistics	133
Doctor of Philosophy in American Studies	93	Chemistry	135
Anatomy and Regenerative Biology	94	Bachelor of Arts with a Major in Chemistry	139
Master of Science in the Field of Anatomical and Translational Sciences	96	Bachelor of Science with a Major in Chemistry	140
Graduate Certificate in Anatomical and Translational Sciences	97	Combined Bachelor of Science with a Major in Chemistry and Master of Forensic Sciences with a Concentration in Forensic Chemistry	144
Anthropology	97	Minor in Chemistry	144
Bachelor of Arts with a Major in Anthropology	105	Master of Science in the Field of Chemistry	144
Bachelor of Arts with a Major in Archaeology	106	Master of Science in the Field of Environmental and Green Chemistry	145
Bachelor of Science with a Major in Biological Anthropology	107	Doctor of Philosophy in the Field of Chemistry	146
Combined Programs	109	Classical Acting	146
Minor in Anthropology	109		
Minor in Archaeology	109		
Minor in Biological Anthropology	110		

Master of Fine Arts in the Field of Classical Acting ...	148	Bachelor of Arts with a Major in Creative Writing and English	185
Classical and Near Eastern Languages and Civilizations	149	Bachelor of Arts with a Major in English	187
Bachelor of Arts with a Major in Arabic Studies	149	Combined Program	189
Bachelor of Arts with a Major in Classical Studies	150	Minor in Creative Writing	189
Minor in Arabic and Hebrew Languages and Cultures	151	Minor in English	190
Minor in Arabic Studies	152	Master of Arts in the field of English with optional concentrations in English or American literature	190
Minor in Classical Studies	152	Doctor of Philosophy in the field of English with optional concentrations in English or American literature	191
Corcoran School of the Arts and Design	153	English for Academic Purposes	191
Bachelor of Fine Arts with a Major in Digital Media Design	153	Environmental Resource Policy	192
Bachelor of Fine Arts with a Major in Fine Art	154	Master of Arts in the Field of Environmental Resource Policy	193
Bachelor of Fine Arts with a Major in Fine Art Photography	155	Graduate Certificate in Contexts of Environmental Policy	193
Bachelor of Fine Arts with a Major in Graphic Design	156	Environmental Studies	195
Bachelor of Fine Arts with a Major in Photojournalism	157	Bachelor of Arts with a Major in Environmental Studies	195
Data Science	157	Film Studies	196
Master of Science in the Field of Data Science	159	Minor in Film Studies	196
Graduate Certificate in Data Science	160	Fine Arts and Art History	197
East Asian Languages and Literatures	160	Bachelor of Arts with a Combined Major in Art History and Fine Arts	197
Bachelor of Arts with a Major in Chinese Language and Literature	161	Bachelor of Arts with a Major in Art History	200
Bachelor of Arts with a Major in Japanese Language and Literature	162	Bachelor of Arts with a Major in Fine Arts	202
Minor in Chinese Language and Literature	163	Combined Programs	205
Minor in Japanese Language and Literature	164	Minor in Art History	205
Minor in Korean Language and Literature	164	Minor in Fine Arts	205
Master of Arts in the Field of Chinese Language and Culture	164	Combined Minor in Art History and Fine Arts	205
Economics	165	Master of Arts in the Field of Art History	205
Bachelor of Arts with a Major in Economics	171	Master of Fine Arts in the Field of Fine Arts	207
Bachelor of Science with a Major in Economics	172	Forensic Sciences	207
Combined Programs	173	Master of Forensic Sciences	212
Minor in Economics	174	Master of Forensic Sciences with a Concentration in Forensic Chemistry	212
Master of Arts in the Field of Applied Economics	174	Master of Forensic Sciences with a Concentration in Forensic Molecular Biology	213
Master of Arts in the Field of Economics	175	Master of Forensic Sciences with a Concentration in Forensic Toxicology	213
Doctor of Philosophy in the Field of Economics	175	Master of Forensic Sciences with a Concentration in Friction Ridge Analysis	214
English	176		

Master of Science in the Field of Crime Scene Investigation	214	Minor in Judaic Studies	257
Master of Science in the Field of Friction Ridge Analysis	215	Master of Arts in the Field of Experiential Education and Jewish Cultural Arts	258
Master of Science in the Field of High-Technology Crime Investigation	215	Master of Arts in the Field of Jewish Cultural Arts	258
Graduate Certificate in Bloodstain Pattern Analysis	216	Mathematics	259
Graduate Certificate in Digital Investigations	216	Bachelor of Arts with a Major in Mathematics	264
Graduate Certificate in Forensic Investigation	216	Bachelor of Science with a Major in Mathematics	265
Graduate Certificate in Latent Print Examination	217	Minor in Mathematics	266
Geography	217	Master of Arts in the Field of Mathematics	266
Bachelor of Arts with a Major in Geography	221	Master of Science in the Field of Applied Mathematics	266
Minor in Geographic Information Systems	222	Doctor of Philosophy in the Field of Mathematics	267
Minor in Geography	222	Graduate Certificate in Financial Mathematics	267
Master of Arts in the Field of Geography	222	Graduate Certificate in Mathematics	267
Graduate Certificate in Geographical Information Systems	223	Media and Public Affairs	267
Geological Sciences	223	Bachelor of Arts with a Major in Journalism and Mass Communication	273
Bachelor of Arts with a Major in Geological Sciences	225	Bachelor of Arts with a Major in Political Communication	274
Bachelor of Science with a Major in Geological Sciences	226	Minor in Journalism and Mass Communication	275
Minor in Geological Sciences	226	Combined Programs	276
History	227	Master of Arts in the Field of Media and Strategic Communication	276
Bachelor of Arts with a Major in History	238	Museum Studies	277
Minor in History	249	Master of Arts in the Field of Museum Studies	278
Master of Arts in the Field of History	249	Graduate Certificate in Exhibit Design	279
Doctor of Philosophy in the Field of American Religious History	250	Graduate Certificate in Museum Collections Management and Care	279
Doctor of Philosophy in the Field of History	250	Graduate Certificate in Museum Studies	279
Human Paleobiology	250	Music	280
Master of Science in the Field of Human Paleobiology	251	Bachelor of Arts with a Major in Music	284
Doctor of Philosophy in the Field of Human Paleobiology	251	Minor in Jazz Studies	285
Interior Architecture and Design	252	Minor in Music	285
Bachelor of Fine Arts with a Major in Interior Architecture and Design	255	Organizational Sciences and Communication	285
Master of Fine Arts in the Field of Interior Architecture and Design	255	Bachelor of Arts with a Major in Communication	286
Judaic Studies	256	Bachelor of Arts with a Major in Organizational Sciences	287
Bachelor of Arts with a Major in Judaic Studies	257	Minor in Communication	289
		Minor in Organizational Communication	290
		Minor in Organizational Sciences	290
		Master of Arts in the Field of Leadership Education and Development	290

Master of Arts in the Field of Organizational Sciences	291	Graduate Certificate in LGBT Health Policy and Practice	336
Peace Studies	292	Psychology	336
Bachelor of Arts with a Major in Peace Studies	292	Bachelor of Arts with a Major in Psychology	342
Minor in Peace Studies	294	Combined Program	343
Philosophy	295	Doctor of Philosophy in the Field of Psychology	343
Bachelor of Arts with a Major in Philosophy	300	Minor in Psychology	343
Bachelor of Arts with a Major in Philosophy (Public Affairs Focus)	301	Public Policy and Public Administration	344
Combined Program	311	Master of Public Administration	349
Minor in Applied Ethics	311	Master of Public Policy	349
Minor in Logic	312	Dual Master of Public Administration and Graduate Certificate in Homeland Security Emergency Preparedness and Response	350
Minor in Mind-Brain Studies	312	Dual Master of Public Administration and Graduate Certificate in Organizational Performance Improvement	351
Minor in Philosophy	313	Dual Master of Public Policy and Graduate Certificate in Organizational Performance Improvement	351
Master of Arts in the Field of Philosophy	313	Doctor of Philosophy in the Field of Public Policy and Administration	352
Master of Arts in the Field of Public Policy with a Concentration in Philosophy and Social Policy	313	Graduate Certificate in Nonprofit Management	352
Physics	314	Religion	353
Bachelor of Arts with a Major in Physics	315	Bachelor of Arts with a Major in Religion	358
Bachelor of Science with a Major in Biophysics	315	Minor in Religion	360
Bachelor of Science with a Major in Physics	316	Master of Arts in the Field of Islamic Studies	361
Minor in Biophysics	317	Doctor of Philosophy in the Field of American Religious History	250
Minor in Physics	317	Graduate Certificate in Islamic Studies	361
Master of Science in the Field of Physics	317	Romance, German, and Slavic Languages and Literatures	361
Doctor of Philosophy in the Field of Physics	318	Bachelor of Arts with a Major in French Language, Literature, and Culture	362
Political Science	319	Bachelor of Arts with a Major in German Language and Literature	363
Bachelor of Arts with a Major in Political Science	327	Bachelor of Arts with a Major in Russian Language and Literature	364
Bachelor of Arts with a Major in Political Science (Public Policy Focus)	329	Bachelor of Arts with a Major in Spanish and Latin American Languages, Literatures, and Cultures	365
Combined Program	331	Minor in French Language, Literature, and Culture	366
Minor in Political Science	331	Minor in German Language and Literature	366
Minor in Public Policy	331	Minor in Italian Language and Literature	367
Master of Arts in the Field of Legal Institutions and Theory	332	Minor in Russian Language and Literature	367
Master of Arts in the Field of Political Science	332		
Doctor of Philosophy in the Field of Political Science	332		
Professional Psychology	333		
Master of Arts in the Field of Forensic Psychology ...	334		
Doctor of Psychology in the Field of Clinical Psychology	335		

Minor in Spanish and Latin American Languages, Literatures, and Cultures	367	Graduate Certificate in Women's Studies	400
Sociology	368	Master of Arts in the Field of Public Policy with a Concentration in Women's Studies	400
Bachelor of Arts with a Major in Criminal Justice	369	Master of Arts in the Field of Women's Studies	401
Bachelor of Arts with a Major in Human Services and Social Justice	370	Minor in LGBT and Sexuality Studies	401
Bachelor of Arts with a Major in Sociology	370	Minor in Women's Studies	402
Combined Program	371	School of Medicine and Health Sciences	403
Minor in Criminal Justice	371	Undergraduate Programs	411
Minor in Human Services and Social Justice	371	Associate in Science in the Field of Health Sciences	412
Minor in Law and Society	371	Associate in Science in the Field of Health Sciences Laboratory Technology	413
Minor in Sociology	372	Bachelor of Science in Health Sciences with a Major in Clinical Health Sciences	414
Master of Arts in the Field of Criminology	372	Bachelor of Science in Health Sciences with a Major in Clinical Management and Leadership	415
Master of Arts in the Field of Sociology	372	Bachelor of Science in Health Sciences with a Major in Clinical Research Administration	416
Speech and Hearing Science	373	Bachelor of Science in Health Sciences with a Major in Cytotechnology	416
Bachelor of Arts with a Major in Speech, Language, and Hearing Sciences	377	Bachelor of Science in Health Sciences with a Major in Emergency Medical Services Management	417
Minor in Speech, Language, and Hearing Sciences	378	Bachelor of Science in Health Sciences with a Major in Health Intervention and Disaster Response	418
Master of Arts in the Field of Speech-Language Pathology	378	Bachelor of Science in Health Sciences with a Major in Medical Laboratory Science	418
Speech-Language Pathology Post-Baccalaureate Program	378	Bachelor of Science in Health Sciences with a Major in Pharmaceutical Sciences	420
Statistics	379	Dual Bachelor of Science in Health Sciences and Master of Science in Health Sciences in Clinical Research Administration	421
Bachelor of Science with a Major in Statistics	383	Dual Bachelor of Science in Health Sciences and Master of Science in Health Sciences in Clinical Management and Leadership	422
Minor in Statistics	384	Dual Bachelor of Science in Health Sciences with a Major in Clinical Management and Leadership and Master of Science in Health Sciences in the Field of Emergency Medical Services Leadership	423
Master of Science in the Field of Statistics	384	Dual Bachelor of Science in Health Sciences with a Major in Clinical Management and Leadership and Master of Science in Health Sciences in the Field of Health Care Quality	424
Doctor of Philosophy in the Field of Statistics	385	Dual Bachelor of Science in Health Sciences with a Major in Clinical Research Administration and Master of Science in Health Sciences in the Field of Regulatory Affairs	425
Graduate Certificate in Survey Design and Data Analysis	385		
Theatre and Dance	385		
Bachelor of Arts with a Major in Dance	390		
Bachelor of Arts with a Major in Theatre	391		
Minor in Dance	392		
Minor in Theatre	392		
Master of Fine Arts in the Field of Dance	393		
Master of Fine Arts in the Field of Production Design	393		
University Writing	394		
Women's Studies	394		
Bachelor of Arts with a Major in Women's Studies	398		
Combined Program	400		

Dual Bachelor of Science in Health Sciences with a Major in Emergency Health Services Management and Master of Science in Health Sciences in the Field of Clinical Management and Leadership	427	Post-baccalaureate Certificate in Medical Laboratory Science	439
Dual Bachelor of Science in Health Sciences with a Major in Emergency Medical Services Management and Master of Science in Health Sciences in the Field of Emergency Medical Services Leadership	427	Post-baccalaureate Certificate in Microbiology for Medical Laboratory Science	439
Minor in Anatomy	428	Post-baccalaureate Certificate in Pre-Medicine	439
Minor in Clinical Research Administration	428	Graduate Certificate in Clinical Research Administration	440
Minor in Emergency Health Services	428	Graduate Certificate in Clinical Research Practice	440
Minor in Health Sciences	429	Graduate Certificate in Clinical and Translational Research	440
Graduate Programs	429	Graduate Certificate in Health Care Quality	441
Master of Science in Health Sciences in the Field of Clinical Management and Leadership	429	Graduate Certificate in Integrative Medicine	441
Master of Science in Health Sciences in the Field of Clinical Microbiology	430	Graduate Certificate in Regulatory Affairs	441
Master of Science in Health Sciences in the Field of Clinical Research Administration	431	School of Engineering and Applied Science	442
Master of Science in Health Sciences in the Field of Clinical and Translational Research	431	Biomedical Engineering	451
Master of Science in Health Sciences in the Field of Emergency Medical Services Leadership	432	Bachelor of Science with a Major in Biomedical Engineering	454
Master of Science in Health Sciences in the Field of Health Care Quality	432	Master of Science in the Field of Biomedical Engineering	455
Master of Science in Health Sciences in the Field of Immunohematology	433	Doctor of Philosophy in the Field of Biomedical Engineering	456
Master of Science in Health Sciences in the Field of Medical Laboratory Science	433	Civil and Environmental Engineering	456
Master of Science in Health Sciences in the Field of Molecular Diagnostic Science	434	Bachelor of Science with a Major in Civil Engineering	463
Master of Science in Health Sciences in the Field of Physician Assistant	434	Bachelor of Science with a Major in Civil Engineering, Environmental Engineering Option	466
Master of Science in Health Sciences in the Field of Regulatory Affairs	435	Bachelor of Science with a Major in Civil Engineering, Medical Preparation Option	468
Master of Science in Health Sciences in the Field of Translational Microbiology	435	Bachelor of Science with a Major in Civil Engineering, Sustainability Option	469
Doctor of Physical Therapy	436	Bachelor of Science with a Major in Civil Engineering, Transportation Engineering Option	471
Certificate Programs	437	Combined Bachelor of Science with a Major in Civil Engineering and Master of Science in the Field of Environmental Engineering	473
Post-baccalaureate Certificate in Blood Banking for Medical Laboratory Science	437	Combined Bachelor of Science with a Major in Civil Engineering and Master of Science in the Field of Structural Engineering	475
Post-baccalaureate Certificate in Chemistry for Medical Laboratory Science	438	Combined Bachelor of Science with a Major in Civil Engineering and Master of Science in the Field of Transportation Engineering	476
Post-baccalaureate Certificate in Hematology for Medical Laboratory Science	438	Master of Science in Civil and Environmental Engineering	478
		Computer Science	479

Bachelor of Arts with a Major in Computer Science	489	Master of Science in the Field of Mechanical and Aerospace Engineering	530
Bachelor of Science with a Major in Computer Science	491	Certificate in Computer-Integrated Design in Mechanical and Aerospace Engineering	531
Master of Science in the Field of Computer Science	492	Graduate School of Education and Human Development ...	533
Master of Science in the Field of Cybersecurity in Computer Science	493	Master's Programs	538
Graduate Certificate in Computer Security and Information Assurance	494	Assessment, Testing and Measurement in Education	539
Electrical and Computer Engineering	494	Clinical Mental Health Counseling	539
Bachelor of Science with a Major in Computer Engineering	503	Curriculum and Instruction	540
Bachelor of Science with a Major in Electrical Engineering	505	Master of Arts in Education and Human Development in the Field of Curriculum and Instruction with a Concentration in Elementary Education	540
Master of Science in the Field of Electrical Engineering	506	Master of Arts in Education and Human Development in the Field of Curriculum and Instruction with a Concentration in Interdisciplinary Studies of Literacy and Reading Education	541
Graduate Certificate in High-Performance Computing	506	Master of Arts in Education and Human Development in the Field of Curriculum and Instruction with a Concentration in Secondary Education	541
Engineering Management and Systems Engineering	507	Early Childhood Special Education	542
Bachelor of Arts with a Major in Applied Science and Technology	508	Education Policy Studies	543
Bachelor of Science with a Major in Systems Engineering	509	Educational Leadership and Administration	544
Master of Science in the Field of Engineering Management	511	Educational Technology Leadership	544
Master of Science in the Field of Systems Engineering	513	Elementary Education	545
Doctor of Engineering in the Field of Engineering Management	513	Experiential Education and Jewish Cultural Arts	545
Graduate Certificate in Greenhouse Gas Management	514	Higher Education Administration	546
Mechanical and Aerospace Engineering	514	Individualized Program	547
Bachelor of Science with a Major in Mechanical Engineering	522	International Education	547
Bachelor of Science with a Major in Mechanical Engineering, Aerospace Option	524	Museum Education	548
Bachelor of Science with a Major in Mechanical Engineering, Biomechanical Option	525	Organizational Leadership and Learning	548
Bachelor of Science with a Major in Mechanical Engineering, Medical Preparation Option	526	Rehabilitation Counseling	549
Bachelor of Science with a Major in Mechanical Engineering, Patent Law Option	527	School Counseling	550
Bachelor of Science with a Major in Mechanical Engineering, Robotics Option	529	Secondary Education	551
		Special Education and Transition Services	552
		Special Education for Children with Emotional and Behavioral Disabilities	554
		Special Education for Culturally and Linguistically Diverse Learners	555
		Education Specialist Programs	556
		Education Specialist in the Field of Educational Leadership and Administration	556

Doctoral Programs	557	Minor in Business Administration	614
Doctor of Education in the Field of Curriculum and Instruction	558	Graduate Programs	614
Doctor of Education in the Field of Educational Administration and Policy Studies	559	Master of Accountancy	615
Doctor of Education in the Field of Higher Education Administration	561	Master of Science in Business Analytics	616
Doctor of Education in the Field of Human and Organizational Learning	561	Master of Science in Finance	616
Doctor of Education in the Field of Special Education	563	Master of Science in Information Systems Technology	617
Doctor of Philosophy in the Field of Counseling	564	Master of Science in Government Contracts	617
Certificate Programs	565	Master of Science in Project Management	618
Assessment, Measurement, and Teaching in Education	565	Master of Tourism Administration	618
Incorporating International Perspectives in Education	566	Masters of Business Administration	619
Integrating Technology into Education	566	Global Master of Business Administration	619
STEM Master Teacher	566	Healthcare Master of Business Administration	625
Departments	567	Professional Master of Business Administration	626
Counseling and Human Development	567	World Executive Master of Business Administration	632
Curriculum and Pedagogy	571	Joint Degree Programs	633
Educational Leadership	575	Doctor of Philosophy in Business Administration	633
Human and Organizational Learning	582	Departments	634
Special Education and Disability Studies	585	Accountancy	634
School of Business	590	Master of Accountancy	615
Undergraduate Programs	595	Decision Sciences	637
Bachelor of Accountancy	595	Finance	640
Bachelor of Business Administration	599	Information Systems and Technology Management	644
Accountancy	602	Combined Bachelor of Business Administration and Master of Science in Information Systems Technology	647
Business Analytics	602	Master of Science in Information Systems Technology	647
Innovation and Entrepreneurship	603	International Business	647
Business Economics and Public Policy	603	Management	650
Finance	604	Marketing	653
Information Systems	605	Strategic Management and Public Policy	654
International Business	606	Elliott School of International Affairs	657
Marketing	607	Undergraduate Programs	665
Sport, Event, and Hospitality Management	608	Bachelor of Arts with a Major in Asian Studies	665
Individualized Field	609	Bachelor of Arts with a Major in International Affairs	666
Bachelor of Science with a Major in Finance	609	Bachelor of Arts with a Major in Latin American and Hemispheric Studies	667
Dual Degree Programs	613	Bachelor of Arts with a Major in Middle East Studies	668

Minors	669	Minor in Exercise Science	720
Graduate Programs	673	Minor in Nutrition	720
Master of Arts in the Field of Asian Studies	673	Minor in Public Health	720
Master of Arts in the Field of European and Eurasian Studies	679	Graduate Programs	721
Master of Arts in the Field of Global Communication	683	Master of Arts in the Field of International Affairs and Master of Public Health	721
Master of Arts in the Field of International Affairs	692	Master of Public Health: MPH@GW	722
Master of Arts in the Field of International Development Studies	693	Master of Health Administration with a Certificate in Healthcare Corporate Compliance	724
Master of Arts in the Field of International Science and Technology Policy	695	Master of Science in Health Policy with a Certificate in Healthcare Corporate Compliance	725
Master of Arts in the Field of International Trade and Investment Policy	696	Master of Science in Health Sciences in the Field of Physicians Assistant and Master of Public Health	725
Master of Arts in the Field of Latin American and Hemispheric Studies	697	Master of Public Health in the Field of Health Policy with a Certificate in Corporate Compliance	729
Master of Arts in the Field of Middle East Studies	698	Peace Corp Masters International Program and Master of Public Health	730
Master of Arts in the Field of Security Policy Studies	699	Doctor of Medicine and Master of Public Health	730
Master of International Policy and Practice	701	Juris Doctor in the Field of Law and Master of Public Health	731
Master of International Studies	701	Departments	732
Dual Master of Arts and Master of Public Health	701	Environmental and Occupational Health	732
Joint Master of Arts and Juris Doctor	702	Master of Public Health in the Field of Environmental Health Science and Policy	734
Joint Master of Arts and Master of Business Administration Degree Program	702	Master of Public Health in the Field of Global Environmental Health	737
Certificate Programs	702	Doctor of Public Health in the Field of Environmental and Occupational Health	741
Graduate Certificate in Global Gender Policy	702	Epidemiology and Biostatistics	742
Graduate Certificate in International Science and Technology Policy	703	Master of Public Health in the Field of Biostatistics	745
Graduate Certificate in Nuclear Policy	704	Master of Public Health in the Field of Epidemiology	748
Milken Institute School of Public Health	705	Master of Public Health in the Field of Global Health Epidemiology	750
Undergraduate Programs	711	Master of Science in the Field of Biostatistics	753
Bachelor of Science with a Major in Exercise Science	711	Master of Science in the Field of Epidemiology	755
Bachelor of Science with a Major in Exercise Science, Pre-athletic Training/Sports Medicine	712	Master of Science in the Field of Public Health Microbiology and Emerging Infectious Diseases	757
Bachelor of Science with a Major in Exercise Science, Pre-medical Professional Concentration	713	Doctor of Philosophy in the Field of Biostatistics	758
Bachelor of Science with a Major in Exercise Science, Pre-physical Therapy Concentration	714	Doctor of Philosophy in the Field of Epidemiology	760
Bachelor of Science with a Major in Public Health	715	Exercise and Nutrition Sciences	765
Combined Bachelor of Science in Public Health and Master of Public Health	718		

Bachelor of Science with a Major in Exercise Science	711	Prevention and Community Health	811
Bachelor of Science with a Major in Exercise Science, Pre-athletic Training/Sports Medicine	712	Master of Public Health in the Field of Community Oriented Primary Care	815
Bachelor of Science with a Major in Exercise Science, Pre-medical Professional Concentration	713	Master of Public Health in the Field of Health Promotion	819
Bachelor of Science with a Major in Exercise Science, Pre-physical Therapy Concentration	714	Master of Public Health in the Field of Maternal and Child Health	821
Minor in Exercise Science	720	Master of Public Health in the Field of Public Health Communication and Marketing	822
Minor in Nutrition	720	Doctor of Public Health in the Field of Health Behavior	825
Master of Public Health in the Field of Physical Activity in Public Health	770	College of Professional Studies	827
Master of Public Health in the Field of Public Health Nutrition	773	Undergraduate Programs	830
Master of Science in the Field of Exercise Science with a Concentration in Strength & Conditioning	776	Bachelor of Professional Studies with a Major in Cybersecurity	830
Global Health	777	Bachelor of Professional Studies with a Major in Integrated Information, Science, and Technology	831
Master of Public Health in the Field of Global Environmental Health	779	Bachelor of Professional Studies with a Major in Police and Security Studies	832
Master of Public Health in the Field of Global Health Communication	783	Bachelor of Arts with a Major in Political Communication and Master of Professional Studies in the Field of Political Management	833
Master of Public Health in the Field of Global Health Epidemiology	750	Bachelor of Arts with a Major in Political Science and Master of Professional Studies in the Field of Legislative Affairs	833
Master of Public Health in the Field of Global Health Program Design, Monitoring, and Evaluation	789	Bachelor of Arts with a Major in Political Science and Master of Professional Studies in the Field of Political Management	834
Master of Public Health in the Field of Global Health Policy	791	Graduate Programs	835
Doctor of Public Health in the Field of Global Health	794	Master of Professional Studies in the Field of Cybersecurity Strategy and Information Management	835
Health Policy and Management	795	Master of Professional Studies in the Field of Landscape Design	836
Master of Health Administration	796	Master of Professional Studies in the Field of Law Firm Management	837
Master of Health Administration - Online/Executive Program	799	Master of Professional Studies in the Field of Paralegal Studies	838
Master of Public Health in the Field of Health Policy	800	Master of Professional Studies in the Field of Paralegal Studies with a concentration in healthcare corporate compliance	839
Master of Science in the Field of Health Policy	806	Master of Professional Studies in the Field of Public Leadership	840
Health Services Administration Specialist	807	Master of Professional Studies in the Field of Publishing	841
Doctor of Philosophy in the Field of Public Policy and Administration (Health Policy Track)	808	Master of Professional Studies in the Field of Security and Safety Leadership	843
Doctor of Public Health in the Field of Health Policy	808		
Graduate Certificate in Health Administration Generalist	809		
Graduate Certificate in Health Policy	810		
Graduate Certificate in Long-Term Care	811		

Master of Professional Studies in the Field of Sustainable Urban Planning	845	Undergraduate Programs	874
Graduate School of Political Management	848	Associate's Degree in Nursing Pathway to Bachelor of Science in Nursing	874

ABOUT THE UNIVERSITY

George Washington was determined to have a great national university in the nation's capital. His hope was that students from all parts of the country would gain a first-hand knowledge of the practice as well as the theory of republican government while being instructed in the arts and sciences. He bequeathed 50 shares of The Potomac Company "towards the endowment of a University to be established within the limits of the District of Columbia, under the auspices of the General Government, if that government should incline to extend a fostering hand towards it." Despite Washington's intentions, The Potomac Company folded and Congress never extended a "fostering hand," so the University did not take shape until a group of Baptist clergymen led by Reverend Luther Rice took up the cause. They raised funds for the purchase of a site and petitioned Congress for a charter. Congress insisted on giving the institution a nonsectarian charter stating "That persons of every religious denomination shall be capable of being elected Trustees; nor shall any person, either as President, Professor, Tutor, or pupil, be refused admittance into said College, or denied any of the privileges, immunities, or advantages thereof, for or on account of his sentiments in matters of religion."

Columbian College, as it was originally named, took up residence on College Hill, a 46-acre tract between the present 14th and 15th Streets extending from Florida Avenue to Columbia Road. The name of the institution was changed in 1873 to Columbian University and in 1904 to The George Washington University.

In 1912, the University purchased 2023 G Street and rented 2024 Street, N.W., establishing what would become its Foggy Bottom campus. Today, more than 100 buildings are situated on 43 acres in the heart of Washington, D.C., bordered by the White House, John F. Kennedy Center for the Performing Arts, State Department, and World Bank, as well as numerous federal agencies and national galleries and museums.

GW's Virginia Science and Technology Campus (<http://virginia.gwu.edu>), initiated for graduate studies, research projects, and professional development programs, is located along the high-tech corridor on Route 7, just to the west of Route 28, in Loudoun County. In 1998, GW established The George Washington University at Mount Vernon College; the Mount Vernon Campus (<http://www.gwu.edu/mount-vernon-campus>) is on Foxhall Road in Northwest Washington.

Currently, the University's enrollments total more than 25,000, of which 10,100 are undergraduates, about 14,600 are graduate and professional students, and some 500 are non-degree students. GW students come from all 50 states and about 130 different countries.

MISSION

Mission Statement

The George Washington University, an independent academic institution chartered by the Congress of the United States in 1821, dedicates itself to furthering human well-being. The University values a dynamic, student-focused community stimulated by cultural and intellectual diversity and built upon a foundation of integrity, creativity, and openness to the exploration of new ideas.

The George Washington University, centered in the national and international crossroads of Washington, D.C., commits itself to excellence in the creation, dissemination, and application of knowledge.

To promote the process of lifelong learning from both global and integrative perspectives, the University provides a stimulating intellectual environment for its diverse students and faculty. By fostering excellence in teaching, the University offers outstanding learning experiences for full-time and part-time students in undergraduate, graduate, and professional programs in Washington, D.C., the nation, and abroad. As a center for intellectual inquiry and research, the University emphasizes the linkage between basic and applied scholarship, insisting that the practical be grounded in knowledge and theory. The University acts as a catalyst for creativity in the arts, the sciences, and the professions by encouraging interaction among its students, faculty, staff, alumni, and the communities it serves.

The George Washington University draws upon the rich array of resources from the National Capital Area to enhance its educational endeavors. In return, the University, through its students, faculty, staff, and alumni, contributes talent and knowledge to improve the quality of life in metropolitan Washington, D.C.

ACCREDITATION

Accreditation

The George Washington University is accredited by its regional accrediting agency, the Middle States Commission on Higher Education (<http://www.msche.org>).

The Law School (<http://www.law.gwu.edu>) is a charter member of the Association of American Law Schools (<http://www.aals.org>) and is approved by the Section of Legal Education and Admissions to the Bar of the American Bar Association (<http://www.americanbar.org>).

The School of Medicine and Health Sciences (<http://smhs.gwu.edu>) has had continuous approval by its accrediting body, which is currently the Liaison Committee on Medical Education (<http://www.lcme.org>), sponsored jointly by the American Medical Association (<http://www.ama-assn.org>) and the Association of American Medical Colleges (<https://www.aamc.org>). The medical laboratory science

program is accredited by the National Accrediting Agency for Clinical Laboratory Science (<http://www.naacls.org>). The Commission on Accreditation of Allied Health Education Programs (<http://www.caahep.org>) has accredited the program in Physician Assistant. The physical therapy program is accredited by the Commission on the Accreditation of Physical Therapist Education (<http://www.captionline.org>) of the American Physical Therapy Association.

In the School of Nursing (<http://nursing.gwu.edu>), the Bachelor of Science in Nursing, Master of Science in Nursing, and Doctor of Nursing Practice are accredited by the Collegiate Commission on Nursing Education (<http://www.aacn.nche.edu/ccne-accreditation>).

In the Milken Institute School of Public Health (<http://publichealth.gwu.edu>), the public health programs have full accreditation from the Council on Education for Public Health (<http://ceph.org>). The program in health services administration is accredited by the Commission on Accreditation of Healthcare Management Education (<http://www.cahme.org>).

In the School of Engineering and Applied Science (<http://www.seas.gwu.edu>), the Bachelor of Science programs in civil, mechanical, electrical, biomedical, and computer engineering are accredited by the Engineering Accreditation Commission of ABET, Inc (<http://www.abet.org>). The Bachelor of Science computer science curriculum is accredited by the Computing Accreditation Commission of ABET, Inc (<http://www.abet.org>).

The Graduate School of Education and Human Development (<http://gsehd.gwu.edu>) is a charter member of the American Association of Colleges for Teacher Education (<http://aacte.org>) and is accredited by the Council for the Accreditation of Educator Preparation (<http://www.ncate.org>) and the District of Columbia State Education Agency, Office of the State Superintendent of Education (<http://osse.dc.gov>), for its eligible master's, specialist, and doctoral degree programs; the master's programs in school counseling and clinical mental health counseling and the doctoral program in counseling are accredited by the Council for Accreditation of Counseling & Related Educational Programs (<http://www.cacrep.org>); the master's program in rehabilitation counseling is accredited by the Council on Rehabilitation Education (<http://www.core-rehab.org>).

The School of Business (<http://business.gwu.edu>) is a member of AACSB International-The Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu>); the Association accredits its undergraduate and graduate business administration and accountancy programs. The programs in accountancy satisfy the educational requirements for the Certified Public Accountant and the Certified Management Accountant professional examinations.

The Elliott School of International Affairs (<http://elliott.gwu.edu>) is a member of the Association of Professional Schools of International Affairs (<http://www.apsia.org>).

In Columbian College of Arts and Sciences (<http://columbian.gwu.edu>), the B.F.A. and M.F.A. in interior design are accredited by the Council for Interior Design Accreditation (<http://accredit-id.org>). The Department of Chemistry is on the approved list of the American Chemical Society. (<http://www.acs.org>) The Ph.D. program in clinical psychology in the Department of Psychology and the Psy.D. program in the Center for Professional Psychology are on the approved list of the American Psychological Association. (<http://www.apa.org>) The M.A. program in speech-language pathology is accredited by the Education and Training Board of the Boards of Examiners in Speech-Language Pathology and Audiology. The M.P.A. and M.P.P. programs are on the approved list of the National Association of Schools of Public Affairs and Administration (<http://www.naspaa.org>). The M.F.S. programs in forensic chemistry, forensic molecular biology, and forensic toxicology are accredited by the Forensic Science Education Programs Accreditation Commission (FEPAC (<http://fepac-edu.org>)).

BOARD OF TRUSTEES

The University is privately endowed and is governed by a Board of Trustees of which the President of the University is an *ex officio* member.

Nelson A. Carbonell, Jr., *Chair*

Ellen M. Zane, *Vice Chair*

I. Allan From, *Secretary*

W. Scott Amey, *Chairman, Amyx, Inc.*

Richard W. Blackburn, *Retired Executive Vice President, General Counsel, Chief Administrative Officer, Duke Energy*

Roslyn Brock, *Chairman, NAACP National Board of Directors*

Weston Burnett, *Managing Partner, Cohen & Burnett, P.C., CEO*

and President, OptiFour Integrated Wealth Management

Nelson A. Carbonell, Jr., *Chairman and CEO, Snowbird Capital*

Mark Chichester, *President, Atlas Research LLC*

George A. Coelho, *Managing Director, Good Energies (UK)*

Terry Collins, *Retired, Boeing*

Kyle Farmbry, *Acting Dean, Graduate School, Rutgers*

University--Newark

Lee Fensterstock, *Chairman and CEO, Fensterstock Associates*

Heather S. Foley

I. Allan From, *Shareholder, Howard, Stallings, From, & Hutson*

Titilola Harley, *Management Consultant, UPD Consulting*

Diana Henriques, *Contributing Writer, The New York Times*

A. Michael Hoffman, *Co-founder and Chairman, Palamon*

Capital Partners

James F. Humphreys, *President, James F. Humphreys &*

Associates

Madeline Jacobs, *President/CEO, Council of Scientific Society Presidents*

David C. Karlgaard, *Retired CEO and President, PEC Solutions*

Stuart S. Kassan, *Clinical Professor of Medicine, University of*

Colorado; Chief Medical Officer, Infusion Center of Denver

Jay E. Katzen, *Ophthalmologist and Ophthalmic Surgery*

J. Richard Knop, *Co-Founder and Co-Manager, Fed Cap Partners*
 Peter Kovler, *Chairman of the Board, Blum-Kovler Foundation*
 Randy L. Levine, *President, New York Yankees, Counsel, Jackson Lewis, P.C.*
 Ann Walker Marchant, *CEO, Walker Marchant Group*
 Sally Nuamah, *Ph.D. Candidate, Northwestern University*
 Steven S. Ross, *Senior Vice President, RBC Wealth Management*
 Mark R. Shenkman, *President and Chief Investment Officer, Shenkman Capital Management*
 Grace Speights, *Partner, Morgan Lewis's Labor and Employment Practice*
 Robert K. Tanenbaum, *Principal, Lerner Enterprises, and Principal Owner, Washington Nationals*
 Avram Tucker, *CEO and Co-founder, TM Financial Forensics, LLC*
 Cynthia Steele Vance, *Broadcast Journalist*
 George W. Welde, Jr., *Former Vice Chairman of the Securities Division, Goldman, Sachs*
 Art Wong, *Former CEO and Founder of EPMG (Emergency Physicians Medical Group)*
 Ellen M. Zane, *CEO Emeritus and Vice Chairman, Board of Trustees, Tufts Medical Center*

OFFICERS OF ADMINISTRATION

The University

Steven Knapp, *President*
 Steven Lerman, *Provost and Executive Vice President for Academic Affairs*
 Leo M. Chalupa, *Vice President for Research*
 Louis H. Katz, *Executive Vice President and Treasurer*
 Beth Nolan, *Senior Vice President and General Counsel*
 Lorraine Voles, *Vice President for External Relations*
 Sabrina Ellis, *Vice President for Human Resources*
 Aristide Collins, *Vice President for Development and Alumni Relations*

Deans of the Schools

Columbian College of Arts and Sciences—Ben Vinson III
 School of Medicine and Health Sciences—Jeffrey Scott Akman
 Law School—Blake D. Morant
 School of Engineering and Applied Science—David S. Dolling
 Graduate School of Education and Human Development—Michael J. Feuer
 School of Business—Linda Livingstone
 Elliott School of International Affairs—Michael E. Brown
 School of Public Health and Health Services—Lynn R. Goldman
 College of Professional Studies—Ali Eskandarian
 School of Nursing—Pamela R. Jeffries

DEGREES OFFERED

Degrees offered by the George Washington University

Columbian College of Arts and Sciences: Bachelor of Arts (B.A.), Bachelor of Fine Arts (B.F.A.), Bachelor of Science (B.S.), Master of Arts (M.A.), Master of Fine Arts (M.F.A.), Master of Forensic Sciences (M.F.S.), Master of Public Administration (M.P.A.), Master of Public Policy (M.P.P.), Master of Science (M.S.), Master of Philosophy (M.Phil.), Master of Psychology (M.Psy.), Doctor of Philosophy (Ph.D.), and Doctor of Psychology (Psy.D.)

School of Medicine and Health Sciences: Bachelor of Science in Health Sciences (B.S.H.S.), Master of Science in Health Sciences (M.S.H.S.), Doctor of Occupational Therapy (O.T.D.), Doctor of Physical Therapy (D.P.T.), and Doctor of Medicine (M.D.)

Law School: Juris Doctor (J.D.), Master of Laws (LL.M.), Master of Studies in Law (M.S.L.), and Doctor of Juridical Science (S.J.D.)

School of Engineering and Applied Science: Bachelor of Science (B.S.), Bachelor of Arts (B.A.), Master of Science (M.S.), Engineer (Engr.), Applied Scientist (App.Sc.), and Doctor of Philosophy (Ph.D.)

Graduate School of Education and Human Development: Master of Arts in Education and Human Development (M.A.Ed.&H.D.), Master of Arts in Teaching (M.A.T.), Master of Education (M.Ed.), Education Specialist (Ed.S.), Doctor of Education (Ed.D.), and Doctor of Philosophy (Ph.D.)

School of Business: Bachelor of Accountancy (B.Accy.), Bachelor of Business Administration (B.B.A.), Bachelor of Science (B.S.), Master of Accountancy (M.Accy.), Master of Business Administration (M.B.A.), Master of Science in Business Analytics (M.S.B.A.), Master of Science in Finance (M.S.F.), Master of Science in Government Contracts (M.S.G.C.), Master of Science in Information Systems Technology (M.S.I.S.T.), Master of Science in Project Management (M.S.P.M.), Master of Tourism Administration (M.T.A.), and Doctor of Philosophy (Ph.D.)

Elliott School of International Affairs: Bachelor of Arts (B.A.), Master of Arts (M.A.), Master of International Policy and Practice (M.I.P.P.), and Master of International Studies (M.I.S.)

Milken Institute School of Public Health: Bachelor of Science (B.S.), Master of Science (M.S.), Master of Public Health (M.P.H.), Master of Health Administration (M.H.A.), Doctor of Public Health (Dr.P.H.), and Doctor of Philosophy (Ph.D.)

College of Professional Studies: Associate in Professional Studies (A.P.S.), Bachelor of Professional Studies (B.P.S.), and Master of Professional Studies (M.P.S.)

School of Nursing: Bachelor of Science in Nursing (B.S.N.),
Master of Science in Nursing (M.S.N.), Doctor of Nursing
Practice (D.N.P.)

UNIVERSITY REGULATIONS

Students enrolled in the University are required to conform to the following regulations and to comply with the requirements and regulations of the school in which they are registered. Students who withdraw or are suspended, or who, for any other reason, are not registered at the University for one semester or more, may reapply and, if readmitted, continue their program only under the regulations and requirements in force at the time of return.

If a student knowingly makes a false statement or conceals material information on an application for admission or any other University document, the student's registration may be canceled. If such falsification is discovered after the student has matriculated at the University, the student may be subject to dismissal from the University. Such a student will be ineligible (except by special action of the faculty) for subsequent registration in the University.

Registration

Information on registration procedures is stated on the Office of the Registrar's website (<http://registrar.gwu.edu/how-register>) and in the Schedule of Classes (<http://my.gwu.edu/mod/pws>), which is available in advance of each semester.

Registration in courses is open only to those persons formally admitted to the University by the appropriate admitting office and to continuing students in good standing. Students may not register concurrently in this University and another institution without the prior permission of the advising office of the school in which they are registered in this University. With the exception of students enrolled in a joint degree program, registration in more than one school of the University requires the written permission of the student advising offices concerned, prior to registration. Registration is not complete until all financial obligations have been met. Individuals without a valid registration may not attend class or earn any course credit.

Eligibility for Registration

Registration for the following categories of on-campus students is held on the days of registration indicated in the Schedule of Classes (<http://my.gwu.edu/mod/pws>). A student who is suspended or whose record is encumbered for any reason is not eligible to register. Registration in a given course may be denied to non-degree students by the Office of Non-Degree Students (<http://www.gwu.edu/non-degree>) when space is needed for degree candidates.

New Student—Upon receipt of a letter of admission and payment of any required deposit, new students are eligible for registration on the stated days of registration. Registration for new freshmen is typically conducted on stated days as part of the Colonial Inauguration (<http://ci.gwu.edu>) orientation program.

Readmitted Student—A student previously registered in the University who was not registered during the preceding semester must apply for and be granted readmission by the appropriate admitting office before being eligible for registration.

Continuing Student—A student registered on campus in the immediately preceding semester or the summer session preceding the fall semester is eligible to register assuming good standing and enrollment in a continuing program.

Completion of Registration

Registration is not complete until financial obligations have been fulfilled. Students who do not complete their financial obligations in a timely manner may have their registration canceled and will not be permitted to attend class.

Registration for Consortium Courses

Degree students interested in taking courses at any of the other institutions in the Consortium of Universities of the Washington Metropolitan Area, Inc. (<http://www.consortium.org/consortium>) should consult the program announcements of the other institutions. In order to participate in the Consortium program, students must obtain the approval of an advisor and should ascertain from the department of the institution where the course is taught whether they are eligible for the course and whether there is space in the class. Consortium registration forms and detailed information concerning Consortium policy and procedures are available on the Office of the Registrar's website (<http://registrar.gwu.edu/consortium>). Specific inquiries should be addressed to the Office of the Registrar.

Adding and Dropping Courses

During the registration period and before the end of the second week of classes, students may add or drop courses using the GWeb Information System. (<http://my.gwu.edu>)

During the third and fourth weeks of classes (after the second week and prior to the end of the fourth week), students who wish to add or drop a course must complete a Registration Transaction Form-EZ (RTF-EZ (<https://registrar.gwu.edu/sites/registrar.gwu.edu/files/downloads/RTF-EZ.pdf>)) and submit it to the Office of the Registrar in Colonial Commons; adding a course after the second week of classes also requires the signature of the instructor or other authorized member of the department. A course dropped during the first four weeks of classes will not appear on the student's transcript.

After the fourth week of classes, students who wish to add or withdraw from a course must complete a Registration Transaction Form (https://registrar.gwu.edu/sites/registrar.gwu.edu/files/downloads/reg_transaction_form.pdf) (RTF) and submit it to their advising office. A course from which a student withdraws after the fourth week but before the end of the eighth week will be assigned a notation of W (Authorized Withdrawal). The deadline for withdrawing from a course is

the end of the eighth week of classes in the fall and spring semesters.

After the end of the eighth week of classes, students who wish to withdraw from any or all of their courses must submit a petition, along with substantial supporting documentation, to their advising office for consideration. Submission of a petition does not guarantee approval. Appropriate withdrawal forms are available online (<http://registrar.gwu.edu/forms>). Failure to withdraw by the stated deadlines can result in an extended financial obligation and the recording of a grade of *F* (Failure) or a notation of *Z* (Unauthorized Withdrawal).

Students should consult the Office of the Registrar's website (<http://registrar.gwu.edu>) for academic deadlines for the fall and spring semesters. Academic deadlines for courses that are not offered during the traditional fall and spring semesters can be found at the respective school's advising office.

All charges for courses that the student drops are subject to the refund policy listed under Fees and Financial Regulations in the Bulletin.

Changes in Program of Study

Changes Within a School—A student may not substitute one course for another within an established program of study or change status from credit to audit or from audit to credit without the approval of the advising office of the school in which he or she is registered. Change from one major field to another within the same school may be made with the approval of the advising office.

Undergraduate Transfer Within the University—Students are admitted to a home school at the time of their admission to the University. Those who wish to change their home school must submit an internal transfer request (https://registrar.gwu.edu/sites/registrar.gwu.edu/files/downloads/internal_transfer.pdf) to the University Registrar. A university-wide graduation requirement is that students must be registered in the college/school in which their primary major is housed. Some schools may require that certain prerequisite courses have been taken and that minimum grades have been earned before the transfer is processed. Transfer into a college/school does not guarantee placement in a limited-enrollment major and students will be transferred into an undeclared major. Requests to transfer schools will not be accepted prior to the second semester of the student's enrollment at GW. Students should meet prior to submitting an internal transfer request with an academic advisor in both their current college/school and the college/school into which they are requesting to transfer. Additional information, including deadlines, limited-enrollment majors, and prerequisites for internal transfers, is available on the Office of the Registrar's website (<http://registrar.gwu.edu/undergraduate-internal-transfer>).

Graduate Transfer Within the University—Application for transfer to another school must be made to the appropriate admitting office on the form provided by the office concerned.

Grades

Grades are made available to students through the Office of the Registrar (<http://registrar.gwu.edu>) after the close of each semester.

Undergraduate

The following grading system is used for undergraduate students: *A*, Excellent; *B*, Good; *C*, Satisfactory; *D*, Low Pass; *F*, Fail; other grades that may be assigned are *A–*, *B+*, *B–*, *C+*, *C–*, *D+*, and *D–*. Symbols that may appear include *AU*, Audit; *I*, Incomplete; *IPG*, In Progress; *W*, Authorized Withdrawal; *Z*, Unauthorized Withdrawal; *P*, Pass; *NP*, No Pass; *R*, Need to Repeat Course.

Repeating Courses for Credit—For courses that do not specifically state that repetition for credit is permitted, a student may, with permission of the instructor teaching the repeated course, repeat for credit a course in which a grade of *B–* (2.75) or lower for undergraduate students or *C–* or lower for graduate students was received. The student must complete an RTF form (https://registrar.gwu.edu/sites/registrar.gwu.edu/files/downloads/reg_transaction_form.pdf) to register. Credit for the repeated course will not count toward degree requirements; the grade earned in the repeated course will, however, be included in the student's cumulative grade-point average.

Graduate

The following grading system is used for graduate students: *A*, Excellent; *B*, Good; *C*, Satisfactory; *F*, Fail; other grades that may be assigned are *A–*, *B+*, *B–*, *C+*, *C–*. Symbols that may appear include *AU*, Audit; *I*, Incomplete; *IPG*, In Progress; *W*, Authorized Withdrawal; *Z*, Unauthorized Withdrawal; *CR*, Credit; *NC*, No Credit.

Unauthorized Withdrawal—The symbol of *Z* is assigned when students are registered for a course that they have not attended or have attended only briefly, and in which they have done no graded work. At the end of the academic year, students' records are reviewed; if there is more than one *Z* per semester, a student's record will be encumbered until released by the student's advising office. The symbol of *Z* is not a grade but an administrative notation.

Except for courses that specifically state that repetition for credit is permitted, a candidate for a degree at this University may not repeat a course in which a grade of *C–* for graduate students or better was received, unless required to do so by the department concerned. A written statement, indicating that the student is required to repeat the course, must be submitted to the student's advising office by the appropriate department chair.

Incompletes

The symbol *I* (Incomplete) indicates that a satisfactory explanation has been given to the instructor for the student's inability to complete the required work of the course during the semester of enrollment. At the option of the instructor, the symbol *I* may be recorded if a student, for reasons beyond the student's control, is unable to complete the work of the course, and if the instructor is informed of, and approves, such reasons before the date when grades must be reported. This symbol may be used only if the student's prior performance and class attendance in the course have been satisfactory. Any failure to complete the work of a course that is not satisfactorily explained to the instructor before the date when grades must be turned in will be graded *F*, Failure. If acceptable reasons are later presented to the instructor, that instructor may initiate an appropriate grade change, which in all cases will include the symbol *I*. The work must be completed within the designated time period agreed upon by the instructor, student, and school, but no more than one calendar year from the end of the semester in which the course was taken, or no more than one semester in the case of students enrolled in the School of Business. All students who receive an Incomplete must maintain active student status during the subsequent semester(s) in which the work of the course is being completed. If not registered in other classes during this period, the student must register for Continuous Enrollment status.

When work for the course is completed, the instructor will complete a grade change form and turn it in to the Office of the Registrar. Beginning with the fall 2014 semester, the final grade will replace the symbol of *I*. If work for the course is not completed within the designated time, the grade will be converted automatically to a grade of *F*, Failure, 0 quality points, and the grade-point average and academic standing recalculated.

The Grade-Point Average

Scholarship is computed in terms of the grade-point average, obtained by dividing the number of quality points by the number of credits for which the student has registered, both based on his or her record in this university. The grade-point average is computed as follows: *A*, 4.0; *A*–, 3.7; *B*+, 3.3; *B*, 3.0; *B*–, 2.7; *C*+, 2.3; *C*, 2.0; *C*–, 1.7; *D*+, 1.3; *D*, 1.0; *D*–, .7; *F*, 0, for each credit hour for which the student has registered as a degree-seeking student. Grades of *D*+, *D*, and *D*–, are not used for graduate students. Although credit value for a course in which a grade of *F* is earned appears on the transcript for the purpose of calculating the grade-point average, no academic credit is awarded. In the case of a student who is allowed to repeat a course, the first grade received remains on the student's record and is included in the grade-point average. Courses marked *AU*, *CR*, *I*, *IPG*, *P*, *NP*, *R*, *W*, or *Z* are not considered in determining the average, except that courses marked *I* will be considered when a final grade is recorded. With the exception of Consortium courses, grades in courses

taken at other institutions are not considered in computing the grade-point average.

Undergraduate Degree Requirements

To earn a bachelor's degree, students must complete 120 credits; meet the University general education requirement, school-specific requirements of their home school, and requirements of at least one major within their home school; fulfill the residence requirement; and have a cumulative grade point average of at least 2.0. Additional school-specific regulations may apply.

University General Education Requirement

Under the general education requirement, undergraduate students are required to take 19 credits in approved courses in the areas of writing, the humanities, natural or physical science, mathematics or statistics, and social science, plus two writing-in-the-discipline courses. The general education curriculum engages students in active intellectual inquiry across the liberal arts. Students achieve a set of learning outcomes that meaningfully enhance their analytical skills, develop communication competencies, and familiarize them with modes of inquiry.

The distribution for the general education requirement is as follows: Writing—one university writing course (UW 1020 or HONR 1015) and two writing-in-the-disciplines (WID) courses; Humanities—one course in the humanities; Mathematics or Statistics—one course in either mathematics or statistics; Natural or Physical Science—one natural or physical science course with laboratory; Social Science—two courses in the social sciences. The list of approved courses for each area can be found online and students should check the list before registering for classes. Students should address questions about this requirement to their advising office.

Residence requirement

To earn a bachelor's degree, students must earn at least 60 credits at or through GW, which may include a University-authorized study abroad and study away program. At least 30 of the 60 credits earned at or through GW must be in upper-level courses (numbered 2000 or above); at least 12 credits in upper-level courses must be in the major field, and at least 6 credits in upper-level courses must be in the minor field, if sought.

Graduate Degree Requirements

Graduate students should consult their program's advising office concerning degree requirements.

Academic Work Load

A full-time undergraduate program is defined as 12 to 17 credits per semester. Undergraduates taking more than 17 credits per semester must have approval from their advising office and will be charged at the rate of 1 credit for each credit exceeding that limit. Exceptions to the extra charge will be

made for students taking 18 credits if their program includes UW 1020 and for students in the School of Engineering and Applied Science whose program requires them to take 18 or 19 credits per semester.

A full-time undergraduate student on academic probation may register for up to 13 credits.

Graduate students should consult with their advising office to determine an academic workload that meets the requirements for their degree program.

Academic Standing

An undergraduate student who is not on academic probation or suspension for poor scholarship is considered to be in good academic standing.

Academic probation: Students are placed on probation if their semester or cumulative grade-point average is below 2.0 in any given semester.

Suspension for poor scholarship: Students will be subject to suspension if their semester grade-point average is below 1.0 in any given semester; they have two consecutive semesters of grade-point averages below 2.0; or they have three semesters of probationary status on their academic transcript.

Readmission after suspension for poor scholarship: A student suspended for poor scholarship may apply for readmission after at least one semester following the term of suspension and after having earned a minimum of 12 credits at an accredited institution of higher education. No credit will be assigned for academic work completed while the student is suspended. The student may petition their advising office to transfer in no more than 9 credits or three courses from other colleges or universities (see Earning Transfer Credit after Matriculation). A student suspended twice for poor scholarship will not be readmitted.

Dean's List

Undergraduate students who, in any one semester, earn 12 credits or more and attain a minimum semester grade point average of 3.75 in letter-graded course work, pass all non-graded credit courses, and do not have any Unauthorized Withdrawals (Z) or Incompletes (I), are placed on the Dean's List for that semester.

Latin Honors

Bachelor's degrees with honors are awarded to students whose academic records give evidence of particular merit. The student's grade-point average determines the level of honors as follows: *cum laude*, 3.4–3.59; *magna cum laude*, 3.6–3.79; *summa cum laude*, 3.8–4.0. The grade-point average includes all course work completed at GW. To be eligible for an honors designation, a student must complete at least 60 credits of course work with letter grades (grades included in calculating the grade-point average) at GW.

The grade-point average is calculated by the Office of the Registrar, and the honors designation is entered on the transcript and diploma of those students who earn an honors designation. If Latin honors are entered in the commencement program, honors status will be determined on the basis of work completed by the end of the seventh term and entered only for those students who have completed seven-eighths of the credits required for the degree. Latin honors indicated on the diploma are calculated on the basis of all course work completed. The diploma and transcript are the official indication that a degree was conferred and Latin honors awarded.

Special Honors

Special Honors may be awarded by the faculty to any undergraduate member of the graduating class for outstanding achievement in the student's major field on recommendation of the major department. The student must fulfill all of the following requirements: (1) Candidacy for Special Honors must be approved by the faculty member representing the major department or field not later than the beginning of the senior year. (2) Such other conditions as may be set at the time the candidacy is approved must be met. (3) At least one-half of the courses required for the degree must have been completed at GW. (4) The specific minimum requirement of the school in which the student is registered must be fulfilled as follows: (a) Columbian College of Arts and Sciences—a grade-point average of 3.0 on all course work taken at GW; (b) the Elliott School of International Affairs—a grade-point average of 3.7 on all course work taken at GW; (c) the Milken Institute School of Public Health—a grade-point average of 3.25 on all course work taken at GW. Special Honors awards appear on the transcript.

Double Majors

Undergraduates can declare no more than two majors; they can pursue minors or secondary fields in addition to the two majors if they wish but are generally advised against pursuing too many specializations.

Students who graduate with the requisite credits for one degree, having fulfilled the major requirements in more than one department, program, and/or school, will receive one degree. They must select a primary degree and major, as only the primary degree will show on the diploma, along with the two majors.

Students who complete the major requirements in their home school and the major requirements in a second school will receive the degree in the major of their home school and a notation on the transcript and diploma that testifies to completion of requirements for a secondary major. It is understood that requirements of the secondary major do not include the general education requirements of the second school.

Students who complete the major requirements for a degree different from the one they will receive in their home school

will receive the degree of the relevant major in their home school. For example, a SEAS student completing the degree requirements for a B.S. in computer science and the major requirements for a B.A. in fine arts will receive a B.S. in computer science with a secondary major in fine arts.

Students who complete two majors in the same school also receive one degree with two majors; if one major leads to a B.A. and one to a B.S., the student must declare a primary major and will receive the degree associated with that major.

Minors

Students may not declare a minor in the same subject in which they have declared a major. Students should address specific questions about this policy to the school's advising office.

Double Degrees

To earn two bachelor's degrees at the same time, students must be admitted to the college or school that offers the second degree; satisfy the general and major requirements for both degrees; complete at least 30 additional credits beyond the credits required to earn one degree or a total of 150 credits; and earn 90 credits in residence at GW. Students interested in pursuing this option must have a cumulative grade-point average of at least 3.3. Applications (<http://registrar.gwu.edu/forms>) for consideration should be sent to the student's advising office.

Study Abroad

Undergraduates who wish to study abroad during the academic year should contact the Office for Study Abroad (<http://studyabroad.gwu.edu>) concerning eligibility, appropriate procedures, and requirements for participation. Participants are billed GW charges for study abroad, rather than fees indicated by the visited school or program. To be eligible for the transfer of academic credit from study abroad, GW students must select a program from the University's authorized list of study abroad programs. Students must have a 2.75 cumulative grade-point average at the time of application and must have completed 45 credits prior to departure. Transfer students must complete one full semester at GW prior to application. Students who have a significant disciplinary history or who are on academic or disciplinary probation at the time of application are not eligible to study abroad. All programs of study abroad must be approved on the required forms prior to departure. Non-GW course credits earned in authorized programs with a C or above are transferable toward the appropriate degree at GW, provided there is no duplication of work done previously and faculty have designated each course with a GW course equivalent. Participants agree to abide by all procedures and regulations for study abroad as indicated in the Study Abroad Handbook and Participation Agreement distributed through the Office for Study Abroad. In addition to academic year programs, study abroad is available at varying locations during the summer.

Graduate students who wish to study abroad should consult their program's advising office.

Continuous Enrollment Status

Once entered in a degree program, a student is expected to be continuously enrolled and actively engaged in fulfilling the requirements for the degree each semester of the academic year until such time as the degree is conferred. A student is considered to be continuously enrolled when registered for courses through GW or when registered for Continuous Enrollment and engaged in and appropriately registered for activities such as the following, with the prior approval of the school in which the student is enrolled: cooperative work semester; study abroad program; attendance at another institution with prior approval to have work transferred back to the GW program; completion of outstanding work in courses in which a grade of Incomplete or In Progress was received; or non-course instructional activities unique to the particular school. This status is generally limited to one year. Should the student break continuous enrollment at the University and not request and be granted a leave of absence (see below), he or she must apply for readmission and, if granted, be subject to the requirements and regulations then in force.

Leave of Absence

A degree student who finds it necessary to interrupt active pursuit of the degree may petition his or her advising office for a leave of absence for a specific period of time, generally limited to one calendar year. A degree student who discontinues active enrollment in degree studies without being granted a leave of absence, or a student granted a leave who does not return to active study at the close of the period of approved absence, must apply for readmission and be subject to the regulations and requirements then in force. The right to use of University facilities is suspended while the leave is in effect.

Policy Regarding Students Called to Active Military Duty

Any student who is a member of a military reserve unit or the National Guard and is activated or called to active duty early in a semester or summer session automatically will be entitled to a full refund of all tuition and fees that he or she has paid toward the expenses of that academic term. If the notification of the call to active duty comes after the mid-term examinations or after other substantial graded work has been completed, the student will have the option of either taking a full refund of tuition and fees or taking an Incomplete in his or her courses with the privilege of returning to complete all required course work at some future date without payment of any further tuition and fee charges. It is the responsibility of the student to present evidence of his or her activation to the Office of Student Accounts (<http://studentaccounts.gwu.edu>) and to request the appropriate refund.

Should a degree student called up for active duty find it necessary to interrupt active pursuit of the degree, the student may petition their advising office for a leave of absence for a specified period of time, generally limited to one calendar year. Student advisors are encouraged to grant any request to extend the leave of absence for longer than the customary period should military service require an absence of more than one year. All students on active duty will be automatically exempted from the request for a voluntary library contribution without requiring any communication from them or their initials on the bill.

Eligibility for Graduation

Degrees are conferred in January, May, and August. To be eligible for graduation a student must have met the admission requirements of the school in which registered; completed satisfactorily the scholarship, curriculum, residence, and other requirements for the degree as stated in this bulletin; filed an application for graduation by the published deadline date; and be free from all indebtedness to the University. Enrollment is required for the semester or summer at the close of which the degree is to be conferred, and all degree requirements must be completed by the last day of final examinations for that semester or summer session. Undergraduates who pursue a double major across two schools must complete the primary major in their home school in order to graduate. A second major may supplement the primary major but may not substitute for it.

Graduate Thesis or Dissertation

Graduate students whose program includes a thesis or dissertation must meet the following Electronic Theses and Dissertations (ETD) deadlines for graduation in the respective semesters: for theses, May 15 for spring, January 15 for fall, and August 15 for summer; for dissertations, April 1 for spring, January 15 for fall, and August 15 for summer.

Doctoral candidates who have not successfully defended their dissertation and met the ETD deadline may not participate in either the May commencement or hooding ceremony.

Students who apply after the published deadlines are not guaranteed commencement materials. Summer graduates who elect to attend the preceding May ceremony must apply for graduation no later than February 1.

Graduate Thesis or Dissertation—A thesis or dissertation submitted in partial fulfillment of requirements for a degree must be presented in its final form by the deadline set by the school concerned. Accepted theses and dissertations, with accompanying files, become the property of the University. Accepted theses and dissertations are submitted electronically; the student pays a processing fee directly to Proquest/UMI. See the appropriate school in this Bulletin for regulations governing theses and dissertations.

Participation in the Commencement Ceremony

Participation in the annual commencement ceremony held in May is open to students who have applied to graduate in the current spring semester or who graduated the preceding fall semester or summer session. With the exception of doctoral candidates, all students, graduate or undergraduate, who need no more than 9 credit to complete their degree requirements, may participate in May commencement ceremonies if there is a reasonable expectation that they will be able to obtain the needed credits during the following summer. The maximum of 9 credit is firm and not subject to petition.

Complete Withdrawal From the University

A degree-seeking student who wishes to withdraw from all courses during a given semester must complete a Complete Withdrawal Form (<https://registrar.gwu.edu/sites/registrar.gwu.edu/files/downloads/completewithdrawal.pdf>) and submit it to the Office of the Registrar (<http://registrar.gwu.edu>). Forms are available on line, at advising offices, and in the Office of the Registrar. The deadline for complete withdrawal from all courses without academic penalty is the end of the ninth week of classes. Complete withdrawal after the ninth week requires a petition to the student's advising office.

All charges for courses from which the student withdraws are subject to the refund policy found at the Registrar's Office website. Failure to complete a Complete Withdrawal Form (<https://registrar.gwu.edu/sites/registrar.gwu.edu/files/downloads/completewithdrawal.pdf>) can result in an extended financial obligation and the recording of grades of *F* (Failure) or notations of *Z* (Unauthorized Withdrawal).

The University is authorized to award the degree of Associate in General Studies under designated circumstances. This degree may be awarded to students in good standing who must leave GW after completing 60 credits in residence in a degree-granting GW school; students should consult their school's advising office about additional requirements for awarding of the Associate in General Studies.

Non-Degree Students

The Office of Non-Degree Students (<http://www.gwu.edu/non-degree>) makes credit-bearing courses available to those who are not degree candidates at GW and to students who have been admitted to the University for a future semester. Non-degree students are allowed a maximum per semester of 12 credits at the graduate level and 18 at the undergraduate level, except in special circumstances as approved by the director. Medical and law courses are not available to non-degree students. Special program credit limits may vary.

Non-degree applicants must have appropriate academic preparation prior to enrollment. Prerequisites are specified in

this Bulletin in the course description. Contact the department concerned for further information regarding appropriate academic background for a particular course. An applicant who has previously attended this or another college or university must be in good standing at that institution. An applicant who has been suspended from any educational institution will not be eligible to enroll as a non-degree student for one calendar year after the effective date of the suspension. An applicant who has been denied admission within this university will not be eligible to enroll as a non-degree student for the same semester for which the application was denied. Applications and information on registration are available online (<http://www.gwu.edu/non-degree>). Prospective and registered students should acquaint themselves with the regulations concerning attendance and withdrawal stated in this section or at www.gwu.edu/non-degree (<http://www.gwu.edu/non-degree>). If a non-degree student takes a course for which the symbol I (Incomplete) is assigned, the instructor normally sets a period (maximum of one year) within which the uncompleted work must be made up. An Incomplete that is not changed within one calendar year becomes a grade of IF on the student's record.

University Policies and Definitions

Right to Change Rules and Programs—The University reserves the right to modify or change requirements, rules, and fees. Such regulations shall go into force whenever the proper authorities may determine. The right is reserved by the University to make changes in programs without notice whenever circumstances warrant such changes.

University Policy on Equal Opportunity—The George Washington University does not unlawfully discriminate against any person on any basis prohibited by federal law, the District of Columbia Human Rights Act, or other applicable law, including without limitation, race, color, religion, sex, national origin, age, disability, veteran status, sexual orientation, or gender identity or expression. This policy covers all programs, services, policies, and procedures of the University, including admission to education programs and employment.

Inquiries concerning this policy and federal and local laws and regulations concerning discrimination in education and employment programs and activities may be directed to the University's Office of Equal Employment Opportunity and Affirmative Action (<http://hr.gwu.edu/equal-employment-opportunity>), Suite 320, 2033 K Street NW, Washington DC 20052, (202) 994-9656. Inquiries may also be directed to the U.S. Department of Education Office for Civil Rights, the U.S. Equal Employment Opportunity Commission, or the applicable state or local agency (for example, the District of Columbia Office of Human Rights).

Questions regarding protections against discrimination on the basis of sex may be directed to the University's Title IX Coordinator, the Vice Provost for Diversity and Inclusion

(<http://diversity.gwu.edu>), Rice Hall 813, 2121 Eye Street NW, Washington DC 20052, (202)994-7440.

Questions regarding the protections against discrimination on the basis of disability may be directed to the University's Disability Services Coordinators (<http://gwired.gwu.edu/dss>). Students may contact the Associate Dean of Students, Administrative Services, Office of the Dean of Students, Rice Hall 401, 2121 Eye Street NW, Washington DC 20052, (202)994-6710, and other members of the University community may contact the Executive Director of Equal Employment Opportunity and Affirmative Action, Suite 320, 2033 K Street NW, Washington DC 20052, (202)994-9633.

To request disability accommodations, students should contact the Office of Disability Support Services at (202)994-8250 or dss@gwu.edu. Employees and other members of the University community should contact the Office of Equal Employment Opportunity and Affirmative Action at (202)994-9656 or eeo@gwu.edu.

Academic Integrity—The University community, in order to fulfill its purposes, must establish and maintain guidelines of academic behavior. All members of the community are expected to exhibit honesty and competence in their academic work. Incoming students have a special responsibility to acquaint themselves with, and make use of, all proper procedures for doing research, writing papers, and taking examinations. Members of the community will be presumed to be familiar with the proper academic procedures and held responsible for applying them. Deliberate failure to act in accordance with such procedures will be considered academic dishonesty. Acts of academic dishonesty are a legal, moral, and intellectual offense against the community and will be prosecuted through the proper University channels. The University Code of Academic Integrity (<https://studentconduct.gwu.edu/sites/studentconduct.gwu.edu/files/downloads/130722%20Code%20of%20Academic%20Integrity%20-%20Final.pdf>) can be found at the Office of Academic Integrity (<http://studentconduct.gwu.edu>).

Patent and Copyright Policies—Students who produce creative works or make scientific discoveries while employed or supported by the University or through substantial use of University resources are subject to the University's patent and copyright policies. See The Office of the Vice President for Research (<http://bulletin.gwu.edu/university-regulations/file:///C:/Users/FINAL/research.gwu.edu>).

Human Research Requirements—Students who are planning to conduct research involving the use of human subjects (for a thesis, dissertation, journal article, poster session, etc.) must obtain Institutional Review Board (IRB) (<http://humanresearch.gwu.edu/institutional-review-board-process>) approval before collecting any data. For more information see The Office of the Vice President for Research (<http://research.gwu.edu>).

English for Academic Purposes—Undergraduate and graduate international students whose TOEFL, IELTS, or PTE scores fall below established cut-off points are required to take one or more courses in the English for Academic Purposes (EAP) program. Both undergraduate and graduate students receive credit for EAP courses; however, in most cases graduate EAP credits cannot be applied to a degree. Graduate students placed in EAP courses should anticipate additional tuition expenses as well as possible extension of time needed to complete their degree programs. For detailed information concerning this requirement consult the English for Academic Purposes Program website (<http://eap.columbian.gwu.edu/placement-eap-courses>).

Use of Correct English—A report regarding any student whose written or spoken English in any course is unsatisfactory may be sent by the instructor to the advising office of the school, who may assign supplementary work, without academic credit, varying with the needs of the student. If the work prescribed is equivalent to a course, the regular tuition fee is charged. The granting of a degree may be delayed for failure to make up any such deficiency in English to the satisfaction of the advising office.

Name of Record—A student's name of record includes the first name, middle initial or full middle name, and the family name. Nicknames may not be used. The University will change the name of a currently enrolled student on its official records but will require satisfactory evidence of a legal basis for the change. The diploma is awarded under the official name of record at the time of graduation.

Student Status—For the purpose of defining student status, undergraduates taking 12 or more credits per semester are considered to be full time, those taking 6 to 11 credits per semester are considered to be half time, and all others are considered to be part time. Generally, an undergraduate becomes a sophomore upon completion of 30 credits, a junior upon completion of 60 credits, and a senior upon completion of 90 credits.

During the fall and spring semesters graduate students taking 9 or more credits are considered to be full time, those taking 4.5 to 8.5 credits are considered to be half time, and all others are considered to be part time. In the summer full-time status requires 6 credits, half-time status, 3 credits. Unless otherwise indicated under the program, all programs of study are offered on both a full-time and part-time basis. International students in F-1 or J-1 immigration status may pursue only full-time programs of study, and such students must register for and complete a full course load each semester as defined by federal regulations.

Graduate students who have completed all course and credit requirements for the degree except dissertation or thesis research may be certified as full-time students provided they are registered for at least 3 credits of dissertation or thesis research, are actively engaged in dissertation or thesis research

and writing, and are not employed more than 20 hours per week. Graduate students who have completed all credit requirements for the degree, including dissertation or thesis research, but have not completed all degree requirements, may be certified as full-time students provided they have not exceeded the established time limits for degree completion, are registered for Continuous Research, and are not employed more than 20 hours per week. Those who meet all conditions stated above but are employed more than 20 hours per week may be certified as half-time students.

Attendance—Students may attend only those classes for which they are officially registered. Regular attendance is expected. Students may be dropped from any course for undue absence. A student suspended for any cause may not attend classes during the period of suspension. Students are held responsible for all of the work of the courses in which they are registered, and all absences must be excused by the instructor before provision is made to make up the work missed.

Credit—A credit hour may be defined as one 50-minute class period, one laboratory period, or 1.5 hours of studio class a week for one semester. Credit is given only after completion of registration in a course and satisfactory completion of the required work, or upon the assignment of advanced standing in accordance with the regulations of the school concerned. Credit that has been applied to the completion of a degree may not subsequently be applied to another degree.

Auditing—A person who has been admitted to the University may be registered, with the permission of the instructor, as an auditor in a class (no academic credit). An auditor is not required to take active part or to pass examinations. A student who takes a course as an auditor may not repeat it later for credit. Tuition is charged at the prevailing rate. A student may not change from audit to credit status or vice versa after the end of the eighth week of classes.

Earning Transfer Credit after Matriculation—All students who plan to attend another institution while enrolled at GW and apply credits earned at that institution toward GW degree requirements must complete an Undergraduate Transfer Credit Approval Form (<https://registrar.gwu.edu/sites/registrar.gwu.edu/files/downloads/transfercrredit.pdf>) and secure the written approval from the GW department that offers a comparable course and from the student's advising office. With the exception of credits earned from GW study abroad and study away programs, no more than 9 credits or three courses may be transferred from colleges or universities after matriculation.

Transcripts of Record—Official transcripts of student records are issued upon written request of the student or former student who has paid all charges, including any student loan installments, due the University at the time of the request. A nominal fee is charged for each official transcript. Unofficial copies of transcripts are available to students, by written request, at a nominal fee. Partial transcripts are not issued.

Students have access to their unofficial student record through the GWeb Information System (https://banweb.gwu.edu/PRODCartridge/twbkwbis.P_WWWLogin).

Student Conduct—All students, upon enrolling and while attending this University, are subject to the provisions of the *Guide to Student Rights and Responsibilities* (<http://studentconduct.gwu.edu/guide-student-rights-responsibilities>), which outlines student freedoms and responsibilities of conduct, including the Code of Student Conduct (<http://studentconduct.gwu.edu/code-student-conduct>), and other policies and regulations as adopted and promulgated by appropriate University authorities. Copies of these documents may be obtained from the Office of the Dean of Student Affairs (<http://students.gwu.edu>) or from advising offices. Sanctions for violation of these regulations may include permanent expulsion from the University. Regulations or requirements applicable only to a particular program, facility, or class of students may not be published generally, but such regulations or requirements shall be published in a manner reasonably calculated to inform affected students.

Right to Dismiss Students—The right is reserved by the University to dismiss or exclude any student from the University, or from any class or classes, whenever, in the interest of the student or the University, the University Administration deems it advisable.

University Policy on the Release of Student Information—The Family Educational Rights and Privacy Act (FERPA) (<http://registrar.gwu.edu/university-policies/#ferpa>) applies to institutional policies governing access to and release of student education records.

The University may release the following directory information upon request: name, local address including e-mail, and telephone number; name and address of emergency contact; dates of attendance; school of enrollment; field of study; enrollment status; credits earned; degrees earned; honors received; participation in University-recognized organizations and activities (including intercollegiate athletics); and height, weight, and age of members of athletic teams, as well as likenesses used in University publications. A student who does not wish such directory information released must file written notice to this effect in the Office of the Registrar (<http://registrar.gwu.edu>).

The University's full policy statement on the release of student information is published in the *Guide to Student Rights and Responsibilities*, available in the Office of the Dean of Student Affairs or the offices of the academic deans. The full statement also appears on the Office of the Registrar's website.

Student Identification Number/Social Security Number—The University has converted from use of the Social Security Number (SSN) to identify records pertaining to individual students, although the SSN is still needed to identify the student for purposes of financial aid eligibility and disbursement and repayment of financial aid and other debts

payable to the University. The SSN is required when applying for financial aid. The Internal Revenue Service requires the University to file information that includes a student's SSN and other information such as the amount paid for qualified tuition, related expenses, and interest on educational loans. This information is used to help determine whether a student, or a person claiming a student as a dependent, may take credit or deduction to reduce federal and/or state income taxes. Many efforts are made to protect the privacy of this number, and a student may request an alternate personal identifier. Further information may be obtained by contacting the Office of the Registrar.

Property Responsibility—The University is not responsible for the loss of personal property. A Lost and Found Office is maintained on campus in the University Police Department (<http://police.gwu.edu>).

ADVANCED PLACEMENT EQUIVALENTS

Assuming there is no duplication of course work, a maximum of 24 credits may be awarded on the basis of work completed while enrolled in high school, including examinations such as AP/IB and collegiate credits taken while in high school.

Credit through Examination

In order to receive credit for College Board Advanced Placement (AP) examinations, students must have official score results forwarded directly to GW from the College Board. GW's College Board code is 5246.

Official International Baccalaureate (IB) results should be sent as soon as they are available.

Be aware that credit earned by examination at other colleges or universities or examinations taken after having taken the appropriate college-level course will not transfer credit to GW.

Please refer to the following charts for GW's course equivalents:

- Advanced Placement (AP) credit (<https://undergraduate.admissions.gwu.edu/node/81>)
- International Baccalaureate (IB) credit (<https://undergraduate.admissions.gwu.edu/bring-credits-gw>)

Advanced Placement (AP) Examination	Score	Credits	Equivalent Course
Arts			
AP Art History	4 or 5	6	AH 1031, AH 1032

AP Spanish Literature and Culture	4 or 5	3	SPAN 2005

The university reserves the right to change policy regarding advance placement credit without advance notice.

UNIVERSITY GENERAL EDUCATION REQUIREMENT

The general education curriculum engages students in active intellectual inquiry across the liberal arts. Students achieve a set of learning outcomes that meaningfully enhance their analytical skills, develop communication competencies, and familiarize

them with modes of inquiry. Course work for the university general education curriculum includes 19 credits of approved courses in writing, natural or physical science, mathematics or statistics, social science, and the humanities, plus two writing-in-the-discipline courses.

The distribution for the university general education requirements are below along with the list of approved courses for each area. Students should check the approved list before registering for classes. Questions about requirements should be addressed to a professional academic advisor.

- Writing (p. 30)
 - One course in university writing
 - Two writing-in-the-disciplines (WID) courses. WID course offerings can be found on the University Writing website. (<http://writingprogram.gwu.edu>)
- Humanities (p. 30)
 - One course in the humanities
- Mathematics or Statistics (p. 33)
 - One course in either math or statistics
- Natural or physical laboratory sciences (p. 33)
 - One natural or physical science course with laboratory experience
- Social Sciences (p. 34)
 - Two courses in the social sciences

UNDERGRADUATE ADMISSIONS

The goal of GW's Office of Undergraduate Admissions (<http://undergraduate.admissions.gwu.edu>) is to create a community of students who will pursue academic excellence, thrive in our dynamic environment, and make lasting contributions to GW and the world. In order to identify these students, the admissions review process is holistic and thoughtful, taking many factors into consideration. GW receives applications from every state and nearly 100 countries, allowing us to enroll a bright, talented, and diverse student body.

Freshmen–Early Decision

The University offers two Early Decision options for students who have chosen GW as their first choice school. The deadline for submission of all required documents is November 1 for Early Decision I and January 1 for Early Decision II. Both Early Decision options are binding; if admitted, students agree to attend GW, submit a nonrefundable enrollment deposit by the deadline detailed in their acceptance packet, and withdraw all applications submitted to other colleges.

Freshmen–Regular Decision

The Regular Decision application deadline is January 1. A complete application file, including the Common Application with required essays, official secondary school transcript/academic record, counselor recommendation, teacher recommendation, and application fee must be submitted by that date. The secondary school transcript must be submitted to GW directly from the school in order to be considered official. Incoming freshmen must have their secondary school submit a final transcript that shows all final grades and certification of graduation before enrolling at GW in the fall semester.

Portfolio Requirement

Applicants for admission to a program in the Corcoran School of the Arts and Design (<http://corcoran.gwu.edu>) are required to submit a portfolio of 10 to 15 completed works of art as part of the application process.

Entrance Examinations

As a test-optional institution, GW allows most applicants to decide whether they will submit scores on either the College Board Scholastic Assessment Test (https://sat.collegeboard.org/SAT/next-steps-toward-college?s_kwcid=AL4330I3!70927704644!b!g!!collegeboard&ef_id=VYB-rgAABKpqtRg9:20150831144404:s) (SAT) or on the American College Testing (<http://www.act.org>) (ACT) to be included in their application.

This test-optional policy does NOT apply to the following groups of applicants:

- Applicants to the accelerated seven-year B.A./M.D. program; such students also are required to submit SAT Subject Tests in mathematics and science.
- Applicants who are homeschooled.
- Applicants from secondary schools that provide only narrative evaluations rather than grades based on some form of grading scale.
- Recruited NCAA Division I athletes.

Students who choose to submit scores must have them sent by the testing agency directly to the Office of Undergraduate Admissions. All entering students who have scores must submit them to GW prior to enrolling for their freshman year.

International Students

In addition to the Common Application and the supporting credentials listed above, international students must submit the following documents in order to be considered for admission:

Required Records

International students must have all previously attended educational institutions send copies of official certificates and records listing subjects studied, examinations taken, grades received, and degrees received directly to the Office of Undergraduate Admissions. Certified copies of diplomas and certificates from all secondary schools, colleges, and universities attended as well as records of state examinations and certificates are also required. These records become the property of the University and cannot be returned. In addition, documents must be in the language in which the institution keeps its official records. If they are in a language other than English, the copies sent must be accompanied by a certified English translation.

Language Tests

Applicants who indicate on their Common Application that their first language is not English are required to submit scores from the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or the PTE Academic, regardless of citizenship or country of residence. The minimum required score is 90 on the Internet-based TOEFL or a 6.5 on the IELTS; strong applicants to GW typically score much higher than the minimum required scores. The TOEFL/IELTS/PTE Academic requirement may be waived for applicants who score 600 or above on the Critical Reading section of the SAT or who have spent their last four years of secondary school in a setting where English is the sole language of instruction in all academic subjects with the exception of foreign language and ESL/ELL courses.

Students should plan to take the test in question well in advance of the application deadline in order for scores to be available on time and should request to have the scores sent to the GW Office of Undergraduate Admissions directly from the testing agency. TOEFL scores more than two years old will not be considered valid.

Some admitted students whose first language is not English may also be required to take an English for Academic Purposes (<http://eap.columbian.gwu.edu>) (EAP) course once they enroll at GW.

Financial Certification

A financial certificate and bank letter must be completed and submitted as part of the application process for all international students planning to study on either a student (F) visa or exchange visitor (J) visa. The completed and signed financial certificate and bank letter are required for the issuance of Form I-20 or DS-2019, one of which is needed to apply for the F or J visas.

Transfer Students

GW considers for transfer admission any student who has completed at least one college course since secondary school graduation. Transfer applicants must submit the Common Application and supporting credentials (including official college transcripts, the Registrar Report for each institution attended, and a faculty recommendation) by March 1 for fall admission and October 1 for spring admission.

Transfer applicants must be in good standing in terms of academic record and conduct at all postsecondary institutions previously attended. Applicants who have attended one or more institutions of higher education must submit official transcripts from each institution even if credit was not sought or earned or if advanced standing is not desired. In addition, applicants must submit an official secondary school transcript if they have earned fewer than 30 transferrable credits at the time of application.

Assignment of Credit for Transfer Students

Provided there is no duplication involved through coursework or examination, credit may be granted for coursework successfully completed at other regionally accredited institutions of higher learning. Assignment of transfer credit will depend on the grade earned, the appropriateness of the courses completed, the standing of the institution at which the previous work was completed, and the regulations of the GW school to which the student is transferring.

GW's residence requirement limits the number of transfer credits that can be applied toward a degree. Students must complete at least 60 credits of the total credits required for their degree at or through the University. Credits earned through GW study abroad, GW satellite campuses, GW distance education courses, and Consortium courses are treated as "in residence."

Transfer credit must satisfy the requirements for the degree sought as stated in this Bulletin. Credit may be accepted provisionally or may require validation by examination or completion of higher-level courses in the same sequence. Transfer credit will not be assigned for coursework completed in vocational/technical programs (e.g., secretarial studies) or

sub-freshman level remedial work. Each GW school reserves the right to refuse credit for transfer in whole or in part. Although a grade of D in a course is not acceptable for transfer of credit, the course may satisfy a curriculum requirement. School-specific regulations on transfer credit appear in this Bulletin. .

Transfer credit that is accepted and applied to a student's GW academic record counts toward the number of credits completed only. The grades from these courses are not used in calculating a student's GW grade point average.

Application for Second Bachelor's Degree

Students who previously earned a bachelor's degree are not eligible for admission.

Advanced Standing and Advanced Placement

Assuming there is no duplication of coursework, a maximum of 24 credits may be awarded upon admission to the University for any combination of Advanced Placement (AP) and International Baccalaureate (IB) examinations. An incoming student also may be granted advanced placement in a sequence of courses or waiver of a course requirement based on additional college-level coursework taken in secondary school or before matriculation; however, this will not affect the number of hours needed for the degree.

College Board Advanced Placement (<https://apstudent.collegeboard.org/home>) (AP) Tests

Credit may be awarded for Advanced Placement tests with certain score results, typically 4s and 5s. (Refer to the GW Undergraduate Admissions website for the AP credit assignment chart (<https://undergraduate.admissions.gwu.edu/advanced-placement-ap-credit>).) Students must have AP score reports sent directly from the College Board to the Office of Undergraduate Admissions.

International Baccalaureate (<http://www.ibo.org>) (IB)

GW typically awards 6 to 8 credits for scores of 6 or 7 on the higher-level examinations. (Refer to the GW Undergraduate Admissions website for the IB credit assignment chart (<https://undergraduate.admissions.gwu.edu/international-baccalaureate-ib-credit>).) Students must have IB score reports sent directly from International Baccalaureate to the Office of Undergraduate Admissions.

Enrollment Deposit

After notification of admission, all new undergraduate students are required to submit a nonrefundable enrollment deposit. This deposit is due May 1 for freshmen. For transfer students and full-time readmitted students, the deposit usually is due two to three weeks after notification of admission.

Readmission

Students who were previously registered at GW who wish to resume studies at the University after discontinuing enrollment for one or more semesters (summer sessions and leaves of absence excluded) must apply for readmission. Deadlines for applications for readmission from students in good academic standing are March 15 for the fall semester and October 31 for the spring semester. Students seeking readmission must have official transcripts sent to the Office of Undergraduate Admissions from all other institutions of higher education they attended in the interim. Students seeking readmission as degree candidates after previous enrollment in non-degree status at GW must submit the Common Application and all required credentials that were not submitted previously or required for non-degree admission.

Applicants for readmission are subject to the University regulations in effect at the time of readmission. The application fee is waived for students applying for readmission after previous enrollment as a degree candidate.

FEES AND FINANCIAL REGULATIONS

The following fees and financial regulations were adopted for the academic year 2015-16. Information on tuition and fees for the summer is available on the Summer and Special Programs website (<http://summer.gwu.edu>).

Tuition Fees

For undergraduates entering GW in academic year 2015-16, the University continues its fixed-rate tuition plan, with the following academic-year tuition fee guaranteed not to increase for up to five years of full-time* undergraduate study: \$50,367 for students entering Columbian College of Arts and Sciences, the School of Business, the School of Public Health and Health Services, the School of Engineering and Applied Science, and the Elliott School of International Affairs.

The fixed-rate tuition remains in effect as previously stated for undergraduates in the schools listed above: for those who entered GW in 2015-16 (\$50,367); 2014-15 (\$48,700); 2013-14 (\$47,290); 2012-13 (\$45,735).

For students in the Corcoran School of the Arts and Design, tuition and fees in academic year 2015-16 are \$32,875.50 and are subject to change for the 2016-17 academic year.

Half-time, part-time, non-degree, and College of Professional Studies students are charged \$1,430 per credit.

Fees stated here exclude undergraduate nursing and health sciences programs; consult the School of Nursing or the Office of Health Sciences Programs in the School of Medicine and Health Sciences for applicable fees.

The schedule of tuition and fees adopted for graduate programs for the academic year 2015-16 appears on the Students Accounts website (<http://studentaccounts.gwu.edu>).

Tuition rates for students admitted to the B.A./M.D. program are indicated in the letter of admission.

* A full-time program is defined as 12-17 credits per semester. Undergraduates taking more than 17 credits per semester will be charged at the rate of 1 credit for each credit exceeding that limit. Undergraduates are not charged for an eighteenth credit if their program includes UW 1020, nor are those in the School of Engineering and Applied Science charged for the eighteenth and nineteenth credits if required by their program.

Student association fee

The student association fee is fixed, in keeping with the fixed-rate tuition plan. Undergraduate students entering in the fall 2015 semester and all graduate students are assessed a nonrefundable student associate fee of \$2.25 per credit to a maximum of \$33.75 per semester. Returning undergraduate

students are assessed the fee as follows: for those who entered GW in 2015-16—\$2.25 per credit to a maximum of \$33.75 per semester; 2014-15—\$2.00 per credit to a maximum of \$30.00 per semester; 2013-14—\$1.75 per credit to a maximum of \$26.25 per semester; prior to fall 2013—\$1.50 per credit to a maximum of \$22.50 per semester.

Voluntary library gift

Each semester the student's account is assessed a voluntary gift to support the University libraries. The contribution is voluntary and the student is provided an opportunity to decline the library gift when making payments using the online eBill solution or when using a printed account statement.

Housing and Dining

The fee structures for campus housing and dining plans can be found at GW Housing (<http://living.gwu.edu>) and GW Campus Dining (<http://gwcampusdining.com>), respectively.

Continuing research

All master's and doctoral students who have completed their required number of credits (including coursework and thesis or dissertation research) must register each subsequent fall and spring semester for 1 credit hour of Continuing Research as specified by the regulations of the school concerned.

Payment of tuition for thesis or dissertation research entitles the candidate, during the period of registration, to the advice and direction of the member of the faculty under whom the thesis or dissertation is to be written. Accepted dissertations and theses are submitted electronically; the student pays a processing fee directly to Proquest/UMI.

Additional course fees

Some courses carry additional fees, such as a laboratory or material fee, charged by semester as indicated in course descriptions; the amount appears in the Schedule of Classes (<http://my.gwu.edu/mod/pws>).

Special Fees and Deposits (nonrefundable)

Application fee	\$75
Advance deposit, charged each entering or readmitted full-time undergraduate	\$800
Matriculation fee, charged each entering full-time undergraduate	\$350
Late registration beginning the first day of the semester	\$80
Registration for continuous enrollment or leave of absence	\$35
Late application for graduation (see Calendar)	\$35
Late payment fees (see Past Due Accounts, below)	\$75
Late authorization fee for third-party payment (see Third-Party Payment, below)	\$100

Returned check fee, charged a student whose check is improperly drafted, incomplete, or returned by the bank for any reason	\$35
Waiver examination to qualify for advanced placement	\$25
Engineers' Council fee (charged all SEAS students), per semester	\$8
Transcript fee	\$5
Replacement of lost or stolen picture identification card	\$25
Replacement of diploma	\$50

Study Abroad Fees for Academic Year 2015-16*

Tier 1 Programs	GW Fixed Rate Tuition + \$825 program fee
Tier 2 Programs	GW Fixed Rate Tuition + \$3,575 program fee
Tier 3 Programs	GW Fixed Rate Tuition + \$5,475 program fee
Tier 4 Programs	GW Fixed Rate Tuition + \$5,975 program fee
Tier 5 Programs	GW Fixed Rate Tuition + \$6,475 program fee
Tier 6 Programs	GW Fixed Rate Tuition + \$6,975 program fee
Tier 7 Programs	GW Fixed Rate Tuition + \$7,775 program fee
Withdrawal Fee	\$575**

* The fees listed above are for the 2015-16 academic year. Fees for the 2016-17 academic year are subject to change.

** See Office of Study Abroad withdrawal policy (<http://studyabroad.gwu.edu/withdrawal-policy>) for more details

Postdoctoral Study

Those who have graduated from George Washington University with a Ph.D., Ed.D., or D.Sc. may continue studies in the University without payment of tuition (contingent upon the availability of space) and may enjoy all University library privileges. Such graduates pay the prevailing charge for one credit hour in order to establish their active membership in the University. The graduate pays the use of laboratory or special library material. Special arrangements for such privileges must be made with the dean two months in advance of the semester in which the graduate wishes to register. Post-doctoral work taken under this privilege may not be taken for credit.

Payment of Fees

Students who register for classes in any semester or session incur a financial obligation to the University. Tuition and fees are due and must be paid in full by the first day of the semester or upon registration if registration is after the first day of the

semester; students on the monthly payment plan are exempt from this regulation. The University reserves the right to revoke the registration, effective to the beginning of the semester, of any student who fails to make full payment. Students whose registrations have been revoked or canceled for failure to make timely payments are not permitted to attend class and may not occupy University housing.

Monthly payment plan

This payment plan is open to all students and is available for the full academic year (10-month plan for fall and spring semesters combined) or on an individual semester basis (5-month plan for fall and spring semesters individually), and 3-month plan for the summer session. In order to participate in the plan, students must complete and submit an application by August 20 for the academic year or fall semester plan, by January 1 for the spring semester, and May 1 for the summer session to participate in the plan. Upon approval of the application, students will be billed monthly for each payment. The monthly payment plan for the academic year begins in June and ends in March, with the first five payments applied to the fall semester and the second five payments applied to the spring semester. If the plan is selected for the fall semester only, the payment begins in June and ends in October. If the plan is selected for the spring semester only, payment begins in November and ends in March. Summer session plan payments begin in April and end in June. Under the plan, all payments are due on the 25th of each month; provided payments are received by that date, no interest or late fees will be incurred. Students who enroll in the plan after the first month of scheduled payments must make up all payments retroactive to the month of enrollment. Interest and a late payment fee are assessed on all accounts not paid in full by October 5 for the fall semester and March 5 for the spring semester. An outside vendor administers the plan and charges a one-time participation fee in addition to interest and late fees for any payments received late. For more information, see the monthly payment plan (<http://studentaccounts.gwu.edu/monthly-payment-plan>).

Third-party payment

The University accepts employer vouchers or purchase orders that are not contingent upon receipt of grades. Under all circumstances, the charges for tuition and fees remain the responsibility of the student. Authorization from a sponsor to be billed for a student's charges must be received in the Student Accounts Office by the end of the third week of the fall or spring semester. A late authorization fee may be incurred for responses received after these times. Bills are mailed to sponsors in October for the fall semester and in February for the spring semester. Should a sponsor fail to remit payment to the University, the University will contact the student for payment. Students whose employers or sponsors reimburse them for tuition and fees after receipt of grades must pay in full before the first day of the semester or at the time of registration to avoid interest, late fees, and/or cancellation of registration. Students whose tuition is paid in full or in part by employee

benefits or teacher tuition remission must pay any remaining balance by the stated due date to avoid interest, late fees, and/or cancellation of registration.

Past due accounts

Accounts that are past due are encumbered by the University. A student whose account is encumbered may not register for future semesters and may not receive diplomas or transcripts. Late payment fees and interest may also be assessed each month that the account has an overdue outstanding balance. Please see the University's Tuition Payment Disclosure Statement (<http://studentaccounts.gwu.edu/disclosures>) for more information on those fees and billing practices. Accounts that are more than 90 days past due are referred to an agency and/or attorney for collection. The student is then responsible for all charges, costs, and fees due to, or incurred by, the University as well as all costs, fees, and charges incurred by the agency and/or attorney, including attorney's fees. Students whose registrations have been revoked or canceled for failure to make timely payments are not permitted to attend class and may not occupy University housing.

Dishonored/returned checks

A student whose check is returned unpaid by the bank for any reason will be charged a returned check fee and will be responsible for any associated costs and/or attorney's fees incurred by the University should a civil lawsuit or other collection effort be instituted to collect on such dishonored check. In any case where the University has reason to believe that a student presented a dishonored check in bad faith, the University may, in addition to any collection efforts, refer the matter to the proper authorities for criminal prosecution.

Withdrawals and Refunds

Applications for withdrawal from the University or from a course after the registration period must be made in accordance with procedures outlined under University Regulations in the sections Complete Withdrawal From the University, and Adding, Dropping, and Withdrawing from Courses, respectively. Financial aid recipients must notify the Office of Student Financial Assistance in writing. The tuition deposit required of entering students will not be refunded.

In the case of authorized withdrawals and changes in registration schedule, cancellations of semester tuition charges and fees will be made in accordance with the following schedule for the fall and spring semesters:

1. Complete withdrawal from all courses (on-campus students):

Withdrawal dated on or before the end of the first week of the semester	90%
Withdrawal dated on or before the end of the second week of the semester	60%
Withdrawal dated on or before the end of the third week of the semester	40%

Withdrawal dated on or before the end of the fourth week of the semester	25%
Withdrawal dated after the fourth week of the semester	None

- 2. *Partial withdrawal:* If the change in course load results in a lower tuition charge, the refund schedule above applies to the difference.
- 3. Regulations governing student withdrawals as they relate to residence hall and food service charges are contained in the specific lease arrangements.
- 4. *Summer Sessions:* In cases of authorized withdrawals from courses, refunds of 85% of tuition and fees will be made for courses dropped within the first seven calendar days of the start of a session. No refund will be made for courses dropped thereafter.

Certain programs or classes or those with non-traditional semesters may have special refund schedules. Students are encouraged to consult with their program office to determine if a special schedule applies.

The above information regarding cancellation of tuition charges and fees after complete withdrawal from the University may not apply to entering students who are recipients of federal aid; those students should check with the Student Accounts Office for the applicable cancellation schedule. Federal regulations require that financial aid recipients use refunds to repay financial aid received for that semester's attendance. This policy applies to institutional aid as well.

If a recipient of federal financial aid withdraws from the University or reduces his or her course load, federal regulations require that the University reevaluate the student's eligibility to determine the amount of aid the student is allowed to retain. If there is a credit balance on the student's account after the federal funds have been adjusted, institutional funds will be recovered from that amount.

See the University's complete Return of Title IV funds policy (<https://studentaccounts.gwu.edu/sites/studentaccounts.gwu.edu/files/downloads/Return%20of%20Title%20IV%20Policy%20NEWLOGO.pdf>).

In no case will tuition be reduced or refunded because of the student's absence from classes. Authorization to withdraw and certification for work done will not be provided to a student whose account is not in good standing.

FINANCIAL AID

The George Washington University offers student financial assistance to all eligible students from a variety of resources. In addition to GW assistance, the University participates in federal student aid programs from the U.S. Department of Education and student financial assistance programs from other U.S. government agencies such as the U.S. Department of Veterans Affairs and the U.S. Department of Defense. Some states offer student financial assistance for undergraduate enrollment at GW.

In general, consideration for student financial assistance is restricted to students in good academic standing at the University who meet minimum grade-point average and satisfactory academic progress requirements for specific awards and not financially encumbered by any other University office. Failure to meet and maintain satisfactory academic progress requirements may result in rescinding of awards.

GW reserves the right to request documentation to determine aid eligibility. Documents submitted as part of the aid application become the property of the University and cannot be returned. Such documents are protected under the Family Educational Rights and Privacy Act (FERPA), as amended. Federal regulation requires the University to report cases of suspected fraud or misrepresentation to appropriate federal, state, and local authorities.

Gift aid, such as grants, scholarships, fellowships, is student financial assistance not required to be repaid. Gift aid is taxable under federal regulation to the extent that it exceeds the allowable costs of tuition, fees, and required books and supplies, or is dedicated to other costs such as room and board. Federal grants may be taxable if, together with other gift aid, they exceed allowable costs. For complete information on IRS rules regarding educational costs, see IRS Publication 970, *Tax Benefits for Education*.

Self-help aid is aid that students undertake on their own behalf, either in the form of earnings via the Federal Work-Study program or through borrowing. Loans must be repaid.

Eligibility for student aid is processed under cost of attendance budgets for various categories of students, per requirements of federal statute. Refer to the policy on cost of attendance budgets (<http://financialaid.gwu.edu/cost-of-attendance>) for details. A complete student aid package cannot exceed a student's cost of attendance budget. The University will review and potentially adjust awards for students receiving student financial assistance from more than one source. Receipt of student financial assistance from multiple sources cannot exceed tuition charges. If institutional aid is involved, adjustments will be made.

Non-degree and certificate programs that are approved for federal student aid programs must provide "gainful employment" disclosures under federal regulation. Such

disclosure are found on the respective academic programs' website. Continued Title IV eligibility for these programs are reviewed annually.

For complete information on student financial assistance at GW, visit the Office of Student Financial Assistance website (<http://financialaid.gwu.edu>).

Information in this section of the Bulletin is accurate as of the date of its publication and is subject to change based on changes in federal and/or state statute, regulation, policies and procedures (which may, in turn, necessitate changes to application procedures and policies). The University reserves the right to change student financial assistance policies.

UNDERGRADUATE

Undergraduate Financial Aid

All freshmen are automatically considered for the merit-based *Presidential Academic Scholarship*, which is awarded to the most competitive applicants in the applicant pool. Complete information on merit-based awards (awards based on academic criteria) are available on the website of the Office of Undergraduate Admissions (<http://undergraduate.admissions.gwu.edu/scholarships>).

The Office of Student Financial Assistance awards various need-based GW institutional financial aid funds: The largest fund awarded is the University and Alumni Award (<http://financialaid.gwu.edu/university-and-alumni-award>). In addition, the Office awards University Scholarships (see the section below) and the One-Year Award (<http://financialaid.gwu.edu/one-year-award>).

The following scholarships programs are also available:

The J.B. and Maurice C. Shapiro Scholarship to the University of Oxford is awarded each spring to a graduating senior or recent graduate through a competitive process upon the nominee's acceptance to Oxford. To be eligible, applicants must have applied for the Rhodes or British Marshall Scholarships. All of these competitions require high academic standing, evidence of leadership, and dedication to the larger society through community service. The Shapiro Scholarship provides for up to two years of study at Oxford, equivalent to the Rhodes Scholarship. The J.B. and Maurice C. Shapiro Endowment funds two scholarships per year—one new and one renewal.

The Bender Scholarship to the University of Cambridge is funded by an endowment, the Bender Scholarship Fund. The Bender Scholarship is open for competition every other year. Graduating seniors, recent graduates, and third-year law students who participated in the Rhodes and/or British Marshall competitions are eligible for the Bender Scholarship. The endowed scholarship provides for up to two years of study at the University of Cambridge, equivalent to the British Marshall Scholarship. The Bender Scholarship criteria are high academic

achievement, evidence of leadership skills or potential, and community service.

The Pembroke/CW Program. GW has a special relationship with Pembroke College in Oxford, whereby up to six GW juniors are placed at the College for one year and enrolled as fully matriculated students of the University of Oxford. These placements are determined in an annual competition that takes place at GW in the fall. The committee evaluating candidates forwards the finalists' applications to Pembroke College, and Pembroke makes the final decision on placements. Many GW students have spent a year at Oxford in this program.

Need-Based Financial Aid

All freshman and transfer students are required to file both the College Scholarship Service PROFILE (<https://student.collegeboard.org/css-financial-aid-profile>) -- which is not an application for funds but provides a need analysis that many schools use to awards its own funds -- and the Free Application for Federal Student Aid (<https://fafsa.ed.gov>) (FAFSA), which is the application for federal student aid programs (and which many states use as application for their own funds). Applicants must designate GW as recipient of their need analysis data. All applicants must also provide to GW directly copies of their signed federal income tax returns and W-2 Forms for the current tax year for the student and the student's parents (if a dependent student). Non-custodial parents are also required to provide disclosures.

Please refer to our policies on Parental Contribution for Dependent Students (<http://financialaid.gwu.edu/policy-parental-contribution-dependent-students>).

Complete application information is available on the Office of Student Financial Assistance (<http://financialaid.gwu.edu>) website under the section titled "Getting Assistance."

Deadlines are as follows: Incoming freshmen--February 1; Transfer students--April 1; Continuing students--April 30. For summer sessions, the deadline is March 1, though summer aid is limited to federal or private education loans.

Students must reapply for any need-based aid, including need-based scholarships, and must meet/maintain satisfactory academic progress requirements per specific student aid program requirements.

University Scholarships

Full and partial tuition scholarships begin in the fall semester and may be renewed through the senior year, provided that the recipient reapplies by the published deadlines, maintains a B- average or better, completes 12 credits per semester, and continues to demonstrate financial need. All applicants for need-based aid are considered for these awards.

Federal Student Aid Programs

The following federal student aid programs are available to eligible students at GW: Federal Pell Grants (<http://financialaid.gwu.edu/federal-pell-grant>), Federal Supplemental Educational Opportunity Grants (<http://financialaid.gwu.edu/federal-supplemental-educational-opportunity-grant>) (FSEOG), Federal Work-Study (<http://financialaid.gwu.edu/work-study>) (FWS), Federal Perkins Loans (<http://financialaid.gwu.edu/federal-perkins-loan>), Federal Direct Stafford Loans (<http://financialaid.gwu.edu/federal-direct-loans>), Federal Direct PLUS Loans (<http://financialaid.gwu.edu/federal-direct-parent-plus-loan>), and TEACH Grants (<http://gsehd.gwu.edu/TEACHGrant>). The U.S. Department of Education's Federal Student Aid (<https://studentaid.ed.gov/sa>) website includes complete program details. We especially recommend that you download, review and retain the various student loan publications from the U.S. Department of Education, which are available on the Federal Student Aid Resources (<https://studentaid.ed.gov/sa/resources>) web-site.

Federal Direct Stafford Loans

Federal Direct Stafford Loans are student loans from the U.S. Department of Education in which the student is the borrower. Annual loan limits are as follows:

Dependent undergraduates (most students under the age of 24):

- \$5,500 as freshmen (No more than \$3,500 of this amount may be in subsidized loans)
- \$6,500 as sophomores (No more than \$4,500 of this amount may be in subsidized loans)
- \$7,500 as junior and seniors (No more than \$5,500 of this amount may be in subsidized loans)

Independent undergraduates (students 24 years or age and older) and dependent students whose parents are unable to borrow under the Federal Direct PLUS Loan program:

- \$9,500 as freshmen (No more than \$3,500 of this amount may be in subsidized loans)
- \$10,500 as sophomores (No more than \$4,500 of this amount may be in subsidized loans)
- \$12,500 as juniors and seniors (No more than \$5,500 of this amount may be in subsidized loans)

Federal student loan programs also have aggregate (lifetime) loan limits (<https://studentaid.ed.gov/sa/types/loans/subsidized-unsubsidized>).

- For dependent students (except student whose parents are unable to borrow under the Federal Direct PLUS Loan program), the subsidized and unsubsidized aggregate loan limit is \$31,000, with no more than \$23,000 of this amount being subsidized loans.
- Independent Students (and dependent undergraduate students whose parents are unable to obtain PLUS Loans) - the undergraduate aggregate loan limit is \$57,500, and no more than \$23,000 of this amount may be in subsidized loans.

For students who receive subsidized Stafford loans as part of their need-based financial aid award, the government pays the interest while they are enrolled in school at least half time and for six months after they leave school. Students ineligible, or only partly eligible, for subsidized funds may apply for an unsubsidized Stafford Loan up to the same limits to cover their family contribution. Terms and conditions are the same, except that the student borrower is responsible for all interest that accrues on the unsubsidized loan from the date it is disbursed; deferments are available. Independent students (and students whose parents are denied a PLUS loan) are eligible to borrow additional unsubsidized Stafford funds of \$4,000 as freshmen and sophomores and \$5,000 as juniors and seniors.

There are fees associated with both subsidized and unsubsidized Stafford loans. Interest rates and fees are set on an annual basis by federal statute, usually by June 1 and taking effect on July 1 through the following June 30. See the OSFA's "Summary of Loan Details (<http://financialaid.gwu.edu/loans>)" chart or the U.S. Department of Education's Federal Student Aid (<https://studentaid.ed.gov/sa/types/loans/interest-rates>) website for up-to-date information on interest rates and associated loan fees.

Federal Direct PLUS Loans

The Federal Direct PLUS Loan is a government-sponsored, credit-based, fixed-rate loan that can be used to supplement the student's Federal Direct Stafford Loan or to help with their family contribution. The U.S. Department of Education is the lender. Each academic year, parents without an adverse credit history may apply for a Federal Direct PLUS loan up to the cost of education, minus financial aid, for each dependent child attending college at least half-time. Loan repayment begins within 60 days of the last disbursement and the maximum repayment term is ten years.

Origination fees are deducted from loan proceeds prior to disbursement. Families who intend to use loan funds for payment of University charges at time of registration should submit a loan application and all supporting documents to OSFA no later than May 1 for the fall semester, October 1

for the spring semester, and March 1 for summer sessions. See the OSFA website (<http://financialaid.gwu.edu/federal-direct-parent-plus-loan>) for details and application procedures. See also The U.S. Department of Education's information on Federal Direct PLUS Loans (<https://studentaid.ed.gov/sa/types/loans/plus>).

Federal Perkins Loans

Federal Perkins Loans (<http://financialaid.gwu.edu/federal-perkins-loan>) are loans made to students with "exceptional financial need," as required by federal statute, based on availability of funds to lend from collections of past loans made. The interest rate is 5% fixed and there is a ten-year repayment period. The annual loan limit for Federal Perkins Loan is \$5,500 per year and the lifetime limits for Perkins are \$27,500 for undergraduates and \$60,000 for combined undergraduate and graduate studies. Loan funds awarded are limited based on availability of funds to lend.

See also the U.S. Department of Education's Federal Student Aid information on Federal Perkins Loans (<https://studentaid.ed.gov/sa/types/loans/perkins>).

Private Education Loans

Private lenders provide additional loan options to qualified students. These loans offer varying interest rates and repayment options. Such loans allow the student to borrow up to 100% of GW's annual undergraduate cost of attendance less any current financial assistance. They typically have variable rates, rates within rate tiers according to credit worthiness, and application fees.

Private education loans must be reported to OSFA to be considered as a resource against federal student aid eligibility, per federal regulation.

Students are strongly advised to consider federal student loans before alternative loans due to the former's generally more favorable interest rates, fees, and repayment options. Consider reviewing the OSFA Private Student Loan Counseling Checklist (<http://financialaid.gwu.edu/private-student-loan-counseling-checklist>).

Other Loan Funds

GW has several emergency loan funds for degree students with short-term needs. These funds include:

- Jessie B. Martin Loan Fund
- Jack and Anne Morton Loan Fund
- Barney Plotnick, M.D., Student Loan Fund
- University Student Emergency Loan Fund
- Edmund W. Dreyfuss Loan Fund
- Peter and Doris Firsht Loan Fund

Students apply for emergency loans at Colonial Central (<http://colonialcentral.gwu.edu>).

Student Employment

The University participates in the Federal Work-Study Program (<http://financialaid.gwu.edu/work-study>). Students should address questions concerning eligibility to OSFA. GW's Center for Career Services (<http://careerservices.gwu.edu>) handles Federal Work-Study placement and also maintains a registry of both full- and part-time positions available in the D.C. Metropolitan Area.

International Students

International students are eligible to receive merit scholarship consideration from the Office of Admissions and are automatically considered during the admissions process.

Non-U.S. students should check with their home country for potential national and/or local student aid options for enrollment in the United States.

Visit the U.S. Department of State's Education USA web-site (<https://educationusa.state.gov>) for a database of potential resources.

Private education loans for international students are usually only available with a credit-worthy U.S. co-signer. The Office of Student Financial Assistance uses cost of attendance budgets for the processing of international student financial assistance. Details are available on the OSFA website (<http://financialaid.gwu.edu>).

Military Education Financing

Veterans Education Benefits

GW's Office of Military and Veteran Student Services processes applications for entitlement payments under the various classes of veterans' educational benefits from the U.S. Department of Veterans Affairs. For more information consult the Office of Military and Veteran Student Services website.

Tuition Assistance Program

Funds from the various branches of the armed services under the Tuition Assistance Program are processed by the GW Office of Student Accounts.

ROTC Scholarships

Navy ROTC (<http://nrotc.gwu.edu/scholarships>) is available at GW. Army and Air Force ROTC is available at Georgetown University and Howard University, respectively. All ROTC programs are handled by the GW Student Accounts Office. Further details are available on the Office of Student Financial Aid website (<http://financialaid.gwu.edu/military-educational-benefits>) and from the Office of the Registrar (<http://registrar.gwu.edu/rotc>).

Please note that ROTC scholarships must be considered as a resource against any federal student aid eligibility, per federal regulation.

Required Disclosures and Notices

University Policy on Equal Opportunity

The George Washington University does not unlawfully discriminate against any person on the basis of race, color, religion, sex, national origin, age, disability, veteran status, or sexual orientation. This policy covers all programs, services, policies, and procedures of the University, including admission to educational programs and employment.

The University is subject to the District of Columbia Human Rights Act. Inquiries concerning the application of this policy and federal laws and regulations concerning discrimination in education or employment programs and activities may be addressed to the Chief Human Resources Officer, Office of Chief Human Resources Officer, 2033 K Street NW, Suite 220, Washington, DC 20052, (202) 994-9600, or to the Assistant Secretary for Civil Rights of the U.S. Department of Education; or to the Director of the U.S. Equal Employment Opportunity Commission/Washington Field Office.

To request disability accommodations, students should contact the Office of Disability Support Services, (202) 994-8250 (TDD/voice), and employees should contact the Office of Equal Employment Opportunity, (202) 994-9656 (voice) or 9650 (TDD).

Availability of State Grant Assistance for Undergraduate Education

Before pursuing loan options, undergraduate students are advised to review the potential for state grant assistance from their home state to help finance their GW education. The U.S. Department of Education maintains a web-site listing state agencies (<http://www2.ed.gov/about/contacts/state>) and respective contact information. The Brookings Institution has an Inventory of State Grants (<http://www.brookings.edu/~media/research/files/reports/2012/5/08-grants-chingos-whitehurst/inventory-of-state-grants.xlsx>) (done in 2012) as well.

Satisfactory Academic Progress for Student Financial Assistance

Federal student aid programs require satisfactory academic progress. Please refer to our complete Title IV satisfactory academic progress policy (<http://financialaid.gwu.edu/policy-satisfactory-academic-progress>).

Availability of U.S. Department of Education Loan Publications

Students pursuing federal student loans are advised to review, download, and retain the loan publications from the U.S. Department of Education which are available on the Federal Student Aid resources page (<https://studentaid.ed.gov/sa/resources>).

GW Policy on Student Loans and Code of Conduct

GW does not maintain a preferred lender list and will certify loan presented that requires certification. Refer to GW's HEA-compliant code of conduct for student loans (<http://financialaid.gwu.edu/policy-student-loan-code-conduct>).

Role of the National Student Loan Data System (NSLDS)

Data on federal student loans and Federal Pell Grants are reported to the National Student Loan Data System (NSLDS), which is accessible by GW and U.S. Department of Education personnel and servicers of federal student loans. Students can access their data on the NSLDS website.

Title IV Eligibility and Drug Convictions

Under federal law a recipient of Title IV student financial assistance who is convicted for possession and/or sale of illegal drugs while enrolled as a student at GW will be ineligible for further Title IV funds for a fixed period of time. Refer to the University's complete policy on the Impact of Drug Conviction on Title IV eligibility (<http://financialaid.gwu.edu/policy-impact-drug-conviction-title-iv-eligibility>).

Return of Title IV Funds Policy

The University is required by the HEA to recalculate the eligibility for federal Title IV student financial assistance for students who withdraw, drop out, are dismissed, or take a leave of absence, prior to completing 60% of a semester. Title IV funds include Federal Pell Grants, Federal Supplemental Educational Opportunity Grants, Federal Work-Study, Federal Perkins Loans, Federal Direct Subsidized Stafford Loans, Federal Direct Unsubsidized Stafford Loans, and Federal Direct PLUS Loans. The priority sequence for return of Title IV funds is as follows:

- 1.Unsubsidized Federal Stafford Loans
- 2.Subsidized Federal Stafford Loans
- 3.Unsubsidized Direct Stafford Loans (other than PLUS Loans)
- 4.Subsidized Direct Stafford Loans
- 5.Federal Perkins Loans
- 6.Federal PLUS Loans
- 7.Direct PLUS Loans
- 8.Federal Pell Grants for which a return of funds is required
- 9.Federal Supplemental Educational Opportunity Grants for which a return of funds is required
- 10.TEACH Grants for which a return of funds is required
- 11.Iraq-Afghanistan Service Grant for which a return is required

For the complete policy statement on Return of Title IV funds, see the Colonial Central website. This applies only to federal student aid and does not pertain to the University's refund policy, as noted in the Fees and Financial Regulations section of this Bulletin.

Title IV Credit Balances

Students have the right to exercise authorizations to hold or release a hold pertaining to Title IV credit balances. Similarly, parents have the right to do so pertaining to Federal

Direct PLUS Loans. See the pertinent Title IV credit balance authorization form.

Student Title IV credit balance authorization form (https://studentaccounts.gwu.edu/sites/studentaccounts.gwu.edu/files/downloads/Title_IV_Credit_Auth_StudentNEWLOGO.pdf)

Parent Title IV credit balance authorization form (https://studentaccounts.gwu.edu/sites/studentaccounts.gwu.edu/files/downloads/Title_IV_Credit_Auth_ParentNEWLOGO.pdf)

HEA Disclosures Portal

Visit the HEA Disclosures portal (<http://financialaid.gwu.edu/higher-education-act-disclosure>) for complete disclosures information.

GRADUATE

Graduate Financial Aid

The George Washington University offers a variety of financial support for graduate students that includes assistantships, fellowships, traineeships, graduate school scholarships, research appointments, and part-time employment, in addition to eligibility for Federal student aid programs.

Several forms of aid not based on financial need are available. Graduate assistantships are fully taxable, and gift aid (scholarships, grants, fellowships, assistantships, tuition awards, etc.) is taxable to the extent that it exceeds the allowable costs of tuition, fees, and required books and supplies or is dedicated to other costs, such as room and board. Federal grants may be taxable if, together with other gift assistance, they exceed the allowable costs. For complete information on IRS rules regarding educational costs, see IRS Publication 970, *Tax Benefits for Education*.

Eligibility for student aid is processed under cost of attendance budgets for various categories of students, per requirements of federal statute. Refer to our policy on cost of attendance budgets (<http://financialaid.gwu.edu/cost-of-attendance>) for details. A complete student aid package cannot exceed a student's cost of attendance budget. GW will review and potentially adjust awards for students receiving student financial assistance from more than one source. Receipt of student financial assistance from multiple source cannot exceed tuition charges. If institutional aid is involved, adjustments will be made.

Application and correspondence concerning assistantships, fellowships, traineeships, or graduate scholarships should be sent directly to the GW school or college. Unless otherwise specified, applications and supporting credentials should be submitted no later than the February 1 prior to the academic year for which the award is made. Application for admission to graduate study is a prerequisite for consideration.

Office of Graduate Student Assistantships and Fellowships

The Office of Graduate Student Assistantships and Fellowships (<http://www.gwu.edu/~fellows>) provides services to entering and enrolled graduate students; detailed information on awards that may be used in support of graduate study is available on the office's website. Such awards are generally sponsored by foundations, professional and learned societies, industries, and other organizations. Services are provided to entering and enrolled graduate students.

Assistantships

Available to students in masters and doctoral programs in most academic departments, graduate assistantships provide financial compensation for a designated unit of service to the assistant's major department of instruction. All new graduate assistants must attend an orientation program and will be enrolled in an online course.

International students applying for graduate teaching assistantships must have minimum TOEFL scores of 600 (paper-based) or 100 (Internet-based) or an overall band score of 7.0 on the Academic International English Language Testing System (IELTS) with no individual band score below 6.0. International students may be appointed to graduate assistantships. Those found to have difficulties with English will be referred to the Speech and Hearing Center's speech enhancement program; such students will be assigned nonteaching duties in place of classroom instruction and will be re-evaluated each semester. If a student is not designated as qualified to give classroom instruction by the end of one academic year, the assistantship will not be renewed.

Graduate Research Assistantships

Available to students in masters and doctoral programs in some GW academic departments. A graduate research assistant receives compensation for research assistance provided to a professor.

Resident Assistantships

Resident assistantships are available to graduate students in any field of study who are interested in working in University residence halls. Specific duties vary with the position, but basically consist of counseling, advising student groups, and administrative duties. Remuneration includes salary and a furnished room for the academic year. All positions are part time, and staff members are required to enroll as full-time students in degree programs. For further information, see the Center for Student Engagement website (<http://studentengagement.gwu.edu/resident-advisors>).

Fellowships, Scholarships, and Related Programs University Fellowships

Available to graduate students in masters and doctoral programs in most GW academic departments. Fellowships are

based on scholarship and each fellow may receive a stipend and/or tuition allowance.

Other Fellowships, Scholarships, and Related Programs

- Achievement Rewards for College Scientists Scholarships
- Angeline Anderson Scholarship Fund
- Bank of America Fellowship
- Robert R. Banville Scholarship Fund
- Sylven Said Beck Endowment Fund for Elementary Education

Federal Loans

Federal Direct Stafford Loans

Graduate students enrolled at least half time may apply for Federal Direct Stafford Loan funds each academic year. Unsubsidized loans require the student borrower to pay all interest that accrues on loan during the in-school period. Deferments are available. Students must

file the Free Application for Federal Student Aid (<https://fafsa.ed.gov>) (FAFSA) to determine their eligibility.

Federal Direct PLUS Loans

Graduate and professional students may apply for funds under the Federal Direct PLUS Loan Program. Eligible students may borrow up to the full cost of attendance, including tuition, fees, books, and living and transportation expenses, less any financial assistance received (which includes all student loans). Students must first apply for the Federal Direct Stafford Loan and the amount of the Stafford Loan eligibility must be included in the calculation to determine the amount of the Graduate PLUS loan.

Annual and Aggregate Loan Limits

Graduate and professional students can borrow up to \$20,500 in unsubsidized Federal Direct Stafford Loan funds on an annual basis. Some academic programs may have additional loan eligibility; see the list on the OSFA website of Graduate Programs eligible for Higher Loan Limits (<https://financialaid.gwu.edu/graduate-federal-direct-loan-limits>).

Graduate and professional students have maximum aggregate (lifetime) loan limits of \$138,500, with \$65,500 maximum subsidized limit within the total aggregate limit. Health professions students have a maximum aggregate (lifetime) limit of \$224,000, with \$65,500 maximum subsidized limit within the total aggregate limit.

Loan Fees

Both Federal Direct Stafford Loans and Federal Direct PLUS Loans carry loan fees. Current rates are available on the U.S. Department of Education's Federal Student Aid website for Federal Direct Stafford Loans (<https://studentaid.ed.gov/sa/types/loans/subsidized-unsubsidized>) and for Federal Direct PLUS Loan (<https://studentaid.ed.gov/sa/types/loans/plus>).

Federal Perkins Loans

Federal Perkins Loans (<http://financialaid.gwu.edu/federal-perkins-loan>) are loans made to students with "exceptional financial need," as required by federal statute, based on availability of funds to lend from collections of past loans made. The interest rate is 5% fixed and there is a ten-year repayment period.

Annual and Aggregate Loan Limits for Federal Perkins Loans

The annual loan limit for Federal Perkins Loan is \$5,500 per year and the lifetime limits for Perkins are \$27,500 for undergraduates and \$60,000 for combined undergraduate and graduate studies. Loan funds awarded are limited based on availability of funds to lend.

See also the U.S. Department of Education's Federal Student Aid information on Federal Perkins Loans (<https://studentaid.ed.gov/sa/types/loans/perkins>).

Private Education Loans

Private lenders provide additional loan options to qualified students. These loans offer varying interest rates and repayment options. Such loans allow the student to borrow up to 100% of GW's annual cost of attendance less any current financial assistance. They typically have variable rates, rates within rate tiers according to credit worthiness, and application fees.

Private education loans must be reported to OSFA to be considered as a resource against federal student aid eligibility, per federal regulation.

Students are strongly advised to consider federal student loans before alternative loans due to generally more favorable interest rates, fees, and repayment options. Consider reviewing the OSFA Private Student Loan Counseling Checklist (<http://financialaid.gwu.edu/private-student-loan-counseling-checklist>).

Other Loan Funds

GW has several emergency loan funds for degree students with short-term needs. These funds include the Jessie B. Martin Loan Fund, the Jack and Anne Morton Loan Fund; the Barney Plotnick, M.D., Student Loan Fund; the University Student Emergency Loan Fund; the Edmund W. Dreyfuss Loan Fund; and the Peter and Doris Firsht Loan Fund. Students apply for emergency loans at Colonial Central.

Student Employment

The University participates in the Federal Work-Study Program (<https://careerservices.gwu.edu/federal-work-study-program>). Students should address questions concerning eligibility to OSFA. GW's Center for Career Services (<https://careerservices.gwu.edu>) handles Federal Work-Study placement and also maintains a registry of both full- and part-time positions available in the D.C. Metropolitan Area.

TEACH Grants

The Teacher Education Assistance for College and Higher Education (TEACH) program provides grants to students who become teachers in high-need fields and low-income areas in an elementary school, secondary school or an educational service agency. For more details, see the TEACH Grant webpage (<http://gsehd.gwu.edu/TEACHGrant>) on the Graduate School of Education and Human Development (GSEHD) website.

International Students

International students are advised to download and reference The Office of Graduate Scholarships and Fellowships brochure, Funding for International Students (<http://graduate.admissions.gwu.edu/sites/graduate.admissions.gwu.edu/files/downloads/International%20Funding%20Brochure.pdf>), a guide for international students on potential education funding.

Non-US students should check with their home country for potential national and/or local student aid options for enrollment in the United States.

Private education loans for international students are usually only available with a credit-worthy U.S. co-signer.

Please note that the Office of Student Financial Assistance uses cost of attendance budgets (<http://financialaid.gwu.edu/cost-of-attendance>) for the processing of international student financial assistance.

Military Education Financing

Veterans Education Benefits

GW's Office of Military and Veteran Student Services (<http://services.military.gwu.edu>) processes applications for entitlement payments under the various classes of veterans' educational benefits from the U.S. Department of Veterans Affairs.

Tuition Assistance Program

Funds from the various branches of the armed services under the Tuition Assistance Program are processed by the GW Office of Student Accounts.

ROTC Scholarships

Navy ROTC (<http://nrotc.gwu.edu/scholarships>) is available at GW. Army and Air Force ROTC is available at Georgetown University and Howard University, respectively. All ROTC programs are handled by the GW Student Accounts Office. Further details are available here (<http://financialaid.gwu.edu/military-educational-benefits>) and from the Office of the Registrar (<http://registrar.gwu.edu/rotc>).

Please note that per federal regulation ROTC scholarships must be considered as a resource against any federal student aid eligibility.

Required Disclosures and Notices

University Policy on Equal Opportunity

The George Washington University does not unlawfully discriminate against any person on the basis of race, color, religion, sex, national origin, age, disability, veteran status, or sexual orientation. This policy covers all programs, services, policies, and procedures of the University, including admission to educational programs and employment.

The University is subject to the District of Columbia Human Rights Act. Inquiries concerning the application of this policy and federal laws and regulations concerning discrimination in education or employment programs and activities may be addressed to the Chief Human Resources Officer, Office of Chief Human Resources Officer, 2033 K Street NW, Suite 220, Washington, DC 20052, (202) 994-9600, or to the Assistant Secretary for Civil Rights of the U.S. Department of Education; or to the Director of the U.S. Equal Employment Opportunity Commission/Washington Field Office.

To request disability accommodations, students should contact the Office of Disability Support Services, (202) 994-8250 (TDD/

voice), and employees should contact the Office of Equal Employment Opportunity, (202) 994-9656 (voice) or 9650 (TDD).

Availability of State Grant Assistance for Undergraduate Education

Before they pursue loan options undergraduate students are advised to pursue the potential for state grant assistance in their home state to help finance their GW education. The U.S. Department of Education (ED) maintains a website listing state agencies (<http://www2.ed.gov/about/contacts/state>) and respective contact information. The Brookings Institution has an Inventory of State Grants (<http://www.brookings.edu/~media/research/files/reports/2012/5/08-grants-chingos-whitehurst/inventory-of-state-grants.xlsx>) (done in 2012) as well.

Satisfactory Academic Progress for Student Financial Assistance

Federal student aid programs require satisfactory academic progress. Please refer to our complete Title IV satisfactory academic progress policy (<http://financialaid.gwu.edu/policy-satisfactory-academic-progress>).

Availability of U.S. Department of Education Loan Publications

Students pursuing federal student loans are advised to review, download, and retain the loan publications from the U.S. Department of Education, which are available on the Federal Student Aid resources page (<https://studentaid.ed.gov/sa/resources>).

GW Policy on Student Loans and Code of Conduct

GW does not maintain a preferred lender list and will certify loan presented that requires certification. Refer to GW's HEA-compliant code of conduct for student loans (<http://financialaid.gwu.edu/policy-student-loan-code-conduct>).

Role of the National Student Loan Data System (NSLDS)

Data on federal student loans and Federal Pell Grants are reported to the National Student Loan Data System (NSLDS), which is accessible by GW and U.S. ED personnel and servicers of federal student loans. Students can access their data on the NSLDS website (http://www.nsls.ed.gov/nsls_SA).

Title IV Eligibility and Drug Convictions

Under federal law a recipient of Title IV student financial assistance who is convicted for possession and/or sale of illegal drugs while enrolled as a student at GW will be ineligible for further Title IV funds for a fixed period of time. Refer to the University's complete policy on the Impact of Drug Conviction on Title IV eligibility (<http://financialaid.gwu.edu/policy-impact-drug-conviction-title-iv-eligibility>).

Return of Title IV Funds Policy

The University is required by the HEA to recalculate the eligibility for federal Title IV student financial assistance for students who withdraw, drop out, are dismissed, or take a leave of absence, prior to completing 60% of a semester. Title IV funds include Federal Pell Grants, Federal Supplemental Educational Opportunity Grants (SEOG), Federal Work-Study, Federal Perkins Loans, Federal Direct Subsidized Stafford

Loans, Federal Direct Unsubsidized Stafford Loans, and Federal Direct PLUS Loans. The priority sequence for return of Title IV funds is as follows:

- 1.Unsubsidized Federal Stafford Loans
- 2.Subsidized Federal Stafford Loans
- 3.Unsubsidized Direct Stafford Loans (other than PLUS Loans)
- 4.Subsidized Direct Stafford Loans
- 5.Federal Perkins Loans
- 6.Federal PLUS Loans
- 7.Direct PLUS Loans
- 8.Federal Pell Grants for which a return of funds is required
- 9.Federal Supplemental Educational Opportunity Grants (FSEOG) for which a return of funds is required
- 10.TEACH Grants for which a return of funds is required
- 11.Iraq-Afghanistan Service Grant for which a return is required

For the complete policy statement on Return of Title IV funds, see the Colonial Central website (<http://colonialcentral.gwu.edu>). This applies only to federal student aid and does not pertain to the University's refund policy, as noted in the Fees and Financial Regulations section of this Bulletin.

Title IV Credit Balances

Students have the right to exercise authorizations to hold or release a hold pertaining to Title IV credit balances, using the Student Title IV credit balance authorization form (https://studentaccounts.gwu.edu/sites/studentaccounts.gwu.edu/files/downloads/Title_IV_Credit_Auth_StudentNEWLOGO.pdf).

Similarly, parents have the right to do so pertaining to Federal Direct PLUS Loans, using the Parent Title IV credit balance authorization form (https://studentaccounts.gwu.edu/sites/studentaccounts.gwu.edu/files/downloads/Title_IV_Credit_Auth_ParentNEWLOGO.pdf).

HEA Disclosures Portal

See our HEA disclosure portal (<http://financialaid.gwu.edu/higher-education-act-disclosure>) for complete disclosures information.

INTERDISCIPLINARY AND SPECIAL UNDERGRADUATE PROGRAMS

While GW offers many interdisciplinary programs within and across its schools and departments, those listed here are independent of other GW affiliation.

- GW Teach (p. 56)
- Naval Science (p. 60)
- Sustainability (p. 60)
- University Honors Program (p. 57)
- Women's Leadership Program (p. 62)

GWTEACH

The GWTeach Program (<http://gwteach.gwu.edu>) is a GW initiative based on the nationally recognized UTeach (<http://www.uteach-institute.org>) program. The program supports the development of excellence in teaching. Students completing the GWTeach program earn a degree in a STEM field – math, science, or engineering – and are eligible for licensure by the District of Columbia as a middle or high school teacher. Some students go directly into the STEM workforce, other teaching professions, or graduate school and have the option to teach in middle and high schools. Graduates also can use their GWTeach experience in other careers, such as the health professions, college teaching, and training.

The first two 1-credit courses (Step 1 and Step 2) are open to all mathematics, science, and engineering majors, including pre-med students. In those courses, students are exposed to the teaching experience with no obligation to continue in the program.

Students can also complete an 18-credit undergraduate minor, comprising core courses from GWTeach disciplines plus a choice of elective courses.

REQUIREMENTS

Required:

GTCH 3101	Knowing and Learning in Mathematics and Science
GTCH 3201	Perspectives on Math and Science
GTCH 3202	Research Methods in Math and Science
GTCH 3203	Functions and Modeling
Six credits from the following:	
GTCH 1001	GWTeach Step 1: Inquiry Approaches to Teaching
GTCH 1002	GWTeach Step 2: Inquiry-based Lesson Design

GTCH 3102	Classroom Interactions
GTCH 3103	Project-Based Instruction
GTCH 3500	Topics in STEM Teaching
GTCH 3600	Pedagogy for Learning Assistants

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

GTCH 1001. GWTeach Step 1: Inquiry Approaches to Teaching. 1 Credit.

First recruitment course in the GWTeach professional development sequence. Overview of latest methods in teaching. Elementary school teaching experience using lessons written based on district curricula. Restricted to Freshman and sophomore standing.

GTCH 1002. GWTeach Step 2: Inquiry-based Lesson Design. 1 Credit.

Second recruitment course in the GWTeach professional development sequence. Overview of latest methods in teaching. Middle school teaching experience using lessons written based on district curricula. Restricted to Freshman and sophomore standing.

GTCH 3101. Knowing and Learning in Mathematics and Science. 3 Credits.

Introduction to models of knowing and learning for classroom practice. Focus on secondary mathematics and science. Restricted to Sophomore or higher standing. Restricted to GWTeach students and to others with permission of the instructor. Prerequisites: GWTeach courses GTCH 1001 – Step 1 and GTCH 1002 – Step 2 or permission of the instructor. Recommended background: Most students will be in the GWTeach program. Other students may enroll with permission of the instructor.

GTCH 3102. Classroom Interactions. 3 Credits.

Introduction to use of curriculum and technology in the classroom for effective teaching of mathematics, science, and engineering. Interplay between teachers, students, content, and the world beyond schools. Design and implementation of instructional activities. Evaluation of outcomes of instructional activities. Restricted to Junior or Senior standing. Restricted to GWTeach students and to others with permission of the instructor. Prerequisites: GWTeach courses GTCH 1001 – Step 1, GTCH 1002 – Step 2, GTCH 3101 or permission of the instructor. Recommended background: Most students will be in the GWTeach program. Other students may enroll with permission of the instructor.

GTCH 3103. Project-Based Instruction. 3 Credits.

Design of full units of connected lessons. Integration of mathematics and science content. Intensive field-based experiences. Restricted to Junior or Senior standing. Restricted to GWTeach students and to others with permission of the instructor. Prerequisites: GTCH 1001 (Step 1), GTCH 1002 (Step 2), GTCH 3101, and GTCH 3102,. Recommended background: Students will normally be in the GWTeach program.

GTCH 3201. Perspectives on Math and Science. 3 Credits.

Topics and episodes in the history of science and mathematics. Focus on processes by which math and science evolves. Perspectives include biology, physics, geology, astronomy, and chemistry. Historical perspectives on the content and direction of the sciences. Restricted to GWTeach students and to others with permission of the instructor. Restricted to Sophomore or higher standing. Prerequisites: GWTeach courses GTCH 1001 – Step 1 and GTCH 1002 – Step 2 or permission of the instructor. Recommended background: Most students will be in the GWTeach program. Other students may enroll with permission of the instructor.

GTCH 3202. Research Methods in Math and Science. 3 Credits.

Design experiments to answer scientific questions and reduce systematic and random errors. Statistics to interpret experimental results. Restricted to Sophomore or higher standing. Restricted to GWTeach students and to others with permission of the instructor. Prerequisites: GWTeach courses GTCH 1001 – Step 1 and GTCH 1002 – Step 2 or permission of the instructor. Recommended background: Most students will be in the GWTeach program. Other students may enroll with permission of the instructor.

GTCH 3203. Functions and Modeling. 3 Credits.

Mathematics addressing unique needs of future teachers of mathematics. Explore models using linear, exponential, polynomial, and trigonometric functions. Restricted to Sophomore or higher standing. Restricted to GWTeach mathematics students and to others with permission of the instructor. Prerequisites: GWTeach courses GTCH 1001 – Step 1 and GTCH 1002 – Step 2 or permission of the instructor. Recommended background: Most students will be in the GWTeach program. Other students may enroll with permission of the instructor.

GTCH 3500. Topics in STEM Teaching. 1 Credit.

Issues in STEM research and education. Topics may include new developments in science and mathematics, emerging ideas and methods of instruction, impacts of STEM on individuals and society. Restricted to Intended primarily for students in the GWTeach program and the Minor in STEM Teaching. Permission of the GWTeach Associate Director required. Prerequisites: Permission of instructor. Recommended background: Enrollment in the GWTeach program or the Minor in STEM Teaching.

GTCH 3600. Pedagogy for Learning Assistants. 2 Credits.

Integrate educational theory, pedagogy, and practice. Classroom discourse, group discussions, disciplinary thinking, questioning, models of cognition, metacognition, formative assessment, classroom presence. Final project directly linked to Learning Assistant placement. For students serving as Learning Assistants in large-enrollment undergraduate science courses. Restricted to Intended primarily for students in the GWTeach program and the Minor in STEM Teaching. Permission of the GWTeach Associate Director required. Prerequisites: Permission of instructor. Recommended background: Enrollment in the GWTeach program or the Minor in STEM Teaching.

GTCH 4000. Apprentice Teaching. 0-7 Credits.

Culminating experience and tools for first teaching positions. Expectations, processes, and rewards of teaching. Field experiences in local schools. Apprentice teachers and university master teachers share experiences and solutions to problems in the field. Feedback from public school mentor teachers and university facilitators. Restricted to Intended for juniors and seniors in the GWTeach program. Restricted to GWTeach apprentice teachers. Prerequisites: GTCH 3101, 3102, 3103, 3201, 3202 Also, GTCH 3203 for students intending to be Mathematics teachers. Recommended background: Intended for students in the GWTeach program as their final preparation for certification.

UNIVERSITY HONORS PROGRAM

The University Honors Program (<http://www.gwu.edu/~uhpwww/programinfo.cfm>) helps students hone their analytical and expressive powers, deepen their understanding of complex issues and questions, and broaden their perspectives. Built upon an interdisciplinary honors experience, the program is fully integrated into, synergistic with, and reinforcing of the highest academic aspirations of University schools and departments.

- Small seminar-style classes, capped at 15 or 20 students, provide an opportunity to probe a variety of evolving issues and eternal questions.
- The Honors community is strengthened and sustained by a shared academic experience and enhanced by its relatively small size of approximately 500 students. The program offers first- and second-year Honors students the option of living in an Honors residential community.

- Students enroll in a series of unique courses that address both cross-cultural and cross-disciplinary questions and issues, drawing from the humanities, natural sciences, and social sciences. In their senior year, students participate in an Honors capstone experience that provides an opportunity to apply and reflect on what they have learned as undergraduates.
- The Honors experience is enriched by distinctive co-curricular programming, including off-campus activities with faculty members and discussions in the program's Club Room. Events may include student-faculty dinners, hikes, visits to local museums, day trips throughout the region, theater performances, film screenings, guest speakers and debates, and career information sessions. Students also have an opportunity for summer study abroad.
- The small, discussion-driven format of Honors courses creates a collaborative environment and strengthens relationships between students and faculty.
- Designated Honors academic advisors assist students with academic, career, and personal planning.
- Honors program members have early course registration privileges during their second, third, and fourth semesters.
- Membership in the Honors program is indicated on the student transcript.

REQUIREMENTS

The University Honors Program (<http://www.gwu.edu/~uhpwww>) offers exceptional entering students the opportunity to engage in a distinctive, participatory program of study designed to prepare them—whatever their gifts and interests might be—to meet the complex challenges of the 21st century. The program invites students to develop a humane perspective on the world. It sustains a community where students and faculty learn from each other, inspired by academic challenge, hard questions, and a desire to make a difference. The program serves approximately 500 selected students, or five percent of the undergraduate student body. Incoming students may apply to the Honors Program at the time they apply to the University; a small group of rising sophomores may also apply.

The program is characterized by small, seminar-style classes with enrollments capped at 15 to 20 students; faculty who serve as mentors, models, and guides in the learning process; classroom approaches that call upon students to initiate inquiry, work collaboratively, and drive the exploration and learning process; interdisciplinary tools and modes of inquiry; and global or cross-cultural perspectives and course content.

In their first year, along with other courses, Honors Program students take:

HONR 1015	Honors Proseminar: UW 1020: Origins and Evolution of Modern Thought
-----------	---

HONR 1016	Honors Proseminar: Origins and Evolution of Modern Thought
-----------	--

HONR 1033	Honors Proseminar: Scientific Reasoning and Discovery
-----------	---

HONR 1034	Honors Proseminar: Scientific Reasoning and Discovery
-----------	---

In their second, third, and fourth years they take:

Two Self and Society courses taken as follows: two offerings of HONR 2047 or two offerings of HONR 2048 or one offering each of HONR 2047 and HONR 2048. Topics may not be repeated.

and

Two Arts and Humanities courses taken as follows: two offerings of HONR 2053 or two offerings of HONR 2054 or one offering each of HONR 2053 and HONR 2054. Topics may not be repeated.

In addition, they pursue coursework in their majors, including special or departmental honors and/or independent or mentored research. All Honors Program students participate in HONR 4199 Honors Capstone Experience, and complete a departmental or Honors senior thesis or project. The Honors proseminars meet certain general curriculum and elective requirements of the respective undergraduate schools. HONR 1015 Honors Proseminar: UW 1020: Origins and Evolution of Modern Thought is the required University Writing course for Honors students.

In order to remain in good standing, Honors Program students must enroll in at least 12 credits each semester and, except for the first year, maintain a cumulative GPA of 3.4 or higher. First-year students must achieve a cumulative GPA of at least 3.0. Successful participation in the program is recognized and recorded on a student's official transcript.

FACULTY

Executive Director M. Frawley

Deputy Director I. Creppell

Assistant Professors E. Aviv, T. Christov, L. Hammond, B. Kung, M. Ralkowski, R. Shepherd, W. Winstead

University Honors Advisory Committee R. Heller (Chair), H. Dobel, C. Dowd, J. Green-Lewis, R. Katz, D. Malone-France, B. Narahari, W. Reich, K. Roddis, S. Singh, T. Zawidzki, A. Zimmerman

Courses

HONR 1015. Honors Proseminar: UW 1020: Origins and Evolution of Modern Thought. 4 Credits.

Exploration of significant exemplars, milestones, and developments of human thought; foundational and representative thinkers and texts from Western and Eastern traditions provide an indication of the diversity and complexity of attempts to articulate responses to universal questions, problems, and aspirations.

HONR 1016. Honors Proseminar: Origins and Evolution of Modern Thought. 3 Credits.

Continuation of HONR 1015. Key developments and trajectories in human thought and inquiry into modern times.

HONR 1033. Honors Proseminar: Scientific Reasoning and Discovery. 4 Credits.

Using an inquiry-based approach, students learn to identify hidden regularities and patterns in nature that may indicate fundamental unifying principles and laws. The scientific method; evaluation of scientific information; limitations of the scientific process; development of a scientific hypothesis. Tools and methodologies of geology, chemistry, physics, biology, anthropology, and other disciplines.

HONR 1034. Honors Proseminar: Scientific Reasoning and Discovery. 4 Credits.

Continuation of HONR 1033. Using an inquiry-based approach, students learn to identify hidden regularities and patterns in nature that may indicate fundamental unifying principles and laws. The scientific method; evaluation of scientific information; limitations of the scientific process; development of a scientific hypothesis. Tools and methodologies of geology, chemistry, physics, biology, anthropology, and other disciplines.

HONR 1016. Enlightenment East & West. 4 Credits.

This course replaces HONR 1016 for students who enter the Honors Program as sophomores.

HONR 2043. Honors Microeconomics. 3 Credits.

An introductory microeconomics course that considers both the philosophical basis of economics as well as its methods and applications. Same as ECON 1011.

HONR 2044. Honors Macroeconomics. 3 Credits.

An accelerated introductory macroeconomics course that includes the study of special topics.

HONR 2047. Honors Proseminar: Social and Behavioral Sciences. 3 Credits.

Using the tools and modes of inquiry of the social and behavioral sciences, students find ways to understand significant social and political phenomena. Relationships among individuals, collectivities, families, and communities; interactions of psychological, social, political, economic, and historical forces at work in a given culture.

HONR 2047W. Prosem:Soc & Behav Sci. 3 Credits.

HONR 2048. Honors Proseminar: Social and Behavioral Sciences. 3 Credits.

Continuation of HONR 2047. Using the tools and modes of inquiry of the social and behavioral sciences, students find ways to understand significant social and political phenomena. Relationships among individuals, collectivities, families, and communities; interactions of psychological, social, political, economic, and historical forces at work in a given culture.

HONR 2048W. Proseminar: Soc. & Behav. Sci.. 3 Credits.

HONR 2053. Honors Proseminar: Arts and Humanities. 3 Credits.

Using an array of artistic forms (poetry, prose literature, drama, film, painting, sculpture, architecture, dance, and music), students explore the ways cultures are defined and understood through artistic expression, and the ways in which particular cultures value and critique these forms of personal and social expression.

HONR 2053W. Arts & World Cultures Prosem. 3 Credits.

HONR 2054. Honors Proseminar: Arts and Humanities. 3 Credits.

Continuation of HONR 2053. Using an array of artistic forms (poetry, prose literature, drama, film, painting, sculpture, architecture, dance, and music), students explore the ways cultures are defined and understood through artistic expression, and the ways in which particular cultures value and critique these forms of personal and social expression.

HONR 2054W. Arts & World Cultures Prosem. 3 Credits.

HONR 2175W. Honors Special Topics. 0-6 Credits.

HONR 2182. Honors Internship. 0-4 Credits.

The Honors Program allows credit to Honors students for academic work that puts an internship in a broader scholastic context. Each student must have a GW faculty member oversee his or her project. The Honors internship faculty member determines the student's grade.

HONR 2184. Honors Undergraduate Research. 0-4 Credits.

Independent or faculty-mentored research resulting in a significant written or other product.

HONR 2185. Honors Research Assistantship. 0-4 Credits.

Students provide substantive assistance to a faculty member engaged in scholarly or scientific research.

HONR 4198. Honors Senior Thesis. 3-4 Credits.

One- or two-semester thesis under faculty guidance. May be repeated for credit.

HONR 4199. Honors Capstone Experience. 1 Credit.

Students re-engage with core questions and issues related to the Honors Program curriculum, reflecting on their learning in relation to enduring questions and challenges of our world.

NAVAL SCIENCE

Naval Reserve Officers Training Corps Program

The Naval Reserve Officers Training Corps (NROTC) offers young men and women the opportunity to qualify for a full scholarship and a commission in the Navy or Marine Corps. NROTC midshipmen are required to complete the naval science courses and attend weekly professional seminars. During the summer, NROTC midshipmen participate in active duty at sea or shore-based training cruises for approximately four weeks. Upon receiving the baccalaureate and completing the NROTC program, qualified midshipmen are commissioned as ensigns in the U.S. Navy or second lieutenants in the Marine Corps. Commissioned naval officers go on to training in various warfare specialties and serve as surface or submarine officers, naval aviators, or SEALs. Marine Corps officers attend basic school in Quantico, Virginia, and serve in fields such as infantry, artillery, and aviation. Staff positions (intelligence, law, medicine) are not normally offered through NROTC. Students may join the NROTC through any one of the following programs.

Four-Year Scholarship Program—Students enter the NROTC Four-Year Scholarship Program through national competition and are appointed midshipmen in the Naval Reserve. While enrolled, a four-year-scholarship student receives government-provided tuition, fees, \$350 per semester for books, uniforms, and an allowance of up to \$400 per month. Upon graduation, students are commissioned with a minimum four-year active duty service obligation. Scholarship Program students must include in their degree program courses in English, calculus, cultural awareness, physics, national security policy, and naval science and participate in three summer training periods of approximately four weeks each.

Two-Year Scholarship Program—Selection for this program is made through national competition, based on the student's academic record, physical qualifications, and an interview. Application should be made by the middle of the fall semester of the student's sophomore year. Selected applicants attend six weeks of instruction at the Naval Science Institute (NSI) at Newport, Rhode Island, during the summer before their third academic year. At NSI, students take courses in naval science, physical fitness, and drill, similar to those required of four-year NROTC students during their freshman and sophomore years. Successful completion of the NSI program qualifies the two-year applicants for appointment as midshipmen in the Naval Reserve and enrollment in the NROTC Scholarship Program. Upon acceptance of this appointment, students receive all the benefits and assume all the obligations of midshipmen in the Four-Year Scholarship Program.

Entering freshmen and transfer students who are awarded NROTC scholarships and plan to live on campus may also be eligible for GW Residence Hall Awards from the University. NROTC scholars with prior experience in the Navy are eligible

for awards covering the nominal charges for on-campus housing and meals. NROTC scholars who are new to the Navy and are majoring in mathematics, chemistry, physics, or a program in the School of Engineering and Applied Science may receive up to \$4,000 to be applied toward the costs of on-campus housing and meals. Further information on these awards is available from the University Office of Admissions.

Four-Year College Program—Students are enrolled in a non-scholarship Four-Year College Program upon acceptance by the Department of Naval Science. Uniforms are provided, and during their junior and senior years, students receive up to \$400 per month. Students must include in their degree program courses in college algebra, science, and naval science and must attend the four-week at-sea training period between junior and senior year. Upon commissioning, College Program students serve a minimum of four years' active duty. Midshipmen who complete one term as College Program students, have a satisfactory academic record, and are physically qualified may compete for a scholarship awarded by the Chief of Naval Education and Training. If awarded, the scholarship will be for the remainder of the student's undergraduate enrollment, up to a maximum of three and a half years; service requirements and benefits are the same as for the scholarship programs.

Two-Year College Program—Application should be made by the middle of the fall semester of the student's second year. Selections are made through the Chief of Naval Education and Training, based on the student's academic record, physical qualifications, and an interview. Those students selected will attend the NSI and upon successful completion may enroll in the program. The benefits and obligations are the same as for the Four-Year College Program.

Requirements for all candidates—Qualifications for acceptable candidates for the Scholarship Program or the College Program include U.S. citizenship, fulfillment of physical requirements, and willingness to participate in required summer training periods and to accept a commission in the U.S. Navy or Marine Corps when offered.

Enrollment in NROTC is not a requirement for taking naval science courses. Any student enrolled at George Washington University may take naval science courses with the approval of the Professor of Naval Science.

SUSTAINABILITY

One of GW's Interdisciplinary and Special Undergraduate programs, the 18-credit undergraduate minor in sustainability includes courses in three tracks: environment/earth systems, society and sustainability, and policy, organization, and leadership. Each track includes a choice of courses from several GW schools. Approved courses with varying topics and courses taken through study abroad can also be part of the program. Requirements include experiential learning and at least one course taken outside the student's home school and discipline.

REQUIREMENTS

The 18-credit minor in sustainability includes a number of innovative features. Unlike other Universities where environmental studies or environmental management may be housed in a single school, the GW vision seeks to be genuinely trans-disciplinary. To encourage the participation of all schools and faculty, and to allow students to experience inter-disciplinary methods and approaches to sustainability, students will be required to take a minimum of 6 credits (including the inter-disciplinary introductory course) outside their home school and discipline.

Additionally, 3 credits of experiential learning will be required as a culminating experience for juniors or seniors. In order to give students a holistic view of sustainability, students are required to take at least 3 credits in each of the three tracks. Green Leaf courses (<https://sustainability.gwu.edu/featured-green-leaf-courses-0>) (courses that focus on or incorporate issues of sustainability in their syllabi) are automatically eligible to be counted for the minor, as long as they fit the structure.

Foundation course:

SUST 1001	Introduction to Sustainability
-----------	--------------------------------

Tracks (at least 3 credits from each track):

Track A: Environmental/Earth Systems

Courses in science or engineering that cover climate, energy, water or ecology

Track B: Society and Sustainability

Courses in public health, food, social equity, urban studies, international development or economics

Track C: Policy, Organization and Leadership

Courses in methods, policy, law, business, and organizational sciences

Culminating experience:

Experiential learning opportunity including sustainability-related field work, directed research, independent study, internships, community service, service learning courses, etc.

SUST 1001 and permission of the program director are prerequisite to SUST 3095 through SUST 3098

SUST 3095	Sustainability Fieldwork
-----------	--------------------------

SUST 3096	Directed Research in SUST
-----------	---------------------------

SUST 3097	Internship in SUST
-----------	--------------------

SUST 3098	Community Service in SUST
-----------	---------------------------

Note: Students must get approval from academic advisor to arrange the culminating experience and to register for SUST 3097 and SUST 3098. For each of these courses there is an expectation of 40 hours of internship or service over the course of the semester.

A list of courses that fulfill each track can be found in the Undergraduate Minor in Sustainability Student Guide (https://sustainability.gwu.edu/sites/sustainability.gwu.edu/files/downloads/STUDENT%20GUIDE%20Undergraduate%20Sustainability%20Minor_0.pdf).

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

SUST 1001. Introduction to Sustainability. 3 Credits.

The concept of sustainability is both broad and specific as it is applied to areas ranging from social systems to law, engineering, public health, and natural systems. The course considers goals, principles, and practical applications, with a multidisciplinary perspective on major environmental and social issues growing out of these concerns.

SUST 2002. The Sustainable City. 3 Credits.

This course will explore the connection between cities and sustainability. We consider sustainability from a variety of theoretical and practical perspectives and examine some of the most pressing and critical issues that must be addressed in order to create a sustainable city.

SUST 2003. The Sustainable Plate. 3 Credits.

The course will focus on how our dietary choices affect not only our health but the environment and those involved in the production of food. In this class we will explore the sustainable plate— how does dinner affect the future of the environment, economy, and society— from an interdisciplinary perspective.

SUST 3002. Climate Change and Policy. 3 Credits.

SUST 3095. Sustainability Fieldwork. 0-3 Credits.

Research in the field that might include such efforts as wildlife management, pollution evaluation, or surveys. Students complete a series of reflection essays throughout the semester.

SUST 3096. Directed Research in SUST. 3 Credits.

Directed research with a GW faculty member or in a study abroad experience that might include laboratory research, archival work, or literature reviews. Students complete a series of reflection essays and other assignment throughout the semester. Prerequisites: Sust 1001 and by permission of instructor.

SUST 3097. Internship in SUST. 3 Credits.

A paid or unpaid internship with an organization working to implement sustainability or sustainability policy. Students complete a series of reflection essays and other assignments throughout the semester. Prerequisites: Sust 1001 and by permission of instructor.

SUST 3098. Community Service in SUST. 0-3 Credits.

Volunteer service with a nonprofit organization or federal agency working to implement sustainability or sustainability policy. Students complete a series of reflection essays and other assignments throughout the semester. Prerequisites: SUST 1001 and by permission of instructor.

WOMEN'S LEADERSHIP PROGRAM

The Women's Leadership Program (WLP) (<http://wlp.gwu.edu>) is a selective, year-long, living and learning program for freshmen women of any GW school. Offered at the Mount Vernon Campus, WLP commemorates and preserves the vision of the founder of Mount Vernon College and Seminary, Elizabeth J. Somers. WLP students have the benefit of small classes, close contact with faculty and women in leadership roles, and strong community ties within the Program.

The dynamic curriculum emphasizes exploration and development of women's leadership through academic courses and weekly symposia. WLP symposia offer special lectures, workshops, and experiential learning that draw on the unique resources of Washington, D.C., to bring students together with women of achievement in leadership roles from many professional fields.

FACULTY

Director: Rachelle S. Heller, Associate Provost for Mount Vernon Campus

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students

- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

WLP 1020. WLP Humanities Seminar. 3 Credits.

A writing-intensive seminar that emphasizes critical reading skills, concepts of disciplinary, and processes of producing and legitimating knowledge. Texts and emphasis vary according to cohort.

WLP 1110. Women and Leadership I Symposium (I). 1 Credit.

A series of special programs that complements WLP 1101- WLP 1102. Concurrent registration in WLP 1101- WLP 1102 is required.

WLP 1111. Women and Leadership I Symposium (II). 1 Credit.

Continuation of WLP 1110. A series of special programs that complements WLP 1101- WLP 1102. Concurrent registration in WLP 1101- WLP 1102 is required.

WLP 4198. WLP Independent Study. 3 Credits.

COLUMBIAN COLLEGE OF ARTS AND SCIENCES

Dean B. Vinson III

Executive Associate Dean T.A. Murphy

Associate Deans C.H. Sterling, E. Arnesen, Y. Rong, E. Chacko

Since its founding in 1821, Columbian College, the original college of liberal arts and sciences of The George Washington University, has been the cornerstone of the campus community. The University awarded its first Doctor of Philosophy degree in 1888, one of the first institutions in the United States to do so. Columbian College of Arts and Sciences today houses all undergraduate and graduate programs in the arts and sciences, offering associate's, bachelor's, master's, and doctoral degrees and graduate certificates.

The rich and diverse arts and sciences curriculum is designed to strengthen the student's ability to analyze the social, cultural, and physical environment and to communicate findings in an articulate fashion. These purposes are accomplished by means of the study of various disciplines within the humanities, social sciences, and mathematical and natural sciences.

Students may elect one of more than 50 departmental or interdisciplinary majors; they may also elect double majors or individualized degree programs. The College offers its undergraduates opportunities for pre-professional education in many fields and for internships in a stimulating urban environment. Graduate students are offered more than 40 master's programs, 20 doctoral programs, and 15 certificate programs.

REGULATIONS

- Undergraduate Programs (p. 63)
- Graduate Programs (p. 65)

Undergraduate Programs

Columbian College of Arts and Sciences offers undergraduate programs leading to the degrees of Associate of Arts, Bachelor of Arts, Bachelor of Science, and Bachelor of Fine Arts. In cooperation with the School of Medicine and Health Sciences, Columbian College offers a seven-year integrated Bachelor of Arts/Doctor of Medicine.

One hundred twenty hours of academic coursework must be passed with a cumulative grade-point average of at least 2.0. Note that some courses outside Columbian College (notably lifestyle, sport, and physical activity courses) do not count toward the 120-credit requirement. General education, major, and other requirements described below must be met.

Each student must declare a major during the sophomore year. A student must declare a major not later than the registration period during the fourth full-time semester or the semester following completion of 45 credits, whichever comes first. A

student may change the major with the consent of the dean and of the department or committee concerned; the student must meet the requirements for the new major in effect at the time the change is approved. At least 60 credits of coursework must be taken outside the major-field department or major program (this does not apply to the Bachelor of Fine Arts curriculum).

General Education Curriculum Requirement

In addition to the University General Education Requirement, undergraduate students in Columbian College must complete a further, College-specific general education curriculum—Perspective, Analysis, Communication, or G-PAC. Together with the University General Education Requirement, G-PAC engages students in active intellectual inquiry across the liberal arts. Students achieve a set of learning outcomes that enhance their analytical skills, develop their communication competencies, and invite them to participate as responsible citizens who are attentive to issues of culture, diversity, and privilege.

Coursework for the University General Education Requirement is distributed as follows:

- Writing—one course in university writing and two writing-in-the-disciplines (WID) courses;
- Humanities—one approved humanities course that involves critical thinking skills;
- Mathematics or Statistics—one course in either math or statistics;
- Natural or Physical Science—one approved laboratory course that employs the process of scientific inquiry; and,
- Social Sciences—two courses in the social sciences

Coursework for the Columbian College general education curriculum is distributed as follows:

- Arts—one approved arts course that involves the study or creation of artwork based on an understanding or interpretation of artistic traditions or knowledge of art in a contemporary context;
- Global or Cross-Cultural Perspective—one approved course that analyzes the ways in which institutions, practices, and problems transcend national and regional boundaries;
- Humanities—one approved humanities course that involves critical thinking skills (in addition to the one course in this category required by the University General Education Requirement);
- Local or Civic Engagement—one course that develops the values, ethics, disciplines, and commitment to pursue responsible public action;
- Natural or Physical Science—one approved laboratory course that employs the process of scientific inquiry (in addition to the one course in this category required by the University General Education Requirement; and,
- Oral Communication—one course in oral communication.

Certain courses are approved to fulfill the requirement in more than one of these categories.

Courses taken in fulfillment of the Columbian College general education curriculum may also be counted toward majors or minors. Transfer courses taken prior to, but not after, admission to George Washington University may count toward the University general education requirement and Columbian College general education curriculum, if those transfer courses are equivalent to GW courses that have been approved by the University and the College.

Lists of approved courses in the above categories are included on each undergraduate major's Bulletin page.

Majors

Typically, students declare a major during their sophomore year. Once students have earned 45 credits, they must declare a major in order to register for further coursework. Students must complete the major requirements in effect at the time of declaration. Students may change their major with the consent of the new department or program.

Scholarship Performance in the Major

Major fields are defined by a set of required courses. The required curricula for majors are outlined under each department's heading in this Bulletin. A minimum grade of C– must be attained in all courses numbered 2000 or above that are required for the major. If a student receives a grade of D+, D, or D– the student may either repeat the course until a satisfactory grade (C– or better) is attained, or with the permission of the department, substitute another course numbered 2000 or above.

Minors

Students who wish to familiarize themselves with a field outside their major may graduate with a minor in addition to the major. Not all Columbian College departments offer undergraduate minors; the requirements prescribed by those that do are listed under the applicable department. Columbian College students may pursue minors in other schools of the University, as well as those in naval science and in sustainability. Students interested in a minor should consult a faculty mentor in the applicable department and declare through the Office of Undergraduate Studies. Students may pursue at most two minors.

Scholarship Performance in the Minor

Courses numbered 2000 or above passed with a grade below C– may be used to fulfill a minor field curricular requirement but may not be counted toward the total number of credits required for the minor.

Advising

Students entering Columbian College are assigned an advising team, or "POD" that advises them from first arrival on campus through graduation. Students engage with advisors to successfully navigate their academic experience, through

conversations about understanding university and college requirements, exploring major options, overcoming academic challenges, and setting goals. Students are empowered to take ownership of, and responsibility for, their educational experiences. Specialized advising is provided to students interested in health professions or law.

Students who have not declared a major should consult with their advising POD before registering for classes. Once students declare their major, they also are advised by a faculty mentor in their major department.

Students need to build a support system that ensures academic success. Professors, faculty mentors, professional advisors, tutors, and/or counselors should be part of that support system. Assistance is available through the Division of Student Affairs (<http://students.gwu.edu>), Mental Health Services (<http://counselingcenter.gwu.edu>), Multicultural Student Services Center (<http://gwired.gwu.edu/mssc/?url=mssc>), International Services Office (<http://internationalservices.gwu.edu>), and Writing Center (<http://www.gwu.edu/%7Egwriter>).

Preparation for Medical School

Students who plan to apply to medical school fulfill both the general education requirement of the University and the Columbian College general education curriculum. They may select any major at GW. Advice about academic preparation for medical school is provided by the health professions advisors in the Office of Undergraduate Studies (<http://columbian.gwu.edu/undergraduate/advising>). For admission to most medical schools, students must earn a bachelor's degree that includes the following coursework:

- Biology—8 credits of introductory biology, including laboratory. Students who receive credit for AP biology must complete 8 credits of upper-level biology coursework, including laboratory.
- Chemistry—8 credits of general inorganic chemistry, including laboratory.
- Organic Chemistry—8 credits, including laboratory.
- Biochemistry—3 credits.
- Physics—8 credits, including laboratory.
- English—6 credits in introductory English composition courses (fulfilled by the University Writing Program (<http://www.gwu.edu/%7Euwp>)).
- General Psychology—3 credits.
- Introduction to Sociology—3 credits.

Many medical schools have additional entrance requirements, which might include courses in genetics, statistics, and mathematics; even when such courses are not required, they are strongly recommended. Beyond the specified requirements, applicants are urged to follow their personal interests in developing their course of study.

Preparation for Law School

A broad liberal education is the best undergraduate preparation for law school. Advice about academic preparation for law school is provided by the pre-law advisor in the Office of Undergraduate Studies (<http://columbian.gwu.edu/undergraduate/advising>).

Seven-Year Integrated Bachelor of Arts/Doctor of Medicine

In addition to the early selection program described under the School of Medicine and Health Sciences, there is a seven-year integrated B.A./M.D. program for students of high ability and maturity who have decided, before applying to college, that they wish to become physicians and want to accomplish that goal in a shorter period of time. Detailed information on this program is available through the Office of Admissions (<http://undergraduate.admissions.gwu.edu/seven-year-bamd>).

General CCAS Policies

Pass/No Pass Option – A junior or senior student in Columbian College who is in good academic standing may, with the approval of the instructor and the Office of Undergraduate Studies, take one course per semester that is graded on a letter-grade basis for a grade of *P*, Pass, or *NP*, No Pass. Students may not elect to take more than four *P/ NP* courses under this regulation. Students may, however, also receive grades of *P/NP* in courses that are graded on a *P/ NP* basis only. No course taken under the *P/NP* option will be counted toward the College's general curriculum requirement or the requirements for any major or minor field. Transfer students may not elect this option until the second semester of enrollment in the University. Under no circumstances may a student change from *P/NP* status to graded status, or vice versa, after the end of the eighth week of class.

Preliminary Placement Examinations – All foreign language departments require students to take placement tests to determine their level of proficiency in languages studied prior to enrollment at the University. The student is placed in an appropriate course on the basis of these tests. Students may not register for a course other than that determined by the placement test without written permission of the language department. There is no charge to the student for placement tests, and no credit (advanced standing) is awarded for courses waived as a result of these tests. Students who wish to register for MATH 1051, MATH 1220, MATH 1231, or MATH 1252 are required to take the placement test administered by the Department of Mathematics to determine eligibility based on their achieved score. In some cases, AP test scores or SAT II scores may be substituted for the placement test. See Interpreting Your Placement Score (<https://math.columbian.gwu.edu/interpreting-your-placement-test-score>) for more information.

Courses Outside of Columbian College – No more than 3 credits of Health and Wellness (HLWL) courses may count toward the 120 credits required for the bachelor's degree in

Columbian College. No credit toward the degree is allowed for lifestyle, sport, and physical activity (LSPA) courses.

Earning an Additional Credit – In exceptional circumstances and with the prior approval of the instructor and Office of Undergraduate Advising, a student may register for and earn an additional credit in upper-division courses within the College by doing a significant amount of extra work as assigned and supervised by the instructor.

Graduate Programs

CCAS Regulations

CCAS provides an on-line Graduate Student Handbook (<http://columbian.gwu.edu/graduate/graduatestudenthandbook>) that contains additional updated information on policies, regulations, and other matters of concern to enrolled and admitted students. It is the responsibility of the student to be aware of the information contained in both this Bulletin and the Handbook. Students should also consult departmental/program handbooks and guidelines.

Admission Requirements

A detailed description of the policies that follow is available at the Columbian College website (<http://columbian.gwu.edu/graduate>). Applicants must hold an undergraduate degree from an accredited institution of higher learning. Applicants should have a strong academic background, usually with a major, or equivalent, in the field in which they intend to study for an advanced degree. Normally, a *B* average or equivalent from an accredited college is required. With evidence of special promise, such as high Graduate Record Examination scores, an applicant whose academic record falls short of a *B* average may be accepted on a conditional basis. Meeting the minimum requirements does not assure acceptance. The departments/programs may, and often do, set higher admission standards. Students who apply in their senior year must provide evidence of the completion of their baccalaureate work before registration is permitted.

Most programs require applicants to submit scores on the GRE general test. In addition, some programs require scores on a GRE subject test. The applicant must have the Educational Testing Service send the required score reports directly to George Washington University. GRE scores are valid for five years.

Some programs require students to take prerequisite or deficiency courses within the first year of starting the degree. These courses will not count towards the requirements of the degree program and will not count towards the degree GPA.

English Language Requirements for International Students

Applicants who are not citizens of countries where English is the official language or who do not hold a degree from a regionally accredited U.S. institution of higher learning are required to submit scores from the Test of English as a

Foreign Language (TOEFL), the academic International English Language Testing System (IELTS), or the Pearson Test of English-Academic (PTE). English language scores are valid for two years. The most recent test scores will be used for applicants who submit multiple scores. Specified possible exemptions from this policy can be found on the Graduate Admissions website (<http://graduate.admissions.gwu.edu/english-language-requirements>). The required minimum score for admission is 80 on the Internet-based or 550 on the paper-based TOEFL, or , an overall band score of 6.0 on the IELTS with no individual band score below 5.0, or a score of 53 on the PTE. Some programs have higher minimum scores.

Applicants for graduate assistantships or fellowships must have a minimum score of 100 on the Internet-based TOEFL or 600 on the paper-based TOEFL, or an overall band score of 7.0 on the IELTS with no individual band score below 6.0, or a score of 68 on the PTE.

Students with the following English language test scores are exempt from taking English for Academic Purposes (EAP) courses: TOEFL, 600 paper-based or 100 Internet-based; IELTS, overall band score of 7.0 with no individual band score below 6.0; PTE, 68. Students with test scores below these minimums must register for an EAP course during their first semester. Students assigned EAP courses should anticipate additional tuition expenses as well as a possible extended period of time required to complete their degree program. EAP courses do not count toward degree requirements.

Readmission

A student who wishes to resume a graduate program that had been interrupted for a period of two years or more must file a new application for admission and provide supporting documentation to be considered for readmission. Readmission is not guaranteed, and the application is subject to review by the department concerned and/or the dean. The student may be required to take additional coursework and qualifying examinations on the coursework completed. A student who wishes to resume a graduate program that has been interrupted for a period of less than two years must petition the Department and Associate Dean. Readmission is not guaranteed.

Grades

Information on grades and computing the grade-point average is found under University Regulations (p. 20).

The symbol *I* (Incomplete) indicates that only a small portion of the required coursework remains to be completed and that a satisfactory explanation has been given to the instructor for the student's failure to complete the required work for a course. The conditions of the Incomplete must be detailed in a formal contract signed by the student and instructor and submitted to the department prior to recording the *I*. Failure to follow the conditions of the incomplete contract will result in a grade of

F. All other policies governing Incompletes are indicated under University Regulations (p. 20).

The symbol *IPG* (In Progress) is given for all thesis and dissertation research courses until the thesis or dissertation is completed. Upon the satisfactory completion of the thesis or dissertation, the symbol *IPG* is automatically changed to *CR* (Credit). *CR* may be indicated for Advanced Reading and Research courses and independent research courses.

Scholarship Requirements

Graduate students are required to maintain a minimum cumulative grade-point average of 3.0 (*B*) in all coursework taken following admission to a graduate program in the College. This includes credit taken for combined, dual, and joint degrees but excludes prerequisite and deficiency coursework. A GPA below 3.0 results in termination from the program unless the department successfully petitions the dean's office for academic probation rather than termination. Individual departments/programs may require a higher average. Once a student has matriculated at GW, graduate coursework that is taken at the University or through the Consortium and forms part of the student's departmentally approved program of studies may be included in the grade-point average. When a grade of *F* is received for a course, the grade is included in the student's grade-point average whether or not the course is repeated. Receiving a grade of *F* in a graduate course may be ground for probationary status or termination of degree candidacy.

A student may repeat a course in which a grade of *C* or above was received only when permitted to do so by the dean and the department concerned, unless the course description states that the course may be repeated for credit. A written statement of permission must be submitted for approval to the CCAS Graduate Office by the director of graduate studies. If such a course is repeated, both grades received remain on the student's record and are included in the student's grade-point average. The second taking of the course does not count toward degree requirements.

A graduate student may take an advanced undergraduate course for graduate credit only upon the approval of the department at the time of registration. Such approval is granted only with the provision that the student complete additional work in order to receive graduate credit.

Program of Studies

The program of studies is a formal agreement between a student and a department/program of the requirements to be met in completing a specific degree program as well as the dates by which each requirement must be completed. Students should consult their department's director of graduate studies to outline their program of studies as soon as they begin graduate work.

Students must make sure that they are fully informed of the requirements of Columbian College of Arts and Sciences as

well as the requirements of their department or program. Students who must complete additional requirements as specified in their letter of admission must consult the Director of Graduate Studies early in their first semester.

Academic Work Load

All degree candidates must be registered for a minimum of 3 credits in the Spring and Fall semesters unless they are eligible for continuing research. Students finishing in the Summer may register for 0 credits of Continuous Enrollment. Full-time students register for 9 to 12 credits each fall and spring semester, half-time students for 5 to 8 credits, and part-time students for 3 or 4 credits. In the summer, full-time status requires 6 credits, half-time status, 3 credits. These credit amounts do not apply to students who have fewer than the stated number of credits remaining to complete their programs. No more than 15 credits may be taken during any one semester without permission of the department and the dean. Students who are employed more than 20 hours per week should not register for more than 6 credits in any semester.

Continuous Registration

All students must be continuously enrolled while working toward a degree, except during the summer sessions (unless required by the program or if the student intends to graduate in the summer). Students who have completed all coursework and thesis or dissertation research requirements and are within CCAS deadlines must register for 1 credit of CCAS 0920 (master's students), or CCAS 0940 (doctoral students), Continuing Research, each semester until completion of the program; the course reference numbers are found in the Schedule of Classes under Columbian College. If continuous enrollment is not maintained, the student is dropped from the degree program unless the student is registered for an approved leave of absence by the CCAS Graduate Office.

Leave of Absence

A student who is temporarily unable to continue the program of studies may request leave of absence for a specific period of time, not to exceed two semesters during the total period of degree candidacy. If the request is approved by the program and the Associate Dean for Graduate Studies, CCAS will register the student for a leave of absence for each semester. Leaves of absence are normally granted for medical or family reasons and may be granted for other reasons at the discretion of the department and Associate Dean.

Special Program Requirements

Certain programs require their degree candidates to demonstrate a reading knowledge of an appropriate foreign language or languages, a competence in quantitative methods, or some other special subject requirement. Courses taken at the undergraduate level to fulfill these requirements may not be counted in the number of graduate credits required for these programs.

Graduation Requirements

All students must submit an online Application for Graduation (<http://registrar.gwu.edu/online-graduation-application-instructions>) early in the semester or summer session in which they intend to graduate. Students must be registered in active status in the College during the semester or summer session in which they plan to graduate. Degrees are conferred in January, May, and August. Students who have completed the requirements for a degree but have not yet been awarded the degree will be issued a letter to this effect upon request to the CCAS Graduate Office. A commencement ceremony is held annually in May.

Fellowships and Financial Aid

Many departments offer graduate assistantships and fellowships; students should check with their department/program concerning funding opportunities. Graduate assistants and University Fellows are appointed by the associate dean for graduate studies, based on department recommendations. Other kinds of sponsored and University awards are also available. Awards are based on academic excellence, and only full-time graduate degree candidates in Columbian College are eligible to be considered. Doctoral candidates may be funded for a maximum of five years, M.A. and M.S. candidates for a maximum of two years, and M.F.A. candidates for a maximum of three years.

Students applying for admission who also wish to apply for an assistantship/fellowship should submit a completed application for admission before the funding admission deadline ([http://www.gwu.edu/list-graduate-programs?field_school_tid\[\]=523](http://www.gwu.edu/list-graduate-programs?field_school_tid[]=523)). Currently enrolled students who wish to apply for graduate student support should consult their departmental requirements.

International students applying for graduate assistantships/fellowships should refer to the International Student Financial Aid section (p. 49) of this Bulletin for regulations governing the appointment of international graduate assistants.

Students who wish to apply for loans should indicate their intent to do so on the Application for Admission. An overview of funding opportunities is available from the University's Office of Graduate Student Assistantships and Fellowships (<http://www.gwu.edu/~fellows>).

Partnerships

CCAS graduate programs have long-term partnerships with important Washington-area institutions that include the Smithsonian Institution; NIH, NIST, and other federal agencies; the Folger Shakespeare Library; the Shakespeare Theatre; and the Corcoran Gallery, Phillips Collection, and Textile Museum.

MAJORS

Undergraduate Majors

The Columbian College of Arts and Sciences offers the bachelors degrees listed below.

All fields listed below (except biological anthropology, biophysics, and statistics) may lead to the Bachelor of Arts degree. In addition to the fields listed here, students may pursue a Bachelor of Fine Arts in interior architecture and design.

- Africana Studies (p. 85)
- American Studies (p. 92)
- Anthropology (p. 105)
- Arabic Studies (p. 149)
- Archaeology (p. 106)
- Art History (p. 200)
- Art History and Fine Arts (p. 197)
- Biological Anthropology (p. 107)
- Biology, Bachelor of Arts (p. 125)
- Biology, Bachelor of Science (p. 126)
- Biophysics (p. 315)
- Chemistry, Bachelor of Arts (p. 139)
- Chemistry, Bachelor of Science (p. 140)
- Chinese Language and Literature (p. 161)
- Classical Studies (p. 150)
- Communication (p. 286)
- Creative Writing and English (p. 185)
- Criminal Justice (p. 369)
- Dance (p. 390)
- Economics, Bachelor of Arts (p. 171)
- Economics, Bachelor of Science (p. 172)
- English (p. 187)
- Environmental Studies (p. 195)
- Fine Arts (p. 202)
- French Language, Literature, and Culture (p. 362)
- Geography (p. 221)
- Geological Sciences, Bachelor of Arts (p. 225)
- Geological Sciences, Bachelor of Science (p. 226)
- German Language and Literature (p. 363)
- History (p. 238)
- Human Services and Social Justice (p. 370)
- Interior Architecture and Design, Bachelor of Fine Arts (p. 255)
- Japanese Language and Literature (p. 162)
- Journalism and Mass Communication (p. 273)
- Judaic Studies (p. 257)
- Mathematics, Bachelor of Arts (p. 264)
- Mathematics, Bachelor of Science (p. 265)
- Music (p. 284)
- Organizational Sciences (p. 287)
- Peace Studies (p. 292)

- Philosophy (p. 300)
- Philosophy: Public Affairs Focus (p. 301)
- Physics, Bachelor of Arts (p. 315)
- Physics, Bachelor of Science (p. 316)
- Political Communication (p. 274)
- Political Science (p. 327)
- Political Science: Public Policy Focus (p. 329)
- Psychology (p. 342)
- Religion (p. 358)
- Russian Language and Literature (p. 364)
- Sociology (p. 370)
- Spanish and Latin American Languages, Literatures, and Cultures (p. 365)
- Speech, Language, and Hearing Sciences (p. 377)
- Statistics (p. 383)
- Theatre (p. 391)
- Women's Studies (p. 398)

Scholarship Performance in the Major

Major programs are defined by a set of required courses that can be internal to the home department or external to that department but still required in the major program. The prescribed curricula and minimum specific requirements for majors are outlined under each department's heading in this Bulletin. For all majors in all departments, a minimum grade of C– must be attained in all upper-level courses numbered in the 2000s through 4000s that are required for the major, regardless of whether those courses are internal or external to the home department.

If a student receives a grade of D+, D, or D– in such a course, the major department may permit that course to satisfy a curricular requirement (such as a prerequisite), but it will not count toward the minimum number of credits required for the major until the course is repeated and a satisfactory grade (C– or better) is attained. Once the student has completed the course with a satisfactory grade, credit hours earned the first time the course was taken will count toward the minimum number of credits required in the major program. Credit earned for the repetition will not count toward the degree.

This condition of C– or better does not apply to introductory-level courses (numbered in the 1000s) that may apply to the major, although a department may choose to implement such a restriction based on its own discretion.

Double Majors

Students who complete the requirements of two majors in Columbian College (such as mathematics and physics or history and economics) may graduate with a double major. Consult with advisors in the two departments concerned before officially declaring both majors with the Office

of Undergraduate Studies (<http://columbian.gwu.edu/undergraduate/advising>).

A Columbian College student may pursue a second major in the School of Business, the School of Engineering and Applied Science, or the Elliott School of International Affairs provided that permission to do so has been obtained from the appropriate administrative office. Students in other schools may also take a second major in Columbian College. Students wishing to pursue one of these options must request approval through the appropriate department and Columbian College's Office of Undergraduate Studies. In all cases, students must complete the general education requirements and a major in their home school in order to graduate.

Double majors do not result in two degrees. See Double Majors and Double Degrees under University Regulations.

Special Interdisciplinary Majors

A student may propose a special interdisciplinary major, in consultation with appropriate academic advisors. The proposed major must have valid and clearly defined academic goals to be considered for approval. Only students with a 3.0 or better cumulative grade-point average are eligible to propose a special interdisciplinary major. The proposal must be submitted for approval by the end of the fourth semester or the semester following completion of 45 credit hours, whichever comes first.

Approval of the proposed major rests with the Committee on Undergraduate Studies, (<http://columbian.gwu.edu/undergraduate/advising>) which must also approve the proposed name of the major and the composition of the committee that will oversee it. At least 45 credit hours of the major must be completed in Columbian College. Because of the broad scope of an interdisciplinary program, it may not be part of a double major although students are allowed to declare a minor with approval of the Committee on Undergraduate Studies.

At the discretion of the committee overseeing the major, the student must either write an acceptable senior thesis or pass a comprehensive examination in the last semester of study toward the degree. Students may apply for Special Honors by registering for CCAS 4191 Special Interdisciplinary Major Capstone. To be eligible, students must meet the requirements for Special Honors stated under University Regulations, must have a cumulative grade-point average of at least 3.5, and must receive a Pass With Distinction from all members of the major committee on the final project or thesis.

MINORS

Minors

Students who wish to familiarize themselves with a field outside their major may graduate with a minor in addition to the major.

Not all Columbian College departments offer undergraduate minors; the requirements prescribed by those that do are listed under the department concerned. A student interested in a minor should consult a faculty advisor in the applicable department and declare both major and minor programs through the Office of Undergraduate Studies. Students may pursue at most two minors.

At least one-half of the course work required for a minor must be done in residence. Grades of C– or better must be earned in upper-division courses, including such courses transferred as advanced standing from another institution. Courses passed with a grade below C– may be used to fulfill a minor field curricular requirement but may not be counted toward the total number of credit hours required for the minor.

Columbian College students can pursue minors in other schools of the University, as well as those in naval science and in sustainability. Note that Columbian College students are limited in the number of hours they may take in courses outside the College ("professional credit" courses). Refer to Courses Outside Columbian College.

Columbian College offers minors in the following fields:

- Africana Studies (p. 87)
- American Studies (p. 93)
- Anthropology (p. 109)
- Applied Ethics (p. 311)
- Arabic Studies (p. 152)
- Arabic and Hebrew Languages and Cultures (p. 151)
- Archaeology (p. 109)
- Art History (p. 205)
- Art History and Fine Arts (p. 205)
- Biological Anthropology (p. 110)
- Biology (p. 127)
- Chemistry (p. 144)
- Chinese Language and Literature (p. 163)
- Classical Studies (p. 152)
- Communication (p. 289)
- Creative Writing (p. 189)
- Criminal Justice (p. 371)
- Cross-Cultural Communication (p. 110)
- Dance (p. 392)
- Economics (p. 174)
- English (p. 190)
- Film Studies (p. 196)
- Fine Arts (p. 205)
- French Language, Literature, and Culture (p. 366)
- Geographic Information Systems (p. 222)
- Geography (p. 222)
- Geological Sciences (p. 226)
- German Language and Literature (p. 366)

- History (p. 249)
- Human Services and Social Justice (p. 371)
- Italian Language and Literature (p. 367)
- Japanese Language and Literature (p. 164)
- Jazz Studies (p. 285)
- Journalism and Mass Communication (p. 275)
- Judaic Studies (p. 257)
- Korean Language and Literature (p. 164)
- Law and Society (p. 371)
- LGBT and Sexuality Studies (p. 401)
- Logic (p. 312)
- Mathematics (p. 266)
- Mind-Brain Studies (p. 312)
- Music (p. 285)
- Organizational Communication (p. 290)
- Organizational Sciences (p. 290)
- Peace Studies (p. 294)
- Philosophy (p. 313)
- Physics (p. 317)
- Political Science (p. 331)
- Psychology (p. 343)
- Religion (p. 360)
- Russian Language and Literature (p. 367)
- Sociocultural Anthropology (p. 111)
- Sociology (p. 372)
- Spanish and Latin American Languages, Literatures, and Cultures (p. 367)
- Speech, Language, and Hearing Science (p. 378)s
- Statistics (p. 384)
- Theatre (p. 392)
- Women's Studies (p. 402)

MASTER'S

Columbian College of Arts and Sciences offers the following Master degrees.

- Master of Arts in the field of American studies (p. 93)
- Master of Arts in the field of anthropology (p. 112)
- Master of Arts in the field of applied economics (p. 174)
- Master of Arts in the field of art history (p. 205)
- Master of Arts in the field of art therapy (p. 115)
- Master of Arts in the field of art therapy practice (p. 116)
- Master of Arts in the field of criminology (p. 372)
- Master of Arts in the field of economics (p. 175)
- Master of Arts in the field of English (p. 190)
- Master of Arts in the field of environmental resource policy (p. 193)
- Master of Arts in exhibition design
- Master of Arts in the field of forensic psychology (p. 334)

- Master of Arts in the field of geography (p. 222)
- Master of Arts in the field of history (p. 249)
- Master of Arts in the field of Islamic studies (p. 361)
- Master of Arts in the field of Jewish cultural arts (p. 258)
- Master of Arts in the field of leadership education and development (p. 290)
- Master of Arts in the field of legal institutions and theory (p. 332)
- Master of Arts in the field of mathematics (p. 266)
- Master of Arts in the field of media and strategic communication (p. 276)
- Master of Arts in the field of museum studies (p. 278)
- Master of Arts in new media photojournalism
- Master of Arts in the field of organizational sciences (p. 291)
- Master of Arts in the field of philosophy (p. 313)
- Master of Arts in the field of political science (p. 332)
- Master of Arts in the field of public policy with a concentration in philosophy and social policy (p. 313)
- Master of Arts in the field of public policy with a concentration in women's studies (p. 400)
- Master of Arts in the field of sociology (p. 372)
- Master of Arts in the field of speech-language pathology (p. 378)
- Master of Arts in the field of women's studies (p. 401)
- Master of Fine Arts in the field of classical acting (p. 148)
- Master of Fine Arts in the field of dance (p. 393)
- Master of Fine Arts in the field of fine arts (p. 207)
- Master of Fine Arts in the field of interior architecture and design (p. 255)
- Master of Fine Arts in the field of production design (p. 393)
- Master of Forensic Sciences (p. 212)
- Master of Public Administration (p. 349)
- Master of Public Policy (p. 349)
- Master of Science in the field of anatomical and translational sciences (p. 96)
- Master of Science in the field of applied mathematics (p. 266)
- Master of Science in the field of biological sciences (p. 127)
- Master of Science in the field of biostatistics (p. 132)
- Master of Science in the field of chemistry (p. 144)
- Master of Science in the field of crime scene investigation (p. 214)
- Master of Science in the field of high-technology crime investigation (p. 215)
- Master of Science in the field of molecular biochemistry and bioinformatics (p. 118)
- Master of Science in the field of physics (p. 317)

- Master of Science in the field of statistics (p. 384)

Unless otherwise specified, the requirements listed below are applicable to candidates for all master's degrees offered by Columbian College of Arts and Sciences.

General Requirements

Minimum credit requirements follow, but it should be noted that many departments set credit requirements well above the number of credits stated here. Specific requirements appear under the name of the department or program concerned in the bulletin. For a master's degree program that includes a thesis, satisfactory completion of a minimum of 30 credit hours of approved graduate work, including 6 credit hours of thesis research, is required. For a master's degree program that does not include a thesis, the number of credit hours of approved graduate course work is determined by the department. Some departments offer a choice between a thesis option and a non-thesis option. Undergraduate courses taken without additional graduate-level work, deficiency coursework, and EAP courses are not counted toward program requirements or the degree GPA.

Upon approval, up to one-half of the required graduate work may be taken in courses offered by another degree-granting division of this University. With approval, up to one-quarter of work toward a master's degree may be taken in courses offered by the other affiliated institutions of the Consortium of Universities of the Washington Metropolitan Area. In all cases, at least one-half of the hours counting toward the master's degree must be taken after entering the program, in graduate courses offered by Columbian College of Arts and Sciences.

Master's students have an overall four-year time limit for completion of all degree requirements. An approved leave of absence is not counted towards the time limit requirement. Students must apply, and be approved for an extension of time if they wish to study beyond the time limit.

Transfer of Credit

A maximum of one-quarter of the credit hours of graduate course work required for a degree may be approved for transfer to a graduate program in Columbian College from enrollment in non-degree status at GW or from another degree-granting school of this University or another accredited college or university. For a transfer of credit to be approved, *all* of the following conditions must be met:

1. the course work must be from an accredited institution and must have been taken within the five years prior to matriculation;
2. it must be approved by the department as part of the student's program of studies;
3. it must not have been applied to the completion of requirements for another degree;
4. it must be post-baccalaureate graduate-level course work;
5. the course must have received a grade of *B* or better.

Requests for transfer credit must be submitted in writing and approved by the department's director of graduate studies and the dean during the student's first year in the program. An official transcript of the course work must be on file before the request can be considered. Grades from transfer credit are not part of the graduate GPA, except in the case of approved non-degree GW credits.

Once enrolled in Columbian College of Arts and Sciences, students are not permitted to transfer course work taken outside the University, except under extraordinary circumstances; permission must be sought from the department and Associate Dean in advance.

Master's Comprehensive Examination

Many programs require degree candidates to pass a Master's Comprehensive Examination in the major subject. Examinations are held on dates fixed by the departments. The nature and form of the examination are the responsibility of the department or program. A student who fails to pass the Master's Comprehensive Examination may, with the approval of the department, repeat the examination at the next scheduled examination date. If the student fails a second time, no further opportunity to take the examination is permitted, and the student's degree candidacy is terminated.

The Thesis

The main purposes of a master's thesis are to demonstrate the student's ability to make independent use of information and training and to furnish objective evidence of constructive powers in a chosen field. The student normally registers for 6 credit hours of thesis research supervised by a director and a reader. Registration for thesis research entitles the student to the advice and direction of the member of the faculty under whom the thesis is to be written. The thesis subject must be approved by the faculty members who will direct the thesis. All theses must be submitted electronically by the stated deadlines and meet the formatting and other requirements set forth on the Electronic Theses and Dissertation (<http://library.gwu.edu/etds>) webpage.

DOCTORAL

Doctoral degrees

- Doctor of Philosophy (p. 71)
- Doctor of Psychology (p. 73)

Doctor of Philosophy program

Columbian College of Arts and Sciences offers the following Doctor of Philosophy degrees

- Doctor of Philosophy in the field of American studies (p. 93)
- Doctor of Philosophy in the field of anthropology (p. 113)

- Doctor of Philosophy in the field of biological sciences (p. 127)
- Doctor of Philosophy in the field of biochemistry and systems biology (p. 128)
- Doctor of Philosophy in the field of microbiology and immunology (p. 129)
- Doctor of Philosophy in the field of molecular medicine (p. 130)
- Doctor of Philosophy in the field of biostatistics (p. 133)
- Doctor of Philosophy in the field of chemistry (p. 146)
- Doctor of Philosophy in the field of economics (p. 175)
- Doctor of Philosophy in the field of English (p. 191)
- Doctor of Philosophy in the field of history (p. 250)
- Doctor of Philosophy in the field of American religious history (p. 250)
- Doctor of Philosophy in the field of human paleobiology (p. 251)
- Doctor of Philosophy in the field of mathematics (p. 267)
- Doctor of Philosophy in the field of physics (p. 318)
- Doctor of Philosophy in the field of political science (p. 332)
- Doctor of Philosophy in the field of psychology (p. 343)
- Doctor of Philosophy in the field of public policy and administration (p. 352)
- Doctor of Philosophy in the field of statistics (p. 385)

The Doctor of Philosophy program is divided into two parts: precandidacy and candidacy. During precandidacy, a student completes the general requirements and the General Examination. Once admitted to candidacy, the student prepares, submits, and defends the dissertation.

General Requirements

The programs leading to the degree of Doctor of Philosophy require the satisfactory completion of a minimum of 72 credit hours of approved graduate course work, including at least 12 and at most 24 hours of dissertation research. A minimum of 48 of these hours must be taken in the precandidacy stage, in preparation for the General Examination. A maximum of 12 of these hours may be taken in courses offered by the other affiliated members of the Consortium of Washington Area Universities. The exact number of credit hours required for any part of the total program is assigned by each department and may exceed the minimum required by the Columbian College. Ph.D. students have an overall eight-year time limit for completion of all degree requirements. An approved leave of absence is not counted towards the time limit requirement. Students must apply, and be approved for an extension of time if they wish to study beyond the time limit.

Transfer of Credit

Entering students who hold a master's degree from an accredited institution and in a field relevant to the proposed doctoral field of study may request transfer of up to 30 hours

of credit toward a doctoral degree. For those who do not hold the master's degree, a maximum of 30 hours of credit may be transferred, provided the conditions below are met:

1. the course work must be from an accredited institution and must have been taken within the five years prior to matriculation;
2. it must be approved by the department as part of the student's program of studies;
3. it must not have been applied to the completion of requirements for another degree;
4. it must be post-baccalaureate graduate-level course work;
5. the course must have received a grade of *B* or better.

Requests for transfer credit must be submitted in writing and approved by the department and the Associate Dean for Graduate Studies during the student's first year at GW. An official transcript of the course work must be on file before the request can be considered. Grades from transfer credit will not be counted towards the graduate degree GPA, except in the case of approved non-degree GW credits.

The General Examination

The General Examination is composed of an examination in each of the areas of study comprising the student's program. A student who fails to pass any part of the General Examination may, with the approval of the department, repeat the examination at the next scheduled examination date. If the student fails a second time, no further opportunity to take the examination is permitted, and the student's degree candidacy is terminated.

Satisfactory performance on the General Examination is required for admission to candidacy but does not guarantee it. A department will recommend advancement to candidacy only if satisfied with the student's performance in every aspect of the program, only after a dissertation advisor has been selected and a dissertation area determined, and only if the department is confident of the student's ability to complete the dissertation within the allotted time.

The Degree of Master of Philosophy

Upon departmental recommendation and approval of the dean, the degree of Master of Philosophy may be awarded to students who have been advanced to candidacy and successfully completed all requirements for the Doctor of Philosophy degree up to and including the General Examination. Not all departments recommend students for this degree. Students requesting the M.Phil. must contact the CCAS Graduate office and submit an online application for graduation (<http://registrar.gwu.edu/online-graduation-application-instructions>). The degree is not automatically conferred upon advancing to candidacy.

The Dissertation and Final Examination

A dissertation directed or co-directed by a member of the GW faculty is required of each doctoral candidate as evidence of ability to perform scholarly research and interpret its results.

The student normally enrolls for 12 to 24 hours of dissertation research after admission to candidacy. Dissertation Research must be taken in units of no less than 3 credits per semester. When the dissertation has been approved by the director and the members of the Dissertation Research Committee, the candidate takes the Final Examination (the defense). A committee of examiners composed of Columbian College faculty and outside scholars conducts the examination. If the candidate passes, he or she is recommended to Columbian College for the degree of Doctor of Philosophy. The dissertation must be submitted electronically by the stated deadline and meet the formatting and other requirements set forth on the Electronic Theses and Dissertations website (<http://library.gwu.edu/etds>).

The Doctor of Medicine/Doctor of Philosophy Dual Degree Program

A dual degree program is available to qualified students who seek both the Doctor of Medicine and Doctor of Philosophy degrees. The requirements that must be fulfilled for both degrees are identical to those currently and separately established in the School of Medicine and Health Sciences and Columbian College of Arts and Sciences. A student working toward these degrees may apply a maximum of 24 credit hours of approved course work in the School of Medicine and Health Sciences toward the Doctor of Philosophy degree. The estimated time for the completion of this dual program is six years. In order to enter the dual degree program, a prospective student must apply for and gain admission both to Columbian College and to the School of Medicine and Health Sciences separately through established procedures. Upon admission to both schools, the student may then apply for affiliation with the dual degree program.

The Doctor of Psychology program

Columbian College of Arts and Sciences offers the following Doctor of Psychology degree

- Doctor of Psychology in the field of professional psychology (p. 335)

General Requirements

The program leading to the degree of Doctor of Psychology requires the satisfactory completion of a minimum of 83 credit hours of approved graduate work. A maximum of 12 credit hours may be taken in courses offered by the other affiliated members of the Consortium of Universities. Doctor of Psychology students have an overall five-year time limit for completion of all degree requirements. An approved leave of absence is not counted towards the time limit requirement. Students must apply, and be approved for an extension of time if they wish to study beyond the time limit.

Transfer of Credit

Provisions are the same as those of the Doctor of Philosophy Program, above, except that up to 30 credits may be transferred into the program.

The General Examination

Each student is required to complete the General Examination no later than the beginning of the final semester of the program. A student who fails to pass any part of the General Examination may, in exceptional circumstances, and with the approval of the program, repeat the examination at the next scheduled examination date. If the student fails a second time, no further opportunity to take the examination is permitted, and the student's degree candidacy is terminated.

The Degree of Master of Psychology

Students who have earned 53 credits toward the Psy.D. may receive the M.Psy. degree. Further information on the requirements of the Doctor of Psychology degree appears under Professional Psychology (p. 333). Students requesting the M.Psy degree must submit an online application for graduation (<http://registrar.gwu.edu/online-graduation-application-instructions>). The degree is not automatically conferred after completion of 53 credits.

CERTIFICATES

Graduate certificate programs

Columbian College of Arts and Sciences offers a range of graduate certificate programs. Departments and programs offering graduate certificates are indicated in *italics* below.

- Graduate certificate in anatomical and (p. 97) *translational sciences - Institute of Biomedical Sciences* (18 credits)
- Graduate certificate in budget and public finance - *Public Policy and Public Administration* (12 credits)
- Graduate certificate in contexts of environmental policy (p. 193) - *Environmental Resource Policy* (12 credits)
- Graduate certificate in data science (p. 160) - *Data Science* (12 credits)
- Graduate certificate in documentary filmmaking (p. 268) - *Media and Public Affairs* (9 credits)
- Graduate certificate in exhibit design (p. 279) - *Museum Studies* (18 credits)
- Graduate certificate in financial mathematics (p. 267) - *Mathematics* (12 credits)
- Graduate certificate in forensic investigation (p. 216) - *Forensic Sciences* (15 credits)
- Graduate certificate in geographical information systems (p. 223) - *Geography* (12 credits)
- Graduate certificate in Islamic studies (p. 361) - *Religion* (18 credits)
- Graduate certificate in LGBT health policy and practice (p. 336) - *Professional Psychology* (12 credits)

- Graduate certificate in mathematics (p. 267) - *Mathematics* (12 credits)
- Graduate certificate in museum collections management and care (p. 279) - *Museum Studies*, online (12 credits)
- Graduate certificate in museum studies (p. 279) - *Museum Studies* (18 credits)
- Graduate certificate in nonprofit management (p. 352) - *Trachtenberg School of Public Policy and Public Administration* (12 credits)
- Graduate certificate in survey design and data analysis (p. 385) - *Statistics* (12 credits)
- Graduate certificate in women's studies (p. 400) - *Women's Studies* (12 credits)

Admission

Certificate students are not automatically admitted to a master's or doctoral program; they must submit an application for admission, meet the admission requirements, and be admitted to the degree program.

With departmental and Columbian College approval, students may concurrently register for a certificate and another Columbian College degree. If the certificate is conferred by another school, students must secure permission from both schools and apply and be admitted to both schools.

Certificate Completion

The Columbian College of Arts and Sciences requires all certificate candidates, both full-time and part-time, to complete all academic requirements within a maximum of three calendar years from admission. An approved leave of absence is not counted towards the time limit requirement. Students must apply, and be approved for an extension of time if they wish to study beyond the time limit.

To be eligible for a Graduate Certificate, students must complete all course requirements with a minimum GPA of 3.0, with no grades of *F*.

Transfer of Credit

Requests for transfer credit must be submitted in writing and approved by the department's director of graduate studies and the dean during the student's first year in the program. An official transcript of the course work must be on file before the request can be considered. Grades from transfer credit are not part of the graduate GPA.

Once enrolled in Columbian College of Arts and Sciences, students are not permitted to transfer course work taken outside the University, except under extraordinary circumstances; permission must be sought from the dean in advance.

Transfer of credit to the Certificate

All courses transferred in to a graduate certificate program must meet the following conditions:

- the course work must be from an accredited institution and must have been taken within the five years prior to matriculation;
- it must be approved by the department as part of the student's program of studies;
- it must be post-baccalaureate graduate-level course work;
- the course must have received a grade of *B* or better.

In addition, the following restrictions apply:

- at most one course from outside GW can be transferred in;
- at most two courses that have been used toward a previously completed CCAS program can be transferred in;
- no course may count toward more than one certificate.

Transfer of credit from the Certificate to degree programs

Students may transfer up to 100% of coursework (maximum of 18 credits) in a CCAS certificate program to another CCAS degree program if the curriculum for the certificate is wholly a subset of the degree, providing the conditions below are met:

- the course work must have been taken within the five years prior to matriculation;
- the course must have received a grade of *B* or better.

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
- Africana Studies (AFST) (p. 894)
- American Studies (AMST) (p. 894)
- Arabic (ARAB) (p. 909)
- Anthropology (ANTH) (p. 901)
- Art History (AH) (p. 910)
- Art Therapy (ARTH) (p. 915)
- Astronomy (ASTR) (p. 917)
- Biochemistry and Molecular Medicine (BIOC) (p. 917)
- Biological Sciences (BISC) (p. 919)
- Biomedical Sciences (BMSC) (p. 925)
- Biostatistics (BIOS) (p. 926)
- Chemistry (CHEM) (p. 927)
- Chinese (CHIN) (p. 930)
- Classical Acting (ACA) (p. 890)
- Classical Studies (CLAS) (p. 940)

- Columbian College of Arts and Sciences (CCAS) (p. 943)

- Vietnamese (VIET) (p. 1329)
- Women's Studies (WSTU) (p. 1330)
- Yiddish (YDSH) (p. 1333)

GENERAL EDUCATION CURRICULUM - PERSPECTIVE, ANALYSIS, COMMUNICATION (G- PAC)

In addition to the University General Education Requirement, undergraduate students in Columbian College must complete a further, College-specific general education curriculum—Perspective, Analysis, Communication, or G-PAC. Together with the University General Education Requirement, G-PAC engages students in active intellectual inquiry across the liberal arts. Students achieve a set of learning outcomes that enhance their analytical skills, develop their communication competencies, and invite them to participate as responsible citizens who are attentive to issues of culture, diversity, and privilege.

Coursework for the University General Education Requirement is distributed as follows:

- Writing—one approved course in university writing and two writing-in-the-disciplines (WID) courses;
- Humanities—one approved course in the humanities that involves critical thinking skills;
- Mathematics or Statistics—one approved course in either mathematics or statistics;
- Natural or Physical Science—one approved laboratory course that employs the process of scientific inquiry; and,

- Social Sciences—two approved courses in the social sciences

Coursework for the Columbian College general education curriculum is distributed as follows:

- Arts—one approved course in the arts that involves the study or creation of artwork based on an understanding or interpretation of artistic traditions or knowledge of art in a contemporary context;
- Global or Cross-Cultural Perspective—one approved course that analyzes the ways in which institutions, practices, and problems transcend national and regional boundaries;
- Humanities—one approved course in the humanities that involves critical thinking skills (in addition to the one course in this category required by the University General Education Requirement);
- Local or Civic Engagement—one approved course that develops the values, ethics, disciplines, and commitment to pursue responsible public action;
- Natural or Physical Science—one approved laboratory course that employs the process of scientific inquiry (in addition to the one course in this category required by the University General Education Requirement; and,
- Oral Communication—one course in oral communication.

Certain courses are approved to fulfill the requirement in more than one of these categories.

Courses taken in fulfillment of G-PAC requirements may also be counted toward majors or minors. Transfer courses taken prior to, but not after, admission to George Washington University may count toward the University General Education Requirement and G-PAC, if those transfer courses are equivalent to GW courses that have been approved by the University and the College.

University General Education and G-PAC Courses

- Arts (p. 76)
- Global or Cross-Cultural (p. 77)
- Humanities (p. 79)
- Local/Civic Engagement (p. 80)
- Mathematics or Statistics (p. 82)
- Natural or physical laboratory sciences (p. 82)
- Oral Communication (p. 83)
- Social Sciences (p. 84)
- Writing (p. 85)

AFRICANA STUDIES

The Africana Studies Program promotes an interdepartmental, interdisciplinary examination of the diverse histories, cultures, politics, and people of the African diaspora. Regional coverage includes the United States, Africa, the Caribbean, Latin America, Europe, and the Middle East. Students are introduced to methodology from core areas of the humanities and social sciences to develop skills in comparative, cross-cultural analysis and research. A student's course of study might range from Caribbean cultures, the literature of Black America, the historical evolution of African independence movements, or the sociology of power and equality in the United States, to an anthropological approach to the transatlantic slave trade.

UNDERGRADUATE

Bachelor's program

- Bachelor of Arts with a major in Africana studies (p. 85)

Minor

- Minor in Africana studies (p. 87)

FACULTY

Committee on Africana studies J. James (*Director*), N. Blyden, H.G. Carrillo, S. Lubkemann, J.A. Miller, G. Squires, G. Wald, A. Zimmerman

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

AFST 1001. Introduction to Africana Studies. 3 Credits.

An interdisciplinary introduction to the study of people of Africa and the African diaspora in historical context. Links in the cultural, political, and intellectual experiences of people of African descent in the Americas, Caribbean, Europe, and Africa.

AFST 3001. Research in Africana Studies. 3 Credits.

BACHELOR OF ARTS WITH A MAJOR IN AFRICANA STUDIES

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Required for the major—39 credits:

AFST 1001	Introduction to Africana Studies (taken within three semesters of declaring the major)
-----------	--

African American studies:

HIST 3360	African-American History to 1865
-----------	----------------------------------

SOC 2179	Race and Minority Relations
----------	-----------------------------

ENGL 3570	19th-Century Black Literature
-----------	-------------------------------

or ENGL 3950	Cultural Theory and Black Studies
--------------	-----------------------------------

Another course from the following designated courses: *

AMST 2440	The American City
-----------	-------------------

ENGL 3940	Topics in African American Literary Studies

FREN 3560	Topics in 20th-Century Francophone Literature and Cinema
GEOG 3154	Geography of the Middle East and North Africa
GEOG 3164	The Geography of Africa
Two courses in Latin American, Latino, and Caribbean studies:	
HIST 3710	History of Latin America I
Another course from the following list of designated courses *	
ENGL 3920	U.S. Latina/o Literature and Culture
ENGL 3930	Topics in U.S. Latina/o Literature and Culture
FREN 3300	Topics in French and Francophone Literatures and Cultures in Translation
FREN 3560	Topics in 20th-Century Francophone Literature and Cinema
GEOG 3161	Geography of Latin America
IAFF 2090	Latin America: Problems and Promise
HIST 3711	History of Latin America II
SPAN 3600	Special Topics
An upper-division course in gender studies from the following list of designated courses (this course may also count toward one of the above categories) *	
ANTH 2501	The Anthropology of Gender: Cross-Cultural Perspectives
HIST 3530	Women in Africa
HIST 3362	Black Women in U.S. History
PHIL 2125	Philosophy of Race and Gender
REL 3481	Women in Islam
One additional course from above or from the following:	
AMST 2020	Washington, D.C.: History, Culture, and Politics
AMST 2410	20th-Century U.S. Immigration
ENGL 1610	Introduction to Black American Literature
ENGL 1611	Introduction to Black American Literature

HIST 2803	The Ancient Near East and Egypt to 322 B.C.
REL 3475	Islamic Religion and Art
REL 3414	Islamic Philosophy and Theology
GEOG 2133	People, Land, and Food
GEOG 2141	Cities in the Developing World

MINOR IN AFRICANA STUDIES

REQUIREMENTS

Required: 21 credits

AFST 1001	Introduction to Africana Studies
-----------	----------------------------------

The remaining courses chosen in consultation with the director of Africana studies

AMERICAN STUDIES

An innovative department with 15 core faculty and 12 affiliated faculty members, American Studies explores the culture and politics of the United States, and the role of the United States in the world. The department is committed to analytical perspectives that integrate a range of disciplinary approaches, including history, literary/cultural studies, political and cultural theory, political economy, material culture studies, performance studies, and ethnography. Faculty and students analyze questions of race, gender, sexuality, and other forms of power in American life; transnational flows of culture, ideas and religious beliefs; the development and transformation of public cultures and spaces; and the ways that policy interacts with each of these areas of inquiry. The faculty is committed to bringing that scholarship to the public at large. At both the graduate and undergraduate levels, students are prepared for careers in academic and popular education, media, journalism, cultural resource management, museums, and preservation, as well as for further education in law, medicine, academia, and a wide range of disciplines.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in American studies (p. 92)
- Combined program (p. 92)

Minor

- Minor in American studies (p. 93)

GRADUATE

Master's program

- Master of Arts in the field of American studies (p. 93)

Doctoral program

- Doctor of Philosophy in the field of American studies (p. 93)

FACULTY

University professor V.N. Gamble

Professors D. Bjelajac, R.W. Longstreth, J.A. Miller, T.A. Murphy, G. Wald

Associate Professors T. Guglielmo, C. Heap, J.K. Kosek, M. McAlister (Chair), S. Osman, E. Peña

Assistant Professors E. Anker, J.N. Cohen-Cole, J. Nash, D. Orenstein, L. Schiavo, C.L. Warren

Professorial Lecturers N.E. Davis, K. Ott, J. Deutsch, R.D. Wagner

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

AMST 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the schedule of classes for more details. Restricted to CCAS freshmen only.

AMST 1050. Explorations in American Culture. 0-3 Credits.

Exploration of different aspects of American culture depending on the topic. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AMST 1070. The American Cinema. 3 Credits.

History and criticism of American films. The course enables the student to recognize and evaluate cinema techniques, to express the evaluation clearly in writing, and to understand the role of films in the context of American culture. Laboratory fee. Same as AH 1070.

AMST 1100. Politics and Film. 0-3 Credits.

How American films interpret and challenge political power in America.

AMST 1160. Race, Gender and Law. 0-3 Credits.

Significant civil rights cases, critical race theory, feminist theory, and current public policy debates on domestic violence, mass imprisonment, sexual assault, and racial profiling.

AMST 1200. The Sixties in America. 3 Credits.

A survey of American society, culture, and politics during the decade of the 1960s. Topics include the civil rights movement, the student movement, the Vietnam War, and the counterculture.

AMST 2000. Sophomore Colloquium. 3 Credits.

The Sophomore Colloquia are small seminar-style courses limited to second-year students in Columbian College.

These courses engage students deeply in a discipline, focus on a narrow issue of high interest and impact, and require independent research projects of the students. Topics vary by semester. Consult the Schedule of Classes for more details. Restricted to Permission of the instructor.

AMST 2010. Early American Cultural History. 3 Credits.

How culture was important in the creation of the United States—in its origins as a colonial outpost and its expansion across the continent; in its hierarchies and expressions of power, especially as organized by race, class, ethnicity, or gender; in the creation of democracy and the valuing of free expression; and in the development of cities and the varied uses of the countryside. Same as HIST 2010.

AMST 2011. Modern American Cultural History. 3 Credits.

The effects of culture in the shaping of the United States since 1876. The role of the mass media; effects of cultural conceptions on the physical landscape; changing ideas of race, ethnicity, gender, and sexuality; and the political meanings of cultural conflict. Transnational influences on U.S. culture and effects of U.S. culture abroad. Same as HIST 2011.

AMST 2020. Washington, D.C.: History, Culture, and Politics. 0-3 Credits.

Introduction to interdisciplinary methods of studying the contemporary city. Major problems of metropolitan life, past and present, analyzed by faculty and community leaders. Emphasis on experiential team projects. Same as HIST 2020.

AMST 2020W. Washington, D.C.: History, Culture, and Politics. 0-3 Credits.

Introduction to interdisciplinary methods of studying the contemporary city. Major problems of metropolitan life, past and present, analyzed by faculty and community leaders. Emphasis on experiential team projects. Same as HIST 2020.

AMST 2071. Introduction to the Arts in America. 3 Credits.

A survey of American art from the period of colonial exploration and settlement to the postmodern present. Political and social meanings of painting, sculpture, architecture, prints, and photographs. The relationship of art to religion and nationalism; issues of class, race, and gender. Same as AH 2071.

AMST 2120W. Freedom in American Thought and Popular Culture. 0-3 Credits.

America was founded on the premise of providing freedom to its people. But what, exactly, is freedom? The question has been debated in America since its founding and continues today; this course examines varied answers provided by American political thought and popular culture. Same as PSC 2120.

AMST 2125. Varieties of Feminist Theory. 3 Credits.

Classical and contemporary texts on feminist explanations of women's status. Relationships within the sex/gender system and arrangements based on class and race. Evaluation, through the lens of feminist theory, of several academic disciplines in the sciences, social sciences, and humanities. Same as WSTU 2125. Prerequisite: WSTU 1020 or WSTU 2120 or permission of instructor.

AMST 2144. Explorations in Historical Geography. 3 Credits.

Examination of selected themes in the cultural geography of the United States over the course of its history, in relation to an overview of the historical geography of the country. Same as GEOG 2144.

AMST 2210. The African American Experience. 3 Credits.

This course will provide a survey of the historical, political, and cultural dimensions of the African American experience in the U.S. The course will be organized chronologically and thematically and will cover topics such as American slavery, medical experimentation, Hurricane Katrina, aesthetics, hip-hop, and Afro-futurism.

AMST 2320. U.S. Media and Cultural History. 3 Credits.

History and analysis of 20th-century U.S. media and culture, including the rise of consumer culture, film, and television. Racial, gendered, and national identities in the context of modernism, mass culture, and globalization. Same as HIST 2320.

AMST 2350. U.S. Religion and Politics. 3 Credits.

How religion and politics have influenced each other in the United States and how Americans have understood those influences. Religious violence; conflicts between faith and science; religious factors in racial and gender politics; and the separation of church and state. Same as HIST 2350.

AMST 2380. Sexuality in US History. 3 Credits.

Examination of the changing social organization and meaning of sexual practices and desires in American culture, with particular attention to the relationship between sexuality and gendered racial and class identities and politics. Same as HIST 2380/ WSTU 2380.

AMST 2410. 20th-Century U.S. Immigration. 3 Credits.

Survey of immigration policy and immigrants' lives. How immigrants have changed the United States and how the United States has changed immigrants. Same as HIST 2410.

AMST 2440. The American City. 3 Credits.

An interdisciplinary introduction to the ethnic, cultural, political, and architectural landscape of the American city. Urban theory, race and ethnicity, urban history, planning and architecture, city politics, and cultural representations of the city. Same as HIST 2440.

AMST 2490. Themes in U.S. Cultural History. 3 Credits.

Topical examination of the ideas, values, and modes of expression that have made American life distinctive, as revealed through a cross-cultural or global perspective. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Same as HIST 2490.

AMST 2490W. Themes in U.S. Cultural History. 3 Credits.

Topical examination of the ideas, values, and modes of expression that have made American life distinctive, as revealed through a cross-cultural or global perspective. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs. (Same as HIST 2490W).

AMST 2495. Special Topics in African American History. 3 Credits.

Concentration on specific issues central to the African American experience. Consult the Schedule of Classes for issues to be addressed.

AMST 2520. American Architecture I. 3 Credits.

Stylistic properties, form and type characteristics, technological developments, and urbanistic patterns are introduced as a means of interpretation of historic meaning. Buildings are analyzed both as artifacts and as signifiers of social, cultural, and economic tendencies. 1600-1860. Same as AH 2154.

AMST 2521. American Architecture II. 3 Credits.

Continuation of AMST 2520. Stylistic properties, form and type characteristics, technological developments, and urbanistic patterns are introduced as a means of interpretation of historic meaning. Buildings are analyzed both as artifacts and as signifiers of social, cultural, and economic tendencies. 1860-present. Same as AH 2155.

AMST 2533. Material Culture in America. 3 Credits.

Review and analysis of the cultural messages embedded in our material surroundings. Consideration of a range of humanly created artifacts, ranging from specific objects to vast landscapes. Same as ANTH 2533.

AMST 2710. The United States in Global Context, 1898-Present. 0-3 Credits.

How the 20th- and 21st-century U.S. has been engaged globally, both politically and culturally, with attention to global culture, transnational ideas and social movements, foreign policy, and economic transformations. Same as HIST 2710.

AMST 2730. World War II in History and Memory. 0-3 Credits.

Examination of Americans' histories and memories of World War II. Same as HIST 2730.

AMST 2730W. World War II in History and Memory. 0-3 Credits.

Examination of Americans' histories and memories of World War II. Same as HIST 2730.

AMST 2750W. Latinos in the United States. 3 Credits.

Exploration of the term Latino and its impact on discussions of race, identity, and citizenship expectations throughout U.S. history. How geographic, linguistic, aesthetic, political, and economic factors construct Latino identity and influence policymaking and international relations. (Same as ANTH 2750W).

AMST 3151. American Art in the Age of Revolution. 3 Credits.

Same as AH 3151.

AMST 3324. US Urban History. 3 Credits.

History of American urban life and culture from the colonial era to the present, focusing on transitions from pre-industrial to industrial and post-industrial forms. The social and spatial configuration of U.S. cities, and the urban politics of race, class, and gender. Same as HIST 3324.

AMST 3351. U.S. Social History. 3 Credits.

Survey of American society and social change from the Civil War to the present. Gender, sexuality, race, ethnicity, and class perspectives. (Same as HIST 3351).

AMST 3352. Women in the United States to 1865. 3 Credits.

Survey of women's experience in U.S. history, the way gender has organized relations of power, and the impact of race, region, class, and ethnicity on women and on gender roles. (Same as HIST 3352, WSTU 3352).

AMST 3352W. Women in the United States to 1865. 3 Credits.

Survey of women's experience in U.S. history, the way gender has organized relations of power, and the impact of race, region, class, and ethnicity on women and on gender roles. (Same as HIST 3352W, WSTU 3352W).

AMST 3353. Women in the United States II. 3 Credits.

Continuation of AMST 3352. Survey of women's experience in U.S. history, the way gender has organized relations of power, and the impact of race, region, class, and ethnicity on women and on gender roles. Same as HIST 3353/ WSTU 3353.

AMST 3360. African American History to 1865. 3 Credits.

Major themes and concepts emerging from the early history of the African presence in the Americas and black experiences in the new nation of the United States. Focus on the emergence and evolution of the concept of race, the ways race evolved in concert with Atlantic slavery, and how race intersected with gender, economics, religion, and nationality. (Same as HIST 3360).

AMST 3361. African American History II. 3 Credits.

Continuation of AMST 3360. Survey of the African American experience, emphasizing the contributions of black Americans to and their impact upon American history. Same as HIST 3361.

AMST 3362. African American Women's History. 3 Credits.

Addresses the history of African American women's labor, cultural expression, institution-building, activism and strategies to combat oppression from the antebellum period through the late 20th century. Investigates the intersection of race, gender, and class as it has shaped U.S. society, racism, the black freedom movement and African American women's experiences. (Same as HIST 3362, WSTU 3362).

AMST 3362W. Black Women in U.S. History. 3 Credits.

Black women from the Middle Passage to contemporary times. Same as HIST 3362/WSTU 3362.

AMST 3367. The American Jewish Experience. 3 Credits.

The study of the Jewish minority in America from colonial times to the present. Emphasis on the interaction between a powerful majority culture and that of protean minority people. (Same as HIST 3367).

AMST 3810. Planning Cities. 3 Credits.

An examination of historical and contemporary trends and dynamics in urban planning in the United States and abroad. Same as GEOG 3810. Prerequisite: GEOG 1001.

AMST 3811. Historical Archaeology. 3 Credits.

Survey of the basic data and methods of research in the material culture of recent history. Same as ANTH 3811.

AMST 3835. Historical Archaeology Field Program. 3 Credits.

Practical experience with a variety of excavation and laboratory techniques in historical archaeology; specific site and topics announced in the Schedule of Classes. Same as ANTH 3835.

AMST 3900. Critiquing Culture. 3 Credits.

Modes of analysis, including ethnography and other cultural studies methods, applied to examination of the interaction of cultural texts and practices with structures of power. Theories and themes central to American studies; scholarly debate about mass culture, ideology, visibility, discourse, and affect. For departmental majors; minors admitted with permission of instructor.

AMST 3901. Examining America. 3 Credits.

Modes of power and forms of identification within and across U.S. national borders. Social constructions of the nation; forms of diversity and identity, such as race, gender, and sexuality; and the transnational flow of people, ideas, culture, and religion. Restricted to American Studies majors.

AMST 3950. Special Topics. 3 Credits.

May be repeated for credit provided the topic differs. Topics announced in the Schedule of Classes.

AMST 3950W. Special Topics. 3 Credits.

May be repeated for credit provided the topic differs. Topic announced in the Schedule of Classes.

AMST 4400. Independent Study. 1-3 Credits.

Open to a limited number of American studies majors as directed research or as an internship with a Washington museum or historical society. Approval of advisor required.

AMST 4450. Internship. 1-3 Credits.

Open to a limited number of American studies majors pursuing an internship directly related to the study of American culture. Students must make the case for a scholarly project that emerges from the internship and must write a significant final paper. Approval of a supervising faculty member required for registration. P/NP grading only.

AMST 4500. Proseminar in American Studies. 3 Credits.

For American studies majors. Directed research and writing on special topics. Prerequisite: at least two of the required courses for the major (AMST 2010, AMST 2011, AMST 3900, AMST 3901). May be repeated for credit provided the topic differs.

AMST 4500W. Proseminar in American Studies. 3 Credits.

For American studies majors. Directed research and writing on special topics. Prerequisite: at least two of the required courses for the major (AMST 2010, AMST 2011, AMST 3900, AMST 3901). May be repeated for credit provided the topic differs.

AMST 4701W. Epidemics in American History. 3 Credits.

The history of epidemics in the United States from the late nineteenth to the early twentieth century. The development of medical and public health responses to epidemics, and their social, political, cultural, and economic impacts. Sources include primary documents, historical accounts, memoirs, fiction, and films.

AMST 4702W. Race, Medicine, and Public Health. 3 Credits.

The experiences of African Americans as patients and health care providers; the history of the relationship between race, American medicine, and public health. Emphasis on the importance of understanding the historical roots of contemporary policy dilemmas such as racial and ethnic disparities in health and health care.

AMST 6100. Scope and Methods in American Studies. 3 Credits.

Consideration of American studies as an area for research and teaching; introduction to bibliography. Required of candidates for the degree of Master of Arts in the field of American studies.

AMST 6110. Cultural Theory and American Studies. 3 Credits.

Major issues in critical and cultural theory as they relate to American culture. Various interpretive approaches including discourse analysis, cultural studies, new historicism, anthropological theory, etc. Prerequisite: AMST 6100 or permission of instructor.

AMST 6120. Theories and Practices in the Study of Media. 3 Credits.

Examination of theories and methods in the study of media and popular culture; case studies explore specific issues related to cultural products such as film, television, music, and the Internet.

AMST 6190. Topics in American Studies. 1-4 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

AMST 6195. Research Seminar in American Studies. 3 Credits.

May be repeated for credit provided the topic differs.

AMST 6210. The United States in a Global Context. 3 Credits.

Analysis of the cultural constructions of the nation and international power, comparing the context of the 18th and 19th century, European colonialism, and U.S. expansion in the 20th century. The role of literature and mass media in furthering the logic of globalization. Readings are both theoretical and historical.

AMST 6220. Theory and Emotions. 3 Credits.

Interdisciplinary exploration of politics of emotion, with an emphasis on the emotions that attach to race, gender, and sexuality.

AMST 6240. Borders and Boundaries. 3 Credits.

Exploration of borders (the literal edge or limit of a territory) and boundaries (intra-societal differences). Readings from cultural anthropology, political science, and social history examine classic tensions between state formation and nation building. The U.S.-Mexico border and other border zones across the globe are used to assess and challenge what is local and particular about border space.

AMST 6410. Readings in American Cultural History. 3 Credits.

Studies in the cultural history of the United States.

AMST 6420. Religion & American Culture. 3 Credits.

Interdisciplinary analysis of religious beliefs, practices, and representations in the United States, as well as intersections of the religious and the secular. Relationships of religion to race, gender, capitalism, science, mass media, and material culture. Same as HIST 6420.

AMST 6430. Gender, Sexuality, and American Culture I. 3 Credits.

The changing social organization, cultural representation, and meaning of gender and sexuality in the United States, with emphasis on their relationship to race, class, region, nationality, empire, and globalization. Pre-colonial to 1877. (Same as HIST 6430, WSTU 6430).

AMST 6431. Gender, Sexuality, and American Culture II. 3 Credits.

Continuation of AMST 6430. The changing social organization, cultural representation, and meaning of gender and sexuality in the United States, with emphasis on their relationship to race, class, region, nationality, empire, and globalization. 1877 to present. Same as HIST 6431/ WSTU 6431.

AMST 6435. Readings on Women in American History. 3 Credits.

Important works in American women's history; evolution of the field in historiographical context. Same as HIST 6435/ WSTU 6435.

AMST 6450. Race in America. 3 Credits.

Interdisciplinary analysis of the history of race and its changing political, social, and cultural meanings in the United States. Transnational racial formations, struggles for and against civil rights, multiracialism, and interracialism. Same as HIST 6450.

AMST 6455. American Social Movements. 3 Credits.

The history of social movements in the United States, with emphasis on civil rights, feminism, conservatism, and labor in local, national, and transnational contexts; the historical rise and fall of these movements and their larger impact on American life. Same as HIST 6455.

AMST 6460. Popular Music Studies. 3 Credits.

Readings in popular music studies; varying methodologies for American studies work on sound and popular music; cultural histories of popular music; American music transnationally. Restricted to Registration restricted to graduate students.

AMST 6470. Cityscapes. 3 Credits.

Interdisciplinary examination of the American city, including urban theory, history, planning, architecture, urban politics, and cultural representations of the city. Same as HIST 6470.

AMST 6475. US Urban History. 3 Credits.

History of American urban life and culture from the Colonial era to the present, focusing on the transitions from pre-industrial to industrial and post-industrial forms, the social and spatial configuration of U.S. cities, and the urban politics of race, class, and gender. Same as HIST 6475.

AMST 6480. Theory and Practice of Public History. 3 Credits.

Theoretical and practical dimensions of public history, as illustrated by recent controversies surrounding public exhibitions and debates on revisionist history as well as more traditional means of presenting the past in public forums. Same as HIST 6480.

AMST 6495. Historic Preservation: Principles and Methods. 3 Credits.

The scope and purpose of the preservation movement in the United States, with focus on developments since the 1960s. Preservation theories, attitudes toward the past and toward design, the intent and impact of legislation, approaches to documentation, the concept of significance, and preservation as an instrument of change. Same as HIST 6495.

AMST 6496. Historic Preservation: Principles and Methods. 3 Credits.

Continuation of AMST 6495. The scope and purpose of the preservation movement in the United States, with focus on developments since the 1960s. Preservation theories, attitudes toward the past and toward design, the intent and impact of legislation, approaches to documentation, the concept of significance, and preservation as an instrument of change. Same as HIST 6496.

AMST 6520. Economics of Preservation. 3 Credits.

Analysis of economic techniques and benefits used to encourage the retention and reuse of historic buildings and districts in the United States. Emphasis on revitalization of older commercial centers and the Mainstreet program. Prerequisite: Permission of instructor.

AMST 6525. The Politics of Historic Preservation. 3 Credits.

Overview of the political issues, forces, events, and players that have shaped contemporary preservation practice, with an emphasis on public policy issues that have not been resolved and continue to confront preservation objectives. Prerequisite: Permission of instructor.

AMST 6530. Field Methods in Architectural Documentation. 3 Credits.

In-depth thematic examination of cultural landscape, focusing on field techniques for recording, analysis, and interpretation of historic properties. Work at field sites is supplemented by lectures, discussion, and readings.

AMST 6550. Seminar in American Architecture. 3 Credits.

Advanced research problems addressing artistic, cultural, social, technical, and urbanistic aspects of American architecture in the 19th and 20th centuries. Topics vary. Prerequisite: AMST 2520 or AMST 2521, or permission of instructor.

AMST 6560. Vernacular Architecture. 3 Credits.**AMST 6709. Interpretation in the Historic House Museum. 3 Credits.**

Seminar integrating advanced practices of museum education with current scholarship in architectural history, material culture, and social history. Extensive use of Washington museum resources. Admission by permission of instructor. Same as EDUC 6709.

AMST 6710. American Material Culture. 3 Credits.

Opportunities for research and publication based on historical objects in the collections of the Smithsonian Institution.

AMST 6720. American Decorative Arts I. 3 Credits.

Recognition and evaluation of domestic artifacts from the 17th, 18th, and 19th centuries.

AMST 6721. American Decorative Arts II. 3 Credits.

Continuation of AMST 6720. Recognition and evaluation of domestic artifacts from the 17th, 18th, and 19th centuries.

AMST 6730. Studies in American Art and History. 3 Credits.

Selected problems and themes in American cultural history involving the use of artistic materials in different media; emphasis on methodology and analytic techniques. May be repeated for credit. Same as AH 6255.

AMST 6835. Historical Archaeology Field Program. 3 Credits.

Practical experience with a variety of excavation and laboratory techniques in historical archaeology; specific site and topics announced in the Schedule of Classes. Same as ANTH 6835.

AMST 6930. Independent Study. 3 Credits.

Limited to master's and doctoral candidates. Written permission of instructor required.

AMST 6998. Thesis Research. 3 Credits.**AMST 6999. Thesis Research. 3 Credits.****AMST 8998. Advanced Reading and Research. 3-9 Credits.**

Limited to students preparing for the Doctor of Philosophy general examination. May be repeated for credit.

AMST 8999. Dissertation Research. 3-12 Credits.

Limited to Doctor of Philosophy candidates. May be repeated for credit.

BACHELOR OF ARTS WITH A MAJOR IN AMERICAN STUDIES

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Required courses in related areas

Two semesters of foreign language or placement into the third semester of a foreign language by examination

Requirements for the major

AMST 2010	Early American Cultural History
AMST 2011	Modern American Cultural History
AMST 3900	Critiquing Culture
AMST 3901	Examining America
AMST 4500	Proseminar in American Studies

Five additional AMST courses at the 2000-3000 level. Of these five courses, no more than two may be special topics (AMST 3950) courses

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors in American Studies, a major must receive a grade of A on the senior paper written for AMST 4500 Proseminar in American Studies.

COMBINED PROGRAM

REQUIREMENTS

The Department of American Studies offers a combined Bachelor of Arts/Master of Arts program. The program allows students to take a specified number of graduate credits as part

of their undergraduate degree, thereby decreasing the number of credits normally required for the master's degree.

Students interested in the combined B.A./M.A. degree program should consult the department's master of arts advisor by the middle of their junior year. For more information visit the program website (<http://americanstudies.columbian.gwu.edu/combined-bama-program>).

MINOR IN AMERICAN STUDIES REQUIREMENTS

Required: 18 credits

AMST 2010	Early American Cultural History
AMST 2011	Modern American Cultural History
Four additional AMST courses at the 2000-3000 level	

MASTER OF ARTS IN THE FIELD OF AMERICAN STUDIES REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

The program requires 30 credits including:

AMST 6100	Scope and Methods in American Studies
At least two research seminars: AMST 6195 or other approved research course	
At least 21 additional credits of courses pertaining to the study of American culture. These may include graduate courses in anthropology, English, fine arts and art history, geography, history, media and public affairs, and political science; with departmental approval.	
An optional thesis may be undertaken for 6 credits as part of these 21 credits	

Concentration in historic preservation

Course work in this 36-credit degree program focuses on interpreting issues in historic preservation through a humanistic framework.

AMST 6100	Scope and Methods in American Studies
-----------	---------------------------------------

At least one designated research seminar	
At least 6 additional credits of general American studies courses	
At least 18 credits of historic preservation courses, including:	
AMST 6495	Historic Preservation: Principles and Methods
AMST 6496	Historic Preservation: Principles and Methods
With departmental approval, students may undertake an optional thesis for 6 credits	
A comprehensive examination in historic preservation is required	

Concentration in museums and material culture

Course work in this 30-credit degree program, offered in association with the Smithsonian Institution, emphasizes the use of physical objects and spaces in historical research.

AMST 6100	Scope and Methods in American Studies
AMST 6710	American Material Culture
At least two designated research seminars	
At least 18 additional credits of courses pertaining to the study of American culture, museum studies, and museum education	

DOCTOR OF PHILOSOPHY IN THE FIELD OF AMERICAN STUDIES REQUIREMENTS

This program combines work in the humanities and/or social sciences as preparation for careers in a range of institutions, including universities, museums, archives, libraries, preservation offices, and related public and private enterprises. Applicants are required to have an adequate background in the humanities and/or social sciences as they apply to the understanding of American studies.

Specific admission requirements are shown on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

The requirements for the Doctor of Philosophy program (p. 71).

All students must take:

AMST 6100	Scope and Methods in American Studies
-----------	---------------------------------------

At least two designated research seminars

At least one theory course approved by the advisor

Candidates must pass a General Examination in three areas, to be taken over the course of one month, by the end of the third year from matriculation. The three fields are elected with approval of the advisory committee and should constitute a coherent, interdisciplinary program of study; one field may be devoted to the comparative study of a non-U.S. culture.

ANATOMY AND REGENERATIVE BIOLOGY

The Department of Anatomy and Regenerative Biology offers two pre-medicine academic enhancer programs for candidates interested in applying to medical schools, physician assistant programs, or biomedical sciences doctoral programs: the Graduate Certificate in Anatomical and Translational Sciences (GCATS) and Master of Science in the field of anatomical and translational sciences (M-ATS), a pre-med special master's program. Both programs are designed to enhance a graduate's competitiveness when applying to medical school or physician assistant programs, or to transition to an advanced graduate degree in the biomedical sciences. Applicants select a program based on their level of readiness for admission to a health professional school.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Consult the (<http://gsehd.gwu.edu/programs/museum-education>)Department of Anatomy and Regenerative Biology website (<http://smhs.gwu.edu/anatomy>) for additional program information.

GRADUATE

Master's program

- Master of Science in the field of anatomical and translational sciences (p. 96)

CERTIFICATE

Certificate program

- Graduate certificate in anatomical and translational sciences (p. 97)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ANAT 2130. Human Embryology. 3 Credits.

Development of the basic organ systems; molecular control of development, congenital birth defects, and assisted reproductive technologies.

ANAT 2150. Human Microscopic Anatomy. 3 Credits.

Normal histological structure of cells, tissues, and organs. Structural-functional correlates; the relationship between histological structure-function and the etiology of disease states.

ANAT 2160. Human Functional Neuroanatomy. 3 Credits.

The central and peripheral nervous systems; diseases and injuries with impact on the normal structural-functional relationship.

ANAT 2181. Human Gross Anatomy. 3 Credits.

Structure and function of the musculoskeletal system; regional organization, structure, and function of the major organ systems; structural organization of the head and neck. Same as BISC 2581.

ANAT 6130. Clinically Oriented Human Embryology. 3 Credits.

The mechanisms of human embryology with clinical correlations of embryological development. Developmental control mechanisms and development of basic organ systems. Molecular control of development. Assisted reproductive technologies. Congenital birth defects. Demonstration labs and online animations for clinical correlates. Restricted to students enrolled in the Graduate Certificate in Anatomical and Translational Sciences program. Recommended background: introductory course in biology or its equivalent. Same as ANAT 2130.

ANAT 6150. Clinically Oriented Human Microscopic Anatomy. 3 Credits.

The normal histological structure of cells, tissues, and organs of the human body with emphasis on clinical relevance. Because there is an inseparable relationship between structure and function, emphasis is placed on structural/functional correlates at both the light and electron microscopic levels. Descriptions of alterations in normal histology through disease or injury provide an understanding of the etiology of various disease states. Integration of histological concepts with clinical correlates. Prerequisites: BISC 1111 and BISC 2202. Restricted to students in either the Graduate Certificate in Anatomical and Translational Sciences (GCATS) or Special Master's in Anatomical and Translational Sciences (M-ATS) program.

ANAT 6160. Clinically Oriented Human Functional Neuroanatomy. 3 Credits.

Structure/function relationships of the human central and peripheral nervous systems and clinical correlations of diseases or injuries whose occurrence or expression has an abnormal impact on the normal structure/function relationship. Integration of neuroanatomy concepts with contemporary clinical neuroscience. Demonstrations of human brain material in the anatomy lab. Prerequisites: Introductory Biology for Science or non-Science Majors. Restricted to students enrolled in the Graduate Certificate in Anatomical and Translational Sciences program.

ANAT 6181. Clinically Oriented Human Gross Anatomy. 3 Credits.

Structural organization of the human body and the relationship of the organization to regional and systems-related functions. Clinical implications and how disease or injury affects normal anatomical structure/function relationships. Clinical cases match the topic of each lecture. Online manual uses content from the department's NetAnatomy website. Demonstrations in the gross anatomy laboratory. Restricted to Graduate Certificate in Anatomical and Translational Sciences. Prerequisites: Introductory Biology for Science or non-Science Majors.

ANAT 6182. Fundamentals of Regenerative Biology and Systems Physiology. 4 Credits.

This course is similar to BMSC 8212 but with additional time to introduce techniques of confocal laser scanning microscopy and laser-based quantitative and functional cell analyses. Topics include genetic control mechanisms, cell signaling pathways, and tissue regeneration and repair. Introduction of concepts on the functions and regulation of organ systems complement the learning objectives of human gross anatomy and microscopic anatomy. Restricted to Graduate Certificate in Anatomical and Translational Sciences. Prerequisites: Introductory Biology for Science or non-Science Majors.

ANAT 6203. Human Developmental Anatomy. 1 Credit.

ANAT 6204. Neuroanatomy. 2 Credits.

ANAT 6210. Gross Anatomy. 6 Credits.

Required for medical students.

ANAT 6212. Neurobiology. 3 Credits.

Same as Idis 212.

ANAT 6213. Microscopic Anatomy. 4 Credits.

Required for medical students.

ANAT 6215. Anatomy for Health Sciences Students. 3 Credits.

A gross anatomy course that includes examination of prosected cadavers. Sessions on how to conduct a physical examination of a particular body region are preceded immediately by lectures on the same region.

ANAT 6216. Cellular Anatomy & Histology. 2 Credits.

ANAT 6221. Spec Topics-Stem Cell Biology. 1-3 Credits.

ANAT 6222. Spec Topics-Stem Cell Biology. 1-3 Credits.

ANAT 6223. Special Topics in Regenerative Medicine. 2 Credits.

Students attend seminars given by invited lecturers to present their research findings and breakthroughs on topics of regenerative medicine. Seminars can be sponsored by the Department of Anatomy and Regenerative Biology, the Stem Cell Interest Group Journal and Data Club, the Molecular Medicine Graduate Program (MMED 8214), and the GW Institute for Neuroscience. Restricted to Graduate Certificate in Anatomical and Translational Sciences only. Prerequisites: Introductory Biology for Science or non-Science Majors.

ANAT 6249. Intro to Anatomical Research. 1 Credit.

ANAT 6252. Human Variation. 1 Credit.

ANAT 6253. Developmental Neurobiology. 3 Credits.

ANAT 6260. Developmental Genetics. 2 Credits.

ANAT 6262. Gross Anat-Upper/Lower Extrem. 2 Credits.

ANAT 6264. Gross Anatomy of Head & Neck. 2 Credits.

ANAT 6266. Gross Anatomy-Thorax & Abdomen. 2 Credits.

ANAT 6268. Gr Anat-Pelvis/Perineum/Low Ex. 2 Credits.

ANAT 6275. Advanced Studies in Translational Sciences. 3 Credits.

Student research opportunities in laboratories conducting translational research. Application of fundamental concepts learned in didactic courses. Development of versatility with new technologies. Students spend the equivalent of three full days per week in a research laboratory during the semester. The course director must approve all laboratory assignments prior to initiating research studies in a laboratory. Restricted to students in the Graduate Certificate in Anatomical and Translational Sciences. Prerequisites: Introductory Biology for Science or non-Science Majors.

ANAT 6276. Advanced Studies in Anatomy. 1 Credit.

Detailed study of an anatomic topic.

ANAT 6277. Special Topics in Neurobiology. 1-3 Credits.

ANAT 6279. Applied Regional Anatomy. 1-5 Credits.

Regional dissection, guided readings.

ANAT 6284. Appl Surface Anat & Radiology. 5 Credits.

ANAT 6288. Surface Anatomy and Radiology. 1 Credit.

ANAT 6291. Special Projects in Anatomy. 1-12 Credits.

Independent study on any aspect of gross anatomy.

ANAT 6292. Projects in Anatomical Sciences. 2 Credits.

Various imaging techniques and approaches to visualize normal anatomy toward development and application of skills in teamwork, presentation, and discussion. Literature searches. The course is taken in conjunction with ANAT 6181. Restricted to Graduate Certificate in Anatomical and Translational Sciences. Prerequisites: ANAT 6181. Recommended background: Human clinically-oriented gross anatomy (previously or simultaneously).

ANAT 6295. Research. 1-12 Credits.

ANAT 8120. Graduate Human Gross Anatomy. 4 Credits.

An in-depth introduction to human gross anatomy with cadaveric dissection. The structural organization of the human body, including its regional and systems-related functions. The relationship between normal human anatomical variation in structure and function and how disease and/or injury affect these relationships. Prerequisites: Permission of the instructor. Recommended background: Graduate students with prior coursework in the biological sciences or anthropology.

ANAT 8501. Didactic Anatomy. 3 Credits.

Development of a didactic program to include human developmental anatomy, microscopic anatomy, gross anatomy, and/or neuroanatomy. May also include interdepartmental study.

ANAT 8800. Summer Remedial: Gross Anatomy. 6 Credits.

ANAT 8802. Summer Remedial: Human Dev Anat. 1 Credit.

MASTER OF SCIENCE IN THE FIELD OF ANATOMICAL AND TRANSLATIONAL SCIENCES

The Master of Science in the field of anatomical and translational sciences (M-ATS) is a non-thesis master's program designed to give students advanced, comprehensive knowledge in basic medical sciences. M-ATS is a 38-credit, interdisciplinary program taken over two years. M-ATS is an extension of the Graduate Certificate in anatomical and translational sciences (GCATS), which can serve as year 1 of the M-ATS program. Year 2 of the M-ATS curriculum integrates biomedical knowledge related to regenerative biology, systems physiology, pharmacology, pharmacogenomics, genomic medicine, and bioinformatics. The M-ATS program provides students with a solid background in personalized medicine and the methodological aspects of translational research and clinical investigations as well as opportunities to carry out research in translational medicine. As a result, graduates maximize their academic and career opportunities by enhancing competitiveness of applications to medical

schools, physician assistant programs, and Ph.D. programs in biomedical sciences.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://smhs.gwu.edu/anatomy/education/m-ats>) for additional information

REQUIREMENTS

The following requirements must be fulfilled: 38 credits in required courses.

Required courses:

Year 1

ANAT 6130 Clinically Oriented Human Embryology

ANAT 6150 Clinically Oriented Human Microscopic Anatomy

ANAT 6160 Clinically Oriented Human Functional Neuroanatomy

ANAT 6181 Clinically Oriented Human Gross Anatomy

ANAT 6292 Projects in Anatomical Sciences

And one or both of the following*

ANAT 6223 Special Topics in Regenerative Medicine

ANAT 6275 Advanced Studies in Translational Sciences

Year 2

ANAT 6182 Fundamentals of Regenerative Biology and Systems Physiology

BMSC 6218 Ethics for Translational Sciences

HSCI 6273 Bioinformatics for Genomics

MICR 6236 Fdmntls/Geonomics&Proteomics I

PHAR 6205 Pharmacology

PHAR 6206 Advanced Pharmacology

PHAR 6116 Pharmacogenomics and Personalized Medicine

*As part of the required curriculum, students choose one of the following options in Year 1: ANAT 6223 taken twice; or, ANAT 6275 taken twice; or, both ANAT 6223 and ANAT 6275. Students must consult the academic advisor before enrolling in either of these two courses.

GRADUATE CERTIFICATE IN ANATOMICAL AND TRANSLATIONAL SCIENCES

The Graduate Certificate in Anatomical and Translational Sciences (GCATS) program provides students in medical and translational sciences with an understanding of human gross anatomy, embryology, functional histology, neuroanatomy, modern stem cell and developmental biology, and technology for biomedical molecular imaging. GCATS offers a contemporary clinical emphasis using problem-based learning. The certificate program is designed to maximize career opportunities in the health fields, to enhance competitiveness of applications to medical school or physician assistant programs, or to transition into an advanced graduate degree program in the biomedical sciences.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://smhs.gwu.edu/anatomy/education/gcats>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.*

Required:

ANAT 6130	Clinically Oriented Human Embryology
ANAT 6150	Clinically Oriented Human Microscopic Anatomy
ANAT 6160	Clinically Oriented Human Functional Neuroanatomy
ANAT 6181	Clinically Oriented Human Gross Anatomy
ANAT 6292	Projects in Anatomical Sciences

And one or both of the following:

ANAT 6223	Special Topics in Regenerative Medicine
ANAT 6275	Advanced Studies in Translational Sciences

*As part of the required curriculum, students choose one of the following options: ANAT 6223 taken twice; or, ANAT 6275 taken twice; or, both ANAT 6223 and ANAT 6275. Students must consult the academic advisor before enrolling in either of these two courses.

ANTHROPOLOGY

The Anthropology program includes four concentrations. Biological anthropology explores human evolution, anatomy and primatology. Sociocultural anthropology examines the role culture plays in shaping human action. Linguistic anthropology considers the role of language in human thought. Archaeology examines both human origins and more recent issues of state formation and urbanization. In teaching and research, the program collaborates with the Smithsonian Institution's National Museum of Natural History, as well as departments within the university.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in anthropology (p. 105)
- Bachelor of Arts with a major in archaeology (p. 106)
- Bachelor of Science with a major in biological anthropology (p. 107)
- Combined programs (p. 109)

Minors

- Minor in anthropology (p. 109)
- Minor in archaeology (p. 109)
- Minor in biological anthropology (p. 110)
- Minor in cross-cultural communication (p. 110)
- Minor in sociocultural anthropology (p. 111)

GRADUATE

Master's program

- Master of Arts in the field of anthropology (p. 112)

Doctoral program

- Doctor of Philosophy in the field of anthropology (p. 113)

FACULTY

University Professor B. Wood

Professors A.S. Brooks, E.H. Cline, R.R. Grinker (*Chair*), H. Gusterson, J.C. Kuipers, B.D. Miller,

Associate Professors J. Blomster, R. Bobe, A.S. Dent, M. Edberg, I. Feldman, S.C. Lubkemann, B.G. Richmond, C. Sherwood

Assistant Professors A. Ahmad, D.R. Braun, S.C. McFarlin, C.M. Murray, R. Shepherd, E. Uretsky, S.E. Wagner,

Professorial Lecturers P.J. Cressey, D. Hunt, S. Johnston, J. Love, D.H. Ubelaker,

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ANTH 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the schedule of classes for more details.

ANTH 1001. Biological Anthropology. 0-4 Credits.

Survey of human evolution, genetics and physical variation, and primatology. Regular laboratory exercises. Laboratory fee.

ANTH 1002. Sociocultural Anthropology. 3 Credits.

Survey of the world's cultures, illustrating the principles of cultural behavior.

ANTH 1002W. Sociocultural Anthropology. 3 Credits.

Survey of the world's cultures, illustrating the principles of cultural behavior.

ANTH 1003. Archaeology. 0-3 Credits.

Introduction to archaeological survey and excavation techniques and laboratory methods of dating and analysis. Brief history of archaeology and survey of world prehistory. Films and laboratory exercises. (Fall and spring).

ANTH 1004. Language in Culture and Society. 3 Credits.

Comparison and analysis of how cultures use language to communicate. The relationship of language to issues of human nature, gender, race, class, artistic expression, and power. Laboratory fee.

ANTH 1005. The Biological Bases of Human Behavior. 4 Credits.

Human behavior from an evolutionary perspective, including issues such as communication, intelligence, reproductive behavior, parental behavior, aggression, and cooperation, and drawing on an understanding of the behavior and biology of the nonhuman primates. Laboratory fee.

ANTH 2008. Foundations of Anthropological Thought. 3 Credits.

The development of anthropological thought in historical context. Exploration of selected basic concepts and theories of contemporary anthropology. To be taken in the junior or senior year. Prerequisite: ANTH 1002.

ANTH 2008W. Foundations of Anthropology. 3 Credits.

The development of anthropological thought in historical context. Exploration of selected basic concepts and theories of contemporary anthropology. To be taken in the junior or senior year. Prerequisites: ANTH 1002 or ANTH 1002W.

ANTH 2406. Human Evolutionary Genetics. 3 Credits.

Introduction to the patterns and processes of human genetic variation. Topics include human origins and migration; molecular adaptations to environment, lifestyle, and disease; ancient and forensic DNA analyses; and genealogical reconstructions.

ANTH 2501. The Anthropology of Gender: Cross-Cultural Perspectives. 3 Credits.

Anthropological representations of gender relations in "other" cultures have provided important case material for feminist theorizing of sex differences and gender roles and statuses. How a cross-cultural approach can inform our understanding of gender. Same as WSTU 2121.

ANTH 2502. Anthropology of Science and Technology: 21st-Century Brave New Worlds. 3 Credits.

The relationship between science and society, with consideration of how scientific knowledge and emergent technologies affect our lives, identities, social relations, and material conditions. The sociopolitical context in which scientific knowledge is produced and the ethnographic study of biotechnology, especially genetics and its various applications.

ANTH 2505. Introduction to Ethnomusicology. 3 Credits.

Models of understanding music as a cultural endeavor. Application and critique of models in the design and execution of student independent field research. Same as MUS 2105. Prerequisite: MUS 1101 or ANTH 1002 or ANTH 1004 or permission of instructor.

ANTH 2506. Religion, Myth, and Magic. 3 Credits.

Theories of religion developed by anthropologists; survey of world religions with emphasis on non-Western societies; religious process and change. (Same as REL 3506).

ANTH 2533. Material Culture in America. 3 Credits.

Review and analysis of the cultural messages embedded in our material surroundings. Consideration of a range of humanly created artifacts, ranging from specific objects to vast landscapes. Same as AMST 2533.

ANTH 2750. Latinos in the United States. 3 Credits.

Exploration of the term Latino and its impact on discussions of race, identity, and citizenship expectations throughout U.S. history. How geographic, linguistic, aesthetic, political, and economic factors construct Latino identity and influence policymaking and international relations.

ANTH 2750W. Latinos in the United States. 0-3 Credits.

Exploration of the term Latino and its impact on discussions of race, identity, and citizenship expectations throughout U.S. history. How geographic, linguistic, aesthetic, political, and economic factors construct Latino identity and influence policymaking and international relations. Same as AMST 2750.

ANTH 3401. Human Functional Anatomy. 3 Credits.

The anatomy of the human body, how it works, and how it differs from other animals, especially other primates. Principles and approaches of functional morphology and biomechanics and how function can be reconstructed from fossils, with special focus on the musculoskeletal system. No prior knowledge of anatomy is required. Laboratory fee. Prerequisite: ANTH 1001.

ANTH 3402. Human Evolutionary Anatomy. 3 Credits.

The structure and function of human anatomy, as compared to our closest relatives, the great apes. Using this comparative approach, the course investigates the fossil record of human evolution, with an emphasis on reconstructing relationships, function, behavior, and adaptation in fossil hominins. Prerequisite: ANTH 1001.

ANTH 3403. Forensic Anthropology Laboratory. 2 Credits.

Identification of human skeletal remains by body part, age, sex, race, and individual disease or trauma history; study of skeletal variation in modern and recent populations. Taught at the Smithsonian. Corequisite: Anth 3404.

ANTH 3404. Human Variation. 1 Credit.

An overview of human variation, with special emphasis on the skeleton. Includes history of physical anthropology, individual and population variations, archaeological recovery of human remains, paleodemography, growth, paleopathology, and forensic anthropology. Prerequisite: Anth 1001; corequisite for undergraduates: ANTH 3403.

ANTH 3405. Human Growth and Development. 3 Credits.

Modern human growth and development considered through an evolutionary perspective. The growth stages and life cycles of modern humans, emphasizing physiological and environmental influences and comparisons with extant non-human primates and fossil hominids. Prerequisite: ANTH 1001. Laboratory fee.

ANTH 3406. Advanced Human Osteology. 3 Credits.

Advanced techniques in determination of age, sex, ancestry, and pathological conditions using the skeleton. Taught at the Smithsonian. Prerequisite: ANTH 3403, ANTH 3404.

ANTH 3407. Conservation in a Changing World: Human and Animal Behavior. 3 Credits.

How humans and animals interact in a wide variety of settings, how human and animal welfare can be ensured, and how we can create a scientifically sound, yet socially and economically acceptable, conservation of the planet's biodiversity. Prerequisites: ANTH 1001.

ANTH 3408. The Evolution of Human Families. 3 Credits.

Human parental behavior considered from an evolutionary perspective, including parental care among mammals, concepts of parental investment, and parent-offspring conflict. Focus on parenting in the human lineage from early hominins to hunter-gatherers to the modern context. Prerequisites: ANTH 1001.

ANTH 3411. Primatology. 3 Credits.

Physical and behavioral characteristics of the various primate groups and their relationship to human physical and cultural evolution. Prerequisite: ANTH 1001.

ANTH 3412. Hominin Evolution. 3 Credits.

The fossil record of human evolution, including its context. Review of the fossil evidence that concentrates on the distinctive features of each taxon. Pleistocene remains. Laboratory fee. Prerequisite: ANTH 1001.

ANTH 3412W. Hominin Evolution. 3 Credits.

The fossil record of human evolution, including its context. Review of the fossil evidence that concentrates on the distinctive features of each taxon. Pleistocene remains. Laboratory fee. Prerequisite: ANTH 1001.

ANTH 3413. Evolution of the Human Brain. 3 Credits.

Examination of how the human brain is unique in comparison to other animals, with an emphasis on understanding our species' distinctive neurobiology in terms of the evolution of cognitive abilities such as language, social comprehension, tool making, and abstract thinking.

ANTH 3491. Topics in Biological Anthropology. 3 Credits.

Topic announced in the Schedule of Classes. Instructors will be drawn from GW faculty and Smithsonian Institution staff. May be repeated for credit if topic varies. Prerequisite: ANTH 1001.

ANTH 3501. Anthropology of Development. 3 Credits.

The impact of the world economy on nonindustrial societies. Analysis of the role of anthropology in international development programs aimed at alleviating problems in the Third World. Prerequisites: ANTH 1002 or ANTH 1002W.

ANTH 3502. Cultural Ecology. 3 Credits.

Basic principles of cultural ecology. Human interaction with the ecosystem both past and present; emphasis on the application of anthropological precepts to current environmental problems. Prerequisites: ANTH 1002 or ANTH 1002W or ANTH 1004 or ANTH 1004W or permission of instructor.

ANTH 3503. Psychological Anthropology. 3 Credits.

The cross-cultural study of the relationship between culture and personality. Topics include emotion, conceptions of the self, mental health and illness, sexuality, marriage and parenting, and cognition. Psychobiological, cultural, ecological, and psychoanalytical theories are examined. Prerequisite: ANTH 1002 or permission of instructor.

ANTH 3504. Illness, Healing, and Culture. 3 Credits.

Introduction to medical anthropology. What the record of human evolution and prehistory tells about human health; the epidemiology of health and illness; how different cultures define disease; understanding illness and healing systems cross-culturally; and the role of medical anthropology in health care and international development. Prerequisite: ANTH 1002 or permission of instructor.

ANTH 3506. Politics, Ethnicity, and Nationalism. 3 Credits.

Comparative analysis of political systems; political processes, such as factionalism, styles of leadership, political ritual. Prerequisite: ANTH 1002 or permission of instructor.

ANTH 3507. Kinship, Family, and Community. 3 Credits.

Cross-cultural analysis of how people form, maintain, and transform social groups and boundaries. Focus on how communities such as family, ethnic group, and nation are defined in moral terms. Prerequisite: ANTH 1002 or permission of instructor.

ANTH 3508. Art and Culture. 3 Credits.

The role of art in culture, with emphasis on small-scale societies; influences upon the artist, and beliefs and practices associated with art production. Prerequisite: ANTH 1002 or permission of instructor.

ANTH 3513. Anthropology of Human Rights. 3 Credits.

Issues of basic human rights and their violation by different cultures, states, and organizations. Genocide, ecocide, abuses on the basis of ethnicity, religion, or similar factors, and the treatment of those seeking asylum. Rights of informants and groups studied in anthropological research. Prerequisites: ANTH 1002 or ANTH 1002W.

ANTH 3513W. Anthropology of Human Rights. 3 Credits.

Issues of basic human rights and their violation by different cultures, states, and organizations. Genocide, ecocide, abuses on the basis of ethnicity, religion, or similar factors, and the treatment of those seeking asylum. Rights of informants and groups studied in anthropological research. Prerequisites: ANTH 1002 or ANTH 1002W.

ANTH 3521. Ethnographic Film. 3 Credits.

Still and motion-picture photography as an integral aspect of anthropological research. A study of recent and historic ethnographic films and an introduction to the forms and methods of making visual ethnographic records. Material fee. Prerequisites: ANTH 1002 or ANTH 1002W or permission of instructor.

ANTH 3531. Methods in Sociocultural Anthropology. 3 Credits.

Approaches to field research. Conceptual bases and biases in the delineation of problems and in the selection, analysis, and organization of data. Students design and carry out their own field projects in the Washington area. Prerequisite: ANTH 1002.

ANTH 3601. Language, Culture, and Cognition. 3 Credits.

The role of language and culture in the organization of human experience. Beginning with debates about linguistic relativity, the course explores the way language use shapes cognition and practice in a variety of cultures and social contexts. Same as LING 3601. Prerequisite: ANTH 1004. Laboratory fee.

ANTH 3602. Ethnographic Analysis of Speech. 3 Credits.

Linguistic variation and change in discourse practices; social and political correlates of linguistic interaction; recording, transcription, and analysis of verbal interaction. Prerequisites: ANTH 1004. (Same as LING 3602).

ANTH 3602W. Ethnographic Analysis of Speech. 3 Credits.

Linguistic variation and change in discourse practices; social and political correlates of linguistic interaction; recording, transcription, and analysis of verbal interaction.

ANTH 3603. Psycholinguistics. 3 Credits.

Language as species-specific property of the human mind. Psychological processes involved in the encoding and decoding of language; first and second language acquisition and bilingualism. Same as LING 3603.

ANTH 3691. Special Topics in Linguistic Anthropology. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Same as LING 3691. Prerequisite: ANTH 1004 or permission of instructor.

ANTH 3701. Native Peoples - North America. 3 Credits.

Comparative study of Indian groups representative of the different culture areas of the United States and Canada. Contemporary issues involving indigenous groups, the wider society, and the state. Prerequisite: ANTH 1002 or permission of instructor.

ANTH 3702. Anthropology of Latin America. 3 Credits.

Culture history and ways of life in a selected region of Central or South America. Regional focus to be announced in the Schedule of Classes. Prerequisites: Anth 1002 or Anth 1002W or ANTH 1004.

ANTH 3703. Cultures of the Pacific. 3 Credits.

Culture history and ways of life among native peoples of Melanesia, Micronesia, and Polynesia. Prerequisites: ANTH 1002 or 1002W or 1004 or 1004W.

ANTH 3704. Cultures of Southeast Asia. 3 Credits.

Introduction to the history, art, ecology, and politics of Southeast Asia. Comparison and interpretation of recent ethnographic case studies, archaeological evidence, and current political events in order to understand the diversity of Southeast Asian traditions. Prerequisite: ANTH 1002 or ANTH 1002W or ANTH 1004.

ANTH 3705. Anthropology of East Asia. 3 Credits.

Intensive study of the culture and history of selected peoples of East or Central Asia. Specific area to be announced in the Schedule of Classes. May be repeated for credit. Prerequisites: ANTH 1002 or ANTH 1002W or ANTH 1004 or ANTH 1004W.

ANTH 3707. Anthropology of the Middle East. 3 Credits.

Geographic environment, language, religion, and social structure of settled and nomadic peoples of the Middle East; emphasis on the Arab world. Prerequisites: ANTH 1002 or ANTH 1002W or ANTH 1004 or ANTH 1004W.

ANTH 3708. Anthropology of Africa. 3 Credits.

Comparative examination of the history, cultural development, and contemporary problems of sub-Saharan African cultures. New World African cultures are also considered. Prerequisites: ANTH 1002 or 1002W or 1004 or 1004W.

ANTH 3709. Japanese Culture Through Film. 3 Credits.

Survey of the Japanese cultural heritage presented through films. Topics include literature, philosophy, art, religion, and social history from premodern times to the modern era. Lectures and discussion in English. Same as JAPN 3162.

ANTH 3791. Topics in Regional Anthropology. 3-4 Credits.

Culture, history, and ways of life in a selected region of the world. Topics vary. Consult the Schedule of Classes for more details. Prerequisites: ANTH 1002 or ANTH 1002W or ANTH 1004.

ANTH 3801. African Roots from Australopithecus to Zimbabwe. 3 Credits.

The development and contributions of Africa from human beginnings through medieval states. Topics include human evolution, origins of art, technology, trade, and animal/plant domestication, rise of African states, early relations with Europe and Asia, antecedents of contemporary African diversity. Prerequisite: ANTH 1003 or permission of instructor.

ANTH 3801W. African Roots from Australopithecus to Zimbabwe. 3 Credits.

The development and contributions of Africa from human beginnings through medieval states. Topics include human evolution, origins of art, technology, trade, animal/plant domestication, rise of African states, early relations with Europe and Asia, antecedents of contemporary African diversity. Prerequisites: ANTH 1003.

ANTH 3802. Human Cultural Beginnings. 3 Credits.

Survey of prehistory in Europe, Africa, and Asia from the earliest hominid cultures to the beginnings of agriculture. Prerequisite: ANTH 1003.

ANTH 3802W. Human Cultural Beginnings. 3 Credits.

Survey of prehistory in Europe, Africa, and Asia from the earliest hominid cultures to the beginnings of agriculture. Prerequisite: ANTH 1003.

ANTH 3803. Old World Prehistory: First Farmers to First Cities. 3 Credits.

Archaeology of the Near East, Egypt, Europe, and other areas, from the beginnings of agriculture to the rise of Babylon. Prerequisites: ANTH 1003.

ANTH 3803W. Old World Prehistory: First Farmers to First Cities. 3 Credits.

Archaeology of the Near East, Egypt, Europe, and other areas, from the beginnings of agriculture to the rise of Babylon. Prerequisites: ANTH 1003.

ANTH 3804. Origins of the State and Urban Society. 3 Credits.

Emergence of urbanism and the state in the prehistory of various world regions. Regions covered might include India, China, Mexico, and the Pacific, among others. Prerequisites: ANTH 1003.

ANTH 3805. Archaeology of Israel and Neighboring Lands. 3 Credits.

The archaeology of Israel and adjacent areas (Syria, Jordan, Lebanon). Examination of many major sites and monuments. Significant problems and current debates. Same as AH 3106.

ANTH 3806. Art and Archaeology of the Aegean Bronze Age. 3 Credits.

Excavational and multidisciplinary aspects of classical archaeology. Minoan and Mycenaean civilizations (1700-1200 B.C.) Same as AH 3104.

ANTH 3808. Archaeology and the Celts. 3 Credits.

Historical and archaeological study of the Celtic people.

ANTH 3811. Historical Archaeology. 3 Credits.

Survey of the basic data and methods of research in the material culture of recent history. Same as AmSt 3811.

ANTH 3812. The Aztec Empire. 3 Credits.

The Aztecs (or Mexica) of Mexico created a large empire, and while frequently the focus is on warfare and human sacrifice, they produced some of the most naturalistic art and reflective poetry that have survived the Spanish Conquest. Using archaeology, art, and ethnohistoric documents, this course focuses the importance of power in Aztec society and how the normalization of violence created a form of social cohesion central to the state. Prerequisites: ANTH 1003. (Same as AH 3116).

ANTH 3813. Archaeology of North America. 3 Credits.

History of American archaeology; survey of North American culture history from human entry into the Americas during the Pleistocene period until the time of the first European contacts. Focus on peoples north of Mexico. Prerequisite: ANTH 1003.

ANTH 3814. Ancient Mexican Civilizations. 3 Credits.

Cultural history of pre-Columbian societies in Middle America; the emergence of Mesoamerican civilization from the earliest hunter-gatherers and first farmers to the Aztec Empire. Prerequisites: ANTH 1003. Same as AH 3107.

ANTH 3821. Myths and Mysteries in Archaeology. 3 Credits.

Topics ranging from King Arthur to Atlantis are used to illustrate how archaeological methods and techniques can falsify-or support-exotic beliefs about the past.

ANTH 3822. Archaeology in Film and Television. 3 Credits.

As visual media increase public awareness of archaeology, misrepresentations and distortions abound. This course examines the relationships among archaeology, the media, and popular culture. Issues considered include nationalism, descendant communities, gender, race, and colonialism.

ANTH 3823. Archaeology of Ritual and Religion. 3 Credits.

Archaeological and ethnographic examples from around the world are used to critically evaluate how archaeologists make inferences about ritual practices and the religious lives of past peoples. Issues include the origins of symbolic behavior, sacred landscapes, shamanism, ancestor veneration, and sorcery/witchcraft.

ANTH 3832. Paleoanthropological Field Program. 0-4 Credits.

Field research in paleoanthropology, including excavation methods, identification and analysis of materials, paleoecology, archaeology, and human anatomy. Conducted at selected sites in Eurasia, Africa, or Australia. Visits to comparative sites and collections in the region.

ANTH 3833. Field Research: New World. 1-6 Credits.

Survey, excavation, and/or laboratory analysis at localities in North or South America. See Schedule of Classes for details.

ANTH 3834. Field Research: Old World. 1-6 Credits.

Survey, excavation, and/or laboratory analysis at Neolithic or later localities in Eurasia, Africa, or Oceania. See Schedule of Classes for details.

ANTH 3835. Historical Archaeology Field Program. 3 Credits.

Practical experience with a variety of excavation and laboratory techniques in historical archaeology; specific site and topics announced in the Schedule of Classes. Same as AMST 3835.

ANTH 3838. Theory and Practice in Archaeology. 3 Credits.

The primary literature in archaeology theory since the 1960s. Ethics, topical issues, and archaeological practice. Prerequisite: Anth 1003.

ANTH 3838W. Theory and Practice in Archaeology. 3 Credits.

The primary literature in archaeology theory since the 1960s. Ethics, topical issues, and archaeological practice. Prerequisite: ANTH 1003.

ANTH 3839. Lab Research Methods in Archaeology. 3 Credits.

Research methods and techniques used by archaeologists. Emphasis on hands-on experience in one or more techniques. Prerequisite: Anth 1003.

ANTH 3891. Special Topics in Archaeology. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Prerequisite: ANTH 1003 or permission of instructor.

ANTH 3991. Special Topics. 0-3 Credits.

Topics announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

ANTH 3991W. Special Topics. 3 Credits.

Topics announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

ANTH 3995. Undergraduate Research. 1-12 Credits.

Individual research problems to be arranged with a member of the faculty. May be repeated for credit. Prerequisite: permission of instructor.

ANTH 4008. Seminar: Contemporary Anthropological Theory. 3 Credits.

The development of major trends in anthropological theory. How anthropologists from the four fields—sociocultural, linguistic, biological, and archaeology—have deployed and developed the ideas of theorists in their own empirical research and theorizing about specific processes. Prerequisite: ANTH 2008.

ANTH 6101. Proseminar in Biological Anthropology. 3 Credits.

Comprehensive overview of theory and practice in biological anthropology.

ANTH 6102. Proseminar in Sociocultural Anthropology. 3 Credits.

Comprehensive overview of theory and practice in sociocultural anthropology.

ANTH 6103. Proseminar in Archaeology. 3 Credits.

Survey of the most recent archaeological techniques and theoretical approaches to reconstructing and interpreting the cultures of the past.

ANTH 6104. Proseminar in Linguistic Anthropology. 3 Credits.

Contemporary anthropological studies of language in biological, social, and historical perspectives.

ANTH 6200. Museum Anthropology. 3 Credits.

How anthropological collections take shape in the past and carry meaning in the present. Critical examination of artifacts and forms of documentation. Application of material culture theory to museum records, collected objects, the changing meaning given to objects, and the context of collecting.

ANTH 6201. Methods in Museum Anthropology. 3 Credits.

How anthropological collections take shape in the past and carry meaning in the present. Research and analysis of existing collections; issues in museum anthropology.

ANTH 6202. Museums and the Public: Exhibiting Culture. 3 Credits.

Study of the issues and problems involved in “exhibiting culture,” past and present, including issues of representation, message and interpretation, audience, ownership of objects and symbols, and ways of reconstructing the past. Critical examination of museum exhibits.

ANTH 6203. Preventive Conservation Concepts. 3 Credits.

Historical development of preventive conservation in museums, conservation ethics, team approaches to conservation, interactions of various materials with agents of deterioration. Basics of materials testing, preparation of condition reports, choosing museum storage and exhibition materials, and risk assessment. Same as MSTD 6203/ AH 6286.

ANTH 6204. Preventive Conservation Techniques. 3 Credits.

Practical applications of preventive conservation of materials, monitoring environmental conditions, conducting risk assessments, evaluation of exhibit and storage areas; developing plans, policies, and procedures for collections care; grant proposal preparation for collections care initiatives. Same as MSTD 6204/ AH 6287.

ANTH 6205. Problems in Conservation. 3 Credits.

Individual conservation projects to determine composition, construction, decomposition of materials, and possible stabilization techniques. Conservation laboratory experience. Prerequisite or concurrent registration: Anth 6203/AH 6286.

ANTH 6230. Internship in Museum Anthropology. 1-6 Credits.

Supervised individual research and/or field work at the Smithsonian Institution or other area museums, arranged in consultation with the museum and the Anthropology Department. Admission by arrangement with the department chair or museum training advisor. May be repeated for credit up to a maximum of 6 credits.

ANTH 6301. The Anthropology of Development. 3 Credits.

Theoretical perspectives that distinguish the contribution of anthropology to understanding processes of change in the Third World. Focus on health, population, environment, gender, and tourism issues. The role of anthropology in planning and implementing projects and policy.

ANTH 6302. Issues in Development. 3 Credits.

Topic to be announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

ANTH 6330. Internship in Development Anthropology. 3 Credits.

Supervised participation in a selected development agency or other relevant organization. Opportunity to observe agency procedures and gain practical experience. Admission by permission of instructor or department chair.

ANTH 6331. Research Methods in Development Anthropology. 3 Credits.

Anthropologists' roles in research-related activities, such as feasibility studies, social soundness analysis, and evaluations. Innovative research techniques, such as interactive data gathering, team survey methods, and rapid rural appraisal. Admission by permission of instructor.

ANTH 6391. Anthropology and Contemporary Problems. 3 Credits.

Exploration of anthropological perspectives on a current issue, such as refugees, ethnic violence, national mythologies, and women's health in developing countries. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

ANTH 6401. Human Functional Anatomy. 3 Credits.

Growth and function of the musculoskeletal system, including the development, anatomy, and histology of bone, biomechanics of muscle and skeletal tissue, craniofacial and dental growth and morphology, and locomotion. No prior knowledge of anatomy required. Laboratory fee.

ANTH 6404. The Evolution of Primate Life Histories. 3 Credits.

Recent developments in the study of human and non-human life histories. Life history theory. Life history traits compared among primate groups in order to determine how selective pressures have shaped extant primate life history patterns. Laboratory fee.

ANTH 6405. Human Growth and Development. 3 Credits.

Modern human growth and development considered through an evolutionary perspective. The growth stages and life cycles of modern humans, emphasizing physiological and environmental influences and comparisons with extant non-human primates and fossil hominids. Laboratory fee.

ANTH 6406. Human Genetic Variation. 3 Credits.

The genetic variation in human populations as a framework for measurement and analysis of genetic diversity and evolutionary process. Consideration of the possible roles of cultural change leading to adaptive/selective events. Same as FORS 6246.

ANTH 6412. Paleoanthropology. 1-3 Credits.

Survey of current research in hominid and hominoid evolution, focusing on the integrated nature of the field. Contributions from the geological and biological sciences will be stressed, together with innovative geochemical techniques for establishing chronological sequences. Prerequisite: ANTH 3412 or BISC 2450 .

ANTH 6413. Analytical Methods in Human Evolutionary Studies. 3 Credits.

A survey of methods and approaches for data collection and analysis in human evolutionary biology research. Topics include comparative methods and basic and multivariate statistics.

ANTH 6491. Topics in Biological Anthropology. 3 Credits.

Topic announced in the Schedule of Classes. Instructors will be drawn from GW faculty and Smithsonian Institution staff. May be repeated for credit if topic varies.

ANTH 6501. Gender and Sexuality. 3 Credits.

Study of new theoretical and methodological approaches developed in the anthropology of gender. Topics include postcolonialism, sexuality, and literary representations of gender. Same as WSTU 6257.

ANTH 6505. Medical Anthropology. 3 Credits.

Concepts and theories in contemporary medical anthropology, including "critical" versus "conventional" medical anthropology, changes in approaches since the mid-twentieth century; structural and cultural construction of illness and suffering; ethnographic and epidemiological perspectives.

ANTH 6506. Topics in Medical Anthropology. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit if the topic varies.

ANTH 6507. Nationalism and Ethnicity. 3 Credits.

Major theoretical and ethnographic issues in the study of nationalism worldwide. Explores how ethnic groups emerge in colonial and contemporary plural societies and how states attempt to integrate ethnic groups into nations.

ANTH 6508. Ethics and Cultural Property. 3 Credits.

Survey of ethical issues in anthropology, focusing on cultural property and repatriation; the epistemological, ethical, and political dilemmas of excavating, collecting, and owning cultural artifacts.

ANTH 6509. Anthropology of Art, Aesthetics, and Symbolism. 3 Credits.

Anthropological approaches to aesthetic problems and theories of symbolism in the context of ethnographic materials.

ANTH 6531. Methods in Sociocultural Anthropology. 3 Credits.

Epistemology; the definition of research problems; selection of research subjects and sites; techniques of data collection (e.g., surveys, interviews); data management and organization; ethical protocols; issues of safety; grant writing and funding.

ANTH 6561. American Folklife. 3 Credits.

The materials of American folk culture, concentrating on folk architecture, crafts, and art. Major organizing themes are regionalism and the use of objects as indicators of cultural intention. Same as AMST 6561.

ANTH 6562. Folklore Theory. 3 Credits.

An intellectual history of American folklore research; analysis of particular theories and methods. Same as AMST 6562.

ANTH 6591. Topics in Sociocultural Anthropology. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit if the topic varies.

ANTH 6691. Topics in Linguistic Anthropology. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit if the topic varies.

ANTH 6702. Issues in Latin American Anthropology. 3 Credits.

Intensive study of a selected topic in the anthropology of Central and/or South America. Topic to be announced.

ANTH 6707. Issues in Middle East Anthropology. 3 Credits.

Selected topics in the anthropology of the Middle East. Topic to be announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

ANTH 6801. Paleolithic Archaeology. 3 Credits.

Current problems relating to materials from the Old World.

ANTH 6802. Problems in Eurasian and African Archaeology. 3 Credits.

Topic announced in the Schedule of Classes. Topics may include Bronze Age conflict, the Celts, etc. May be repeated for credit.

ANTH 6803. Problems in New World Archaeology. 3 Credits.

Current archaeological problems relating to the origin and development of aboriginal cultures. Specific topic to be announced in the Schedule of Classes. May be repeated for credit.

ANTH 6804. Problems in Mesoamerican Archaeology. 3 Credits.

Topics range from specific civilizations, such as the Olmec, to pan-Mesoamerican topics, such as religion and exchange. May be repeated for credit.

ANTH 6806. Technology. 3 Credits.

Cross-cultural examination of the form, function, meaning, and use of material culture (such as ceramics or stone tools) and the behavior patterns involved in its production. Topic vary by semester. Consult the Schedule of Classes for more details.

ANTH 6807. Public Archaeology. 3 Credits.

The use and creation of the past and the relationship between archaeologists and different publics.

ANTH 6832. Paleoanthropological Field Program. 0-4 Credits.

Intensive course on field research in paleoanthropology, including excavation methods, identification and analysis of materials, paleoecology, archaeology, and human anatomy. Conducted at selected sites in Eurasia, Africa, or Australia. Visits to comparative sites and collections in the region.

ANTH 6835. Historical Archaeology Field Program. 3-6 Credits.

Practical experience with a variety of excavation and laboratory techniques in historical archaeology; specific site and topics announced in the Schedule of Classes. Same as AMST 6835.

ANTH 6838. Archaeological Theory. 3 Credits.

Overview of major theories and positions in American archaeology; examination of new issues and directions in which the field appears to be moving.

ANTH 6839. Lab Research Methods in Archaeology. 3,4 Credits.

Research methods and techniques used by archaeologists. Emphasis on hands-on experience in one or more techniques. Laboratory fee.

ANTH 6891. Topics in Archaeology. 3 Credits.

Major issues related to the theory and practice of archaeology. Topic announced in the Schedule of Classes.

ANTH 6995. Research. 1-12 Credits.

May be repeated for credit.

ANTH 6998. Thesis Research. 3 Credits.

ANTH 6999. Thesis Research. 3 Credits.

ANTH 8695. Linguistic Field Methods. 3 Credits.

The relationship between language and thought in dialogue with the study of a particular foreign language. Ethnographic study of language and cognition and the application of linguistic theory and method to anthropological research. Methods of elicitation and textual analysis, and technologies used for storing and analyzing linguistic data. Restricted to graduate students.

ANTH 8998. Advanced Reading & Research. 1-12 Credits.

Limited to students preparing for the Doctor of Philosophy general examination. May be repeated for credit.

ANTH 8999. Dissertation Research. 1-12 Credits.

Limited to Doctor of Philosophy candidates. May be repeated for credit.

BACHELOR OF ARTS WITH A MAJOR IN ANTHROPOLOGY

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Prerequisite courses:

ANTH 1001	Biological Anthropology
ANTH 1002	Sociocultural Anthropology
ANTH 1003	Archaeology
ANTH 1004	Language in Culture and Society

Required courses in other areas:

Two-year proficiency in a single foreign language, as demonstrated by completion of four semesters of college-level language study or the equivalent

6-12 credits of course work in related departments approved by the advisor. Recommended for sociocultural emphasis are courses in economics, history, political science, psychology, religion, and sociology; for archaeological emphasis, courses in American studies, art history, geography, geological sciences, and history; for emphasis in biological anthropology, courses in anatomy, biological sciences, chemistry, and physical geography; for emphasis in linguistic anthropology, courses in linguistics and in speech and hearing science. Courses in statistics are strongly recommended for all anthropology majors

Requirements for the major:

In addition to the four prerequisite courses, 24-36 credits in anthropology courses, including:

ANTH 2008	Foundations of Anthropological Thought
At least one course from three of the following four categories:	
Sociocultural anthropology (ANTH 2500s, 2700s, 3500s, and 3700s)	
Linguistics (ANTH/LING 3600s)	
Biological anthropology (ANTH 3400s)	
Archaeology (ANTH 3800s)	
An approved methods course in any category, including but not limited to the courses listed below. (Methods courses can be double-counted as courses in their subject categories.)	
ANTH 3531	Methods in Sociocultural Anthropology
ANTH 3602	Ethnographic Analysis of Speech
ANTH 3832	Paleoanthropological Field Program
ANTH 3833	Field Research: New World
ANTH 3834	Field Research: Old World
ANTH 3835	Historical Archaeology Field Program
ANTH 3839	Lab Research Methods in Archaeology
ANTH 6806	Technology

In addition, a senior capstone experience is required; it may be met by taking ANTH 4008, ANTH 3995 (for 3 credits), or an approved 6000-level course. Qualified seniors may enroll in graduate-level courses with the permission of the instructor.

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors in anthropology, archaeology, or biological anthropology, students must have a grade-point average of 3.5 or better in courses required for the major, register for 3 credit hours of ANTH 3995 Undergraduate Research, and write a paper of special distinction arising out of a program of directed reading or research. Students must confer with an advisor before beginning the work.

BACHELOR OF ARTS WITH A MAJOR IN ARCHAEOLOGY

REQUIREMENTS

An interdepartmental major offered by the Anthropology Department (<http://anthropology.columbian.gwu.edu>) in cooperation with the Fine Arts and Art History Department (<http://art.gwu.edu>), and the Classical and Near Eastern Languages and Civilizations Department (<http://departments.columbian.gwu.edu/cnelc>).

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Prerequisite courses:

ANTH 1002	Sociocultural Anthropology
ANTH 1003	Archaeology

Required courses in other areas:

Completion of a two-year language proficiency through the intermediate level in French, Spanish, Italian, German, Arabic, Hebrew, Latin, or Greek, or placement above the intermediate level.

Requirements for the major:

ANTH 3838	Theory and Practice in Archaeology
or ANTH 3838W	Theory and Practice in Archaeology

3-6 credits of archaeological field or laboratory courses selected from:

ANTH 3832	Paleoanthropological Field Program
ANTH 3833	Field Research: New World
ANTH 3834	Field Research: Old World
ANTH 3835	Historical Archaeology Field Program
ANTH 3839	Lab Research Methods in Archaeology
ANTH 3995	Undergraduate Research

ANTH 3995 can be counted with advisor's approval.

ANTH 6806	Technology
-----------	------------

Qualified juniors and seniors are permitted to take ANTH 6806 with departmental approval.

12-15 credits from Anthropological Archaeology and Archaeology of Ancient Civilizations (section 4 below). At least one course must be taken from both and no course can count in more than one category. Either ANTH 3821 or ANTH 3822 can count for the major, but not both.

Anthropological Archaeology

ANTH 3801	African Roots from Australopithecus to Zimbabwe
-----------	---

or ANTH 3801W	African Roots from Australopithecus to Zimbabwe
---------------	---

ANTH 3802	Human Cultural Beginnings
-----------	---------------------------

or ANTH 3802W	Human Cultural Beginnings
---------------	---------------------------

ANTH 3803	Old World Prehistory: First Farmers to First Cities
-----------	---

or ANTH 3803W	Old World Prehistory: First Farmers to First Cities
---------------	---

ANTH 3811	Historical Archaeology
-----------	------------------------

ANTH 3822	Archaeology in Film and Television
-----------	------------------------------------

ANTH 3823	Archaeology of Ritual and Religion
-----------	------------------------------------

ANTH 3891	Special Topics in Archaeology
-----------	-------------------------------

15 credit hours of Ancient Civilizations, including at least one in each category below.

1) Art History

AH 3101	Ancient Art of the Bronze Age and Greece
---------	--

AH 3102	Ancient Art of the Roman Empire
---------	---------------------------------

AH 3103	Art and Archaeology of Egypt and the Near East
---------	--

AH 3104	Art and Archaeology of the Aegean Bronze Age
---------	--

AH 3105	Topics in Ancient Art and Archaeology
---------	---------------------------------------

AH 3106	Art and Archaeology of Israel and Neighboring Lands
---------	---

2) Classical civilization

CLAS 2105	Special Topics
-----------	----------------

CLAS 2106	Mythology of the Classical World
-----------	----------------------------------

CLAS 2107	Greek and Roman Drama
-----------	-----------------------

CLAS 3114	Topics in Ancient Literatures and Cultures
-----------	--

CLAS 3115 Topics in Ancient Art and Archaeology

3) History

CLAS 2112 History of Ancient Greece

CLAS 2113 The Roman World to 337 A.D.

CLAS 2803 The Ancient Near East and Egypt to 322 B.C.

CLAS 2804 History of Ancient Israel

HIST 2112 History of Ancient Greece

HIST 2113 The Roman World to 337 A.D.

HIST 2803 The Ancient Near East and Egypt to 322 B.C.

HIST 2804 History of Ancient Israel

HIST 3111 Topics in Ancient History

4) Archaeology of Ancient Civilizations

ANTH 3804 Origins of the State and Urban Society

ANTH 3805 Archaeology of Israel and Neighboring Lands

ANTH 3806 Art and Archaeology of the Aegean Bronze Age

ANTH 3808 Archaeology and the Celts

ANTH 3812 The Aztec Empire

ANTH 3813 Archaeology of North America

ANTH 3814 Ancient Mexican Civilizations

ANTH 3821 Myths and Mysteries in Archaeology

A given course cannot count toward more than one requirement for the major.

See the Anthropology Department (<http://anthropology.columbian.gwu.edu>) for more detailed information.

SPECIAL HONORS

For Special Honors in anthropology, archaeology, or biological anthropology, a major must meet the special honors requirements stated under University Regulations, have a grade-point average of 3.5 or better in courses required for the major, register for 3 credit hours of ANTH 3995 Undergraduate Research and write a paper of special distinction arising out of a program of directed reading or research. Students must confer with an advisor before beginning the work.

BACHELOR OF SCIENCE WITH A MAJOR IN BIOLOGICAL ANTHROPOLOGY

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Introductory coursework (21 credits):

ANTH 1001 Biological Anthropology

ANTH 1002 Sociocultural Anthropology

or ANTH 1002W Sociocultural Anthropology

ANTH 1003 Archaeology

ANTH 1004 Language in Culture and Society

BISC 1111 & BISC 1112 Introductory Biology: Cells and Molecules and Introductory Biology: The Biology of Organisms

12 credits from the following:

ANTH 3401 Human Functional Anatomy

ANTH 3402 Human Evolutionary Anatomy

ANTH 3403 Forensic Anthropology Laboratory

ANTH 3404 Human Variation

ANTH 3405 Human Growth and Development

ANTH 3406 Advanced Human Osteology

ANTH 3407 Conservation in a Changing World: Human and Animal Behavior

ANTH 3408 The Evolution of Human Families

ANTH 3411 Primatology

ANTH 3412 Hominin Evolution

or ANTH 3412W Hominin Evolution

ANTH 3413 Evolution of the Human Brain

ANTH 3491 Topics in Biological Anthropology

ANTH 3802 Human Cultural Beginnings

or ANTH 3802W Human Cultural Beginnings

9 credits of biology (BISC) courses numbered 2000 or above, including at least one course from each of the following categories:

Cell/molecular biology

BISC 2202 Cell Biology

BISC 2207 Genetics

BISC 2208 Genetics Laboratory

BISC 2213 Biology of Cancer

BISC 2214 Developmental Biology

BISC 2220 Developmental Neurobiology

BISC 3209 Molecular Biology

BISC 3210 Nanobiotechnology

BISC 3211 Nanobiotechnology Laboratory

BISC 3212 Immunology

BISC 3213 Applied Immunology

BISC 3261 Introductory Medical Biochemistry

BISC 3262 Biochemistry Laboratory

BISC 3263 Special Topics in Biochemistry

Organismal/sub-organismal biology

BISC 2318 Histology

BISC 2320 Neural Circuits and Behavior

BISC 2322 Human Physiology

or BISC 2322W Human Physiology

BISC 2323 Human Physiology Laboratory

BISC 2330 Invertebrate Zoology

BISC 2332 Comparative Vertebrate Anatomy

BISC 2333 Evolution and Extinction of Dinosaurs

BISC 2334 Integrative Biology of Fishes

or BISC 2334W Integrative Biology of Fishes

BISC 2337 Introductory Microbiology

or BISC 2337W Introductory Microbiology

BISC 2339 Parasitology

BISC 3321 Comparative Endocrinology

BISC 3325 Environmental Physiology

Ecology/evolution

BISC 2450 Organic Evolution

BISC 2451 History of Life

BISC 2452 Animal Behavior

BISC 2454 General Ecology

or BISC 2454W General Ecology

BISC 3458 Plant Comparative Structure and Function

BISC 3460 Conservation Biology

BISC 3461 Plant-Animal Interactions

BISC 3462 Plant-Animal Interactions Laboratory

BISC 3463 Ecological and Evolutionary Genetics

One course from the following:

CHEM 1111 General Chemistry I

CHEM 1112 General Chemistry II

CHEM 2085 Environmental Chemistry

CHEM 3140 Geochemistry

or GEOL 3140 Geochemistry

CHEM 3165 Biochemistry I

CHEM 3166 Biochemistry II

PSYC 2014 Cognitive Psychology

PSYC 2015 Biological Psychology

PSYC 3112 Psychology of Adolescence

PSYC 3118 Neuropsychology

BISC 1005 The Biology of Nutrition and Health

or BISC 1007 Food, Nutrition, and Service

BISC 1006 The Ecology and Evolution of Organisms

or BISC 1008 Understanding Organisms through Service Learning

GEOL 1001 Physical Geology

or GEOL 1005	Environmental Geology
GEOL 1002	Historical Geology
STAT 1127	Statistics for the Biological Sciences

6 credits of anthropology (ANTH) courses numbered 2000 or above but not including courses in the 3400--3499 or the 3802 or 3832 range

Note: The major in biological anthropology may not be pursued in conjunction with the major in anthropology.

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors in anthropology, archaeology, or biological anthropology, a major have a grade-point average of 3.5 or better in courses required for the major, register for 3 credit hours of ANTH 3995 Undergraduate Research, and write a paper of special distinction arising out of a program of directed reading or research. Students must confer with an advisor before beginning the work.

COMBINED PROGRAMS

REQUIREMENTS

The Department of Anthropology offers three options for a combined Bachelor of Arts/Master of Arts degree:

- Combined Bachelor of Arts with a major in anthropology and Master of Arts in the field of anthropology
- Combined Bachelor of Arts with a major in archaeology and Master of Arts in the field of anthropology
- Combined Bachelor of Science with a major in biological anthropology and Master of Arts in the field of anthropology

The program allows students to take a specified number of graduate credits as part of their undergraduate degree, thereby decreasing the number of credits normally required for the master's degree.

Students interested in the combined degree program should plan well in advance and confer with their major advisor about the details of their course of study. For more information visit the program website (<http://anthropology.columbian.gwu.edu/combined-bama-program>).

MINOR IN ANTHROPOLOGY

REQUIREMENTS

21 credits are required including:

ANTH 1001	Biological Anthropology
ANTH 1002	Sociocultural Anthropology
ANTH 1003	Archaeology
ANTH 1004	Language in Culture and Society

Three additional courses in anthropology, which must be taken in different subdisciplines

For the purposes of this minor, the department's courses may be divided into subdisciplines as follows:

- biological anthropology—courses in the 3400s and ANTH 1005;
- archaeology—the 3800s;
- anthropological linguistics—the 2600s and 3600s;
- sociocultural anthropology—all other upper-division courses, with the exception of ANTH 3995.

MINOR IN ARCHAEOLOGY

REQUIREMENTS

18 credits are required including:

ANTH 1003	Archaeology
ANTH 3838	Theory and Practice in Archaeology
Four courses from the following: (An independent study course in archaeology or an approved art history course may be substituted for one of the four courses)	
ANTH 3801	African Roots from Australopithecus to Zimbabwe
ANTH 3801W	African Roots from Australopithecus to Zimbabwe
ANTH 3802	Human Cultural Beginnings
ANTH 3802W	Human Cultural Beginnings
ANTH 3803	Old World Prehistory: First Farmers to First Cities
ANTH 3803W	Old World Prehistory: First Farmers to First Cities
ANTH 3804	Origins of the State and Urban Society
ANTH 3805	Archaeology of Israel and Neighboring Lands
ANTH 3806	Art and Archaeology of the Aegean Bronze Age
ANTH 3808	Archaeology and the Celts

ANTH 3811	Historical Archaeology
ANTH 3812	Power and Violence in the New World
ANTH 3813	Archaeology of North America
ANTH 3814	Ancient Mexican Civilizations
ANTH 3821	Myths and Mysteries in Archaeology
ANTH 3822	Archaeology in Film and Television
ANTH 3823	Archaeology of Ritual and Religion
ANTH 3832	Paleoanthropological Field Program
ANTH 3833	Field Research: New World
ANTH 3834	Field Research: Old World
ANTH 3835	Historical Archaeology Field Program
ANTH 3838W	Theory and Practice in Archaeology
ANTH 3839	Lab Research Methods in Archaeology
ANTH 3891	Special Topics in Archaeology

MINOR IN BIOLOGICAL ANTHROPOLOGY

REQUIREMENTS

16 credits are required, including:

ANTH 1001	Biological Anthropology
-----------	-------------------------

9 credits from the following:

ANTH 3401	Human Functional Anatomy
ANTH 3402	Human Evolutionary Anatomy
ANTH 3403	Forensic Anthropology Laboratory
ANTH 3404	Human Variation
ANTH 3405	Human Growth and Development
ANTH 3406	Advanced Human Osteology
ANTH 3411	Primatology
ANTH 3412	Hominin Evolution
ANTH 3412W	Hominin Evolution
ANTH 3413	Evolution of the Human Brain
ANTH 3491	Topics in Biological Anthropology

ANTH 1005	The Biological Bases of Human Behavior
-----------	--

One course from the following:

ANTH 3839	Lab Research Methods in Archaeology
ANTH 3832	Paleoanthropological Field Program
PSYC 2014	Cognitive Psychology
PSYC 2015	Biological Psychology
PSYC 3112	Psychology of Adolescence
PSYC 3118	Neuropsychology
BISC 1005	The Biology of Nutrition and Health
BISC 1006	The Ecology and Evolution of Organisms
BISC 1111	Introductory Biology: Cells and Molecules
BISC 1112	Introductory Biology: The Biology of Organisms
GEOL 1001	Physical Geology
GEOL 1002	Historical Geology
GEOL 1005	Environmental Geology
STAT 1127	Statistics for the Biological Sciences

MINOR IN CROSS-CULTURAL COMMUNICATION

REQUIREMENTS

Required courses (6 credits):

ANTH 1002	Sociocultural Anthropology
ANTH 1004	Language in Culture and Society

Two courses (6 credits) from the following, at least one of which must be ANTH 3601 or ANTH 3602/ANTH 3602W.

ANTH 3601	Language, Culture, and Cognition
ANTH 3602	Ethnographic Analysis of Speech
or ANTH 3602W	Ethnographic Analysis of Speech
ANTH 3603	Psycholinguistics
ANTH 3691	Special Topics in Linguistic Anthropology

One course (3 credits) from the following:

ANTH 2501	The Anthropology of Gender: Cross-Cultural Perspectives
ANTH 2505	Introduction to Ethnomusicology
ANTH 2506	Religion, Myth, and Magic
or REL 2506	Religion, Myth, and Magic
ANTH 2533	Material Culture in America
or AMST 2533	Material Culture in America
ANTH 3501	Anthropology of Development
ANTH 3502	Cultural Ecology
ANTH 3503	Psychological Anthropology
ANTH 3504	Illness, Healing, and Culture
ANTH 3506	Politics, Ethnicity, and Nationalism
ANTH 3507	Kinship, Family, and Community
ANTH 3508	Art and Culture
ANTH 3513	Anthropology of Human Rights
ANTH 3521	Ethnographic Film
ANTH 3531	Methods in Sociocultural Anthropology
ANTH 3991	Special Topics

One course (3 credits) from the following:

ANTH 3701	Native Peoples - North America
ANTH 3702	Anthropology of Latin America
ANTH 3703	Cultures of the Pacific
ANTH 3704	Cultures of Southeast Asia
ANTH 3705	Anthropology of East Asia
ANTH 3707	Anthropology of the Middle East
ANTH 3708	Anthropology of Africa
ANTH 3709	Japanese Culture Through Film
or JAPN 3162	Japanese Culture Through Film

MINOR IN SOCIOCULTURAL ANTHROPOLOGY

REQUIREMENTS

Required introductory course (3 credits):

ANTH 1002	Sociocultural Anthropology
Five courses (15 credits) from the following:	
ANTH 2008	Foundations of Anthropological Thought
or ANTH 2008W	Foundations of Anthropology
ANTH 2501	The Anthropology of Gender: Cross-Cultural Perspectives
or WSTU 2121	The Anthropology of Gender: Cross-Cultural Perspectives
ANTH 2505	Introduction to Ethnomusicology
or MUS 2105	Introduction to Ethnomusicology
or MUS 2105W	Introduction to Ethnomusicology
ANTH 2506	Religion, Myth, and Magic
or REL 2506	Religion, Myth, and Magic
ANTH 2533	Material Culture in America
or AMST 2533	Material Culture in America
ANTH 2750	Latinos in the United States
or ANTH 2750W	Latinos in the United States
ANTH 3501	Anthropology of Development
ANTH 3502	Cultural Ecology
ANTH 3503	Psychological Anthropology
ANTH 3504	Illness, Healing, and Culture
ANTH 3506	Politics, Ethnicity, and Nationalism
ANTH 3507	Kinship, Family, and Community
ANTH 3508	Art and Culture
ANTH 3513	Anthropology of Human Rights
or ANTH 3513W	Anthropology of Human Rights
ANTH 3521	Ethnographic Film
ANTH 3531	Methods in Sociocultural Anthropology
ANTH 3701	Native Peoples - North America
ANTH 3702	Anthropology of Latin America
ANTH 3703	Cultures of the Pacific
ANTH 3704	Cultures of Southeast Asia
ANTH 3705	Anthropology of East Asia

ANTH 3707	Anthropology of the Middle East
-----------	---------------------------------

ANTH 3708	Anthropology of Africa
-----------	------------------------

ANTH 3709	Japanese Culture Through Film
-----------	-------------------------------

or JAPN 3162	Japanese Culture Through Film
--------------	-------------------------------

ANTH 3991	Special Topics
-----------	----------------

MASTER OF ARTS IN THE FIELD OF ANTHROPOLOGY

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

The minimum requirement consists of:

36 credits of approved graduate course work including the following:

At least three of the following four proseminars:

ANTH 6101	Proseminar in Biological Anthropology
-----------	---------------------------------------

ANTH 6102	Proseminar in Sociocultural Anthropology
-----------	--

ANTH 6103	Proseminar in Archaeology
-----------	---------------------------

ANTH 6104	Proseminar in Linguistic Anthropology
-----------	---------------------------------------

Those with significant background in a field, as determined by evaluation of a student petition to the proseminar instructor, may waive one proseminar. Those who are permitted to waive a proseminar must, however, take two courses from the following:

ANTH 6101	Proseminar in Biological Anthropology
-----------	---------------------------------------

or ANTH 6103	Proseminar in Archaeology
--------------	---------------------------

ANTH 6102	Proseminar in Sociocultural Anthropology
-----------	--

or ANTH 6104	Proseminar in Linguistic Anthropology
--------------	---------------------------------------

An approved methods course

In addition to the 36 credits of approved graduate course work, a thesis, integrating essay, or journal paper.

Students with fewer than four undergraduate semesters of a major foreign language must demonstrate a reading knowledge of an approved language before beginning the third semester of graduate work.

Concentration in museum training

The program of study is the same as that described above for the general degree, but must include from 12 to 15 credits of work in museum-related courses, 6 credits of which may be in an internship. In lieu of a thesis, an integrating essay or journal paper is required. Students whose primary interest is in museum techniques, rather than anthropology, are advised to apply to the master's program in museum studies (see Museum Studies). A program in museum education is also available through the Graduate School of Education and Human Development.

Concentration in international development

The program of study is the same as that described above for the general degree, but must include:

ANTH 6301	The Anthropology of Development
-----------	---------------------------------

ANTH 6331	Research Methods in Development Anthropology
-----------	--

Two of the following:

ANTH 6302	Issues in Development
-----------	-----------------------

ANTH 6330	Internship in Development Anthropology
-----------	--

ANTH 6391	Anthropology and Contemporary Problems
-----------	--

ANTH 6501	Gender and Sexuality
-----------	----------------------

ANTH 6507	Nationalism and Ethnicity
-----------	---------------------------

An approved graduate-level course in quantitative analysis

The program is designed to improve the student's understanding of development problems, such as economic change, population, health, education, migration, and ecology, within an anthropological framework. Internships at public and private development agencies in the Washington area are encouraged. The Elliott School of International Affairs offers a program in international development studies with a disciplinary specialization in anthropology.

Concentration in medical anthropology

The program of study is the same as that described for the general degree, but must include:

ANTH 6505	Medical Anthropology
-----------	----------------------

Two of the following:

ANTH 6302 Issues in Development

ANTH 6391 Anthropology and Contemporary Problems

ANTH 6501 Gender and Sexuality

ANTH 6506 Topics in Medical Anthropology

One of the following research methods options:

Option A:

ANTH 6331 Research Methods in Development Anthropology

PUBH 6003 Principles and Practices of Epidemiology

Option B:

Two of the following:

PUBH 6410 Global Health Study Design

PUBH 6411 Global Health Qualitative Research Methods

PUBH 6412 Global Health Quantitative Research Methods

DOCTOR OF PHILOSOPHY IN THE FIELD OF ANTHROPOLOGY

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

The requirements for the Doctor of Philosophy Program (p. 71).

The program trains students in the fields of sociological anthropology, archaeology, linguistic anthropology, and biological anthropology, and in areas of more specialized interest. The program focuses on applying anthropological theory and method to the study of contemporary social problems.

In the first phase of the program, students take:

Core proseminars:

Ph.D. students are expected to take three of the four proseminars, but students with significant background in a field, as determined by evaluation of a student petition to the proseminar instructor, may waive one proseminar.

ANTH 6101 Proseminar in Biological Anthropology

ANTH 6102 Proseminar in Sociocultural Anthropology

ANTH 6103 Proseminar in Archaeology

ANTH 6104 Proseminar in Linguistic Anthropology

A research methods seminar

A professional skills and ethics seminar

Elective course work

All students must demonstrate proficiency in one foreign language; an additional language may be required if it is needed for fieldwork or archival research. An internship in anthropology and public life at an institution responsible for communicating anthropological knowledge to diverse audiences is recommended.

In the second phase, students prepare a research proposal that meets funding agency guidelines and take the General Examination in at least three major areas (e.g., a general field in anthropological theory, a geographic area, and a thematically defined field). Following successful completion of the General Examination, an oral defense of the student's research proposal is held. Those who pass advance to candidacy for the Ph.D. and engage in completion and defense of the dissertation.

ART THERAPY

The graduate program in art therapy trains exceptionally skilled therapists whose professional practice is grounded in a broad understanding of current clinical art therapy, counseling, and trauma theories. Students are taught effective research and evaluation methodologies, clinical skills, and studio expertise, all within a diverse, integrative, and culturally-responsive format. The student-focused approach allows each student to cultivate a unique identity as an art therapist.

GRADUATE

Master's programs

- Master of Arts in the field of art therapy (p. 115)
- Master of Arts in the field of art therapy practice (p. 116)

FACULTY

Assistant Professors H. Bardot (*Director*), D. Betts, L. Garlock, T. Tripp (*Teaching*), E. Warson

Professorial Lecturers R. Albert, D. Brancheau, G. Chilton, T. Council, A. Di Maria, P. Howie, C. Knebel, L. Milofsky, M.E. Ruff, D. Sabados, B. Sobol, R. Wilkinson

Lecturer C. Cox

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Note: The following courses are open to non-art therapy students with permission of the instructor or program director: ARTH 6206 Human Development and Art Therapy, ARTH 6231 Child Art Therapy, ARTH 6232 Art Therapy with Adolescents, ARTH 6233 Marital and Family Art Therapy/Counseling, ARTH 6234 Group Process, ARTH 6235 Social and Cultural Diversity, ARTH 6242 Psychopathology: Art and Diagnosis, ARTH 6261 Ethics and Professionalism.

ARTH 6201. Survey of Art Therapy. 3 Credits.

The use of the visual arts to enhance personal development and growth; illustrated lectures, readings, discussion, and studio work presented by experts in the field. Instruction is delivered online via Blackboard. No previous art experience is necessary.

ARTH 6205. History and Theory of Art Therapy. 2 Credits.

Art therapy history and theory, milestones and practitioners. The development of art therapy as a distinct therapeutic practice. Overview of psychotherapy theories relevant to art therapy. Open only to art therapy students.

ARTH 6206. Human Development and Art Therapy. 3 Credits.

Psychological and artistic development across the life span. Theories of personality development; cultural and environmental influences; and human behavior, including developmental crises, disability, exceptional behavior, and addictive behavior. Restricted to art therapy students.

ARTH 6210. Counseling/Art Therapy Process. 3 Credits.

Theoretical and clinical dimensions of counseling and art therapy explored through study of current research concerning the diverse elements affecting the therapeutic process. The goals of each phase of treatment; development of the therapeutic alliance; assessment of client readiness; therapeutic techniques and interventions as practiced in short- and long-term treatment.

ARTH 6211. Process of Counseling and Art Therapy: Theory. 3 Credits.

Major theories in counseling and art psychotherapy through the lens of the creative process and other aspects of clinical practice; the influence of multicultural issues, contemporary and evidence-based practices, and various settings on art-making and the therapeutic encounter. Restricted to students in an art therapy program; permission of the instructor may be substituted. Prerequisite: ARTH 6210.

ARTH 6221. Studio/Technique of Art Therapy. 3 Credits.

Direct experience of the therapeutic utility and psychological influence of art processes and materials. Identifying the effect of art-making leading to assessment and intervention strategies. Open only to art therapy students.

ARTH 6231. Child Art Therapy. 2 Credits.

Practical, theoretical, and ethical considerations involved in treating children in clinical and educational settings. Application of art therapy and counseling principles and practice for diverse child populations. Development of interventions for varied DSM-IV diagnoses.

ARTH 6232. Art Therapy with Adolescents. 2 Credits.

Practical, theoretical, and ethical considerations in treating adolescents in clinical and educational settings. Assessment and treatment issues integrating the use of art techniques specifically designed for this population. Application of art therapy and counseling principles and practice for diverse adolescent populations. Development of interventions for varied DSM-V diagnoses. Restricted to students in an art therapy program.

ARTH 6233. Marital and Family Art Therapy/Counseling. 3 Credits.

Principles of working with families and couples, including an overview of systems theories and stages of family life cycle development; art techniques for evaluating of family dynamics; intervention strategies and cultural and ethical considerations. Restricted to students in an art therapy program.

ARTH 6234. Group Process. 3 Credits.

Theoretical and experiential understanding of group art therapy and counseling methods and skills. Principles of group dynamics, therapeutic factors, member roles and behaviors, leadership styles and approaches, selection criteria, and short- and long-term group process.

ARTH 6235. Social and Cultural Diversity. 3 Credits.

Consideration of stereotypes and biases that interfere with effective treatment of patients who are racially, ethnically, and otherwise diverse. The role of the art therapist in conflict resolution, advocacy, and social justice. Exploration of the therapist's heritage, expectations, and values. Racial identity development; skills for multicultural counseling.

ARTH 6241. Assessment Procedures. 3 Credits.

Instruments and procedures used in assessment of psychological health and psychopathology; diagnostic and developmental criteria as manifested in artwork and art-making; statistical concepts, including reliability and validity; selection and administration of assessment tools; treatment planning; report writing. Restricted to students in an art therapy program.

ARTH 6242. Psychopathology: Art and Diagnosis. 3 Credits.

Criteria of psychiatric diagnoses, such as the Diagnostic and Statistical Manual multiaxial system, theories of psychopathology, and relevant literature evaluation of potential indicators of functional and organic disorders in behavior and artwork of clients; ethical issues; cultural and environmental influences on diagnostic categorization; basic introduction to psychopharmacology. Restricted to students in an art therapy program; permission of the instructor may be substituted.

ARTH 6243. Substance Abuse and Addictions. 3 Credits.

Overview of substance abuse and addictions for art therapy and counseling, including theory and treatment applications. Screening and assessment tools; treatment models specific to the field of addictions. Art therapy techniques in the treatment of substance abuse for adolescents and adults in a variety of treatment settings. Restricted to ARTH majors only.

ARTH 6251. Research Methods. 3 Credits.

Planning, conducting, and evaluating relevant methodologies, including qualitative and quantitative approaches and basic statistics. The importance of research in the psychotherapy professions; ethical and legal considerations; and the use of research to assess effectiveness of mental health and art therapy services.

ARTH 6261. Ethics and Professionalism. 3 Credits.

Professional identity and the role of the therapist; the ethical practice of counseling and art therapy, including familiarity with ethical standards of various professional organizations; credentialing and licensure; public policy and advocacy for patients and for the profession.

ARTH 6262. Career Counseling and Art Therapy. 3 Credits.

The theoretical foundation and practical experience necessary to understand and support career development needs for diverse individual clients and groups. Career development over the lifespan; assessments, tools, and resources; occupational and labor market trends and resources. Specific art therapy techniques applicable to career counseling in educational and work settings. Restricted to ARTH majors only.

ARTH 6265. Advanced Issues in Psychotherapy and Art Therapy. 1-3 Credits.

Overview and application of one or more treatment models or theories to various mental and emotional disorders. Connections between the practice of art therapy and the techniques of other disciplines.

ARTH 6271. Art Psychotherapy and Trauma I: Theory and Approaches to Treatment. 0-3 Credits.

Introduction and overview of theory, practice, and treatment related to complex, trauma-related problems; psychobiology of traumatic stress, impact of traumatic stress on individuals, and specific treatment modalities in clinical setting; somatic (body-based) and nonverbal (art and image-based) treatment modalities. Supervised treatment or observation of treatment of clients with trauma histories. Restricted to students in an art therapy program.

ARTH 6272. Art Psychotherapy and Trauma II: Loss, Countertransference, and Resiliency. 3 Credits.

Multi-modal treatment of acute, serial, or complex trauma; theoretical, practical, moral, cross cultural, and personal aspects as seen through an art therapy and counseling lens. Supervised treatment or observation of treatment of clients with trauma histories. Restricted to students in an art therapy program. Prerequisite: ARTH 6271.

ARTH 6281. Practicum in Art Therapy. 1-2 Credits.

A total of 900 hours of clinical fieldwork in a professional setting. Supervised clinical experience with clients or patients in psychiatric, rehabilitation, and education settings with children, adolescents, and adults. On-site individual supervision by clinical instructors; on-campus group supervision by faculty. Open only to art therapy students.

ARTH 6292. Special Projects in Art Therapy. 1-12 Credits.

Individual work based on research. Empirical, clinical, and library research may be undertaken, as well as the development of new procedures. Details to be worked out with each student. May be repeated for credit with advisor's approval. Open only to art therapy students.

ARTH 6998. Thesis Research. 3 Credits.**ARTH 6999. Thesis Research. 3 Credits.**

MASTER OF ARTS IN THE FIELD OF ART THERAPY

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

Required: 61 credits of graduate course work including:

ARTH 6205	History and Theory of Art Therapy
ARTH 6206	Human Development and Art Therapy
ARTH 6210	Counseling/Art Therapy Process
ARTH 6211	Counseling/Art Therapy Theory

ARTH 6221	Studio/Technique of Art Therapy
ARTH 6231	Child Art Therapy
ARTH 6232	Art Therapy with Adolescents
ARTH 6233	Marital and Family Art Therapy/ Counseling
ARTH 6234	Group Process
ARTH 6235	Social and Cultural Diversity
ARTH 6241	Assessment Procedures
ARTH 6242	Psychopathology/Art and Diagnosis
ARTH 6251	Research Methods
ARTH 6261	Ethics and Professionalism
ARTH 6265	Advanced Issues in Psychotherapy and Art Therapy
ARTH 6281	Practicum in Art Therapy
CNSL 6155	Career Counseling
CNSL 6169	Counseling Substance Abusers
ARTH 6292	Special Projects in Art Therapy

Electives

MASTER OF ARTS IN THE FIELD OF ART THERAPY PRACTICE

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

This 30-credit program is intended for those who hold a master's degree in an approved related field (such as counseling or social work) that included designated graduate course work.

Requirements include:

ARTH 6205	History and Theory of Art Therapy
ARTH 6221	Studio/Technique of Art Therapy
ARTH 6234	Group Process
ARTH 6235	Social and Cultural Diversity

ARTH 6241	Assessment Procedures
ARTH 6261	Ethics and Professionalism
ARTH 6281	Practicum in Art Therapy
Two of the following (with approval):	
ARTH 6210	Counseling/Art Therapy Process
ARTH 6211	Counseling/Art Therapy Theory
ARTH 6271	Art Psychotherapy and Trauma I: Theory and Approaches to Treatment

3 credits of ARTH electives

BIOCHEMISTRY AND MOLECULAR MEDICINE

GRADUATE

Master's program

- Master of Science in the field of molecular biochemistry and bioinformatics (p. 118)

FACULTY

University Professor F. Murad

Professors P. Berg, V. Hu, A. Kumar, R. Kumar (*Chair*), R. Lakshman (*Research*), Z. Lu (*Research*), W. Nierman, M. Sharma (*Research*), J. Vanderhoek (*Director of M.S. program*), G. Walker, W. Weglicki

Associate Professors K. Bian (*Research*), G. Dimri, M. Elliott, Z. Han, J. Kramer (*Research*), I.T. Mak (*Research*), R. Mazumder

Assistant Professors J. Chmielinska (*Research*), M. Dimri (*Research*), J.-H. Kim, A. Kots (*Research*), S. Nair (*Research*), K. Ohshiro (*Research*), M.-Y. Wu (*Research*), R.-C. Wu, J. Zhou (*Research*), W. Zhu

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

BIOC 3261. Introductory Medical Biochemistry. 4 Credits.

Introduction to structures of biological macromolecules, enzyme catalysis, cellular bioenergetics, and metabolism. Same as BISC 3261. Prerequisite: CHEM 2151- CHEM 2152. Credit toward the degree cannot be earned for this course and for CHEM 3165.

BIOC 3262. Biochemistry Laboratory. 2 Credits.

Study of common experimental techniques used in life science laboratories to separate and characterize biological macromolecules. Same as BISC 3262/ CHEM 3262. Prerequisite: BIOC 3261/ BISC 3261 . Laboratory fee.

BIOC 3263. Special Topics in Biochemistry. 2 Credits.

In-depth discussion of current biochemically relevant topics, including cancer and HIV chemotherapy, immune response, photosynthesis, signal transduction, hormone regulation and nutrition. Same as BISC 3263. Prerequisite: BIOC 3261/ BISC 3261 . Credit toward the degree cannot be earned for this course and for CHEM 3166.

BIOC 3263W. Special Topics in Biochemistry. 2 Credits.**BIOC 3560. Diet, Health, and Longevity. 3 Credits.**

Biochemical and molecular explanations of how calorie intake affects health; scientific principles of dieting. Prerequisite: BIOC 3261 or BISC 1005 or EXSC 2114 or EXSC 2119.

BIOC 3564. Lipid Biotechnology. 0-2 Credits.

Same as BISC 3564/ CHEM 3564. Prerequisite: BIOC 3261/ BISC 3261 . Laboratory fee.

BIOC 3820. Bioinformatics and Computational Biochemistry. 2 Credits.

How biomedical researchers integrate information from molecular biology resources for analysis and testing of hypotheses. Prerequisite: BISC 1111; STAT 1127.

BIOC 3821. Projects in Biomed Informatics. 1-2 Credits.**BIOC 4195. Undergraduate Research. 1 Credit.**

Research conducted under a mentor who is a member of the department. May be repeated for credit (only 1 credit may count toward the minor). Prerequisites: permission of the faculty member concerned.

BIOC 4701. Science and Medicine. 0-4 Credits.

A broad overview of several biomedical discoveries made in the 20th century and the often profound influence they have had on medical technology and on new directions in science and medicine, science administration, politics, ethics, and philosophy. (Same as HONR 2175, HONR 2175).

BIOC 6201. Medical Biochemistry. 7 Credits.

Required for medical students. Lecture and laboratory; emphasis on basic principles and their relation to medicine.

BIOC 6209. Resch Elective in Medical BioC. 1-12 Credits.**BIOC 6211. Biochem-Health Sci Students. 3,4 Credits.**

Basic concepts of biochemistry and their relation to health sciences.

BIOC 6221. Proteins, Pathways, and Human Health. 4 Credits.

A comprehensive course in general biochemistry for graduate students in biomedical sciences. Prerequisite: CHEM 2152, CHEM 2154.

BIOC 6222. Biochemical Genetics and Medicine. 3 Credits.

Continuation of BIOC 6221. A comprehensive course in general biochemistry for graduate students in biomedical sciences. Prerequisite: CHEM 2152, CHEM 2154.

BIOC 6223. Bioinformatics. 2 Credits.

The application of bioinformatics concepts and methods through the use of molecular biology databases and tools, covering molecular evolution, and protein sequence, structural, functional analysis. Recommended background: One undergraduate biochemistry course.

BIOC 6224. Molec biol and protein methods. 3 Credits.

Common laboratory techniques used in life science laboratories to separate and characterize proteins, including chromatography, gel electrophoresis, immunoassays, spectroscopy, and centrifugation. Corequisite: BIOC 6221. Laboratory fee.

BIOC 6227. Biochemistry Seminar. 1 Credit.

Current literature in biochemistry. Limited to graduate students in the department. May be repeated for credit.

BIOC 6234. Biochemical and Bioinformatic Approaches to Protein Structure and Function. 3 Credits.

Molecular biological, biophysical, chemical, and bioinformatic approaches to understanding protein structure and function. Protein folding, interactions, and ligand binding.

BIOC 6235. Seminar in Genomics, Proteomics, and Bioinformatics. 1 Credit.**BIOC 6236. Medical Genomics. 2 Credits.**

The structure and function of genes and genomes. Genomic theories, methods, and data analysis including bioinformatics and database mining. Prerequisite or corequisite: BIOC 6221- BIOC 6222.

BIOC 6237. Proteomics and biomarkers. 2 Credits.

Experimental proteomics, protein/proteome analysis, bioinformatics of proteomics, systems biology and structural genomics. Prerequisite: BIOC 6236.

BIOC 6238. Experimental Genomics Lab. 3 Credits.

Research applications of knowledge in genomics and proteomics. Prerequisite: BIOC 6236. Laboratory fee.

BIOC 6240. Next Generation Sequencing. 2 Credits.**BIOC 6250. Molecular Biology. 3 Credits.**

Content includes the organization and replication of genetic material, transcriptional and translational machinery, regulation of eukaryotic gene expression, and other special topics. Prerequisite: BIOC 6221-BIOC 6222.

BIOC 6252. Current Laboratory Methods in Molecular Biology. 3 Credits.

Corequisite: BIOC 6221. Laboratory fee.

BIOC 6254. Fundamentals of Molecular Biology. 3 Credits.

An intermediate-level molecular biology survey course.

Prerequisite: BIOC 6221.

BIOC 6260. Analytic Methods for Lipids and Carbohydrates. 3 Credits.

Basic techniques in the biotechnology of lipids and carbohydrates. Prerequisite: BIOC 6221.

BIOC 6262. Genes, diets and aging. 3 Credits.**BIOC 6264. Membrane-Associated Complex Lipids. 1 Credit.****BIOC 6281. Topics. 1,2 Credit.**

Directed readings in biochemistry, molecular biology, and genetics. May be repeated for credit. Enrollment limited to graduate students in the department.

BIOC 6290. Extramural BioChem Elective. 1-12 Credits.**BIOC 6291. Extramural BioChem Elective. 1-12 Credits.****BIOC 6295. Research. 1-12 Credits.**

Participation in a project under investigation or in a field suggested by the student and approved by the staff. May be repeated for credit. Laboratory fee.

BIOC 6298. Advanced Reading. 1-6 Credits.

Limited to master's degree candidates. May be repeated for credit to a maximum of 6 hours.

BIOC 6998. Thesis Research. 3 Credits.**BIOC 6999. Thesis Research. 3 Credits.****BIOC 8225. Metabolism. 4 Credits.**

Metabolic pathways and integration of metabolic processes. Limited to Ph.D. students in the Institute for Biomedical Sciences.

BIOC 8231. Bioc Basis of Human Diseases. 3 Credits.

Biochemical perspectives on disorders involving metabolic alterations, immunological dysregulation, problems of environmental/toxicological etiology, genetic/epigenetic dysfunction, neglected tropical diseases. Prerequisite: BmSc 8210, 8212.

BIOC 8232. Mol Cell Signaling. 3 Credits.**BIOC 8501. Issues in Clinical Nutrition. 3 Credits.****BIOC 8502. Molecular Biology of Oncogenes. 1-12 Credits.****BIOC 8503. Readings in Immunology. 3 Credits.****BIOC 8800. Summer Remedial Biochemistry. 8 Credits.**

MASTER OF SCIENCE IN THE FIELD OF MOLECULAR BIOCHEMISTRY AND BIOINFORMATICS

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

Prerequisites: a bachelor's degree. The undergraduate program must have included the following courses or equivalent:

BISC 1111-BISC 1112; CHEM 2122, CHEM 2151-CHEM 2152, PHYS 1011.

Required courses:

BIOC 6221	Proteins, Pathways, and Human Health
BIOC 6222	Biochemical Genetics and Medicine
BIOC 6223	Bioinformatics
BIOC 6227	Biochemistry Seminar

For the biochemistry track, additional required courses are:

BIOC 6224	Molec biol and protein methods
BIOC 6260	Analytic Methods for Lipids and Carbohydrates

For the bioinformatics track, additional required courses are:

BIOC 6236	Medical Genomics
BIOC 6237	Proteomics and biomarkers
BIOC 6240	Next Generation Sequencing

Students may choose either a 30-credit thesis or non-thesis option.

BIOLOGICAL SCIENCES

As one of the natural science departments in the Columbian College of Arts and Sciences, Biological Sciences explores the science of life, from biomolecules to ecosystems. Courses and ongoing research programs are focused in three general areas: cell and molecular biology, ecology, and evolution and systematics. In research laboratories, students and faculty members work together on projects that range from dinosaur evolution through an investigation of how misfolded proteins interfere with insulin production. Many departmental faculty members have working relationships with scientists in surrounding education and federal institutions, and the program has a collaboration of more than 100 years standing with the National Museum of Natural History of the Smithsonian Institution.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in biology (p. 125)
- Bachelor of Science with a major in biology (p. 126)
- Combined program (p. 127)

Minor

- Minor in biology (p. 127)

GRADUATE

Master's program

- Master of Science in the field of biological sciences (p. 127)

Doctoral program

- Doctor of Philosophy in the field of biological sciences (p. 127)

FACULTY

Professors J.M. Clark, K.A. Crandall, R. Donaldson, G. Hormiga, D.L. Lipscomb, G. Ortí, R.K. Packer (*Chair*), L.C. Smith, R.P. Tollo

Associate Professors P. Hernandez, C.A. Forster, A. Jeremic, J.T. Lill

Assistant Professors H.G. Döbel, I. Eleftherianos, D. O'Halloran, M. Manier, D.W. Morris, S. Powell, R.A. Pyron, T. Scully (Teaching), A. Smith, A. Zanne

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Departmental prerequisite: BISC 1111 Introductory Biology: Cells and Molecules-BISC 1112 Introductory Biology: The Biology of Organisms or equivalent is prerequisite to all upper-division courses except by permission of the instructor.

BISC 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the schedule of classes for more details. Restricted to First-year students in CCAS.

BISC 1001. Departmental Seminar. 0 Credits.

BISC 1005. The Biology of Nutrition and Health. 3 Credits.

A study of the human body and its disorders and diseases through examination of the essential molecules of life, nutrition, digestion, genetics, and reproduction. For non-majors. Same as BISC 1007.

BISC 1006. The Ecology and Evolution of Organisms. 3 Credits.

Introduction to ecology and evolution, including man's impact on other plants and animals, and an overview of Earth's biodiversity. For non-majors.

BISC 1007. Food, Nutrition, and Service. 3 Credits.

A study of biology and nutrition that uses service learning to reinforce course concepts. Topics include the need for humans to consume other organisms, processing of consumed nutrients, unexpected effects of nutritional consumption, and measures to improve nutrition.

BISC 1008. Understanding Organisms through Service Learning. 3 Credits.

The evolution of life on earth; the value of other organisms, their role in our world, and how humans can cause harm to this infrastructure. Students work with a community partner to perform activities that assist the partner while reinforcing course concepts.

BISC 1111. Introductory Biology: Cells and Molecules. 4 Credits.

Nutrition and metabolism, cellular and developmental biology, genetics, and molecular biology of plants and animals. Laboratory fee.

BISC 1112. Introductory Biology: The Biology of Organisms. 4 Credits.

Concepts and methods in the study of whole organisms. Evolutionary theory; population biology; diversity of plants, animals, fungi, and microorganisms; ecology and behavior; and animal structure and function. Laboratory fee.

BISC 2000. Sophomore Colloquium. 3 Credits.

Topics on biological diversity from the perspective of species and within the conceptual framework of evolutionary biology. The explanatory power, simplicity, and grandeur of evolution and its products. Consideration of how questions and hypotheses are empirically addressed. Restricted to sophomores, registration by department approval. Prerequisites: Bisc 1111 and Bisc 1112.

BISC 2202. Cell Biology. 3 Credits.

Structure and function of biological molecules and cellular organelles; cellular interactions. Prerequisite: BISC 1111– BISC 1112 except by permission of the instructor and one semester of organic chemistry.

BISC 2207. Genetics. 3 Credits.

Introduction to genetics, with emphasis on the integration of transmission of genetic traits and the molecular basis of gene action. Also includes cytogenetics, gene regulation, and examples of current applications of genetic technology. Prerequisites: BISC 1111, BISC 1112 or permission of the instructor.

BISC 2208. Genetics Laboratory. 1 Credit.

Study of genetic principles and genetic and molecular techniques in *Drosophila* and *E. coli*. Benchwork and comparative genomics using bioinformatics. Prerequisites: BISC 1111, BISC 1112, prior or concurrent enrollment in GEN 2207, or permission of instructor.

BISC 2213. Biology of Cancer. 3 Credits.**BISC 2214. Developmental Biology. 4 Credits.**

The molecular processes and cellular phenomena that result in the formation of organized tissues and functional organisms; formation of early body plan, cell type determination, organogenesis, morphogenesis, stem cells, cloning, and issues in human development. Prerequisites: BISC 1111 and BISC 1112 or permission of the instructor.

BISC 2220. Developmental Neurobiology. 3 Credits.

The molecular mechanisms that guide neural development: events surrounding the birth of neurons, how specific neurons are determined, how neurons find the correct targets, how cell death guides proper neural development, and how synapses are formed and maintained. Prerequisites: BISC 1111, BISC 1112 or permission of the instructor.

BISC 2305. Plant Biology. 3 Credits.

Plant metabolism and molecular biology: photosynthesis, nitrogen metabolism, membrane transport, mechanisms of hormone action, protein targeting, biotechnology, and current research topics. Prerequisites: BISC 1111, BISC 1112, CHEM 1111 and CHEM 1112; or permission of the instructor.

BISC 2318. Histology. 4 Credits.

Lecture (2 hours), laboratory (4 hours). Introduction to microscopical anatomy of normal tissues and organs with emphasis on the interrelationship of structure and function. Prerequisite: BISC 1111, BISC 1112 or permission of the instructor.

BISC 2320. Neural Circuits and Behavior. 3 Credits.

The cellular and molecular properties of neural circuits that form the basis of behavior. Circuit properties and behaviors across a variety of invertebrate and vertebrate taxa. Individual neuronal units, the organizational principles and emergent properties of neural circuits, and how these neuronal ensembles influence behavior.

BISC 2322. Human Physiology. 3 Credits.

Introduction to the function of organ systems of the human body. Prerequisites: CHEM 1111, CHEM 1112, BISC 1111, BISC 1112 or permission of the instructor.

BISC 2330. Invertebrate Zoology. 4 Credits.

Lecture (2 hours), laboratory (4 hours). General survey of invertebrate animals, including classification, morphology, physiology, embryology, and evolutionary relationships among phyla. Prerequisites: BISC 1111, BISC 1112 or permission of the instructor.

BISC 2331. Insect Biology. 3 Credits.

Overview of the class Insecta, focusing on insect external and internal morphology, classification, ecology/behavior, collection, and specimen preparation. Prerequisites: BISC 1111 and BISC 1112.

BISC 2332. Comparative Vertebrate Anatomy. 4 Credits.

Evolution and comparative morphology of phylum Chordata, stressing recent forms. Laboratory fee. Prerequisites: BISC 1111 and BISC 1112 or permission of the instructor.

BISC 2333. Evolution and Extinction of Dinosaurs. 3 Credits.

The 165-million-year history of dinosaurs; different groups and their evolution, end-Cretaceous extinction event, the origin of birds, and the biology of the group. Prerequisites: BISC 1111 and BISC 1112; or GEOL 1001 and GEOL 1002 or GEOL 1002 and GEOL 1005. Same as GEOL 2333.

BISC 2334W. Integrative Biology of Fishes. 3 Credits.

An introduction to concepts in anatomy, biomechanics, physiology, developmental biology, biomechanics and hydrodynamics, adaptive radiation, evolutionary biology, and ecology using fish as model organisms. Significant fish groups are covered, but emphasis is on exploring broader topics in which fish have figured prominently in research.

BISC 2335. Insect Biology Lab. 1 Credit.

An overview of insects, with an emphasis on ecology, behavior, economic importance, and the key adaptations that characterize the evolution of this diverse group. This lab will teach basic internal and external anatomy, field collection methods, insect identification, and discussion of the primary literature. Laboratory fee. Prerequisite: BISC 2331.

BISC 2337. Introductory Microbiology. 4 Credits.

Lecture (2 hours), laboratory (4 hours). Survey of the major groups of microorganisms with emphasis on structure, physiology, ecology, pathogenesis, and biotechnology. Antibiotic resistance and emerging diseases. Prerequisites: CHEM 1111, CHEM 1112, BISC 1111, BISC 1112, or permission of instructor.

BISC 2337W. Introductory Microbiology. 4 Credits.

Lecture (2 hours), laboratory (4 hours). Survey of the major groups of microorganisms with emphasis on structure, physiology, ecology, pathogenesis, and biotechnology. Antibiotic resistance and emerging diseases. Prerequisites: BISC 1111 and BISC 1112 and CHEM 1111 and CHEM 1112 or permission of the instructor.

BISC 2339. Parasitology. 4 Credits.

Introduction to animal parasitology; survey of parasitic types from protozoa through arthropods. Laboratory fee. Prerequisite: BISC 1111 and BISC 1112 or permission of the instructor.

BISC 2450. Organic Evolution. 3 Credits.

Synthetic theory of organic evolution, including population biology, speciation, adaptation, macroevolution, systematics, biogeography, and the geologic record. Prerequisites: BISC 1111, BISC 1112, or permission of instructor.

BISC 2451. History of Life. 3 Credits.

Overview of life through time; the origin of life, evolution of major groups of organisms, and important methodologies used in paleontology. Prerequisites: BISC 1111 and BISC 1112 or permission of the instructor. Same as GEOL 2151.

BISC 2452. Animal Behavior. 3 Credits.

An evolutionary approach to the study of animal behavior, emphasizing behavioral ecology and sociobiology. Prerequisite: BISC 1111 and BISC 1112 or permission of the instructor.

BISC 2453. Animal Behavior Lab. 1 Credit.

Demonstration of methods used in the study of animal behavior, including techniques of observation, basic statistical analysis, and experimental design. Field trips, discussion of research papers, and student-generated independent or small-group project. Prerequisites: BISC 1111, BISC 1112. Recommended background: Prior or concurrent enrollment in BISC 2452.

BISC 2454. General Ecology. 3 Credits.

The core concepts of the field of ecology across different hierarchical scales of ecological systems. Prerequisites: BISC 1111 and BISC 1112 or permission of the instructor.

BISC 2467. Marine Biology. 3 Credits.

Study of relationships between organisms and physical, chemical, and biological factors of the marine environment. Consideration of the open ocean and coastal ecosystems and human influences on them. Prerequisite: BISC 1111 and BISC 1112 or permission of the instructor.

BISC 2580. Biotechnology. 3 Credits.

Genetic engineering of bacteria, plants, and animals, including humans. Applications of modern biotechnology, especially in the field of medical biotechnology, such as gene therapy, xenotransplantation, and the Human Genome Project. Regulation, prospects, and social impact of biotechnology. Prerequisites: CHEM 2151, CHEM 2152, CHEM 2153, CHEM 2154, BISC 1111 and BISC 1112. Recommended background: BISC 2202 or BISC 2207.

BISC 2580W. Biotechnology. 3 Credits.

Genetic engineering of bacteria, plants, and animals, including humans. Applications of modern biotechnology, especially in the field of medical biotechnology, such as gene therapy, xenotransplantation, and the Human Genome Project. Regulation, prospects, and social impact of biotechnology. Prerequisites: BISC 1111, BISC 1112, CHEM 2151, CHEM 2152, CHEM 2153, and CHEM 2154. Recommended background: BISC 2202 or BISC 2207. Same as BISC 2580.

BISC 2581. Human Gross Anatomy. 3 Credits.

The structural organization of the human body and how it relates to regional and systems-based functions. Emphasis on the macroscopic structure of the body. Prerequisite: BISC 1111- BISC 1112 except by permission of the instructor. Same as ANAT 2181.

BISC 2583. Biology of Proteins. 3 Credits.

About half of the proteins in the human genome have unknown functions. Are some related to cancers, muscle degeneration, infectious disease? How can evolutionary relationships among proteins from other organisms help us discover functions of unknown proteins? Laboratory fee. Prerequisite: AP or IB Biology or Chemistry.

BISC 2584. Introduction to Bioinformatics. 3 Credits.

An introduction to the use of computational techniques in molecular biology, genetics, and evolution. Techniques and software for database searching, sequence alignment, gene finding, phylogenetics, genomics, and proteomics. Same as CSCI 3571. Prerequisite: BISC 1111- BISC 1112 except by permission of the instructor.

BISC 3122. Human Physiology. 3 Credits.

Introduction to the function of organ systems of the body. Prerequisites: BISC 1111, BISC 1112, CHEM 1111, CHEM 1112, and BISC 2207 or BISC 2202 or permission of instructor.

BISC 3123. Human Physiology Lab. 1 Credit.**BISC 3165. Biochemistry I. 3 Credits.**

Introduction to the chemistry of living cells; structure and function of proteins, lipids, carbohydrates, and nucleic acids; enzyme structure, mechanism, and regulation. Prerequisites: BISC 1111, BISC 1112, CHEM 2151 and CHEM 2152; course equivalents may be substituted for BISC 1111 and BISC 1112 at the discretion of the instructor. Same as CHEM 3165.

BISC 3166. Biochemistry II. 3 Credits.**BISC 3209. Molecular Biology. 4 Credits.**

Overview of theories, techniques, and procedures associated with molecular biology. The biosynthesis of DNA, RNA, and proteins; relationships among structure, function, and expression; and traditional and modern methods of gene and protein characterization and monitoring. Prerequisites: BISC 1111, BISC 1112, CHEM 1111, and CHEM 1112.

BISC 3210. Nanobiotechnology. 3 Credits.

Theory and application of nanotechnologies in biology and medicine. Strategies for studying the organization, function, and complexity of biological systems at nanometer scale. Several areas of research are covered, including high-resolution cellular and molecular imaging, spectroscopy, and optical tweezers. Prerequisites: BISC 2202 or BISC 3261 or permission of instructor and BISC 1111 and BISC 1112 or permission of the instructor.

BISC 3211. Nanobiotechnology Laboratory. 1 Credit.

Overview of techniques and approaches to studying complex biological interactions at nm scale. Prerequisite: BISC 3210 or permission of instructor and BISC 1111–BISC 1112 except by permission of the instructor. Laboratory fee.

BISC 3212. Immunology. 3 Credits.

Introduction to mammalian immunology covering the progression of immune responses from initial pathogen contact to immune memory. Applied topics include autoimmunity, transplantation, and the effects of HIV on the immune system. Prerequisites: BISC 1111, BISC 1112, BISC 2202, CHEM 2151, CHEM 2153. Recommended background: BISC 2207 or BISC 2322.

BISC 3261. Introductory Medical Biochemistry. 4 Credits.

Introduction to structures of biological macromolecules, enzyme catalysis, cellular bioenergetics, and metabolism. Same as BIOC 3261. Prerequisite: CHEM 2151–CHEM 2152. Credit toward the degree cannot be earned for this course and for CHEM 3165.

BISC 3262. Biochemistry Laboratory. 2 Credits.

Study of common experimental techniques used in life science laboratories to separate and characterize biological macromolecules. Same as BIOC 3262/ CHEM 3262. Prerequisite: BISC 3261 and BISC 1111–BISC 1112 except by permission of the instructor. Laboratory fee.

BISC 3263. Special Topics in Biochemistry. 2 Credits.

In-depth discussion of current biochemically relevant topics, including cancer and HIV chemotherapy, immune response, photosynthesis, signal transduction, hormone regulation, and nutrition. Topics vary by semester. May be repeated for credits provided topic differs. Consult the Schedule of Classes for more details. Prerequisites: BISC 1111, BISC 1112 and BISC 3261 or permission of the instructor. Same as BIOC 3263.

BISC 3320. Human Neurobiology. 3 Credits.

Introduction to the function of the human nervous system, gross and microscopic structure, and neurophysiology of the brain, spinal cord, and nerves; alterations caused by disease or injury. Prerequisite: BISC 1111 and BISC 1112; and BISC 2202 or BISC 3261.

BISC 3450. Evolutionary Medicine. 3 Credits.

The application of evolutionary principles, including natural selection, adaptation, phylogenetics, and evolutionary constraints, to understanding health, disease, and the biology of disease-causing organisms (viruses, bacteria, and parasites). How natural selection and phylogeny influence pathogen-host interactions, human genetics, immunology, development, cancer, and diseases of senescence. Prerequisites: BISC 1111 and BISC 1112. Recommended background: BISC 2207 and BISC 2450.

BISC 3450W. Evolutionary Medicine. 3 Credits.

The application of evolutionary principles, including natural selection, adaptation, phylogenetics, and evolutionary constraints, to understanding health, disease, and the biology of disease-causing organisms (viruses, bacteria, and parasites). How natural selection and phylogeny influence pathogen-host interactions, human genetics, immunology, development, cancer, and diseases of senescence. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: BISC 1111 and BISC 1112. Recommended background BISC 2207 and BISC 2450. Same as BISC 3450.

BISC 3458. Plant Comparative Structure and Function. 3 Credits.

Fundamental principles of how organisms are built, investigating trade-offs and coordination in design, how variation in structure influences physiological function in different ecological settings, and how relations among plants shape structure and function and responses to ecological gradients. Prerequisite: BISC 1111 and BISC 1112 or permission of instructor.

BISC 3459. Field Biology. 4 Credits.

Overview of the approaches and techniques used by contemporary field biologists for cataloging, quantifying, and comparing patterns of biodiversity across plants, animals, and fungi at multiple spatial and temporal scales. Prerequisites: BISC 1111 and BISC 1112. Recommended background: BISC 2454.

BISC 3460. Conservation Biology. 3 Credits.

Theory and practice of conserving biological diversity. Ecological patterns of biodiversity, biology of small populations, and conservation case studies. Use of ecological modeling software to explore various topics. Prerequisites: BISC 1111, BISC 1112 and BISC 2454; or permission of the instructor.

BISC 3461. Plant-Animal Interactions. 3 Credits.

Review of the major ecological and evolutionary interactions that occur between plants and animals in natural and managed ecosystems. Prerequisites: BISC 1111 and BISC 1112 or permission of the instructor. Recommended background: BISC 2450 or BISC 2454.

BISC 3462. Plant³/Animal Interactions Laboratory. 1 Credit.
Field and laboratory study of temperate interactions between plants and animals. Group projects focus on original data collection, analysis, and interpretation. Prerequisite or concurrent registration: BISC 3461 and BISC 1111– BISC 1112 except by permission of the instructor. Laboratory fee.

BISC 3463. Ecological and Evolutionary Genetics. 3 Credits.
An analysis of the ecological and genetic basis of evolutionary change. Topics include the organization and maintenance of genetic variation within and among natural populations, the genetic basis of complex traits, molecular ecology analyses, and genotype by environment interactions. Prerequisite: BISC 2450 or permission of instructor and BISC 1111– BISC 1112 except by permission of the instructor.

BISC 3464. Ecology and Evolution of Societies. 3 Credits.
Study of broadly important ecological and evolutionary patterns and processes exemplified by organisms that have undergone the major evolutionary transition to living in societies. Prerequisites: BISC 1111, BISC 1112. Recommended background: BISC 2454 or BISC 2454W.

BISC 4132. Advanced Cellular-Molecular Biology. 3 Credits.
An advanced cell biology course with emphasis on biochemistry and molecular biology; illustrations are drawn from different organisms and human biology. Oral and written analysis of research literature. For upper-level undergraduates and beginning graduate students. Restricted to Instructor approval required. Recommended background: Six credits in the Cellular and Molecular category.

BISC 4171. Undergraduate Research. 1-12 Credits.
Admission by permission of the staff member concerned. May be repeated for credit. Prerequisite: CHEM 2152 and BISC 1111– BISC 1112 except by permission of the instructor; 16 credit hours in biological science courses. Laboratory fee.

BISC 4171W. Undergraduate Research. 1-12 Credits.
Admission by permission of the staff member concerned. May be repeated for credit. Prerequisite: Chem 2152 and BISC 1111– BISC 1112 except by permission of the instructor; 16 credit hours in biological science courses. Laboratory fee.

BISC 4172. Independent Study. 1-3 Credits.
Prescribed reading list and consultations with staff advisor culminating in a written report and/or examination. Prerequisite: BISC 1111– BISC 1112 and permission of the instructor.

BISC 4173. Independent Study-Developmental Biology. 2 Credits.

BISC 4174. Independent Study-Organismic Biology. 2 Credits.

BISC 4175. Independent Study-Genetic/Evolutionary Biology. 2 Credits.

BISC 4176. Independent Study-Environmental Bio. 2 Credits.

BISC 4180. Undergraduate Research Seminar. 1 Credit.

BISC 6101. Responsible Research. 1 Credit.

This course provides an introduction to the ethical, social, and legal foundations of scientific practice. It is intended to provide a forum for graduate students and postdocs to discuss almost every aspect of the academic life of a scientist, except specific disciplinary topics that are treated in regular courses. Ensuring ethical conduct is an essential part of basic, applied, and clinical research, especially in the context of competitive, collaborative, and international settings so common nowadays. Students will be exposed to case studies typifying complex social, ethical, and legal dilemmas that may arise in the conduct of research.

BISC 6102. Scientific Presentation. 1 Credit.

This course allows students to perfect their Scientific Presentation skills. In this course, students will present, in front of peers and faculty, their current research projects and plans for future work leading towards a complete thesis or dissertation. Student presentations will be designed to address a general audience of biologists, containing sufficient background information to provide perspective insights into the fundamental questions being asked, and at the same time providing enough detail on technical issues and analytical procedures to allow evaluation of potential outcomes. The Class will provide a friendly forum for students to collect feedback and comments, to discuss project design, content, and general significance of their research.

BISC 6205. Current Topics in Cell Smith, Donaldson, Eleftherianos, Jeremic. 1-2 Credits.

May be repeated for credit. Prerequisite: BISC 2202 or BISC 3209.

BISC 6206. Current Topics in Evolutionary Ecology. 1-2 Credits.

May be repeated for credit.

BISC 6207. Seminar: Current Topics in Systematic Biology. 1-2 Credits.

Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit provided the topic differs. Prerequisite: BISC 6210.

BISC 6210. Methods of Study of Evolution. 4 Credits.

A rigorous and up-to-date treatment of the theory and methods of systematics, including phylogenetic inference and its applications in evolutionary biology. Laboratory fee. Prerequisite: BISC 2450 .

BISC 6211. Biogeography/Coevolution. 4 Credits.

Survey of methods, techniques, and theory in biogeography. Geological and paleontological aspects of biogeography; large-scale biogeographic patterns; speciation and phylogeography. Prerequisite: BISC 2451 or BISC 2452 or permission of the instructor.

BISC 6213. Descriptive Systematics: Documenting Biodiversity. 3 Credits.

Study of those aspects of systematic biology concerned with description and inventory of biodiversity. Prerequisite: BISC 6210.

BISC 6214. The Phylogenetic Basis of Comparative Biology. 3 Credits.

The use of phylogenetic hypotheses to study questions in evolutionary biology and ecology. Prerequisite: BISC 6210; STAT 1127 .

BISC 6215. Vertebrate Phylogeny. 4 Credits.

A survey of vertebrate diversity, emphasizing evolutionary relationships and adaptations of the major groups. Prerequisite: BISC 2450 ; BISC 2332 recommended.

BISC 6216. Morphological Systematics. 4 Credits.

Methods of studying organismal morphology as a means of inferring phylogeny, emphasizing the concept of homology. Laboratory includes techniques of observing, measuring, and imaging morphology in systematic biology, including morphometric methods. Laboratory fee. Prerequisite: BISC 6210 .

BISC 6218. Innate Immunity. 3 Credits.

Discussion of innate immune systems in a wide variety of organisms; from sponges to vertebrates plus higher plants. Prerequisite: BISC 3212; recommended BISC 2202, BISC 2207, BISC 3209, BISC 2330.

BISC 6219. Host-Microbe Interactions. 3 Credits.

Overview of the molecular, genetic, cellular, and physiological basis of symbiotic and pathogenic interactions between plants and invertebrate and vertebrate animals and various microbial organisms, including bacteria, fungi, and viruses. Prerequisites: Microbiology (BISC 2337). Recommended background: Intro to Immunology (BISC 3212); Cell Biology (BISC 2202); Invertebrate Zoology (BISC 2330); Parasitology (BISC 2339), or permission of instructor.

BISC 6224. Molecular Evolution. 3 Credits.**BISC 6225. Molecular Phylogenetics. 4 Credits.**

Review of molecular phylogenetic methods including data recovery, alignment, weighting, character optimization, and phylogenetic inference methods. Prerequisite: BISC 2207, BISC 2450, and BISC 6210.

BISC 6227. Seminar: Genetics. 3 Credits.

Review of selected topics in genetics, with emphasis on current literature; topics of special interest to participants encouraged. May be repeated for credit. Prerequisite: BISC 2207.

BISC 6228. Population Genetics. 3 Credits.

Origin, maintenance, and possible significance of genetic variation in populations. Selection, genetic drift, and population structure are emphasized. Both theoretical and applied aspects of population genetics are discussed. Same as FORS 6247. Prerequisite: BISC 2207.

BISC 6230. Human Genetics. 3 Credits.

Genetic mechanisms of transmission and expression of human traits, with emphasis on biochemical and cytogenetic aspects. Prerequisite: BISC 2207; previous course work in cell biology or cell biochemistry strongly recommended.

BISC 6243. Seminar: Ecology. 3 Credits.

In-depth study of selected topics, including reports on original publications. May be repeated for credit. Prerequisite: BISC 2454.

BISC 6249. Seminar: Developmental Biology. 3 Credits.

Discussion and reports on recent research on the endocrinological, genetic, and biochemical aspects of animal development. Prerequisite: a course in developmental biology or cell biology.

BISC 6251. Evolutionary Developmental Biology. 3 Credits.

Developmental mechanisms involved in the morphological changes that occur during the course of evolution.

BISC 6252. Seminar: Neurobiology. 3 Credits.

Study of current publications in functional neurobiology. May be repeated for credit with instructor's permission.

BISC 6274. Gene Regulation and Genetic Engineering. 3 Credits.

The control of gene expression as illustrated by several prokaryotic and eukaryotic model systems: discussions of recombinant DNA techniques. Prerequisite: BISC 2207.

BISC 6275. Introduction to Recombinant DNA Techniques. 3 Credits.

Lecture, 1 hour; laboratory, 4 hours. Basic techniques of genetic manipulation: cloning of genes, transformation of bacteria, PCR procedures, DNA sequencing, and other techniques. Prerequisite: BISC 2202 or BISC 2207 or BISC 2337 and permission of instructor. Laboratory fee.

BISC 6295. Research. 1-12 Credits.

Investigation of special problems. May be repeated for credit.

BISC 6998. Thesis Research. 3 Credits.**BISC 6999. Thesis Research. 3 Credits.****BISC 8998. Advanced Reading & Research. 1-12 Credits.**

Limited to students preparing for the Doctor of Philosophy general examination. May be repeated for credit.

BISC 8999. Dissertation Research. 3-12 Credits.

Limited to Doctor of Philosophy candidates. May be repeated for credit.

BACHELOR OF ARTS WITH A MAJOR IN BIOLOGY

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Prerequisite courses: BISC 1111 Introductory Biology: Cells and Molecules and BISC 1112 Introductory Biology: The Biology of Organisms or equivalent.

Required courses in related areas:

CHEM 1111 General Chemistry I

CHEM 1112 General Chemistry II

CHEM 2151 Organic Chemistry I

CHEM 2152 Organic Chemistry II

CHEM 2153 Organic Chemistry Laboratory I

CHEM 2154 Organic Chemistry Laboratory II

One of the following pairs of courses are strongly recommended but not required:

PHYS 1011 & PHYS 1012 General Physics I and General Physics II

PHYS 1021 & PHYS 1022 University Physics I and University Physics II

PHYS 1025 & PHYS 1026 University Physics I with Biological Applications and University Physics II with Biological Applications

3 credits of either mathematics or statistics (strongly recommended)

Required courses for the major—A minimum of 24 credits of upper-division courses, which must include at least 4 credits from each of the following and at least three courses with laboratory:

Cell and molecular biology

BISC 3209 Molecular Biology

BISC 3210 Nanobiotechnology

BISC 3211 Nanobiotechnology Laboratory

BISC 3212 Immunology

BISC 3213 Applied Immunology

BISC 3261 Introductory Medical Biochemistry

BISC 3262 Biochemistry Laboratory

BISC 3263 Special Topics in Biochemistry

BISC 3263W Special Topics in Biochemistry

BISC 2202 Cell Biology

BISC 2207 Genetics

BISC 2208 Genetics Laboratory

BISC 2213 Biology of Cancer

BISC 2214 Developmental Biology

BISC 2220 Developmental Neurobiology

Suborganismal and organismal biology

BISC 2318 Histology

BISC 2320 Neural Circuits and Behavior

BISC 2322 Human Physiology

BISC 2322W Human Physiology

BISC 2323 Human Physiology Laboratory

BISC 2330 Invertebrate Zoology

BISC 2332 Comparative Vertebrate Anatomy

BISC 2333 Evolution and Extinction of Dinosaurs

BISC 2334 Integrative Biology of Fishes

BISC 2337 Introductory Microbiology

BISC 2337W Introductory Microbiology

BISC 2339 Parasitology

BISC 3320 Human Neurobiology

BISC 3321 Comparative Endocrinology

BISC 3325 Environmental Physiology

Ecology and evolution

BISC 2450 Organic Evolution

BISC 2451 History of Life

BISC 2452 Animal Behavior

BISC 2454 General Ecology

BISC 2454W General Ecology

BISC 3458	Plant Comparative Structure and Function
BISC 3460	Conservation Biology
BISC 3461	Plant-Animal Interactions
BISC 3462	Plant/Animal Interactions Laboratory
BISC 3463	Ecological and Evolutionary Genetics

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, students must maintain a cumulative 3.5 grade-point average in biological sciences courses and at least a 3.0 cumulative overall grade-point average. Students who meet these criteria and wish to pursue special honors must complete an approved research project under faculty direction.

BACHELOR OF SCIENCE WITH A MAJOR IN BIOLOGY

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Prerequisite courses: BISC 1111 Introductory Biology: Cells and Molecules and BISC 1112 Introductory Biology: The Biology of Organisms or equivalent.

Required courses in related areas:

CHEM 1111 & CHEM 1112	General Chemistry I and General Chemistry II
CHEM 2151 & CHEM 2152	Organic Chemistry I and Organic Chemistry II
CHEM 2153 & CHEM 2154	Organic Chemistry Laboratory I and Organic Chemistry Laboratory II

One of the following:

PHYS 1011 & PHYS 1012	General Physics I and General Physics II
PHYS 1021 & PHYS 1022	University Physics I and University Physics II
PHYS 1025 & PHYS 1026	University Physics I with Biological Applications and University Physics II with Biological Applications

3 credits of either mathematics or statistics (this requirement cannot be satisfied by waiver)

Two years of an approved foreign language are strongly recommended but not required

Required courses for the major—A minimum of 30 credits of upper-division courses, which must include at least 4 credits from each of the following and at least three courses with laboratory:

Cell and molecular biology

BISC 2202	Cell Biology
BISC 2207	Genetics
BISC 2208	Genetics Laboratory
BISC 2213	Biology of Cancer
BISC 2214	Developmental Biology
BISC 3209	Molecular Biology
BISC 3210	Nanobiotechnology
BISC 3211	Nanobiotechnology Laboratory
BISC 3212	Immunology
BISC 3213	Applied Immunology
BISC 3261	Introductory Medical Biochemistry
BISC 3262	Biochemistry Laboratory
BISC 3263	Special Topics in Biochemistry
BISC 3263W	Special Topics in Biochemistry

Suborganismal and organismal biology

BISC 2318	Histology
BISC 2320	Neural Circuits and Behavior
BISC 2322	Human Physiology
BISC 2322W	Human Physiology
BISC 2323	Human Physiology Laboratory
BISC 2330	Invertebrate Zoology
BISC 2332	Comparative Vertebrate Anatomy
BISC 2333	Evolution and Extinction of Dinosaurs
BISC 2334	Integrative Biology of Fishes
BISC 2337	Introductory Microbiology

BISC 2337W	Introductory Microbiology
BISC 2339	Parasitology
BISC 3320	Human Neurobiology
BISC 3321	Comparative Endocrinology
BISC 3325	Environmental Physiology
Ecology and evolution	
BISC 2450	Organic Evolution
BISC 2451	History of Life
BISC 2452	Animal Behavior
BISC 2454	General Ecology
BISC 2454W	General Ecology
BISC 3458	Plant Comparative Structure and Function
BISC 3460	Conservation Biology
BISC 3461	Plant-Animal Interactions
BISC 3462	Plant/Animal Interactions Laboratory
BISC 3463	Ecological and Evolutionary Genetics
A maximum of 6 credits of research and independent study in biological sciences may be used as electives within the major.	

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with special honors, a student must maintain a cumulative 3.5 grade-point average in biological sciences courses and at least a 3.0 cumulative overall grade-point average. Students who meet these criteria and wish to pursue special honors must complete an approved research project under faculty direction.

COMBINED PROGRAM REQUIREMENTS

The Department of Biological Sciences offers a combined Bachelor of Science/Master of Science degree program in the field of biological sciences. The program allows students to take a specified number of graduate credits as part of their undergraduate degree, thereby decreasing the number of credits normally required for the master's degree.

Students interested in the combined degree program should confer with the department's graduate advisor early in their junior year. For more information visit the program website

(<http://biology.columbian.gwu.edu/undergraduate-degree-programs-syllabi>).

MINOR IN BIOLOGY REQUIREMENTS

Prerequisites:

BISC 1111 Introductory Biology: Cells and Molecules

BISC 1112 Introductory Biology: The Biology of Organisms

Required:

12 credits of BISC courses at the 2000-3000 level

MASTER OF SCIENCE IN THE FIELD OF BIOLOGICAL SCIENCES REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

30 credits, including 24 credits in approved course work and 6 credits in thesis; or, with departmental approval, 36 credits in approved course work without thesis. All students must pass a Master's Comprehensive Exam.

DOCTOR OF PHILOSOPHY IN THE FIELD OF BIOLOGICAL SCIENCES REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

The requirements for the Doctor of Philosophy Program (p. 71).

The required curriculum as outlined below:

The program of study and fields of study are determined in consultation with an advisory committee appointed for each candidate.

Major research fields

- Cell and molecular biology
- Systematics
- Evolution
- Ecology

BIOMEDICAL SCIENCES

The interdisciplinary doctoral programs in the biomedical sciences are organized within the Institute for Biomedical Sciences. The first full year of study toward the Ph.D. programs in biochemistry and systems biology, microbiology and immunology, and molecular medicine is offered through the Institute. All programs are taken on a full-time basis. Faculty are drawn from the Columbian College of Arts and Sciences and the School of Medicine and Health Sciences, including scientists from the Children's Research Institute of Children's National Health System.

Students are admitted directly into the Institute for Biomedical Sciences through the Columbian College of Arts and Sciences. At the end of the first year of study, a student selects one of the three Ph.D. fields (i.e., biochemistry and systems biology, microbiology and immunology, or molecular medicine) and completes remaining degree requirements in the selected program.

GRADUATE

Doctoral programs

- Doctor of Philosophy in the field of biochemistry and systems biology (p. 128)
- Doctor of Philosophy in the field of microbiology and immunology (p. 129)
- Doctor of Philosophy in the field of molecular medicine (p. 130)

FACULTY

Committee on Biomedical Sciences L. Werling (Director), A. Chiaramello, A. Colberg-Poley, R.P. Donaldson, V. Gallo, E. Hoffman, A. Jeremic, D. Mendelowitz, N. Lee, D. Leitenberg, M. Rose

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students

- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
- Biomedical Sciences (BMSC) (p. 925)
- Microbiology (MICR) (p. 1204)
- Molecular Medicine (MMED) (p. 1205)
- Pharmacology (PHAR) (p. 1221)

DOCTOR OF PHILOSOPHY IN THE FIELD OF BIOCHEMISTRY AND SYSTEMS BIOLOGY

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Prerequisite: A bachelor's degree in biological sciences, chemistry, or a related field.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

The requirements for the Doctor of Philosophy Program (p. 71).

The biomedical sciences core curriculum consists of:

BMSC 8210	Genes to Cells
BMSC 8212	Developmental Cell Biology and Systems Physiology
BMSC 8216	Career Skills for the Biomedical Sciences
BMSC 8217	Career Skills for the Biomedical Sciences
BMSC 8218	Career Skills for the Biomedical Sciences

3 credits of the following:

BMSC 8215	Lab Rotations
-----------	---------------

Coursework must include:

Biomedical sciences core curriculum	
BMSC 8230	Molecular Basis of Human Disease
BMSC 8231	Advanced Proteomics Methods and Applications
BMSC 8233	Integrative Bioinformatics

BMSC 8234	Seminar in Systems Biology
Recommended electives include:	
PHAR 6205	Pharmacology
BIOC 6234	Biochemical and Bioinformatic Approaches to Protein Structure and Function
MMED 8281	Molecular Pharmacology and Neurobiology of Excitable Tissues
MICR 6230	Molecular & Cellular Immunology
BMSC 8235	Applied Biostatistics for Basic Research

Research fields

- Molecular basis of inherited muscle and CNS disease utilizing DNA gene chip technology
- Genomic, epigenetic, metabolomic, and bioinformatic analyses
- Biomarkers
- Mechanistic pathways, genomics, proteomics, clinical medicine
- Autoimmune and inflammatory responses in disease
- Co-regulator biology
- Cancer

DOCTOR OF PHILOSOPHY IN THE FIELD OF MICROBIOLOGY AND IMMUNOLOGY

REQUIREMENTS

The following requirements must be fulfilled: Curriculum requirements listed below and all other requirements for the Doctor of Philosophy Program (p. 71).

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Core curriculum

BMSC 8210	Genes to Cells
BMSC 8212	Developmental Cell Biology and Systems Physiology
BMSC 8216	Career Skills for the Biomedical Sciences
BMSC 8217	Career Skills for the Biomedical Sciences
BMSC 8218	Career Skills for the Biomedical Sciences

3 credits in

BMSC 8215	Lab Rotations
-----------	---------------

Microbiology and immunology courses

MICR 8210	Infection and Immunity
MICR 8230	Molecular and Cellular Immunology

One approved statistics course

One of the following courses

ANAT 6160	Clinically Oriented Human Functional Neuroanatomy
BMSC 8230	Molecular Basis of Human Disease
PHAR 6116	Pharmacogenomics and Personalized Medicine

Minimum 24 credits in elective courses

Recommended electives include:	
BIOC 6234	Biochemical and Bioinformatic Approaches to Protein Structure and Function
BMSC 8231	Advanced Proteomics Methods and Applications
BMSC 8233	Integrative Bioinformatics
MICR 6212	Pathogenic Bacteriology
MICR 6233	Virology
MICR 6236	Fdmntls/Geonomics&Proteomics I
MICR 8270	Advanced Topics in Immunology
MICR 8998	Advanced Reading and Research
MMED 8221	The Basic Science of Oncology
MMED 8222	Molecular Oncology

Minimum 12 credits in

MICR 8999	Dissertation Research
-----------	-----------------------

Research fields

- Inflammatory responses
- Tumor immunology
- Vaccines
- Host- pathogen interaction
- Asthma
- Allergy

- Molecular virology
- Parasitology
- HIV

DOCTOR OF PHILOSOPHY IN THE FIELD OF MOLECULAR MEDICINE

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

The requirements for the Doctor of Philosophy Program (p. 71).

Prerequisite: a bachelor's degree in chemistry, biological sciences, or an approved related field.

The biomedical sciences core curriculum:

BMSC 8210	Genes to Cells
-----------	----------------

BMSC 8212	Developmental Cell Biology and Systems Physiology
-----------	---

BMSC 8216	Career Skills for the Biomedical Sciences
-----------	---

BMSC 8217	Career Skills for the Biomedical Sciences
-----------	---

BMSC 8218	Career Skills for the Biomedical Sciences
-----------	---

3 credits of the following:

BMSC 8215	Lab Rotations
-----------	---------------

Neuroscience specialization:

First-year required courses

ANAT 6160	Clinically Oriented Human Functional Neuroanatomy
-----------	---

and one of the following:

BMSC 8230	Molecular Basis of Human Disease
-----------	----------------------------------

PHAR 6116	Pharmacogenomics and Personalized Medicine
-----------	--

MICR 8210	Infection and Immunity
-----------	------------------------

Second-year required courses

MMED 8214	Molecular Medicine Seminar (taken twice)
-----------	--

MMED 8281	Molecular Pharmacology and Neurobiology of Excitable Tissues
-----------	--

MMED 8282	Neural Development and Neurodevelopmental Disorders
-----------	---

MMED 8283	Current Topics in Neuroscience
-----------	--------------------------------

Elective courses

MMED 8221	The Basic Science of Oncology
-----------	-------------------------------

MMED 8222	Molecular Oncology
-----------	--------------------

PHAR 6205	Pharmacology
-----------	--------------

MMED 8998	Advanced Reading and Research
-----------	-------------------------------

Oncology specialization:

First-year required courses

Two of the following

BMSC 8230	Molecular Basis of Human Disease
-----------	----------------------------------

PHAR 6116	Pharmacogenomics and Personalized Medicine
-----------	--

MICR 8210	Infection and Immunity
-----------	------------------------

ANAT 6160	Clinically Oriented Human Functional Neuroanatomy
-----------	---

Second-year required courses

MMED 8214	Molecular Medicine Seminar (taken twice)
-----------	--

MMED 8221	The Basic Science of Oncology
-----------	-------------------------------

MMED 8222	Molecular Oncology
-----------	--------------------

Elective courses

MMED 8281	Molecular Pharmacology and Neurobiology of Excitable Tissues
-----------	--

MMED 8282	Neural Development and Neurodevelopmental Disorders
-----------	---

MMED 8283	Current Topics in Neuroscience
-----------	--------------------------------

MMED 8999	Dissertation Research
-----------	-----------------------

PHAR 6205	Pharmacology
-----------	--------------

Pharmacology specialization:

First-year required courses

PHAR 6116 Pharmacogenomics and Personalized Medicine

One of the following

BMSC 8230 Molecular Basis of Human Disease

MICR 8210 Infection and Immunity

ANAT 6160 Clinically Oriented Human Functional Neuroanatomy

Second-year required courses

MMED 8214 Molecular Medicine Seminar (taken twice)

PHAR 6205 Pharmacology

Elective courses

MMED 8281 Molecular Pharmacology and Neurobiology of Excitable Tissues

MMED 8282 Neural Development and Neurodevelopmental Disorders

MMED 8283 Current Topics in Neuroscience

MMED 8221 The Basic Science of Oncology

MMED 8222 Molecular Oncology

MMED 8998 Advanced Reading and Research

Electives for all specializations

BMSC 8231 Advanced Proteomics Methods and Applications

BMSC 8233 Integrative Bioinformatics

BMSC 8234 Seminar in Systems Biology

BMSC 8235 Applied Biostatistics for Basic Research

BMSC 8237 Muscle: Health and Disease

MICR 6212 Pathogenic Bacteriology

MICR 6230 Molecular & Cellular Immunology

MICR 6233 Virology

MICR 6236 Fdmtls/Genomics&Proteomics I

MICR 8270 Advanced Topics in Immunology

HSCI 6263 Biostatistics Transl Research

PHAR 6206 Advanced Pharmacology

Research fields

- Neuroscience—developmental neurobiology, neurodevelopmental disorders, white matter diseases, neurobehavioral disorders of childhood, brain injury and recovery, sensory processing, neurotransmitter systems, neurological channelopathies
- Oncology—cancer chemotherapy and mechanisms of resistance, tumor cell biology and metabolism, gene regulation, oncogenes and tumor suppressor genes, growth factors, immunotherapy, development of immunological and molecular markers for diagnosis and detection, tumor immunology, epidemiology and prevention, cancer and AIDS, mechanisms of metastasis, transgenic models of cancer, genomics and proteomics
- Pharmacology—neuropharmacology, cardiovascular physiology and pharmacology, biochemical and molecular pharmacology, molecular, genomic, and computational approaches for elucidating genetic networks underlying disease processes, such as cancer progression (i.e., metastatic potential, epithelial-mesenchymal transition)

BIOSTATISTICS

The Columbian College of Arts and Sciences offers the degrees of Master of Science and Doctor of Philosophy in the field of biostatistics. The School of Public Health and Health Services collaborates with the Department of Statistics and the Biostatistics Center in these degree programs.

GRADUATE

Master's program

- Master of Science in the field of biostatistics (p. 132) (Jointly administered by the Department of Statistics in CCAS and the Department of Epidemiology and Biostatistics in SPH)

Doctoral program

- Doctor of Philosophy in the field of biostatistics (p. 133) (Jointly administered by the Department of Statistics in CCAS and the Department of Epidemiology and Biostatistics in SPH)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

BIOS 6295. Reading and Research. 1-12 Credits.
May be repeated for credit.

BIOS 6998. Thesis Research. 3 Credits.

BIOS 6999. Thesis Research. 3 Credits.

BIOS 8998. Advanced Reading and Research. 1-12 Credits.
Limited to students preparing for the Doctor of Philosophy general examination. May be repeated for credit.

BIOS 8999. Dissertation Research. 3-12 Credits.
Limited to Doctor of Philosophy candidates. May be repeated for credit.

MASTER OF SCIENCE IN THE FIELD OF BIOSTATISTICS

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

Minimum Prerequisite Courses for Admission Consideration (or equivalents to these GW courses)

The courses listed below (or equivalents) are prerequisites for admission consideration, and MUST appear on your transcript. Submit your MS Biostatistics program admission application only after you have completed all of the following courses:

MATH 1231	Single-Variable Calculus I
MATH 1232	Single-Variable Calculus II
STAT 2118	Regression Analysis

Additional Course Requirements

The courses listed below are "Additional Course Requirements." Applicants lacking these courses (or equivalents to these GW courses) will be considered for admission, but, if admissible, will be admitted conditionally with the expectation that these courses will be satisfactorily completed within two semesters following matriculation in the program. These credits do not count as credit toward the 33 credit graduation requirement, nor are grades earned in these additional courses reflected in the overall grade point average.

MATH 2184	Linear Algebra I
MATH 2233	Multivariable Calculus

One of the following:

STAT 1129	Introduction to Computing
-----------	---------------------------

STAT 2183	Intermediate Stat Lab/Packages
PUBH 6249	StatPackages/DataMgt&DataAnlys

Program Requirements

Required core courses:

Required statistics core courses:	
STAT 6201	Mathematical Statistics I
STAT 6202	Mathematical Statistics II
STAT 6210	Data Analysis
STAT 6227	Survival Analysis
PUBH 6265	Design of Medical Studies
PUBH 6266	Biostatistical Methods (Basis for Master's Comprehensive Examination)

Required public health core courses:

PUBH 6001	BiologicalConcepts/PublicHlth
PUBH 6003	Prin & Practice/Epidemiology
PUBH 6299	Topics in Epi/Bio

Approved elective courses:

6 credits from the following:	
Approved statistics elective courses:	
STAT 3187	Introduction to Sampling
STAT 4181	Applied Time Series Analysis
STAT 4188	Nonparametric Stat Inference
STAT 6215	Applied Multivariate Analysis I
STAT 6216	Applied Multivariate Analysis II
STAT 6217	Design of Experiments
STAT 6223	Bayesian Statistics: Theory and Applications
STAT 6231	Contingency Table Analysis
STAT 6242	Regression Graphics/Nonparametric Regression
STAT 6287	Modern Theory of Sample Surveys
STAT 8226	Advanced Biostatistical Methods
STAT 8265	Multivariate Analysis

STAT 8273	Stochastic Processes I
STAT 8281	Advanced Time Series Analysis
STAT 8288	Modern Theory/Sample Surveys
Approved public health elective courses:	
PUBH 6004	Environmental and Occupational Health in a Sustainable World
PUBH 6006	Mgt & Policy Approaches to PH
PUBH 6121	Environmental and Occupational Epidemiology
PUBH 6242	ClinicalEpid&Decision Analysis
PUBH 6244	Cancer Epidemiology
PUBH 6245	InfectiousDisease Epidemiology
PUBH 6246	InjuryEpidemiology&Prevention
PUBH 6248	EpidMethods/OlderPopulations
PUBH 6250	Epidemiology of HIV/AIDS

Consulting

PUBH 6258	Adv Topics/Biostat Consulting
PUBH 6283	Biostatistics Consulting Practicum

The Master's Comprehensive Examination

The Master's Comprehensive Examination is a written comprehensive examination in the field of Biostatistics and is based on the course content PUBH 6266 Biostatistical Methods. It is administered by the faculty from the Department of Epidemiology and Biostatistics in the Milken Institute School of Public Health.

DOCTOR OF PHILOSOPHY IN THE FIELD OF BIOSTATISTICS

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

The requirements for the Doctor of Philosophy Program (p. 71).

Undergraduate course requirements (or equivalents to these GW courses) for admission consideration:

MATH 1231	Single-Variable Calculus I
MATH 1232	Single-Variable Calculus II
STAT 2118	Regression Analysis
MATH 2233	Multivariable Calculus

Additional course requirements* (or equivalents to these GW courses):

MATH 2184	Linear Algebra I
-----------	------------------

One of the following:

STAT 1129	Introduction to Computing
STAT 2183	Intermediate Stat Lab/Packages
PUBH 6249	StatPackages/DataMgt&DataAnlys

* Applicants lacking these courses (or equivalents to these GW courses) will be considered for admission, but, if admissible, will be admitted conditionally with the expectation that these courses will be satisfactorily completed within two semesters following matriculation in the program. These credits do not count as credit toward the 72-credit graduation requirement nor are grades earned in additional courses reflected in the overall grade-point average.

Ph.D. in the field of biostatistics degree requirements: 72 credits of coursework and research, with a minimum of 51 credits of courses and a minimum of 12 credits of dissertation research.

Required statistics and public health core courses:

Required statistics core courses: 27 credits	
STAT 6201	Mathematical Statistics I
STAT 6202	Mathematical Statistics II (* Comprehensive Exam)
STAT 6210	Data Analysis
STAT 6213	Intermediate Probability and Stochastic Processes (* Comprehensive Exam)
PUBH 8365	Design of Medical Studies
PUBH 8366	Biostatistical Methods (* Comprehensive Exam)
STAT 8226	Advanced Biostatistical Methods
STAT 6227	Survival Analysis
STAT 8263	Advanced Statistical Theory I

Required public health core courses: 12 credits

PUBH 6001 Biological Concepts/Public Hlth

PUBH 6003 Prin & Practice/Epidemiology

PUBH 6121 Environmental and Occupational Epidemiology

One of the following:

PUBH 6299 Topics in Epi/Bio

PUBH 6007 Social & Behavior Appr-Pub. Hlth

or PUBH 6006 Mgt & Policy Approaches to PH

PUBH 6006 Mgt & Policy Approaches to PH

9 credits from the following approved elective courses:

Approved statistics elective courses (at least 3 credits must be taken from among the first 3 courses noted below):

STAT 6214 Applied Linear Models

STAT 6231 Contingency Table Analysis

STAT 8262 Nonparametric Inference

STAT 6207 Methods of Statistical Computing I

STAT 6208 Methods of Statistical Computing II

STAT 6215 Applied Multivariate Analysis I

STAT 6216 Applied Multivariate Analysis II

STAT 6217 Design of Experiments

STAT 6218 Linear Models

STAT 6223 Bayesian Statistics: Theory and Applications

STAT 6242 Regression Graphics/Nonparametric Regression

STAT 6287 Modern Theory of Sample Surveys

STAT 6289 Topics in Statistics

STAT 8257 Probability

STAT 8258 Distribution Theory

STAT 8263 Advanced Statistical Theory I

STAT 8264 Advanced Statistical Theory II

STAT 8265 Multivariate Analysis

STAT 8273 Stochastic Processes I

STAT 8274 Stochastic Processes II

STAT 8281 Advanced Time Series Analysis

STAT 8288 Modern Theory/Sample Surveys

BIOS 8998 Advanced Reading and Research (see advisor)

Approved public health elective courses:

PUBH 6242 Clinical Epid & Decision Analysis (recommended)

PUBH 6245 Infectious Disease Epidemiology

PUBH 8419 Measurement in Public Health & Health Services

Consulting:

Note: May be waived by the Biostatistics Program Director, based on written documentation of prior equivalent coursework or relevant work experience. Waiver of the consulting course increases the total number of electives by the number of consulting credits waived.

PUBH 6258 Adv Topics/Biostat Consulting

PUBH 6283 Biostatistics Consulting Practicum

Dissertation research:

12-24 credits of the following:

BIOS 8999 Dissertation Research

General and final examinations

The General Examination is given in two parts:

- Part I is a written comprehensive examination based on the course content of STAT 6202 Mathematical Statistics II, STAT 6213 Intermediate Probability and Stochastic Processes (administered by faculty of the Department of Statistics), and PUBH 6266 Biostatistical Methods (administered by the faculty of the Department of Epidemiology and Biostatistics). Students are expected to take the comprehensive examination within 24 months from the date of enrollment in the program. In addition, students are required to make up any deficiencies prior to taking the examination, e.g., by enrolling in appropriate master's-level courses as needed. A student who fails to pass the comprehensive examination may, with the approval of the faculty, repeat the examination the following year. Failure on the second attempt will result in termination from the Ph.D. program.
- Part II, the research proposal, consists of an oral examination based on a written dissertation research proposal. As soon as feasible after successful completion of the comprehensive exam, students are encouraged

to identify a dissertation advisor and a topic of research. The written dissertation proposal is then submitted to the student's Dissertation Research Committee, and the student will make an oral presentation of his or her proposal to the Committee. The Committee will determine the student's readiness to pursue and successfully complete the proposed research, in addition to the appropriateness of the specific problem for dissertation-level research.

Upon successful completion of the required coursework and both parts of the General Examination, the candidate will generally be recommended to the Associate Dean for Graduate Affairs of The Columbian College of Arts and Sciences (CCAS) for promotion to Ph.D. Candidacy: the dissertation research. A candidate must file an approved dissertation research plan with the CCAS before being admitted to Ph.D. Candidacy. Prior to completion of the General Examination, a student may register for at most 6 credits of BIOS 8999 Dissertation Research.

Consult with the biostatistics program director or academic advisor for the dissertation guidelines.

Professional enhancement requirement: 8 hours

Professional enhancement activities supplement the academic curriculum and help prepare students to participate actively in the professional community. They enhance practical knowledge and awareness of public health issues – either in general or in a student's specific area of study.

Students can fulfill this requirement by attending workshops, seminars, or other relevant professional meetings, which are often held at SPH and in the metropolitan Washington, DC area. Examples of conference sponsors include the National Academy for State Health Policy, the Pan American Health Organization, the American Public Health Association, the American College of Healthcare Executives, the Area Health Education Center, the American College of Sports Medicine, and the National Athletic Trainer's Association. Opportunities for professional enhancement are regularly publicized via the SPH Listserv and through the department or the biostatistics academic advisor.

Students must submit documentation of professional enhancement activities to the biostatistics academic advisor, which includes a **prior** approval, a description of the program agenda, and proof of attendance before applying for graduation.

CHEMISTRY

Part of the Columbian College of Arts and Sciences, the Chemistry Department has a history that traces back to the very founding of the University. Bridging the sciences of biology and geology and the science of physics, chemistry is the central science that studies the composition, structure, properties, and behavior of matter at a molecular level. The department has

a proud tradition of innovation and engagement in teaching, research, and service to its discipline. An intimate, stimulating intellectual environment of chemistry and interdisciplinary research and scholarship pervades the department, engaging students and faculty in a collaborative setting to address research problems of contemporary importance, focusing on biomolecular chemistry, energy and the environment, and materials chemistry.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in chemistry (p. 139)
- Bachelor of Science with a major in chemistry (p. 140)
- Combined Bachelor of Science with a major in chemistry/ Master of Forensic Sciences with a concentration in forensic chemistry (p. 144)

Minor

- Minor in chemistry (p. 144)

GRADUATE

Master's programs

- Master of Science in the field of chemistry (p. 144)
- Master of Science in the field of environmental and green chemistry (p. 145) (p. 144)

Doctoral program

- Doctor of Philosophy in the field of chemistry (p. 146)

FACULTY

Professors C.L. Cahill, M. King (Chair), S. Licht, J.H. Miller, D.E. Ramaker (Research), A. Vertes

Associate Professors M.A. Massiah, V. Sadtschenko, H.H. Teng, M.J. Wagner, M.G. Zysmilich

Assistant Professors H. Chen, C.S. Dowd, S. Gillmor, L.M. McClary, P. Nemes, A.M. Voutchkova

Professorial Lecturers E. Libelo, C. Woytowicz

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students

- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CHEM 1000. Dean's Seminar. 3 Credits.

Contemporary topics in chemistry.

CHEM 1003. Contemporary Science for Nonscience Majors. 3 Credits.

Contemporary topics in physical, biological, and medical science. Chem 1003 is not prerequisite to Chem 1004.

Laboratory fee.

CHEM 1004. Contemporary Science for Nonscience Majors. 3 Credits.

Continuation of CHEM 1003. Contemporary topics in physical, biological, and medical science. Chem 1003 is not prerequisite to Chem 1004. Laboratory fee.

CHEM 1111. General Chemistry I. 4 Credits.

Atomic structure and properties; stoichiometry; gas, liquid, and solid state; chemical bonding; solutions; chemical kinetics and equilibria; thermodynamics; acids and bases; electrochemistry; descriptive chemistry. Prerequisite: one year of high school algebra. Laboratory fee.

CHEM 1112. General Chemistry II. 0-4 Credits.

Continuation of CHEM 1111. Atomic structure and properties; stoichiometry; gas, liquid, and solid state; chemical bonding; solutions; chemical kinetics and equilibria; thermodynamics; acids and bases; electrochemistry; descriptive chemistry. Prerequisite: CHEM 1111. Laboratory fee.

CHEM 2010. History of Chemistry. 2,3 Credits.

CHEM 2085. Environmental Chemistry. 3 Credits.

Chemistry and physics of the environment, with emphasis on water and air pollution; environmental analysis and modeling and their limitations.

CHEM 2122. Introductory Quantitative Analysis. 3 Credits.

Theory and practice of quantitative analysis by modern methods; evaluation of analytical data emphasizing detection and correction of experimental errors. Correlated with CHEM 2123. Prerequisite: CHEM 1112.

CHEM 2123. Introductory Quantitative Analysis Laboratory. 1 Credit.

Laboratory complement to CHEM 2122. Prerequisite or concurrent registration: CHEM 2122. Laboratory fee.

CHEM 2123W. Introductory Quantitative Analysis Laboratory. 1 Credit.

Laboratory complement to CHEM 2122. Prerequisite or concurrent registration: CHEM 2122. Laboratory fee.

CHEM 2151. Organic Chemistry I. 3 Credits.

Systematic treatment of the structure, preparation, properties, and reactions of the principal classes of organic compounds. Fundamental principles of stereochemistry, reaction mechanisms, and spectroscopic methods of analysis. Prerequisite to CHEM 2151: CHEM 1112.

CHEM 2152. Organic Chemistry II. 3 Credits.

Continuation of CHEM 2151. Systematic treatment of the structure, preparation, properties, and reactions of the principal classes of organic compounds. Fundamental principles of stereochemistry, reaction mechanisms, and spectroscopic methods of analysis. Prerequisite to CHEM 2152: CHEM 2151.

CHEM 2153. Organic Chemistry Laboratory I. 1 Credit.

Laboratory complement of CHEM 2151. Introduction to and practice in basic skills of synthesis, separation, purification, and identification of organic compounds. Prerequisite or concurrent registration: CHEM 2151. Laboratory fee.

CHEM 2154. Organic Chemistry Laboratory II. 1 Credit.

Continuation of CHEM 2153. Laboratory complement of CHEM 2152. Introduction to and practice in basic skills of synthesis, separation, purification, and identification of organic compounds. Prerequisite or concurrent registration: CHEM 2152. Prerequisite: CHEM 2153. Laboratory fee.

CHEM 3140. Geochemistry. 3 Credits.

Chemical systems and processes on the planet Earth; origins and interactions among and within the Earth's lithosphere, oceans, and atmosphere; origin, distribution, and behavior of the elements; radioactive and stable isotope systems. Aqueous geochemistry; geochemical cycles. Same as GEOL 3140. Prerequisite: GEOL 1001 or GEOL 1005; CHEM 1111-CHEM 1112.

CHEM 3143. Aqueous Geochemistry. 3 Credits.

Same as Geol 143.

CHEM 3165. Biochemistry I. 3 Credits.

Introduction to the chemistry of living cells; structure and function of proteins, lipids, carbohydrates, and nucleic acids; enzyme structure, mechanism, and regulation. Prerequisite: CHEM 2151; credit toward the degree cannot be earned for CHEM 3165 and for BIOC 3261/ BISC 3261.

CHEM 3166. Biochemistry II. 3 Credits.

Continuation of CHEM 3165. Introduction to the chemistry of living cells; structure and function of proteins, lipids, carbohydrates, and nucleic acids; enzyme structure, mechanism, and regulation. CHEM 3165 is prerequisite to CHEM 3166. Credit toward the degree cannot be earned for CHEM 3166 and for BIOC 3263/ BISC 3263.

CHEM 3166W. Biochemistry II. 3 Credits.

Continuation of CHEM 3165. Introduction to the chemistry of living cells; structure and function of proteins, lipids, carbohydrates, and nucleic acids; enzyme structure, mechanism, and regulation. CHEM 3165 is prerequisite to CHEM 3166. Credit toward the degree cannot be earned for CHEM 3166 and for BIOC 3263/ BISC 3263.

CHEM 3170. Introduction to Physical Chemistry. 3 Credits.

Thermodynamics, chemical and physical equilibria, kinetics, and spectroscopy. Examples taken from biological systems. Not open to chemistry majors. May not be taken for credit by students who have received credit for CHEM 3171- CHEM 3172 or an equivalent course. Prerequisites: CHEM 1111- CHEM 1112; MATH 1231; PHYS 1012 or PHYS 1022 or PHYS 1026; or permission of instructor.

CHEM 3171. Physical Chemistry I. 3 Credits.

Gas laws, chemical thermodynamics, chemical equilibrium, kinetics, quantum chemistry, atomic and molecular spectra, structure of solids, liquids, and macromolecules. Prerequisite: CHEM 1112; MATH 1231; PHYS 1022; or permission of instructor.

CHEM 3172. Physical Chemistry II. 3 Credits.

Continuation of CHEM 3171. Gas laws, chemical thermodynamics, chemical equilibrium, kinetics, quantum chemistry, atomic and molecular spectra, structure of solids, liquids, and macromolecules. Prerequisite: CHEM 3171.

CHEM 3173. Physical Chemistry Laboratory. 2 Credits.

Laboratory complement to CHEM 3171 and CHEM 3172. Exploration of molecular structure and bonding as revealed through observation. Laboratory fee. Prerequisites: CHEM 2123 and CHEM 3171; or corequisite: CHEM 2123 and CHEM 3171.

CHEM 3262. Biochemistry Laboratory. 2 Credits.

Study of common experimental techniques used in life science laboratories to separate and characterize biological macromolecules. Same as BIOC 3261/ BISC 3261. Prerequisite: CHEM 3165 or BIOC 3261/ BISC 3261. Laboratory fee.

CHEM 3263W. Special Topics in Biochemistry. 2 Credits.**CHEM 3564. Lipid Biotechnology. 0-2 Credits.**

Study of common experimental techniques used in life science laboratories to separate and characterize biological macromolecules. Same as BIOC 3261/ BISC 3261. Prerequisite: CHEM 3165 or BIOC 3261/ BISC 3261. Laboratory fee.

CHEM 4113. Chemical Instrumentation. 3 Credits.

Electronic analog measurements and control of electrical quantities in chemical instrumentation; digital and analog data conversion and optimization of electronic measurements in chemical instrumentation; computer interfacing and programming using PC-based systems. Prerequisite: CHEM 3172 and CHEM 4122. Laboratory fee.

CHEM 4122. Instrumental Analytical Chemistry. 3 Credits.

Theory of instrumental methods in qualitative and quantitative analysis, determination of structure, with emphasis on atomic and molecular spectrophotometry, infrared spectroscopy, nuclear magnetic resonance, mass spectrometry, chromatography, and electroanalysis. Prerequisite or concurrent registration: CHEM 3171 or permission of instructor. Correlated with CHEM 4123.

CHEM 4123. Instrumental Analytical Chemistry Laboratory. 2 Credits.

Laboratory complement to CHEM 4122. Prerequisite or concurrent registration: CHEM 3171 and CHEM 4122. Laboratory fee.

CHEM 4134. Descriptive Inorganic Chemistry. 3 Credits.

Emphasis on periodic trends and structure and reactivity of transitional metal complexes. Prerequisite: CHEM 2122.

CHEM 4195. Undergraduate Research. 1-3 Credits.

Research on problems approved by the staff. Approval must be obtained prior to registration. A final written report on the work is required. For students requesting Special Honors in chemistry, a poster or oral presentation is also required. May be repeated for credit. Majors are encouraged to take the course for two semesters. Laboratory fee.

CHEM 4195W. Undergraduate Research. 1-3 Credits.

Research on problems approved by the staff. Approval must be obtained prior to registration. A final written report on the work is required. For students requesting Special Honors in chemistry, a poster or oral presentation is also required. May be repeated for credit. Majors are encouraged to take the course for two semesters. Laboratory fee.

CHEM 6221. Spectrochemical Analysis. 3 Credits.

Theory and application of recent spectrometric methods of analysis, including advances in optimization techniques, optical instrumentation, atomic spectrometry, laser-based analytical techniques, X-ray methods, and surface analysis techniques. Prerequisite: CHEM 4122.

CHEM 6222. Biomedical Mass Spectrometry. 3 Credits.

Principles, instrumentation, methods, and applications of mass spectrometry; selected state-of-the-art methods demonstrate basic principles to show how new methods of analysis are developed; typical applications highlight solutions of biomedical problems, including proteomics and metabolomics. Prerequisite: CHEM 4122.

CHEM 6235. Advanced Inorganic Chemistry I. 3 Credits.

Application of modern chemical theories to inorganic substances and reactions; detailed study, developed from the periodic table, of the chemistry of the more common elements; electronic spectra and reaction mechanisms of complexes; organometallic chemistry; homogeneous and heterogeneous catalysis; bioinorganic chemistry. Prerequisite: CHEM 3172, CHEM 4134.

CHEM 6236. Advanced Inorganic Chemistry II. 3 Credits.

Continuation of CHEM 6235. Application of modern chemical theories to inorganic substances and reactions; detailed study, developed from the periodic table, of the chemistry of the more common elements; electronic spectra and reaction mechanisms of complexes; organometallic chemistry; homogeneous and heterogeneous catalysis; bioinorganic chemistry. Prerequisite: CHEM 3172, CHEM 4134.

CHEM 6238. Chem of Inorganic Materials. 3 Credits.

Synthesis, structure, and properties of materials such as ceramics, superconductors, ionic conductors, nanomaterials, and magnetic, optical, and electronic materials. Emphasis on traditional and low-temperature routes. Prerequisite: CHEM 3171- CHEM 3172.

CHEM 6251. Advanced Organic Chemistry I. 3 Credits.

Synthesis, reactions, and properties of organic compounds; fundamental theories of organic chemistry, emphasis on reaction mechanisms. Prerequisite: CHEM 2152.

CHEM 6252. Advanced Organic Chemistry II. 3 Credits.

Continuation of CHEM 6251. Synthesis, reactions, and properties of organic compounds; fundamental theories of organic chemistry, emphasis on reaction mechanisms. Prerequisite: CHEM 6251.

CHEM 6257. Physical-Organic Chemistry. 3 Credits.

The transition state theory of chemical kinetics, applications to reaction mechanisms; kinetic isotope effects, linear-free energy relationships, concentrated and "super" acids, Woodward-Hoffman rules, free radical reactions. Prerequisite: CHEM 6251 or permission of instructor.

CHEM 6259. Polymer Chemistry. 3 Credits.

A study of the preparation, properties, and structure of macromolecules. Prerequisite: CHEM 2152 and CHEM 3170 or CHEM 3171 or permission of instructor.

CHEM 6273. Chemical Thermodynamics. 3 Credits.

Application of thermodynamics to chemical problems. Emphasis on statistical calculation of thermodynamic properties. Prerequisite: CHEM 3172 or CHEM 6372.

CHEM 6277. Chemical Bonding. 3 Credits.

Quantum mechanics, approximate methods, electron spin, Pauli principle, atomic and molecular structure. Prerequisite: CHEM 3172 or CHEM 6372.

CHEM 6278. Molecular Spectroscopy. 3 Credits.

Applications of quantum mechanics and group theory to the interpretation of electronic, vibrational, rotational, and magnetic resonance spectroscopy. Prerequisite: CHEM 6277.

CHEM 6314. Fundamental-Computational Chem. 3 Credits.**CHEM 6315. Computational Chem-Biomolecule. 3 Credits.****CHEM 6320. Selected Topics in Analytical Chemistry. 1-3 Credits.**

Advanced topics offered in a modular format to allow an in-depth examination of a self-selected field of analytical chemistry. One to three topics may be chosen for a given semester. May be repeated for credit.

CHEM 6330. Selected Topics in Inorganic Chemistry. 1-3 Credits.

Advanced topics offered in a modular format to allow an in-depth examination of a self-selected field of inorganic chemistry. One to three topics may be chosen for a given semester. May be repeated for credit.

CHEM 6350. Selected Topics in Organic Chemistry. 1-3 Credits.

Advanced topics offered in a modular format to allow an in-depth examination of a self-selected field in organic chemistry. One to three topics may be chosen for a given semester. May be repeated for credit.

CHEM 6358. Synthesis and Structure Determination in Organic Chemistry. 3 Credits.

The design of syntheses for complex organic molecules; survey of modern synthetic methods, including asymmetric induction; spectroscopic methods of structure determination. Prerequisite: CHEM 6251 or permission of instructor.

CHEM 6370. Selected Topics in Physical Chemistry. 1-3 Credits.

Advanced topics offered in a modular format to allow an in-depth examination of a self-selected field of physical chemistry. One to three topics may be chosen for a given semester. May be repeated for credit.

CHEM 6371. Physical Chemistry I. 1-3 Credits.

Same as CHEM 3171. Admission only by departmental permission. Credit assigned upon satisfactory completion of CHEM 6372.

CHEM 6372. Physical Chemistry II. 1-3 Credits.

Continuation of CHEM 6371. Same as CHEM 3172. Admission only by departmental permission. Credit for CHEM 6371 assigned upon satisfactory completion of this course.

CHEM 6390. Selected Topics in Chemistry. 0-3 Credits.

Advanced topics offered in a modular format to allow an in-depth examination of a self-selected field in chemistry. One to three topics may be chosen for a given semester. May be repeated for credit.

CHEM 6395. Research. 1-12 Credits.

Limited to master's degree candidates. Survey of a topic approved by departmental staff and resulting in a written report and presentation of a seminar. Open to qualified students with advanced training. May be repeated for credit.

CHEM 6998. Thesis Research. 3 Credits.

Limited to students in the master's degree program.

CHEM 6999. Thesis Research. 3 Credits.

Limited to students in the Master's Degree program.

CHEM 8998. Advanced Reading and Research. 1-12 Credits.

Limited to students preparing for the Doctor of Philosophy general examination. May be repeated for credit.

CHEM 8999. Dissertation Research. 3-12 Credits.

Limited to Doctor of Philosophy candidates. May be repeated for credit.

BACHELOR OF ARTS WITH A MAJOR IN CHEMISTRY

OPTION 1

The Department of Chemistry offers two options for the Bachelor of Arts degree, each designed to give students a broad background in the basic divisions of chemistry: analytical, biochemistry, inorganic, organic, and physical.

Option 1 provides considerable concentration in chemistry while permitting a wider selection of electives. It should meet the needs of students preparing to enter the fields of medicine, law, dentistry, and business, among others.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63) and the required curriculum, below:

Required courses:

CHEM 2151 & CHEM 2153	Organic Chemistry I and Organic Chemistry Laboratory I
CHEM 2152 & CHEM 2154	Organic Chemistry II and Organic Chemistry Laboratory II
CHEM 3171 & CHEM 3172	Physical Chemistry I and Physical Chemistry II
CHEM 3173	Physical Chemistry Laboratory
CHEM 3165	Biochemistry I
CHEM 4122	Instrumental Analytical Chemistry
CHEM 4134	Descriptive Inorganic Chemistry

Suggested Program of Study:

Students should follow this sequence in general and are urged to consult with the chemistry and premedical advisors concerning their academic program.

First Year

CHEM 1111 & CHEM 1112 General Chemistry I

Select one of the following:

MATH 1231 & MATH 1232* Single-Variable Calculus I

MATH 1220 & MATH 1221 Calculus with Precalculus I

Second Year

CHEM 2122 Introductory Quantitative Analysis

CHEM 2151 & CHEM 2153 Organic Chemistry I

CHEM 2152 & CHEM 2154 Organic Chemistry II

PHYS 1021 or 1025 University Physics I

PHYS 1022 or 1026 University Physics II

MATH 1232 (if not taken in the first year) Single-Variable Calculus II

Third Year

CHEM 2123 Introductory Quantitative Analysis Laboratory

CHEM 3171 & CHEM 3172 Physical Chemistry I

CHEM 3173 Physical Chemistry Laboratory

Fourth Year

CHEM 3165 Biochemistry I

CHEM 4122 Instrumental Analytical Chemistry

CHEM 4123 Instrumental Analytical Chemistry Laboratory

CHEM 4134 (if not taken in the junior year) Descriptive Inorganic Chemistry

* Or MATH 1220 Calculus with Precalculus I-MATH 1221 Calculus with Precalculus II if necessary);

OPTION 2

The Department of Chemistry offers two options for the Bachelor of Arts degree, each designed to give students a broad background in the basic divisions of chemistry: analytical, biochemistry, inorganic, organic, and physical.

Option 1 is intended primarily for students preparing for graduate study in chemistry or those students planning to enter the chemical profession and wishing certification by the American Chemical Society (ACS) as having met the minimum requirements for professional training.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63) and the required curriculum, below:

Required courses:

CHEM 2151 & CHEM 2153 Organic Chemistry I
and Organic Chemistry Laboratory I

CHEM 2152 & CHEM 2154 Organic Chemistry II
and Organic Chemistry Laboratory II

CHEM 3171 & CHEM 3172 Physical Chemistry I
and Physical Chemistry II

CHEM 3173	Physical Chemistry Laboratory
CHEM 3165	Biochemistry I
CHEM 4122	Instrumental Analytical Chemistry
CHEM 4123	Instrumental Analytical Chemistry Laboratory
CHEM 4134	Descriptive Inorganic Chemistry
CHEM 4195	Undergraduate Research

A course in a structured computer programming language, such as one of the following courses, is recommended:

STAT 1129	Introduction to Computing
CSCI 1011	Introduction to Programming with Java
CSCI 1041	Introduction to FORTRAN Programming
CSCI 1121	Introduction to C Programming
CSCI 1131	Introduction to Programming with C

Suggested Program of Study:

Students should follow this sequence in general and are urged to consult with the chemistry and premedical advisors concerning their academic program.

First Year

CHEM 1111 & CHEM 1112	General Chemistry I
MATH 1231 & MATH 1232*	Single-Variable Calculus I
MATH 1220 & MATH 1221	Calculus with Precalculus I

One of the following:

Second Year

CHEM 2122	Introductory Quantitative Analysis
CHEM 2151 & CHEM 2153	Organic Chemistry I
CHEM 2152 & CHEM 2154	Organic Chemistry II
PHYS 1021 or 1025	University Physics I
PHYS 1022 or 1026	University Physics II
MATH 1232 (if not taken in the first year)	Single-Variable Calculus II

Third Year

CHEM 2123	Introductory Quantitative Analysis Laboratory
CHEM 3171 & CHEM 3172	Physical Chemistry I
CHEM 3173	Physical Chemistry Laboratory

Fourth Year

CHEM 3165	Biochemistry I
CHEM 4122	Instrumental Analytical Chemistry
CHEM 4123	Instrumental Analytical Chemistry Laboratory
CHEM 4134 (if not taken in the junior year)	Descriptive Inorganic Chemistry

* Or MATH 1220 Calculus with Precalculus I-MATH 1221 Calculus with Precalculus II (if necessary);

SPECIAL HONORS

In addition to meeting the general requirements stated under University Regulations, a candidate for graduation with Special Honors in chemistry must maintain a cumulative 3.0 grade-point average in chemistry courses and take CHEM 4195 Undergraduate Research or CHEM 4195W Undergraduate Research for at least 3 credits over two semesters. In addition to the final report for CHEM 4195 or CHEM 4195W, a poster or oral presentation is required.

BACHELOR OF SCIENCE WITH A MAJOR IN CHEMISTRY

OPTION 1

The Department of Chemistry offers four options for Bachelor of Science degree, all designed to give students a broad background in the basic divisions of chemistry: analytical, biochemistry, inorganic, organic, and physical.

Option 1 is for students preparing for graduate study in chemistry or those planning to enter the chemical profession and wishing to be certified by the American Chemical Society as having met the minimum requirements for professional training.

The following requirements must be fulfilled: The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63) and the required curriculum.

Required courses:

CHEM 2151 & CHEM 2153	Organic Chemistry I and Organic Chemistry Laboratory I
CHEM 2152 & CHEM 2154	Organic Chemistry II and Organic Chemistry Laboratory II
CHEM 3171 & CHEM 3172	Physical Chemistry I and Physical Chemistry II
CHEM 3173	Physical Chemistry Laboratory
CHEM 3165	Biochemistry I

CHEM 4122 Instrumental Analytical Chemistry

CHEM 4134 Descriptive Inorganic Chemistry

Suggested Program of Study:

Students should follow this sequence in general and are urged to consult with the chemistry and premedical advisors concerning their academic program.

First Year

CHEM 1111 General Chemistry I
& CHEM 1112

Select one of the following:

MATH 1231 Single-Variable Calculus I
& MATH 1232*

MATH 1220 Calculus with Precalculus I
& MATH 1221

Second Year

CHEM 2122 Introductory Quantitative Analysis

CHEM 2151 Organic Chemistry I
& CHEM 2153

CHEM 2152 Organic Chemistry II
& CHEM 2154

PHYS 1021 or 1025 University Physics I

PHYS 1022 or 1026 University Physics II

MATH 1232 (if not taken in the first year) Single-Variable Calculus II

Third Year

CHEM 2123 Introductory Quantitative Analysis Laboratory

CHEM 3171 Physical Chemistry I
& CHEM 3172

CHEM 3173 Physical Chemistry Laboratory

Fourth Year

CHEM 3165 Biochemistry I

CHEM 4122 Instrumental Analytical Chemistry

CHEM 4123 Instrumental Analytical Chemistry Laboratory

CHEM 4134 (if not taken in the junior year) Descriptive Inorganic Chemistry

* Or MATH 1220 Calculus with Precalculus I-MATH 1221 Calculus with Precalculus II if necessary);

OPTION 2

The Department of Chemistry offers four options for Bachelor of Science degree, all designed to give students a broad background in the basic divisions of chemistry: analytical, biochemistry, inorganic, organic, and physical.

Option 2 is for students preparing for graduate study in chemistry or those planning to enter the chemical profession and wishing to be certified by the American Chemical Society as having met the minimum requirements for professional training.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63) and the required curriculum.

Required courses:

CHEM 2151 Organic Chemistry I
& CHEM 2153 and Organic Chemistry Laboratory I

CHEM 2152 Organic Chemistry II
& CHEM 2154 and Organic Chemistry Laboratory II

CHEM 3171 Physical Chemistry I
& CHEM 3172 and Physical Chemistry II

CHEM 3173 Physical Chemistry Laboratory

CHEM 3165 Biochemistry I

CHEM 4122 Instrumental Analytical Chemistry

CHEM 4123 Instrumental Analytical Chemistry Laboratory

CHEM 4134 Descriptive Inorganic Chemistry

CHEM 4195 Undergraduate Research

A course in a structured computer programming language, such as one of the following courses, is recommended:

STAT 1129 Introduction to Computing

CSCI 1011 Introduction to Programming with Java

CSCI 1041 Introduction to FORTRAN Programming

CSCI 1121 Introduction to C Programming

CSCI 1131 Introduction to Programming with C

Suggested Program of Study:

Students should follow this sequence in general and are urged to consult with the chemistry and premedical advisors concerning their academic program.

First Year

CHEM 1111 General Chemistry I
& CHEM 1112

MATH 1231 Single-Variable Calculus I
& MATH 1232*

MATH 1220 & MATH 1221	Calculus with Precalculus I
One of the following:	
Second Year	
CHEM 2122	Introductory Quantitative Analysis
CHEM 2151 & CHEM 2153	Organic Chemistry I
CHEM 2152 & CHEM 2154	Organic Chemistry II
PHYS 1021 or 1025	University Physics I
PHYS 1022 or 1026	University Physics II
MATH 1232 (if not taken in the first year)	Single-Variable Calculus II
Third Year	
CHEM 2123	Introductory Quantitative Analysis Laboratory
CHEM 3171 & CHEM 3172	Physical Chemistry I
CHEM 3173	Physical Chemistry Laboratory
Fourth Year	
CHEM 3165	Biochemistry I
CHEM 4122	Instrumental Analytical Chemistry
CHEM 4123	Instrumental Analytical Chemistry Laboratory
CHEM 4134 (if not taken in the junior year)	Descriptive Inorganic Chemistry
* Or MATH 1220 Calculus with Precalculus I-MATH 1221 Calculus with Precalculus II if necessary);	

OPTION 3

The Department of Chemistry offers four options for Bachelor of Science degree, all designed to give students a broad background in the basic divisions of chemistry: analytical, biochemistry, inorganic, organic, and physical.

Option 3 prepares students to meet the needs of federal and state forensic sciences laboratories.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63) and the required curriculum.

Required courses:

CHEM 2151 & CHEM 2153	Organic Chemistry I and Organic Chemistry Laboratory I
CHEM 2152 & CHEM 2154	Organic Chemistry II and Organic Chemistry Laboratory II

CHEM 3171 & CHEM 3172	Physical Chemistry I and Physical Chemistry II
CHEM 3173	Physical Chemistry Laboratory
CHEM 3165	Biochemistry I
CHEM 4122	Instrumental Analytical Chemistry
CHEM 4134	Descriptive Inorganic Chemistry
BISC 1111 & BISC 1112	Introductory Biology: Cells and Molecules and Introductory Biology: The Biology of Organisms
FORS 6213	Elements of Forensic Sciences
FORS 6221	Criminal Law I
Three of the following:	
FORS 6206	Trace Evidence Analysis
FORS 6234	Medicinal Chemistry I
FORS 6235	Medicinal Chemistry II
FORS 6238	Forensic Chemistry I
FORS 6239	Forensic Chemistry II
FORS 6240	Forensic Drug Analysis

Suggested Program of Study:

Students should follow this sequence in general and are urged to consult with the chemistry and premedical advisors concerning their academic program.

First Year

CHEM 1111 & CHEM 1112	General Chemistry I
Select one of the following:	
MATH 1231 & MATH 1232*	Single-Variable Calculus I
MATH 1220 & MATH 1221	Calculus with Precalculus I

Second Year

CHEM 2122	Introductory Quantitative Analysis
CHEM 2151 & CHEM 2153	Organic Chemistry I
CHEM 2152 & CHEM 2154	Organic Chemistry II
PHYS 1021 or 1025	University Physics I
PHYS 1022 or 1026	University Physics II

MATH 1232 (if not taken in the first year) Single-Variable Calculus II

Third Year

CHEM 2123	Introductory Quantitative Analysis Laboratory
CHEM 3171 & CHEM 3172	Physical Chemistry I
CHEM 3173	Physical Chemistry Laboratory

Fourth Year

CHEM 3165	Biochemistry I
CHEM 4122	Instrumental Analytical Chemistry
CHEM 4123	Instrumental Analytical Chemistry Laboratory
CHEM 4134 (if not taken in the junior year)	Descriptive Inorganic Chemistry

* Or MATH 1220 Calculus with Precalculus I-MATH 1221 Calculus with Precalculus II if necessary);

OPTION 4

The Department of Chemistry offers four options for Bachelor of Science degree, all designed to give students a broad background in the basic divisions of chemistry: analytical, biochemistry, inorganic, organic, and physical.

Option 4 includes additional courses in biochemistry and fulfills the American Chemical Society requirement for a certified degree program in chemistry with a biochemistry option.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63) and the required curriculum.

Required courses:

CHEM 2151 & CHEM 2153	Organic Chemistry I and Organic Chemistry Laboratory I
CHEM 2152 & CHEM 2154	Organic Chemistry II and Organic Chemistry Laboratory II
CHEM 3171 & CHEM 3172	Physical Chemistry I and Physical Chemistry II
CHEM 3173	Physical Chemistry Laboratory
CHEM 3165 & CHEM 3166	Biochemistry I and Biochemistry II (BIOC/BISC equivalents may be substituted)
CHEM 3262	Biochemistry Laboratory (BIOC/BISC equivalent may be substituted)

CHEM 4122	Instrumental Analytical Chemistry
CHEM 4123	Instrumental Analytical Chemistry Laboratory
CHEM 4134	Descriptive Inorganic Chemistry
CHEM 4195	Undergraduate Research
BISC 1111 & BISC 1112	Introductory Biology: Cells and Molecules and Introductory Biology: The Biology of Organisms

The following are recommended:

BISC 2202	Cell Biology
BISC 2207	Genetics
BISC 2322	Human Physiology

Suggested Program of Study:

Students should follow this sequence in general and are urged to consult with the chemistry and premedical advisors concerning their academic program.

First Year

CHEM 1111 & CHEM 1112	General Chemistry I
Select one of the following:	
MATH 1231 & MATH 1232*	Single-Variable Calculus I
MATH 1220 & MATH 1221	Calculus with Precalculus I

Second Year

CHEM 2122	Introductory Quantitative Analysis
CHEM 2151 & CHEM 2153	Organic Chemistry I
CHEM 2152 & CHEM 2154	Organic Chemistry II
PHYS 1021 or 1025	University Physics I
PHYS 1022 or 1026	University Physics II
MATH 1232 (if not taken in the first year)	Single-Variable Calculus II

Third Year

CHEM 2123	Introductory Quantitative Analysis Laboratory
CHEM 3171 & CHEM 3172	Physical Chemistry I
CHEM 3173	Physical Chemistry Laboratory

Fourth Year

CHEM 3165	Biochemistry I
-----------	----------------

CHEM 4122	Instrumental Analytical Chemistry
CHEM 4123	Instrumental Analytical Chemistry Laboratory
CHEM 4134 (if not taken in the junior year)	Descriptive Inorganic Chemistry
* Or MATH 1220 Calculus with Precalculus I-MATH 1221 Calculus with Precalculus II if necessary	

SPECIAL HONORS

In addition to meeting the general requirements stated under University Regulations, a candidate for graduation with Special Honors in chemistry must maintain a cumulative 3.0 grade-point average in chemistry courses and take CHEM 4195 Undergraduate Research or CHEM 4195W Undergraduate Research for at least 3 credits over two semesters. In addition to the final report for CHEM 4195 or CHEM 4195W, a poster or oral presentation is required.

COMBINED B.S. WITH A MAJOR IN CHEMISTRY / M.F.S. WITH A CONCENTRATION IN FORENSIC CHEMISTRY

REQUIREMENTS

A program leading to the Bachelor of Science with a Major in Chemistry and Master of Forensic Sciences with a concentration in forensic chemistry is available. Interested students should consult the Department of Chemistry (<http://chemistry.columbian.gwu.edu>) in their sophomore year.

MINOR IN CHEMISTRY

REQUIREMENTS

Required

CHEM 1111	General Chemistry I
CHEM 1112	General Chemistry II
CHEM 2122	Introductory Quantitative Analysis
CHEM 2123	Introductory Quantitative Analysis Laboratory
CHEM 2151	Organic Chemistry I
CHEM 2152	Organic Chemistry II
CHEM 2153	Organic Chemistry Laboratory I
CHEM 2154	Organic Chemistry Laboratory II

One of the following:

CHEM 3170	Introduction to Physical Chemistry
CHEM 3171	Physical Chemistry I
CHEM 3165	Biochemistry I
CHEM 4134	Descriptive Inorganic Chemistry

MASTER OF SCIENCE IN THE FIELD OF CHEMISTRY

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Prerequisite: a bachelor's degree with a major in chemistry from this University, or an equivalent degree.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (<http://bulletin.gwu.edu/arts-sciences/#degreeregulationtext>).

Course work must include a minimum of five graduate-level courses; at least four of the courses must be core courses as defined in the department's Guide for Graduate Students; at least three must be offered by the Chemistry Department. At least two graduate-level courses must be taken outside the subdiscipline of the student and in at least two other subdisciplines/disciplines. Candidates are required to pass a Master's Comprehensive Examination as described in the department's Guide for Graduate Students.

Thesis option—30 credit hours of approved courses are required, including CHEM 6998 Thesis Research—CHEM 6999 Thesis Research, which may be in analytical, inorganic, organic, or physical chemistry.

Nonthesis option—36 credit hours of approved courses are required, including CHEM 6395 Research. Up to 9 credit hours in other departments related to the student's area of interest (e.g., Forensic Sciences) may be included in the program, subject to the approval of the Department of Chemistry. Students who are or will be employed in organizations dealing with science and technology policy programs may select from specified courses offered by Information Systems and Technology Management, Political Science, Public Policy and Public Administration, and the Elliott School of International Affairs.

Note: All entering students in graduate chemistry programs are required to take the American Chemical Society Graduate Level Placement Examinations, given by the Department of Chemistry, prior to matriculation. The four placement examinations (in the disciplines of analytical, organic, inorganic,

and physical chemistry) are designed to cover the subject matter in the disciplines generally taught in undergraduate programs preparatory for graduate work in chemistry, and the results are used by the department to advise the individual student in planning a program of courses appropriate to the student's background. All graduate students are required to participate in the seminar and colloquium programs. Upon consultation with course instructors, specific course prerequisites may be waived.

MASTER OF SCIENCE IN THE FIELD OF ENVIRONMENTAL AND GREEN CHEMISTRY

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Prerequisite: a bachelor's degree with a major in science or engineering, including a background in the fundamental areas of chemistry, with a GPA of 3.0 or above. At minimum, candidates must have completed:

- 2 semesters of general chemistry
- 2 semesters of organic or Inorganic chemistry
- 1 semester of quantitative and/or instrumental analysis (recommended)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (<http://bulletin.gwu.edu/arts-sciences/#degreeeregulationtext>).

Required

Chem 6280

Chem 6281

Chem 6282

Chem 6283

Chem 6284

Chem 6298

Electives

12 credits from the following:

CHEM 6350 Selected Topics in Organic Chemistry

CHEM 6251 Advanced Organic Chemistry I

CHEM 6320 Selected Topics in Analytical Chemistry

CHEM 6238 Chem of Inorganic Materials

CHEM 6278	Molecular Spectroscopy
CHEM 6257	Physical-Organic Chemistry
STAT 6202	Mathematical Statistics II
IAFF 6153	Science, Technology, and National Security
IAFF 6141	International Science and Technology Policy Cornerstone
IAFF 6142	Technology Creation/Diffusion
IAFF 6151	Environmental Policy
IAFF 6158	Special Topics in International Science and Technology Policy (Science, Technology and International Development)
IAFF 6158	Special Topics in International Science and Technology Policy (International Issues in Energy)
IAFF 6158	Special Topics in International Science and Technology Policy (Science, Technology and Complexity)
IAFF 6158	Special Topics in International Science and Technology Policy (Environmental Security)
SMPP 6290	Special Topics (Strategy for Sustainable Enterprise)
SMPP 6290	Special Topics (Sustainability Management and Policy)
SMPP 6290	Special Topics (Clean Tech and Competitive Energy Markets)
PUBH 6004	Environmental and Occupational Health in a Sustainable World
PUBH 6126	Assessment&Control/Env Hazards
PUBH 6002	Biostatistical Applic for PubH
PPPA 6066	Environmental Policy
ECON 6237	Economics of the Environment and Natural Resources
EMSE 6200	Policy Factors in Environmental and Energy Management
ENRP 6101	Environmental Sciences I
ENRP 6102	Environmental Sciences II

DOCTOR OF PHILOSOPHY IN THE FIELD OF CHEMISTRY

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Prerequisite: a bachelor's degree with a major in chemistry from this University, or an equivalent degree

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

The requirements for the Doctor of Philosophy Program (p. 71).

Students develop their program of studies in consultation with their doctoral committee, subject to the approval of the department's Graduate Affairs Committee. The program of studies must include coursework in a minimum of five graduate-level courses; at least four of the courses must be core courses as defined in the department's Guide for Graduate Students; at least three must be offered by the Chemistry Department. These course requirements cannot be fulfilled by achievement on placement exams. At least two graduate-level courses must be taken outside the student's subdiscipline and in at least two other subdisciplines/disciplines. Equivalent courses offered by another university may be substituted at the discretion of the Graduate Affairs Committee. Students must pass a cumulative examination system and an oral defense of the doctoral research plan.

Research fields

- Analytical chemistry—analytical neuroscience, analytical spectroscopy, biomedical analysis, chemical imaging, chemical instrumentation, chemical separations, electrochemical analysis, electrosprays, lab-on-a-chip devices, laser-material interactions, mass spectrometry, nanophotonic structures, nmr spectroscopy, proteomics and metabolomics, single cell analysis;
- Biochemistry—biological sensing via nanoparticles, biomaterials, biomolecular analysis, biophysical topics, enzymology, lipids chemistry, proteomics and metabolomics, enzyme expression and inhibition, structural biology;
- Inorganic (materials) chemistry—battery chemistry, coordination chemistry, f-element chemistry, green chemistry, hydrothermal chemistry, mineral surface geochemistry, nanoscale and nanostructured materials, organometallic chemistry, small-molecule crystallography, solid-state materials;

- Organic chemistry—biomaterials and lipids, computational docking and ligand design, green chemistry, heterocyclic chemistry, molecules of biological interest, synthesis;
- Physical chemistry—CO₂ removal, combustion chemistry, elemental and molecular spectroscopies, fuel cells, laser analytics, renewable energy conversion, solar chemical syntheses, surface chemistry, theoretical chemistry, thermochemical energy cycles.

Ph.D. students in chemistry may substitute up to 12 hours of Dissertation Research in the form of coursework jointly approved by the Chemistry Department and the Forensic Sciences Department, the Environmental Resource Policy Program, or the International Science and Technology Policy program. The 12 hours may be selected from specified courses offered by Forensic Sciences, Information Systems and Technology Management, Political Science, Public Policy and Public Administration, and the Elliott School of International Affairs.

Note: All entering students in graduate chemistry programs are required to take the American Chemical Society Graduate Level Placement Examinations, given by the Department of Chemistry, prior to matriculation. The four placement examinations (in the disciplines of analytical, organic, inorganic, and physical chemistry) are designed to cover the subject matter in the disciplines generally taught in undergraduate programs preparatory for graduate work in chemistry, and the results are used by the department to advise the individual student in planning a program of courses appropriate to the student's background. All graduate students are required to participate in the seminar and colloquium programs. Upon consultation with course instructors, specific course prerequisites may be waived.

With permission, a limited number of upper-level undergraduate courses in the department may be taken for graduate credit; additional coursework is required. See the Undergraduate programs for course listings.

CLASSICAL ACTING

The program in Classical Acting features an unprecedented collaboration between two leading Washington, D.C. institutions. The Shakespeare Theatre Company's Academy for Classical Acting (ACA) brings to the partnership world-class artists/teachers, a comprehensive training program, and a distinguished reputation as a nationally and internationally recognized leader in classical repertory. The University brings to the partnership its resources and reputation as a major research university, with close ties to the Folger Shakespeare Library and the Library of Congress, as well as shared faculty and facilities.

The ACA offers the only Master of Fine Arts program in the United States dedicated solely to classical acting. Students are in class full-time, 40 hours or more a week, for about 44 weeks. Graduates of the program, as actors and as acting teachers,

are helping transform the way classical theater is performed on Broadway and in regional theaters around the country.

GRADUATE

Master's program

- Master of Fine Arts in the field of classical acting (p. 148)

FACULTY

Director L. Jacobson

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ACA 6201. Acting I. 3 Credits.

The focus of the acting sequence shifts with each session, providing a studio structure to explore and meet the demands of the classical canon. Portions of the sequence focus on the history plays and tragedies, classic comedy, high comedy, the Jacobean, and master classes.

ACA 6202. Acting II. 2,3 Credits.

The focus of the acting sequence shifts with each session, providing a studio structure to explore and meet the demands of the classical canon. Portions of the sequence focus on the history plays and tragedies, classic comedy, high comedy, the Jacobean, and master classes.

ACA 6203. Acting: Classical Comedy. 2,3 Credits.

The focus of the acting sequence shifts with each session, providing a studio structure to explore and meet the demands of the classical canon. Portions of the sequence focus on the history plays and tragedies, classic comedy, high comedy, the Jacobean, and master classes.

ACA 6204. Acting: Master Class. 2,3 Credits.

The focus of the acting sequence shifts with each session, providing a studio structure to explore and meet the demands of the classical canon. Portions of the sequence focus on the history plays and tragedies, classic comedy, high comedy, the Jacobean, and master classes.

ACA 6205. Topics in Classical Drama and Culture. 2 Credits.

Plays and other writings from the Elizabethan, Jacobean, and Restoration eras and the 18th century. The historical world in which the plays were written as well as the imaginary worlds created in the plays themselves.

ACA 6206. Topics in Classical Drama and Culture. 2 Credits.

Plays and other writings from the Elizabethan, Jacobean, and Restoration eras and the 18th century. The historical world in which the plays were written as well as the imaginary worlds created in the plays themselves.

ACA 6207. Topics in Classical Drama and Culture. 2 Credits.

Plays and other writings from the Elizabethan, Jacobean, and Restoration eras and the 18th century. The historical world in which the plays were written as well as the imaginary worlds created in the plays themselves.

ACA 6208. Topics in Classical Drama and Culture. 1 Credit.

Plays and other writings from the Elizabethan, Jacobean, and Restoration eras and the 18th century. The historical world in which the plays were written as well as the imaginary worlds created in the plays themselves.

ACA 6209. Text I. 2 Credits.

Textual analysis emphasizing development of aesthetic expression. The forms and rules of verse: its meter, scansion, and overall structure in the early, middle, and late Shakespeare plays, as well as the intricacies of the prose.

ACA 6210. Text II. 2 Credits.

Textual analysis emphasizing development of aesthetic expression. The forms and rules of verse: its meter, scansion, and overall structure in the early, middle, and late Shakespeare plays, as well as the intricacies of the prose.

ACA 6211. Voice and Speech I. 3 Credits.

The development of clear, supported speech and sound that can meet the demands and challenges of classical texts. Resonators, articulators, breathing, and placement; phonetics and ear training; defining the character through the voice.

ACA 6212. Voice and Speech II. 2,3 Credits.

The development of clear, supported speech and sound that can meet the demands and challenges of classical texts. Resonators, articulators, breathing, and placement; phonetics and ear training; defining the character through the voice.

ACA 6213. Voice and Speech III. 3 Credits.

The development of clear, supported speech and sound that can meet the demands and challenges of classical texts. Resonators, articulators, breathing, and placement; phonetics and ear training; defining the character through the voice.

ACA 6214. Voice and Speech IV. 2 Credits.

The development of clear, supported speech and sound that can meet the demands and challenges of classical texts. Resonators, articulators, breathing, and placement; phonetics and ear training; defining the character through the voice.

ACA 6215. Movement I. 1,2 Credit.

The development of an awareness of the body and its expressive abilities through an integrated approach that includes ballet, modern dance, Hatha Yoga, and Feldenkrais for coordination, focus, and expression.

ACA 6216. Movement II. 1,2 Credit.

The development of an awareness of the body and its expressive abilities through an integrated approach that includes ballet, modern dance, Hatha Yoga, and Feldenkrais for coordination, focus, and expression.

ACA 6217. Movement III. 1,2 Credit.

The development of an awareness of the body and its expressive abilities through an integrated approach that includes ballet, modern dance, Hatha Yoga, and Feldenkrais for coordination, focus, and expression.

ACA 6218. Movement IV. 1,2 Credit.

The development of an awareness of the body and its expressive abilities through an integrated approach that includes ballet, modern dance, Hatha Yoga, and Feldenkrais for coordination, focus, and expression.

ACA 6219. Alexander Technique I. 1,2 Credit.

Through group work and individual sessions, students develop a further awareness of the body toward expression of imagination and the creative process, enabling powerful characterization without stress or personal physical distortion.

ACA 6220. Alexander Technique II. 1,2 Credit.

Through group work and individual sessions, students develop a further awareness of the body toward expression of imagination and the creative process, enabling powerful characterization without stress or personal physical distortion.

ACA 6221. Alexander Technique III. 1,2 Credit.

Through group work and individual sessions, students develop a further awareness of the body toward expression of imagination and the creative process, enabling powerful characterization without stress or personal physical distortion.

ACA 6222. Alexander Technique IV. 1,2 Credit.

Through group work and individual sessions, students develop a further awareness of the body toward expression of imagination and the creative process, enabling powerful characterization without stress or personal physical distortion.

ACA 6223. Stage Combat I. 2 Credits.

Skills in stage combat techniques, including unarmed combat and broadsword, buckler, rapier, dagger, and other lighter weapons, toward development of greater physical strength and an awareness of safety issues. The course is designed to lead to certification as an actor/combatant through the Society of American Fight Directors.

ACA 6224. Stage Combat II. 2 Credits.

Skills in stage combat techniques, including unarmed combat and broadsword, buckler, rapier, dagger, and other lighter weapons, toward development of greater physical strength and an awareness of safety issues. The course is designed to lead to certification as an actor/combatant through the Society of American Fight Directors.

ACA 6225. Practicum I. 2 Credits.

This sequence of courses includes scene preparation, rehearsal/production, clown class, and other performance skills.

ACA 6226. Practicum II. 1-6 Credits.

This sequence of courses includes scene preparation, rehearsal/production, clown class, and other performance skills.

ACA 6227. Practicum III. 1-6 Credits.

This sequence of courses includes scene preparation, rehearsal/production, clown class, and other performance skills.

ACA 6228. Practicum IV. 1-6 Credits.

This sequence of courses includes scene preparation, rehearsal/production, clown class, and other performance skills.

ACA 6229. Audition Techniques. 3 Credits.

A set of workshops to help students develop strong audition skills. Business aspects of acting, such as selection of agents, Equity status, and taxation issues. The workshop concludes with a showcase performance for casting directors, agents, and theatre directors.

ACA 6595. Selected Topics. 1 Credit.

MASTER OF FINE ARTS IN THE FIELD OF CLASSICAL ACTING

REQUIREMENTS

The Columbian College of Arts and Sciences, in cooperation with The Shakespeare Theatre Academy for Classical Acting, offers the Master of Fine Arts in the field of classical acting. The program is an intensive, full-time endeavor intended for students who have had extensive theatre training as part of their undergraduate preparation or who have several years working as professionals in the field after completing college.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

The 59-credit degree program is taken in three intensive sessions over an 11-month period.

Required:

ACA 6201	Acting I
ACA 6202	Acting II
ACA 6203	Acting: Classical Comedy
ACA 6204	Acting: Master Class
ACA 6205	Topics in Classical Drama and Culture
ACA 6206	Topics in Classical Drama and Culture

ACA 6207	Topics in Classical Drama and Culture
ACA 6209	Text I
ACA 6210	Text II
ACA 6211	Voice and Speech I
ACA 6212	Voice and Speech II
ACA 6213	Voice and Speech III
ACA 6215	Movement I
ACA 6216	Movement II
ACA 6217	Movement III
ACA 6219	Alexander Technique I
ACA 6220	Alexander Technique II
ACA 6221	Alexander Technique III
ACA 6223	Stage Combat I
ACA 6224	Stage Combat II
ACA 6225	Practicum I
ACA 6227	Practicum III
ACA 6228	Practicum IV
ACA 6229	Audition Techniques
ACA 6595	Selected Topics (taken twice)

CLASSICAL AND NEAR EASTERN LANGUAGES AND CIVILIZATIONS

The Department of Classical and Near Eastern Languages and Civilizations offers undergraduate instruction in Greek, Latin, Hebrew, Arabic, Persian, and Turkish, as well as courses in ancient history and civilizations and the modern Middle East.

The curriculum is designed to strengthen a student's ability to communicate, reason, and understand the social, cultural, and physical environment of the ancient and modern worlds. The department fosters careful and creative thinking in its students, based in the linguistic, cultural, and historical roots of the rich, varied, and strategically important societies of the Mediterranean basin.

Classroom study is supplemented by the diverse resources of Washington, D.C., through field trips, foreign films, special lectures, and cultural programs at embassies. Students have opportunities to study abroad, including Greece, Italy, Israel, and Morocco, and to participate in excavations around the world.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in classical studies (p. 150)
- Bachelor of Arts with a major in Arabic studies (p. 149)

Minors

- Minor in classical studies (p. 152)
- Minor in Arabic studies (p. 152)
- Minor in Arabic and Hebrew languages and cultures (p. 151)

FACULTY

Professors E.H. Cline, E.A. Fisher

Associate Professors A. Bonnah (*Teaching*), M. Esseesy (*Chair*), E.A. Friedland, C. Rollston, A.M. Smith II

Assistant Professors C. Jorgensen, M.M. Kassab (*Teaching*), S. Loomis, P. Minuchehr, J.J. Tobkin (*Teaching*), K. Wasdin

Teaching Instructors S. Marcus, E. Oraby, N. Taher,

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
- Arabic (ARAB) (p. 909)
- Classical Studies (CLAS) (p. 940)
- Greek (GREK) (p. 1099)
- Hebrew (HEBR) (p. 1108)
- Latin (LATN) (p. 1143)
- Persian (PERS) (p. 1219)
- Turkish (TURK) (p. 1328)
- Yiddish (YDSH) (p. 1333)

BACHELOR OF ARTS WITH A MAJOR IN ARABIC STUDIES

REQUIREMENTS

The following requirements must be fulfilled:

57–58 credits spanning four years of study, including one semester of study abroad in an Arabic-speaking country.

Language Study: 26–27 credits taken over at least five semesters, including one of the following options:

Option A:

ARAB 1001 Beginning Arabic I

ARAB 1002 Beginning Arabic II

ARAB 2001 Intermediate Arabic I

ARAB 2002 Intermediate Arabic II

ARAB 3001 Advanced Arabic

ARAB 3301 Modern Arabic Literature

ARAB 3302 Media Arabic

Option B:

ARAB 1201 Intensive Elementary Arabic I-II

ARAB 1202 Intensive Elementary Arabic I-II

ARAB 2201 Intensive Intermediate Arabic I

ARAB 3201 Intensive Intermediate Arabic II

ARAB 3302 Media Arabic

Literature:

ARAB 4001 Genres in Modern Arabic Literature

ARAB 4002 Arabic Narratives Through the Ages

Translation/Interpretation:

ARAB 4501 Arabic-English Translation

ARAB 4502 Arabic-English Advanced Translation and Editing

Linguistics/Culture:

ARAB 3501 Arabic and Arab Identity

ARAB 3502 Arab Film & Culture in English

ARAB 3503 Fundamentals of Arabic Linguistics

Study Abroad:

12 credits, including a minimum of 6 credits in an Arabic dialect, taken at a program in a country in which Arabic is natively spoken

Exit Proficiency Exam: Majors must pass an exit proficiency exam at the Advanced High level of the ACTFL Guidelines in reading, writing, speaking, and listening.

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, students must have attained a 3.7 grade-point average in the major and at least a 3.25 average overall by the end of the junior year. No later than the beginning of the senior year, students must consult a departmental faculty member about a research project to be prepared under the supervision of that faculty member through CLAS 3901 Directed Project-CLAS 4901 Directed Project. Only if a committee of two faculty members approves the completed project, which must be graded A or A–, will Special Honors be recommended.

BACHELOR OF ARTS WITH A MAJOR IN CLASSICAL STUDIES

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Classical language requirement:

Greek (GREK) or Latin (LATN) language study through the 2002 level, or one classical language through the 2001 level and the other through the 1002 level. At least one year of Greek or Latin study must be done in residence.

Required courses (12 credits):

AH 3101 Ancient Art of the Bronze Age and Greece

or AH 3102 Ancient Art of the Roman Empire

CLAS 2112 History of Ancient Greece

or HIST 2112 History of Ancient Greece

CLAS 2113 The Roman World to 337 A.D.

or HIST 2113 The Roman World to 337 A.D.

CLAS 4111 Capstone Study

Four courses (12 credits) from the following, including at least two numbered 3000 or above:

CLAS 2104 Ancient Medicine and Modern Medical Terms

CLAS 2105 Special Topics

or CLAS 2105W	Special Topics
CLAS 2106	Mythology of the Classical World
CLAS 2107	Greek and Roman Drama
CLAS 2803	The Ancient Near East and Egypt to 322 B.C.
or HIST 2803	The Ancient Near East and Egypt to 322 B.C.
CLAS 2804	History of Ancient Israel
or HIST 2804	History of Ancient Israel
CLAS 3105	Topics in Classical Studies
CLAS 3111	Topics in Ancient History
or HIST 3111	Topics in Ancient History
CLAS 3114	Topics in Ancient Literatures and Cultures
CLAS 3115	Topics in Ancient Art and Archaeology
or AH 3105	Topics in Ancient Art and Archaeology
CLAS 3901	Directed Project
or CLAS 3901W	Directed Project
CLAS 4901	Directed Project
GREK 3001	Major Greek Authors I
GREK 3002	Major Greek Authors II
LATN 3001	Major Latin Authors I
LATN 3002	Major Latin Authors II
Three additional courses (9 credits) from the list above or from the following:	
AH 3101	Ancient Art of the Bronze Age and Greece
AH 3102	Ancient Art of the Roman Empire
AH 3111	Early Christian and Byzantine Art and Architecture
ANTH 3805	Archaeology of Israel and Neighboring Lands
or AH 3106	Art and Archaeology of Israel and Neighboring Lands
ANTH 3806	Art and Archaeology of the Aegean Bronze Age

or AH 3104	Art and Archaeology of the Aegean Bronze Age
ANTH 3834	Field Research: Old World
PHIL 2111	History of Ancient Philosophy
or PHIL 2111W	History of Ancient Philosophy
PSC 2105	Major Issues of Western Political Thought I
REL 3341	Christianity in the Ancient World

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, students must have attained a 3.7 grade-point average in the major and at least a 3.25 average overall by the end of the junior year. No later than the beginning of the senior year, students must consult a departmental faculty member about a research project to be prepared under the supervision of that faculty member through CLAS 3901 Directed Project, CLAS 4901 Directed Project, or CLAS 4111 Capstone Study. Only if a committee of two faculty members approves the completed project will Special Honors be recommended; the research project must be graded A or A-.

MINOR IN ARABIC AND HEBREW LANGUAGES AND CULTURES

REQUIREMENTS

The student chooses the minor with either an Arabic focus or a Hebrew focus. The minor consists of 15 credits in addition to prerequisite language study or demonstrated competence through the fourth semester (ARAB 2002 Intermediate Arabic II or HEBR 2002 Intermediate Hebrew II) in the primary focus and through the second semester (ARAB 1002 Beginning Arabic II or HEBR 1002 Beginning Hebrew II) in the other focus. Depending upon the focus chosen, the student completes:

One of the following options:

Option A

ARAB 3001	Advanced Arabic
ARAB 3301	Modern Arabic Literature
ARAB 3302	Media Arabic

Option B

HEBR 3001	Hebrew Conversation and Writing
HEBR 3301	Modern Hebrew Fiction

HEBR 3302 The Israeli Media

Two of the following (with at least one course in the student's chosen focus)

HEBR 3101 Modern Hebrew Literary Classics

HEBR 3102 Israeli Society and Culture: Literary Perspectives

ARAB 3501 Arabic and Arab Identity

ARAB 3502 Arab Film & Culture in English

MINOR IN ARABIC STUDIES

REQUIREMENTS

Prerequisite: ARAB 1001 Beginning Arabic I and ARAB 1002 Beginning Arabic II or equivalent.

The 21-credit minor consists of:

ARAB 2001 Intermediate Arabic I

ARAB 2002 Intermediate Arabic II

ARAB 3001 Advanced Arabic

ARAB 3302 Media Arabic

One specialized language elective course from the following:

ARAB 3301 Modern Arabic Literature

ARAB 3311 Business Arabic

One culture or linguistics elective from the following:

ARAB 3501 Arabic and Arab Identity

ARAB 3502 Arab Film & Culture in English

ARAB 3503 Fundamentals of Arabic Linguistics

MINOR IN CLASSICAL STUDIES

REQUIREMENTS

Students must demonstrate proficiency in one of the ancient languages by successfully completing one course in Latin or in ancient Greek at the 1002 level or higher.

Required:

Five of the following:

LATN 2001 & LATN 2002 Intermediate Latin and Vergil's Aeneid

GREK 2001 & GREK 2002 Intermediate Classical Greek I and Intermediate Classical Greek II

GREK 3001 Major Greek Authors I

GREK 3002 Major Greek Authors II

CLAS 2104 Ancient Medicine and Modern Medical Terms

CLAS 2105 Special Topics

CLAS 2105W Special Topics

CLAS 2106 Mythology of the Classical World

CLAS 2107 Greek and Roman Drama

CLAS 2112 Early Aegean and Greek Civilizations to 338 B.C.

CLAS 2113 The Roman World to 337 A.D.

CLAS 2803 The Ancient Near East and Egypt to 322 B.C.

CLAS 2804 History of Ancient Israel

CLAS 3105 Topics in Classical Studies

CLAS 3111 Topics in Ancient History

CLAS 3114 Topics in Ancient Literatures and Cultures

CLAS 3115 Topics in Ancient Art and Archaeology

CLAS 3901 Directed Project

CLAS 3901W Directed Project

CLAS 4901 Directed Project

ANTH 3805 Archaeology of Israel and Neighboring Lands

ANTH 3806 Art and Archaeology of the Aegean Bronze Age

ANTH 3834 Field Research: Old World

AH 3101 Ancient Art of the Bronze Age and Greece

AH 3102 Ancient Art of the Roman Empire

In all cases, cross-listed courses may be substituted (e.g., CLAS 2112/HIST 2112)

CORCORAN SCHOOL OF THE ARTS AND DESIGN

The Corcoran School of the Arts and Design bridges the university's academically robust programs in the arts with Corcoran's creative and inspired scholarship. Part of the GW Columbian College of Arts and Sciences, the school functions as an incubator for artists and practitioners in arts-related fields, and serves to enrich students who are taking classes in other areas of the university. As such, it provides a platform for engagement that bridges creative expression and practical application with the breadth and depth of the larger liberal arts education.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Fine Arts with a major in digital media design (p. 153)
- Bachelor of Fine Arts with a major in fine art (p. 154)
- Bachelor of Fine Arts with a major in fine art photography (p. 155)
- Bachelor of Fine Arts with a major in graphic design (p. 156)
- Bachelor of Fine Arts with a major in photojournalism (p. 157)

GRADUATE

Master's programs

- Master of Arts in the field of exhibition design
- Master of Arts in the field of new media photojournalism
- Master of Fine Arts in the field of interior architecture and design

FACULTY

TBD

COURSES

- Corcoran Art and the Book (CBK) (<https://next.bulletin.gwu.edu/courses/cbk>)
- Corcoran Art Education (CED) (<https://next.bulletin.gwu.edu/courses/ced>)
- Corcoran Art History (CAH) (<https://next.bulletin.gwu.edu/courses/cah>)
- Corcoran Arts & Humanities (CAS) (<https://next.bulletin.gwu.edu/courses/cas>)
- Corcoran Ceramics (CCR) (<https://next.bulletin.gwu.edu/courses/ccr>)
- Corcoran Continuing Education (CCE) (<https://next.bulletin.gwu.edu/courses/cce>)
- Corcoran Design (CDE) (<https://next.bulletin.gwu.edu/courses/cde>)

- Corcoran Digital Media Design (CDM) (<https://next.bulletin.gwu.edu/courses/cdm>)

- Corcoran Sculpture (CSL) (<https://next.bulletin.gwu.edu/courses/csl>)

BACHELOR OF FINE ARTS WITH A MAJOR IN DIGITAL MEDIA DESIGN

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Recommended Program of Study

First year, fall semester

CAH 1090	Art History I: Art Now, Contemporary Perspectives in the Visual Arts
CDE 1090	Design Fundamentals I
CFN 1090	First Year Studio I
UW 1020	University Writing
Studio elective	

First year, spring semester

CAH 1091	Art History II: Historical Perspectives in the Visual Arts
CDE 1091	Design Fundamentals II
CFN 1091	First Year Studio II

G-PAC: Math, social sciences, or humanities requirement

Studio elective

Second year, fall semester

CDE 2090 Design Studio I

CGD 2050 Typography I

G-PAC Social Sciences/Humanities elective

2 Studio electives

Second year, spring semester

CDE 2091 Design Studio II

CGD 2060 Typography II

G-PAC Natural or Physical Science requirement

2 Studio electives

Third year, fall semester

CAH 3150 Theories and History of Graphic Design

CDM 3090 Digital Media Design Studio III

CGD 3050 Typography III

G-PAC: Natural or physical science requirement

Studio elective

Third year, spring semester

CDM 3091 Digital Media Design Studio IV

CGD 3060 Typography IV

Art history requirement

G-PAC: Math, social sciences (+GCC or L/CE), or humanities requirement

Studio elective

Fourth year, fall semester

CDM 4090 Digital Media Design Thesis I

Art history requirement

G-PAC: Humanities or social sciences requirement

2 Studio electives

Fourth year, spring semester

CDE 4170 Professional Practices for Designers

CDM 4091 Digital Media Design Thesis II

G-PAC: Humanities or social sciences (+GCC or L/CE) requirement

2 Studio electives

BACHELOR OF FINE ARTS WITH A MAJOR IN FINE ART

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Recommended Program of Study

First year, fall semester

CAH 1090 Art History I: Art Now, Contemporary Perspectives in the Visual Arts

CFN 1090 First Year Studio I

UW 1020 University Writing

Major requirement

Studio elective

First year, spring semester

CAH 1091 Art History II: Historical Perspectives in the Visual Arts

CFN 1091 First Year Studio II

G-PAC: Social sciences, humanities, or math requirement

Major requirement

Studio elective

Second year, fall semester

G-PAC: Social sciences, humanities, or math requirement

Studio I - Major requirement

2 Studio electives

Major requirement

Second year, spring semester

G-PAC: Natural or physical science requirement

G-PAC: Social sciences or humanities requirement

Studio 2 - Major requirement

Studio elective

Major requirement

Third year, fall semester

G-PAC: Natural or physical science requirement

Studio elective

Studio 3 – Major requirement

Art history requirement

Seminar I

Third year, spring semester

Seminar II

G-PAC: Social sciences, humanities, or math requirement

Studio 4 – major requirement

1 studio elective

Major requirement

Fourth year, fall semester

G-PAC: Social sciences or humanities requirement

Thesis I requirement

Art history requirement

2 Studio electives

Fourth year, spring semester

Art history requirement

2 Studio electives

Studio or other elective

Thesis II requirement

CAH 1090 Art History I: Art Now, Contemporary Perspectives in the Visual Arts

CFN 1090 First Year Studio I

UW 1020 University Writing

Major requirement

Studio elective

First year, spring semester

CAH 1091 Art History II: Historical Perspectives in the Visual Arts

CFN 1091 First Year Studio II

G-PAC: Math, social sciences, or humanities requirement

Studio requirement

Studio elective

Second year, fall semester

G-PAC: Social sciences, humanities, or math requirement

Studio 1 – Major requirement

2 Studio electives

Major requirement

Second year, spring semester

G-PAC: Natural or physical science requirement

G-PAC: Social sciences or humanities requirement

Studio 2 – Major requirement

Studio elective

Major requirement

Third year, fall semester

G-PAC: Natural or physical science requirement

Studio elective

Studio 3 – Major requirement

Art history requirement

Seminar I

Third year, spring semester

G-PAC: Social sciences, humanities, or math requirement

Studio 4 – Major requirement

BACHELOR OF FINE ARTS WITH A MAJOR IN FINE ART PHOTOGRAPHY REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Recommended Program of Study

First year, fall semester

Studio elective

Major requirement

Art history requirement

Fourth year, fall semester

G-PAC: Social sciences or humanities requirement

Thesis I requirement

Art history requirement

2 Studio electives

Seminar II

Fourth year, spring semester

2 Studio electives

1 Studio or other elective

Thesis II requirement

Major requirement

BACHELOR OF FINE ARTS WITH A MAJOR IN GRAPHIC DESIGN

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Recommended Program of Study

First year, fall semester

CAH 1090 Art History I: Art Now, Contemporary Perspectives in the Visual Arts

CDE 1090 Design Fundamentals I

CFN 1090 First Year Studio I

UW 1020 University Writing

Studio elective

First year, spring semester

DATA SCIENCE

Data Science is an emerging field that aims to extract actionable insights from vast arrays of information. Drawing on techniques and theories from statistics, computer science, and mathematics, the program has applications in business, engineering, natural sciences, social sciences, humanities, and health care. Developed through a collaborative effort between the Departments of Statistics (<http://statistics.columbian.gwu.edu>), Mathematics (<http://math.columbian.gwu.edu>), Physics (<http://physics.columbian.gwu.edu>), Economics (<http://economics.columbian.gwu.edu>), Geography (<http://geography.columbian.gwu.edu>), and Political Science (<http://politicalscience.columbian.gwu.edu>).

politicalscience.columbia.gwu.edu), the Data Science program, which offers the Master of Science in Data Science and a graduate certificate in data science, teaches students to understand data and contribute important insights that will change the way people live, work, and communicate. Through a structured curriculum that provides foundational knowledge as well as application skills, students learn how to confront the most complex problems facing government and private industry.

GRADUATE

Master's program

- Master of Science in the field of Data Science (p. 159)

CERTIFICATES

- Graduate certificate in data science (p. 160)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

DATS 6101. Introduction to Data Science. 3 Credits.

The class covers the basic techniques of data science, algorithms for data mining, and basics of statistical modeling. The class focuses on concepts and abstractions, as well as a set of concrete, practical techniques that every data scientist should know. It is an Introduction class hence it is less focused on the details of specific software tools and statistical methodologies. Restricted to Designed primarily for students in the Data Science program, however other students with appropriate backgrounds can register for the course with permission of the instructor. Prerequisites: Basic knowledge of statistics -- STAT 2118 Regression Methods or a similar course that covers analysis of research data through simple and multiple regression and correlation. Exceptions can be made with permission of instructor. Recommended background: An undergraduate degree with a strong background in science, mathematics, or statistics. (Same as STAT 6289).

DATS 6102. Data Warehousing. 3 Credits.

Fundamentals and practical applications of data warehousing, including planning requirements, infrastructure, design, and maintenance. Prerequisites: STAT 2118 or permission of the instructor. Recommended background: An undergraduate degree with a strong background in science, mathematics, or statistics.

DATS 6103. Introduction to Data Mining. 3 Credits.

This course surveys concepts, principles and techniques related to data mining. You will become acquainted with both the strengths and limitations of various data mining techniques like Classification, Association analysis and Cluster analysis. Restricted to Designed primarily for students in the Data Science program, however other students with appropriate backgrounds can register for the course with permission of the instructor. Prerequisites: Basic knowledge of statistics -- STAT 2118 Regression Methods or a similar course that covers analysis of research data through simple and multiple regression and correlation. Exceptions can be made with permission of instructor. Recommended background: An undergraduate degree with a strong background in science, mathematics, or statistics.

DATS 6201. Numerical Linear Algebra and Optimization. 3 Credits.

This course is a study of linear and quadratic programming, nonlinear equations, global and unconstrained optimization, and general linearly and nonlinearly constrained optimization as used in data science. Restricted to Designed primarily for students in the Data Science program, however other students with appropriate backgrounds can register for the course with permission of the instructor. Prerequisites: MATH 2184 or MATH 2185. Recommended background: An undergraduate degree with a strong background in science, mathematics, or statistics.

DATS 6202. Machine Learning I: Algorithm Analysis. 3 Credits.

This course is a practical approach to fundamentals of algorithm design associated with machine learning. Topics include techniques of statistical and probability theory, combinatorial optimization, and factor graph and graph ensemble as used in machine learning. Restricted to Designed primarily for students in the Data Science program, however other students with appropriate backgrounds can register for the course with permission of the instructor. Recommended background: An undergraduate degree with a strong background in science, mathematics, or statistics. (Same as PHYS 6620).

DATS 6203. Machine Learning II: Data Analysis. 3 Credits.

This course is a practical approach to fundamentals of machine learning with an emphasis on data analysis; i.e., how to extract useful information from different datasets. Topics include linear models, error and noise, training and testing methods, and generalization as used in machine learning. Restricted to Designed primarily for students in the Data Science program, however other students with appropriate backgrounds can register for the course with permission of the instructor. Prerequisites: DATS 6101 - Introduction to Data Science. Recommended background: An undergraduate degree with a strong background in science, mathematics, or statistics. (Same as PHYS 6720).

DATS 6401. Visualization of Complex Data. 3 Credits.

This course is a practical approach to fundamentals of data visualization specifically for data science professional. It covers all significant topics, including graphics, discrete and continuous variables, clustering and classification. Restricted to Designed primarily for students in the Data Science program, however other students with appropriate backgrounds can register for the course with permission of the instructor. Prerequisites: Data Science program core courses: 6101, 6102, and 6103. Exceptions can be made with permission of instructor. Recommended background: The Master's in Data Science core courses: 6101, 6102, 6103. Exceptions can be made with the permission of the instructor.

DATS 6402. High Performance Computing and Parallel Computing. 3 Credits.

This course is a practical approach to high performance computing specifically for the data science professional. It covers topics such as parallel architectures and software systems, and parallel programming. Restricted to Designed primarily for students in the Data Science program, however other students with appropriate backgrounds can register for the course with permission of the instructor. Prerequisites: Data Science program core courses: 6101, 6102, and 6103. Exceptions can be made with permission of instructor. Recommended background: An undergraduate degree with a strong background in science, mathematics, or statistics.

DATS 6450. Topics in Data Science. 3 Credits.

The purpose of DATS 6450 being a topics course is to respond to new ideas and issues in the rapidly evolving fields of Data Science and Big Data. Possible topics may include new application areas in Big Data, emerging new languages and development systems, and policy issues arising from impacts of Big Data on individuals and society. Restricted to Intended primarily for students in the Data Science Master's and Certificate programs. Prerequisites: DATS 6101 Introduction to Data Science or permission of instructor. Recommended background: Enrollment in a Data Science graduate program.

DATS 6499. Data Science Applied Research. 3 Credits.

Students conduct research projects under the supervision of the instructor. Project topics build on the knowledge and skills acquired during the data science program. Permission of instructor required.

DATS 6501. Data Science Capstone. 3 Credits.

The course is a final practical application of the knowledge and skills acquired during the data science curriculum. The topics of the capstone team projects will be chosen in consultation with the Capstone Course instructor and the members of the teams. The course is designed to help students transition into the data science profession. Restricted to Designed for students in their last semester of the Data Science program as their final required core course. Prerequisites: Eight courses in the Data Science program, including the core courses 6101, 6102, and 6103 plus five approved courses from the categories Intermediate Analytics, Advanced Analytics, and Electives. Recommended background: Completion of the required courses in the Data Science Master's program.

MASTER OF SCIENCE IN THE FIELD OF DATA SCIENCE

Data Science, and associated areas called Big Data and Data Analytics, is a rapidly emerging technology field fueled by the dramatic growth in the amount of data involved in most areas of society. The 30-credit Master of Science degree allows students to study fundamental ideas that underlie large data systems and apply that knowledge to a variety of technical real-world problems. The Data Science program provides elective courses in fields such as physics, geography, and political science so that students can emphasize the use of data science in areas of their career interests.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

30 credits in required and elective courses.

Required courses:

DATS 6101	Introduction to Data Science
DATS 6102	Data Warehousing
DATS 6103	Introduction to Data Mining
DATS 6501	Data Science Capstone
At least two of the following data science intermediate analytics courses	
DATS 6201	Numerical Linear Algebra and Optimization
DATS 6202	Machine Learning I: Algorithm Analysis
MATH 6522	Introduction to Numerical Analysis

STAT 6201	Mathematical Statistics I
STAT 6207	Methods of Statistical Computing I
STAT 6210	Data Analysis
STAT 6214	Applied Linear Models
STAT 6216	Applied Multivariate Analysis II
STAT 6242	Regression Graphics/Nonparametric Regression
At least two of the following data science advanced analytics courses	
DATS 6203	Machine Learning II: Data Analysis
STAT 6202	Mathematical Statistics II
STAT 6223	Bayesian Statistics: Theory and Applications
STAT 6289	Topics in Statistics
Elective courses:	
At least two of the following	
DATS 6401	Visualization of Complex Data
DATS 6402	High Performance Computing and Parallel Computing
DATS 6450	Topics in Data Science
ECON 8375	Econometrics I
ECON 8376	Econometrics II
ECON 8377	Econometrics III
ECON 8378	Economic Forecasting
GEOG 6304	Geographical Information Systems I
GEOG 6307	Digital Image Processing
PSC 8132	Network Analysis
PSC 8185	Topics in Empirical and Formal Political Analysis

GRADUATE CERTIFICATE IN DATA SCIENCE

Data Science, and associated areas called Big Data and Data Analytics, is a rapidly emerging technology field fueled by the dramatic growth in the amount of data involved in most areas of society. GW's 12-credit graduate certificate program allows students to study fundamental ideas that underlie large data systems and document a knowledge base for work in

data intensive jobs. The certificate can also lead seamlessly to studies in the master's program and career paths that apply data science to real-world problems.

REQUIREMENTS

Specific admission requirements can be found on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

The following requirements must be fulfilled: 12 credits, including 9 credits in elective courses and 3 credits in elective courses.

Required:

DATS 6101	Introduction to Data Science
DATS 6102	Data Warehousing
DATS 6103	Introduction to Data Mining
One of the following:	
DATS 6201	Numerical Linear Algebra and Optimization
DATS 6202	Machine Learning I: Algorithm Analysis
MATH 6522	Introduction to Numerical Analysis
STAT 6201	Mathematical Statistics I
STAT 6207	Methods of Statistical Computing I
STAT 6210	Data Analysis
STAT 6214	Applied Linear Models
STAT 6216	Applied Multivariate Analysis II
STAT 6242	Regression Graphics/Nonparametric Regression

EAST ASIAN LANGUAGES AND LITERATURES

OVERVIEW

The Department of East Asian Languages and Literatures offers instruction in the languages and cultures of China, Japan, and Korea. Courses in the fields of language, literature, and cultural studies introduce students to the long and unique civilizations of the East Asian peoples. The curriculum prepares students for careers in academia, business, diplomacy, government, medicine, and law, among other fields where knowledge of East Asia is critically important.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in Chinese language and literature (p. 161)
- Bachelor of Arts with a major in Japanese language and literature (p. 162)

Minors

- Minor in Chinese language and literature (p. 163)
- Minor in Japanese language and literature (p. 164)
- Minor in Korean language and literature (p. 164)

GRADUATE

Master's program

- Master of Arts in the field of Chinese (p. 164)

FACULTY

Professors J. Chaves, S. Hamano (Chair), A. Huang, Y.-K. Kim-Renaud

Associate Professor P.N. Zhang

Assistant Professors L. Chen, H. Dong, I.L. Hanami, A. Yasuda, H. Zhang

Teaching Assistant Professors M.D. Pak, T. Tsujioka

Teaching Instructor M. Wei

Professorial Lecturers J. Finch, M. Frost, Y. Kang, C. Yang, X. Zhang

Lecturers W.K. Cavanaugh, J. Miller, M. Sato, R. Seya, J. Wang

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
- Chinese (CHIN) (p. 930)
- East Asian Languages and Literature (EALL) (p. 1032)
- Japanese (JAPN) (p. 1141)
- Korean (KOR) (p. 1142)
- Vietnamese (VIET) (p. 1329)

BACHELOR OF ARTS WITH A MAJOR IN CHINESE LANGUAGE AND LITERATURE

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Introductory language sequence (16 credits or the equivalent):

CHIN 1001 & CHIN 1002	Beginning Chinese I and Beginning Chinese II
or CHIN 1011	Intensive Beginning Chinese
CHIN 2003	Intermediate Chinese I
CHIN 2004	Intermediate Chinese II

Required courses (24 hours):

CHIN 3105	Intermediate Chinese III
CHIN 3106	Intermediate Chinese IV
CHIN 3109	Introduction to Classical Chinese
CHIN 3110	Introduction to Classical Chinese
CHIN 3111	Chinese Literature in Translation
CHIN 3112	Chinese Literature in Translation
CHIN 4107	Readings in Modern Chinese I
or CHIN 4108	Readings in Modern Chinese
CHIN 4121W	Advanced Conversation and Composition I
or CHIN 4122W	Advanced Conversation and Composition II

Three courses (9 credits) from the following:

CHIN 3123	Introduction to Chinese Linguistics
CHIN 3124	Introduction to Chinese Linguistics
CHIN 3136W	Chinese Women in Myth, Literature, and Film
or CHIN 3136	Chinese Women in Myth, Literature, and Film
or WSTU 3136W	Chinese Women in Myth, Literature, and Film
or WSTU 3136	Chinese Women in Myth, Literature, and Film
CHIN 3163	Taiwanese Literature and Film

CHIN 3171	Poetry of the Tang and Song Periods
CHIN 3172	Poetry of the Tang and Song Periods
CHIN 3173	Chinese Drama and Theatre
CHIN 4108	Readings in Modern Chinese
CHIN 4119W	Business Chinese
CHIN 4122W	Advanced Conversation and Composition II
CHIN 4179	20th-Century Chinese Literature
CHIN 4180W	20th-Century Chinese Literature II
CHIN 4185	Directed Reading I
CHIN 4186W	Directed Reading II
CHIN 4198	Proseminar: Readings for the Major in Chinese Language and Literature
CHIN 4199	Proseminar: Readings for the Major in Chinese Language and Literature

Two courses (6 credits) from the following:

AH 2190	East Asian Art
ANTH 3705	Anthropology of East Asia
EALL 3811	Confucian Literature in East Asia
or REL 2811	Confucian Literature in East Asia
EALL 3814	Religion and Philosophy in East Asia
or EALL 3814W	Religion and Philosophy in East Asia
or REL 2814	Religion and Philosophy in East Asia
ECON 2169	Introduction to the Economy of China
HIST 3610	China to 1800
HIST 3611	History of Modern China
HIST 3614	Writing Modern Chinese History
or HIST 3614W	Writing Modern Chinese History
HIST 3615	History of Chinese Communism
IAFF 2091	East Asia-Past and Present
JAPN 3111	Japanese Literature in Translation
JAPN 3112	Japanese Literature in Translation
JAPN 3162	Japanese Culture Through Film
or ANTH 3709	Japanese Culture Through Film

KOR 3111	Korean Literature in Translation
KOR 3112	Korean Literature in Translation
PSC 2370	Comparative Politics of China and Northeast Asia
PSC 2371	Politics and Foreign Policy of China
PSC 2475	International Relations of East Asia
REL 2601	Buddhism
REL 3831	Daoism in East Asia
or REL 3831W	Daoism in East Asia
or EALL 3831	Daoism in East Asia
or EALL 3831W	Daoism in East Asia

BACHELOR OF ARTS WITH A MAJOR IN JAPANESE LANGUAGE AND LITERATURE

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Introductory language sequence (16 credits or the equivalent):

JAPN 1001 & JAPN 1002	Beginning Japanese I and Beginning Japanese II
or JAPN 1005	Intensive Beginning Japanese
JAPN 2003 & JAPN 2004	Intermediate Japanese I and Intermediate Japanese II
or JAPN 2006	Intensive Intermediate Japanese
JAPN 2004	Intermediate Japanese II

Required coursework (15 credits):

JAPN 3105	Intermediate Japanese III
JAPN 3106	Intermediate Japanese IV
JAPN 3111	Japanese Literature in Translation
JAPN 3112	Japanese Literature in Translation
JAPN 4109	Introduction to Bungo, Literary Japanese

Six additional courses (18 credits) of Japanese (JAPN) courses numbered 3000 or above

Two courses (6 credits) from the following:

AH 2190	East Asian Art
ANTH 3705	Anthropology of East Asia
CHIN 3111	Chinese Literature in Translation
CHIN 3112	Chinese Literature in Translation
EALL 3811	Confucian Literature in East Asia
or REL 2811	Confucian Literature in East Asia
EALL 3814	Religion and Philosophy in East Asia
or REL 2814	Religion and Philosophy in East Asia
EALL 3831	Daoism in East Asia
or REL 3831	Daoism in East Asia
or REL 3831W	Daoism in East Asia
ECON 2170	Intro to the Economy of Japan
HIST 3610	China to 1800
HIST 3611	History of Modern China
HIST 3621	History of Modern Japan
IAFF 2091	East Asia-Past and Present
KOR 3111	Korean Literature in Translation
KOR 3112	Korean Literature in Translation
PSC 2370	Comparative Politics of China and Northeast Asia
PSC 2374	Politics and Foreign Policy of Japan
PSC 2475	International Relations of East Asia
REL 2601	Buddhism
WSTU 3136	Chinese Women in Myth, Literature, and Film
or WSTU 3136W	Chinese Women in Myth, Literature, and Film
or CHIN 3136	Chinese Women in Myth, Literature, and Film
or CHIN 3136W	Chinese Women in Myth, Literature, and Film

MINOR IN CHINESE LANGUAGE AND LITERATURE

REQUIREMENTS

Introductory language sequence (16 credits or the equivalent):

CHIN 1001 & CHIN 1002	Beginning Chinese I and Beginning Chinese II
or CHIN 1011	Intensive Beginning Chinese
CHIN 2003	Intermediate Chinese I
CHIN 2004	Intermediate Chinese II

Required courses (6 credits):

CHIN 3105	Intermediate Chinese III
CHIN 3106	Intermediate Chinese IV

One course (3 credits) from the following:

CHIN 4107	Readings in Modern Chinese I
CHIN 4108	Readings in Modern Chinese
CHIN 4119W	Business Chinese
CHIN 4121W	Advanced Conversation and Composition I
CHIN 4122W	Advanced Conversation and Composition II

Three courses (9 credits) from the following:

CHIN 3109	Introduction to Classical Chinese
CHIN 3110	Introduction to Classical Chinese
CHIN 3111	Chinese Literature in Translation
CHIN 3112	Chinese Literature in Translation
CHIN 3123	Introduction to Chinese Linguistics
CHIN 3124	Introduction to Chinese Linguistics
CHIN 3136W	Chinese Women in Myth, Literature, and Film
or WSTU 3136W	Chinese Women in Myth, Literature, and Film
CHIN 3163	Taiwanese Literature and Film
CHIN 3171	Poetry of the Tang and Song Periods
CHIN 3172	Poetry of the Tang and Song Periods

CHIN 3173	Chinese Drama and Theatre
CHIN 4179	20th-Century Chinese Literature
CHIN 4180W	20th-Century Chinese Literature II

MINOR IN JAPANESE LANGUAGE AND LITERATURE

REQUIREMENTS

Introductory language sequence (16 credit hours or the equivalent)

JAPN 1001 & JAPN 1002	Beginning Japanese I and Beginning Japanese II
or JAPN 1005	Intensive Beginning Japanese

JAPN 2003 & JAPN 2004	Intermediate Japanese I and Intermediate Japanese II
-----------------------	--

or JAPN 2006	Intensive Intermediate Japanese
--------------	---------------------------------

Six courses (18 credit hours) of Japanese courses chosen from JAPN 3105 through JAPN 4122W, of which at least one of which must be chosen from the following:

JAPN 4107	Readings in Modern Japanese I
-----------	-------------------------------

JAPN 4108	Readings in Modern Japanese II
-----------	--------------------------------

JAPN 4109	Introduction to Bungo, Literary Japanese
-----------	--

JAPN 4110	Readings in Classical Japanese
-----------	--------------------------------

JAPN 4121W	Advanced Conversation and Composition I
------------	---

JAPN 4122W	Advanced Conversation and Composition II
------------	--

MINOR IN KOREAN LANGUAGE AND LITERATURE

REQUIREMENTS

Prerequisite:

KOR 1001	Beginning Korean I
----------	--------------------

KOR 1002	Beginning Korean II
----------	---------------------

KOR 2003	Intermediate Korean I
----------	-----------------------

KOR 2004	Intermediate Korean II
----------	------------------------

Or equivalent

The minor consists of:

KOR 3105	Intermediate Korean III
----------	-------------------------

KOR 3106	Intermediate Korean IV
----------	------------------------

12 additional credits of department-approved Korean courses at the 3000- 4000 level

MASTER OF ARTS IN THE FIELD OF CHINESE LANGUAGE AND CULTURE

Specific admission requirements are shown on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

Required:

Language Proficiency Courses

Up to 3 credits, pre-approval required

All students must achieve advanced proficiency in modern Chinese through the following courses. The student proficiency level is first determined through an entrance exam. Those who pass the exam receive a waiver for the language courses, and are expected to take other courses to fulfill the credit requirement.

CHIN 4108	Readings in Modern Chinese
-----------	----------------------------

CHIN 4122W	Advanced Conversation and Composition II
------------	--

Major Field Courses

At least 18 credits from the following:

CHIN 1111

CHIN 1112

CHIN 6171	Poetry of the Tang and Song Periods
-----------	-------------------------------------

CHIN 6172	Poetry of the Tang and Song Periods
-----------	-------------------------------------

CHIN 6173	Traditional Chinese Theatre and Drama
-----------	---------------------------------------

CHIN 6179	20th Century Chinese Literature I
-----------	-----------------------------------

CHIN 6180	20th-Century Chinese Literature II
-----------	------------------------------------

CHIN 6199	Graduate Seminar
-----------	------------------

CHIN 6123	Structure of Chinese
-----------	----------------------

CHIN 6125	History of the Chinese Language
CHIN 6126	Chinese Phonology
CHIN 6128	Chinese Semantics
CHIN 6201	Second Language Acquisition of Mandarin Chinese
CHIN 6210	Introduction to Teaching Chinese as a Foreign Language
CHIN 6310	Practicum in Chinese Language Instruction

Electives Courses

At least 6 credits from the following:

HIST 6211	
HIST 6610	Readings Seminar: Late Imperial China
REL/EALL 3832/6832	Myth, Ritual, and Popular Religion in China
REL/CHIN 3841/6841	Religion in Modern China
REL/EALL 3881/6881	Women, Gender, and Religion in China
EAP 6111	Academic Writing and Research for International Graduate Students II

EAP 6112

Independent Study

CHIN 6550

ECONOMICS

The study of economics investigates the consequences of scarcity, which forces people, organizations, and governments to choose among competing objectives. Economics looks at these choices and how they affect the production of goods and services, market prices, national output, unemployment, inflation, economic growth, and the use and distribution of resources within and across nations. Part of the social and behavioral sciences in the Columbian College of Arts and Sciences, the economics program exposes students to macroeconomics, microeconomics, labor economics, the economics of industry, international finance, international trade and development, money and banking, the economics of government and public policy, and econometrics.

UNDERGRADUATE

Bachelor's program

- Bachelor of Arts with a major in economics (p. 171)

- Bachelor of Science with a major in economics (p. 172)
- Combined programs (p. 173)

Minor

- Minor in economics (p. 174)

GRADUATE

Master's program

- Master of Arts in the field of economics (p. 175)
- Master of Arts in the field of applied economics (p. 174)

Doctoral program

- Doctor of Philosophy in the field of economics (p. 175)

FACULTY

Professors B.S. Barnow, M.D. Bradley, B.L. Boulier, B.R. Chiswick, J.J. Cordes, V. Fon, J.E. Foster, J.L. Gastwirth, S. Joshi (*Chair*), F.L. Joutz, G.L. Kaminsky, P. Labadie, A.S. Malik, M.O. Moore, D.O. Parsons, R.F. Phillips, J. Pelzman, J.C. Shambaugh, S.C. Smith, A.M. Yezer, R. Van Order, N. Vonortas

Associate Professors P. Carrilo, M.X. Chen, A. Fostel, W.P. Mullin, R.M. Samaniego, T. Sinclair, S.M. Suranovic, C. Wei

Assistant Professors R. Fishman, I.R. Foster, E.W.K. Hovander, R.C. Jedwab, T. Moore, O. Timoshenko, B.D. Williams

Professorial Lecturers R.S. Belous, L. Clauser, H. Hertzfeld, D. Fixler, S.N. Kirby, N. Pham, F.D. Weiss, H. Stekler

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Departmental Prerequisite: ECON 1011 Principles of Economics I–ECON 1012 Principles of Economics II is prerequisite to all other undergraduate courses offered by the Department of Economics.

Courses at the 8000 level are specifically designed for economics graduate students and typically require knowledge of calculus and one or more of the core theory and econometrics courses. Less-well-prepared graduate students in other disciplines may register for 6000-level courses after having completed ECON 6217 Survey of Economics

I-ECON 6218 Survey of Economics II, or ECON 6218 Survey of Economics II and ECON 6219 Managerial Economics, or ECON 2101 Intermediate Microeconomic Theory and ECON 2102 Intermediate Macroeconomic Theory, or ECON 2103 Intermediate Microeconomic Theory: A Mathematical Approach and ECON 2104 Intermediate Macroeconomic Theory: A Mathematical Approach, unless the course description indicates that these prerequisites have been waived. Intermediate-level micro and macro courses taken elsewhere usually satisfy this requirement, but introductory or first-year courses do not. Graduate students in economics can take 6000-level courses only with permission of their advisor.

ECON 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the schedule of classes for more details. Restricted to First-year students in CCAS.

ECON 1011. Principles of Economics I. 3 Credits.

Major economic principles, institutions, and problems in contemporary life. Microeconomics—supply and demand, the price system and how it works, competitive and monopolistic markets.

ECON 1012. Principles of Economics II. 3 Credits.

Continuation of ECON 1011. Major economic principles, institutions, and problems in contemporary life. Topics in macroeconomics, including national income concepts, unemployment and inflation, institutions of monetary control. Prerequisite: ECON 1011.

ECON 2101. Intermediate Microeconomic Theory. 3 Credits.

Analysis of household economic behavior, including derivation of demand functions. Analysis of firm behavior, including derivation of supply frameworks. Demand and supply interaction under various market structures and in factor markets. Prerequisites: ECON 1011 and ECON 1012; and MATH 1221 or MATH 1231 or MATH 1252. Same as ECON 2103.

ECON 2102. Intermediate Macroeconomic Theory. 3 Credits.

Investigation of the determinants of national income, inflation, unemployment, and interest rates. Alternative business cycle theories, with emphasis on the role of imperfect information, uncertainty, and expectations. Prerequisites: ECON 1011, ECON 1012; MATH 1221, MATH 1231, or MATH 1252.

ECON 2103. Intermediate Microeconomic Theory: A Mathematical Approach. 3 Credits.

Analysis of household economic behavior, including derivation of demand functions, and of firm behavior, including derivation of supply frameworks. Demand and supply interaction under various market structures and in factor markets. Reliance on constrained and unconstrained optimization techniques when analyzing household and firm behavior. Corequisite: MATH 1232. Recommended for students pursuing the B.S. degree. Prerequisites: ECON 1011, ECON 1012; MATH 1221, MATH 1231, or MATH 1252.

ECON 2104. Intermediate Macroeconomic Theory: A Mathematical Approach. 3 Credits.

Development and application of mathematical models of aggregate economic behavior with a focus on the intertemporal choices made by households, firms, and governments. The use of rigorous economic analysis provides a deeper understanding of the determinants of the economy's performance. Recommended for students pursuing the B.S. degree. Corequisite: MATH 1232. Prerequisites: ECON 1011, ECON 1012; MATH 1221, MATH 1231, or MATH 1252.

ECON 2121. Financial Economics. 3 Credits.

Economic analysis of key financial institutions, markets, and variables. Investigation of the performance of asset markets and the roles of money, credit, interest rates, and exchange rates. Examination of private sector institutions like equity markets and the banking system and the roles of regulators like the Federal Reserve. Prerequisite: ECON 1011- ECON 1012.

ECON 2122. Monetary Theory and Policy. 3 Credits.

Analysis of classic and modern monetary theories and their application to current economic conditions. The links between theory and policy. The altered role of money over time; the new money technology. Prerequisite: ECON 1011- ECON 1012.

ECON 2123. Introduction to Econometrics. 3 Credits.

Joint offering of the Economics and Statistics Departments. Construction and testing of economic models: regression theory, parameter estimation, and statistical techniques applicable to economic models. Prerequisites: MATH 1221 or MATH 1231 or MATH 1252; STAT 1051 or STAT 1053 or STAT 1111. (Same as STAT 2123).

ECON 2136. Environmental and Natural Resource Economics. 3 Credits.

Analysis of a variety of environmental and natural resource problems. The economic causes of these problems, their consequences, and the relative merits of alternative policies for dealing with them. Prerequisite: ECON 1011- ECON 1012.

ECON 2148. Survey of Health Economics. 3 Credits.

Economic analysis of the determinants of demand, supply, output, and distribution in the health care sector, with special emphasis on current policy issues of access, quality, and cost. Credit may not be earned for both ECON 2148 and ECON 3148. Prerequisites: ECON 1011 - ECON 1012.

ECON 2151. Economic Development. 3 Credits.

Theories and empirical studies of the economic problems of developing countries. Prerequisite: ECON 1011 and ECON 1012.

ECON 2151W. Economic Development. 3 Credits.**ECON 2157. Urban and Regional Economics. 3 Credits.**

Analysis of the determinants of urban growth and development; firm location; the functioning of urban land and housing markets. Prerequisite: ECON 1011- ECON 1012.

ECON 2158. Industrial Organization. 3 Credits.

Analysis of market structure, conduct, and performance of firms in a market economy, with emphasis on case studies of U.S. industries. Prerequisite: ECON 1011- ECON 1012.

ECON 2159. Government Regulation of the Economy. 3 Credits.

Economic analysis of antitrust and regulation in the American economy. Prerequisite: ECON 1011- ECON 1012 and ECON 2101 or ECON 2158.

ECON 2160. Surv:Finance&Engineering Econ. 3 Credits.**ECON 2167. Economics of Crime. 3 Credits.**

Analysis of crime, both empirical and theoretical, that examines the links between law and economics, the economics of criminal participation, and the economics of law enforcement. Prerequisite: ECON 1011- ECON 1012.

ECON 2169. Introduction to the Economy of China. 3 Credits.

Background, organization, and operation of the economy. Appraisal of performance and analysis of problems of development. Prerequisite: ECON 1011- ECON 1012.

ECON 2170. Intro to the Economy of Japan. 3 Credits.

Analysis of the structure and growth of the Japanese economy. Prerequisite: ECON 1011- ECON 1012.

ECON 2180. Survey of International Economics. 3 Credits.

Basic concepts of international trade and international finance, with emphasis on policy issues. Prerequisites: ECON 1011 and ECON 1012.

ECON 2181. International Trade Theory and Policy. 3 Credits.

The basis for international trade and the effect of trade on consumers, producers, and workers; the causes and effects of the international movement of factors including foreign direct investment, outsourcing, and migration; and the impacts of trade policies and trade agreements. Credit may not be earned for both ECON 2181 and ECON 3181. Prerequisites: ECON 1011- ECON 1012.

ECON 2182. International Macroeconomic Theory and Policy. 3 Credits.

Topics include the balance of payments, the determination of exchange rates and prices in open economies, the interaction of the exchange rate and domestic economic activity, international financial markets, and exchange rate and financial crises. Prerequisites: ECON 1011- ECON 1012.

ECON 2185. Economic History and Problems of Latin America. 3 Credits.

Analysis of present structures and problems of Latin American economies. Prerequisite: ECON 1011- ECON 1012.

ECON 2195W. Special Topics. 3 Credits.**ECON 2198. Special Topics in Economics - Regional. 3 Credits.**

Topics cover individual countries or regions of the world and vary depending on current issues of interest and faculty availability. Prerequisites: ECON 1011 - ECON 1012.

ECON 2199. Special Topics in Economics. 3 Credits.

Topics vary depending on current issues of interest and faculty availability. Prerequisites: ECON 1011, ECON 1012.

ECON 3098. Variable Topics-Regional Econ. 1-9 Credits.**ECON 3105. Economic Forecasting. 3 Credits.**

Theory and empirical analyses of economic trends and fluctuations; use of economic indicators and simple econometric models. Prerequisites: ECON 1011- ECON 1012; ECON 2102 or ECON 2104; ECON 2123.

ECON 3142. Labor Economics. 3 Credits.

Analysis of labor supply and demand; measurement and theory of unemployment; occupational choice; wage differentials; labor market issues and policies. Prerequisite: ECON 1011- ECON 1012 and ECON 2101 or ECON 2103.

ECON 3148. Health Economics. 3 Credits.

Analysis of economic theories and applications to the demand for and supply of healthcare. Examination of the role of government in health care, public health, and unhealthy behavior (e.g., smoking). Credit may not be earned for both ECON 2148 and ECON 3148. Prerequisites: ECON 2101 or ECON 2103.

ECON 3161. Public Finance: Expenditure Programs. 3 Credits.

Economic analysis of government spending and social regulation programs. Topics include public goods, externalities, income transfer and social insurance programs, and benefit-cost analysis of government programs. Prerequisite: ECON 1011- ECON 1012 and ECON 2101 or ECON 2103.

ECON 3162. Public Finance: Taxation. 3 Credits.

Economic analysis of taxes. Topics include individual and corporate income taxes, payroll taxes, sales and excise taxes, property and wealth taxes, design of tax systems, and effects of taxation on labor and capital markets. Prerequisite: ECON 1011- ECON 1012 and ECON 2101 or ECON 2103.

ECON 3165. Economics of Human Resources. 3 Credits.

Economic analysis of education and training, labor market discrimination, marriage and the family, and social security. Prerequisite: ECON 1011- ECON 1012 and ECON 2101 or ECON 2103.

ECON 3181. International Trade Theory. 3 Credits.

Rigorous examination of theories of international trade that explain why countries trade and their gains from trade. Theories include comparative advantage, the factor-proportions theory of trade, and recent theoretical developments. The course also deals with the theory of trade policies, such as tariffs and quotas. Credit cannot be earned for both ECON 2181 and ECON 3181. Prerequisites: ECON 2101 or ECON 2103; MATH 1221, MATH 1231, or MATH 1252.

ECON 3190. Law and Economics. 3 Credits.

An introduction to the economic analysis of legal systems. How laws alter behavior and how laws might be designed to satisfy efficiency and fairness criteria. Prerequisite: ECON 1011-ECON 1012 and ECON 2101 or ECON 2103.

ECON 3191. Game Theory. 3 Credits.

An introduction to game theory, covering concepts such as Nash equilibrium, evolutionary games, backward induction and subgame perfection, Bayesian-Nash games of imperfect information, adverse selection, and moral hazard. Prerequisites: ECON 1011-ECON 1012 and ECON 2101.

ECON 3198. Advanced Topics in Economics - Regional. 3 Credits.

Topics cover individual countries or regions of the world and vary depending on current issues of interest and faculty availability. Prerequisites: Depending on the topic: ECON 2101 (or ECON 2103) or ECON 2102 (or ECON (2104) or ECON 2123.

ECON 3199. Advanced Topics in Economics. 3 Credits.

Topics vary depending on current issues of interest and faculty availability. Prerequisites: Depending on the topic: ECON 2101 (or ECON 2103) or ECON 2102 (or ECON (2104) or ECON 2123.

ECON 4198W. Proseminar in Economics. 3 Credits.

Preparation and presentation of a research paper in any field of economics agreed upon by the student and instructor. Restricted to Economics majors in their senior year. Prerequisites: ECON 2101 or ECON 2103 and ECON 2102 or ECON 2104. Recommended background: Prior or concurrent enrollment in ECON 2123 or STAT 2112 or STAT 2118 is recommended.

ECON 4199. Independent Research-Economics. 3 Credits.

Prerequisite: ECON 1011-ECON 1012 and completion of 12 hours of upper-division economics courses, including ECON 2101 or ECON 2103 and ECON 2102 or ECON 2104, with a minimum grade-point average of 3.4; and approval of an independent research project by a faculty member of the Economics Department.

ECON 6217. Survey of Economics I. 3 Credits.

Intermediate-level microeconomic theory for graduate students in fields other than economics.

ECON 6218. Survey of Economics II. 3 Credits.

Continuation of ECON 6217. Intermediate-level macroeconomic theory for graduate students in fields other than economics. (ECON 6217 and ECON 6218-).

ECON 6219. Managerial Economics. 3 Credits.

Intermediate microeconomic theory, with emphasis on production and costs, market structure and pricing, risk analysis, and investment theory and capital budgeting. Credit can be earned for only one of ECON 6217 or ECON 6219.

ECON 6237. Economics of the Environment and Natural Resources. 3 Credits.

Analysis of public policy problems relating to the environment and natural resources development and management. Prerequisite: ECON 6217.

ECON 6239. Economics of Defense. 3 Credits.

Economic analysis applied to national security planning and objectives. Analysis of defense establishment problems, including manpower, the defense industry base, procurement policy.

ECON 6248. Health Economics. 3 Credits.

Demand for medical care; organization of the health care delivery industry; policy issues on regulation, efficiency, and allocation of health care services.

ECON 6249. Industrial Org-TComm Industry. 3 Credits.**ECON 6250. Survey of Economic Development. 3 Credits.**

An introduction to economic problems faced by less developed countries. Emphasis on applications to policymaking and evaluation. Prerequisite: ECON 6217 or ECON 6280 or equivalent.

ECON 6255. Economics of Technological Change. 3 Credits.

Economics of research and development; innovation and growth; the role of government in the development and use of new technology.

ECON 6269. Economy of China I. 3 Credits.

Analysis of organization, operation, policies, and problems. Development of the economy since 1949.

ECON 6270. Economy of China II. 3 Credits.

Continuation of ECON 6269. Examination of critical problems of development. Prerequisite: ECON 6269 or permission of instructor.

ECON 6271. Economy of Japan. 3 Credits.

Analysis of Japanese economic institutions and their contribution to Japan's development.

ECON 6280. Survey of International Economics. 3 Credits.

Introductory international trade and finance, primarily for students in the Elliott School. Topics include the economic effects of trade liberalization and protection, exchange rate determination, and macroeconomic policies in an open economy. Prerequisite: ECON 1011 and ECON 1012.

ECON 6283. Survey of International Trade Theory and Policy. 3 Credits.

For graduate students in fields other than economics. Survey of international economics and policy; application of comparative advantage and other arguments for trade; impact of trade on a domestic economy; new arguments for protectionism; and regional trading blocs.

ECON 6284. Survey of International Macroeconomics and Finance Theory and Policy. 3 Credits.

For graduate students in fields other than economics. Open economy macroeconomics; international finance; balance of payments accounting; exchange markets; alternative models of balance of payments determination and adjustment; behavior of flexible exchange rate systems.

ECON 6285. Economic Development of Latin America. 3 Credits.

Diversity of structures of Latin American economies; import substituting industrialization; inflation; problems of underemployment and income distribution.

ECON 6286. Economic Development of Latin America. 3 Credits.

Continuation of ECON 6285. Structure of trade; protection, exports, and economic development; regional and global economic integration; foreign investment, multinational enterprise, and technology transfer.

ECON 6290. Principles of Demography. 3 Credits.

Introduction to basic demographic perspectives and data; methods for analysis of population size, distribution, and composition; determinants and consequences of population trends. Departmental prerequisite waived. Same as GEOG 6290/ SOC 6290/ STAT 6290.

ECON 6291. Methods of Demographic Analysis. 3 Credits.

Basic methods for analysis of mortality, natality, and migration; population estimates and projections; estimation of demographic measures from incomplete data. Departmental prerequisite waived. Same as GEOG 6291/ SOC 6291/ STAT 6291.

ECON 6292. Topics in International Trade. 3 Credits.

Topics on international trade issues and policy. Primarily for master's students in programs other than economics. May be repeated for credit if topic differs.

ECON 6293. Topics in International Finance. 3 Credits.

Topics on macroeconomic issues and policies in open economies, including exchange rate regimes, determinants of international capital flows, currency crises, financial contagion, current account sustainability and sovereign crises, fiscal problems, and macro-policies in emerging markets and mature economies.

ECON 6294. Topics in Economic Development. 3 Credits.

Topics on economic development issues and policy vary depending on faculty availability and interest. Primarily for master's students in programs other than economics. May be repeated for credit if topic differs.

ECON 6295. Special Topics. 3 Credits.

Topics vary, depending on current issues of interest and faculty availability.

ECON 6298. Reading and Research. 3 Credits.

Limited to master's degree candidates.

ECON 6300. Mathematical Methods for Economics. 3 Credits.

Instruction in the mathematical background required to appreciate and understand the use of mathematics in economic analysis, including multivariable calculus, integral calculus, and linear algebra. Emphasis on techniques for solving systems of equations, unconstrained and constrained optimization, comparative static analysis, difference equations, and analysis of dynamic models and their application to a range of economic problems. Restricted to Graduate applied economics majors only.

ECON 6301. Applied Microeconomic Theory. 3 Credits.

The principal areas of microeconomic theory: consumer demand, decision making under uncertainty, production and costs, game theory, and product markets; both competitive and imperfectly competitive, factor markets, and market failures. Emphasis on the application of theory to microeconomic issues of interest to the private and public sectors, such as product pricing, market entry and deterrence, competition policy, tax policy, and environmental regulation. The level of mathematical rigor is above that in a typical intermediate undergraduate microeconomics course, but below that in a first-year PhD course. Restricted to Graduate applied economics majors only.

ECON 6305. Applied Macroeconomic Theory. 3 Credits.

Development of an integrated framework for analyzing the determination of macroeconomic variables such as total production, unemployment, interest rates and inflation. Interpreting macroeconomic data and macroeconomic policy. A key objective of the course is to provide a link between economic theory and current economic policy. Topics for application may include recent developments in monetary policy and causes of hyperinflation and the national debt. The level of mathematical rigor is above that in a typical intermediate undergraduate macroeconomics course, but below that in a first-year PhD course. Restricted to Graduate applied economics majors only. Prerequisites: ECON 6300 and ECON 6301.

ECON 6374. Probability and Statistics for Economics. 3 Credits.

Focus on specific probability and statistical inference skills required for applied economic problems. Topics include laws of probability, limit laws, random events, independence and dependence, expectations, Bayes theorem, estimation, and hypothesis testing. Discrete and continuous random variables, density, and distribution functions. Various distributional models for observational data. Data manipulation and analysis using both SAS and Stata software. Emphasis on general methods applicable to econometrics. Restricted to graduate applied economics majors only.

ECON 6375. Applied Econometrics. 3 Credits.

An introduction to the skills needed to critically evaluate and conduct econometric analysis. Multiple regression analysis; theoretical underpinnings of the ordinary least squares estimator; interpreting regression results and how to address common issues that arise in regression analysis; econometric methods to estimate and test economic models and to address causal questions using observational data. Students build proficiency in using statistical software to perform basic econometric techniques studied in the course. Restricted to Graduate applied economics majors only. Prerequisites: ECON 6300 and ECON 6374.

ECON 6376. Time Series Analysis. 3 Credits.

The objective of this course is to give students the tools required to understand, implement, and interpret common models used in time series econometrics. Emphasis is placed on intuition and application. The course will both help students understand how to use time series data to test hypotheses and serve as an introduction to the ideas and techniques of forecasting. Topics covered are: time series properties of data (unit roots, near unit roots, stationarity), difference equations, stationary models (autoregressive and moving-average models), models with trends (deterministic and stochastic), multi-equation models (reduced-form and structural VARs), cointegration and error-correction models, models with time-varying coefficients, forecasting models, and basic forecast evaluation. Students will become proficient with performing basic time series analysis and forecasting using time series statistical software. Restricted to applied economics MA students only. Prerequisites: ECON 6374, ECON 6305.

ECON 6997. Independent Research. 1-3 Credits.

This course is limited to master's degree candidates in Economics. Before permission is granted to register for ECON 6997, the student must submit a written plan of study for the approval of the staff member of the department who will be directing the research. The written plan must also be approved by the program director. This course may be repeated once for credit but to no more than a total of 6 credits.

ECON 6998. Thesis Research. 3 Credits.**ECON 6999. Thesis Research. 3 Credits.****ECON 8301. Microeconomic Theory I. 3 Credits.**

Theory of unconstrained optimization; optimization subject to equality and inequality constraints, along with applications. Profit maximization, utility maximization and cost minimization, concave and quasi-concave functions, monotone comparative statics, duality theory, the envelope theorem and Le Chatelier principle, and the Kuhn-Tucker conditions.

ECON 8302. Microeconomic Theory II. 3 Credits.

Expected utility theory, general equilibrium in a pure exchange economy and economy with production, welfare theorems and the core theory of the competitive firm in the short run and long run, monopoly and price discrimination, models of oligopoly. Prerequisite: ECON 8301.

ECON 8303. Microeconomic Theory III. 3 Credits.

Theory of games, including Nash equilibrium and its refinements and comparative statics, evolutionary game theory, multistage games and subgame perfection, repeated games and oligopolistic supergames, static and dynamic Bayesian games, auction theory, and bargaining theory. Prerequisite: ECON 8301 and ECON 8302.

ECON 8305. Macroeconomic Theory I. 3 Credits.

Alternative theories of income, employment, and the price level; impact of monetary and fiscal policy; role of expectations in the economy; and microfoundations of macroeconomic models and dynamic analysis.

ECON 8306. Macroeconomic Theory II. 3 Credits.

Extensions of alternative models of income determination, economic growth, and the application of analytical frameworks to the U.S. and international economies. Prerequisite: ECON 8305.

ECON 8307. Macroeconomic Theory III. 3 Credits.

Extensions to stochastic and dynamic general equilibrium frameworks, with emphasis on economic policy. Prerequisite: ECON 8306.

ECON 8323. Monetary Theory and Policy I. 3 Credits.

Theory of monetary policy within the framework of contemporary American central banking.

ECON 8324. Monetary Theory and Policy II. 3 Credits.

Continuation of ECON 8323. Theory of monetary policy within the framework of contemporary American central banking.

ECON 8337. Environmental Economics. 3 Credits.**ECON 8341. Labor Economics I. 3 Credits.**

Theory of wages and employment, analysis of labor supply and demand. Analysis of unemployment; unions; wage regulation.

ECON 8342. Labor Economics II. 3 Credits.

Continuation of ECON 8341. Theory of wages and employment, analysis of labor supply and demand. Analysis of unemployment; unions; wage regulation.

ECON 8345. Industrial Organization I. 3 Credits.

Economic theory and evidence regarding industrial market structure, conduct, and economic performance.

ECON 8346. Industrial Organization II. 3 Credits.

Continuation of ECON 8345. Economic issues in antitrust and government regulation of the U.S. economy.

ECON 8351. Development Economics I. 3 Credits.

Major analytic concepts, measures, theoretical models, and empirical methods of development economics.

ECON 8352. Development Economics II. 3 Credits.

Continuation of ECON 8351. In-depth examination of special research topics with emphasis on methods in applied microeconomics.

ECON 8357. Regional Economics. 3 Credits.

Study of regional planning and growth models, including input-output, programming, and econometric models used by planning agencies; analysis of interregional production, trade, migration, firm location, and pricing models.

ECON 8358. Urban Economics. 3 Credits.

Analysis of spatial relationships among economic activities within an urban area including the urban land, labor, and housing markets; urban transportation models; fiscal relationships among jurisdictions.

ECON 8363. Public Finance I. 3 Credits.

Theoretical and empirical analysis of the economic role of the public sector and the effects of public expenditures on resource allocation and income distribution. Topics include public goods, externalities, social insurance, and benefit-cost analysis.

ECON 8364. Public Finance II. 3 Credits.

Theoretical and empirical analysis of the effects of taxes and transfers on the allocation of resources and income distribution. Topics include partial and general equilibrium models of tax incidence, effects of taxes on labor supply, saving, and portfolio choices of households and on investment and financing decisions of firms.

ECON 8375. Econometrics I. 3 Credits.

Statistical foundations for econometrics; standard methods of estimation and inference for classical and generalized regression models. Same as STAT 8375.

ECON 8376. Econometrics II. 3 Credits.

Topics may include asymptotic theory, statistical endogeneity, instrumental variables estimation, discrete and limited dependent variable models, and time-series models. Same as STAT 8376. Prerequisite: ECON 8375.

ECON 8377. Econometrics III. 3 Credits.

Econometric methods for systems of equations and panel data, with additional topics that may vary from year to year. Prerequisite: ECON 8376.

ECON 8378. Economic Forecasting. 3 Credits.

Introduction to the theoretical and applied aspects of economic forecasting. Topics include the role of forecasting, univariate time-series analysis, single equation models, multiple series models, and evaluation of forecasts. Prerequisite: ECON 8375 or permission of instructor.

ECON 8379. Laboratory in Applied Econometrics. 0-3 Credits.

Application of econometric theory and the use of econometric software; students are required to write an empirical research paper. The course usually deals exclusively with either micro or macroeconomic issues. May be repeated for credit provided the topic differs.

ECON 8381. International Trade Theory. 3 Credits.

International trade theory, including alternative models of the gains from trade and evaluations of the new justifications for protectionism, and analysis of commercial policy, factor flows, and trade and investment with multinational corporations. Prerequisite: most sections require calculus or permission of instructor.

ECON 8382. International Finance and Open-Economy Macroeconomics. 3 Credits.

International finance, including alternative models of balance of payments behavior and adjustment, payments accounting, exchange markets, and alternative exchange-rate regimes.

ECON 8383. International Financial Markets. 3 Credits.

Financial economics and international financial markets. Topics include standard asset pricing theory, uncertainty in open economy macroeconomics models, financial market micro-structure, and incomplete markets.

ECON 8395. Advanced Special Topics. 3 Credits.

Topics vary depending upon current interests and faculty availability. Open to graduate students in economics. May be repeated for credit.

ECON 8397. Dissertation Proposal Seminar. 3 Credits.

Limited to Doctor of Philosophy candidates in Unit II. Critical analysis of current research. Formulation of a dissertation proposal and development of dissertation research strategies.

ECON 8997. Independent Research. 3 Credits.

This course is limited to doctoral degree candidates in Economics. Departmental approval required to register. Before permission granted to register for ECON 8997, the student must submit a written plan of study for the approval of both the faculty member of the department who will be directing the research. And the Director of Graduate Studies for the PhD Program or the Department Chair. May be repeated for a total of 6 credits.

ECON 8998. Advanced Reading and Research. 1-12 Credits.

Limited to students preparing for the Doctor of Philosophy general examination. May be repeated for credit.

ECON 8999. Dissertation Research. 3-12 Credits.

Limited to Doctor of Philosophy candidates. May be repeated for credit.

BACHELOR OF ARTS WITH A MAJOR IN ECONOMICS

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63) and the following curricular requirements:

Required courses

ECON 1011	Principles of Economics I
ECON 1012	Principles of Economics II
ECON 2101 or ECON 2103	Intermediate Microeconomic Theory Intermediate Microeconomic Theory: A Mathematical Approach
ECON 2102 or ECON 2104	Intermediate Macroeconomic Theory Intermediate Macroeconomic Theory: A Mathematical Approach
ECON 4198W	Proseminar in Economics
MATH 1221 or MATH 1231 or MATH 1252	Calculus with Precalculus II Single-Variable Calculus I Calculus for the Social and Management Sciences
STAT 1111 STAT 2112 or STAT 2118 or ECON 2123	Business and Economic Statistics I (or equivalent) Business and Economic Statistics II Regression Analysis Introduction to Econometrics
6 additional economics courses (18 credits) numbered between 2000 and 4999. A maximum of 3 courses can be regional and 2 international. Only 5 additional courses are required if ECON 2123 was taken instead of STAT 2112.	
Regional courses:	
ECON 2169	Introduction to the Economy of China
ECON 2170	Intro to the Economy of Japan
ECON 2185	Economic History and Problems of Latin America
ECON 2198	Special Topics in Economics - Regional
ECON 3098	Variable Topics-Regional Econ
ECON 3198	Advanced Topics in Economics - Regional
International courses:	
ECON 2180	Survey of International Economics
ECON 2181 or ECON 3181	International Trade Theory and Policy International Trade Theory

ECON 2182 International Macroeconomic Theory and Policy

Two social science courses (6 credits) in a discipline other than economics.

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, a student must have a grade-point average of at least 3.5 in economics courses, and must submit an honors paper to the department. Upon review of the honors paper, the student may be recommended for graduation with Special Honors.

BACHELOR OF SCIENCE WITH A MAJOR IN ECONOMICS

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63) and the following curricular requirements:

Required courses

ECON 1011	Principles of Economics I
ECON 1012	Principles of Economics II
ECON 2103 or ECON 2101	Intermediate Microeconomic Theory: A Mathematical Approach Intermediate Microeconomic Theory
ECON 2104 or ECON 2102	Intermediate Macroeconomic Theory: A Mathematical Approach Intermediate Macroeconomic Theory
ECON 2123	Introduction to Econometrics
ECON 4198W	Proseminar in Economics
MATH 1221 or MATH 1231 or MATH 1252	Calculus with Precalculus II Single-Variable Calculus I Calculus for the Social and Management Sciences
MATH 1232	Single-Variable Calculus II
STAT 1111	Business and Economic Statistics I (or equivalent)

Two courses (6 credits) from the following:

MATH 2233	Multivariable Calculus
MATH 2184	Linear Algebra I
MATH 2971	Introduction to Mathematical Reasoning
CSCI 1041	Introduction to FORTRAN Programming
CSCI 1111	Introduction to Software Development
CSCI 1121	Introduction to C Programming
CSCI 1131	Introduction to Programming with C
CSCI 1311	Discrete Structures I
CSCI 4314	Discrete Analysis-Computer Sci
CSCI 4341	Continuous Algorithms
CSCI 4511	Artificial Intelligence Algorithms
EMSE 2705	Mathematics in Operations Research
EMSE 3701	Operations Research Methods
EMSE 3850	Quantitative Models in Systems Engineering
EMSE 4710	Applied Optimization Modeling
MATH 2572	Introduction to Computing in Mathematics
MATH 3342	Ordinary Differential Equations
MATH 3410	Mathematics of Finance
MATH 4239	Real Analysis I
STAT 1129	Introduction to Computing
STAT 2183	Intermediate Stat Lab/Packages
STAT 3119	Analysis of Variance
STAT 3187	Introduction to Sampling
STAT 4157	Introduction to Mathematical Statistics I
STAT 4158	Introduction to Mathematical Statistics I
STAT 4181	Applied Time Series Analysis
STAT 4188	Nonparametric Stat Inference
STAT 4189	Mathematical Probability and Applications I
STAT 4190	Mathematical Probability and Applications II

STAT 4197 Fundamentals of SAS Programming for Data Management

MATH 2233, MATH 2971, MATH 3342, MATH 3410, and MATH 4239 are strongly recommended for those planning to pursue graduate study in Economics.

Five additional economics courses (15 credits) numbered between 2000 and 4999. A maximum of 3 courses can be regional and two international.

Regional courses:

ECON 2169 Introduction to the Economy of China

ECON 2170 Intro to the Economy of Japan

ECON 2185 Economic History and Problems of Latin America

ECON 2198 Special Topics in Economics - Regional

ECON 3098 Variable Topics-Regional Econ

ECON 3198 Advanced Topics in Economics - Regional

International courses:

ECON 2180 Survey of International Economics

ECON 2181 International Trade Theory and Policy

or ECON 3181 International Trade Theory

ECON 2182 International Macroeconomic Theory and Policy

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, a student must have a grade-point average of at least 3.5 in economics courses, and must submit an honors paper to the department. Upon review of the honors paper, the student may be recommended for graduation with Special Honors.

COMBINED PROGRAMS REQUIREMENTS

The Department of Economics offers two programs leading to combined bachelor's and master's degrees. The programs allow students to take a specified number of graduate credits as part of their undergraduate degree, thereby decreasing the number of credits normally required for the master's degree.

Combined Bachelor of Science/Master of Arts in the field of economics

Students interested in this dual degree program should consult the Department of Economics undergraduate program advisor by the second semester of their sophomore year.

Combined Bachelor of Arts or Bachelor of Science with a Major in Economics and Master of Public Policy

Students interested in this dual degree program should contact the director of the Public Policy program by the second semester of their sophomore year.

For more information visit the program website (<http://economics.columbian.gwu.edu/combined-degree-programs>).

MINOR IN ECONOMICS REQUIREMENTS

ECON 1011 Principles of Economics I

ECON 1012 Principles of Economics II

ECON 2101 Intermediate Microeconomic Theory (credit for either ECON 2101 or ECON 2103 can be applied toward a degree; a grade of C– or better is required)

or ECON 2103 Intermediate Microeconomic Theory: A Mathematical Approach

ECON 2102 Intermediate Macroeconomic Theory (credit for either ECON 2102 or ECON 2104 can be applied toward a degree; a grade of C– or better is required)

or ECON 2104 Intermediate Macroeconomic Theory: A Mathematical Approach

Two other approved upper-division courses in economics

One of the following options:

Option A:

An approved two-course statistics sequence, such as:

STAT 1111 Business and Economic Statistics I

STAT 2112 Business and Economic Statistics II

Option B:

An approved two-course mathematics sequence, such as:

MATH 1231 Single-Variable Calculus I

MATH 1232 Single-Variable Calculus II

Option C:

One approved statistics course, such as:

STAT 1111 Business and Economic Statistics I

One approved mathematics course, such as:

MATH 1231 Single-Variable Calculus I

MATH 1252 Calculus for the Social and Management Sciences

Option D:

One approved mathematics course or one approved statistics course and one additional upper-division course in economics other than:

ECON 2169 Introduction to the Economy of China

ECON 2170 Intro to the Economy of Japan

ECON 2185 Economic History and Problems of Latin America

STAT 1129 Introduction to Computing cannot be used to satisfy the requirements of the minor.

MASTER OF ARTS IN THE FIELD OF APPLIED ECONOMICS REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

The following curriculum requirements must be fulfilled: 30 credits, including 18 credits in core courses and 12 credits in elective courses.

Required:

ECON 6300 Mathematical Methods for Economics

ECON 6301 Applied Microeconomic Theory

ECON 6305 Applied Macroeconomic Theory

ECON 6374 Probability and Statistics for Economics

ECON 6375 Applied Econometrics

ECON 6376 Time Series Analysis

12 credits of elective courses selected from 6000-level economics courses with approval from the program director

Note: ECON 6217, ECON 6218, and ECON 6219 may not be used to fulfill the elective requirement. With program approval, students may select up to two graduate-level courses offered by the Trachtenberg School of Public Policy and Public Administration, School of Business, Milken Institute School of Public Health, and/or School of Engineering and Applied Science to fulfill the elective requirement.

MASTER OF ARTS IN THE FIELD OF ECONOMICS

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

Prerequisite:

A Bachelor's degree with a major in economics or with course work in economics that includes intermediate microeconomic and macroeconomic theory equivalent to:

ECON 2101 Intermediate Microeconomic Theory

ECON 2102 Intermediate Macroeconomic Theory

Or:

ECON 6217 Survey of Economics I

ECON 6218 Survey of Economics II

An understanding of basic calculus equivalent to:

MATH 1231 Single-Variable Calculus I

MATH 1232 Single-Variable Calculus II

Basic statistics, equivalent to:

STAT 1111 Business and Economic Statistics I

STAT 2112 Business and Economic Statistics II

Required: 30 credits consisting of:

ECON 8301 Microeconomic Theory I

ECON 8305 Macroeconomic Theory I

ECON 8375 Econometrics I

Two of the following:

ECON 8302 Microeconomic Theory II

ECON 8306 Macroeconomic Theory II

ECON 8376 Econometrics II

Five additional 8000-level economics courses or four 8000-level economics courses and one 6000-level course approved by the student's Mater of Arts advisor.

DOCTOR OF PHILOSOPHY IN THE FIELD OF ECONOMICS

REQUIREMENTS

The Ph.D. program involves study in two sequential units. Unit I includes satisfactory completion of required coursework, and passing the General Examination. This first unit must be concluded within five years after entry into the program. Upon successful completion of Unit I, students are considered for admission to Unit II, the dissertation stage, which must be completed within five years after entry. In all cases, however, the student is expected to complete the doctorate within eight years after admission.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

The requirements for the Doctor of Philosophy Program (p. 71).

For Unit I, requirements include:

Core theory and econometrics courses:

ECON 8301 Microeconomic Theory I

ECON 8302 Microeconomic Theory II

ECON 8303 Microeconomic Theory III

ECON 8305 Macroeconomic Theory I

ECON 8306 Macroeconomic Theory II

ECON 8307 Macroeconomic Theory III

ECON 8375 Econometrics I

ECON 8376 Econometrics II

Plus 24 additional credits of 8000-level (or approved 6000-level) course work and passing the General Examination

General Examination: The General Examination consists of two preliminary examinations, one in microeconomic theory and

one in macroeconomic theory, and two field examinations. The preliminary examinations are offered at the end of the spring semester examination period. Field examinations are given in econometrics, economic development, environmental and natural resource economics, health economics, industrial organization, international economics, international finance, labor economics, monetary theory and policy, public finance, and regional and urban economics.

To pass the General Examination, students must earn:

1. a grade of "pass" or better in the preliminary examinations in microeconomic and macroeconomic theory and
2. a grade of "satisfactory pass" or better in one of the two field examinations and no grade below "bare pass."

Two of the examinations, preliminary or field, may be taken a second time with the approval of the Department. No further opportunity to take the examinations is permitted. Substitution of a field examination (in an area not originally chosen by the student) to satisfy the requirements of the General Examination is equivalent to taking a field examination a second time. Students should consult with the professors responsible for their fields and notify the Department two months in advance of their intention to take the examinations. If such notification is not given sufficiently in advance, it may not be possible to sit for the examination.

For Unit II, the requirements include formulation of an acceptable dissertation proposal, completion of a dissertation that demonstrates the candidate's ability to do original research, and 24 credits of additional graduate course work, of which at least 12 credits must be dissertation research. Students, including those who have an accepted dissertation proposal, must enroll in a dissertation proposal seminar (ECON 8397 Dissertation Proposal Seminar) in the first semester after promotion to Unit II. Satisfactory performance in the seminar will be equivalent to 3 credits of Unit II course work. In cases where knowledge outside the discipline of economics is critical to the student's research field, up to 6 credits in Unit II may consist of required courses outside the Economics Department.

ENGLISH

Part of the Columbian College of Arts and Sciences' arts and humanities program, the Department of English fosters critical reflection on literature and culture, connecting reading practices with lucid writing and persuasive argumentation. Within an extraordinary range of texts, students explore community, creativity, cultural conflict, history, and other relevant issues.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in English (p. 187)

- Bachelor of Arts with a major in creative writing and English (p. 185)
- Combined program (p. 189)

Minors

- Minor in English (p. 190)
- Minor in creative writing (p. 189)

GRADUATE

Master's program

- Master of Arts in the field of English with optional concentrations in English or American literature (p. 190)

Doctoral program

- Doctor of Philosophy in the field of English with optional concentrations in English or American literature (p. 191)

FACULTY

Professors M. Alcorn, J.J. Cohen, R.L. Combs, P. Cook, M. Frawley, J.G. Harris, A. Huang, S. Knapp, T.V. Mallon, D. McAleavey, R. McRuer (Chair), D. Mitchell, K. Moreland, F. Moskowitz, A. Romines, E. Schreiber, O.A. Seavey, J. Shore, C.W. Sten, A. Thompson, G. Wald, T.G. Wallace

Associate Professors G. Carter, P. Chu, K. Daiya, H. Dugan, J.M. Green-Lewis, P. Griffith, J. Hsy, J.C. James, A. López, D. Moshenberg, M.S. Soltan

Assistant Professors H.G. Carrillo, J. Chang, D. DeWispelare

Adjunct Professors L. Page, A.C. Stokes

Professorial Lecturer K.Z. Keller

Jenny McKean Moore Writer in Washington B. Skyhorse

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Note: The department strongly recommends a literature course, such as ENGL 1315 Literature and the Financial Imagination through ENGL 1711 Introduction to Postcolonial Literature and Film II or ENGL 1830 Tragedy or ENGL 1840 Comedy, as a prerequisite to upper-division English courses. All creative writing courses are limited to 15 students. Two

creative writing courses in the same genre may not be taken during the same semester.

All graduate English courses, except ENGL 6100 Introduction to Literary Theory, may be repeated for credit with permission of the director of graduate studies.

ENGL 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the schedule of classes for more details.

ENGL 1050. Introduction to Literary Studies. 3 Credits.

How to read and interpret literature at the college level and beyond. Close readings of poetry, fiction, and drama, emphasizing genre and form.

ENGL 1210. Introduction to Creative Writing. 3 Credits.

An exploration of genres of creative writing (fiction, poetry, and/or playwriting). Basic problems and techniques; examples of modern approaches; weekly writing assignments; workshop and/or conference discussion of student writing.

ENGL 1305. Colonial/Post-Colonial British Literature. 3 Credits.

ENGL 1315. Literature and the Financial Imagination. 3 Credits.

Literary studies focused broadly on representations of business, finance, or commerce; the economics of literary production; and/or theories of economic class as they pertain to literary works. Topic, genre, and time period vary by instructor.

ENGL 1320. Literature of the Americas. 3 Credits.

American literature considered in a transhemispheric framework as writing that probes and spans the boundaries of the nation, connecting the United States to the rest of the Americas and to other parts of the globe.

ENGL 1320W. Literature of the Americas. 3 Credits.

American literature considered in a transhemispheric framework as writing that probes and spans the boundaries of the nation, connecting the United States to the rest of the Americas and to other parts of the globe.

ENGL 1330. Myths of Britain. 3 Credits.

Why much great English literature turns out not to be so English after all. The literature of the island within a transnational frame. Readings generally range from Beowulf to Arthurian myths to Shakespeare. Topic, genre, and time period vary by instructor.

ENGL 1330W. Myths of Britain. 3 Credits.

Why much great English literature turns out not to be so English after all. The literature of the island within a transnational frame. Readings generally range from Beowulf to Arthurian myths to Shakespeare. Topic, genre, and time period vary by instructor.

ENGL 1340. Essential Shakespeare. 3 Credits.

Links between Shakespeare's geographical and theatrical "Globes." How did Shakespeare and his company represent racial, cultural, and linguistic difference in the Globe? What place did they imagine for England and Europe in this newly globalized world?.

ENGL 1340W. Essential Shakespeare. 3 Credits.

Links between Shakespeare's geographical and theatrical "Globes." How did Shakespeare and his company represent racial, cultural, and linguistic difference in the Globe? What place did they imagine for England and Europe in this newly globalized world?.

ENGL 1351. Shakespeare Seminar. 3 Credits.

Seminar course for first-year students in the Dean's Scholars in Shakespeare Program. Literary study of Shakespeare's poems and plays along with those of his contemporaries. Topic, genre, and time period vary by instructor.

ENGL 1410. Introduction to English Literature I. 3 Credits.

Representative works by major British authors studied in their historical context; discussion of recurrent themes and introduction to various types and forms of imaginative literature. Middle Ages through the 18th century.

ENGL 1410W. Introduction to English Literature I. 3 Credits.

Representative works by major British authors studied in their historical context; discussion of recurrent themes and introduction to various types and forms of imaginative literature. Middle Ages through the 18th century.

ENGL 1411. Introduction to English Literature II. 3 Credits.

Continuation of ENGL 1410. Representative works by major British authors studied in their historical context; discussion of recurrent themes and introduction to various types and forms of imaginative literature. 19th and 20th centuries.

ENGL 1411W. Introduction to English Literature II. 3 Credits.

Continuation of ENGL 1410. Representative works by major British authors studied in their historical context; discussion of recurrent themes and introduction to various types and forms of imaginative literature. 19th and 20th centuries.

ENGL 1510. Introduction to American Literature I. 3 Credits.

Historical survey. From early American writing through Melville, Whitman, and Dickinson.

ENGL 1510W. Introduction to American Literature I. 3 Credits.

Historical survey. From early American writing through Melville, Whitman, and Dickinson.

ENGL 1511. Introduction to American Literature II. 3 Credits.

Continuation of ENGL 1510. Historical survey. From Twain, James, and Crane to the present.

ENGL 1511W. Introduction to American Literature II. 3 Credits.

Continuation of ENGL 1510. Historical survey. From Twain, James, and Crane to the present.

ENGL 1610. Introduction to Black American Literature I. 3 Credits.

Survey of several genres of African American literature. From the 18th through the late 19th centuries, in such cultural contexts as the developing concept of "race."

ENGL 1610W. Introduction to Black American Literature I. 3 Credits.

Survey of several genres of African American literature. From the 18th through the late 19th centuries, in such cultural contexts as the developing concept of "race."

ENGL 1611. Introduction to Black American Literature II. 3 Credits.

Continuation of ENGL 1610. Survey of several genres of African American literature. From the early 20th century to the present day, in such cultural contexts as the "new Negro" Renaissance and the civil rights and Black Power movements.

ENGL 1611W. Introduction to Black American Literature II. 3 Credits.

Continuation of ENGL 1610. Survey of several genres of African American literature. From the early 20th century to the present day, in such cultural contexts as the "new Negro" Renaissance and the civil rights and Black Power movements.

ENGL 1710. Introduction to Postcolonial Literature and Film I. 3 Credits.

Introduction to postcolonial literature from the perspectives of colonizer and colonized in Great Britain, India, Pakistan, Bangladesh, Sri Lanka, Australia, New Zealand, Canada, Anglophone Africa, and the Caribbean region; literature written on the wing, in diaspora.

ENGL 1710W. Introduction to Postcolonial Literature and Film I. 3 Credits.

Introduction to postcolonial literature from the perspectives of colonizer and colonized in Great Britain, India, Pakistan, Bangladesh, Sri Lanka, Australia, New Zealand, Canada, Anglophone Africa, and the Caribbean region; literature written on the wing, in diaspora.

ENGL 1711. Introduction to Postcolonial Literature and Film II. 3 Credits.

Continuation of ENGL 1710. Introduction to postcolonial literature from the perspectives of colonizer and colonized in Great Britain, India, Pakistan, Bangladesh, Sri Lanka, Australia, New Zealand, Canada, Anglophone Africa, and the Caribbean region; literature written on the wing, in diaspora.

ENGL 1711W. Introduction to Postcolonial Literature and Film II. 3 Credits.

Continuation of ENGL 1710. Introduction to postcolonial literature from the perspectives of colonizer and colonized in Great Britain, India, Pakistan, Bangladesh, Sri Lanka, Australia, New Zealand, Canada, Anglophone Africa, and the Caribbean region; literature written on the wing, in diaspora.

ENGL 1830. Tragedy. 3 Credits.

Modes of tragedy as developed in drama, nondramatic verse, and prose fiction in literature from ancient to modern times—Book of Job to Beckett.

ENGL 1830W. Tragedy. 3 Credits.

Modes of tragedy as developed in drama, nondramatic verse, and prose fiction in literature from ancient to modern times—Book of Job to Beckett.

ENGL 1840. Comedy. 3 Credits.

Modes of comedy as developed in drama, nondramatic verse, and prose fiction—Chaucer to Borges.

ENGL 1840W. Comedy. 3 Credits.

Modes of comedy as developed in drama, nondramatic verse, and prose fiction—Chaucer to Borges.

ENGL 2210. Techniques in Creative Writing. 3 Credits.

The craft and technique of creative writing and/or theories of creative writing. Topics vary by semester. Consult the Schedule of Classes for more information.

ENGL 2240. Play Analysis. 3 Credits.

Traditional and nontraditional (Aristotelian and non-Aristotelian) approaches to the analysis of dramatic literature; literary and theatrical techniques used by playwrights. Same as TRDA 2240.

ENGL 2250. Dramatic Writing. 3 Credits.

A workshop in playwriting and screenwriting, with emphasis on dramatic structure. Same as TRDA 2250. Recommended preparation: ENGL 1210 and two semesters of literature courses.

ENGL 2460. Fiction Writing. 3 Credits.

The writing of fiction. Recommended preparation: ENGL 1210 and two semesters of literature courses.

ENGL 2470. Poetry Writing. 3 Credits.

The writing of poetry. Recommended preparation: ENGL 1210 and two semesters of literature courses.

ENGL 2560. Intermediate Fiction Writing. 3 Credits.

The writing of fiction. Prerequisite: ENGL 2460.

ENGL 2570. Intermediate Poetry Writing. 3 Credits.

The writing of poetry. Recommended preparation: ENGL 1210 and two semesters of literature courses.

ENGL 2800. Introduction to Critical Theory. 3 Credits.

Topics and techniques of literary and cultural analysis. Introduction to major schools of critical theory, including psychoanalysis, Marxism, feminism, queer theory, and disability studies.

ENGL 2800W. Introduction to Critical Theory. 3 Credits.

Topics and techniques of literary and cultural analysis. Introduction to major schools of critical theory, including psychoanalysis, Marxism, feminism, queer theory, and disability studies.

ENGL 3240. Introduction to Dramaturgy. 3 Credits.

Fundamentals of classical and contemporary dramaturgical practice, including analyzing plays, doing research, supporting directors and actors in rehearsal, writing program notes, and leading post-show discussions. Same as TRDA 3240.

ENGL 3250. Intermediate Dramatic Writing. 3 Credits.

A workshop developing scripts for both theatre and film. Same as TRDA 3250. Prerequisite: ENGL 2250 . May be repeated for credit with departmental approval.

ENGL 3360. Advanced Fiction Writing. 3 Credits.

Further workshop study of the writing of fiction. Prerequisite: ENGL 2560 . May be repeated for credit with departmental approval.

ENGL 3370. Advanced Poetry Writing. 3 Credits.

Further workshop study of the writing of poetry. Prerequisite: ENGL 2570 . May be repeated for credit with departmental approval.

ENGL 3380. Creative Writing Workshop. 3 Credits.

Taught by the Jenny McKean Moore Writer in Washington; for undergraduates and graduate students. May be repeated for credit if taught by a different instructor. Prerequisites: One of the following upper-level creative writing courses: ENGL 2210, ENGL 2240, ENGL 2250, ENGL 2460, ENGL 2470, ENGL 2560, ENGL 2570, ENGL 3210, ENGL 3240, ENGL 3250, ENGL 3360, ENGL 3370, or ENGL 3390.

ENGL 3390. Topics in Creative Writing. 3 Credits.

Topics announced prior to the registration period; may be repeated for credit provided the topic differs. Topics may include poetry and poetics; forms and methods in fiction; forms and methods in poetry; memoir and personal narratives; creative nonfiction; "Literature, Live"; avant-garde and experimental writing.

ENGL 3400. Topics in Literature and Finance. 3 Credits.

Capstone course for English minors in the School of Business. Analysis of economic theories as they pertain to literary works. Topics may vary.

ENGL 3410. Chaucer. 3 Credits.

Chaucer's major works seen as exciting, lively texts from the modern perspective and as products of specific economic, social, and cultural trends of the late 14th century. Focus on *The Canterbury Tales*, read in the original Middle English.

ENGL 3410W. Chaucer. 3 Credits.

Chaucer's major works seen as exciting, lively texts from the modern perspective and as products of specific economic, social, and cultural trends of the late 14th century. Focus on *The Canterbury Tales*, read in the original Middle English.

ENGL 3420. Medieval Literature. 3 Credits.

Readings from a wide range of medieval genres, including romances, saints' legends, mystical narratives, lyrics, civic drama, and social satires. How these texts responded to and shaped changing patterns of medieval culture, as the clergy, the aristocracy, and the urban bourgeoisie attempted to define a culture of their own.

ENGL 3420W. Medieval Literature. 3 Credits.

Readings from a wide range of medieval genres, including romances, saints' legends, mystical narratives, lyrics, civic drama, and social satires. How these texts responded to and shaped changing patterns of medieval culture, as the clergy, the aristocracy, and the urban bourgeoisie attempted to define a culture of their own.

ENGL 3430. The English Renaissance. 3 Credits.

Verse and prose written in the period 1515-1625, examined in relation to cultural practices and social institutions that shaped English life. More, Sidney, Spenser, Shakespeare, Donne, Jonson, Bacon, Herbert, many others.

ENGL 3440. Shakespeare I. 3 Credits.

Close study of six or seven plays each semester, with emphasis on the texts in history and ideology. Attention to current critical practices (feminist, materialist, psychoanalytic), modern performance practice, and Shakespeare as a cultural institution.

ENGL 3440W. Shakespeare I. 3 Credits.

Close study of six or seven plays each semester, with emphasis on the texts in history and ideology. Attention to current critical practices (feminist, materialist, psychoanalytic), modern performance practice, and Shakespeare as a cultural institution.

ENGL 3441. Shakespeare II. 3 Credits.

Continuation of ENGL 3440. Close study of six or seven plays each semester, with emphasis on the texts in history and ideology. Attention to current critical practices (feminist, materialist, psychoanalytic), modern performance practice, and Shakespeare as a cultural institution.

ENGL 3441W. Shakespeare II. 3 Credits.

Continuation of ENGL 3440. Close study of six or seven plays, with emphasis on the texts in history and ideology. Attention to current critical practices (feminist, materialist, psychoanalytic), modern performance practice, and Shakespeare as a cultural institution.

ENGL 3445. Shakespeare on Film. 3 Credits.

Students will learn in detail the history of a small but significant subset of American and European film production: adaptations of Shakespeare's plays using the original language.

ENGL 3446. Shakespearean London. 3 Credits.

Early modern London's emergence as a global capital and its influence on Shakespeare's plays. Instructor permission required.

ENGL 3450. Topics in Shakespeare Studies. 3 Credits.

Critical study of a particular aspect of Shakespeare's work, or of a distinctive approach to the plays. Projected topics: Shakespeare on film, the history plays and Elizabethan England, 18th-century rewritings of Shakespeare, Shakespeare as poet, cultural materialist readings of Shakespeare.

ENGL 3460. Milton. 3 Credits.

Study of the major works in verse and prose, following the course of Milton's career.

ENGL 3470. English Drama I. 3 Credits.

Shakespeare's contemporaries.

ENGL 3471. English Drama II. 3 Credits.

Continuation of ENGL 3470. Historical survey, 1660 to present.

ENGL 3480. The Eighteenth Century I. 3 Credits.

Readings in significant 18th-century English and Continental writers—Dryden, Swift, Pope, Johnson, Montesquieu, Voltaire, and others—with emphasis on tracing the ways in which literary texts contain, perpetuate, and subvert social and political ideologies.

ENGL 3480W. The Eighteenth Century I. 3 Credits.

Readings in significant 18th-century English and Continental writers—Dryden, Swift, Pope, Johnson, Montesquieu, Voltaire, and others—with emphasis on tracing the ways in which literary texts contain, perpetuate, and subvert social and political ideologies.

ENGL 3481. The Eighteenth Century II. 3 Credits.

Continuation of ENGL 3480. Readings in significant 18th-century English and Continental writers—Dryden, Swift, Pope, Johnson, Montesquieu, Voltaire, and others—with emphasis on tracing the ways in which literary texts contain, perpetuate, and subvert social and political ideologies.

ENGL 3481W. The Eighteenth Century II. 3 Credits.

Continuation of ENGL 3480. Readings in significant 18th-century English and Continental writers—Dryden, Swift, Pope, Johnson, Montesquieu, Voltaire, and others—with emphasis on tracing the ways in which literary texts contain, perpetuate, and subvert social and political ideologies.

ENGL 3490. Early American Literature and Culture. 3 Credits.

The shaping of America's early literary and cultural traditions as shown by significant writers of the colonial and early national periods: Bradstreet, Cotton Mather, Edwards, Franklin, Crèvecoeur, and others.

ENGL 3490W. Early American Literature and Culture. 3 Credits.

The shaping of America's early literary and cultural traditions as shown by significant writers of the colonial and early national periods: Bradstreet, Cotton Mather, Edwards, Franklin, Crèvecoeur, and others.

ENGL 3510. Children's Literature. 3 Credits.

Nineteenth- and twentieth-century children's texts that illuminate the several worlds of childhood: the "small world" of childhood perception, the larger world of social and historical forces, and the "secondary world" of fantasy.

ENGL 3520. American Romanticism. 3 Credits.

The shaping of America's literary and cultural traditions as shown by significant writers of the Romantic era: Poe, Emerson, Hawthorne, Melville, Thoreau, Whitman, Dickinson, and others.

ENGL 3520W. American Romanticism. 3 Credits.

The shaping of America's literary and cultural traditions as shown by significant writers of the Romantic era: Poe, Emerson, Hawthorne, Melville, Thoreau, Whitman, Dickinson, and others.

ENGL 3530. The British Romantic Period. 3 Credits.

Major figures and topics in English and Continental romanticism: Blake, Wordsworth, Coleridge, Lamb, Byron, Shelley, Keats, Hazlitt, DeQuincey, and others.

ENGL 3530W. The British Romantic Period. 3 Credits.

Major figures and topics in English and Continental romanticism: Blake, Wordsworth, Coleridge, Lamb, Byron, Shelley, Keats, Hazlitt, DeQuincey, and others.

ENGL 3540. Victorian Literature I. 3 Credits.

Major writers between 1830 and 1865: E. Brontë, Dickens; Tennyson, Browning, Arnold; Darwin, Carlyle, Ruskin.

ENGL 3540W. Victorian Literature I. 3 Credits.

Major writers between 1830 and 1865: E. Brontë, Dickens, Tennyson, Browning, Arnold, Darwin, Carlyle, Ruskin.

ENGL 3541. Victorian Literature II. 3 Credits.

Major writers between 1865 and 1900: Eliot, Hardy, Conrad, Swinburne, the Rossettis, Morris, Pater, and Wilde.

ENGL 3550. The English Novel I. 3 Credits.

The 18th century—Defoe, Richardson, Fielding, Sterne, and others.

ENGL 3551. The English Novel II. 3 Credits.

Continuation of ENGL 3550. The 19th century—Austen, the Brontës, Dickens, George Eliot, Hardy, and others.

ENGL 3551W. The English Novel II. 3 Credits.

Continuation of ENGL 3550. The 19th century—Austen, the Brontës, Dickens, George Eliot, Hardy, and others.

ENGL 3560. American Realism. 3 Credits.

The shaping of America's literary and cultural traditions as shown by significant writers of the Realist school: Twain, James, Crane, Howells, Wharton, Chopin, Robinson, and others.

ENGL 3560W. American Realism. 3 Credits.

The shaping of America's literary and cultural traditions as shown by significant writers of the Realist school: Twain, James, Crane, Howells, Wharton, Chopin, Robinson, and others.

ENGL 3570. 19th-Century Black Literature. 3 Credits.

Studies in 19th-century black literature of the Americas and the transatlantic. Writing from the United States, Latin America, the Caribbean, Britain, and Africa may be included. Topics and emphasis may vary.

ENGL 3610. Modernism. 3 Credits.

The emergence of modernist experimentation (and the sense of epistemological and moral crisis it expressed) in the poetry and prose of Pound, T.S. Eliot, Woolf, Kafka, and others.

ENGL 3620. American Poetry I. 3 Credits.

Close examination of major American poems from the beginnings to the early 20th century: Poe, Emerson, Whitman, Dickinson, and others.

ENGL 3620W. American Poetry I. 3 Credits.

Close examination of major American poems from the beginnings to the early 20th century: Poe, Emerson, Whitman, Dickinson, and others.

ENGL 3621. American Poetry II. 3 Credits.

Close examination of major American poems since the early 20th century: Frost, Eliot, Stevens, Bishop, Hughes, Ashbery, and others.

ENGL 3621W. American Poetry II. 3 Credits.

Close examination of major American poems since the early 20th century: Frost, Eliot, Stevens, Bishop, Hughes, Ashbery, and others.

ENGL 3630. American Drama I. 3 Credits.

19th-century melodrama and the emergence of realism; works by O'Neill and other dramatists of the early 20th century.

ENGL 3631. American Drama II. 3 Credits.

Continuation of ENGL 3630. Developments in modern American drama since World War II, including works by Williams, Miller, Albee, Shepard, Rabe, Guare, Mamet, Henley, Wasserstein, Shange, Hwang, Wilson, and others.

ENGL 3640. The American Novel I. 3 Credits.

Historical and critical study of major works in the American novelistic tradition. From the beginnings through the 19th century: Hawthorne, Melville, James, Twain, Dreiser, and others.

ENGL 3640W. The American Novel I. 3 Credits.

Historical and critical study of major works in the American novelistic tradition. From the beginnings through the 19th century: Hawthorne, Melville, James, Twain, Dreiser, and others.

ENGL 3641. The American Novel II. 3 Credits.

Continuation of ENGL 3640. Historical and critical study of major works in the American novelistic tradition. The 20th century: Wharton, Cather, Anderson, Hemingway, Fitzgerald, Faulkner, Wright, R.P. Warren, Nabokov, and others.

ENGL 3641W. The American Novel II. 3 Credits.

Continuation of ENGL 3640. Historical and critical study of major works in the American novelistic tradition. The 20th century: Wharton, Cather, Anderson, Hemingway, Fitzgerald, Faulkner, Wright, R.P. Warren, Nabokov, and others.

ENGL 3650. The Short Story. 3 Credits.

An extensive survey of short fiction by a wide variety of writers of the 19th and 20th centuries, about half of them American; readings on the art of the short story by writers and literary critics.

ENGL 3660. 20th-Century Irish Literature I. 3 Credits.

Irish writers from the time of the literary revival in the late 19th century to the present. Yeats and other Irish poets and playwrights of his time and after—Synge, O'Casey, Kavanagh, Heaney, and others.

ENGL 3661. 20th-Century Irish Literature II. 3 Credits.

Continuation of ENGL 3660. Irish writers from the time of the literary revival in the late 19th century to the present. Joyce through Ulysses and other fiction writers of later generations—O'Brien, Beckett, and others.

ENGL 3661W. 20th-Century Irish Literature I. 3 Credits.

Continuation of ENGL 3660. Irish writers from the time of the literary revival in the late 19th century to the present. Joyce through Ulysses and other fiction writers of later generations—O'Brien, Beckett, and others.

ENGL 3710. Contemporary Drama. 3 Credits.

Examines drama written since 1960 in the light of postmodernism as both a literary and a theatrical theory. Explores the ways contemporary playwrights and directors challenge the perceptions and assumptions of today's audience.

ENGL 3710W. Contemporary Drama. 3 Credits.

Examines drama written since 1960 in the light of postmodernism as both a literary and a theatrical theory. Explores the ways contemporary playwrights and directors challenge the perceptions and assumptions of today's audience.

ENGL 3720. Contemporary American Literature. 3 Credits.

Historical, critical, and theoretical study of American literature since the 1960s. Various authors and genres.

ENGL 3720W. Contemporary American Literature I. 3 Credits.

Historical, critical, and theoretical study of American literature since the 1960s. Various authors and genres.

ENGL 3730. Topics in Postcolonial Literature and Film. 3 Credits.

Representations of empire and culture in modern, global Anglophone literature and cinema; cross-cultural encounter, migration, identity, orientalism, gender, environment, conflict, and globalization. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

ENGL 3730W. Topics in Postcolonial Literature. 3 Credits.

Historical, critical, and theoretical study of post-colonial literatures—African, Asian, Commonwealth—written in English. Topics vary with instructor; may be repeated for credit provided the topic differs.

ENGL 3810. Selected Topics in Literature. 3 Credits.

Topics announced in the Schedule of Classes; may be repeated for credit provided the topic differs. Topics may include the Bloomsbury group; southern literature; the picaresque; literature of the Holocaust; literature and politics; Freud, Dostoevsky, and Shakespeare.

ENGL 3810W. Selected Topics in Literature. 3 Credits.

Topics announced in the Schedule of Classes; may be repeated for credit provided the topic differs. Topics may include the Bloomsbury group; southern literature; the picaresque; literature of the Holocaust; literature and politics; Freud, Dostoevsky, and Shakespeare.

ENGL 3820. Major Authors. 3 Credits.

In-depth studies of a single figure or two or three authors (of British, American, or other nationality) who have written in English. Topics announced in the Schedule of Classes; may be repeated for credit provided the topic differs.

ENGL 3820W. Major Authors. 3 Credits.

In-depth studies of a single figure or two or three authors (of British, American, or other nationality) who have written in English. Topics announced in the Schedule of Classes; may be repeated for credit provided the topic differs.

ENGL 3826. Toni Morrison and William Faulkner. 3 Credits.

Commonalities between the fictional and discursive practices of Toni Morrison and William Faulkner; specifically, how their texts reenact and resist racism and patriarchal structures, explore the ways in which memory and the past construct identity, experiment with style.

ENGL 3830. Topics in Literary Theory and Cultural Studies. 3 Credits.

Selected topics in the diverse theoretical methodologies and interdisciplinary studies that characterize contemporary English and American literary studies. May be repeated for credit provided that topic differs.

ENGL 3830W. Topics in Literary Theory and Cultural Studies. 3 Credits.

Selected topics in the diverse theoretical methodologies and interdisciplinary studies that characterize contemporary English and American literary studies. May be repeated for credit provided the topic differs.

ENGL 3840. Gender and Literature. 3 Credits.

Symbolic representations of culturally defined roles and assumptions in literature. Male and female gender roles as fundamental to culture; the representation of culture, in literature especially and in the arts and humanities generally. May be repeated for credit provided the topic differs.

ENGL 3840W. Gender and Literature. 3 Credits.

Symbolic representations of culturally defined roles and assumptions in literature. Male and female gender roles as fundamental to culture; the representation of culture, in literature especially and in the arts and humanities generally. May be repeated for credit provided the topic differs.

ENGL 3850. Ethnicity and Place in American Literature. 3 Credits.

The relationships among ethnic identity, authorship, regional setting, and national consciousness. Differences in the literary culture of ethnically, racially, and regionally diverse American populations, and how considerations of ethnicity and place have been reshaping the American literary canon. Texts and emphases vary by instructor.

ENGL 3860. Topics in the History of the English Language. 3 Credits.

The cultural and literary functions of English across time and space. Scope and methodology vary by instructor. Topics may include language and identity, theoretical and linguistic approaches to language, multilingualism, diasporic writing, or history and periodization.

ENGL 3910. Disability Studies. 3 Credits.

Consideration of cultural texts that illustrate or illuminate issues of ability and disability—terms that extend the prism through which human experience may be understood.

ENGL 3920. U.S. Latina/o Literature and Culture. 3 Credits.

Introduction to the basic texts in the Chicana/o, Cuban-American, Dominican-American, and Puerto Rican literary and cultural traditions. Works by U.S. writers of Central American origin are discussed as well.

ENGL 3930. Topics in U.S. Latina/o Literature and Culture. 3 Credits.

In-depth exploration of a critical issue in the field of Latina/o literary and cultural studies. Topics may include ideologies of literary recovery, transnationalism and diaspora, blackness, and *latinidad*.

ENGL 3930W. Topics in U.S. Latina/o Literature and Culture. 3 Credits.

In-depth exploration of a critical issue in the field of Latina/o literary and cultural studies. Topics may include ideologies of literary recovery, transnationalism and diaspora, blackness and *latinidad*.

ENGL 3940. Topics in African American Literary Studies. 3 Credits.

Intensive study of a single aspect of African American literature: major authors, genre, theme, movement. Substantial attention to the critical tradition.

ENGL 3945. African American Poetry. 3 Credits.

African American poetry from the Black Atlantic through contemporary spoken word and web-based experiments in hypertext composition. Topics vary and may include Langston Hughes, Gwendolyn Brooks, poetry manifestoes, poetry and social justice, or eco-poetics of the black experience.

ENGL 3950. Cultural Theory and Black Studies. 3 Credits.

Selected topics in critical and cultural theories—often interdisciplinary—as used in understanding African American literature and culture. Topics may include genre, medium, period, social change, and leading contemporary African American thinkers/writers.

ENGL 3950W. Cultural Theory and Black Studies. 3 Credits.

Selected topics in critical and cultural theories—often interdisciplinary—as used in understanding African American literature and culture. Topics may include genre, medium, period, social change, and leading contemporary African American thinkers/writers.

ENGL 3960. Asian American Literature. 3 Credits.

How Asian American writers construct their identities in dialogue with shifting ideas of “America.” Asian American history, gendering subjects, orientalism and postcolonial subjectivity, interracial relations, canonization. Representative writers: Kingston, Hwang, Jen, Chang-rae Lee, Ondaatje, Lahiri, Bulosan, Hagedorn.

ENGL 3960W. Asian American Literature. 3 Credits.

How Asian American writers construct their identities in dialogue with shifting ideas of “America.” Asian American history, gendering subjects, orientalism and postcolonial subjectivity, interracial relations, canonization. Representative writers: Kingston, Hwang, Jen, Chang-rae Lee, Ondaatje, Lahiri, Bulosan, Hagedorn.

ENGL 3965. Topics in Asian American Cultural Studies. 3 Credits.

Consideration of Asian American literature as a tradition that questions mainstream constructions of Asian American race and ethnicities, provides alternative accounts of Asian American experiences, and examines how Asian American literature is becoming a global literature with global concerns.

ENGL 3970. Jewish American Literature. 3 Credits.

One hundred years of Jewish American writing including fiction, nonfiction, autobiography, poetry, and drama. The immigrant experience, American philosemitism and antisemitism, the Holocaust and after, the New York intellectuals, Jewish feminism, and the patriarchal tradition.

ENGL 3970W. Jewish American Literature. 3 Credits.

One hundred years of Jewish American writing in fiction, autobiography, poetry, drama, and non-fictional prose. The immigrant experience, American philosemitism and antisemitism, the Holocaust and after, the New York intellectuals, Jewish feminism, and the patriarchal tradition.

ENGL 3980. Queer Studies. 3 Credits.

Examination of literature and culture in the context of the history and experience of lesbian, gay, bisexual, and transgendered people, with consideration of sexual identity as a core component of human experience. May be repeated once for credit provided the topic differs.

ENGL 3980W. Queer Studies. 3 Credits.

Examination of literature and culture in the context of the history and experience of lesbian, gay, bisexual, and transgendered people, with consideration of sexual identity as a core component of human experience. May be repeated once for credit provided the topic differs.

ENGL 3990. Literary Studies Workshop. 1 Credit.

Topics vary by semester. Consult the Schedule of Classes for more details. May be repeated once for credit provided the topic differs.

ENGL 4020. Studies in Contemporary Literature. 1-3 Credits.

Theme-based studies of specific issues or figures in 21st-century literature.

ENGL 4040. Honors Seminar. 3 Credits.

Genre and genre theory; literature as cultural artifact and as instrument of cultural criticism; various critical approaches—ideological, historical, and ahistorical. Open only to first-semester senior honors candidates in English.

ENGL 4040W. Honors Seminar. 3 Credits.

Genre and genre theory; literature as cultural artifact and as instrument of cultural criticism; various critical approaches—ideological, historical, and ahistorical. Open only to first-semester senior honors candidates in English.

ENGL 4135. Folger Seminar. 3 Credits.

The history of books and early modern culture. Use of the archive at the Folger Shakespeare Library. Students must obtain departmental approval in the preceding semester. Same as HIST 4135/ FREN 4135.

ENGL 4220. Creative Writing Senior Thesis. 3 Credits.

Under the guidance of an instructor, the student composes an original manuscript of poetry or short fiction accompanied by an essay situating the student's work in the contemporary context. Open only to seniors admitted to the English and creative writing major.

ENGL 4220W. Creative Writing Senior Thesis. 3 Credits.

Under the guidance of an instructor, the student composes an original manuscript of poetry or short fiction accompanied by an essay situating the student's work in the contemporary context. Open only to seniors admitted to the English and creative writing major.

ENGL 4250. Honors Thesis. 3 Credits.

Under the guidance of an instructor, the student writes a thesis on an approved topic. Open only to senior honors candidates in English.

ENGL 4250W. Honors Thesis. 3 Credits.

Under the guidance of an instructor, the student writes a thesis on an approved topic. Open only to senior honors candidates in English.

ENGL 4360. Independent Study. 1-4 Credits.

For exceptional students, typically majors, whose academic objectives are not accommodated in regular courses. Students must obtain departmental approval and arrange for supervision by an appropriate member of the faculty.

ENGL 4470. Internship. 1-3 Credits.

Position of responsibility with a publication, educational project, firm, or cultural organization offering practical experience in research, writing, editing, etc. Restricted to junior and senior English majors; approval of supervising faculty required for registration. May be repeated for credit; a maximum of 3 credits may be counted toward the English major. P/NP grading only.

ENGL 6100. Introduction to Literary Theory. 3 Credits.

An overview of methodologies for examining texts as linguistic and cultural productions. Methodologies explored may include structuralism, formalism, deconstruction, cultural materialism, postcolonial theory, feminism, gender studies, and queer theory.

ENGL 6120. Advanced Literary Theory. 3 Credits.

The course focuses on a major figure or topic in theory (e.g., Foucault, Lacan, Barthes, Kristeva, Bakhtin, post-Marxist theory, language and power, the canon).

ENGL 6130. Selected Topics in Criticism. 3 Credits.

Topics may include cultural studies, film, gay/lesbian studies, others.

ENGL 6220. Topics in Medieval and Early Modern Studies. 3 Credits.

Topics may include gender and body; postcolonial approaches to the period; surveys of poetry and/or prose with a special thematic coherence.

ENGL 6240. Literature of the British Archipelago. 3 Credits.

The literary and historical texts of early modern and medieval Britain within a pan-insular framework: England in conflict and coexistence with Ireland, Wales, Scotland.

ENGL 6250. Transnational England. 3 Credits.

The early literature of England within a global framework: England, Spain, France, Italy, Turkey, the Levant, the Americas, Africa, India, the Caribbean.

ENGL 6260. Seminar in Medieval and Early Modern Studies. 3 Credits.

Trends and cutting-edge research in medieval and early modern studies.

ENGL 6350. Nineteenth Century I. 3 Credits.

Topics in British and American nineteenth-century writing and culture, exploring national traditions and international movements and issues, such as Romanticism, Realism, and others.

ENGL 6351. Nineteenth Century II. 3 Credits.

Continuation of ENGL 6350. Topics in British and American nineteenth-century writing and culture, exploring national traditions and international movements and issues, such as Romanticism, Realism, and others.

ENGL 6352. Nineteenth Century III. 3 Credits.

Continuation of ENGL 6351. Topics in British and American nineteenth-century writing and culture, exploring national traditions and international movements and issues, such as Romanticism, Realism, and others.

ENGL 6353. Nineteenth Century IV. 3 Credits.

Continuation of ENGL 6352. Topics in British and American nineteenth-century writing and culture, exploring national traditions and international movements and issues, such as Romanticism, Realism, and others.

ENGL 6450. Twentieth Century I. 3 Credits.

Topics in twentieth-century British and American writing and culture, exploring national traditions and international movements and issues, such as literary modernism, anti-modernist and post-modernist currents, others.

ENGL 6451. Twentieth Century II. 3 Credits.

Continuation of ENGL 6450. Topics in twentieth-century British and American writing and culture, exploring national traditions and international movements and issues, such as literary modernism, anti-modernist and post-modernist currents, others.

ENGL 6452. Twentieth Century III. 3 Credits.

Continuation of ENGL 6451. Topics in twentieth-century British and American writing and culture, exploring national traditions and international movements and issues, such as literary modernism, anti-modernist and post-modernist currents, others.

ENGL 6453. Twentieth Century IV. 3 Credits.

Continuation of ENGL 6452. Topics in twentieth-century British and American writing and culture, exploring national traditions and international movements and issues, such as literary modernism, anti-modernist and post-modernist currents, others.

ENGL 6510. Writing, Race and Nation. 3 Credits.

Literary culture as a basis for exploration of intersections of origins and evolution of racial and ethnic identities and national myths and political objectives.

ENGL 6520. Ethnicity and Identity. 3 Credits.

Literary culture is used to explore how individuals, communities, and societies construct self-awareness and knowledge about others for cultural exchange.

ENGL 6530. Conceptualizing Genders. 3 Credits.

Structures of sex and gender difference considered historically and theoretically, including masculinity/femininity, sexualities, and their textual representations.

ENGL 6540. Women and Writing. 3 Credits.

Selected topics in the traditions, theory, and texts of women's literary production and culture. Same as WSTU 6251.

ENGL 6550. Studies in Genre I. 3 Credits.

Questions of genre, considered theoretically and practically. Content varies.

ENGL 6551. Studies in Genre II. 3 Credits.

Continuation of ENGL 6550. Questions of genre, considered theoretically and practically. Content varies.

ENGL 6560. Postcolonialism. 3 Credits.

Postcolonial theory and texts by representative writers.

ENGL 6620. Medicine and Society. 3 Credits.

The interaction of medicine and society in ways that touch on philosophy, economics, sociology, and public policy, but that cannot be fully understood in terms of any single perspective. Society's effect on medicine and medicine's effect on society.

ENGL 6630. Literature and Medicine. 3 Credits.

Methods of critical theory applied to issues concerning the practice of medicine. The polar constructs of illness and health, life and death, and life's worth or its waste.

ENGL 6720. Independent Research. 3 Credits.

Written permission of instructor required. May be repeated for credit to a maximum of 9 hours.

ENGL 6740. Mastering the Canon. 3 Credits.

Independent reading under a faculty member.

ENGL 6810. Folger Institute Seminars I. 3 Credits.

Topics announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Consult the graduate advisor before registration.

ENGL 6811. Folger Institute Seminars II. 3 Credits.

Continuation of ENGL 6810. Topics announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Consult the graduate advisor before registration.

ENGL 6998. Thesis Research. 3 Credits.

ENGL 6999. Thesis Research. 3 Credits.

ENGL 8998. Advanced Reading and Research. 1-12 Credits.

Limited to students preparing for the Doctor of Philosophy general examination. May be repeated for credit.

ENGL 8999. Dissertation Research. 3-12 Credits.

Limited to Doctor of Philosophy candidates. May be repeated for credit. ENGL 8999 must be taken as the final 12 credit hours of the degree.

BACHELOR OF ARTS WITH A MAJOR IN CREATIVE WRITING AND ENGLISH

REQUIREMENTS

Except for the requirement of a creative thesis, this major closely resembles the curriculum that is followed by an English major pursuing a creative writing minor. Admission to the major is restricted, and a separate application must be filed in writing prior to the senior year. No more than two students per thesis director are accepted per year.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Introductory course (3 credits) from the following:

ENGL 1305	Colonial/Post-Colonial British Literature
ENGL 1315	Literature and the Financial Imagination
ENGL 1330	Myths of Britain
or ENGL 1330W	Myths of Britain
ENGL 1340	Essential Shakespeare
or ENGL 1340W	Essential Shakespeare
ENGL 1410	Introduction to English Literature I
or ENGL 1410W	Introduction to English Literature I
ENGL 1411	Introduction to English Literature II
ENGL 1510	Introduction to American Literature I

or ENGL 1510W	Introduction to American Literature I
ENGL 1511	Introduction to American Literature II
or ENGL 1511W	Introduction to American Literature II
ENGL 1610	Introduction to Black American Literature I
or ENGL 1610W	Introduction to Black American Literature I
ENGL 1611	Introduction to Black American Literature II
or ENGL 1611W	Introduction to Black American Literature II
ENGL 1710	Introduction to Postcolonial Literature and Film I
or ENGL 1710W	Introduction to Postcolonial Literature and Film I
ENGL 1711	Introduction to Postcolonial Literature and Film II
or ENGL 1711W	Introduction to Postcolonial Literature and Film II
ENGL 1830	Tragedy
or ENGL 1830W	Tragedy
ENGL 1840	Comedy
or ENGL 1840W	Comedy
One course (3 credits) in literature before the 18th century, from the following:	
ENGL 3410	Chaucer
or ENGL 3410W	Chaucer
ENGL 3420	Medieval Literature
or ENGL 3420W	Medieval Literature
ENGL 3430	The English Renaissance
ENGL 3440	Shakespeare I
or ENGL 3440W	Shakespeare I
ENGL 3441	Shakespeare II
or ENGL 3441W	Shakespeare II
ENGL 3450	Topics in Shakespeare Studies
ENGL 3460	Milton
ENGL 3470	English Drama I

ENGL 3490 Early American Literature and Culture

or ENGL 3490W Early American Literature and Culture

ENGL 4135 Folger Seminar

One course (3 credits) in literature after the 19th century, from the following:

ENGL 3510 Children's Literature

ENGL 3610 Modernism

ENGL 3621 American Poetry II

or ENGL 3621W American Poetry II

ENGL 3630 American Drama I

ENGL 3631 American Drama II

ENGL 3641 The American Novel II

or ENGL 3641W The American Novel II

ENGL 3650 The Short Story

ENGL 3660 20th-Century Irish Literature I

ENGL 3661 20th-Century Irish Literature II

or ENGL 3661W 20th-Century Irish Literature I

ENGL 3710 Contemporary Drama

or ENGL 3710W Contemporary Drama

ENGL 3720 Contemporary American Literature

or ENGL 3720W Contemporary American Literature

ENGL 3721 Contemporary American Literature II

or ENGL 3721W Contemporary American Literature II

ENGL 3730 Topics in Postcolonial Literature

or ENGL 3730W Topics in Postcolonial Literature

ENGL 3850 Ethnicity and Place in American Literature

ENGL 3930 Topics in U.S. Latina/o Literature and Culture

or ENGL 3930W Topics in U.S. Latina/o Literature and Culture

ENGL 3960 Asian American Literature

or ENGL 3960W Asian American Literature

ENGL 3970 Jewish American Literature

or ENGL 3970W Jewish American Literature

One course (3 credits) in minority/postcolonial literature, from the following:

ENGL 3570 19th-Century Black Literature

ENGL 3660 20th-Century Irish Literature I

ENGL 3661 20th-Century Irish Literature II

or ENGL 3661W 20th-Century Irish Literature I

ENGL 3730 Topics in Postcolonial Literature

or ENGL 3730W Topics in Postcolonial Literature

ENGL 3850 Ethnicity and Place in American Literature

ENGL 3910 Disability Studies

ENGL 3920 U.S. Latina/o Literature and Culture

ENGL 3930 Topics in U.S. Latina/o Literature and Culture

or ENGL 3930W Topics in U.S. Latina/o Literature and Culture

ENGL 3940 Topics in African American Literary Studies

ENGL 3950 Cultural Theory and Black Studies

or ENGL 3950W Cultural Theory and Black Studies

ENGL 3960 Asian American Literature

or ENGL 3960W Asian American Literature

ENGL 3980 Queer Studies

or ENGL 3980W Queer Studies

Five creative writing workshops (12 credits), two of which must be at the 3000-level or above, from the following:

ENGL 2250 Dramatic Writing

or TRDA 2250 Dramatic Writing

ENGL 2460 Fiction Writing

ENGL 2470 Poetry Writing

ENGL 2560 Intermediate Fiction Writing

ENGL 2570 Intermediate Poetry Writing

ENGL 3250 Intermediate Dramatic Writing

or TRDA 3250 Intermediate Dramatic Writing

ENGL 3360 Advanced Fiction Writing

ENGL 3370	Advanced Poetry Writing
ENGL 3380	Creative Writing Workshop
ENGL 3390	Topics in Creative Writing
Required courses (9 credits):	
ENGL 2210	Techniques in Creative Writing
ENGL 3210	Readings in Creative Writing

SPECIAL HONORS

Majors in Creative Writing and English who wish to be considered for Special Honors must apply in writing in the spring semester of the junior year; they must meet the requirements stated under University Regulations and have a GPA of 3.25 in courses in the English Department at the time of applying. Candidates take ENGL 4040 Honors Seminar in the fall semester of the senior year and ENGL 4250 Honors Thesis in the spring semester. To be eligible for graduation with Special Honors, candidates must earn an A or A– on the Honors Thesis and have achieved a 3.4 grade-point average in courses in the English Department.

BACHELOR OF ARTS WITH A MAJOR IN ENGLISH

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Prerequisite course(s):

One introductory English literature course chosen from the following:

ENGL 1305	Colonial/Post-Colonial British Literature
ENGL 1315	Literature and the Financial Imagination
ENGL 1320	Literature of the Americas
or ENGL 1320W	Literature of the Americas
ENGL 1330	Myths of Britain
ENGL 1340	Essential Shakespeare
or ENGL 1340W	Essential Shakespeare
ENGL 1410/	Introduction to English Literature I
or ENGL 1410W	Introduction to English Literature I
ENGL 1411	Introduction to English Literature II

or ENGL 1411W Introduction to English Literature II

ENGL 1510 Introduction to American Literature I

or ENGL 1510W Introduction to American Literature I

ENGL 1511 Introduction to American Literature II

or ENGL 1511W Introduction to American Literature II

ENGL 1610 Introduction to Black American Literature I

or ENGL 1610W Introduction to Black American Literature I

ENGL 1611 Introduction to Black American Literature II

or ENGL 1611W Introduction to Black American Literature II

ENGL 1710 Introduction to Postcolonial Literature and Film I

or ENGL 1710W Introduction to Postcolonial Literature and Film I

ENGL 1711 Introduction to Postcolonial Literature and Film II

or ENGL 1711W Introduction to Postcolonial Literature and Film II

ENGL 1830 Tragedy

ENGL 1840 Comedy

or ENGL 1840W Comedy

Required courses in related areas:

Required for the major:

33 credit hours of upper-division English courses including:

Two courses in literature before the 18th century from the following:

Certain Special Topics and Major Authors courses can fulfill this requirement

ENGL 3410 Chaucer

ENGL 3420 Medieval Literature

ENGL 3430 The English Renaissance

ENGL 3440 Shakespeare I

ENGL 3441 Shakespeare II

ENGL 3450 Topics in Shakespeare Studies

ENGL 3460	Milton
ENGL 3470	English Drama I
ENGL 3490	Early American Literature and Culture
ENGL 4135	Folger Seminar

Two courses in literature between the 18th and 19th centuries from the following:

Certain Special Topics and Major Authors courses can fulfill this requirement

ENGL 3480	The Eighteenth Century I
ENGL 3481	The Eighteenth Century II
ENGL 3490	Early American Literature and Culture
ENGL 3510	Children's Literature
ENGL 3530	The British Romantic Period
ENGL 3540	Victorian Literature I
ENGL 3541	Victorian Literature II
ENGL 3550	The English Novel I
ENGL 3551	The English Novel II
ENGL 3520	American Romanticism
ENGL 3560	American Realism
ENGL 3620	American Poetry I
ENGL 3620	American Poetry I
ENGL 3640	The American Novel I
ENGL 3570	19th-Century Black Literature

One course in literature after the 19th century from the following:

Certain Special Topics and Major Authors courses can fulfill this requirement

ENGL 3510	Children's Literature
ENGL 3610	Modernism
ENGL 3621	American Poetry II
ENGL 3630	American Drama I
ENGL 3631	American Drama II
ENGL 3641	The American Novel II
ENGL 3650	The Short Story

ENGL 3660	20th-Century Irish Literature I
ENGL 3661	20th-Century Irish Literature II
ENGL 3710	Contemporary Drama
ENGL 3720	Contemporary American Literature
ENGL 3721	Contemporary American Literature II
ENGL 3730	Topics in Postcolonial Literature
ENGL 3850	Ethnicity and Place in American Literature
ENGL 3930	Topics in U.S. Latina/o Literature and Culture
ENGL 3960	Asian American Literature
ENGL 3970	Jewish American Literature

One course in minority/postcolonial literature from the following:

Certain Special Topics and Major Authors courses can fulfill this requirement

ENGL 3570	19th-Century Black Literature
ENGL 3660	20th-Century Irish Literature I
ENGL 3661	20th-Century Irish Literature II
ENGL 3730	Topics in Postcolonial Literature
ENGL 3850	Ethnicity and Place in American Literature
ENGL 3910	Disability Studies
ENGL 3920	U.S. Latina/o Literature and Culture
ENGL 3930	Topics in U.S. Latina/o Literature and Culture
ENGL 3940	Topics in African American Literary Studies
ENGL 3950	Cultural Theory and Black Studies
ENGL 3960	Asian American Literature
ENGL 3965	Topics in Asian American Cultural Studies
ENGL 3980	Queer Studies

Two courses in literary theory and/or cultural studies including ENGL 2800W and one of the following:

Certain Special Topics and Major Authors courses can fulfill this requirement

ENGL 2240	Play Analysis
ENGL 2800	Introduction to Critical Theory
ENGL 3610	Modernism
ENGL 3830	Topics in Literary Theory and Cultural Studies
ENGL 3840	Gender and Literature
ENGL 3860	Topics in the History of the English Language
ENGL 3910	Disability Studies
ENGL 3920	U.S. Latina/o Literature and Culture
ENGL 3950	Cultural Theory and Black Studies
ENGL 3965	Topics in Asian American Cultural Studies
ENGL 3980	Queer Studies
ENGL 4040	Honors Seminar
ENGL 4250	Honors Thesis

Three additional upper-division English courses, which may be in creative writing. With approval of the English Department, two courses in the literature of a foreign language (either in the original language or in translation) may be substituted for English electives.

ENGL 2800W	Introduction to Critical Theory
------------	---------------------------------

With departmental approval, courses with appropriate subject matter may be substituted for those specified above. A single course may fulfill only one requirement.

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, students must apply in writing in the spring semester of the junior year; and they must have a GPA of 3.25 in courses in the English Department at the time of applying. Candidates take ENGL 4040 Honors Seminar in the fall semester of the senior year and ENGL 4250 Honors Thesis in the spring semester. Candidates must earn an A or A– on the Honors Thesis and have achieved a 3.4 grade-point average in courses in the English Department.

COMBINED PROGRAM

REQUIREMENTS

Combined Bachelor of Arts/Master of Arts in the field of English

Interested students should consult a departmental advisor early in their junior year.

MINOR IN CREATIVE WRITING REQUIREMENTS

One introductory literature course (3 credits) from the following:

ENGL 1305	Colonial/Post-Colonial British Literature
ENGL 1315	Literature and the Financial Imagination
ENGL 1320	Literature of the Americas
or ENGL 1320W	Literature of the Americas
ENGL 1330	Myths of Britain
or ENGL 1330W	Myths of Britain
ENGL 1340	Essential Shakespeare
or ENGL 1340W	Essential Shakespeare
ENGL 1410	Introduction to English Literature I
or ENGL 1410W	Introduction to English Literature I
ENGL 1411	Introduction to English Literature II
or ENGL 1411W	Introduction to English Literature II
ENGL 1510	Introduction to American Literature I
or ENGL 1510W	Introduction to American Literature I
ENGL 1511	Introduction to American Literature II
or ENGL 1511W	Introduction to American Literature II
ENGL 1610	Introduction to Black American Literature I
or ENGL 1610W	Introduction to Black American Literature I
ENGL 1611	Introduction to Black American Literature II
or ENGL 1611W	Introduction to Black American Literature II
ENGL 1710	Introduction to Postcolonial Literature and Film I
or ENGL 1710W	Introduction to Postcolonial Literature and Film I
ENGL 1711	Introduction to Postcolonial Literature and Film II
or ENGL 1711W	Introduction to Postcolonial Literature and Film II

ENGL 1830 Tragedy

or ENGL 1830W Tragedy

ENGL 1840 Comedy

or ENGL 1840W Comedy

Six additional English (ENGL) courses (18 credits), of which five must be in creative writing:

At least three in poetry:

ENGL 2470 Poetry Writing

ENGL 2570 Intermediate Poetry Writing

ENGL 3370 Advanced Poetry Writing

ENGL 3380 Creative Writing Workshop

Or three in fiction:

ENGL 2460 Fiction Writing

ENGL 2560 Intermediate Fiction Writing

ENGL 3360 Advanced Fiction Writing

ENGL 3380 Creative Writing Workshop

Or two in dramatic writing:

ENGL 2250 Dramatic Writing

or TRDA 2250 Dramatic Writing

ENGL 3250 Intermediate Dramatic Writing

or TRDA 3250 Intermediate Dramatic Writing

ENGL 3390 Topics in Creative Writing

MINOR IN ENGLISH

REQUIREMENTS

Introductory courses (3 credits):

ENGL 1305 Colonial/Post-Colonial British Literature

ENGL 1315 Literature and the Financial Imagination

ENGL 1320/1320W Literature of the Americas

ENGL 1330/1330W Myths of Britain

ENGL 1340/1340W Essential Shakespeare

ENGL 1410/1410W Introduction to English Literature I

ENGL 1411/1411W Introduction to English Literature II

ENGL 1510/1510W Introduction to American Literature I

ENGL 1511/1511W Introduction to American Literature II

ENGL 1610/1610W Introduction to Black American Literature I

ENGL 1611/1611W Introduction to Black American Literature II

ENGL 1710/1710W Introduction to Postcolonial Literature and Film I

ENGL 1711/1711W Introduction to Postcolonial Literature and Film II

ENGL 1830/1830W Tragedy

ENGL 1840/1840W Comedy

Required courses:

Five literature courses (15 credits) in English (ENGL) numbered 2000 or above.

MASTER OF ARTS IN THE FIELD OF ENGLISH WITH OPTIONAL CONCENTRATIONS IN ENGLISH OR AMERICAN LITERATURE

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

Prerequisite: a Bachelor of Arts degree with an undergraduate major in English or American literature, or 24 credits in English or American literature above the sophomore level.

Required:

1. 30 credits of course work planned in consultation with the department advisor
2. A master's portfolio submitted at the end of course work.

Students have the option of writing a thesis (6 credits) on an approved topic, directed by a member of the department's graduate faculty. Students must maintain a grade-point average of at least 3.25.

DOCTOR OF PHILOSOPHY IN THE FIELD OF ENGLISH WITH OPTIONAL CONCENTRATIONS IN ENGLISH OR AMERICAN LITERATURE

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Prerequisite: a Bachelor of Arts degree with an undergraduate major in English or American literature, or 24 credits in English or American literature above the sophomore level.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

The requirements for the Doctor of Philosophy Program (p. 71).

Required:

1. Coursework planned in consultation with the department advisor
2. A comprehension exam in a language approved by the department
3. A qualifying examination passed at the beginning of the student's second year and a field examination passed by the end of the student's coursework, topics and reading lists for which are designed in consultation with two graduate faculty advisors
4. A dissertation proposal after the field exam
5. A dissertation on an approved topic, directed by a member of the department's graduate faculty, and completed by the end of the fifth year of study.

Each student plans a program of studies in consultation with the department advisor and a committee of the graduate faculty. Students must maintain a grade-point average of at least 3.5.

ENGLISH FOR ACADEMIC PURPOSES

FACULTY

Director M. Siczek

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Students who are not placed into EAP 6110 Academic Writing and Research for International Graduate Students I and EAP 6111 Academic Writing and Research for International Graduate Students II require instructor's permission to register.

EAP 1010. Academic Communication. 3 Credits.

Develops international students' oral academic English skills to prepare them for success in U.S. higher educational settings. Focus on listening and note-taking, leading and participating in class discussions, managing a variety of authentic academic literacy tasks, and delivering presentations. Additional emphasis on developing multi-literacy through intercultural, multimedia, and visual communication. Restricted to international students.

EAP 1015. American Multicultural Perspectives in Washington, D.C.. 3 Credits.

Designed to prepare international undergraduate students for university-level writing expectations. A structured academic writing course that explores the capital's rich multicultural heritage. Focus on the development of academic literacy skills, drafting and revising, and research-based writing. Upon successful completion of EAP 1015, students take UW 1020.

EAP 1016. Academic Skills Workshop. 1 Credit.

Development of critical academic skills for international students. Workshop topics may include grammar for academic writing, critical reading, listening and note-taking, academic vocabulary development, and discussion and presentation skills. Credit for this course cannot be applied to a degree.

EAP 1046. Independent Study. 1-4 Credits.

Individualized instruction in specific skill areas. Program director approval required. Credit for this course cannot be applied toward a degree.

EAP 6000. Academic Communication. 3 Credits.

Acclimation to the oral communication expectations of graduate school through developing listening and note-taking skills, expanding communicative vocabulary, leading and participating in class discussions, and preparing and delivering informal and formal presentations. Classroom activities directed toward scholarly and professional communication in students' fields of study whenever possible. Credit does not apply to any degree or certificate offered by GW.

EAP 6016. Academic Skills Workshop. 1 Credit.

Development of critical academic skills for international students. Workshop topics may include grammar for academic writing, critical reading, listening and note-taking, academic vocabulary development, and discussion and presentation skills. Credit for this course cannot be applied to a degree. (Same as EAP 1016).

EAP 6110. Academic Writing and Research for International Graduate Students I. 3 Credits.

The process of researching, planning, writing, and revising for academic purposes. Focus on key writing skills and critical thinking. Practice in reading and analyzing university-level materials and completing graduate-level academic exercises. Credit for this course does not apply toward any degree or certificate offered by GW.

EAP 6111. Academic Writing and Research for International Graduate Students II. 3 Credits.

An academic writing and research course for international students who demonstrate high proficiency in English. Focus on research paper writing, analysis of academic discourse, small-group work, and oral presentations on research. Credit for this course does not apply toward any degree or certificate offered by GW.

ENVIRONMENTAL RESOURCE POLICY

OVERVIEW

The Environmental Resource Policy (ENRP) Program at GW offers a multidisciplinary approach to environmental and sustainability studies. The Master of Arts program prepares students to enter environmental policy careers in government, non-profit organizations, the private sector, and environmental advocacy groups. The Certificate program is designed to help prepare current and future leaders of the National Park Service who are responsible for the preservation and protection of our public lands and cultural heritage.

GRADUATE

Master's program

- Master of Arts in the field of environmental resource policy (p. 193)

FACULTY

Program Director P. Linquiti

Director of Graduate Studies N. Augustine

CERTIFICATE

- Graduate certificate in contexts of environmental policy (p. 193)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ENRP 6085. Topics in Environmental Resource Policy. 1-3 Credits.

Topics announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

ENRP 6101. Environmental Sciences I: Physical Sciences. 3 Credits.

Basic physical sciences crucial to environmental issues, including chemistry, geology, hydrology, climate science, and cross-media interactions; land, air, and water pollution, climate change, production and consumption of energy, sea level rise, and anthropogenic changes in the cryosphere. Restricted to students in the MA in environmental resource policy; graduate certificate in contexts of environmental policy; and BA/MA in environmental studies and environmental resource policy programs; permission of the instructor may be substituted.

ENRP 6102. Environmental Sciences II: Life Sciences. 3 Credits.

Basic life sciences crucial to environmental issues, including biology, ecology, environmental health and toxicology, epidemiology, and agriculture; biodiversity, ecosystem services, habitat preservation, deforestation, conservation biology, nutrient cycling, and the impacts of climate change on living systems. Restricted to students in the MA in environmental resource policy; graduate certificate in contexts of environmental policy; and BA/MA in environmental studies and environmental resource policy programs; permission of the instructor may be substituted.

ENRP 6140. Environmental Impact Statement Procedures and Environmental Law. 3 Credits.

The rationale for environmental impact statements from the viewpoint of the nature and origins of environmental concerns. Government agencies responsible for environmental impact statements; current statutes and regulations pertaining to the environment.

ENRP 6145. Global Environmental Justice and Policy. 3 Credits.

Environmental justice, considered as both a movement and a public policy. Examination of environmental injustices—both perceived and actual—affecting individuals, communities, and populations. Adherence to, and enforcement of, environmental laws and regulations that affect the allocation of environmental benefits and the distribution of sources of toxic pollution and other hazards.

ENRP 6295. Research Topics in Environmental Resource Policy. 1-3 Credits.

May be repeated for credit to a maximum of 6 credits.

ENRP 6298. Seminar in Environmental Resource Policy. 3 Credits.

The capstone seminar involves team development of a project sponsored by an external entity, such as a government agency or non-governmental organization, or participation in an aspect of a research project directed by a faculty member. The student team functions as an external consultant tasked with analysis of the chosen issue.

MASTER OF ARTS IN THE FIELD OF ENVIRONMENTAL RESOURCE POLICY

The Master of Arts in Environmental Resource Policy (ENRP) program requires 36 credits of appropriate graduate-level coursework. Coursework usually takes four semesters to complete on a full-time basis, and six to eight semesters on a part-time basis. Coursework is divided into 24 credits of core requirements (eight courses) and 12 credits of electives (typically four courses).

Students begin the program by taking a specialized two-semester course in Environmental Sciences that provides a solid grounding in the scientific side of environmental and resource policy. The capstone project provides the opportunity to demonstrate the ability to conduct research as part of a small team. All other core courses, which must be completed before students enroll in the capstone, provide the broad intellectual base and tools necessary for making multidisciplinary environmental and resource decisions.

Electives broaden familiarity with several environmental policy issues, focus on a particular environmental or resource issue, and allow students to tailor the program to their specific needs and interests. Elective courses can be taken in almost any department at the University, including, but not limited to, biology, chemistry, geography, international affairs, public policy, economics, political science, engineering management and systems engineering, business administration, and public health.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

Prerequisite: a bachelor’s degree with a B average (or equivalent) from an accredited college or university. Students must have math skills equivalent to that provided by a college course in algebra, pre-calculus, analytic geometry, or introductory statistics.

24 credits of core courses

Students whose backgrounds include some of these courses may substitute additional courses in the elective field; approval is required:

ENRP 6101	Environmental Sciences I
ENRP 6102	Environmental Sciences II
ENRP 6140	Introduction to Environmental Law
ENRP 6298	Capstone Seminar in Environmental Resource Policy
ECON 6217	Survey of Economics I
ECON 6237	Economics of the Environment and Natural Resources
PPPA 6002	Research Methods and Applied Statistics
PPPA 6006	Policy Analysis

12 credits of approved elective drawn from a number of departments throughout the University

GRADUATE CERTIFICATE IN CONTEXTS OF ENVIRONMENTAL POLICY

National Park Service Roger Kennedy Fellows Program

For National Park Service employees who have served for three years or more
The NPS Contexts of Environmental Policy Graduate Certificate Program is designed to help prepare current and future leaders who are responsible for the preservation and protection of our public lands and cultural heritage. Inspired by a gift from Roger and Frances Kennedy and made possible by the Friends of Roger Kennedy, this program funds NPS students to undertake a course of study that strengthens their knowledge

of the natural and cultural resources which lie at the heart of the NPS mission. Offering a wide range of courses that contextualize environmental policy, the Certificate allows both flexibility and purpose to NPS students.

Program Overview

The certificate program consists of four graduate-level courses resulting in twelve credits. All courses will be taught by GW faculty who are experts in their fields, and all will be offered at the Washington, D.C. campus of GW at the Columbian College of Arts and Sciences.

The certificate program began in Fall 2013. Students may take one or two courses per semester, and some courses are also offered in the summer. Students must meet the admission requirements of GW and will be enrolled as degree students.

Upon admission to the certificate program, students will not need to apply again each semester, as long as they are in good academic standing as defined by Columbian College of Arts and Sciences standards.

Students will be required to take one policy course as they enter the program and then can choose among a large number of electives, which fall into either policy or culture categories. By special permission, depending on students' backgrounds, students may also enroll in graduate courses in the sciences.

The admissions process for this program is a two-tiered review:

- The first level of review will be conducted by a NPS Review Committee, to ensure that NPS employees meet all eligibility requirements and are appropriate candidates to be considered for participation. The NPS Review Committee will rank each nominee based upon the information provided in his/her application package. The ranking process will consist of an evaluation of the nominee's education, work experience, personal and professional goals, and writing ability.
- The second level of review is the actual selection of participants by a CCAS Admissions Committee. This committee will conduct their selections based on the Admission policies of CCAS and GW. Applicants will be notified by email of the Admission Committee's decision by mid-summer as to whether or not the applicant has been accepted into the program. Classes at GW start the last week of August.

REQUIREMENTS

The Environmental Resources Policy (ENRP) program at GW offers a multidisciplinary approach to environmental and sustainability issues. The Certificate in Contexts of Environmental Policy provides both professional credentials and the opportunity to engage with a broad range of academic disciplines within Columbian College.

The certificate consists of four 3-credit courses. All participants in the program must take either PPPA 6006 Policy Analysis or PPPA 6066 Environmental Policy. The three remaining courses can be selected from the courses listed below. In special cases, with permission from the program and faculty, students may take courses not listed below. Students should consult with ENRP's Director of Graduate Studies in order to construct an individualized curriculum best suited to their needs and interests.

Required courses

PPPA 6006	Policy Analysis
or PPPA 6066	Environmental Policy

Policy/Social Studies courses

ENRP 6101	Environmental Sciences I
ENRP 6140	Environmental Impact Statement Procedures and Environmental Law
GEOG 6219	Seminar: Climatology
GEOG 6230	Seminar: Environmental Issues in Development
HIST 6011	Rdg/Rsch:History/Public Policy
HIST 6302	Colonial North America
HIST 6304	American Indian History to 1890
SMPA 6201	Strategic Communications Skills
PHIL 6281	Environmental Philosophy and Policy
PSC 6103	Approaches to Public Policy Analysis
PPPA 6010	Politics & The Policy Process
PPPA 6031	Governing and Managing Nonprofit Organizations
PPPA 6043	Land Use Planning and Community Development
PPPA 6067	Environment, Energy, Technology, and Society
SOC 6250	Urban Sociology
STAT 6104	Statistics in Management, Administration, and Policy Studies

Culture courses

HIST 6480	Theory and Practice of Public History
-----------	---------------------------------------

HIST 6495	Historic Preservation: Principles and Methods
AMST 6530	Field Methods in Architectural Documentation
HIST 6420	Religion & American Culture
ANTH 6101	Proseminar in Biological Anthropology
ANTH 6807	Public Archaeology
ENGL 6510	Writing, Race and Nation
ENGL 6520	Ethnicity and Identity
MSTD 6101	Museum Management
MSTD 6103	Leading Change
MSTD 6203	Preventive Conservation Concepts

ENVIRONMENTAL STUDIES

The Columbian College of Arts and Sciences offers an interdisciplinary program in environmental studies leading to the degree of Bachelor of Arts. Housed in the Department of Geography (<http://departments.columbian.gwu.edu/geography>), the major combines courses drawn from biological sciences, geological sciences, and geography, as well as American studies, anthropology, economics, English, history, public health, religion, sociology, and statistics.

UNDERGRADUATE

Bachelor's program

- Bachelor of Arts with a major in environmental studies (p. 195)

FACULTY

Director D. Rain

BACHELOR OF ARTS WITH A MAJOR IN ENVIRONMENTAL STUDIES

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Foundational courses:

BISC 1006	The Ecology and Evolution of Organisms
-----------	--

or BISC 1112	Introductory Biology: The Biology of Organisms
GEOG 1002	Introduction to Physical Geography
or GEOL 1005	Environmental Geology
GEOG 1003	Society and Environment
GEOG 2104	Introduction to Cartography and GIS
STAT 1053	Introduction to Statistics in Social Science

Requirements for the major:

GEOG 2196	Field Methods in Geography (or equivalent)
-----------	--

Three of the following science courses:

BISC 2454	General Ecology
BISC 3460	Conservation Biology
BISC 3459	Field Biology *
CHEM 2085	Environmental Chemistry
GEOG 2108	Weather and Climate
GEOG 2128	Geomorphology *
GEOG 2136	Water Resources
GEOL 2106	Oceanography

Three of the following society courses:

ECON 2136	Environmental and Natural Resource Economics
GEOG 2133	People, Land, and Food
GEOG 2134	Energy Resources
GEOG 3143	Urban Sustainability
GEOG 3132	Environmental Quality and Management
GEOL 3193	Intro to Environmental Law
HIST 3001	Special Topics (an environmental topic)
PPPA 2701	Sustainability and Environmental Policy

Two additional upper-level courses chosen from the list of courses that apply to the sustainability minor

Senior capstone course

Two additional upper-level courses chosen from the Green Leaf course list (<http://sustainability.gwu.edu/green-leaf-course-list>)

* Can also count for field methods requirement

FILM STUDIES

Housed in the Columbian College of Arts and Sciences, Film Studies covers classical film aesthetics, surveys the history of world cinema, and takes an in-depth look at films from America, France, Germany, Japan, Russia, and the Spanish-speaking world.

UNDERGRADUATE

Minor

- Minor in film studies (p. 196)

FACULTY

Committee on Film Studies Y. Captain, H. Feigenbaum (*Chair*), K. Harvey, A. Hildebeitel, P. Rollberg, N. Seavey

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

FILM 2151. Film Theory. 3 Credits.

A reading-intensive immersion in classical film aesthetics and a survey of the theoretical and critical canon of cinema literature. Laboratory fee.

FILM 2152. Genres of Film. 3 Credits.

An exploration of the relationship between cinematic structure and narrative content in various types of film. Laboratory fee.

FILM 2153. History of World Cinema I. 3 Credits.

A two-semester sequence covering 100 years of international cinematic history from an aesthetic and political point of view. Laboratory fee.

FILM 2154. History of World Cinema II. 3 Credits.

Continuation of FILM 2153. A two-semester sequence covering 100 years of international cinematic history from an aesthetic and political point of view. Laboratory fee.

FILM 2155. Screen Writing. 3 Credits.

Introduction to the art and craft of screenwriting—concept, genre, character, structure, dialogue, scene/sequence construction, and, ultimately, the preparation of scripts and treatments for a variety of screen formats.

FILM 2156. Advanced Screenwriting. 3 Credits.

Advanced phases of screenwriting culminating in the preparation of a full-length screenplay, with contextual study of contemporary, international, and classical films toward a fuller appreciation of movies as a cultural whole.

FILM 3390. Screen Writing. 3 Credits.

MINOR IN FILM STUDIES

REQUIREMENTS

Students in Columbian College of Arts and Sciences may earn a minor in film studies by completing:

FILM 2151	Film Theory
FILM 2152	Genres of Film
FILM 2153	History of World Cinema I
FILM 2154	History of World Cinema II

Three from the following:

AMST/AH 1070	The American Cinema
CHIN 3163	Taiwanese Literature and Film
ARAB 3502	Arab Film & Culture in English
FILM 2155	Screen Writing
FILM 2156	Advanced Screenwriting
FREN 3560	Topics in 20th-Century Francophone Literature and Cinema
FREN 3700	History of French Cinema
GER 3181	History of German Cinema—in English
GER 3187	German Cinema after 1945
ITAL 4183	History of Italian Film
JAPN 3162	Japanese Culture Through Film
KOR 3162	Korean Culture through Film
PHIL 1062	Philosophy and Film
SLAV 2785	Introduction to Russian Cinema I
SLAV 2786	Introduction to Russian Cinema II

FINE ARTS AND ART HISTORY

The Department of Fine Arts and Art History offers instruction in the visual and creative arts. Its programs strengthens a student's ability to develop visual literacy, as well as critical thinking and creative skills. Classroom study is supplemented by partnerships with the art museums and libraries of Washington, D.C.

Fine Arts, an interdisciplinary program, fosters a rigorous, experimental approach to art as students cultivate creative pursuits in the studio and beyond.

Art History is rooted in direct, interpretive engagement with the visual arts. The program combines visual and historical analyses with philosophical hypotheses and theoretical, political debates. The curriculum promotes connections to the studio arts and interdisciplinary exchanges with other fields of inquiry. It also emphasizes the narrative qualities and rhetorical persuasiveness of art historical writing in dialogue with art objects, spaces, and performances.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in art history (p. 200)
- Bachelor of Arts with a major in fine arts (p. 202)
- Bachelor of Arts with a combined major in art history and fine arts (p. 197)
- Combined programs (p. 205)

Minors

- Minor in art history (p. 205)
- Minor in fine arts (p. 205)
- Combined minor in art history and fine arts (p. 205)

GRADUATE

Master's programs

- Master of Arts in the field of art history (p. 205)
- Master of Fine Arts in the field of fine arts (p. 207)

FACULTY

Professors B. von Barghahn, D. Bjelajac, T. Ozdogan, L.F. Robinson, J.F. Wright, Jr.

Associate Professors A.B. Dumbadze, P. Jacks, D. Kessmann, B.K. Obler, S. Rigg (*Chair*)

Assistant Professors J. Brown, M. Natif, J.G.H. Sham

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Note: Upper-division undergraduate fine arts Special Topics and Critical Practices courses may be repeated for credit when topic is different with approval of the undergraduate fine arts advisor or the department chair. A course fee is charged for all fine arts courses listed here except FA 1075 East Asian Calligraphy, FA 4195 Critical Practices, and FA 4199 Internship.

Note: Core graduate fine arts courses may be repeated for credit with approval of the department. A course fee is charged for all fine arts courses listed here except FA 6295 Critical Practices and FA 6998 Thesis Research–FA 6999 Thesis Research.

- Art History (AH) (p. 910)
- Fine Arts (FA) (p. 1081)

BACHELOR OF ARTS WITH A COMBINED MAJOR IN ART HISTORY AND FINE ARTS

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Foreign language requirement

Completion of four semesters of study in a single language (or the equivalent) from Arabic, French, German, Italian, Persian, Portuguese, or Spanish.

Art History

At least one course from six of the seven categories below and one additional course from any category for a total of 21 credits.

Ancient

AH 3101

Ancient Art of the Bronze Age and Greece

AH 3102	Ancient Art of the Roman Empire	AH 3134W	Topics in Spanish and Portuguese Art through the 16th Century
AH 3103	Art and Archaeology of Egypt and the Near East	AH 3135	Topics in 17th/18th Century Spanish and Portuguese Art
AH 3104	Art and Archaeology of the Aegean Bronze Age	AH 4129	Seminar in Renaissance Art and Architecture
AH 3105	Topics in Ancient Art and Archaeology	AH 4139	Seminar in Baroque Art and Architecture
AH 3106	Art and Archaeology of Israel and Neighboring Lands	18th/19th century	
AH 4109		AH 2154	American Architecture I
Medieval/Islamic World		AH 2161	History of Decorative Arts: American Heritage
AH 3111	Early Christian and Byzantine Art and Architecture	AH 3140	European Art of the 18th Century
AH 3112	Romanesque and Gothic Art and Architecture	AH 3141	European Art of the Early 19th Century
AH 3113	Islamic Art and Architecture	AH 3141W	European Art of the Early 19th Century
AH 3114	Art of the Book in the Medieval Muslim World	AH 3142	European Art of the Late 19th Century
AH 3120	Italian Art and Architecture of the 13th through 15th Centuries	AH 3142W	European Art of the Late 19th Century
AH 3122	Topics in Early Northern Renaissance Art and Architecture	AH 3151	American Art in the Age of Revolution
AH 3122W	Topics in Early Northern Renaissance Art and Architecture	AH 3152	American Art in the Era of National Expansion
AH 4119	Seminar in Medieval Art and Architecture	Modern and contemporary	
Renaissance/Baroque		AH 2155	American Architecture II
AH 2145	History of Decorative Arts: European Heritage	AH 2162	History of Photography
AH 3121	Italian Art and Architecture of the 16th Century	AH 2162W	History of Photography
AH 3123	Topics in Northern Renaissance Art and Architecture	AH 2071	Introduction to the Arts in America
AH 3123W	Topics in Northern Renaissance Art and Architecture	AH 3143	European Art of the Early 20th Century
AH 3131	Italian Art and Architecture of the 17th Century	AH 3143W	European Art of the Early 20th Century
AH 3132	Topics in Northern European Art and Architecture of the 17th Century	AH 3146	Modern Architecture in Europe and America
AH 3134	Topics in Spanish and Portuguese Art through the 16th Century	AH 3146W	Modern Architecture in Europe and America
		AH 3153	American Art of the 20th Century
		AH 3165	Modernist and Postmodernist Art and Theory
		AH 3165W	
		AH 4149	Seminar in Modern European Art and Architecture

AH 4169	Seminar in Contemporary Art
Asian	
AH 2190	East Asian Art
AH 2191	South Asian Art
AH 2192	The Art of Southeast Asia
Pre-Columbian/Latin American/African	
AH 3107	Ancient Mexican Civilizations
AH 3116	The Aztec Empire
AH 3117	Special Topics in Precolumbian Art and Archaeology
AH 3160	Latin American Art and Architecture

Junior/senior seminars

At least two of the following for a total of 6 credits:

AH 4109

AH 4119 Seminar in Medieval Art and Architecture

AH 4129 Seminar in Renaissance Art and Architecture

AH 4139 Seminar in Baroque Art and Architecture

AH 4149 Seminar in Modern European Art and Architecture

AH 4159 Seminar in American Art and Architecture

AH 4159W Seminar in American Art and Architecture

AH 4169 Seminar in Contemporary Art

AH 4189 Seminar: Special Topics in Art History

Fine Arts

Required

FA 2001 Studio Seminar: Conceptual Propositions

One introductory level course from three of the studio areas listed below for a total of 9 credits; for this purpose, FA 1000 counts as a studio area

FA 1000 Dean's Seminar

Ceramics

FA 1101	Introduction to Handbuilt Ceramics
FA 1102	Introduction to Wheelthrown Ceramics
Sculpture	
FA 1201	Sculpture: Material Investigations
Drawing	
FA 1301	Drawing Fundamentals
Painting	
FA 1401	Painting: Visual Thinking
Photography	
FA 1501	Black & White Photography
FA 1502	Color Photography
New Media	
FA 1601	New Media: Digital Art

Three courses at the 2000 or 3000 level including at least one course in two of the six studio areas below for a total of 9 credits:

Ceramics	
FA 2111	Ceramic Design in Handbuilt Forms
FA 2112	Ceramic Design in Wheelthrown Forms
FA 2113	Ceramic Sculpture
FA 2125	Ceramics: Wheelthrown Functional Forms
FA 2127	Ceramic Design in Handbuilding
FA 2131	Ceramic Sculpture
FA 2139	Special Topics: Ceramics
FA 3101	Special Topics: Ceramics
Sculpture	
FA 2211	Sculpture Fabrication
FA 2212	Sculpture/Design in Action
FA 2213	Digital Fabrication
FA 3201	Special Topics: Sculpture
Drawing	
FA 2311	Drawing: Thinking and Mark Making
FA 2312	Advanced Drawing Techniques

FA 2313	Experimental Drawing
FA 3301	Special Topics: Drawing
Painting	
FA 2411	Painting: Watercolor
FA 2412	Painting a Figure
FA 2413	Painting: Process and Materials Lab
FA 2431	Painting: Contemporary Issues
FA 3401	Special Topics: Painting
Photography	
FA 2511	Photography: Abstraction versus Representation
FA 2512	Photography: Landscape/Cityscape
FA 2513	Photography: From Photograms to Scanograms
FA 2531	Photography: Contemporary Issues
FA 3501	Special Topics: Photography
New Media	
FA 2611	Video Art & Time-based Media
FA 2612	Video: Remixing the Archive
FA 2613	Site and Sound
FA 3601	Special Topics: New Media
One of the following courses:	
FA 3901	Special Topics: Fine Arts
FA 3911	Collaborative Practices: Social Practices of Art
FA 3912	The Cinematic in Contemporary Art
FA 3913	Painting: Off the Wall
FA 3951	Creative Photovoltaics
The following capstone course:	
FA 4195	Critical Practices *

*A capstone exhibition is required concurrent with enrollment in FA 4195 Critical Practices

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, students must have attained, by the end of the junior year, a grade-point average of at least 3.5 in the major and 3.3 overall. By the end of the junior year, students should consult their advisor regarding eligibility, area of study, and a director of the research or creative arts project.

BACHELOR OF ARTS WITH A MAJOR IN ART HISTORY

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Foreign language requirement

Completion of four semesters of study in a single language (or the equivalent) from Arabic, French, German, Italian, Persian, Portuguese, or Spanish.

At least one course from six of the seven categories below and one additional course from any category for a total of 21 credits.

Ancient

AH 3101 Ancient Art of the Bronze Age and Greece

AH 3102 Ancient Art of the Roman Empire

AH 3103 Art and Archaeology of Egypt and the Near East

AH 3104 Art and Archaeology of the Aegean Bronze Age

or ANTH 3806 Art and Archaeology of the Aegean Bronze Age

AH 3105 Topics in Ancient Art and Archaeology

AH 3106 Art and Archaeology of Israel and Neighboring Lands

AH 4109

Medieval/Islamic World

AH 3111 Early Christian and Byzantine Art and Architecture

AH 3112 Romanesque and Gothic Art and Architecture

AH 3113	Islamic Art and Architecture
AH 3114	Art of the Book in the Medieval Muslim World
AH 3120	Italian Art and Architecture of the 13th through 15th Centuries
AH 4119	Seminar in Medieval Art and Architecture
Renaissance/Baroque	
AH 2145	History of Decorative Arts: European Heritage
AH 3121	Italian Art and Architecture of the 16th Century

Pre-Columbian/Latin American/African	
AH 3107 or ANTH 3814	Ancient Mexican Civilizations
AH 3116	The Aztec Empire
AH 3117	Special Topics in Precolumbian Art and Archaeology

AH 3160 Latin American Art and Architecture

Junior/Senior seminars

At least two of the following for a total of six credits:

AH 4109

AH 4119 Seminar in Medieval Art and Architecture

AH 4129 Seminar in Renaissance Art and Architecture

AH 4139 Seminar in Baroque Art and Architecture

AH 4149 Seminar in Modern European Art and Architecture

AH 4159 Seminar in American Art and Architecture

AH 4159W Seminar in American Art and Architecture

AH 4169 Seminar in Contemporary Art

AH 4189 Seminar: Special Topics in Art History

One fine arts (FA) course at any level for a total of 3 credits

Art history electives

Any two courses listed in the above categories and/or two from the following for a total of 6 credits:

AH 1000 Dean's Seminar

AH 1031 Survey of Art and Architecture I

AH 1032 Survey of Art and Architecture II

AH 1070 The American Cinema

AH 1099 Variable Topics

AH 1135 Spanish Art: Prado/Thyssen Museums

AH 1136 Spanish Art: From Goya to Picasso

AH 3099 Variable Topics

AH 3170 Materials, Methods, and Techniques in Art History

AH 4198 Independent Study

AH 4199 Internship in Art History

With prior approval from the Director of Undergraduate Studies, students may select up to 6 credits of electives from relevant coursework in another department.

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, students must have attained, by the end of the junior year, a grade-point average of at least 3.5 in the major and 3.3 overall. By the end of the junior year, students should consult their advisor regarding eligibility and selection of an area of research, and the appropriate faculty member to supervise the project. Students must write an Honors Thesis (registering for AH 4198 Independent Study) and receive a grade of A.

BACHELOR OF ARTS WITH A MAJOR IN FINE ARTS

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

One course (3 credits) of introductory art history from the following:

AH 1032 Survey of Art and Architecture II

AH 2071 Introduction to the Arts in America

AH 2162 History of Photography

or AH 2162W History of Photography

Two courses (6 credits) of art history from the following:

AH 2071 Introduction to the Arts in America

AH 2109 Sem: Ancient Art & Architecture

or AH 2109W European Art: Early 19th Cent

AH 2110W European Art: Late 19th Cent

AH 2154 American Architecture I

AH 2154 American Architecture I

AH 2155 American Architecture II

AH 2161 History of Decorative Arts: American Heritage

AH 2162 History of Photography

or AH 2162W History of Photography

AH 2190	East Asian Art
AH 2191	South Asian Art
AH 2192	The Art of Southeast Asia
AH 3101	Ancient Art of the Bronze Age and Greece
AH 3102	Ancient Art of the Roman Empire
AH 3103	Art and Archaeology of Egypt and the Near East
AH 3104	Art and Archaeology of the Aegean Bronze Age
AH 3105	Topics in Ancient Art and Archaeology
AH 3106	Art and Archaeology of Israel and Neighboring Lands
AH 3107	Ancient Mexican Civilizations
AH 3111	Early Christian and Byzantine Art and Architecture

AH 3113	Islamic Art and Architecture
AH 3114	Art of the Book in the Medieval Muslim World
AH 3117	Special Topics in Precolumbian Art and Archaeology
AH 3120	Italian Art and Architecture of the 13th through 15th Centuries
AH 3121	Italian Art and Architecture of the 16th Century
AH 3122	Topics in Early Northern Renaissance Art and Architecture
or AH 3122W	Topics in Early Northern Renaissance Art and Architecture
AH 3123	Topics in Northern Renaissance Art and Architecture
or AH 3123W	Topics in Northern Renaissance Art and Architecture
AH 3131	Italian Art and Architecture of the 17th Century
AH 3132	Topics in Northern European Art and Architecture of the 17th Century

AH 3134	Topics in Spanish and Portuguese Art through the 16th Century
or AH 3134W	Topics in Spanish and Portuguese Art through the 16th Century
AH 3135	Topics in 17th/18th Century Spanish and Portuguese Art
AH 3140	European Art of the 18th Century
AH 3141	European Art of the Early 19th Century
or AH 3141W	European Art of the Early 19th Century
AH 3142	European Art of the Late 19th Century
or AH 3142W	European Art of the Late 19th Century
AH 3143	European Art of the Early 20th Century
AH 3146	Modern Architecture in Europe and America
or AH 3146W	Modern Architecture in Europe and America
AH 3151	American Art in the Age of Revolution
AH 3152	American Art in the Era of National Expansion
AH 3153	American Art of the 20th Century
AH 3160	Latin American Art and Architecture
AH 3165	Modernist and Postmodernist Art and Theory
AH 3170	Materials, Methods, and Techniques in Art History
AH 4119	Seminar in Medieval Art and Architecture
AH 4129	Seminar in Renaissance Art and Architecture
AH 4139	Seminar in Baroque Art and Architecture
AH 4149	Seminar in Modern European Art and Architecture
AH 4159	Seminar in American Art and Architecture
or AH 4159W	Seminar in American Art and Architecture
AH 4189	Seminar: Special Topics in Art History

Three courses (9 credits) from the following. The three courses should be drawn from three different areas.

FA 1000	Dean's Seminar	FA 2313	Experimental Drawing
Ceramics		FA 3301	Special Topics: Drawing
FA 1101	Introduction to Handbuilt Ceramics	Painting	
FA 1102	Introduction to Wheelthrown Ceramics	FA 2411	Painting: Watercolor
Sculpture		FA 2412	Painting a Figure
FA 1201	Sculpture: Material Investigations	FA 2413	Painting: Process and Materials Lab
Drawing		FA 2431	Painting: Contemporary Issues
FA 1301	Drawing Fundamentals	FA 3401	Special Topics: Painting
Painting		Photography	
FA 1401	Painting: Visual Thinking	FA 2511	Photography: Abstraction versus Representation
Photography		FA 2512	Photography: Landscape/Cityscape
FA 1501	Black & White Photography	FA 2513	Photography: From Photograms to Scanograms
FA 1502	Color Photography	FA 2531	Photography: Contemporary Issues
New Media		FA 3501	Special Topics: Photography
FA 1601	New Media: Digital Art	New Media	
One second-year seminar (3 credits):		FA 2611	Video Art & Time-based Media
FA 2001	Studio Seminar: Conceptual Propositions	FA 2612	Video: Remixing the Archive
Three courses (9 credits) from the following. Minimum of one course from at least two different areas.		FA 2613	Site and Sound
Ceramics		FA 3601	Special Topics: New Media
FA 2111	Ceramic Design in Handbuilt Forms	Two courses (6 credits) of cross-disciplinary courses from the following:	
FA 2112	Ceramic Design in Wheelthrown Forms	FA 3901	Special Topics: Fine Arts
FA 2113	Ceramic Sculpture	FA 3911	Collaborative Practices: Social Practices of Art
FA 3101	Special Topics: Ceramics	FA 3912	The Cinematic in Contemporary Art
Sculpture		FA 3913	Painting: Off the Wall
FA 2211	Sculpture Fabrication	FA 3951	Creative Photovoltaics
FA 2212	Sculpture/Design in Action	Two capstone courses (6 credits):	
FA 2213	Digital Fabrication	FA 4193	Professional Practices
FA 3201	Special Topics: Sculpture	FA 4195	Critical Practices
Drawing		One elective fine arts course (3 credits), from any course listed above or,	
FA 2311	Drawing: Thinking and Mark Making		
FA 2312	Advanced Drawing Techniques		

Additionally, required participation in a capstone exhibition, concurrently with FA 4195

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, students must have attained, by the end of the junior year, a grade-point average of at least 3.5 in the major and 3.3 overall. By the end of the junior year, students should consult their advisor regarding eligibility, selection of an area of study, and a director of the research or creative arts project.

COMBINED PROGRAMS

REQUIREMENTS

Combined Bachelor of Arts with a major in Art History/Master of Arts in the field of art history

The combined BA/MA program offers undergraduate Art History majors excelling in their studies the opportunity to advance to graduate level coursework in their senior year and enter the MA program upon graduation.

Students must meet the Art History major requirements. During the senior year students must take 9 credits of graduate art history course work (6000 level); these credit hours will count towards the BA degree and the MA degree. In the first fall semester, students must take AH 6258 Art Historiography. In the spring semester, students must take 6 credits of graduate art history course work.

Students must receive a grade of B or better in their graduate course work taken while an undergraduate. If they do not, the course(s) will not apply to their MA degree. If B or better, these grades are used when computing their graduate GPA.

After graduating with the BA degree, students must take an additional 27 credit hours of course work at the 6000 level. As many as 6 credits of graduate course work may be completed outside the department with approval of the Director of Graduate Studies.

Students must submit one qualifying paper after the completion of 18 credits.

A reading examination in Arabic, Dutch, French, German, Italian, Latin, Persian, Portuguese, or Spanish must be passed. If a student's research is in a language other than those listed above, the student may demonstrate proficiency in said language in consultation with the Director of Graduate Studies.

Combined Bachelor of Arts with a major in Fine Arts/Master of Arts in the field of art therapy

Students interested in this dual degree program should consult the director of the Art Therapy Program (<http://programs.columbian.gwu.edu/arttherapy>) early in the junior year.

MINOR IN ART HISTORY

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in art history courses

Required:

AH 1031	Survey of Art and Architecture I
---------	----------------------------------

AH 1032	Survey of Western Art II
---------	--------------------------

Four upper-division art history courses	
---	--

MINOR IN FINE ARTS

REQUIREMENTS

Required: 18 credits of course work in fine arts

COMBINED MINOR IN ART HISTORY AND FINE ARTS

REQUIREMENTS

The combined minor requires 9-12 credits of course work in Art History and 9-12 credits in Fine Arts, for a total of 21 credits. The student's program of study is developed in consultation with the undergraduate advisors in the Department of Fine Art and Art History. See departmental website (<http://art.columbian.gwu.edu/combined-degree-fine-arts-art-history>) for more information.

MASTER OF ARTS IN THE FIELD OF ART HISTORY

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

Required: 36 credits of graduate coursework

AH 6258	Art Historiography
---------	--------------------

At least one course from five of the following seven categories:

Ancient:

AH 6201 Proseminar in Ancient Art of the Bronze Age and Greece

AH 6202 Proseminar in Ancient Art of the Roman Empire

AH 6205 Ancient Art Seminar

AH 6270 Special Topics in Art History

Medieval/Islamic World:

AH 6211 Proseminar in Early Christian and Byzantine Art and Architecture

AH 6212 Proseminar in Romanesque and Gothic Art and Architecture

AH 6213 Islamic Art and Architecture

AH 6214 The Art of the Book in the Medieval Muslim World

AH 6215 Prosem:Medieval Art/Archaeology

AH 6265 Seminar in Islamic Art and Architecture

AH 6270 Special Topics in Art History

Renaissance/Baroque:

AH 6220 Proseminar in Italian Art and Architecture of the 13th through 15th Centuries

AH 6221 Prosem:Ital Art&Arch 16th Cent

AH 6222 Proseminar in Early Northern Renaissance Art and Architecture

AH 6223 Proseminar in Northern Renaissance Art and Architecture

AH 6225 Seminar in Renaissance Art

AH 6231 Proseminar in Italian Art and Architecture of the 17th Century

AH 6232 Proseminar in Northern European Art and Architecture of the 17th Century

AH 6234 Proseminar in Spanish and Portuguese Art through the 16th Century

AH 6235 Seminar in Baroque Art

AH 6270 Special Topics in Art History

18th-19th Century:

AH 6240 Proseminar in European Art of the 18th Century

AH 6245 Seminar in European Art of the 19th Century

AH 6251 Proseminar in American Art in the Age of Revolution

AH 6254 Seminar in American Art before 1900

AH 6270 Special Topics in Art History

Modern/Contemporary:

AH 6246 Proseminar in Modern Architecture in Europe and America

AH 6250 Seminar: Modern Art

AH 6256 Seminar in American Art of the 20th Century

AH 6257 Seminar in Photography

AH 6270 Special Topics in Art History

Asian/African:

AH 6270 Special Topics in Art History

Pre-Columbian/Latin American:

AH 6270 Special Topics in Art History

Up to 6 credits of graduate coursework may be completed outside the department with approval of the graduate advisor.

One qualifying paper must be submitted in the spring semester of the second year. Part-time students will submit one qualifying paper at date set in consultation with the graduate advisor.

A reading examination in Arabic, Dutch, French, German, Italian, Latin, Persian, Portuguese, or Spanish must be passed. If a student's research is in a language other than those listed above, the student may demonstrate proficiency in said language in consultation with the Director of Graduate Studies.

Concentration in museum training

Prerequisites and requirements are the same as those for the Master of Arts in the field of art history; students include in their course work 6 credits of AH 6299 Museum Internship, after completion of 18 credits of art history courses.

MASTER OF FINE ARTS IN THE FIELD OF FINE ARTS

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Prerequisite: a bachelor's degree with a major in the field of ceramics, design, digital arts, drawing, film, new media, painting, photography, sculpture, or video. Departmental approval of the applicant's portfolio is required.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

60 credits, including 48 credits in required courses, 9 credits in elective courses, 3 credits in thesis, including a thesis exhibition.

Required

FA 6291	Contemporary Art and Theory for Artists I
FA 6292	Contemporary Art and Theory for Artists II
FA 6293	Professional Practices
FA 6294	Writing in Practice
FA 6295	Critical Practices (taken for a total of 24 credits)
FA 6296	Studio Visits (taken for a total of 12 credits)

Electives

9 credits in studio and seminar electives

In consultation with the Director of Graduate Studies, MFA students may elect to take upper- and graduate-level Art History courses, as well as upper-level and graduate courses in other departments, assuming they meet the prerequisites of those courses.

Thesis research

FA 6999	Thesis Research
---------	-----------------

A thesis exhibition consisting of the execution of creative work along with a critical statement about this work must be completed under the supervision of a committee consisting of at least two full-time departmental faculty members.

FORENSIC SCIENCES

As part of the Columbian College of Arts and Sciences's natural, mathematical, and biomedical sciences programs, the forensic sciences program provides an understanding of the integration of forensic disciplines with the investigation of criminal activity, while providing an overview of the analytical methods, procedures, equipment, and data used by forensic specialists. Course work emphasizes the identification and analysis of evidence as well as the interpretation and reporting of the results. The program's location in Washington, D.C. provides students with opportunities to interact with federal, state, and local agencies.

The Master of Forensic Sciences (M.F.S.) degree offers the following concentrations: forensic chemistry, forensic molecular biology, friction ridge analysis, and forensic toxicology. Students may also complete the Master of Forensic Sciences degree without selecting a concentration.

The Master of Science (M.S.) degree is offered in the following fields of study: crime scene investigation, friction ridge analysis, and high-technology crime investigation. The M.S. in the field of high-technology crime investigation program is offered at the Graduate Education Center in Arlington, VA.

In addition, graduate certificates (<http://bulletin.gwu.edu/arts-sciences/forensic-sciences/#certificatetext>) are offered in bloodstain pattern analysis, digital investigations, forensic investigation, and latent print examination.

GRADUATE

Master's programs

- Master of Forensic Sciences (p. 212)
- Master of Forensic Sciences with a concentration in forensic molecular biology (p. 213)
- Master of Forensic Sciences with a concentration in forensic chemistry (p. 212)
- Master of Forensic Sciences with a concentration in forensic toxicology (p. 213)
- Master of Forensic Sciences with a concentration in friction ridge analysis (p. 214)
- Master of Science in the field of crime scene investigation (p. 214)
- Master of Science in the field of high-technology crime investigation (p. 215)

CERTIFICATE

Certificate program

- Graduate certificate in forensic investigation (p. 216)

FACULTY

Professors W.F. Rowe, M.S. Schanfield, E.A. Vincze, V. Weedn (Chair)

Associate Professors N.T. Lappas, M. Moini, E.M. Robinson,

Assistant Professors I. Marginean, D. Podini

Professorial Lecturers D. Barghaan, E. Bernard, S. Brazelle, O. Carroll, K. Clarke, H. Cox, C. Davis, H. Deadman, J. Doyle, H. Elliott, N. Galbreth, K. Gerber, J.G. Jackson, M. Keller, M. Mack, C. McGovern, M.R. Parker, E. Toomer, L. Zarwell

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Note: FORS 2118 Introduction to Computer Systems for Security Professionals and FORS 2119 Introduction to Network Systems for Security Professionals are available only to students conditionally admitted to programs offered by the Department of Forensic Sciences; credit does not apply to any degree programs at GW. FORS 2118 Introduction to Computer Systems for Security Professionals, FORS 2119 Introduction to Network Systems for Security Professionals, and FORS 6259 Computer Related Law-FORS 6291 Computer Forensics III: Advanced Techniques are offered off campus only.

FORS 2104. Introduction to Forensic Sciences. 3 Credits.

Topics in the application of science to the criminal justice system, including personal identification, analysis of drugs, forms of trace evidence, identification of biological fluids, forensic pathology, and forensic toxicology. Prerequisites: two semesters of a laboratory science other than astronomy and permission of instructor.

FORS 2104W. Introduction to Forensic Sciences. 3 Credits.

Topics in the application of science to the criminal justice system, including personal identification, analysis of drugs, forms of trace evidence, identification of biological fluids, forensic pathology, and forensic toxicology.

FORS 2118. Introduction to Computer Systems for Security Professionals. 3 Credits.

Aspects of computer systems and software that directly relate to media analysis, i.e., storage, memory, the structure of file systems, and system peripherals that may contain evidence. Laboratory fee.

FORS 2119. Introduction to Network Systems for Security Professionals. 3 Credits.

Aspects of network tools, administrative tools, network protocols, and fundamentals of TCP/IP that can be used to carry out a network-based attack. Development of a working knowledge of how information is processed and can be intercepted on the Internet/Intranet. Laboratory fee.

FORS 2190. Topics in Forensic Science. 3 Credits.

Prerequisite: Any combination of two courses from BISC 1005-BISC 1006 or CHEM 1003- CHEM 1004 and junior standing.

FORS 6004. Fundamentals of Forensic Science I. 3 Credits.

This course will survey crime scene investigation techniques, medicolegal death investigation, and patterned evidence examination. This will satisfy the 10 hours instruction for a FEPAC accredited MFS degree in the core topics of crime scene investigation, physical evidence concepts, and pattern evidence. This course will help students prepare for the American Board of Criminalistics ("ABC") examination in the disciplines of firearms and toolmarks, fingerprints, and questioned documents. Lectures will be given by faculty members and guest lecturers who are subject matter experts on the topic presented. This course includes a four hour laboratory (fingerprints). This is a required course for MFS and CSI students. This course, along with FORS 6005 Fundamentals of Forensic Science II, replaces FORS 6213, Elements of Forensic Science (3 Credits). Prerequisites: None.

FORS 6005. Fundamentals of Forensic Science II. 3 Credits.

This course will survey the traditional crime laboratory (criminalistics) disciplines—specifically forensic drug chemistry, forensic toxicology, trace evidence, fire debris, explosives, and forensic molecular biology. This will satisfy the 10 hours instruction for a FEPAC accredited MFS degree in the core topics of analytical chemistry and instrumental methods of analysis, drug chemistry/toxicology, microscopy and materials analysis, and forensic biology. This course will help students prepare for the American Board of Criminalistics ("ABC") examination in the disciplines of forensic biology, trace evidence, fire debris, controlled substances, and toxicology/blood alcohol determinations. Lectures will be given by faculty members and guest lecturers who are subject matter experts on the topic presented. This course includes three four hour laboratories (mass spectrometry, microscopy, DNA). This is a required course for MFS and CSI students. This course, along with FORS 6004 Fundamentals of Forensic Science I, replaces FORS 6213, Elements of Forensic Science (3 Credits). Restricted to None.

FORS 6020. Ethics, Professional Responsibility, and Quality Assurance. 2 Credits.

Issues of forensic science laboratory professional responsibility, including ethics, public policy, and quality assurance. Satisfies 10 hours of instruction for a Forensic Science Education Programs Accreditation Commission (FEPAC) accredited M.F.S. degree in the core topics of ethics and professional responsibility and quality assurance; also assists in preparation for the American Board of Criminalistics examination in the area of ethics. Taken online during the summer session.

FORS 6201. Forensic Biology. 3 Credits.

Principles of the forensic analysis of blood and other biological materials. Specific procedures and techniques used in forensic biology and serology. Laboratory fee.

FORS 6202. Instrumental Analysis. 3 Credits.

Principles and application of various instrumental methods to the examination of physical evidence, including chromatographic and spectroscopic techniques and mass spectrometry. Laboratory fee.

FORS 6203. Examination of Questioned Documents. 3 Credits.

Theory and principles of handwriting and handprinting, duplicating processes, paper manufacture and fiber analysis; studies of paper and methods of examining questioned documents. Laboratory fee.

FORS 6204. Firearms and Toolmark Identification. 3 Credits.

Methods for identifying firearms, bullet cartridge casings, toolmarks, gunshot residue, obliterated serial numbers, tire marks, and footprints. Laboratory fee.

FORS 6206. Trace Evidence Analysis. 3 Credits.

Principles that govern the analysis of trace evidence, including recovery, transference, interpretation, and comparison. Assessment of evidentiary value, reporting, and court testimony. Laboratory fee.

FORS 6207. Photography in the Forensic Sciences. 3 Credits.

Basic use of forensic photography, including selection and use of equipment, photographs as evidence, close-up work, and common misconceptions. Laboratory fee.

FORS 6210. Advanced Instrumental Analysis. 3 Credits.

Theory and practice of modern instrumental methods used in forensic laboratories, including mass spectrometry, optical spectroscopy, microscopy, chromatographic and electrophoretic separations. It is a required course for MFS students with concentration in Forensic Chemistry and Forensic Toxicology. Recommended background: undergraduate analytical methods.

FORS 6213. Elements of Forensic Sciences. 3 Credits.

FORS 6215. Science of Fingerprints. 3 Credits.

A general overview of the history and biology of and principles underlying the science of fingerprints. Latent print development methods, recording, classification, and methodology of comparison of fingerprints and palm prints to include latent prints. Subject matter is covered at an introductory level; additional study is required to develop expertise as a latent fingerprint examiner. Restricted to None. Prerequisites: None.

FORS 6216. Development of Latent Prints. 3 Credits.

This Advanced Fingerprint Science Course will provide the students an increased understanding of the main principles of fingerprint identification: uniqueness and persistence. The course is broken down into three main sections, which will address the chemistry behind processing fingerprints, the anatomy and physiology of friction ridge skin and the extensive research that has been conducted in the field of fingerprint science. The students will be required to complete a skills processing exam to assess their understanding and ability to develop latent prints on items of evidence. In addition, there will be a written examination covering the topics of biology and development of friction ridge skin and a final comprehensive exam. Upon conclusion of this course, each student should have a firm grasp of why friction ridge skin can be used as a means of identification. Recommended background: FORS 6215.

FORS 6217. Fingerprint Comparisons. 3 Credits.

In-depth study of analysis, comparison, evaluation, and verification (ACE-V) methodology; assessing the quality and quantity of information and establishing a tolerance for comparison using the effects of distortion; uniqueness and persistence; anatomy and embryology of friction ridge skin. Laboratory fee. Prerequisites: FORS 6215.

FORS 6219. Digital Image Processing. 3 Credits.

FORS 6224. Criminal Law for Forensic Scientists. 3 Credits.

This course will provide an overview of criminal law offenses, criminal law procedures, issues of evidence recovery, admissibility of scientific evidence, and expert testimony, with an emphasis on the interaction between the criminal process and forensic science. A moot court experience is integral to this course. (This course combines and replaces Crim Law I and III.).

FORS 6225. Statistics for Forensic Scientists. 3 Credits.

Statistics with a focus on forensic applications. Emphasis on the Bayesian approach. Logical, probabilistic statistical reasoning skills, and R software skills. Course content is the basis for an examination question on the comprehensive examination. Students must have taken an undergraduate statistics course before registering. Restricted to None. Prerequisites: An undergraduate statistics course.

FORS 6231. Principles of Toxicology. 3 Credits.

Concepts of toxicology, including its historical development and modern applications, drug disposition, mechanisms of toxicity; factors that influence toxicity and toxicity evaluation.

FORS 6232. Analytical Toxicology. 3 Credits.

Principles and procedures used in the isolation, identification, and quantitation of drugs of abuse from human samples. Prerequisite: FORS 6202 or permission of instructor.

FORS 6234. Medicinal Chemistry I. 3 Credits.

Theory and principles of classification, synthesis, and structure activity relationships of drugs. Discussion of the complex chemical events that take place between administration of a drug and its action on the user, with emphasis on drugs of abuse.

FORS 6235. Medicinal Chemistry II. 3 Credits.

Chemical, pharmacological, toxicological, and pathological characteristics of commonly abused drugs, including ethanol, barbiturates, narcotics, stimulants, and hallucinogens.

FORS 6236. Forensic Toxicology I. 3 Credits.

Biological, chemical, and pharmacological principles that underlie forensic toxicology. Prerequisite: FORS 6235 or permission of instructor.

FORS 6237. Forensic Toxicology II. 3 Credits.

Lectures, student seminars, and projects dealing with topics of current interest in forensic toxicology. Prerequisite: FORS 6236 or permission of instructor.

FORS 6238. Forensic Chemistry I. 3 Credits.

Examination of glass and soils. Laboratory exercises include refractive index measurements using immersion methods; polarized light observations of minerals; x-ray diffraction analysis of minerals; and classical chemical and physical methods of analysis. Prerequisite: FORS 6202 or permission of instructor. Laboratory fee.

FORS 6239. Forensic Chemistry II. 3 Credits.

Examination of arson accelerants, textile fibers, plastics, and paints. Laboratory exercises include infrared spectrometry and pyrolysis-gas-liquid chromatography of polymeric materials, as well as classical chemical and physical methods of analysis. Prerequisite: FORS 6238 or permission of instructor. Laboratory fee.

FORS 6240. Forensic Drug Analysis. 3 Credits.

Examination of dosage forms of drugs. Laboratory exercises include color spot tests, crystal tests, infrared spectrometry and gas chromatography-mass spectrometry. Laboratory fee.

FORS 6241. Forensic Molecular Biology I. 3 Credits.

Techniques of molecular biology applied to the collection, examination, analysis, and interpretation of biological evidence.

FORS 6242. Forensic Molecular Biology II. 3 Credits.

Advanced methods of forensic molecular biology. Laboratory examinations and classifications of dried blood and other biological materials through a variety of nuclear and mitochondrial markers. Laboratory fee. Prerequisite: FORS 6241 and permission of instructor.

FORS 6243. Forensic Molecular Biology III. 3 Credits.**FORS 6246. Human Genetic Variation. 3 Credits.**

The genetic variation in human populations as a framework for measurement and analysis of genetic diversity and evolutionary process. Consideration of the possible roles of cultural change leading to adaptive/selective events. Same as ANTH 6406.

FORS 6247. Population Genetics. 3 Credits.

Origin, maintenance, and possible significance of genetic variation in populations. Selection, genetic drift, and population structure are emphasized. Both theoretical and applied aspects of population genetics are discussed. Same as BISC 6228.

FORS 6250. Crime Scene Investigation for Lab Personnel. 3 Credits.

A condensed offering of the subject matter of FORS 6251-FORS 6252. FORS 6250 cannot be taken for credit toward the crime scene investigation concentration. Laboratory fee.

FORS 6251. Crime Scene Investigation I. 3 Credits.

Examination, analysis, and reconstruction of crime scenes. Principles from biology, chemistry, and physics applied to identification, documentation, preservation, and collection of physical evidence. Laboratory fee.

FORS 6252. Crime Scene Investigation II. 3 Credits.

Continuation of FORS 6251. Examination, analysis, and reconstruction of crime scenes. Principles from biology, chemistry, and physics applied to identification, documentation, preservation, and collection of physical evidence. Laboratory fee.

FORS 6254. Forensic Psychiatry. 3 Credits.

Introduction to the constructs of dynamic psychiatry, psychiatric treatment, and the nomenclature of mental disorders. Consideration of expert testimony, direct examination, and cross-examination in hospitalization and criminal cases.

FORS 6255. Investigation of Child Abuse. 3 Credits.

This course integrates medical, scientific, psychological, sociological and legal information for investigators and professionals involved in the field of child abuse. Special emphasis will be placed on the application of research-supported data to situations involving the murder, abuse and exploitation of children.

FORS 6256. Forensic Pathology. 3 Credits.

Terminology and scientific techniques used in medico-legal investigations, sudden or unexpected deaths, homicides, suicides, accidental deaths, and trauma.

FORS 6257. Medicolegal Death Investigation. 3 Credits.

Medical, scientific, sociological, and legal methodologies applied to forensic investigations. Aspects of death scene analysis by a medical examiner, including autopsy procedures, unidentified remains, child death investigations, and mass disaster investigations. Prerequisite: FORS 6256 and permission of instructor. Laboratory fee.

FORS 6258. The Investigation of Sexual Assault and Other Sex Crimes. 3 Credits.

This course integrates medical, psychological, sociological and legal information for investigators and professionals involved in the field of sex crime investigation. Special emphasis will be placed on the application of research-supported data to situations involving the sexual exploitation and victimization of adults.

FORS 6259. Computer Related Law. 3 Credits.

A problem-oriented course that focuses on applying the holdings of cases and analysis of statutes to different criminal fact patterns. The course is designed to examine criminal law, criminal procedures, and evidence as it relates to computer crime and the collection/analysis of digital evidence. Open only to students enrolled in off-campus forensic sciences programs.

FORS 6260. Security Case Law. 3 Credits.

Negligence and liability, international torts, compensatory and punitive damages, and contract law. The exercise of security functions by private individuals and organizations.

FORS 6261. Security Management. 3 Credits.

An overview of the factors that shape modern security management: technology, law, ethics and societal changes. The course focuses on risk assessment and the necessity to identify, analyze, and counter threat.

FORS 6264. Computer Network Defense. 3 Credits.

Identification of common threats to enterprise information systems and the tools, techniques, and strategies for mitigating those threats. Access control concepts, methodologies, and implementation within centralized and decentralized environments across an enterprise's computer systems; common methods of cyber-attacks; principles, means, and methods for ensuring system integrity, confidentiality, and availability; auditing and monitoring technologies for preventative, detective, and corrective measures.

FORS 6271. Cyberpsychology. 3 Credits.

How cyberpsychology can be used in the conduct of digital forensic investigations; the role of the psychologist in and methods used for investigating cybercrime cases.

FORS 6273. Research Methods for Security Professionals. 3 Credits.

FORS 6277. Computer Forensics I: File System Analysis. 3 Credits.

An introduction to the tools and procedures used for digital investigations. Analysis of the FAT, NTFS, EXT, and HFS file systems. How data is stored at the file system level. Laboratory fee. Restricted to students enrolled in the department or with approval of the program director.

FORS 6278. Computer Forensics II: Applied Computer Forensics. 3 Credits.

Application of the tools and techniques learned in FORS 6277. Digital forensics as it relates to both civil and criminal investigations; best practices in securing, processing, acquiring, examining, and reporting on digital evidence. Prerequisite: FORS 6277.

FORS 6279. Incidence Response: Understanding and Identifying Network-Based Attacks. 3 Credits.

Computer network operations and network-based computer crime. Fraud schemes related to electronic commerce, theft of sensitive computer information, compromise of computer networks, and identity theft. Elements of proof of network-based crime are discussed. Prerequisite: FORS 6277 or approval of program director. Laboratory fee.

FORS 6280. Advanced Incidence Response: Investigating Network-Based Attacks. 3 Credits.

Detecting and responding to network- and host-based intruders, integrating intrusion detection systems into network topologies, identifying methods hackers use to break into network systems, analyzing network traffic and detecting attacks, and creating an effective response strategy. Prerequisite: FORS 6279. Laboratory fee.

FORS 6283. Steganography and Electronic Watermarking. 3 Credits.

Digital data hiding techniques. Investigation of data hiding and labeling techniques, attacks against steganography and watermarked information; countermeasures to such attacks. Open only to students enrolled in the department or by approval of the program director. Laboratory fee. Prerequisite: FORS 6277, FORS 6278.

FORS 6284. Security Mgt Capstone Course. 3 Credits.

FORS 6285. High-Technology Crime Investigation Capstone Course. 3 Credits.

For students in the final semester of the high-technology crime investigation program only. Simulation of a computer forensic investigation: developing an investigation plan, securing the crime scene, analyzing evidence, preparing the case for court, and testifying in a moot court situation. Laboratory fee.

FORS 6287. Project Management for Security Professionals. 3 Credits.

FORS 6288. The Investigative Process for Computer Forensics. 3 Credits.

In-depth examination of the investigative process for computer-related crime in both criminal and civil sectors. Topics include identification and validation of information sources, development and handling of informants, interview and interrogation techniques, and managing the investigative process.

FORS 6290. Selected Topics. 3 Credits.

Current issues in research, investigation, and law.

FORS 6291. Computer Forensics III: Advanced Techniques. 3 Credits.

Further examination of methods and techniques used to conduct and report high-technology crime investigations. Open only to students enrolled in the department or by approval of the program director. Laboratory fee. Prerequisite: FORS 6278.

FORS 6292. Graduate Seminar. 1 Credit.

Students in designated forensic sciences degree programs must register for this course in their first semester and again after completion of the required independent research project.

FORS 6295. Research. 1-12 Credits.

Research on problems approved by the department, under the supervision of an appropriate member of the program faculty. Admission by permission only.

FORS 6298. Forensic Sciences Practicum. 1-3 Credits.

Internship experience in a forensic science laboratory or criminal justice agency, under the supervision of an appropriate member of the program faculty. Students must preregister for this course. Admission by permission only.

FORS 6998. Thesis Research. 3 Credits.**FORS 6999. Thesis Research. 3 Credits.**

MASTER OF FORENSIC SCIENCES REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

37 credits including 18 credits in required courses, 19 credits in courses selected in consultation with the advisor, and successful completion of the master's comprehensive examination.

Core requirements

FORS 6004	Fundamentals of Forensic Science I
FORS 6005	Fundamentals of Forensic Science II
FORS 6020	Ethics, Professional Responsibility, and Quality Assurance
FORS 6224	Criminal Law for Forensic Scientists
FORS 6225	Statistics for Forensic Scientists
FORS 6292	Graduate Seminar (taken twice) *

The remaining credits should be selected in consultation with the departmental advisor.

Successful completion of a Master's Comprehensive Examination is required.

Successful completion of an independent research project is required.

*Students must register for FORS 6292 in their first semester and again after or during the completion of the required independent research project.

MASTER OF FORENSIC SCIENCES WITH A CONCENTRATION IN FORENSIC CHEMISTRY

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

37 credits in required courses and successful completion of the master's comprehensive examination.

Core requirements

FORS 6004	Fundamentals of Forensic Science I
FORS 6005	Fundamentals of Forensic Science II
FORS 6020	Ethics, Professional Responsibility, and Quality Assurance
FORS 6224	Criminal Law for Forensic Scientists
FORS 6225	Statistics for Forensic Scientists
FORS 6292	Graduate Seminar (taken twice) *

Forensic chemistry concentration requirements

FORS 6206	Trace Evidence Analysis
FORS 6210	Advanced Instrumental Analysis
FORS 6238	Forensic Chemistry I
FORS 6239	Forensic Chemistry II
FORS 6234	Medicinal Chemistry I
FORS 6235	Medicinal Chemistry II
FORS 6240	Forensic Drug Analysis

Successful completion of a Master's Comprehensive Examination

Successful completion of an independent research project

*Students must register for FORS 6292 in their first semester and again during or after completion of the required independent research project.

MASTER OF FORENSIC SCIENCES WITH A CONCENTRATION IN FORENSIC MOLECULAR BIOLOGY

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

37 credits, including 16 credits in core courses, 15 credits in courses in the concentration, 6 credits in courses selected in consultation with the advisor, and successful completion of the master's comprehensive examination.

Core requirements

FORS 6004	Fundamentals of Forensic Science I
FORS 6005	Fundamentals of Forensic Science II
FORS 6020	Ethics, Professional Responsibility, and Quality Assurance
FORS 6224	Criminal Law for Forensic Scientists
FORS 6225	Statistics for Forensic Scientists
FORS 6292	Graduate Seminar (taken twice) *

Forensic molecular biology concentration requirements

FORS 6201	Forensic Biology
FORS 6241	Forensic Molecular Biology I
FORS 6242	Forensic Molecular Biology II
FORS 6243	Forensic Molecular Biology III
FORS 6247	Population Genetics

The remaining credits should be selected in consultation with the departmental advisor.

Successful completion of a Master's Comprehensive Examination is required.

Successful completion of an independent research project is also required.

*Students must register for FORS 6292 in their first semester and again after or during the completion of the required independent research project.

MASTER OF FORENSIC SCIENCES WITH A CONCENTRATION IN FORENSIC TOXICOLOGY

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

37 credits, including 16 credits in core courses, 15 credits in courses in the concentration, 6 credits in courses selected in consultation with the advisor, and successful completion of the master's comprehensive examination.

Core requirements

FORS 6004	Fundamentals of Forensic Science I
FORS 6005	Fundamentals of Forensic Science II
FORS 6020	Ethics, Professional Responsibility, and Quality Assurance
FORS 6224	Criminal Law for Forensic Scientists
FORS 6225	Statistics for Forensic Scientists
FORS 6292	Graduate Seminar (taken twice) *

Forensic toxicology concentration requirements

FORS 6210	Advanced Instrumental Analysis
FORS 6232	Analytical Toxicology
FORS 6234	Medicinal Chemistry I
FORS 6235	Medicinal Chemistry II
FORS 6236	Forensic Toxicology I
FORS 6237	Forensic Toxicology II

The remaining credits should be selected in consultation with the departmental advisor.

Successful completion of a Master's Comprehensive Examination

Successful completion of an independent research project

*Students must register for FORS 6292 in their first semester and again during or after completion of the required independent research project.

MASTER OF FORENSIC SCIENCES WITH A CONCENTRATION IN FRICTION RIDGE ANALYSIS

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

37 credits, including 16 credits in core courses, 15 credits in courses in the concentration, 6 credits in courses selected in consultation with the advisor, and successful completion of the master's comprehensive examination.

Core requirements

FORS 6004	Fundamentals of Forensic Science I
-----------	------------------------------------

FORS 6005	Fundamentals of Forensic Science II
-----------	-------------------------------------

FORS 6020	Ethics, Professional Responsibility, and Quality Assurance
-----------	--

FORS 6224	Criminal Law for Forensic Scientists
-----------	--------------------------------------

FORS 6225	Statistics for Forensic Scientists
-----------	------------------------------------

FORS 6292	Graduate Seminar (taken twice) *
-----------	----------------------------------

Friction ridge analysis concentration requirements

FORS 6207	Photography in the Forensic Sciences
-----------	--------------------------------------

FORS 6215	Science of Fingerprints
-----------	-------------------------

FORS 6216	Development of Latent Prints
-----------	------------------------------

FORS 6217	Fingerprint Comparison
-----------	------------------------

FORS 6251	Crime Scene Investigation I
-----------	-----------------------------

FORS 6290	Selected Topics (Digital Image Processing)
-----------	--

Elective

One of the following:

FORS 6252	Crime Scene Investigation II
-----------	------------------------------

FORS 6256	Forensic Pathology
-----------	--------------------

Alternate courses may be selected with approval of advisor.

Successful completion of a Master's Comprehensive Examination is required.

Successful completion of an independent research project is required.

Note: Students must register for FORS 6292 in their first semester and again during or after completion of the required independent research project.

MASTER OF SCIENCE IN THE FIELD OF CRIME SCENE INVESTIGATION

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

36 credits including, 30 credits in required courses, 6 credits in elective courses, and successful completion of the master's comprehensive examination.

Required (30 credits):

FORS 6004	Fundamentals of Forensic Science I
-----------	------------------------------------

FORS 6005	Fundamentals of Forensic Science II
-----------	-------------------------------------

FORS 6207	Photography in the Forensic Sciences
-----------	--------------------------------------

FORS 6215	Science of Fingerprints
-----------	-------------------------

FORS 6224	Criminal Law for Forensic Scientists
-----------	--------------------------------------

FORS 6251	Crime Scene Investigation I
-----------	-----------------------------

FORS 6252	Crime Scene Investigation II
-----------	------------------------------

FORS 6256	Forensic Pathology
-----------	--------------------

FORS 6257	Medicolegal Death Investigation
-----------	---------------------------------

FORS 6290	Selected Topics (Digital Image Processing)
-----------	--

Elective (6 credits):

The remaining six credits should be selected in consultation with the departmental advisor. Suggested electives include:

FORS 6203	Examination of Questioned Documents
-----------	-------------------------------------

FORS 6204	Firearms and Toolmark Identification
-----------	--------------------------------------

FORS 6255	Investigation of Child Abuse
FORS 6290	Selected Topics (Crime Scene Investigation III)
FORS 6290	Selected Topics (Bloodstain Pattern Analysis I)

Successful completion of a Master's Comprehensive Examination is required.

MASTER OF SCIENCE IN THE FIELD OF FRICTION RIDGE ANALYSIS

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

36 credits, including 30 credits in required courses and 6 credits in elective courses.

Required

FORS 6004	Fundamentals of Forensic Science I
FORS 6207	Photography in the Forensic Sciences
FORS 6215	Science of Fingerprints
FORS 6216	Development of Latent Prints
FORS 6217	Fingerprint Comparison
FORS 6224	Criminal Law for Forensic Scientists
FORS 6225	Statistics for Forensic Scientists
FORS 6251	Crime Scene Investigation I
FORS 6257	Medicolegal Death Investigation
FORS 6290	Selected Topics (Digital Image Processing)

Electives

Two of the following

FORS 6203	Examination of Questioned Documents
FORS 6204	Firearms and Toolmark Identification
FORS 6256	Forensic Pathology

FORS 6290	Selected Topics (Bloodstain Pattern Analysis I)
-----------	---

Alternate courses can be selected with approval of advisor.

MASTER OF SCIENCE IN THE FIELD OF HIGH-TECHNOLOGY CRIME INVESTIGATION

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

36 credits including 30 credits in required courses, 6 credits in elective courses, and successful completion of the master's comprehensive examination.

Required

FORS 6259	Computer Related Law
FORS 6264	Protection of Information Systems
FORS 6273	RschMethods for SecurityProfs
FORS 6277	Computer Forensics I: Investigation and Data Gathering
FORS 6278	Computer Forensics II: Evidence and Analysis
FORS 6279	Incidence Response: Understanding and Identifying Network-Based Attacks
FORS 6280	Advanced Incidence Response: Investigating Network-Based Attacks
FORS 6285	High-Technology Crime Investigation Capstone Course
FORS 6287	Project Management for Security Professionals
FORS 6288	The Investigative Process for Computer Forensics

Electives

6 credits from the following:

FORS 6261	Security Management
FORS 6271	Forensic Psychology
FORS 6274	Video Forensic Analysis

FORS 6283	Steganography and Electronic Watermarking
-----------	---

FORS 6289	Linux for Computer Forensics
-----------	------------------------------

FORS 6291	Computer Forensics III: Advanced Techniques
-----------	---

FORS 6295	Research
-----------	----------

FORS 6298	Forensic Sciences Practicum
-----------	-----------------------------

Successful completion of a Master's Comprehensive Examination

GRADUATE CERTIFICATE IN BLOODSTAIN PATTERN ANALYSIS REQUIREMENTS

Specific admission requirements can be found on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

Required

FORS 6207	Photography in the Forensic Sciences
-----------	--------------------------------------

FORS 6290	Selected Topics (Bloodstain Pattern Analysis I)
-----------	---

FORS 6290	Selected Topics (Bloodstain Pattern Analysis II)
-----------	--

FORS 6290	Selected Topics (Bloodstain Pattern Analysis III)
-----------	---

FORS 6290	Selected Topics (Digital Image Processing)
-----------	--

Elective

One of the following

FORS 6251	Crime Scene Investigation I
-----------	-----------------------------

FORS 6257	Medicolegal Death Investigation
-----------	---------------------------------

Alternate courses can be selected with approval of advisor.

GRADUATE CERTIFICATE IN DIGITAL INVESTIGATIONS REQUIREMENTS

Specific admission requirements can be found on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

The following requirements must be fulfilled: 18 credits, including 15 credits in required courses and 3 credits in elective courses.

Required

FORS 6270	Digital Artifacts: Points of Evidence
-----------	---------------------------------------

FORS 6277	Computer Forensics I: Investigation and Data Gathering
-----------	--

FORS 6278	Computer Forensics II: Evidence and Analysis
-----------	--

FORS 6279	Incidence Response: Understanding and Identifying Network-Based Attacks
-----------	---

FORS 6280	Advanced Incidence Response: Investigating Network-Based Attacks
-----------	--

Elective

One of the following

FORS 6259	Computer Related Law
-----------	----------------------

FORS 6290	Selected Topics (Macintosh Forensics)
-----------	---------------------------------------

FORS 6290	Selected Topics (Malware Analysis)
-----------	------------------------------------

FORS 6290	Selected Topics (Computer Forensics III)
-----------	--

FORS 6290	Selected Topics (Mobile Forensics)
-----------	------------------------------------

GRADUATE CERTIFICATE IN FORENSIC INVESTIGATION REQUIREMENTS

Specific admission requirements can be found on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

The following requirements must be fulfilled: 15 credits, including 12 credits in required courses and 3 credits in elective courses.

Course List

Required:

FORS 6207	Photography in the Forensic Sciences
-----------	--------------------------------------

FORS 6213	Elements of Forensic Sciences
-----------	-------------------------------

FORS 6251	Crime Scene Investigation I-II
-----------	--------------------------------

FORS 6252	Crime Scene Investigation I2II
-----------	--------------------------------

One additional course selected from the following:

FORS 6203	Examination of Questioned Documents
-----------	-------------------------------------

FORS 6204	Firearms and Toolmark Identification
FORS 6254	Forensic Psychiatry
FORS 6255	Investigation of Child Abuse
FORS 6257	Medicolegal Death Investigation
Or other courses with departmental approval	

GRADUATE CERTIFICATE IN LATENT PRINT EXAMINATION

REQUIREMENTS

Specific admission requirements can be found on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

The following requirements must be fulfilled: 18 credits, including 15 credits in required courses and 3 credits in elective courses.

Required

FORS 6207	Photography in the Forensic Sciences
FORS 6215	Science of Fingerprints
FORS 6216	Development of Latent Prints
FORS 6217	Fingerprint Comparison
FORS 6290	Selected Topics (Digital Image Processing)

Electives

One of the following

FORS 6203	Examination of Questioned Documents
FORS 6204	Firearms and Toolmark Identification
FORS 6251	Crime Scene Investigation I
FORS 6252	Crime Scene Investigation II
FORS 6255	Investigation of Child Abuse
FORS 6256	Forensic Pathology
FORS 6257	Medicolegal Death Investigation

Alternate courses can be selected with approval of advisor.

GEOGRAPHY

One of the social and behavioral sciences disciplines in the Columbian College of Arts and Sciences, the geography program investigates how people in different places interact with the environment and how the environment influences their

lives. Geography majors understand society and environmental dynamics, the significance of scale, the uneven distribution of resources and levels of development, and the uses of geospatial techniques, including GIS (geographic information system) and remote sensing.

UNDERGRADUATE

Bachelor's program

- Bachelor of Arts with a major in geography (p. 221)

Minors

- Minor in geography (p. 222)
- Minor in geographic information systems (p. 222)

GRADUATE

Master's program

- Master of Arts in the field of geography (p. 222)

CERTIFICATE

- Graduate certificate in geographical information systems (p. 223)

FACULTY

Professor M.D. Price

Associate Professors L.M. Benton-Short (*Chair*), E. Chacko, R. Engstrom, D. Rain, N. Shiklomanov

Assistant Professors M. Keeley, M. Mann, D. Streletskiy

Teaching Assistant Professor J.P. Dymond

Professorial Lecturers I. Cheung, L. Marcus, W. Reisser

Lecturers N. Cowan, D. Gopalakrishna

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

GEOG 1000. Dean's Seminar. 3 Credits.

GEOG 1001. Introduction to Human Geography. 0-3 Credits.

A systematic survey of human geography; spatial perspectives on demographic, social, cultural, economic, and political changes around the world.

GEOG 1002. Introduction to Physical Geography. 4 Credits.

A systematic survey of environmental geography; perspectives on environments and human ecology, including ecosystems and their use, and resource geography. Laboratory fee.

GEOG 1003. Society and Environment. 0-3 Credits.

An introduction to the dynamic relationship between society and the physical environment, with focus on population, natural resources, environmental degradation, pollution, and conservation.

GEOG 2104. Introduction to Cartography and GIS. 3 Credits.

Fundamentals of cartography; geographic data structure and information systems. Laboratory fee.

GEOG 2105. Techniques of Spatial Analysis. 3 Credits.

Nature of geographical inquiry and analytical methods used in the study of spatial processes and patterns. Laboratory fee.

GEOG 2107. Introduction to Remote Sensing. 3 Credits.

Remote-sensing techniques using digital satellite imagery and aerial photography. Application to rural and urban settings, vegetation, and environmental monitoring. Laboratory fee. Prerequisite: GEOG 2105 or permission of instructor.

GEOG 2108. Weather and Climate. 3 Credits.

The elements and controls of weather and climate. Topics include energy and water balances, atmospheric general circulation, and severe weather events. Prerequisite: GEOG 1002.

GEOG 2110. Climate and Human Ecology. 3 Credits.

Interrelationships between human activities and the climatic environment. Emphasis on global climatic change. Prerequisite: GEOG 1002.

GEOG 2120. World Regional Geography. 3 Credits.

Practical approach to the themes, concepts, and tools appropriate for in-depth examination of the geography of the world's. Historical and physical regional geographies; contemporary regional issues; and intra- and interregional issues.

GEOG 2124. Urban Transportation. 3 Credits.

The relationship between freight and passenger transportation systems and urban land use patterns and structure. Prerequisite: GEOG 1001.

GEOG 2125. Transportation Systems and Networks. 3 Credits.

The structure and evolution of transportation networks and their impact on regional development.

GEOG 2127. Population Geography. 3 Credits.

Patterns of world population; factors contributing to population pressures, growth, and migrations.

GEOG 2128. Geomorphology. 3 Credits.

Understanding the nature, origin, and development of landforms in the field and through the use of maps and aerial photos. Prerequisite: GEOG 1002.

GEOG 2133. People, Land, and Food. 3 Credits.

Domestication and dispersal of plants and animals; development of agricultural systems; spatial disparities in world food production, demand, and distribution.

GEOG 2134. Energy Resources. 3 Credits.

Analysis of regional patterns and trends in consumption and production of energy resources. Examination of international energy linkages and energy policies of selected nations. Prerequisite: GEOG 1002.

GEOG 2134W. Energy Resources. 3 Credits.

Analysis of regional patterns and trends in consumption and production of energy resources. Examination of international energy linkages and energy policies of selected nations. Prerequisite: GEOG 1002.

GEOG 2136. Water Resources. 3 Credits.

Analysis of the global spatial patterns, development, use, and quality of water resources. Prerequisite: GEOG 1002.

GEOG 2137. Environmental Hazards. 3 Credits.

Examination of environmental hazards with emphasis on the use of geographic information systems.

GEOG 2140. Cities and Societies. 3 Credits.

The design and function of cities in the United States; contemporary, economic, political, and social change. Prerequisite: GEOG 1001.

GEOG 2140W. Urban Geography. 3 Credits.

The design and function of cities in the United States; contemporary, economic, political, and social change. Prerequisite: Geog 1001.

GEOG 2141. Cities in the Developing World. 3 Credits.

Urbanization processes, problems, and management in the developing world. Focus on urban location, politics, housing, services, employment, and environmental issues. Prerequisite: GEOG 1001.

GEOG 2144. Explorations in Historical Geography. 3 Credits.

Examination of selected themes in the cultural geography of the United States over the course of its history, in relation to an overview of the historical geography of the country. Same as AMST 2144.

GEOG 2145. The Cultural Landscape. 3 Credits.

The distribution and dynamics of cultural patterns around the world; analysis of culture as a process.

GEOG 2145W. Cultural Geography. 3 Credits.

The distribution and dynamics of cultural patterns around the world; analysis of culture as a process.

GEOG 2146. Political Geography. 3-4 Credits.

Interrelationships among the human and physical environment and political systems; the organization of political territories.

GEOG 2147. Military Geography. 3 Credits.

An examination of environmental and locational factors and their impact on military planning and operations.

GEOG 2148. Economic Geography. 3 Credits.

Locational influences on and spatial variation of the development of manufacturing, services, trade, and finance. Prerequisite: GEOG 1001.

GEOG 2196. Field Methods in Geography. 3 Credits.

For geography and environmental studies majors in their junior or senior year. Field research in human and physical geography. Students participate in several field exercises and develop their skills of observation, field mapping, repeat photography, and surveys. Laboratory fee.

GEOG 3106. Intermediate Geographic Information Systems. 3 Credits.

Principles of geographic information systems and their use in spatial analysis and information management. Laboratory fee. Prerequisite: GEOG 2104 and GEOG 2105.

GEOG 3132. Environmental Quality and Management. 3 Credits.

The evolution of environmental management philosophies and tools. The global distribution, utilization, and degradation of natural resources. Prerequisite: GEOG 1002.

GEOG 3143. Urban Sustainability. 3 Credits.

Relationship between urban spaces and the environment through the lens of sustainability. Prerequisite: GEOG 1001.

GEOG 3143W. Urban Sustainability. 3 Credits.

Relationship between urban spaces and the environment through the lens of sustainability. Prerequisite: GEOG 1001.

GEOG 3154. Geography of the Middle East and North Africa. 3 Credits.

Cultural and physical regional patterns of the Middle East and North Africa. Prerequisite: Geog 1001 or GEOG 1002.

GEOG 3161. Geography of Latin America. 3 Credits.

Examination of spatial characteristics of physical and cultural phenomena in Latin America.

GEOG 3164. The Geography of Africa. 3 Credits.

Cultural and physical patterns of Africa. Prerequisite: GEOG 1001 or GEOG 1002.

GEOG 3165. Geography of South Asia. 3 Credits.

An examination of the complex interplay of environmental, economic, sociocultural, and political factors in South Asia and their effects at the local and regional levels.

GEOG 3189. Readings in Geography I. 1-12 Credits.

Prerequisite: 12 credit hours of geography and permission of instructor.

GEOG 3190. Readings in Geography II. 1-12 Credits.

Continuation of GEOG 3189. Prerequisite: 12 credit hours of geography and permission of instructor.

GEOG 3193. Environmental Law and Policy. 3 Credits.

An introduction to selected pieces of major environmental legislation. The role of the courts and bureaucracy in implementing and interpreting legislation and their impacts on decision making. Designed for students with no training in law. Prerequisites: None.

GEOG 3198. Special Topics. 3 Credits.

Consideration of geographic aspects of topical and future problems of society. May be repeated for credit provided that the topic differs. Prerequisite: GEOG 1001 or GEOG 1002.

GEOG 3810. Planning Cities. 3 Credits.

An examination of historical and contemporary trends and dynamics in urban planning in the United States and abroad. Same as AMST 3810. Prerequisite: GEOG 1001.

GEOG 4195. Proseminar in Geographic Thought. 3 Credits.

For students completing the major in geography. Development of geographic thought, theories, and methodologies; geographic curricula. Prerequisite: permission of the advisor.

GEOG 4195W. Proseminar in Geographic Thought. 3 Credits.

For students completing the major in geography. Development of geographic thought, theories, and methodologies; geographic curricula. Prerequisite: permission of the advisor.

GEOG 4199. Internship. 1-3 Credits.

Fieldwork, internship, or other controlled assignment with an agency or organization engaged in work in applied geography. Prerequisite: 12 credit hours of geography courses and permission of instructor. May be repeated for credit to a maximum of 6 credits.

GEOG 4309. GIS for Emergency Management. 3 Credits.

Introduction to the theoretical principles of geographic information systems and examination of its history, current uses, and potential for emergency management through case studies, guest lectures, and hands-on training on various GIS products. Prerequisites: GEOG 3106.

GEOG 6201. Geographic Thought. 3 Credits.

For first-year master's students, a survey of geographic thought and theories. Emphasis on contemporary issues in geography and on the development of research.

GEOG 6207. Urban Planning and Development. 3 Credits.

Selected problems in urban and regional planning: applications of zoning, environmental controls, and other techniques for achieving sustainable urban development.

GEOG 6208. Land Use and Urban Transportation Planning. 3 Credits.

Relationships between land use and the movement of goods and people. Examination of land use and transportation planning principles, issues, and techniques. Roles of public and private interests in land use and transportation planning and management.

GEOG 6219. Seminar: Climatology. 3 Credits.

Inadvertent climate modification due to urbanization and impacts on environmental and human health.

GEOG 6220. Seminar: Climatic Change. 3 Credits.

Examination of natural and human-induced climatic change, at global, regional, and local scales.

GEOG 6222. Seminar: Resources and the Environment. 3 Credits.

Topics related to the spatial variations and interrelationships of resources and the environment; applications of geographic information systems and remote sensing. Prerequisite: permission of instructor.

GEOG 6223. Seminar: Population and Health. 3 Credits.

Interrelationships between population characteristics and dynamics and impacts on human health.

GEOG 6224. Seminar: Political Geography. 3 Credits.

Examination of political factors in location theory and analysis of the nature of political territories and conflict.

GEOG 6225. Seminar: Transportation and Development. 3 Credits.

Transportation and communication in the organization of space.

GEOG 6230. Seminar: Environmental Issues in Development. 3 Credits.

A consideration of the geographical dimensions of the links between development and the environment.

GEOG 6232. Migration and Development. 3 Credits.**GEOG 6243. Seminar: Urban Geography. 3 Credits.**

Topics concerning social, political, economic, and environmental issues in U.S. cities.

GEOG 6244. Urban Sustainability. 3 Credits.

Urban sustainability and environmental issues in developed and developing cities.

GEOG 6245. Water Resources Policy and Management. 3 Credits.

In this course, we will examine the history and practice of water resources policy and management in the context of integrated water resource management. Thus, we will address management issues and policy responses to such topics as the impacts of urban and agricultural runoff on water quality; provision of wastewater and water quality services; water supply, water allocation and scarcity; and modification of waterbodies for the purposes of flood control, hydropower, navigation, and recreation. In addition, non-human water requirements: e.g. for fish and wildlife, as well as the need to preserve the natural ecosystems that provide and sustain water resources will be central to each discussion. We will examine management and policy issues in the United States and worldwide at a range of scales: local, state, federal and international. In the course of these examinations, students will gain an understanding of how current issues such as growing populations, increasing affluence, and climate change may impact water resource policy and management.

GEOG 6250. Geographical Perspectives on Development. 3 Credits.

Theory and debates surrounding economic development in a globalizing world, with case studies.

GEOG 6261. Geographical Perspectives on Latin America. 3 Credits.

Natural resources, the environment, and population dynamics through time.

GEOG 6262. Geographical Perspectives on the Middle East. 3 Credits.

Examination of selected topics related to political, economic, social, cultural, and geographic patterns and processes in the region.

GEOG 6265. Geography of Russia and Its Neighbors. 3 Credits.

A deeper understanding of Post-Soviet geography with a focus on the physical and environmental characteristics of the region, geography of natural and human resources, ethnic, cultural and religious diversity, characteristics of economic and political regions, and recent geopolitical developments.

GEOG 6290. Principles of Demography. 3 Credits.

Introduction to basic demographic perspectives and data; methods for analysis of population size, distribution, and composition; determinants and consequences of population trends. Departmental prerequisite waived. Same as ECON 6290/ SOC 6290/ STAT 6290.

GEOG 6291. Methods of Demographic Analysis. 3 Credits.

Basic methods for analysis of mortality, natality, and migration; population estimates and projections; estimation of demographic measures from incomplete data. Departmental prerequisite waived. Same as ECON 6291/ SOC 6291/ STAT 6291.

GEOG 6293. Special Topics. 3 Credits.

Consideration of geographic aspects of topical social or environmental problems. May be repeated for credit provided the topic differs.

GEOG 6295. Research. 1-12 Credits.

May be repeated for credit.

GEOG 6299. Internship. 1-3 Credits.**GEOG 6300. Geography Capstone Internship. 3 Credits.**

This course will provide hands-on experiential learning in a local government agency, NGO, or corporation while allowing the candidate to use his/her geographical skills in a real world setting. Restricted to Geography graduate students only. Prerequisites: GEOG 6201.

GEOG 6304. Geographical Information Systems I. 3 Credits.

Fundamentals of cartography; geographic data structure and geographic information systems.

GEOG 6305. Geospatial Statistics. 3 Credits.

Nature of geographical inquiry and the analytical and statistical methods used in the study of spatial processes and patterns.

GEOG 6306. Geographical Information Systems II. 3 Credits.

GEOG 6307. Digital Image Processing. 3 Credits.

This course introduces students to the theoretical, technical and applied aspects of remote sensing as a tool for monitoring and managing earth resources. This course will provide students with the knowledge for analyzing and applying remotely sensed data for problem solving as it applies to land cover. Prerequisite GEOG 6304.

GEOG 6309. GIS for Emergency Management. 3 Credits.

This course will introduce students to the theoretical principles of geographic information systems and will examine its history, current uses and potential for emergency management through case studies, guest lectures and hands-on training on various GIS products. Prerequisites: GEOG 6304.

GEOG 6998. Thesis Research. 3 Credits.

GEOG 6999. Thesis Research. 3 Credits.

BACHELOR OF ARTS WITH A MAJOR IN GEOGRAPHY

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

The program of study consists of 36 credits including:

GEOG 1001	Introduction to Human Geography
GEOG 1002	Introduction to Physical Geography
GEOG 4195	Proseminar in Geographic Thought

A minimum of two courses from each of the following groups:

Group A (Physical/Environmental/Resources)	
GEOG 1003	Society and Environment
GEOG 2108	Weather and Climate
GEOG 2110	Climate and Human Ecology
GEOG 2128	Geomorphology
GEOG 2134	Energy Resources
GEOG 2136	Water Resources
GEOG 2137	Environmental Hazards
GEOG 3132	Environmental Quality and Management
GEOG 3143	Urban Sustainability

Group B (Human)	
GEOG 2124	Urban Transportation
GEOG 2125	Transportation and Communication
GEOG 2127	Population Geography
GEOG 2133	People, Land, and Food
GEOG 2140	Cities and Societies
GEOG 2141	Cities in the Developing World
GEOG 3143	Urban Sustainability
GEOG 2144	Explorations in Historical Geography
GEOG 2145	Cultural Geography
GEOG 2146	Political Geography
GEOG 2147	Military Geography
GEOG 2148	Economic Geography
GEOG 3810	Building Cities
Group C (Techniques)	
GEOG 2104	Introduction to Cartography and GIS
GEOG 2105	Techniques of Spatial Analysis
GEOG 2107	Introduction to Remote Sensing
GEOG 2196	Field Methods in Geography
GEOG 3106	Intermediate Geographic Information Systems
GEOG 4121	Advanced Geographic Information Systems
At least one course from Group D (Regional):	
GEOG 3120	World Regional Geography
GEOG 3154	Geography of the Middle East and North Africa
GEOG 3161	Geography of Latin America
GEOG 3164	The Geography of Africa
GEOG 3165	Geography of South Asia

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, students must have a minimum grade-point

average of 3.75 in geography courses and a 3.5 average overall.

MINOR IN GEOGRAPHIC INFORMATION SYSTEMS

REQUIREMENTS

Required:

GEOG 2104	Introduction to Cartography and GIS
GEOG 2105	Techniques of Spatial Analysis
GEOG 2107	Introduction to Remote Sensing
GEOG 3106	Intermediate Geographic Information Systems
GEOG 4121	Advanced Geographic Information Systems

One additional upper-level GEOG course

MINOR IN GEOGRAPHY

REQUIREMENTS

Required:

GEOG 1001	Introduction to Human Geography
GEOG 1002	Introduction to Physical Geography

One course from each of the following groups:

Group A (Physical/Environmental/Resources)

GEOG 1003	Society and Environment
GEOG 2108	Weather and Climate
GEOG 2110	Climate and Human Ecology
GEOG 2128	Geomorphology
GEOG 2134	Energy Resources
GEOG 2136	Water Resources
GEOG 2137	Environmental Hazards
GEOG 3132	Environmental Quality and Management

Group B (Human)

GEOG 2124	Urban Transportation
-----------	----------------------

GEOG 2125	Transportation and Communication
GEOG 2127	Population Geography
GEOG 2133	People, Land, and Food
GEOG 2140	Cities and Societies
GEOG 2141	Cities in the Developing World
GEOG 2144	Explorations in Historical Geography
GEOG 2145	Cultural Geography
GEOG 2146	Political Geography
GEOG 2147	Military Geography
GEOG 2148	Economic Geography
GEOG 3143	Urban Sustainability
GEOG 3810	Building Cities

Group C (Techniques)

GEOG 2104	Introduction to Cartography and GIS
GEOG 2105	Techniques of Spatial Analysis
GEOG 2107	Introduction to Remote Sensing
GEOG 2196	Field Methods in Geography
GEOG 3106	Intermediate Geographic Information Systems
GEOG 4121	Advanced Geographic Information Systems

Group D (Regional)

GEOG 3120	World Regional Geography
GEOG 3154	Geography of the Middle East and North Africa
GEOG 3161	Geography of Latin America
GEOG 3164	The Geography of Africa
GEOG 3165	Geography of South Asia

MASTER OF ARTS IN THE FIELD OF GEOGRAPHY

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

Required courses:

GEOG 6201	Geographic Thought
GEOG 6304	Geographical Information Systems I

Elective courses:

18 credits of electives

Depending upon the chosen field of specialization, each student will select electives from appropriate courses within the department or from related programs and departments within the University or the Consortium of Universities.

Thesis option:

GEOG 6998	Thesis Research
GEOG 6999	Thesis Research

Non-thesis option:

Degree candidates choosing the non-thesis option must take three credits of directed research

GEOG 6295	Research
or GEOG 6300	Geography Capstone Internship

The student's program of study will be developed in consultation with the advisor and graduate committee.

GRADUATE CERTIFICATE IN GEOGRAPHICAL INFORMATION SYSTEMS

The graduate certificate in geographical information systems (GIS) encompasses a selection of core and elective courses that provide the knowledge and the skills to move directly from the classroom into this burgeoning scientific specialty-and the growing GIS job market. The curriculum guides students through all aspects of GIS theory and practice, from the science of cartography to analyzing geographical statistics to database design and geospatial modeling. Students are well equipped with a solid grounding in geospatial theory and techniques as well as its practical applications. The program prepares students to transform models and data into road maps for addressing real-world problems. Government agencies, non-profits, and the private sector are looking for skilled workers of all stripes with strong proficiency in GIS. Students leave the program with the know-how to immediately put their GIS talents to work as environmental scientists, civil engineers, and public health officials, among the many professionals who rely on GIS.

REQUIREMENTS

Specific admission requirements can be found on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

The Graduate Certificate in the field of Geographical Information Systems (GIS) requires the completion of 12 graduate credits.

Required:

GEOG 6304	Geographical Information Systems I
GEOG 6305	Geospatial Statistics
GEOG 6306	Geographical Information Systems II

One of the following:

GEOG 6307	Digital Image Processing
GEOG 6309	GIS for Emergency Management

GEOLOGICAL SCIENCES

The program offers undergraduate instruction in rigorous research techniques. It allows students to work directly with faculty in research on the geology and paleontology of the Appalachian mountains, the Rocky mountains, Asia, and elsewhere. The student-faculty partnership provides a broad education and hands-on training.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in geological sciences (p. 225)
- Bachelor of Science with a major in geological sciences (p. 226)

Minor

- Minor in geological sciences (p. 226)

FACULTY

Committee on Geological Sciences C.E. Brown, J.M. Clark, C.A. Forster, G. Mattiotti, E. Pauli, J. Kravitz, H. Teng, R.P. Tollo

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students

- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

GEOL 1001. Physical Geology. 3 Credits.

Lecture, laboratory. An introduction to the principal features of the composition and structure of the earth. Topics include the nature of minerals and rocks, surface and deep earth processes, mineral and energy resources, and plate tectonics. Laboratory fee. Credit will not be given for both GEOL 1001 and GEOL 1005.

GEOL 1002. Historical Geology. 3 Credits.

Lecture, laboratory. An introduction to the history of the earth. Topics include sedimentary environments, plate tectonics, origin of life, and evolution. Laboratory fee. Prerequisite: GEOL 1001 or GEOL 1005.

GEOL 1005. Environmental Geology. 3 Credits.

Lecture, laboratory. An introduction to the impact of geology on the environment, with emphasis on the relation of people and society to natural environments; population evolution, natural hazards, and mineral resources. Laboratory fee. Credit will not be given for both GEOL 1001 and GEOL 1005.

GEOL 1006. Science & the Environment. 3 Credits.

The large-scale processes operating within the atmosphere, oceans, and solid Earth. Prerequisite: GEOL 1001 or GEOL 1005.

GEOL 2106. Oceanography. 3 Credits.

The ocean with its many environments represents the last largely unexplored frontier on earth. Origin of the ocean systems and plate tectonics, ocean habitats and their biota, marine hydrology and ocean currents; air-sea interaction and climate control; ocean mapping techniques; environmental regulations covering marine resources. Laboratory fee. Prerequisite: GEOL 1001 or GEOL 1005.

GEOL 2111. Mineralogy. 4 Credits.

Lecture and laboratory. Introduction to the crystallography and chemical systematics of rock-forming and ore minerals. Exercises emphasize the analysis of mineralogic data and the paragenesis of mineral assemblages. Prerequisite: GEOL 1001 or GEOL 1005 or permission of instructor. Laboratory fee.

GEOL 2112. Igneous and Metamorphic Petrology. 4 Credits.

Lecture and laboratory. Introduction to basic light theory and the identification and characterization of minerals through optical properties. Laboratory exercises provide an introduction to petrologic analysis of igneous and metamorphic mineral systems. Prerequisite: GEOL 2111 or permission of the instructor. Laboratory fee.

GEOL 2122. Structural Geology. 3 Credits.

Lecture and laboratory. Study of natural and experimental rock deformation and the relationships between stress and strain as recorded by geologic structures. Prerequisite: GEOL 1001 or GEOL 1005. Laboratory fee.

GEOL 2151. History of Life. 3 Credits.

A review of the origin of life, the geologic record, and the evolutionary history of the major groups of organisms, including the origin of life and evolution of invertebrates, vertebrates, and plants. Prerequisite: GEOL 1001 or GEOL 1002 or BISC 1111- BISC 1112. Laboratory fee. Same as BISC 2451.

GEOL 2159. Geobotanical Ecology of the Central Appalachians. 4 Credits.

A multidisciplinary approach to Appalachian ecology involving application of scientific principles from both geology and botany, stressing interrelationships between geological, geochemical, and biological processes. Field trips. Laboratory fee. Prerequisite: GEOL 1001 or GEOL 1005 and BISC 1111- BISC 1112; with permission of instructor.

GEOL 2190. Special Topics in Geology. 1-3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

GEOL 2333. Evol/Extinction of Dinosaurs. 3 Credits.

The 165-million-year history of dinosaurs; different groups and their evolution, end-Cretaceous extinction event, the origin of birds, and the biology of the group. Prerequisites: BISC 1111 and BISC 1112; or GEOL 1001 and GEOL 1002 or GEOL 1002 and GEOL 1005. Same as BISC 2333.

GEOL 3118. Volcanology. 3 Credits.

Fundamental principles and geologic processes associated with volcanism. Eruptive styles, processes leading to magma production and transport, triggering mechanisms, plate tectonic settings, volcanic hazards, and disaster mitigation. Case histories of selected volcanic eruptions examined in detail. Prerequisite: GEOL 2111 or permission of instructor. Laboratory fee.

GEOL 3119. Field Experience in Volcanology. 1 Credit.

Week-long field exercise at a major volcanic center in the western United States. Field-based interpretation and analysis of volcanic and related rocks. The geology of each site and the processes responsible for volcanism discussed in detail. Corequisite: GEOL 3118. Deposit for expenses is required.

GEOL 3123. Crustal Dynamics. 0-3 Credits.

Basic plate tectonic processes and features; the plate tectonic paradigm in historical evolutionary framework. Students present an original research project orally and in writing. Prerequisite: GEOL 2122. Laboratory fee.

GEOL 3126. Sedimentology and Stratigraphy. 4 Credits.

Lecture and laboratory. Introduction to sedimentation and stratigraphy; origin and classification of sediments and sedimentary rocks; introduction to clastic and carbonate depositional environments and stratigraphic principles. Prerequisite: GEOL 1002, GEOL 2111. Laboratory fee.

GEOL 3131. Global Climate Change. 3 Credits.

Fundamental causes and patterns of climate change. Methods of reconstruction of past climates; modeling and predicting climate change.

GEOL 3138. Hydrogeology. 3 Credits.

Principles and theory of basic and applied hydrology: surface water hydrology, geology of groundwater systems, groundwater flow, surface water-groundwater interactions, contamination and remediation technologies, conservation, management, and regulations. Prerequisite: GEOL 2111, GEOL 2122; MATH 1221 or MATH 1231; or permission of instructor. Laboratory fee.

GEOL 3140. Geochemistry. 3 Credits.

Chemical systems and processes on the planet Earth; origins and interactions among and within the Earth’s lithosphere, oceans, and atmosphere; origin, distribution, and behavior of the elements; radioactive and stable isotope systems. Aqueous geochemistry; geochemical cycles. Same as CHEM 3140. Prerequisite: GEOL 1001 or GEOL 1005; CHEM 1111- CHEM 1112 .

GEOL 3189. Geophysics. 3 Credits.

Principles of magnetic, gravity, seismic and electrical methods applied to geological problem-solving. Prerequisite: GEOL 2122 or permission of instructor.

GEOL 3191. Geology of Energy Resources. 3 Credits.

Principles of geology applied in energy exploration, exploitation, and production; the geology of energy resources in ocean basins; borehole and surface geophysical applications and reconnaissance mapping techniques; management and regulation of energy resources; sustainability, efficiency, and conservation issues. Prerequisite: GEOL 2122 or permission of instructor. Laboratory fee.

GEOL 4195. Geological Field Methods. 4 Credits.

Weekend field trips. Methods of outcrop analysis, geologic mapping, and data interpretation. The geological evolution of the central Appalachian mountains and the plate tectonic processes responsible for their formation emphasized. Prerequisite: GEOL 2111, GEOL 2122. Field trip fee.

GEOL 4195W. Geological Field Methods. 4 Credits.

GEOL 4199. Undergraduate Research or Reading. 1-12 Credits.

Problems approved by the staff. May be repeated for credit.

**BACHELOR OF ARTS WITH
A MAJOR IN GEOLOGICAL
SCIENCES**

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Prerequisite courses:

GEOL 1002	Historical Geology
-----------	--------------------

GEOL 1001	Physical Geology
or GEOL 1005	Environmental Geology

Required courses in related areas:

CHEM 1111	General Chemistry I
CHEM 1112	General Chemistry II

Required courses for the major:

GEOL 2111	Mineralogy
GEOL 2112	Igneous and Metamorphic Petrology
GEOL 2122	Structural Geology
GEOL 3126	Sedimentology and Stratigraphy
GEOL 4195	Geological Field Methods
Three upper-level electives chosen from the following:	
GEOL 2106	Oceanography
GEOL 2151	History of Life
GEOL 2190	Special Topics in Geology (3 credits only)
GEOL 3118	Volcanology
GEOL 3123	Crustal Dynamics
GEOL 3131	Global Climate Change
GEOL 3138	Hydrogeology
GEOL 3140	Geochemistry
GEOL 3191	Geology of Energy Resources
GEOL 4199	Undergraduate Research or Reading (3 credits only)

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, candidates must maintain a cumulative grade-point average of 3.3 both overall and for courses in the major, and must submit an approved Honors thesis.

BACHELOR OF SCIENCE WITH A MAJOR IN GEOLOGICAL SCIENCES

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Prerequisite courses:

GEOL 1002	Historical Geology
GEOL 1001	Physical Geology
or GEOL 1005	Environmental Geology

Required courses in related areas:

CHEM 1111 & CHEM 1112	General Chemistry I and General Chemistry II
--------------------------	---

One of the following:

PHYS 1011 & PHYS 1012	General Physics I and General Physics II
--------------------------	---

Or

ASTR 1001 & ASTR 1002	Stars, Planets, and Life in the Universe and Origins of the Cosmos
--------------------------	---

One of the following:

MATH 1220 & MATH 1221	Calculus with Precalculus I and Calculus with Precalculus II
--------------------------	---

MATH 1231	Single-Variable Calculus I
-----------	----------------------------

STAT 1051	Introduction to Business and Economic Statistics
-----------	---

STAT 1053	Introduction to Statistics in Social Science
-----------	---

STAT 1111	Business and Economic Statistics I
-----------	------------------------------------

STAT 1127	Statistics for the Biological Sciences
-----------	--

Required courses for the major:

GEOL 2111	Mineralogy
GEOL 2112	Igneous and Metamorphic Petrology
GEOL 2122	Structural Geology
GEOL 3126	Sedimentology and Stratigraphy

GEOL 4195	Geological Field Methods
-----------	--------------------------

Four courses chosen with approval of the program advisor from the following list of designated courses:

GEOL 2106	Oceanography
-----------	--------------

GEOL 2151	History of Life
-----------	-----------------

GEOL 2159	Geobotanical Ecology of the Central Appalachians
-----------	---

GEOL 2190	Special Topics in Geology (3 credits only)
-----------	---

GEOL 3118	Volcanology
-----------	-------------

GEOL 3131	Global Climate Change
-----------	-----------------------

GEOL 3138	Hydrogeology
-----------	--------------

GEOL 3140	Geochemistry
-----------	--------------

GEOL 3189	Geophysics
-----------	------------

GEOL 3191	Geology of Energy Resources
-----------	-----------------------------

GEOL 4199	Undergraduate Research or Reading (3 credits only)
-----------	---

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, candidates must maintain a cumulative grade-point average of 3.3 both overall and for courses in the major, and must submit an approved Honors thesis.

MINOR IN GEOLOGICAL SCIENCES

REQUIREMENTS

Prerequisite:

GEOL 1002	Historical Geology
-----------	--------------------

GEOL 1001	Physical Geology
-----------	------------------

or GEOL 1005	Environmental Geology
--------------	-----------------------

The minor consists of:

GEOL 2111	Mineralogy
-----------	------------

GEOL 2112	Igneous and Metamorphic Petrology
-----------	-----------------------------------

GEOL 2122	Structural Geology
-----------	--------------------

GEOL 3126	Sedimentology and Stratigraphy
-----------	--------------------------------

HISTORY

The Department of History offers a curriculum that includes early modern Europe, America since the Civil War, the international history of the Cold War, the history of colonialism and imperialism, and modern East Asia. The program strengthens a student's ability to thoroughly understand history and its lessons. It is also designed so that students gain the knowledge and analytical tools necessary for success in a range of careers and professions.

UNDERGRADUATE

Bachelor's program

- Bachelor of Arts with a major in history (p. 238)

Minor

- Minor in history (p. 249)

GRADUATE

Master's program

- Master of Arts in the field of history (p. 249)

Doctoral programs

- Doctor of Philosophy in the field of history (p. 250)
- Doctor of Philosophy in the field of American religious history (p. 250)

FACULTY

Professors H.L. Agnew, T. Anbinder, E. Arnesen, M.A. Atkin, W.H. Becker, E. Berkowitz, A.M. Black (Research), E.H. Cline, R.J. Cottrol, J. Hershberg, A.J. Hildebeitel, D.K. Kennedy, D.R. Khoury, P.F. Klarén, L.L. Peck, L.P. Ribuffo, D. Silverman, R.H. Spector, R.B. Stott, R. Thornton, B. Vinson, J. Weissman Joselit, A. Zimmerman

Associate Professors N. Blyden, G.A. Brazinsky, D. Brunsman, E. Chapman, D. Cline, H.M. Harrison, B. Hopkins, C. Klemek, E.A. McCord, S. McHale, M. Norton, S. Robinson, S.N. Robinson, A. Smith II, D. Schwartz, K. Schultheiss (*Chair*), D. Yang

Assistant Professors T. Christov, J. Kim, J. Krug, C.T. Long, S. Miller

Adjunct Professors K. Bowling, A. Howard

Professorial Lecturer S. Wells

Post-Doctoral Fellow J. Shea

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Course Accessibility: All listed undergraduate courses are open to students without history course prerequisites with the exception of HIST 3095 Internship, HIST 4098 Thesis Seminar, and HIST 4099 Senior Honors Thesis Tutorial.

HIST 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the Schedule of Classes for more details. Restricted to First-year students in CCAS.

HIST 1011. World History, 1500-Present. 3 Credits.

An introduction to world history over the past half millennium, stressing themes of exchange and integration, tracing the ways various peoples of the world became bound together in a common system.

HIST 1020. Approaches to Women's History. 3 Credits.

Exploration of critical periods of intellectual and cultural change in Western societies as influenced by and affecting women. Examination of images of women and of changing ideal types of femininity and masculinity. Aspects of law, religion, art, culture, work, and politics in relation to these topics. Same as WSTU 1020.

HIST 1110. European Civilization in Its World Context. 3 Credits.

Introduction to the history of Europe, emphasizing primary sources and their interpretation. From the beginning of written culture through 1715.

HIST 1120. European Civilization in Its World Context. 3 Credits.

Continuation of HIST 1110. Introduction to the history of Europe, emphasizing primary sources and their interpretation. From 1715 to the present.

HIST 1120W. European Civ in World Context. 3 Credits.

HIST 1121. The War of Ideas in European and International History, 1750-Present. 0-3 Credits.

The ideas that made people fight, from the French Revolution to the worldwide uprisings of the 1960s and beyond. Key texts whose ideas of freedom and slavery, tradition and progress, state authority and revolutionary violence changed the world. The political, economic, and social contexts and effects of these texts.

HIST 1310. Introduction to American History. 3 Credits.

The political, social, economic, and cultural history of the United States. From the earliest settlements to 1876.

HIST 1311. Introduction to American History. 3 Credits.

Continuation of HIST 1310. The political, social, economic, and cultural history of the United States. From 1876 to present.

HIST 2005. Majors' Introductory Seminar. 3 Credits.

Introduction to the analytical and writing expectations of the history major. Topics vary by semester. Consult the Schedule of Classes for more details. May be repeated for credit provided the topic differs.

HIST 2005W. Majors' Introductory Seminar. 3 Credits.

Introduction to the analytical and writing expectations of the history major. Topics vary by semester. Consult the Schedule of Classes for more details. May be repeated for credit provided the topic differs.

HIST 2010. Early American Cultural History. 3 Credits.

How culture was important in the creation of the United States—in its origins as a colonial outpost and its expansion across the continent; in its hierarchies and expressions of power, especially as organized by race, class, ethnicity, or gender; in the creation of democracy and the valuing of free expression; and in the development of cities and the varied uses of the countryside. Same as AMST 2010.

HIST 2011. Modern American Cultural History. 3 Credits.

The effects of culture in the shaping of the United States since 1876. The role of the mass media; effects of cultural conceptions on the physical landscape; changing ideas of race, ethnicity, gender, and sexuality; and the political meanings of cultural conflict. Transnational influences on U.S. culture and effects of U.S. culture abroad. Same as AMST 2011.

HIST 2020. Washington, D.C.: History, Culture, and Politics. 0-3 Credits.

Introduction to interdisciplinary methods of studying the contemporary city. Major problems of metropolitan life, past and present, analyzed by faculty and community leaders. Emphasis on experiential team projects. Same as AMST 2020.

HIST 2020W. Washington, D.C.: History, Culture, and Politics. 0-3 Credits.

Introduction to interdisciplinary methods of studying the contemporary city. Major problems of metropolitan life, past and present, analyzed by faculty and community leaders. Emphasis on experiential team projects. Same as AMST 2020.

HIST 2050. History of Jewish Civilization: From the Bible to Modernity. 3 Credits.

Introduction to the richness and diversity of Jewish civilization from antiquity to the present. Examination of evolving notions of "who" or "what" is Jewish. Key concepts including "chosenness," community, peoplehood, diaspora, redemption, and Torah. How the boundaries of Jewishness have been formed, contested, and revised over time; how Jews managed to retain their identity throughout their millennial history of migration, dispersion, and persecution; what unites Jewish civilization; and whether a unified Jewish history over centuries and continents can be traced, as distinct from multiple "histories" of the Jews in the myriad times and places in which they lived. Emphasis on analysis of primary texts and cultural objects along with contextual understanding of Jews and Judaism.

HIST 2105. Majors' Introductory Seminar: Europe. 0-3 Credits.

HIST 2105W. Majors' Introductory Seminar: Europe. 0-3 Credits.

HIST 2112. History of Ancient Greece. 3 Credits.

A political and social survey of Bronze Age Minoan and Mycenaean civilizations, the Iron Age, Archaic Period, Classical Greece through Alexander the Great. (Same as CLAS 2112).

HIST 2113. The Roman World to 337 A.D.. 3 Credits.

Prehistoric Italy; rise and decline of the Roman Empire and Latin civilization; cultural, social, and political developments in the Greek world under Roman rule. Same as CLAS 2113.

HIST 2124. 19th-Century Europe. 3 Credits.

Exploration of primary source documents and works of professional historians to introduce important issues of 19th-century European history.

HIST 2125. 20th-Century Europe. 3 Credits.

Diplomatic, political, and cultural developments from the turn of the century to the present.

HIST 2131. History of England Since 1689. 3 Credits.

Development of English civilization and its impact on Western culture.

HIST 2141. History of France Since 1814. 3 Credits.

Breaks and continuities in the succession of regimes; the interplay between revolution and tradition; the weakened international position of France; Gaullism and the survival of France; European Unity.

HIST 2160. History of Germany. 3 Credits.

Political, social, and cultural development.

HIST 2305. Majors' Introductory Seminar: United States. 0-3 Credits.

HIST 2305W. Majors' Introductory Seminar: United States. 0-3 Credits.

HIST 2312. The American Civil War and Reconstruction, 1850-1877. 3 Credits.

Examination of the political crises of the 1850s to determine how and why the issue of slavery led to the American Civil War; the war's important battles, including how generals and common soldiers shaped outcomes; Reconstruction and the aftermath of the war, including how it shapes politics and race relations to the present day.

HIST 2313. History of the American West. 3 Credits.

A history of the Trans-Mississippi West from first settlement by American Indians to the present. Topics include the pre-contact West, the coming of the Spanish, American settlement, the Indian Wars, women in the West, labor and racial conflict, and the West in the twentieth century.

HIST 2320. U.S. Media and Cultural History. 3 Credits.

History and analysis of 20th-century U.S. media and culture, including the rise of consumer culture, film, and television. Racial, gendered, and national identities in the context of modernism, mass culture, and globalization. Same as AMST 2320.

HIST 2321. U.S. History, 1890-1945. 3 Credits.

A survey of modern U.S. history from the late nineteenth century to the end of WWII. Emphasis on politics, public policy, and culture. Basic readings include biography, autobiography, and contemporary novels.

HIST 2322. U.S. History since 1945. 3 Credits.

Political, social, diplomatic, and intellectual developments, with particular emphasis on the Cold War, "silent" '50s, and disrupted '60s.

HIST 2340. US Diplomatic History. 3 Credits.

American foreign relations in the 20th century.

HIST 2340W. US Diplomatic History. 3 Credits.

American foreign relations in the 20th century.

HIST 2341. History of FBI Counterintelligence. 3 Credits.

The issues, controversies, and personalities that have played critical roles in the history of FBI foreign counterintelligence development. Prerequisites: None.

HIST 2350. U.S. Religion and Politics. 3 Credits.

How religion and politics have influenced each other in the United States and how Americans have understood those influences. Religious violence; conflicts between faith and science; religious factors in racial and gender politics; and the separation of church and state. Same as AMST 2350.

HIST 2380. Sexuality in US Cultural Hist. 3 Credits.

Examination of the changing social organization and meaning of sexual practices and desires in American culture, with particular attention to the relationship between sexuality and gendered racial and class identities and politics. Same as AMST 2380/ WSTU 2380.

HIST 2410. 20th-Century U.S. Immigration. 3 Credits.

Survey of immigration policy and immigrants' lives. How immigrants have changed the United States and how the United States has changed immigrants. Same as AMST 2410.

HIST 2440. 202. 3 Credits.

An interdisciplinary introduction to the ethnic, cultural, political, and architectural landscape of the American city. Urban theory, race and ethnicity, urban history, planning and architecture, city politics, and cultural representations of the city. Same as AMST 2440.

HIST 2490. Themes in U.S. Cultural History. 3 Credits.

Topical examination of the ideas, values, and modes of expression that have made American life distinctive, as revealed through a cross-cultural or global perspective. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Same as AMST 2490.

HIST 2490W. Themes in U.S. Cultural History. 3 Credits.

Topical examination of the ideas, values, and modes of expression that have made American life distinctive, as revealed through a cross-cultural or global perspective. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs. (Same as AMST 2490W, AMST 2490W).

HIST 2505. Majors' Introductory Seminar: Africa. 0-3 Credits.

HIST 2605. Majors' Introductory Seminar: Asia. 0-3 Credits.

HIST 2605W. Majors' Introductory Seminar: Asia. 0-3 Credits.

HIST 2705. Majors' Introductory Seminar: Latin America. 0-3 Credits.

HIST 2705W. Majors' Introductory Seminar: Latin America. 0-3 Credits.

HIST 2710. The United States in Global Context, 1898-Present. 0-3 Credits.

How the 20th- and 21st-century U.S. has been engaged globally, both politically and culturally, with attention to global culture, transnational ideas and social movements, foreign policy, and economic transformations. Same as AMST 2710.

HIST 2730. World War II in History and Memory. 0-3 Credits.

Examination of Americans' histories and memories of World War II. Same as AMST 2730.

HIST 2730W. World War II History & Memory. 0-3 Credits.

Examination of Americans' histories and memories of World War II. Same as AMST 2730.

HIST 2803. The Ancient Near East and Egypt to 322 B.C.. 3 Credits.

Survey of Egyptian, Mesopotamian, Anatolian, West Semitic, and Iranian civilizations from the Neolithic period to Alexander's conquest. Same as Clas 2803.

HIST 2804. History of Ancient Israel. 3 Credits.

The history of ancient Israel from the Patriarchs through the Romans. Topics include historical, archeological, political, social, cultural, religious, diplomatic, military, economic, and intellectual events, movements, and relationships. Same as CLAS 2804.

HIST 2805. Majors' Introductory Seminar: Middle East. 0-3 Credits.**HIST 2805W. Majors' Introductory Seminar: Middle East. 3 Credits.****HIST 3001. Special Topics. 0-4 Credits.**

May be repeated for credit provided the topic differs.

HIST 3001W. Special Topics. 0-4 Credits.

May be repeated for credit provided the topic differs.

HIST 3030. Military History to 1860. 3 Credits.

The causes, conduct, and consequences of conflict in the ancient, medieval, renaissance, and early modern world. Examination of the Anglo-Dutch and Anglo-French wars leading to the Seven Years' War, American Revolution (including a "virtual staff ride" of the Saratoga Campaign), French Revolution, and Napoleonic Wars.

HIST 3031. Military History since 1860. 3 Credits.

Causes, conduct, and consequences of conflict from the American Civil War through the Austro- and Franco-Prussian Wars, Spanish-American War, Sino- and Russo-Japanese Wars, World Wars I and II (including a "virtual staff ride" of the Normandy Campaign), Korea, Vietnam, and modern "small wars".

HIST 3033. War and the Military in American Society from the Revolution to the Gulf War. 3 Credits.

Social and psychological dimensions of war and military service.

HIST 3035. The United States and the Wars in Indochina, 1945-1975. 3 Credits.

The American role in the Indochina Wars, emphasizing the period 1961-1975, and from the perspectives of the Vietnamese, French, and Americans in Vietnam. Related intellectual and political developments in the United States; Cold War relationships with China and the Soviet Union.

HIST 3038. Naval History to 1815. 3 Credits.

Causes, conduct, and consequences of war at sea from the Age of Reconnaissance and Conquest through the War of 1812 (including a "virtual staff ride" of the Battle of Trafalgar). Consideration of issues including technology, the impact of the environment, and theories of warfare associated with each period.

HIST 3039. Naval History since 1815. 3 Credits.

Causes, conduct, and consequences of war at sea in the Civil War, counterinsurgency operations of so-called small wars, World Wars I and II, and the post-Cold War period. The transition from sail to steam, asymmetric warfare, and the role of sea power in modern geopolitics. Students participate in a virtual staff ride of the Battle of Leyte Gulf.

HIST 3044W. The Price of Freedom: Normandy 1944. 4 Credits.

The causes, conduct, and consequences of warfare, considered through examination of the campaign in Normandy that began with the allied landings on D-Day. Assignments include researching and writing a biography of a member of the military who died in the campaign and presenting a eulogy at the soldier's graveside during a "staff ride" exploration of the battlefield conducted over spring break. The biography paper is to be submitted to and retained in the archives of the American Cemetery in Normandy. Restricted to Students must be approved by the Study Abroad Office and interviewed by the instructor.

HIST 3045. International History of the Cold War. 3 Credits.

Key events and themes of the Cold War, drawing on new evidence from U.S., Soviet, Chinese, German, East European, Vietnamese, Cuban, and other sources. Related historiographical controversies from multiple national perspectives. Why the Cold War began, why it lasted for 45 years, and why it ended.

HIST 3046. The Cold War in the Third World. 3 Credits.

The evolution of the Cold War in Asia, Africa, and Latin America. Decolonization and the response of the Great Powers, the political economy of the Third World, and American and Soviet interventions.

HIST 3047. Writing Cold War History. 3 Credits.

Seminar. Students prepare a research paper on selected topics in the history of the Cold War.

HIST 3047W. Writing Cold War History. 3 Credits.

Seminar. Students prepare a research paper on selected topics in the history of the Cold War.

HIST 3060. Modern Jewish History. 3 Credits.

Survey of Jewish history from the 17th century to the present, focusing on Europe, America, and the Middle East. The myriad political, economic, and intellectual challenges of modernity to Jewish life and how Jews responded to these challenges through various religious and secular movements and with new concepts of identity and community.

HIST 3061. The Holocaust. 3 Credits.

The origins, causes, and significance of the Nazi attempt to destroy European Jewry, within the context of European and Jewish history. Related themes include the behavior of perpetrators, victims, and bystanders; literary responses; contemporary implications of the Holocaust for religion and politics.

HIST 3062. War Crimes Trials. 3 Credits.

The Nuremberg trial and its legacy in subsequent international and hybrid tribunals. The need for judicial accountability for genocide, crimes against humanity, and war crimes.

HIST 3095. Internship. 1-3 Credits.

Study of history through internships in museums, libraries, Congress, or other appropriate institutions and agencies. Prerequisite: approval of a departmental faculty member.

HIST 3097. Independent Study. 1-3 Credits.

Permission of instructor required.

HIST 3101. Topics: Europe. 0-3 Credits.**HIST 3101W. Topics: Europe. 3 Credits.****HIST 3103. European Intellectual History I. 3 Credits.**

The "Century of Genius" and the Enlightenment; God, nature, man, and society, from Descartes to the French Revolution.

HIST 3104. European Intellectual History II. 3 Credits.

Continuation of HIST 3103. Responses to the French Revolution and the Enlightenment; historicism, evolution; nihilism, psychoanalysis; communism; fascism; existentialism, structuralism, postmodernism, and neo-orthodoxy.

HIST 3104W. European Intellectual History II. 3 Credits.

Continuation of HIST 3103. Responses to the French Revolution and the Enlightenment; historicism, evolution; nihilism, psychoanalysis; communism; fascism; existentialism, structuralism, postmodernism, and neo-orthodoxy.

HIST 3111. Topics in Ancient History. 3 Credits.

May be repeated for credit provided the topic differs. Same as CLAS 3111.

HIST 3118. The Middle Ages: 500-1500. 3 Credits.

The evolution of European society from the end of the Roman Empire to the Renaissance. The nature of political power, role of religion, place of gender, cultural production, and changing social structures.

HIST 3126. European Integration: A History. 3 Credits.

An examination of the origins and development of the European Union.

HIST 3130. History of England I. 3 Credits.

Development of English civilization and its impact on Western culture. To 1689.

HIST 3132. Tudor England. 3 Credits.

Aspects of the constitutional, social, intellectual, economic, and religious development of England, 1485-1603.

HIST 3132W. Tudor England. 3 Credits.

Aspects of the constitutional, social, intellectual, economic, and religious development of England, 1485-1603.

HIST 3134. Stuart England. 3 Credits.

The civil wars, Restoration, and Glorious Revolution. Political, religious, socioeconomic, and intellectual developments in England, 1603-1714.

HIST 3135. Victorian Britain. 3 Credits.

Major themes in 19th-century British history: industrialism, democratization, urbanization, imperial expansion, class and gender schisms.

HIST 3137. The British Empire. 3 Credits.

The British Empire from its rise in the 17th century to its demise in the 20th century.

HIST 3139. Twentieth Century Britain. 3 Credits.

Major themes of 20th-century British history: industrial decline, imperialism and decolonization, the making of a welfare state, the cataclysm of global war, integration with Europe.

HIST 3139W. 20th-Century Britain. 3 Credits.

Major themes of 20th-century British history: industrial decline, imperialism and decolonization, the making of a welfare state, the cataclysm of global war, integration with Europe.

HIST 3140. History of France I. 3 Credits.

Old Regime: monarchy and social classes; the Church; the Enlightenment; the 1789 revolution; Napoleon.

HIST 3140W. History of France to 1814. 3 Credits.

Old Regime: monarchy and social classes; the Church; the Enlightenment; the 1789 revolution; Napoleon.

HIST 3145. The French Revolution. 3 Credits.

Social, political, economic, and cultural history of the decade of revolution, 1789-1799. Attention to its structural consequences in France and in Europe at large.

HIST 3145W. The French Revolution. 3 Credits.

Social, political, economic, and cultural history of the decade of revolution, 1789-1799. Attention to its structural consequences in France and in Europe at large.

HIST 3148. El Camino de Santiago. 3 Credits.

Walking the Camino de Santiago is a cultural phenomenon that has lasted over a thousand years. An important part of Spain's cultural and political history, the Camino has affected the structures that form Spain's political and institutional systems, society, economy, and ideology as well as artistic forms of expression. Students may earn their Pilgrim's passport by walking the last 100 kilometers of the Camino after the formal classes have ended. Offered at GW Madrid Study Center.

HIST 3150. Spain and Its Empire, 1492-1700. 3 Credits.

Major transformations of the period: from cultural pluralism to ethnic homogeneity, from medieval fragmentation to imperial expansion in Europe and America; from religious reform to Catholic Reformation, from global dominance to decline.

HIST 3168. Divided and United Germany Since 1945. 3 Credits.

Why was Germany divided after World War II? Why did it stay divided for 45 years? How was it reunited in 1990? This course examines developments in East and West Germany, relations between the two Germanys during the Cold War, their foreign policies, and how other countries treated them.

HIST 3173. The Habsburgs in East Central Europe. 3 Credits.

History of the Habsburg monarchy in its East Central European context. Reformation and Counter-Reformation; conflict with the Ottoman Empire; great-power competition in Europe; response to the Enlightenment and the French Revolution; the rise of nationalism; and final dissolution in World War I.

HIST 3173W. The Habsburgs in East Central Europe. 3 Credits.

History of the Habsburg monarchy in its East Central European context. Reformation and Counter-Reformation; conflict with the Ottoman Empire; great-power competition in Europe; response to the Enlightenment and the French Revolution; the rise of nationalism; and final dissolution in World War I.

HIST 3178. The Making of the Modern Balkans. 3 Credits.

States of the Balkan peninsula—Slovenia, Croatia, Serbia and Montenegro, Bosnia, Albania, Macedonia, Greece, Bulgaria, and Romania—including developments since the decline of the Ottoman Empire and the emergence of Balkan nationalist movements, and continuing through the collapse of the Soviet bloc.

HIST 3180. Russia to 1801. 3 Credits.

Survey of Russian history from the rise of the Kievan confederation in the ninth century to the establishment of Imperial Russia as a European great power. Attention will be given to the political, socioeconomic, and cultural history of the East Slavs, especially the Russians.

HIST 3181. Russia Since 1801. 3 Credits.

Survey of Russian and Soviet history from the reign of Alexander I to the Stalin era. Attention will be given to the contending forces of revolution, reform, and conservatism; diplomatic relations; economic development; and social change.

HIST 3301. Topics: U.S. History. 0-3 Credits.

HIST 3301W. Topics: U.S. History. 3 Credits.

HIST 3302. America before 1764. 3 Credits.

An examination of prehistory, colonization, and the shifting dynamics among European Americans, African Americans, and Native Americans before 1764.

HIST 3303. Revolutionary America. 3 Credits.

The American revolutionary era from the movement for independence through the establishment of the new federal government under the Constitution. Emphasis on changes to the inhabitants of North America, including Native Americans, African Americans, and European Americans, as well as to the broader Atlantic world.

HIST 3304. George Washington and His World. 3 Credits.

George Washington's life as soldier, politician, entrepreneur, slave holder, and national icon. Emphasis on the interpretation of original sources, including historical documents and the material culture of Washington's Mount Vernon estate, with tours and lectures by curators and historians. Departmental permission is required for registration.

HIST 3311. The Jacksonian Era and the Rise of Mass Politics. 3 Credits.

Focus on 1824–1950 as a crucial era in American history. Popular impact of social and political changes caused by the growth of the market economy; emergence of two national political parties; and new reforms focused increasingly on slavery as the country's greatest problem.

HIST 3311W. The Jacksonian Era and the Rise of Mass Politics. 3 Credits.

Study of 1824–1850 as an era in American history marked by widespread change. Impact of social and political reforms caused by the growth of the market economy; emergence of two national political parties; and new reforms increasingly focused on slavery as America's greatest problem.

HIST 3322. The Modern American Presidency. 3 Credits.

Development of the modern American presidency from Theodore Roosevelt to Barack Obama. Examination of the lives of the presidents, revealing the intersection of personal and impersonal forces in the creation of modern politics and modern America.

HIST 3324. US Urban History. 3 Credits.

History of American urban life and culture from the colonial era to the present, focusing on transitions from pre-industrial to industrial and post-industrial forms. The social and spatial configuration of U.S. cities, and the urban politics of race, class, and gender. Same as AMST 3324.

HIST 3332. History of American Foreign Policy Since World War II. 3 Credits.

Emphasis on American and Soviet strategy and foreign policy in the era of the Cold War. World War II to the Vietnam .

HIST 3333. History of American Foreign Policy Since World War II. 3 Credits.

Continuation of HIST 3332. Emphasis on American and Soviet strategy and foreign policy in the era of the Cold War. Vietnam to the "New World Order."

HIST 3334. The Nuclear Arms Race. 3 Credits.

Political, military, diplomatic, scientific, and cultural consequences of the advent of nuclear weapons. The development and uses of the atomic bomb during World War II and the course and legacy of the U.S.-Soviet nuclear arms race during the Cold War.

HIST 3351. U.S. Social History. 3 Credits.

Survey of American society and social change from the Civil War to the present. Gender, sexuality, race, ethnicity, and class perspectives. (Same as AMST 3351).

HIST 3352. Women in the United States to 1865. 3 Credits.

Survey of women's experience in U.S. history, the way gender has organized relations of power, and the impact of race, region, class, and ethnicity on women and on gender roles. (Same as AMST 3352, WSTU 3352).

HIST 3352W. Women in the United States I. 3 Credits.

Survey of women's experience in U.S. history, the way gender has organized relations of power, and the impact of race, region, class, and ethnicity on women and on gender roles. Same as AMST 3352/ WSTU 3352.

HIST 3353. Women in the United States II. 3 Credits.

Continuation of HIST 3352. Survey of women's experience in U.S. history, the way gender has organized relations of power, and the impact of race, region, class, and ethnicity on women and on gender roles. (Same as AMST 3353, WSTU 3353).

HIST 3356. Epidemics in American History. 3 Credits.

Epidemics in American history.

HIST 3360. African American History to 1865. 3 Credits.

Major themes and concepts emerging from the early history of the African presence in the Americas and black experiences in the new nation of the United States. Focus on the emergence and evolution of the concept of race, the ways race evolved in concert with Atlantic slavery, and how race intersected with gender, economics, religion, and nationality. (Same as AMST 3360).

HIST 3361. African American History Since 1865. 3 Credits.

African American efforts to realize full freedom after emancipation from slavery. Gender politics, cultural expression, labor organizing, and radicalisms; dynamics of racism within major eras of African American activity from Reconstruction through the Great Migration; and the history of civil rights, Black Power, and black feminism. (Same as AMST 3361).

HIST 3362. African American Women's History. 3 Credits.

Addresses the history of African American women's labor, cultural expression, institution-building, activism and strategies to combat oppression from the antebellum period through the late 20th century. Investigates the intersection of race, gender, and class as it has shaped U.S. society, racism, the black freedom movement and African American women's experiences. (Same as AMST 3362, WSTU 3362).

HIST 3362W. African American Women's History. 3 Credits.

Addresses the history of African American women's labor, cultural expression, institution-building, activism and strategies to combat oppression from the antebellum period through the late 20th century. Investigates the intersection of race, gender, and class as it has shaped U.S. society, racism, the black freedom movement and African American women's experiences. (Same as WSTU 3362W, AMST 3362W).

HIST 3363. Race, Medicine & Public Health. 3 Credits.

Issues of race, medicine, and public health.

HIST 3366. Immigration, Ethnicity, and the American Experience. 3 Credits.

Immigrant life in America from 1607 to the present. Focus on the urban immigrant experience from 1840 to 1924, the ironic persistence of nativism in a "nation of immigrants," the origins of modern immigration law, and the similarities between today's immigrants and those from the past. Students write research papers on an immigrant found in their family tree.

HIST 3366W. Immigration, Ethnicity, and the American Experience. 3 Credits.

Immigrant life in America from 1607 to the present, focusing on the urban immigrant experience from 1840 to 1924, the ironic persistence of nativism in a "nation of immigrants," the origins of modern immigration law, and the similarities between today's immigrants and those from the past. Students write research papers on an immigrant found in their family tree.

HIST 3367. The American Jewish Experience. 3 Credits.

The study of the Jewish minority in America from colonial times to the present. Emphasis on the interaction between a powerful majority culture and that of protean minority people.

HIST 3370. US Constitutional History. 3 Credits.

Examination of the text and interpretation of the document that is the foundation of the American government, with special attention to the changing character of race and gender as constitutional classes.

HIST 3501. Topics: Africa. 0-3 Credits.

A survey of African history from 1880 to the present.

HIST 3510. African History to 1880. 3 Credits.

Survey of the history of the African continent with emphasis on the history of sub-Saharan Africa.

HIST 3520. Africans in the Making of the Atlantic World. 3 Credits.

The role of Africa and Africans in the Atlantic world with emphasis on links between Africa, Europe, and the Americas.

HIST 3530. Women in Africa. 3 Credits.

African women from prehistory to the present, focusing on culture, the role of gender, and outside influences and their impact on women's history. Same as WSTU 3530.

HIST 3530W. Women in Africa. 3 Credits.

African women from prehistory to the present, focusing on culture, the role of gender, and outside influences and their impact on women's history. Same as WSTU 3530.

HIST 3540. West Africa to Independence. 3 Credits.

A thematic survey of West African history, focusing on the diversity of African culture, West African kingdoms and empires, Islam, the trans-Saharan trade, African contact with Europe, slavery and the slave trade, and the colonization of Africa.

HIST 3601. Topics: Asian History. 0-3 Credits.**HIST 3610. China to 1800. 3 Credits.**

Survey of Chinese civilization from its ancient beginnings to the last imperial dynasty.

HIST 3611. History of Modern China. 3 Credits.

China since 1840, with particular attention to political developments.

HIST 3614. Writing Modern Chinese History. 3 Credits.

Seminar. Students prepare a research paper on selected topics in the history of modern China.

HIST 3614W. Writing Modern Chinese History. 3 Credits.

Seminar. Students prepare a research paper on selected topics in the history of modern China.

HIST 3615. History of Chinese Communism. 3 Credits.

Survey of the leadership, ideology, structure, and foreign and domestic policies of the Chinese Communist Party from its inception to the present.

HIST 3621. History of Modern Japan. 3 Credits.

Japan's dramatic transformation from an isolated island country to Asia's only modern colonial empire, from unprecedented defeat to postwar "economic miracle." Emphasis on historical, political, economic, and cultural trends.

HIST 3630. History of Korea. 3 Credits.

An introduction to the history and culture of Korea from antiquity to the present.

HIST 3631. History of Modern Korea. 3 Credits.

Modern Korean history from 1876 to contemporary society. Emphasis on colonialism, nationalism, the division of peninsula, the Cold War, and globalization.

HIST 3640. History of Southeast Asia. 3 Credits.

An examination of Vietnam and its neighbors from the pre-colonial period to the present.

HIST 3650. Modern South Asia, 1750-Present. 3 Credits.

The South Asian subcontinent, including Afghanistan, Pakistan, India, and Bangladesh, since the mid-18th century. The period of British rule, from the late 18th to the mid-20th century. The different trajectories of the independent nation-states of South Asia following decolonization.

HIST 3701. Topics in Latin American History. 0-3 Credits.**HIST 3710. History of Latin America I. 3 Credits.**

Analysis of Spanish and Portuguese imperialism in the New World, 1492-1820.

HIST 3711. History of Latin America II. 3 Credits.

Continuation of HIST 3710. A problems approach to Latin America, 1820 to the present; thematic emphasis on neocolonialism, corporatism, liberalism, caudillismo, modernization, populism, and revolution.

HIST 3801. Topics in Middle Eastern History. 0-3 Credits.**HIST 3810. History of the Middle East to 1800. 3 Credits.**

Byzantine, Arab, Persian, and Islamic backgrounds; rise and decline of the Ottoman Empire; action of European powers in the area; Ottoman breakup into the Turkish Republic and other states.

HIST 3811. The Middle East in the 20th Century. 0-3 Credits.

The state system established after World War I. Effects of colonialism, the rise of nationalism, the Cold War, and the oil industry. The modes of identification that accompanied these processes, including pan-Arabism and Islamism.

HIST 3811W. Middle East in 20th Century. 0-3 Credits.

The state system established after World War I. Effects of colonialism, the rise of nationalism, the Cold War, and the oil industry. The modes of identification that accompanied these processes, including pan-Arabism and Islamism.

HIST 3820. The History of Israel. 3 Credits.

Survey of the history of Israel from the origins of Zionism to the present. Topics include Zionism as an ideology and movement in the pre-state period; the relationship between state and religion; the impact of 1948 and 1967; immigration, colonization, and Israeli society; the Arab-Israeli conflict; and Israel's national identity as a Jewish and democratic state.

HIST 3820W. The History of Israel. 3 Credits.

Survey of the history of Israel from the origins of Zionism to the present. Topics include Zionism as an ideology and movement in the pre-state period; the relationship between state and religion; the impact of 1948 and 1967; immigration, colonization, and Israeli society; the Arab-Israeli conflict; and Israel's national identity as a Jewish and democratic state.

HIST 3830. History of Iraq. 3 Credits.

Modern Iraq's Ottoman background; its incorporation into a world market dominated by Europe, British influence and preconceptions in the creation of Iraq, and the emergence and survival of the Ba'ath dictatorship. Reforms in economic, political, and educational spheres.

HIST 3840. History of Central Asia. 3 Credits.

Introduction to the political, cultural, religious, and social history of the region, including Afghanistan, Kazakhstan, Tajikistan, Turkmenistan, and Uzbekistan.

HIST 3850. Modern Iran. 3 Credits.

Political, diplomatic, religious, and other developments in Iran from about 1800 to 1989.

HIST 4098. Thesis Seminar. 3 Credits.

For history majors only. Preparation of a research paper using primary sources.

HIST 4098W. Thesis Seminar. 3 Credits.

History majors identify an original research topic in an area of their interest and complete a major research paper based largely on primary sources.

HIST 4099. Senior Honors Thesis Tutorial. 3 Credits.

Required of and open only to undergraduate honors candidates in history. Restricted to Instructor approval required. Prerequisites: HIST 4098W.

HIST 4099W. Senior Honors Thesis Tutorial. 3 Credits.

Required of and open only to undergraduate honors candidates in history. Restricted to Open only to undergraduate honors candidates in history. Prerequisites: HIST 4098 or HIST 4098W.

HIST 4135. Folger Seminar. 3 Credits.

The history of books and early modern culture. Use of the archive at the Folger Shakespeare Library. Students must obtain departmental approval in the preceding semester. Same as ENGL 4135/ FREN 4135.

HIST 6001. Special Topics. 3-9 Credits.

Open to doctoral and master's candidates and qualified undergraduates. May be repeated for credit provided the topic differs.

HIST 6005. History and Historians. 3 Credits.

Historiography and historical method for graduate students. Readings and discussions on major trends in history; selections from classics of historical literature.

HIST 6006. Teaching History. 3 Credits.

Pedagogic techniques and strategies particular to the discipline. Admission by permission of instructor.

HIST 6011. Reading and Research in History and Public Policy. 3 Credits.

The use of historical insights and methods in policymaking, with emphasis on domestic issues.

HIST 6012. Internship in History and Public Policy. 3,6 Credits.

Supervised participation in an office or agency concerned with the formulation of public policy; terms of the internship are arranged with the director of the history and public policy program. Enrollment restricted to students in the history and public policy program.

HIST 6030. History and Its Uses in International Affairs. 3 Credits.

The multiple interconnections among history, politics, and international affairs, including how policymakers use or misuse "lessons" of history and how countries attempt to deal with difficult aspects of their past. Specific cases may vary.

HIST 6031. History of International Economic Systems. 3 Credits.

Development of arrangements and institutions designed to manage the international economy since the 19th century, with a focus on the period since World War II.

HIST 6032. Rdg/Rsch Sem:Strategy & Policy. 3 Credits.

A study of the historical development of strategy and the relationship of military thought to national policy.

HIST 6040. Topics in Modern Military and Naval History. 3 Credits.

Discussion, readings, and research in 20th-century European and American military and naval history.

HIST 6041. The Age of the Battleship: An Introduction to Modern Naval History. 3 Credits.

The rich and varied literature of naval history, with emphasis on interactions among technology, nationalism, and domestic political/social developments in the late 19th and early 20th century. The social history of navies is included.

HIST 6042. Seminar: World War II. 3 Credits.

Examination of statecraft and the management of force before, during, and after World War II. Special attention to broad aspects of military policy and strategy and their interaction with international politics and diplomacy.

HIST 6050. Modernization, Imperialism, Globalization. 3 Credits.

Readings seminar in classic and recent theories of modernization, imperialism, and globalization.

HIST 6051. Re-thinking Cold War History. 3 Credits.

A reading and research course that relies heavily on documents from formerly closed communist archives and recently declassified Western materials. Various issues and events of the Cold War; old and new historiographical controversies. Students write a primary-source research paper to elucidate one of the many aspects of the Cold War about which new evidence is available.

HIST 6097. Independent Readings/Research. 3 Credits.

Written permission of instructor required. May be repeated for credit with permission.

HIST 6101. Topics: Europe. 3 Credits.**HIST 6105. Sem:European Intellectual Hist. 3 Credits.**

Topics in 18th- and 19th-century European thought, with an emphasis on France. Specific topic announced in the Schedule of Classes.

HIST 6120. Sem:Early Modern European Hist. 3 Credits.

Topics selected from Western European history of the 14th through 17th centuries.

HIST 6121. Rdg/Rsch Sem:Mod European Hist. 3 Credits.**HIST 6122. Rdg/Rsrch Sem:20th C History. 3 Credits.**

Research or readings on selected topics.

HIST 6128. Europe and the World, 1500-Present. 3 Credits.

An introduction to some of the key debates and scholarship concerning European imperialism.

HIST 6130. Early Modern Britain. 3 Credits.

Analysis of some current issues in early modern historiography; contextualization of recent works in the field; consideration of different methodologies and the types of evidence on which they rely or that they illuminate.

HIST 6133. English People and Institutions. 3 Credits.

Selected topics in the political, social, intellectual, and economic history of England. Focus upon one time period and special area of interest. May be taken for research credit with instructor's approval.

HIST 6135. British Imperialism. 3 Credits.

Research seminar. Major debates and schools of thought on the history of British imperialism.

HIST 6138. Folger Institute Seminars I. 3 Credits.

Topics announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Consult the chair of the department before registration.

HIST 6139. Folger Institute Seminars II. 3 Credits.

Continuation of HIST 6138. Topics announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Consult the chair of the department before registration.

HIST 6170. Eastern European History I. 3 Credits.
1772-1918.**HIST 6171. Eastern European History II. 3 Credits.**

Continuation of HIST 6170. 1919-1945.

HIST 6180. History of Modern Russia and the Soviet Union. 3 Credits.

Selected topics in the domestic history of modern Russia and Soviet Union. May be taken as a readings seminar or, with instructor's approval, as a research seminar.

HIST 6181. Research Seminar: Russian and Soviet Empires. 3 Credits.

HIST 6185. Sem: Russian & Soviet Thought. 3 Credits.

Selected topics in the intellectual and cultural history of 18th- to 20th-century Russia and Soviet Union. May be taken as a readings seminar or, with instructor's approval, as a research seminar. Admission by permission of instructor.

HIST 6188. The Soviet Union and the World, 1917-1991. 3 Credits.

Concepts and perceptions guiding Soviet relations with the outside world. From the blockade and intervention, through years of isolation, World War II, the Cold War, to "peaceful coexistence."

HIST 6301. Topics: U.S. History. 3 Credits.

HIST 6302. Colonial North America. 3 Credits.

The complex and turbulent world of colonial North America from the late 16th to the late 18th century. Inter-cultural negotiations, Atlantic world connections, imperial conflict, gender construction, and race consciousness.

HIST 6303. Revolutionary America. 3 Credits.

The political and social conditions of the revolutionary era: the spiral of events that led to the American independence movement, the various meanings of the war to its participants, and the consequences of victory for the nation, its various subgroups, and other peoples of the colonial Atlantic world.

HIST 6304. American Indian History to 1890. 3 Credits.

North American Indian history from indigenous societies on the eve of first contact with Europeans until the conclusion of the Great Plains Wars of the late 19th century.

HIST 6310. Readings in 19th-Century American History. 3 Credits.

Important trends in historical writing about 19th-century America.

HIST 6311. The Era of the Civil War, 1850-1877. 3 Credits.

Consideration of how and why the issue of slavery led to the American Civil War. Conflict on the battlefield and the political and social impact of the war in both the North and the South. Examination of the Reconstruction period as a means of understanding how the conflict and its aftermath continue to shape American politics and race relations to the present.

HIST 6312. The Law of Race and Slavery. 3 Credits.

The role of legal norms and processes in developing patterns of slavery and race relations in the United States and other societies. Admission by permission of instructor. Same as SOC 6286 and LAW 6596.

HIST 6320. Readings/Research Seminar: Recent U.S. History. 3 Credits.

Prerequisite: 6 credit hours of upper-level undergraduate American history courses. Research or readings, depending on students' interests and curricular needs.

HIST 6321. Readings/Research Seminar: Recent U.S. History. 3 Credits.

Continuation of HIST 6320. Prerequisite: 6 credit hours of upper-level undergraduate American history courses. Research or readings, depending on students' interests and curricular needs.

HIST 6322. American Business History. 3 Credits.

The history of American business institutions in manufacturing, distribution, transportation, and finance. Particular attention will be given to the period since industrialization, with consideration of business institutions in their economic, legal, governmental, and social contexts. Same as SMPP 6293.

HIST 6330. Modern U.S. Foreign Policy. 3 Credits.

Readings, lectures, discussion on major developments in the conduct of American diplomacy from 1898 to 9/11.

HIST 6350. American Social Thought Since World War II. 3 Credits.

Consideration of C. Wright Mills, Daniel Bell, Abraham Maslow, Christopher Lasch, Paul Goodman, Martin Luther King, Jr., Barbara Ehrenreich, and other major social critics.

HIST 6360. Immigration and Ethnicity in the United States. 3 Credits.

The history of immigrant life in the United States with a focus on the mass migration from Europe that began with the Irish Potato Famine of the 1840s and ended with the immigration restrictions of the 1920s that created the concept of the "illegal immigrant."

HIST 6370. US Legal History. 3 Credits.

The legal history of the United States from the 17th century to the present. The course examines legal change within the broader context of political, social, and economic change. Admission by permission of instructor. Same as LAW 6591.

HIST 6410. Readings in American Cultural History. 3 Credits.

Studies in the cultural history of the United States, focusing on major historiographic debates and interventions. Examples of possible topics include cultural contact, the public sphere, and systems of religious and political belief. Same as AmSt 6410.

HIST 6420. Religion & American Culture. 3 Credits.

Interdisciplinary analysis of religious beliefs, practices, and representations in the United States, as well as intersections of the religious and the secular. Relationships of religion to race, gender, capitalism, science, mass media, and material culture. Same as AMST 6420.

HIST 6430. Gender, Sexuality, and American Culture. 3 Credits.

The changing social organization, cultural representation, and meaning of gender and sexuality in the United States, with emphasis on their relationship to race, class, region, nationality, empire, and globalization. Pre-Columbian settlement to 1876. Same as AMST 6430/ WSTU 6430.

HIST 6431. Gender, Sexuality, and American Culture. 3 Credits.

Continuation of HIST 6430. The changing social organization, cultural representation, and meaning of gender and sexuality in the United States, with emphasis on their relationship to race, class, region, nationality, empire, and globalization. 1877 to present. Same as AMST 6431/WSTU 6431.

HIST 6435. Readings on Women in American History. 3 Credits.

Important works in American women's history; evolution of the field in historiographical context. Same as AMST 6435/WSTU 6435.

HIST 6450. Race in America. 3 Credits.

Interdisciplinary analysis of the history of race and its changing political, social, and cultural meanings in the United States. Transnational racial formations, struggles for and against civil rights, multiracialism, and interracialism. Same as AMST 6450.

HIST 6455. American Social Movements. 3 Credits.

The history of social movements in the United States, with emphasis on civil rights, feminism, conservatism, and labor in local, national, and transnational contexts; the historical rise and fall of these movements and their larger impact on American life. Same as AMST 6455.

HIST 6470. Cityscapes. 3 Credits.

Interdisciplinary examination of the American city, including urban theory, history, planning, architecture, urban politics, and cultural representations of the city. Same as AMST 6470.

HIST 6475. US Urban History. 3 Credits.

History of American urban life and culture from the Colonial era to the present, focusing on the transitions from pre-industrial to industrial and post-industrial forms, the social and spatial configuration of U.S. cities, and the urban politics of race, class, and gender. Same as AMST 6475.

HIST 6480. Theory and Practice of Public History. 3 Credits.

Theoretical and practical dimensions of public history, as illustrated by recent controversies surrounding public exhibitions and debates on revisionist history as well as more traditional means of presenting the past in public forums. Same as AMST 6480.

HIST 6495. Historic Preservation: Principles and Methods. 3 Credits.

The scope and purpose of the preservation movement in the United States, with focus on developments since the 1960s. Preservation theories, attitudes toward the past and toward design, the intent and impact of legislation, approaches to documentation, the concept of significance, and preservation as an instrument of change. Same as AMST 6495.

HIST 6496. Historic Preservation: Principles and Methods. 3 Credits.

Continuation of HIST 6495. The scope and purpose of the preservation movement in the United States, with focus on developments since the 1960s. Preservation theories, attitudes toward the past and toward design, the intent and impact of legislation, approaches to documentation, the concept of significance, and preservation as an instrument of change. Same as AMST 6496.

HIST 6501. Topics: Africa. 3 Credits.

HIST 6502. Western Representations of Africa. 3 Credits.

Representations of Africa by non-Africans from the earliest contact to more recent encounters.

HIST 6601. Topics: Asian History. 3 Credits.

HIST 6602. Asia: History, Memory, and Violence. 3 Credits.

Violence has been a defining experience for many of the populations and polities of Asia over the past century and a half. Focusing on the themes of violence and historical memory, the course takes a comparative approach, looking at how these issues have played out in different arenas throughout East, Southeast, and South Asia.

HIST 6610. Readings Seminar: Late Imperial China. 3 Credits.

Selected topics in the history of modern China in the late imperial period, with a particular focus on the internal and external challenges to the last Chinese dynasty in the 19th century.

HIST 6611. Readings Seminar: 20th-Century China. 3 Credits.

Selected topics in the history of modern China from the 1911 Revolution to the Cultural Revolution.

HIST 6621. Readings Seminar: Modern Japanese History. 3 Credits.

Selected topics in modern Japanese history from the Meiji Restoration of 1868 to the present. Research or readings depending on students' interests. Emphasis on how interpretations of the past are shaped by the present.

HIST 6625. Japan's Empire and Its Legacies. 3 Credits.

History of modern Japan's overseas expansion and empire building. Focus on issues including colonial modernity, resistance and collaboration, and postwar legacies such as politics of memory and prospects of reconciliation.

HIST 6630. Spec Topics in Korean History. 3 Credits.

Intensive exploration of the history of Korea in modern times (1850–present). Korean identity and the challenges of foreign imperialism, industrialization, modernization, and globalization.

HIST 6641. Modern Southeast Asia. 3 Credits.

The modern history of Southeast Asia from the 1800s to 1975. Colonialism, rise of postcolonial states, revolutions and persistence of the past.

- HIST 6701. Topics in Latin American History. 3 Credits.**
- HIST 6801. Topics in Middle Eastern History. 3 Credits.**
- HIST 6811. Rsearch Sem:Modern Middle East. 3 Credits.**
Readings, discussion, and research in selected political, economic, social, cultural, and intellectual trends.
- HIST 6821. Islam and Social Movements. 3 Credits.**
An examination of the relationship of religion and religious symbols to social and political movements in the Islamic world.
- HIST 6822. Nationalism in the Middle East. 3 Credits.**
Different interpretations of nationalism and their applicability to nationalism in the Middle East.
- HIST 6823. Imperialism in the Middle East. 3 Credits.**
An exploration of the process of European and American expansion in the Middle East.
- HIST 6824. Rdg/RsrchSem: Modern Iran. 3 Credits.**
- HIST 6998. Thesis Research. 3 Credits.**
- HIST 6999. Thesis Research. 3 Credits.**
- HIST 8998. Advanced Reading & Research. 1-12 Credits.**
Limited to students preparing for the Doctor of Philosophy general examination. May be repeated for credit.
- HIST 8999. Dissertation Research. 3-12 Credits.**
Limited to Doctor of Philosophy candidates. May be repeated for credit.

BACHELOR OF ARTS WITH A MAJOR IN HISTORY

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Introductory courses

HIST 1011	World History, 1500-Present
HIST 1020	Approaches to Women's History
HIST 1110	European Civilization in Its World Context
HIST 1120W	European Civ in World Context
HIST 1121	The War of Ideas in European and International History, 1750-Present
HIST 1310	Introduction to American History
HIST 1311	Introduction to American History

The introductory course requirement may be fulfilled by scoring 4 or 5 on Advanced Placement examinations: U.S. history AP (6 credits for HIST 1310 and HIST 1311), European history AP (3 credits for HIST 1120), and world history AP (3 credits for HIST 1011); or scoring 7 or above in an appropriate international baccalaureate program. Alternatively, requirement can be fulfilled by scoring 650 or above on the SAT II world history (HIST 1011) or U.S. history (HIST 1310 and HIST 1311).

Students should consult the Director of Undergraduate Studies for more detailed information regarding this requirement.

Major's Introductory Seminar

To complete requirements for the major, a student must take a Majors' Introductory Seminar, preferably early in their program of study.

HIST 2005	Majors' Introductory Seminar
or HIST 2005W	Majors' Introductory Seminar
HIST 2105	Majors' Introductory Seminar: Europe
or HIST 2105W	Majors' Introductory Seminar: Europe
HIST 2305W	Majors' Introductory Seminar: United States
or HIST 2305W	Majors' Introductory Seminar: United States
HIST 2505	Majors' Introductory Seminar: Africa
HIST 2605	Majors' Introductory Seminar: Asia
or HIST 2605W	Majors' Introductory Seminar: Asia
HIST 2705	Majors ² Introductory Seminar: Latin America
or HIST 2705W	Majors' Introductory Seminar: Latin America
HIST 2805	Majors' Introductory Seminar: Middle East
or HIST 2805W	Majors' Introductory Seminar: Middle East

Topics vary annually and are announced in the Schedule of Classes.

Students should consult the Director of Undergraduate for more detailed information regarding this requirement.

Upper-level courses

Eight to ten additional courses numbered from HIST 2000 to HIST 3999 (upper-level courses). The number of upper-level courses must be sufficient, when combined with the required introductory course(s), the Majors' Introductory Seminar, and the thesis or capstone project, to produce a total of thirteen history (HIST) courses.

One or more of the upper-level courses, including for this purpose the Majors' Introductory Seminar, must be from each of at least three of the following categories:

Europe: HIST 2100-2900 and HIST 3100-3199 groupings.

United States: HIST 2300-2399 and HIST 3300-3399 groupings.

World—the following regions combined count as one category:

Africa: HIST 2500-2599 and 3500-3599 groupings

Asia: HIST 2600-2699 and 3600-3699 groupings.

Latin America: HIST 2700-2799 and 3700-3799 groupings.

Middle East: HIST 2800-2899 and 3800-3899 groupings

At least one upper-level course must focus on the period before 1750.

Dean's Seminars, Honors (HONR) courses taught by members of the Department of History, Majors' Introductory Seminars, and special topics courses taught under HIST 3001 may be used to fulfill this requirement on a case-by-case basis.

Students should consult the Director of Undergraduate Studies for more detailed information regarding this requirement.

Thesis or capstone project

HIST 4098 Thesis Seminar

or HIST 4098W Thesis Seminar

or

HIST 4099 Senior Honors Thesis Tutorial

or HIST 4099W Senior Honors Thesis Tutorial

Students fulfill this requirement in their junior or senior year. The requirement may be satisfied by a suitable alternative (e.g., a digital history project or a documentary film) with the permission of the thesis instructor.

Students should consult the Director of Undergraduate Studies for more detailed information regarding this requirement.

Optional specialization

Students may choose to pursue an area of specialization by taking two courses beyond the thirteen required, with the expectation that a minimum of six courses will contribute to the student's knowledge of a specific field; these may include a geographic region, chronological period, special topic (e.g., women's history, legal history, or military history), or a combination thereof. The title of the specialization and

proposed curriculum must be approved by the Director of Undergraduate Studies or other departmental delegate. A maximum of two courses counting toward the specialization may be taken in other departments of the University.

Foreign language

While there is no foreign language requirement, students are strongly encouraged to take at least two semesters of a foreign language, particularly if they plan to pursue a graduate degree in history.

GENERAL EDUCATION

In addition to the University General Education Requirement, undergraduate students in Columbian College must complete a further, College-specific general education curriculum—Perspective, Analysis, Communication, or G-PAC. Together with the University General Education Requirement, G-PAC engages students in active intellectual inquiry across the liberal arts. Students achieve a set of learning outcomes that enhance their analytical skills, develop their communication competencies, and invite them to participate as responsible citizens who are attentive to issues of culture, diversity, and privilege.

Coursework for the University General Education Requirement is distributed as follows:

- Writing—one approved course in university writing and two writing-in-the-disciplines (WID) courses;
- Humanities—one approved course in the humanities that involves critical thinking skills;
- Mathematics or Statistics—one approved course in either mathematics or statistics;
- Natural or Physical Science—one approved laboratory course that employs the process of scientific inquiry; and,
- Social Sciences—two approved courses in the social sciences

Coursework for the Columbian College general education curriculum is distributed as follows:

- Arts—one approved course in the arts that involves the study or creation of artwork based on an understanding or interpretation of artistic traditions or knowledge of art in a contemporary context;
- Global or Cross-Cultural Perspective—one approved course that analyzes the ways in which institutions, practices, and problems transcend national and regional boundaries;
- Humanities—one approved course in the humanities that involves critical thinking skills (in addition to the one course in this category required by the University General Education Requirement);
- Local or Civic Engagement—one approved course that develops the values, ethics, disciplines, and commitment to pursue responsible public action;

- Natural or Physical Science—one approved laboratory course that employs the process of scientific inquiry (in addition to the one course in this category required by the University General Education Requirement; and,
- Oral Communication—one course in oral communication.

Certain courses are approved to fulfill the requirement in more than one of these categories.

Courses taken in fulfillment of G-PAC requirements may also be counted toward majors or minors. Transfer courses taken prior to, but not after, admission to George Washington University may count toward the University General Education Requirement and G-PAC, if those transfer courses are equivalent to GW courses that have been approved by the University and the College.

University General Education and G-PAC Courses

- Arts (p. 240)
- Global or Cross-Cultural (p. 241)
- Humanities (p. 243)
- Local/Civic Engagement (p. 244)
- Mathematics or Statistics (p. 246)
- Natural or physical laboratory sciences (p. 246)
- Oral Communication (p. 247)
- Social Sciences (p. 248)
- Writing (p. 249)

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, students must have an overall GPA of 3.3 and a GPA of 3.5 in the major at the time of graduation; and complete HIST 4099 Senior Honors Thesis Tutorial with a grade of A or A-.

MINOR IN HISTORY

REQUIREMENTS

Undergraduate students who select a minor in history must declare their intention to a departmental advisor no later than the beginning of their senior year.

Requirements for the minor:

One of the following:

HIST 1011	World History, 1500-Present
HIST 1110	European Civilization in Its World Context
HIST 1120	European Civilization in Its World Context
HIST 1121	The War of Ideas in European and International History, 1750-Present
HIST 1310	Introduction to American History
HIST 1311	Introduction to American History

At least five upper-division history courses numbered 2000 and higher

MASTER OF ARTS IN THE FIELD OF HISTORY

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

The program consists of a minimum of 36 credits of upper-division undergraduate and graduate-level courses, including at least six graduate-level courses. Students choosing the thesis option take HIST 6998 Thesis Research and HIST 6999 Thesis Research as part of the 36 credits but in addition to the required six graduate-level courses. Students choosing the nonthesis option must write two research papers in the course of completing their program. See the Undergraduate Programs Bulletin for a listing of upper-level undergraduate courses offered by the department. A maximum of 6 credits may be in approved courses outside the History Department. To receive graduate credit for undergraduate courses, master's candidates must arrange for extra work with the instructors. Each student completes a major field in which at least 9 credits of course work must be taken. Major fields are listed below, under the Doctor of Philosophy in the field of history. Students in all history Master of Arts programs must maintain a GPA of at least 3.3 both to remain in good standing and to earn the degree.

Concentration in historic preservation

This 36-credit degree program combines courses in United States history and historic preservation. It includes at least 18 credits of U.S. social history, U.S. urban history, man-made America, and the seminar sequence in historic preservation.

Concentration in imperial and colonial studies

This 36-credit degree program emphasizes the comparative study of empires. HIST 6128 Europe and the World, 1500-Present and HIST 6050 Modernization, Imperialism, Globalization are required, along with a 15-credit major regional field and a minor regional field of 6 to 9 credits. Up to 9 credits may be chosen in related disciplines within the University.

Concentration in public policy

This 36-credit degree program emphasizes the study of history as it relates to the analysis and conduct of public policy. HIST 6011 Rdg/Rsch:History/Public Policy and an internship done in conjunction with HIST 6012 Internship in History and Public Policy are required. One-third of the course work is

taken outside the History Department in a discipline relevant to the student's policy interests.

Concentration in U.S. legal history

This 36-credit degree program combines a major field in U.S. history with a focus in U.S. legal history. Students may take up to 9 credits of legal history offered by the Law School.

DOCTOR OF PHILOSOPHY IN THE FIELD OF AMERICAN RELIGIOUS HISTORY

REQUIREMENTS

This program is offered in cooperation with the Department of Religion.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63), and the specific requirements of the Doctor of Philosophy in the field of history (p. 250).

The General Examination must include one of the major American fields listed below and one from the Department of Religion (typically history of religion in America).

Candidates in American history must select two major fields from early America (to 1815), 19th-century America (1815–1900), and 20th-century America (1900–). The minor field will normally be topical (e.g., U.S. social, U.S. diplomatic, historic preservation).

All candidates may choose to be examined in one minor field other than history if it is relevant to the program of study.

DOCTOR OF PHILOSOPHY IN THE FIELD OF HISTORY

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63), including the satisfactory completion of the General Examination.

The requirements for the Doctor of Philosophy Program (p. 71).

All students must take HIST 6005 History and Historians. Some students must pass language exams appropriate to their field

and dissertation topic. Students must maintain a GPA of at least 3.5 to remain in the program.

Candidates in American history must select two major fields from early America (to 1815), 19th-century America (1815–1900), and 20th-century America (1900–). The minor field will normally be topical (e.g., U.S. social, U.S. diplomatic, historic preservation).

Candidates in imperial and colonial history take HIST 6128 Europe and the World, 1500–Present and HIST 6050 Modernization, Imperialism, Globalization and select two major and one minor field. Fields can include, but are not limited to, such combinations as Europe and the Americas (1500–1900), Europe and Asia, Europe and the Middle East, Europe and Africa, the U.S. and Asia, and China and Japan.

Candidates in Asian history select two major fields from modern China, modern Japan, modern Korea, and modern Southeast Asia. The minor field is chosen in consultation with the advisor.

Candidates concentrating in areas other than those outlined above must select one major and two minor fields. Major fields are early modern Europe, modern Europe, Latin America, modern Middle East, modern Eastern Europe, modern Russia, and military history. The minor fields may be either topical (e.g., European intellectual) or chronological (e.g., Tudor and Stuart England, colonial Latin America).

All candidates may choose to be examined in one minor field other than history if it is relevant to the program of study.

HUMAN PALEOBIOLOGY

Columbian College of Arts and Sciences offers an interdisciplinary program leading to the Doctor of Philosophy in the field of Hominid Paleobiology. The program features training in molecular and developmental biology, evolutionary anatomy, hominid paleontology, and archaeology. It emphasizes problem-based learning and training and internships. Participating faculty are drawn from the Departments of Anthropology, Speech and Hearing Science, Biological Sciences, and Anatomy and Regenerative Biology at GW; the Departments of Anthropology and Paleobiology at the National Museum of Natural History, Smithsonian Institution; the Department of Physiology and Biophysics at Howard University; and the National Institutes of Health.

GRADUATE

Master's program

- Master of Science in the field of human paleobiology (p. 251)

Doctoral program

- Doctor of Philosophy in the field of human paleobiology (p. 251)

FACULTY

Committee on Hominid Paleobiology B. Wood (*Chair*), K. Behrensmeyer, D. Braun, A. Brooks, S. McFarlin, C. Murray, D. Piperno, R. Potts, B. Richmond, C. Sherwood, F. Subiaul, M. Zeder

MASTER OF SCIENCE IN
THE FIELD OF HUMAN
PALEOBIOLOGY

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

36 credits

36 credits, including:

HOMP 6202	Lab Techniques: Paleoanthro
-----------	-----------------------------

ANTH 6413	Analytical Methods in Human Evolutionary Studies
-----------	--

Three of the following:	
-------------------------	--

HOMP 6201	Hominid Paleobiology
-----------	----------------------

ANTH 3411	Primatology
-----------	-------------

ANTH 6491	Topics in Biological Anthropology
-----------	-----------------------------------

ANTH 6801	Paleolithic Archaeology
-----------	-------------------------

6 credits of thesis:

HOMP 6998	Thesis Research
-----------	-----------------

HOMP 6999	Thesis Research
-----------	-----------------

Two additional laboratory or field research courses in different disciplines	
--	--

Electives selected in consultation with the faculty from a list of relevant courses in Anatomy, Anthropology, Biological Sciences, Geography, Geological Sciences, Human Paleobiology, Psychology, and Speech and Hearing Science, or relevant courses from the Consortium of Universities of the Washington Metropolitan Area

DOCTOR OF PHILOSOPHY
IN THE FIELD OF HUMAN
PALEOBIOLOGY

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

The requirements for the Doctor of Philosophy program (p. 71).

Recommended preparatory courses include the following:

Advanced undergraduate courses in biology, including courses in evolution and any two of the following: genetics, developmental biology/embryology, anatomy, physiology, ethology, ecology, and paleontology. GW courses that correspond to these subjects are:

BISC 2207	Genetics
-----------	----------

BISC 2208	Genetics Laboratory
-----------	---------------------

BISC 2214	Developmental Biology
-----------	-----------------------

BISC 2322	Human Physiology
-----------	------------------

BISC 2323	Human Physiology Laboratory
-----------	-----------------------------

BISC 2332	Comparative Vertebrate Anatomy
-----------	--------------------------------

BISC 2450	Organic Evolution
-----------	-------------------

BISC 2451	History of Life
-----------	-----------------

BISC 2452	Animal Behavior
-----------	-----------------

BISC 2454	General Ecology
-----------	-----------------

Advanced undergraduate courses in anthropology, including courses in any two of the following: osteology, human biology, paleoanthropology, primatology, and Paleolithic archaeology corresponding to:

ANTH 3832	Paleoanthropological Field Program
-----------	------------------------------------

ANTH 3401	Human Functional Anatomy
-----------	--------------------------

ANTH 3402	Human Evolutionary Anatomy
-----------	----------------------------

ANTH 3403	Forensic Anthropology Laboratory
-----------	----------------------------------

ANTH 3404	Human Variation
-----------	-----------------

ANTH 3412	Hominin Evolution
ANTH 3411	Primatology
ANTH 3491	Topics in Biological Anthropology
ANTH 3801	African Roots from Australopithecus to Zimbabwe
ANTH 3802	Human Cultural Beginnings
One course in statistics corresponding to:	
STAT 1127	Statistics for the Biological Sciences
One course in mathematics, including precalculus, corresponding to:	
MATH 1220	Calculus with Precalculus I
MATH 1221	Calculus with Precalculus II

Advanced undergraduate courses in one or more of the following subjects is desirable: chemistry, biochemistry, physics, geoscience, and calculus

The program includes a minimum of 48 credits, plus a dissertation (equivalent to 24 credits). Required courses are:

HOMP 6201	Hominid Paleobiology
HOMP 8301	Problem-Based Learning Seminar
HOMP 8302	Public Understand Of Science Intern
HOMP 8303	Paleobiology Lab Rotation
ANTH 6801	Paleolithic Archaeology

One course in each of the following subject areas:

Genetics
Geoscience or vertebrate paleontology
Animal behavior or ecology
Research methods
Statistical methods

The remainder of credits are to be distributed among various interdisciplinary courses, including but not limited to the following:

ANTH 3402	Human Evolutionary Anatomy
ANTH 6401	Human Functional Anatomy
ANTH 6405	Human Growth and Development

ANTH 6413	Analytical Methods in Human Evolutionary Studies
ANTH 6404	The Evolution of Primate Life Histories
ANTH 6412	Paleoanthropology
ANAT 6210	Gross Anatomy
ANAT 6212	Neurobiology
BISC 2214	Developmental Biology
BISC 2332	Comparative Vertebrate Anatomy
BISC 6210	Methods of Study of Evolution
BISC 6216	Morphological Systematics
BISC 6228	Population Genetics
BISC 6230	Human Genetics
BISC 6249	Seminar: Developmental Biology
GEOL 3126	Sedimentology and Stratigraphy
GEOL 3140	Geochemistry

For detailed requirements, consult the chair of the program committee.

INTERIOR ARCHITECTURE AND DESIGN

The Interior Architecture and Design Program believes in fostering an environment that encourages creativity and pushes the boundaries of design with an emphasis on conceptual thinking and the design process. The studio-based curriculum, the core of the program, is where students learn to design three-dimensional space through the use of dynamic concepts, cutting-edge materials, and innovative methods and techniques.

UNDERGRADUATE

Bachelor's program

- Bachelor of Fine Arts with a major in interior architecture and design (p. 255)

GRADUATE

Master's program

- Master of Fine Arts in the field of interior architecture and design (p. 255)

FACULTY

Associate Professor S. Travis (Director)

Assistant Professors E. Speck, N. Evans, C. Anderson, N. Volchansky

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Note: Enrollment in interior architecture and design courses requires candidacy in the degree program or permission of the program director. A course fee is charged for all IAD courses.

IAD 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the Schedule of Classes for more details. Restricted to First-year students in CCAS.

IAD 2200. Studio 1. 6 Credits.

Introduction to the design process through consideration of the theory and application of design principles and elements to specific studies of the built environment. Restricted to Major: 1206 - Interior Architecture and Design, Level: 01-Undergraduate. (Same as IAD 6200).

IAD 2210. Sketching Architecture and Interiors. 3 Credits.

Free-hand sketching developed and applied as a tool in all phases of the creative design process. Restricted to Major: 1206- Interior Architecture and Design, Level: 01-Undergraduate. Recommended background: FA 1021.

IAD 2987. Internship. 0 Credits.

Candidates for the B.F.A. in Interior Architecture and Design degree enroll in this course in order to complete the program's 120-hour internship requirement. The internship must be pre-approved by the departmental undergraduate advisor and must be completed while the student remains enrolled in the degree program.

IAD 3300. Studio 2. 6 Credits.

All phases of design, beginning with development of a concept through producing a complete presentation. How a project evolves from program requirements to a creative and functional interior. Prerequisites: IAD 2200. Restricted to majors only.

IAD 3304. Interior Materials. 3 Credits.

All phases of textile production, including standards, testing, and specifications. Properties, regulations, and installation of interior finish materials. Restricted to Major: 1206 - Interior Architecture and Design, Level: 01- Undergraduate. Prerequisites: IAD 2200. (Same as IAD 6304).

IAD 3304W. Interior Materials. 3 Credits.

All phases of textile production, including standards, testing, and specifications. Properties, regulations, and installation of interior finish materials. Restricted to Major: 1206- Interior Architecture and Design, Level: 01-Undergraduate. Prerequisites: IAD 2200. (Same as IAD 6304).

IAD 3305. Graphic Communications. 3 Credits.

Development of multimedia techniques in rendering. Advanced three-dimensional drawing using rapid visualization techniques, sketching, and constructed drawings. Prerequisites: IAD 2200. Restricted to Major: Interior Architecture and Design, Level: 01- Undergraduate.

IAD 3310. Digital Drafting & Modeling. 3 Credits.

Introduction to CAD technology, two-dimensional drawings, plotting and enhancement of presentations. Use of CAD for the production of construction drawings. Restricted to Major: Interior Architecture and Design, Level: 01-Undergraduate.

IAD 3400. Studio 3. 6 Credits.

Multifaceted and complex problems in commercial design, including codes and regulations pertaining to commercial interiors; development of collaborative learning. Prerequisites: IAD 3300. Restricted to majors only.

IAD 3405. History of Modern Architecture and Design. 3 Credits.

Overview of 20th and 21st century architecture, interiors, and furniture of significant and unique houses and smaller commercial buildings. Students may not earn credit for both IAD 3405 and IAD 1000 if similar material is covered. Restricted to Major: Interior Architecture and Design, Level: 01-undergraduate. Prerequisites: IAD 3300. (Same as IAD 6405).

IAD 3410. Sustainability and LEED for Architecture and Design. 3 Credits.

Consideration of the process by which structures and spaces can be awarded LEED (Leadership in Energy and Environmental Design) certification and the examination that enables individuals to become LEED-accredited professionals. Restricted to Major: Interior Architecture and Design, Level: 01-Undergraduate. Prerequisites: Studio 2 IAD 3300.

IAD 4500. Studio 4. 6 Credits.

Continuation and refinement of the design process to further advance conceptual thinking for development of larger-scaled and more complex design problems. Prerequisites: IAD 3400. Restricted to majors only.

IAD 4505. Lighting & Acoustics. 3 Credits.

Terminology, concepts, and principles of lighting design. Light and energy, incandescent and gaseous discharge lamps, luminaries, task requirements, measurement and calculations, human factors, and design applications. Acoustic principles as they relate to building design. Restricted to Major: Interior Architecture and Design, Level: 01-Undergraduate. Prerequisites: IAD 3400.

IAD 4510. Pre-Design for Studio 5. 3 Credits.

Application of advanced topics in design theory; research methodology applied to development of the senior project. Restricted to Major: Interior Architecture and Design, Level- 01: Undergraduate. Prerequisites: IAD 3400.

IAD 4600. Studio 5. 6 Credits.

Culmination of skills and knowledge accumulated through the program as demonstrated by development of an interior design project covering all aspects from conception through presentation. Restricted to Major: Interior Architecture and Design, Level: 01-Undergraduate. Prerequisites: IAD 4500.

IAD 4605. Professional Practice. 3 Credits.

A service-learning course that combines classroom instruction with practical learning. Students work with interior designers, architects, or industry-related professionals to provide a creative and realistic solution to the challenges of a pro-bono design project within the local community. Course concepts cover issues related to the practice of a professional interior designer, including business procedures, legal implications, ethics, trade relations, and designer-client-contractor relations. Restricted to Major: Interior Architecture and Design, Level: 01-Undergraduate. Prerequisites: IAD 4500.

IAD 4605W. Professional Practice. 3 Credits.

A service-learning course that combines classroom instruction with practical learning. Students work with interior designers, architects, or industry-related professionals to provide a creative and realistic solution to the challenges of a pro-bono design project within the local community. Course concepts cover issues related to the practice of a professional interior designer, including business procedures, legal implications, ethics, trade relations, and designer-client-contractor relations. Prerequisite: IAD 4500. Restricted to majors only.

IAD 4610. Structures & Building Systems. 3 Credits.

Organization and preparation of construction documents; methods and materials; and application of codes. Building systems (mechanical, electrical, plumbing) as related to function and design of interior spaces. Restricted to Major: Interior Architecture and Design, Level: 01-Undergraduate. Prerequisites: Studio IAD 4500.

IAD 6200. Studio I. 6 Credits.

Introduction to the theory and application of design principles and elements in the built environment while establishing a thorough understanding of the design process. Restricted to Graduate level Interior Architecture and Design majors.

IAD 6204. Graphic Communications. 3 Credits.

Development of multimedia and digital techniques to express design concepts and intent. Restricted to Major: 1206- Interior Architecture and Design, Level: 02 - Graduate.

IAD 6210. Sketching Architecture and Interiors. 3 Credits.

Free-hand sketching developed and applied as a tool in all phases of the creative design process. Restricted to majors only.

IAD 6300. Studio 2. 6 Credits.

Applying design fundamentals from Studio 1 to small-scale interior architectural spaces. Prerequisites: IAD 6200. Restricted to Major: 1206 - Interior Architecture and Design, Level: 02- Graduate.

IAD 6304. Interior Materials. 3 Credits.

Introduction to building materials with an emphasis on detailing and construction. Restricted to Major: 1206 - Interior Architecture and Design, Level: 02- Graduate. Prerequisites: IAD 6200.

IAD 6310. Digital Drafting & Modeling. 3 Credits.

Introduction to CAD technology, two-dimensional drawings, plotting and enhancement of presentations. Use of CAD for the production of construction drawings. Prerequisites: IAD 6200. Restricted to Major: 1206-Interior Architecture and Design, Level: 02- Graduate.

IAD 6400. Studio 3. 6 Credits.

Continued exploration of the design process as applied to medium scale projects. Prerequisites: IAD 6300. Restricted to Major: 1206 - Interior Architecture and Design, Level: 02- Graduate.

IAD 6405. History of Modern Architecture and Design. 3 Credits.

Overview of 20th and 21st Century architecture, interiors, and furniture. Prerequisites: IAD 6300. Restricted to Major: 1206- Interior Architecture and Design, Level: 02- Graduate.

IAD 6410. Sustainability/LEED: Arch&Des. 3 Credits.

Application of sustainable design as well as introduction to the United States Green Building Council's LEED Rating System. Prerequisites: IAD 6300. Restricted to Major: 1206-Interior Architecture and Design, Level: 02-Graduate.

IAD 6500. Studio 4. 6 Credits.

Continuation and refinement of the design process to further advance conceptual Thinking for development of larger-scaled and more complex design problems. Prerequisites: IAD 6400. Restricted to Major: 1206 - Interior Architecture and Design, Level: 02-Graduate.

IAD 6505. Lighting & Acoustics. 3 Credits.

Terminology, concepts, and principles of lighting design; acoustic principles as they relate to building design. Prerequisites: IAD 6400. Restricted to Major: 1206 - Interior Architecture and Design, Level: 02-Graduate.

IAD 6510. Pre-Design for Studio 5. 3 Credits.

Investigation and research of several topics to inform capstone project in Studio 5. Prerequisites: IAD 6400. Restricted to Major: 1206-Interior Architecture and Design, Level: 02-Graduate.

IAD 6600. Studio 5. 6 Credits.

Culmination of skills and knowledge from the program in the development of a capstone project specific to each student. Prerequisites: IAD 6500. Restricted to Major: 1206- Interior Architecture and Design, Level: 02- Graduate.

IAD 6605. Professional Practice. 3 Credits.

Students work with professional interior designers, architects, or related professionals as they participate in a project-based setting. Roles and responsibilities of the professional interior designer: business procedures, legal implications, ethics, trade relations, designer-client-contractor relations. Students select a pro-bono design project within the local community and work together to provide a creative and realistic solution. The 150-hour internship must be completed and approved by the instructor by the end of the course. Prerequisites: IAD 6500. Restricted to majors only.

IAD 6610. Structures and Building Systems. 3 Credits.

Organization and preparation of construction documents; methods and materials; and application of codes. Mechanical, electrical, and plumbing building systems as related to function and design of interior spaces. Restricted to Major: 1206-Interior Architecture and Design, Level: 02-Graduate. Prerequisites: IAD 6500.

IAD 6987. Internship. 0 Credits.

Candidates for the M.F.A. in Interior Architecture and Design degree enroll in this course in order to complete the program's 120-hour internship requirement. The internship must be pre-approved by the departmental graduate advisor and must be completed while the student remains enrolled in the degree program. Restricted to students in the M.F.A. in IAD program.

**BACHELOR OF FINE ARTS
WITH A MAJOR IN INTERIOR
ARCHITECTURE AND DESIGN**

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Required courses (60 credits):

IAD 2200	Studio 1
IAD 2204	Graphic Communications
IAD 2210	Sketching Architecture and Interiors
IAD 2987	Internship

IAD 3300	Studio 2
IAD 3304	Interior Materials
or IAD 3304W	Interior Materials
IAD 3310	Digital Drafting & Modeling
IAD 3400	Studio 3
IAD 3405	History of Modern Architecture and Design
IAD 3410	Sustainability and LEED for Architecture and Design
IAD 4500	Studio 4
IAD 4505	Lighting & Acoustics
IAD 4510	Pre-Design for Studio 5
IAD 4600	Studio 5
IAD 4605	Professional Practice
or IAD 4605W	Professional Practice
IAD 4610	Structures & Building Systems
Two art history (AH) courses (6 credits)	
Two fine arts (FA) courses (6 credits)	

Please view departmental website (<http://iad.columbian.gwu.edu>) for a detailed plan of study.

**MASTER OF FINE ARTS IN
THE FIELD OF INTERIOR
ARCHITECTURE AND DESIGN**
REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Prerequisite: a bachelor's degree in a field other than interior design, including a minimum of 30 credits of liberal arts and sciences courses. A portfolio consisting of examples of relevant work must be submitted with the application to the program.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

Required

IAD 6200	Studio I
IAD 6204	Graphic Communications

IAD 6210	Sketching Architecture and Interiors
IAD 6300	Studio 2
IAD 6304	Interior Materials
IAD 6310	Digital Drafting & Modeling
IAD 6400	Studio 3
IAD 6405	History of Modern Architecture and Design
IAD 6410	Sustainability/LEED: Arch&Des
IAD 6500	Studio 4
IAD 6505	Lighting & Acoustics
IAD 6510	Pre-Design for Studio 5
IAD 6600	Studio 5

Please see departmental website (<http://iad.columbian.gwu.edu>) for a detailed plan of study.

JUDAIC STUDIES

The Columbian College of Arts and Sciences offers an interdisciplinary program in Judaic Studies leading to the degree of Bachelor of Arts. The purview of the program extends from the ancient Near East to modern-day America, and showcases and interprets the artistic expression, history, languages, literatures, philosophy, politics, and religion of the Jews over time and place.

At the undergraduate level, the Department of Judaic Studies offers the Bachelor of Arts with a major in Judaic Studies as well as a minor in the field. At the graduate level, student may opt for the Master of Arts in the field of Jewish cultural arts or Master of Arts in the field of experiential education and Jewish cultural arts.

UNDERGRADUATE

Bachelor's program

- Bachelor of Arts with a major in Judaic studies (p. 257)

Minor

- Minor in Judaic studies (p. 257)

GRADUATE

Master's programs

- Master of Arts in the field of Jewish cultural arts (p. 258)
- Master of Arts in Education and Human Development in the field of experiential education and Jewish cultural arts (p. 258) (a collaboration between the Graduate School

of Education and Human Development and the Columbian College of Arts and Sciences)

FACULTY

Committee on Judaic Studies J. Weissman Joselit, T. Anbinder, S. Ben-Gad, N. Brown, E. Cline, J. Cohen, P. Duff, R. Eisen, E. Friedland, B. Hill, L. Jacobson, S. Marcus, F. Moskowitz, W. Reich, D. Schwartz (*Director*), S. Waisman, G. Wald

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

A full list of courses for the Judaic Studies Program may be found on the Judaic Studies website (<http://bulletin.gwu.edu/arts-sciences/judaic-studies/%20http://go.gwu.edu/JSTD>) **and under the designations of CLAS, ENGL, HEBR, HONR, HIST and REL.**

JSTD 2001. Topics in Judaic Studies: Pre-modern. 3 Credits.

Focus on the pre-1650 period. Topics vary by semester. See the Schedule of Classes for details.

JSTD 2002. Topics in Judaic Studies: Modern. 3 Credits.

Focus on the post-1650 period. Topics vary by semester. See the Schedule of Classes for details.

JSTD 4018. Senior Thesis. 1 Credit.

For Judaic studies majors. Students choose a topic in any major subfield of Judaic studies, select a faculty advisor who specializes in the subfield, conduct research, and produce an annotated bibliography and a proposal that previews the main arguments of the thesis.

JSTD 4019. Senior Thesis. 3 Credits.

Continuation of JSTD 4018. For Judaic studies majors. Completion of the thesis and oral presentation before Judaic studies students and faculty.

JSTD 6001. Topics in Judaic Studies. 3 Credits.

JSTD 6097. Independent Readings/Research. 1-3 Credits. Written permission of instructor required. May be repeated for credit with permission.

JSTD 6154. Internship. 1-6 Credits.

Elective internship in areas related to Jewish cultural study.

JSTD 6201. Jewish Life in Contemporary America. 3 Credits.

JSTD 6211. Displaying Jewish Culture: Landmark Exhibitions on Judaism and the Jewish Experience. 3 Credits.

JSTD 6298. Capstone: Behind the Scenes. 3 Credits.

BACHELOR OF ARTS WITH A MAJOR IN JUDAIC STUDIES

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Foreign language requirement

Two semesters of study in a single foreign language (or the equivalent)

Required courses (9 credits):

REL 2201	Judaism
HIST 2050	History of Jewish Civilization: From the Bible to Modernity
JSTD 4019	Senior Thesis

One course (3 credits) from the following:

ANTH 3805	Archaeology of Israel and Neighboring Lands
CLAS 2803	The Ancient Near East and Egypt to 322 B.C.
CLAS 2804	History of Ancient Israel
REL 1009	The Hebrew Scriptures
JSTD 2001	Topics in Judaic Studies: Pre-modern
REL 2211	Rabbinic Thought and Literature
REL 3141	Second Temple/Hellenistic Judaism
REL 3149W	Biblical Issues
REL 3211	Rabbinic Thought and Literature
REL 3923	Violence and Peace in Judaism, Christianity, and Islam
WSTU 3281	Women in Judaism

One course (3 credits) from the following:

ENGL 3970	Jewish American Literature
HEBR 3101	Modern Hebrew Literary Classics
HEBR 3301	Modern Hebrew Fiction
HEBR 3302	The Israeli Media
HIST 3060	Modern Jewish History
HIST 3367	The American Jewish Experience
HIST 3820	The History of Israel
JSTD 2002	Topics in Judaic Studies: Modern
PSC 2379	Politics and Foreign Policy of Israel
REL 3221	Issues in Jewish Ethics
REL 3291	Modern Jewish Thought
REL 3292	Seminar: Issues in Jewish Thought

Five additional courses (15 credits) from the two lists above:

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors in Judaic Studies, a candidate must attain a GPA of at least 3.7 in courses counted toward the major in Judaic Studies and 3.3 overall, and earn a grade of A both for JSTD 4018 Senior Thesis-JSTD 4019 Senior Thesis and for the senior thesis. Having fulfilled these requirements, the student may be recommended for graduation with Special Honors.

MINOR IN JUDAIC STUDIES REQUIREMENTS

The following requirements must be fulfilled: 18 credits

One of the following:

HIST 2050	History of Jewish Civilization: From the Bible to Modernity
REL 2201	Judaism

Five of the following:

ANTH 3805	Archaeology of Israel and Neighboring Lands
CLAS 2803	The Ancient Near East and Egypt to 322 B.C.
CLAS 2804	History of Ancient Israel

ENGL 3970	Jewish American Literature
HEBR 3101	Modern Hebrew Literary Classics
HEBR 3301	Modern Hebrew Fiction
HEBR 3302	The Israeli Media
HIST 3060	Modern Jewish History
HIST 3367	The American Jewish Experience
HIST 3820	The History of Israel
JSTD 2001	Topics in Judaic Studies: Pre-modern
JSTD 2002	Topics in Judaic Studies: Modern
PSC 2379	Politics and Foreign Policy of Israel
PSC 2476	The Arab-Israeli Conflict
REL 1009	The Hebrew Scriptures
REL 2211	Rabbinic Thought and Literature
REL 3141	Second Temple/Hellenistic Judaism
REL 3149W	Biblical Issues
REL 3221	Issues in Jewish Ethics
REL 3291	Modern Jewish Thought
REL 3292	Seminar: Issues in Jewish Thought
REL 3923	Violence and Peace in Judaism, Christianity, and Islam
WSTU 3281	Women in Judaism

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF EXPERIENTIAL EDUCATION AND JEWISH CULTURAL ARTS

The Graduate School of Education and Human Development, in concert with the Columbian College of Arts and Sciences, offers a two-year, interdisciplinary program in experiential education and Jewish cultural arts. The program is designed to prepare graduates for leadership in Jewish cultural programming in museums and historic sites, arts organizations and festivals, community centers and campus associations, cultural diplomacy and heritage tourism, as well as private and public educational institutions.

Students whose career interests are primarily in museum education should refer to the museum education page

(p. 548). Those whose career interests are primarily in museum studies should refer to the museum studies page (p. 277)age (p. 278).

Specific degree requirements are shown on the Master of Arts in Education and Human Development in the Field of Experiential Education and Jewish Cultural Arts page (p. 545).

Specific admission requirements are shown on the Graduate Program Finder.

Visit the (<https://gsehd.gwu.edu/experiential-education-and-jewish-cultural-arts-masters>)departmental website (<http://gsehd.gwu.edu/programs/experiential-education-jewish-cultural-arts>) for additional information.

MASTER OF ARTS IN THE FIELD OF JEWISH CULTURAL ARTS

To meet the needs of the American Jewish community's steadily growing interest in Jewish culture, the Columbian College of Arts and Sciences offers a unique Master of Arts program in Jewish Cultural Arts. As opportunities in the cultural sector continue to multiply, this two-year master's program prepares students for careers in the management of museums, theaters, Young Men's Hebrew Associations, Jewish community centers, and foundations, as well as Jewish film, dance, literary, and music festivals. The M.A. is also designed to enhance the skills of professionals already in the field.

The 36-credit M.A. program combines the practical with the academic, providing students with the hands-on skills and intellectual capital to respond innovatively to new opportunities in the field of Jewish culture.

Visit the Judaic Studies webpage (<http://judaic.columbian.gwu.edu/master-arts-jewish-cultural-arts>) for more information about the program.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Prerequisite: a bachelor's degree from an accredited college or university, with a background in Judaic studies strongly encouraged.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

The program requires 36 credit hours, including:

JSTD 6201	Jewish Life in Contemporary America
-----------	-------------------------------------

JSTD 6211 Displaying Jewish Culture: Landmark Exhibitions on Judaism and the Jewish Experience

JSTD 6298 Behind the Scenes: The Jewish Arts World in Contemporary Perspective

MSTD 6102 NonProfit Fiscal Management

PPPA 6032 Managing Fund Raising and Philanthropy

MKTG 6255 Strategic Brand Management

And 18 credits of approved elective courses, including two internships, that may be drawn from such programs, departments, and schools as American Studies, Educational Leadership, English, History, Law, Media and Public Affairs, Museum Studies, and Theatre and Dance.

MATHEMATICS

The Department of Mathematics, part of the natural and mathematical sciences discipline in the Columbian College of Arts and Sciences, offers the Bachelor of Arts in Mathematics and Bachelor of Science in Mathematics degrees. The undergraduate mathematics major has three concentrations: pure, applied, and interdisciplinary. Each concentration is designed to give students a solid background in the theory and practice of modern mathematics.

At the graduate level, the department offers the Master of Arts in Mathematics, Master of Science in Applied Mathematics, and Doctor of Philosophy in the field of mathematics. Course offerings are complemented by a generous selection of research seminars and by the department colloquium series. Faculty expertise covers a wide range of research specialties, allowing students to choose from a rich array of potential dissertation areas.

In addition, graduate certificates in mathematics and in financial mathematics are offered for those who seek to strengthen their mathematical backgrounds in order to better position themselves in their careers or to prepare themselves for graduate work in quantitative disciplines.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in mathematics (p. 264)
- Bachelor of Science with a major in mathematics (p. 265)

Minor

- Minor in mathematics (p. 266)

GRADUATE

Master's programs

- Master of Arts in the field of mathematics (p. 266)

- Master of Science in the field of applied mathematics (p. 266)

Doctoral program

- Doctor of Philosophy in the field of mathematics (p. 267)

CERTIFICATE

- Graduate certificate in financial mathematics (p. 267)
- Graduate certificate in mathematics (p. 267)

FACULTY

Professors F.E. Baginski, J. Bonin, M.M. Gupta (*Chair*), V. Harizanov, H.D. Junghenn, J. Przytycki, X. Ren, E.A. Robinson, Y. Rong, W. Schmitt, D.H. Ullman

Associate Professors L. Abrams, M. Alekseyev, M. Moses, S. Roudenko, H. Wu

Assistant Professors M. Gualdani, A. Shumakovitch

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Note: MATH 1220 Calculus with Precalculus I and MATH 1221 Calculus with Precalculus II each cover one-half the material of MATH 1231 Single-Variable Calculus I. Because MATH 1221 Calculus with Precalculus II, MATH 1231 Single-Variable Calculus I, and MATH 1252 Calculus for the Social and Management Sciences are related in their subject matter, credit for only one of the three may be applied toward a degree. The placement exam, which is one option for placing into Math 1051, 1220, 1231, or 1252 is at: <http://math.columbian.gwu.edu/gw-mathematics-placement-test>

MATH 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the Schedule of Classes for more details. Restricted to First-year students in CCAS.

MATH 1007. Mathematics and Politics. 3 Credits.

A mathematical treatment of fair representation, voting systems, power, and conflict. The impossibility theorems of Balinsky and Young and of Arrow. The electoral college. The prisoner's dilemma.

MATH 1008. History of Mathematics. 3 Credits.

The history of mathematics, with emphasis on its importance in the evolution of human thought. Students learn some useful mathematics from areas such as geometry, number theory, and probability and develop an appreciation of the mathematical endeavor.

MATH 1009. Mathematical Ideas I. 3 Credits.

Elementary mathematical models of growth and decay, scaling, chaos, and fractals.

MATH 1010. Mathematical Ideas II. 3 Credits.

Continuation of MATH 1009. Elementary graph theory, scheduling, probability theory.

MATH 1051. Finite Mathematics for the Social and Management Sciences. 3 Credits.

Systems of linear equations, matrix algebra, linear programming, probability theory, and mathematics of finance. Prerequisite: the placement examination or a score of 560 or above on the SAT II in mathematics.

MATH 1220. Calculus with Precalculus I. 3 Credits.

An introduction to single-variable calculus (differentiation and integration of algebraic and trigonometric functions with applications), with the concepts and techniques of precalculus developed as needed. Prerequisite: the placement examination or a score of 560 or above on the SAT II in mathematics.

MATH 1221. Calculus with Precalculus II. 3 Credits.

Continuation of MATH 1220. An introduction to single-variable calculus (differentiation and integration of algebraic and trigonometric functions with applications), with the concepts and techniques of precalculus developed as needed. Prerequisites: MATH 1220.

MATH 1231. Single-Variable Calculus I. 3 Credits.

Limits and continuity. Differentiation and integration of algebraic and trigonometric functions with applications. Prerequisite: the placement examination or a score of 720 or above on the SAT II in mathematics.

MATH 1232. Single-Variable Calculus II. 3 Credits.

The calculus of exponential and logarithmic functions. L'Hopital's rule. Techniques of integration. Infinite series and Taylor series. Polar coordinates. Prerequisite: MATH 1221 or MATH 1231.

MATH 1252. Calculus for the Social and Management Sciences. 3 Credits.

Differential and integral calculus of functions of one variable; applications to business and economics. Prerequisite: the placement examination or a score of 560 or above on the SAT II in mathematics.

MATH 2020. Joint Math and Physics Seminar. 1 Credit.**MATH 2184. Linear Algebra I. 3 Credits.**

Linear equations, matrices, inverses, and determinants. Vector spaces, rank, eigenvalues, and diagonalization. Applications to geometry and ordinary differential equations.

MATH 2185. Linear Algebra I for Math Majors. 3 Credits.

For current or prospective math majors. Introduction to theory and computations involving linear equations, matrices, inverses, determinants, vector spaces, rank, eigenvalues, diagonalization, inner products, norms, and orthogonality. Reading and writing proofs is required. Credit may not be earned for both Math 2184 and 2185. Prerequisites: MATH 1221 or MATH 1231 or permission of instructor; prerequisite or corequisite: MATH 2971.

MATH 2233. Multivariable Calculus. 3 Credits.

Partial derivatives and multiple integrals. Vector-valued functions. Topics in vector calculus, including line and surface integrals and the theorems of Gauss, Green, and Stokes. Prerequisite: MATH 1232.

MATH 2971. Introduction to Mathematical Reasoning. 3 Credits.

An introduction to the fundamental abstract concepts of modern mathematics as well as various proof techniques demonstrated on numerous examples taken from within discrete and continuous mathematics. Prerequisite or concurrent registration: Math 1232. Open to majors and to others with permission of instructor or the departmental undergraduate advisor.

MATH 2971W. Introduction to Mathematical Reasoning. 3 Credits.**MATH 2991. Introductory Special Topics. 1-3 Credits.**

Admission by permission of instructor. May be repeated for credit.

MATH 3120. Elementary Number Theory. 3 Credits.

Divisibility of integers, prime numbers, greatest common divisor, the Euclidean algorithm, congruence, the Chinese remainder theorem, number theoretic functions, Möbius inversion, Euler's phi function, and applications to cryptography and primality testing. Prerequisite: MATH 2971 or permission of instructor.

MATH 3125. Linear Algebra II. 3 Credits.

Advanced topics in linear algebra such as duality of vector spaces, normal and self-adjoint operators, the singular value decomposition theorem, the spectral theorem, bilinear and quadratic forms, the geometry of orthogonal operators, the Jordan canonical form, and minimal polynomials. Prerequisites: MATH 2971 and MATH 2184; or MATH 2185; or permission of instructor.

MATH 3257. Introduction to Complex Variables. 3 Credits.

Analytic functions and power series. Contour integration and the calculus of residues. Conformal mapping. Physical applications. Prerequisites: MATH 2233, MATH 2971, and MATH 2184 or 2185 or permission of instructor.

MATH 3342. Ordinary Differential Equations. 3 Credits.

A first course in ordinary differential equations with an emphasis on mathematical modeling: solution curves, direction fields, existence and uniqueness, approximate solutions, first and second order linear equations, linear systems and phase portraits. Prerequisites: MATH 2233 and MATH 2184 or MATH 2185 or permission of the instructor.

MATH 3343. Partial Differential Equations. 3 Credits.

A first course in partial differential equations: Fourier series and separation of variables, vibrations of a string, Sturm-Liouville problems, series solutions, Bessel's equation, linear partial differential equations, wave and heat equations, separation of variables. Prerequisites: MATH 3342 or permission of instructor.

MATH 3359. Introduction to Mathematical Modeling. 3 Credits.

An introduction to the fundamental modeling ideas of dimensional analysis, scaling, and elementary approximations of curves and functions. Applications to development of models from science and engineering. Prerequisite: MATH 2572 and MATH 3342.

MATH 3410. Mathematics of Finance. 3 Credits.

A mathematical development and analysis of realistic models for financial option pricing. Mathematical underpinnings and financial concepts will be developed in parallel. Prerequisites: MATH 2233 and MATH 2971 or permission of instructor.

MATH 3411. Stochastic Calculus Methods in Finance. 3 Credits.

Review of probability theory. Brownian motion; Ito integrals; Ito's formula; martingales; stochastic differential equations; boundary value problems; the Dirichlet problem; the Black-Scholes equation; optimal stopping; and American options. Prerequisites: MATH 2184 or MATH 2185, MATH 2971, MATH 3410, or permission of instructor.

MATH 3553. Introduction to Numerical Analysis. 3 Credits.

Accuracy and precision. Linear systems and matrices. Direct and iterative methods for solution of linear equations. Sparse matrices. Solution of nonlinear equations. Interpolation and approximate representation of functions, splines. Prerequisites: MATH 2185 or MATH 2233 and MATH 2184 or MATH 2572 or permission of instructor.

MATH 3613. Introduction to Combinatorics. 3 Credits.

Introduction to combinatorial enumeration. Basic counting techniques, inclusion-exclusion principle, recurrence relations, generating functions, pigeonhole principle, bijective correspondences. Prerequisite: MATH 2971 or permission of instructor.

MATH 3632. Introduction to Graph Theory. 3 Credits.

Fundamental concepts, techniques, and results of graph theory. Topics include trees, connectivity, traversability, matchings, coverings, colorability, planarity, networks, and Polya enumeration. Prerequisite: MATH 2971 or permission of instructor.

MATH 3710. Introduction to Mathematical Logic. 3 Credits.

Symbolic logic as a precise formalization of deductive thought. Logical correctness of reasoning. Formal languages, interpretations, and truth. Propositional logic and first-order quantifier logic suited to deductions encountered in mathematics. Goedel's completeness theorem; compactness. Prerequisite: MATH 2971 or permission of instructor.

MATH 3720. Axiomatic Set Theory. 3 Credits.

Cantor's theory of sets. Russell's paradox. Axiomatization of set theory as a framework for a contradiction-free mathematics. The Zermelo-Fraenkel axioms and the axiom of choice. Finite, countable, and uncountable sets; ordinal and cardinal arithmetic. The continuum hypothesis. Prerequisite: MATH 2971 or permission of instructor.

MATH 3730. Computability Theory. 3 Credits.

The unlimited register machine as a model of an idealized computer. Computable and partial computable functions; Church-Turing thesis. Kleene's recursion theorem. Algorithmic enumerability. Unsolvability of the halting problem and other theoretical limitations on what computers can do. Discussion of Goedel's incompleteness theorem. Prerequisite: MATH 2971 or permission of instructor.

MATH 3740. Computational Complexity. 3 Credits.

Automata and languages. Deterministic and nondeterministic Turing machines. Space and time complexity measures and classes. The P versus NP problem. The traveling salesman problem and other NP-complete problems. Intractability. Circuit complexity. Introduction to probabilistic and quantum algorithms. Prerequisite: MATH 2971 or permission of instructor.

MATH 3806. Introduction to Topology. 3 Credits.

Metric spaces: completeness, compactness, continuity. Topological spaces: continuity, bases, subbases, separation axioms, compactness, local compactness, connectedness, product and quotient spaces. Prerequisite: MATH 2971 or permission of instructor.

MATH 3848. Differential Geometry. 3 Credits.

Curves in space, regular surfaces, tensors, fundamental forms of a surface, Gauss-Bonnet theory, minimal surfaces. The geometry of the Gauss map. Prerequisites: MATH 2184 or MATH 2185, MATH 2233, MATH 2971, or permission of instructor.

MATH 4121. Introduction to Abstract Algebra I. 3 Credits.

Study of groups and associated concepts, including Lagrange's theorem, Cayley's theorem, the fundamental theorem of homomorphisms, and applications to counting. Prerequisites: MATH 2971 and MATH 2184 or MATH 2185 or permission of instructor.

MATH 4122. Introduction to Abstract Algebra II. 3 Credits.

Study of rings, through maximal and prime ideals, and the study of fields, through Galois theory. Prerequisite: MATH 4121 or permission of instructor.

MATH 4239. Real Analysis I. 3 Credits.

A rigorous study of differentiation, integration, and convergence. Topics include sequences and series, continuity and differentiability of real-valued functions of a real variable, the Riemann integral, sequences of functions, and power series. Prerequisites: MATH 1232 and MATH 2971 or permission of instructor.

MATH 4239W. Real Analysis I. 3 Credits.

A rigorous study of differentiation, integration, and convergence. Topics include sequences and series, continuity and differentiability of real-valued functions of a real variable, the Riemann integral, sequences of functions, and power series. Prerequisite: MATH 1232 and MATH 2971 or permission of the instructor.

MATH 4240. Real Analysis II. 3 Credits.

Continuation of MATH 4239. Topics include: topology of \mathbb{R}^n , derivatives of functions of several variables, inverse and implicit function theorems, multiple integrals, generalized Stokes's theorem. Prerequisites: MATH 2233, MATH 2184 or MATH 2185, and MATH 4239; or permission of instructor.

MATH 4981. Seminar: Topics in Mathematics. 3 Credits.

Past topics have included computational mathematics, fractals, network flows and combinatorial optimization, information theory and coding theory, dynamical systems, queuing theory, wavelets and Fourier analysis, complex networks, classical and quantum complexity. Prerequisites: MATH 2233 and either MATH 2184 or 2185, or permission of instructor.

MATH 4991. Special Topics. 1-12 Credits.

Admission by permission of instructor. May be repeated for credit.

MATH 4995. Reading and Research. 1-6 Credits.

Under the personal direction of an instructor. Limited to majors with demonstrated capability. Prior approval of instructor required. May be repeated for credit.

MATH 6101. Algebra I. 3 Credits.

Group theory including symmetric groups, free abelian groups, finitely generated abelian groups, group actions, Sylow theorems, solvable groups. Ring theory including factorization in commutative rings, rings of polynomials, chain conditions.

MATH 6102. Algebra II. 3 Credits.

Continuation of MATH 6101. Theory of modules, including modules over a principal ideal domain and tensor product of modules. Theory of fields, including finite fields and Galois theory.

MATH 6120. Topics in Algebra. 3 Credits.

Topics chosen from Lie groups and Lie algebras, non-associative algebras, abelian groups, classical groups, algebraic number theory, representation theory, algebraic geometry, and ring theory. Prerequisite: MATH 6101- MATH 6102. May be repeated for credit with permission.

MATH 6201. Real Analysis I. 3 Credits.

A rigorous study of the real number system, metric spaces, topological spaces, product topology, convergence, continuity and differentiation. Topics include Dedekind's cuts, Tychonoff's theorem, sequences and series, Abel's theorem, continuity and differentiability of real-valued functions of a real variable. Credit may not be earned for both MATH 6201 and MATH 4239.

MATH 6202. Real Analysis II. 3 Credits.

Continuation of MATH 6201. Topics include Riemann-Stieltjes integrals, equicontinuity, Arzela-Ascoli theorem, Stone-Weierstrass theorem, derivatives of functions of several variables, contraction mapping theorem, inverse and implicit function theorems, differential forms, exterior differentiation, Stoke's theorem, differentiable manifolds. Credit may not be earned for both MATH 6202 and MATH 4240.

MATH 6214. Measure and Integration Theory. 3 Credits.

Lebesgue measure and integration in abstract spaces. Probability measures. Absolute continuity, the Radon-Nikodym theorem, measures on product spaces, and the Fubini theorem. LP spaces and their properties. Prerequisite: MATH 4239 .

MATH 6215. Introduction to Functional Analysis. 3 Credits.

Topological and metric spaces; Tychonoff theorem; Banach spaces; linear functionals and operators; Hahn-Banach, closed graph, and open-mapping theorems; uniform boundedness; Hilbert spaces; eigenvalues, projections. Prerequisite: MATH 6214 .

MATH 6225. Ergodic Theory. 3 Credits.

Ergodicity, mixing, the K-property and the Bernoulli property. Poincaré recurrence, the Rohlin lemma, the ergodic theorem, and entropy theory. Additional topics from isomorphism theory, spectral theory, the theory of joinings, and coding theory. Prerequisite: MATH 6214 or permission of instructor.

MATH 6226. Dynamical Systems and Chaos. 3 Credits.

Linear and nonlinear systems, flows, Poincaré maps, structural stability. Examples of chaotic systems in the physical sciences. Local bifurcations, center manifold theory, normal forms, the averaging theorem. Hyperbolic invariant sets, strange attractors, the Smale horseshoe, symbolic dynamics. Prerequisite: MATH 2184 and MATH 4240 or permission of instructor.

MATH 6230. Complex Analysis. 3 Credits.

Topology of the complex plane; complex differentiation and integration; Cauchy's theorem and its consequences; Taylor and Laurent series; classification of singularities; residue theory; conformal mapping; the Riemann mapping theorem. Prerequisite: Math 4239 .

MATH 6240. Topics in Real and Functional Analysis. 3 Credits.

Possible topics include Banach algebras, function algebras, spectral theory for bounded and unbounded operators, harmonic analysis on topological groups and semigroups, topological vector spaces and operator algebras. Prerequisite: permission of instructor. May be repeated for credit with permission.

MATH 6318. Applied Mathematics I. 3 Credits.

Dimensional analysis, perturbation methods, calculus of variations, boundary value problems in one dimension, eigenvalue problems, stability and bifurcation in nonlinear problems. Related numerical techniques. Prerequisite: MATH 2184 .

MATH 6319. Applied Mathematics II. 3 Credits.

Method of characteristics, shock waves, wave and heat equation, Laplace operator on a bounded region, maximum principles, Green's functions, Schrödinger's equation, spherical harmonics. Numerical methods for partial differential equations. Prerequisite: MATH 2184 .

MATH 6330. Ordinary Differential Equations. 3 Credits.

Existence and uniqueness of solutions, continuity and differentiability of solutions with respect to initial conditions. Properties of linear systems, phase portraits, planar systems and Poincaré-Bendixson theory. Prerequisite: MATH 4240.

MATH 6340. Modern Partial Differential Equations. 3 Credits.

Emphasis on modern theory and analytical techniques applied to the solution of partial differential equations. Topics include Sobolev spaces, generalized solutions, strong solutions and regularity; Sobolev imbedding theorem; Rellich-Kondrachov theorem; Leray-Schauder fixed-point theorems; nonlinear eigenvalue problems. Prerequisite: MATH 6319 or permission of instructor.

MATH 6350. Topics in Applied Mathematics. 3 Credits.

Possible topics include, but are not limited to, the calculus of variations, control theory, nonlinear partial differential equations, and mathematical programming. May be repeated for credit with permission.

MATH 6441. Introduction to Financial Mathematics. 3 Credits.

Elementary finance. Basic probability. Discrete random variables. Forwards, futures, and options. Options and arbitrage. The binomial model. Cox-Ross- Rubenstein formula. Martingales. Continuous random variables. The continuous model as a limit of the binomial model. Prerequisite: MATH 2184, MATH 2233.

MATH 6442. Stochastic Calculus Methods in Finance. 3 Credits.

Review of finance and probability theory. Brownian motion. Ito's formula. Martingales. Stochastic differential equations. The Black-Scholes equation. Optimal stopping. American options. Prerequisites: MATH 2184, MATH 2233.

MATH 6522. Introduction to Numerical Analysis. 3 Credits.

Computer arithmetic and round-off errors. Solution of linear and nonlinear systems. Interpolation and approximations. Numerical differentiation and integration. Eigenvalues and eigenvectors. Prerequisite: MATH 1232 and MATH 2184 and knowledge of a programming language.

MATH 6523. Numerical Solution of Ordinary and Partial Differential Equations. 3 Credits.

Initial and boundary value problems for ordinary differential equations. Error propagation, convergence and stability. Finite difference and finite element methods for partial differential equations. Prerequisite: MATH 3342 and knowledge of a programming language.

MATH 6540. Topics in Numerical Analysis. 3 Credits.

Numerical methods and software. Introductions to the methods, tools, and ideas of numerical computation. Problem solving using standard mathematical software. Interpolation; linear and nonlinear equations. Differential equations. Prerequisite: MATH 3342; knowledge of a programming language.

MATH 6610. Combinatorics. 3 Credits.

An introduction to fundamental methods and current research problems in partially ordered sets and enumeration. Prerequisite: undergraduate modern algebra and linear algebra or permission of instructor.

MATH 6620. Graph Theory. 3 Credits.

Graphical enumeration, factors, planarity and graph coloring, algebraic graph theory, extremal graph theory, applications. Prerequisite: undergraduate modern algebra and linear algebra or permission of instructor.

MATH 6630. Topics in Combinatorial Mathematics. 3 Credits.

Topics selected from a wide range of research subjects in combinatorics, its relations with other areas of mathematics, and applications. Recent selections have included matroid theory, topological methods in ordered sets, algebraic methods in combinatorics, fractional graph theory, combinatorics of polytopes, the symmetric group. May be repeated for credit with permission.

MATH 6710. Mathematical Logic. 3 Credits.

Model theory: the relation between a formal language (syntax) and its interpretations (semantics). Consistency, completeness, and compactness. Tarski's theorem on the inexpressibility of truth. Godel's incompleteness theorem and its impact on mathematics.

MATH 6720. Topics in Logic. 3 Credits.

Topics selected from a broad spectrum of areas of logic and applications, based on students' suggestions and interests. Recent selections have included computable mathematics, computable model theory, computability theory, set theory, and algorithmic learning theory. May be repeated for credit with permission.

MATH 6810. General Topology. 3 Credits.

Topological spaces, bases and subbases, open sets and closed sets; continuous maps and homeomorphisms; connectedness and compactness; metric topology, product topology, and quotient topology; separation axioms; finite topological spaces, covering spaces, and fundamental groups.

MATH 6820. Algebraic Topology. 3 Credits.

Fundamental groups and the Van Kampen theorem; simplicial complexes, simplicial homology, and Euler characteristic; singular homology, Mayer-Vietoris sequences. Topics may include cohomology, cup products, and Poincaré duality; classification of surfaces; knots and their fundamental groups. Prerequisite: MATH 6810 or permission of instructor.

MATH 6850. Knot Theory and Low Dimensional Topology. 3 Credits.

Introduction to fundamental methods and current research in knot theory and 3-dimensional topology. Topics include Reidemeister moves, Alexander invariants, Jones-type invariants, skein modules, Khovanov homology, incompressible surfaces, and torus decomposition. Prerequisite: MATH 6810 or permission of instructor.

MATH 6860. Topics in Knot Theory and Low Dimensional Topology. 3 Credits.

Possible topics include, but are not limited to, topology of 3-manifolds and work of Perelman, quantum invariants and their categorizations, topology of 4-manifolds after Freedman and Donaldson, computational complexity in topology, and applications in biology, chemistry, and physics. Prerequisite: MATH 6850 or permission of instructor. May be repeated for credit with permission.

MATH 6890. Topics in Topology. 3 Credits.

Topics may include hyperbolic structures on surfaces and 3-manifolds; knot theory; topology of 3-manifolds; topology of 4-manifolds. Prerequisite: MATH 6820 or permission of the instructor. May be repeated for credit with permission.

MATH 6991. Graduate Student Experience. 0 Credits.

Introduction to the experience of studying mathematics as a graduate student at GW. Topics include understanding University rules and regulations, handling the literature in the subject, conducting research and delivering presentations, and pursuing a successful career as a mathematician. Restricted to graduate students in the Department of Mathematics.

MATH 6995. Reading and Research. 0-12 Credits.

May be repeated for credit.

MATH 8999. Dissertation Research. 3-12 Credits.

Limited to Doctor of Philosophy candidates. May be repeated for credit.

BACHELOR OF ARTS WITH A MAJOR IN MATHEMATICS

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Required courses (12 credits):

MATH 1231	Single-Variable Calculus I (or equivalent)
MATH 1232	Single-Variable Calculus II
MATH 2233	Multivariable Calculus
MATH 2971	Introduction to Mathematical Reasoning

One course (3 credits) from the following:

CSCI 1011	Introduction to Programming with Java
CSCI 1041	Introduction to FORTRAN Programming
CSCI 1111	Introduction to Software Development
CSCI 1121	Introduction to C Programming
CSCI 1131	Introduction to Programming with C

Students in the pure mathematics concentration may substitute an additional elective, approved by the department, for the CSCI course.

Students select one of the following three concentrations:

A. The concentration in pure mathematics:

Required advanced courses (15 credits):

MATH 2185	Linear Algebra I for Math Majors (or both MATH 2184 and MATH 3125)
MATH 4121	Introduction to Abstract Algebra I
MATH 4239	Real Analysis I
MATH 4240	Real Analysis II
MATH 4122	Introduction to Abstract Algebra II
or MATH 3125	Linear Algebra II

Three additional mathematics (MATH) courses (9 credits) numbered 3000 or above

B. The concentration in applied mathematics:

Required advanced courses (18 credits):

MATH 2185	Linear Algebra I for Math Majors
or MATH 2184	Linear Algebra I
MATH 3342	Ordinary Differential Equations

MATH 3343	Partial Differential Equations
MATH 3553	Introduction to Numerical Analysis
MATH 3359	Introduction to Mathematical Modeling
MATH 4239	Real Analysis I

Two additional mathematics (MATH) courses (6 credits) numbered 3000 or above

C. The interdisciplinary concentration in mathematics

Required advanced courses (12 credits):

MATH 2185	Linear Algebra I for Math Majors
or MATH 2184	Linear Algebra I
MATH 3342	Ordinary Differential Equations
MATH 3553	Introduction to Numerical Analysis
MATH 3359	Introduction to Mathematical Modeling

Four additional mathematics (MATH) courses (12 credits) numbered 3000 or above

A minor or second major in statistics, economics, physics, finance, or any department in the School of Engineering and Applied Science.

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, students must maintain a grade-point average of at least 3.5 in courses in the major; complete 3 credits of MATH 4995 Reading and Research in addition to the other required courses in the major; and present an oral defense of a senior thesis prepared for MATH 4995 Reading and Research.

BACHELOR OF SCIENCE WITH A MAJOR IN MATHEMATICS

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Required introductory courses (12 credits):

MATH 1231	Single-Variable Calculus I (or the equivalent)
MATH 1232	Single-Variable Calculus II
MATH 2233	Multivariable Calculus

MATH 2971	Introduction to Mathematical Reasoning
-----------	--

One course (3 credits) from the following:

CSCI 1011	Introduction to Programming with Java
CSCI 1041	Introduction to FORTRAN Programming
CSCI 1111	Introduction to Software Development
CSCI 1121	Introduction to C Programming
CSCI 1131	Introduction to Programming with C

Students in the pure mathematics concentration may substitute an additional elective, approved by the department, for the CSCI course.

Select one of the following three concentrations:

A. The concentration in pure mathematics:

Required advanced courses (15 credits):

MATH 2185	Linear Algebra I for Math Majors
or MATH 2184 & MATH 3125	Linear Algebra I and Linear Algebra II
MATH 4121	Introduction to Abstract Algebra I
MATH 4239	Real Analysis I
MATH 4240	Real Analysis II
MATH 4122	Introduction to Abstract Algebra II
or MATH 3125	Linear Algebra II

Five additional mathematics (MATH) courses (15 credits) numbered 3000 or above

B. The concentration in applied mathematics:

Required advanced courses (18 credits):

MATH 2185	Linear Algebra I for Math Majors
or MATH 2184 & MATH 3125	Linear Algebra I and Linear Algebra II
MATH 3342	Ordinary Differential Equations
MATH 3343	Partial Differential Equations
MATH 3553	Introduction to Numerical Analysis
MATH 3359	Introduction to Mathematical Modeling
MATH 4239	Real Analysis I

Four additional mathematics (MATH) courses (12 credits) numbered 3000 or above

If MATH 3125 is paired with MATH 2184, then MATH 3125 also counts toward these additional credits.

C. The concentration in interdisciplinary mathematics:

Required advanced courses (12 credits):

MATH 2185 Linear Algebra I for Math Majors

or MATH 2184 Linear Algebra I
& MATH 3125 and Linear Algebra II

MATH 3342 Ordinary Differential Equations

MATH 3553 Introduction to Numerical Analysis

MATH 3359 Introduction to Mathematical Modeling

Six additional mathematics (MATH) courses (18 credits) numbered 3000 or above

A minor or double major in statistics, economics, physics, finance, or any department in the School of Engineering and Applied Science

If MATH 3125 is paired with MATH 2184, MATH 3125 counts towards these additional credits.

SPECIAL HONORS

To graduate with Special Honors, a student must meet the general requirements stated under University Regulations; maintain a grade-point average of at least 3.5 in courses in the major; complete 3 credits of MATH 4995 Reading and Research in addition to the other required courses in the major; and present an oral defense of a senior thesis prepared for MATH 4995 Reading and Research.

MINOR IN MATHEMATICS

REQUIREMENTS

18 credits in mathematics courses, including MATH 2184 Linear Algebra I, and of which at least 9 credits are at the 3000 level or higher, chosen in consultation with a departmental advisor.

MASTER OF ARTS IN THE FIELD OF MATHEMATICS

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>)

Prerequisite: a bachelor's degree with a major in mathematics or comparable course work.

The following requirements must be fulfilled: The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (<http://bulletin.gwu.edu/arts-sciences/#degreeregulationtext>) and 30 credits in approved coursework in mathematics.

For a detailed description of the program, see the Department of Mathematics Graduate Academic Programs (<http://departments.columbian.gwu.edu/math/graduate>) website.

Required:

30 credits of approved graduate course work in mathematics.

Up to 6 of the required credits may be satisfied through approved upper-level undergraduate courses.

MASTER OF SCIENCE IN THE FIELD OF APPLIED MATHEMATICS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (<http://bulletin.gwu.edu/arts-sciences/#degreeregulationtext>).

30 credits in approved course work divided between mathematics and one of the following areas of application: physics, computer science, statistics, operations research, economics, engineering (civil, electrical, mechanical, or systems). At most 12 of the required credits can be outside mathematics. Students must petition and obtain the approval of the graduate committee in order to register for courses outside the department.

Students must petition and obtain the approval of the graduate committee in order to register for MATH 6995, Reading and Research.

Subject to the approval of the graduate committee (requested via petition) and the agreement of the instructor, mathematics graduate students may take the following undergraduate courses for graduate credit: MATH 3710, MATH 3720, MATH 3730, MATH 3740, MATH 3613, MATH 3632, MATH 4239, MATH 4240, MATH 3848 and MATH 4981. Graduate students in such courses must be assigned appropriate additional work to bring the courses up to the graduate level. These courses may comprise up to 6 of the required credits.

Up to one-quarter of the work toward a Master's degree may be via courses offered by other institutions in the Consortium of Universities of the Washington Metropolitan Area. Students wishing to take such courses must petition and obtain the approval of the graduate committee.

Course work is divided between graduate mathematics courses and up to 12 credits of approved graduate courses from one area of application selected from physics, statistics, computer science, economics, or civil, electrical, mechanical, or systems engineering. Up to 6 of the required credits may be satisfied through approved upper-level undergraduate courses. For a detailed description of the program, see the Department of Mathematics Graduate Academic Programs (<http://departments.columbian.gwu.edu/math/graduate>).

DOCTOR OF PHILOSOPHY IN THE FIELD OF MATHEMATICS

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

The requirements for the Doctor of Philosophy Program (p. 71).

Required: The General Examination consists of a preliminary examination in three subjects selected from algebra, analysis, topology, applied math, and linear algebra/advanced calculus, and a specialty examination in a research area approved by the department. A language examination to demonstrate reading knowledge of mathematics in an approved foreign language is also required. For a detailed description of the program, visit the departmental web page (<http://departments.columbian.gwu.edu/math/graduate>).

In addition to the listed degree programs listed, graduate certificates in mathematics and in financial mathematics are offered.

GRADUATE CERTIFICATE IN FINANCIAL MATHEMATICS

REQUIREMENTS

Specific admission requirements can be found on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

Required

MATH 6201	Real Analysis I
MATH 6441	Introduction to Financial Mathematics
MATH 6442	Stochastic Calculus Methods in Finance

One of the following:

MATH 6202	Real Analysis II
MATH 6214	Measure and Integration Theory
MATH 6318	Applied Mathematics I
MATH 6330	Ordinary Differential Equations
MATH 6522	Introduction to Numerical Analysis

Alternate courses can be selected in consultation with the certificate program advisor. More information may be found on the mathematics certificate programs (<http://math.columbian.gwu.edu/certificate-programs>) website.

GRADUATE CERTIFICATE IN MATHEMATICS

REQUIREMENTS

Specific admission requirements can be found on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

The following requirements must be fulfilled: 12 credits, including 6 credits in required courses and 6 credits in elective courses.

Required:

MATH 6201	Real Analysis I
MATH 6202	Real Analysis II
Two of the following:	
MATH 6214	Measure and Integration Theory
MATH 6215	Introduction to Functional Analysis
MATH 6318	Applied Mathematics I
MATH 6319	Applied Mathematics II
MATH 6810	General Topology

Alternate courses can be selected in consultation with the certificate advisor. More information may be found on the mathematics certificate programs (<http://math.columbian.gwu.edu/certificate-programs>) website.

MEDIA AND PUBLIC AFFAIRS

The School of Media and Public Affairs (<http://smpa.gwu.edu>) (SMPA), part of the Columbian College of Arts and Sciences, is dedicated to the study of media, journalism, and political communication with a focus on the connections between ideas and information and how the media inform and influence policy and politics in a democracy. Students

have the opportunity for internships and access to decision makers, community leaders, and power brokers. SMPA offers programs of study leading to the Bachelor of Arts with majors in journalism and mass communication, and in political communication. Entering freshmen may be admitted to majors within SMPA through a highly selective application process. In addition, a limited number of students are admitted through a competitive application process that begins after the student is accepted to the University. Visit SMPA (<http://smpa.gwu.edu/transfer-admissions>) for information about admissions and program requirements.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in journalism and mass communication (p. 273)
- Bachelor of Arts with a major in political communication (p. 274)
- Combined programs (p. 276)

Minor

- Minor in journalism and mass communication (p. 275)

GRADUATE

Master's program

- Master of Arts in the field of media and strategic communication (p. 276)

CERTIFICATE

Certificate program

A graduate certificate in documentary filmmaking is offered by the School of Media and Public Affairs. Information is available at The Documentary Center (<http://research.columbian.gwu.edu/documentarycenter>).

FACULTY

Professors R.M. Entman, L. Huebner, S.L. Livingston, S.V. Roberts, F. Sesno (*Director*), S. Waisbord

Associate Professors S. Aday, K.A. Gross, K. Harvey (*Chair*), M. Hindman, A.L. May III, P.F. Phalen, R. Russell, N. Seavey (*Research*), J.E. Steele, C.W. Thompson

Assistant Professors C.S. Bailard, I.M. Cheers, D.A. Karpf, J. Osder, J.M. Shanahan, E.A. Thorson, N. Usher, W.L. Youmans

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work

- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

SMPA 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the Schedule of Classes for more details. Restricted to First-year students in CCAS.

SMPA 1050. Media in a Free Society. 3 Credits.

The role of mass communication in democratic political systems: informational requirements of democracy, sources of political information and the role of news media and other channels in creating and disseminating it; issues relating to propaganda and public information; and the interaction between information flows and democratic political culture. Not open to SMPA majors.

SMPA 1225. Forensics Practice (Debate). 1 Credit.

SMPA 2101. Journalism: Theory & Practice. 3 Credits.

An overview of theories and key issues in journalism in the United States. News and democracy, the historical and social evolution of journalism, news values, journalism as occupation/profession, technologies and changes in journalistic practices. Open only to SMPA majors.

SMPA 2102. Introduction to Political Communication. 3 Credits.

Basic concepts and theories of political communication; development of a framework for analyzing political communication; applications in the United States, other countries, and the international system. Open only to SMPA majors. Prerequisite: PSC 1002.

SMPA 2110W. Introduction to News Writing and Reporting. 0-3 Credits.

Fundamentals of news reporting and writing, with emphasis on the print media. News judgment, information gathering skills, and crafting news and feature stories. Regular in-class and outside reporting and writing exercises. Directly admitted freshmen may enroll in their second semester; all other freshmen need departmental permission. Laboratory fee.

SMPA 2111W. Advanced News Reporting. 4 Credits.

Reporting, writing, and computer skills for covering beats and developing in-depth news stories. Techniques in researching, observing, and interviewing to frame stories of public interest; outside and in-class reporting and writing assignments. Restricted to Journalism and Mass Communication majors or permission of instructor required. Prerequisite: SMPA 2110. Laboratory fee.

SMPA 2112. Digital Media I: Introduction to Video Production. 3 Credits.

Foundational introduction to digital media production. Videography and non-linear editing, with emphasis on use in journalism and political communication. Laboratory fee. Restricted to Political Communication and Journalism & Mass Communication majors only.

SMPA 2113. Digital Media II: Introduction to Web Production and Social Media. 3 Credits.

Foundational introduction to digital media production. Web content and design; photography and audio applied to the web; and using social media. Emphasis on use in journalism and political communication. Laboratory fee. Restricted to Political Communication and Journalism & Mass Communication majors only.

SMPA 2120. Public Opinion. 3 Credits.

Key aspects of the literature on public opinion, with emphasis on the role of media in opinion formation and change. Topics include the meaning of public opinion in a democratic society, a review of methods used to measure opinions, and media effects on opinion.

SMPA 2151. Research Methods. 3 Credits.

Processes of inquiry within mediated communication. The concepts of framing research questions, conducting literature reviews, developing a research design, and interpreting results of cultural and social science research within a societal framework. Prerequisites: STAT 1053 or STAT 1051 or STAT 1111 or STAT 1127.

SMPA 2152. Data Analysis for Journalism and Political Communication. 3 Credits.

Understanding, critiquing, and performing analysis of data sets with applications to journalism and political communication; using data to tell stories and answer questions. Analyzing A/B tests and field experiments; basics of visualizing data; regression. Laboratory fee. Prerequisites: STAT 1051 or STAT 1053 or STAT 1111 or STAT 1127.

SMPA 2173. Media Law. 3 Credits.

Freedom of the press. Changing laws of journalism and mass communication, including defamation, privacy, reporting access, obscenity and indecency, media ownership, intellectual property, advertising, and electronic communication.

SMPA 2177. Media History. 3 Credits.

American media from colonial times to the present, set against a backdrop of ongoing political, social, and economic developments. The development of press, radio, television, cable, satellite, and the Internet; government regulation and media relations; journalistic rights and responsibilities.

SMPA 3150. Journalism Ethics. 3 Credits.

Principles of media ethics; application to contemporary and developing issues and challenges in journalism. Prerequisites: SMPA 2111 or SMPA 2111W. Restricted to Junior standing.

SMPA 3193. Selected Topics in Journalism and Mass Communication Skills. 3-4 Credits.

Topics announced in Schedule of Classes. May be repeated for credit if the topic differs.

SMPA 3194. Selected Topics in Political Communication. 3-4 Credits.

Topic announced in the Schedule of Classes. May be repeated if the topic differs, but may only count once toward the political communication major.

SMPA 3195. Selected Topics in Journalism and Mass Communication. 3-4 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit if the topic differs.

SMPA 3195W. Selected Topics in Journalism and Mass Communication. 3-4 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit if the topic differs.

SMPA 3196. Independent Study. 1-3 Credits.

Students pursue a program of directed reading, research, and writing under the direction of a faculty advisor. Limited to seniors.

SMPA 3197. Internship. 1-3 Credits.

Students spend at least five hours per week per credit with an approved news organization, agency, or office under the general guidance of a faculty advisor. Guidelines are available in the SMPA office and online. May be taken P/NP only. Restricted to SMPA majors and minors in the junior and senior year. May be repeated for up to 6 credits.

SMPA 3230. Reporting in the Digital Age. 3 Credits.

Understanding the emerging tools and developing the technological skills needed to analyze data for news. Students learn to find reliable information through social media and other online tools, use spreadsheets as a reporting tool, and download data for analysis, to create graphics, and to report and write stories based on the analysis. Prerequisite: SMPA 2110. Laboratory fee.

SMPA 3232. Online Journalism Workshop. 4 Credits.

Capstone production experience for SMPA majors. Provides advanced journalism and multimedia production skills needed to produce and report for a news website. Prerequisite: SMPA 2110, SMPA 2112. Laboratory fee.

SMPA 3233. Photojournalism. 3 Credits.

Elements of effective news and feature photos, including study and evaluation of slides taken by students. Picture selection, cropping, captions. Student costs include film and developing. Laboratory fee.

SMPA 3234. Editing and Design for Print and Web. 3 Credits.

Editing, design, layout, and photo selection for newspapers, magazines, and web. Selecting and editing stories; writing headlines and photo captions; sizing and cropping graphic materials; laying out pages. Ethics of editing. Prerequisites: SMPA 2110W.

SMPA 3235W. Broadcast News Writing. 3 Credits.

Introduction to writing television news scripts based on actual events. Using workshop techniques, scripts are evaluated for content, structure, and use of words, pictures, and sound. Extensive writing and rewriting using streaming video from professional newscasts. Prerequisite: SMPA 2110.

SMPA 3236W. Broadcast News Reporting. 3 Credits.

Advanced techniques in television news reporting and editing. Students produce, shoot, and edit news packages by teaming up to report in the field. Prerequisite: SMPA 2110, SMPA 2112.

SMPA 3239. Television News Practicum. 4 Credits.

Capstone production experience for SMPA majors. Students report, produce, direct, and edit GW student news broadcast. Laboratory fee. Prerequisites: SMPA 3235 and SMPA 3236.

SMPA 3240W. Washington Reporting. 3 Credits.

Examination of reporting and writing techniques employed in news coverage of the national government, with an emphasis on serving a regional readership or audience. Using Washington as a laboratory, students focus on contemporary issues and news makers in the legislative and executive branches of government. Prerequisite: SMPA 2110.

SMPA 3241W. Campaign Reporting. 3 Credits.

Development of news gathering and writing skills needed for the coverage of political campaigns. Using in-class exercises and outside assignments, students acquire reporting and writing proficiency to illuminate how campaigns work and how politics affects the lives of citizens. Prerequisite: SMPA 2110.

SMPA 3242. Investigative Reporting. 3 Credits.

Hands-on intensive training in reporting and writing in-depth enterprise news stories that expose hidden problems or wrongdoing. Prerequisite: SMPA 2110.

SMPA 3243W. Feature Writing. 3 Credits.

Learn to frame, research, and write a wide range of feature articles, including profiles, interviews and personal memoirs. Weekly writing assignments and a major final project are discussed and scrutinized in a workshop setting. Prerequisite: SMPA 2110.

SMPA 3244W. Narrative Journalism. 3 Credits.

The narrative or story-telling tradition in journalism. Students experiment with narrative techniques in a series of written exercises and a final project. Enrollment limited to 15 students with preference given to upper-class SMPA majors and graduate students. Prerequisite: SMPA 2110.

SMPA 3245W. Editorial & Persuasive Writing. 3 Credits.

Techniques of editorial and column writing; editorial page and public affairs programming; function of commentary in a free press. Prerequisite: SMPA 2110.

SMPA 3246. Specialized Reporting. 3 Credits.

Advanced reporting in specialized fields, such as business, science, medicine. Topics and instructors vary each semester. Prerequisite: SMPA 2110.

SMPA 3246W. Specialized Reporting. 3 Credits.

Advanced reporting in specialized fields, such as business, science, medicine. Topics and instructors vary each semester. Prerequisite: SMPA 2110.

SMPA 3247. Documentary Production. 4 Credits.

Advanced techniques in writing, researching, producing, and editing long-form documentaries. Prerequisite: SMPA 2112 and SMPA 3479 or permission of instructor.

SMPA 3350. Public Diplomacy. 3 Credits.

The theory and practice of public diplomacy: informing, influencing, and establishing dialogue with international publics and institutions. A conceptual and historical examination of public diplomacy, current practices, and contemporary issues, including international information dissemination, educational and cultural exchange, and international broadcasting.

SMPA 3352. Principles of Public Relations. 3 Credits.

Principles, problems, ethics, and law of public relations for government, private concerns, educational and other public institutions.

SMPA 3353. Strategic Political Communication. 3 Credits.

Origins of strategic approaches to political communication; techniques. Use of strategic communication by individuals, groups, organizations, and governments in both domestic politics and policymaking and in the international system. Prerequisite: SMPA 2102 or permission of instructor.

SMPA 3354. Political Campaign Communication. 3 Credits.

Communication aspects of political campaigns for candidates and ballot issues. Examination of techniques and channels of communication, role of communication in campaign strategy, ethics and implications of campaign decision making.

SMPA 3355. Campaign Advertising. 3 Credits.

Introduction to the theory and practice of campaign advertising. Emphasis on televised political campaign spots, but a range of campaign advertising media are included: radio, direct mail, and the Internet. Prerequisite: SMPA 2112.

SMPA 3357W. Political Speech Writing. 3 Credits.

Theory and practice of public speaking in the context of mediated political communication. Students analyze, write, and give speeches.

SMPA 3358. Strategic Practicum. 3 Credits.

Working in small groups, students research and develop full-scale plans for hypothetical, reality-based, strategic communication campaigns that test and apply theoretical advances in the field. Prerequisite: SMPA 3353.

SMPA 3428. Media, Politics, and Government. 3 Credits.

The impact of mainstream media and online outlets on politics and the governing process. Topics include the role of social media, online advertising, comedy shows, and the changing ways that voters receive information. Same as PSC 2228.

SMPA 3450. Social Media. 3 Credits.

Practical and theoretical implications of social media; what it means to be social and how social media has changed how individuals interact and do business; birth and history of social media and why certain forms of social media flourish while others fail.

SMPA 3459. Language and Politics. 3 Credits.

Connections between language and the political world. Theory and practice of language in politics and the impact on the creation and consumption of politics.

SMPA 3460. Race, Media & Politics. 3 Credits.

Examination of the place of race in American society and politics, with attention to the role of media reporting in helping to shape understanding of race and racial matters, public opinion about race, and race and electoral politics.

SMPA 3461. Campaigns and Elections. 3 Credits.

The role of the news media in campaigns and elections. Offered in even-numbered years.

SMPA 3463. Media Bias. 3 Credits.

Exploration of empirical and theoretical understanding of media bias, its effects on power, and implications for democracy.

SMPA 3469. International Communication. 3 Credits.

A survey of theoretical themes in international communication and their practical applications: information production and circulation, global media industries, and cultures.

SMPA 3470. Comparative Media Systems. 3 Credits.

In-depth study of the developmental, regulatory, political, economic, and cultural dimensions of selected foreign communication systems.

SMPA 3471. Media in the Developing World. 3 Credits.

Contemporary views of media roles in developing nations. The role of the press and electronic media in economic, social, and national development, including media as agents of modernization, development journalism, and post-colonial responses to Western "cultural imperialism." Media and Islam; role of the Internet; and theories of media and globalization.

SMPA 3472. Media and Foreign Policy. 3 Credits.

The emerging role of news media in international affairs and diplomacy. Globalization of news media advances in digital information and communication technologies and consequences for the international system and diplomacy.

SMPA 3475. Media Management. 3 Credits.

Decision making, strategic planning, and daily operations of all types of media organizations. Sales strategies, promotion, and research.

SMPA 3476. Media, Technology, and Culture. 3 Credits.

Concepts, principles, and socio-political implications of new and changing media and related technologies. Focus on intersection of new technologies and the anthropology of everyday life, in particular self-governance, policy development, cultural rupture and cohesion, the tension between national security and individual privacy rights, and First Amendment issues.

SMPA 3477. Information Technology and Politics. 3 Credits.

The effect of new information technologies on the media, public discourse, and political life; ways in which politics has shaped the development of technology.

SMPA 3479. Documentary. 3 Credits.

Origins, genres, and analysis of documentary film. Power, reach, and conceptual frameworks of documentary filmmaking.

SMPA 3480. The Future of Journalism. 3 Credits.

Reasons behind the decline of traditional newspaper and broadcast journalism; the impact of the web and other digital tools on traditional journalism values; new business models for news.

SMPA 4180. Online Journalism Workshop. 4 Credits.

Capstone experience for journalism majors. Advanced journalism and multimedia production skills needed to produce and report for a news website. Prerequisites: SMPA 2112 and SMPA 2113 and SMPA 2111 or SMPA 2111W. Same as SMPA 3232.

SMPA 4181. Television News Workshop. 4 Credits.

Capstone production experience for SMPA majors. Students report, produce, direct, and edit GW student news broadcasts. Laboratory fee. Prerequisites: SMPA 2111 or SMPA 2111W, SMPA 2112, SMPA 2113, and SMPA 3236. Same as SMPA 3239.

SMPA 4182. Specialized Journalism Workshop. 4 Credits.

Capstone experience for journalism majors. In-depth study of advanced journalism skills or specific topic areas. Laboratory fee. Prerequisites: SMPA 2111 or SMPA 2111W, SMPA 2112, and SMPA 2113.

SMPA 4198. Special Honors Research Seminar. 3 Credits.

Open only to special honors candidates in political communication in the senior year. Prerequisite: SMPA 4199 and departmental approval.

SMPA 4199. Senior Seminar. 3 Credits.

Capstone course limited to SMPA majors.

SMPA 6201. Strategic Communications Skills. 1.5 Credit.

Specialized skills courses, such as writing for public affairs, video editing and production, political uses of social media, web development and strategy, speechwriting. Topics announced in the Schedule of Classes. May be repeated for credit, but up to a maximum of 6 credits.

SMPA 6202. Media Effects, Public Opinion, and Persuasion. 3 Credits.

Theories of media effects and persuasion. Institutional functions and individual effects of mediated communication. Impacts of different textual content and format on individual thinking and emotion; forces that shape content production.

SMPA 6203. Information, Technology, and Political Communication. 3 Credits.

Issues pertaining to the political uses of the Internet, social media, and other new media; the effect that new information technologies have on political life and the ways in which politics shape technology development.

SMPA 6204. Strategic Political Communication. 3 Credits.

Theory, techniques, and implications of strategic communication as employed by individuals, groups, organizations, and governments to advance their interests; applications to non-electoral politics and policymaking; use of political, psychological, sociological, and other processes; methodological considerations; domestic and international applications.

SMPA 6205. Media, Development, and Globalization. 3 Credits.

Theories of media and globalization. The changing role of communication media, including the Internet and other newer technologies as well as traditional books, film, newspapers, telephone, and satellite in establishing closer relationships and interdependencies among people, their cultures, and their organizations in various countries.

SMPA 6206. Advocacy Communication and Political Networks. 3 Credits.

Cross-disciplinary approaches to global changes in the nature of governance and collective action. The role of new technology, social movements, NGOs and transnational advocacy networks. Information campaigns and advocacy communication.

SMPA 6207. Political Persuasion and Public Opinion. 3 Credits.

Major theories and perspectives in public opinion and persuasion research. Information processing, psychological models applied to politics and media research (cognition, attitudes, resistance, heuristics), public opinion dynamics.

SMPA 6208. Politics and Public Relations Fundamentals. 3 Credits.

Basic knowledge of the skills to design, implement, and evaluate public relations activities. Case studies of public relations applied to politics. Techniques and tactics used by public relations professionals.

SMPA 6210. Media & Foreign Policy. 3 Credits.

The effects of U.S. media on U.S. and foreign governments, and of foreign media on the U.S.; effects of other countries' media on each other; the impact of the Internet, inexpensive global phoning, CNN, al Jazeera, and other newer technologies and networks on the stuff of international relations: diplomacy, military operations, trade negotiations.

SMPA 6220. Strategic Practicum. 3 Credits.

Design of strategy for an information and influence campaign. Research on issues and actors, identification of critical decision-making points and key constituencies, development of communication strategies more likely to achieve stated objectives of a campaign. Prerequisite: SMPA 6204. For students doing a strategic communication capstone project, this course replaces SMPA 6297.

SMPA 6230. Principles and Methods of Documentary Filmmaking. 6 Credits.

Analytical and practical exploration of the elements of documentary filmmaking. The genres of nonfiction filmmaking; fundamentals of film conceptualization, documentary screenwriting, story structure, and production theory; and basic practical elements of production. Admission by permission of instructor.

SMPA 6231. Documentary Filmmaking Practicum. 3 Credits.

Intensive practical experience in documentary film production. Students produce a 10-15-minute documentary film on a selected topic. Emphasis on major markers in film production: treatment and script writing, location shooting, Final Cut Pro editing, graphics, music, and final sound mix. Prerequisite: SMPA 6230 and permission of instructor.

SMPA 6241. Research Design. 3 Credits.

Design, applications, and limitations of quantitative research as applied to the field of media and strategic communication. Framing of research questions, identification of variables and formulation of hypotheses, measurement, sampling, data gathering techniques, and preparation of research reports. Brief exposure to qualitative research.

SMPA 6242. Analytics and Data Analysis for Strategic Communication. 3 Credits.

Familiarity with major data analytic and analysis techniques used by strategic communication practitioners. Topics covered include basic statistical analysis, multivariate regression, experiments, focus groups, and survey research. Prerequisites: an undergraduate statistics course.

SMPA 6250. Topics in Media Processes and Institutions. 3 Credits.

Topics address such issues as the history of media content, institutions, and process; impact of changing communication technology on culture; history and development of mass-produced culture; and professional ideology and practice of journalism. May be repeated for credit provided the topic differs.

SMPA 6270. Topics. 3 Credits.

Topics explore such areas as social theories of public opinion and mass media's response; and the role of mass media in constructing social perceptions of the scientific process and its relationship to cultural and material life.

SMPA 6272. Media Bias, Power, and Democracy. 3 Credits.

Consideration of the available scholarly evidence in order to develop a more sophisticated empirical and theoretical understanding of what constitutes media bias. How do we recognize and measure bias? Are there patterns in decisions about news coverage that indicate bias? Which political parties and economic interests benefit from patterns of news coverage?.

SMPA 6274. Media and War. 3 Credits.

Historic and contemporary examination of the media’s role in wartime. Topics include covering war, the role of the media in generating support for foreign intervention, propaganda, effects of war coverage on public opinion, media and genocide, and public diplomacy. Ethical, philosophical and political implications of the media’s role.

SMPA 6275. Public Diplomacy. 3 Credits.

The theory and practice of public diplomacy: informing, influencing, and establishing dialogue with international publics and institutions. A conceptual and historical examination of public diplomacy, current practices, and contemporary issues, including international information dissemination, educational and cultural exchange, and international broadcasting.

SMPA 6295. Internship. 3 Credits.

Students identify a suitable employer for an internship relevant to program themes and goals. Students must consult with the director of graduate studies before registering. Restricted to Permission of director of graduate studies required.

SMPA 6296. Directed Readings and Research. 3 Credits.

Independent research with SMPA faculty member. Must be approved in advance by supervising professor and director of graduate studies.

SMPA 6297. Capstone Project. 3 Credits.

SMPA 6298. Capstone Project. 3 Credits.

SMPA 6998. Thesis Research. 3 Credits.

SMPA 6999. Thesis Research. 3 Credits.

**BACHELOR OF ARTS WITH A
MAJOR IN JOURNALISM AND
MASS COMMUNICATION
REQUIREMENTS**

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Required courses (34 credits):

PSC 1002	Introduction to American Politics and Government
or PSC 1002W	Intro-American Politics & Govt

STAT 1053	Introduction to Statistics in Social Science
SMPA 2101	Journalism: Theory & Practice
SMPA 2110W	Introduction to News Writing and Reporting (minimum grade of B required)
SMPA 2111W	Advanced News Reporting
SMPA 2112	Digital Media I: Introduction to Video Production
SMPA 2113	Digital Media II: Introduction to Web Production and Social Media
SMPA 2151	Research Methods
SMPA 2152	Data Analysis for Journalism and Political Communication
SMPA 2173	Media Law
SMPA 3150	Journalism Ethics

One required advanced writing/reporting course (3 credits) from the following:

SMPA 3230	Reporting in the Digital Age
SMPA 3235W	Broadcast News Writing
SMPA 3242	Investigative Reporting

Five additional courses (15-20 credits) from the advanced writing/reporting courses listed above or from the following:

SMPA 2120	Public Opinion
SMPA 2177	Media History
SMPA 3193	Selected Topics in Journalism and Mass Communication Skills
SMPA 3195	Selected Topics in Journalism and Mass Communication
SMPA 3196	Independent Study
SMPA 3197	Internship (Only one, three-credit internship can count toward the major)
SMPA 3233	Photojournalism
SMPA 3234	Editing and Design
SMPA 3236W	Broadcast News Reporting
SMPA 3240W	Washington Reporting
SMPA 3241W	Campaign Reporting

SMPA 3243W	Feature Writing
SMPA 3244W	Narrative Journalism
SMPA 3245W	Editorial & Persuasive Writing
SMPA 3246	Specialized Reporting
SMPA 3247	Documentary Production
SMPA 3428	Media, Politics & Government
SMPA 3450	Social Media
SMPA 3460	Race, Media & Politics
SMPA 3463	Media Bias
SMPA 3469	International Communication
SMPA 3470	Comparative Media Systems
SMPA 3471	Media in the Developing World
SMPA 3472	Media and Foreign Policy
SMPA 3475	Media Management
SMPA 3476	Media, Technology, and Culture
SMPA 3477	Information Technology and Politics
SMPA 3479	Documentary
SMPA 3480	The Future of Journalism
SMPA 4198	Special Honors Research Seminar
One capstone course (4 credits) from the following:	
SMPA 4180	Online Journalism Workshop
SMPA 4181	Television News Workshop
SMPA 4182	Specialized Journalism Workshop

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, students must have attained a 3.5 GPA in all courses completed at GW and in all courses required for the major. Students intending to apply for Special Honors must consult their advisor at the start of the senior year. Application must be made by the mid-point of the student's final semester (October 15 or March 15), and must include a letter of application and a portfolio of published or broadcast work. The journalism and mass communication faculty will evaluate the work on the basis of professional standards as outlined by the department. Students interested in pursuing

Special Honors through writing a research thesis should consult their advisor.

BACHELOR OF ARTS WITH A MAJOR IN POLITICAL COMMUNICATION

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Required courses (30 credits):

PSC 1001	Introduction to Comparative Politics
or PSC 1003	Introduction to International Politics

PSC 1002	Introduction to American Politics and Government
----------	--

STAT 1053	Introduction to Statistics in Social Science
-----------	--

SMPA 2102	Introduction to Political Communication (which requires a minimum grade of C to remain in the major)
-----------	--

SMPA 2110W	Introduction to News Writing and Reporting
------------	--

SMPA 2112	Digital Media I: Introduction to Video Production
-----------	---

SMPA 2113	Digital Media II: Introduction to Web Production and Social Media
-----------	---

SMPA 2151	Research Methods
-----------	------------------

SMPA 2152	Data Analysis for Journalism and Political Communication
-----------	--

SMPA 4199	Senior Seminar
-----------	----------------

Seven courses (21 to 28 credits) from the following:

SMPA 2173	Media Law
-----------	-----------

SMPA 3194	Selected Topics in Political Communication (May be repeated once for credit)
-----------	--

SMPA 3196	Independent Study
-----------	-------------------

SMPA 3197	Internship (Only one, three-credit internship may be taken for credit toward the major)
-----------	---

SMPA 3245W	Editorial & Persuasive Writing
------------	--------------------------------

SMPA 3240W	Washington Reporting
SMPA 3241W	Campaign Reporting
SMPA 3350	Public Diplomacy
SMPA 3352	Principles of Public Relations
SMPA 3353	Strategic Political Communication
SMPA 3354	Political Campaign Communication
SMPA 3355	Campaign Advertising
SMPA 3357	Political Speech Writing
SMPA 3358	Strategic Practicum
SMPA 3428	Media, Politics & Government
SMPA 3450	Social Media
SMPA 3459	Language and Politics
SMPA 3460	Race, Media & Politics
SMPA 3461	Campaigns and Elections
SMPA 3463	Media Bias
SMPA 3469	International Communication
SMPA 3470	Comparative Media Systems
SMPA 3471	Media in the Developing World
SMPA 3472	Media and Foreign Policy
SMPA 3476	Media, Technology, and Culture
SMPA 3477	Information Technology and Politics
SMPA 4198	Special Honors Research Seminar
Two political science (PSC) courses (6 credits) numbered 2000 or above	

Students must achieve specified grades in some courses. Consult the School of Media and Public Affairs (<http://smpa.gwu.edu>) for particular grade and course sequencing requirements.

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, students with a 3.7 GPA in all courses completed at GW and in all courses required for the major may declare for Special Honors in political communication at the beginning of the senior year. Students take SMPA 4199 Senior Seminar in the first semester of the senior year and SMPA 4198 Special Honors Research Seminar in the second semester. To

achieve Special Honors, the student must maintain the required GPA and present a successful oral defense of a research paper prepared for the Honors Research Seminar before a committee that includes the seminar instructor and two other faculty members nominated by the student and approved by the seminar instructor.

MINOR IN JOURNALISM AND MASS COMMUNICATION

REQUIREMENTS

Required

SMPA 1050	Media in a Free Society
SMPA 2110W	Introduction to News Writing and Reporting
9 credits from the following:	
SMPA 2111W	Advanced News Reporting
SMPA 3230	Reporting in the Digital Age
SMPA 3232	Online Journalism Workshop
SMPA 3233	Photojournalism
SMPA 3234	Editing and Design
SMPA 3235	Broadcast News Writing
SMPA 3235W	Broadcast News Writing
SMPA 3236W	Broadcast News Reporting
SMPA 3237W	Broadcast News Studio Production
SMPA 3238	Television Magazine
SMPA 3239	Television News Practicum
SMPA 3240W	Washington Reporting
SMPA 3241W	Campaign Reporting
SMPA 3242	Investigative Reporting
SMPA 3243W	Feature Writing
SMPA 3244W	Narrative Journalism
SMPA 3245W	Editorial & Persuasive Writing
SMPA 3246	Specialized Reporting
SMPA 3246W	Specialized Reporting
SMPA 3247	Documentary Production

SMPA 3193 Selected Topics in Journalism and Mass Communication Skills

SMPA 3197 Internship (Students are limited to 3 credits of SMPA 3197 toward the minor)

3 credits from the following:

SMPA 2173 Media Law

SMPA 2177 Media History

SMPA 3428 Media, Politics & Government

SMPA 3450 Social Media

SMPA 3469 International Communication

SMPA 3470 Comparative Media Systems

SMPA 3471 Media in the Developing World

SMPA 3472 Media and Foreign Policy

SMPA 3474 Electronic Media Policy

SMPA 3475 Media Management

SMPA 3476 Media, Technology, and Culture

SMPA 3479 Documentary

SMPA 3480 The Future of Journalism

SMPA 3195 Selected Topics in Journalism and Mass Communication

COMBINED PROGRAMS

REQUIREMENTS

Combined Bachelor of Arts in an SMPA major and Master of Arts in media and strategic communication

Interested students should consult their advisor and the director of graduate studies and apply to the dual degree program during the second semester of their junior year. Visit the program website (<http://smpa.gwu.edu/combined-degree-programs>) for additional information.

Combined Bachelor of Arts in an SMPA major and Master of Professional Studies in the field of political management

Interested students should consult their advisor and apply to the dual degree program during the second semester of their junior year. Visit the program website (<http://smpa.gwu.edu/combined-degree-programs>) for additional information.

MASTER OF ARTS IN THE FIELD OF MEDIA AND STRATEGIC COMMUNICATION

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Prerequisite: an undergraduate degree in a related field.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

Course List

Required: completion of 36 credits as follows

Core courses (15 credits)

(On the basis of academic or professional preparation, students may petition for the waiving of any of these courses with substitution of another approved course)

SMPA 6202 Media Effects, Public Opinion, and Persuasion

SMPA 6204 Strategic Political Communication

SMPA 6208 Politics and Public Relations Fundamentals

SMPA 6241 Research Design

SMPA 6242 Analytics and Data Analysis for Strategic Communication

Strategic communications skills courses (3 credits)

SMPA 6201 Strategic Communications Skills (these 1.5 credit courses can be repeated with different topics to reach the required three credits. Additional 6201 courses can be taken for elective credit.)

Elective courses (12 credits)

Students complete an additional four courses, chosen with approval of the advisor. In all cases, the burden will be on students and advisors to choose elective courses that form a coherent set. Students doing the strategic communication capstone option may not count SMPA 6220 toward electives. Students may take an additional 3 credits of SMPA 6201 toward their elective courses.

Capstone courses (6 credits)

Students complete 6 additional credits in one of the following ways, as approved by the advisor:

(1) writing a research thesis

SMPA 6998	Thesis Research
-----------	-----------------

SMPA 6999	Thesis Research
-----------	-----------------

(2) completing a supervised in-depth media project

SMPA 6297	Capstone Project
-----------	------------------

SMPA 6298	Capstone Project
-----------	------------------

or (3) writing a supervised strategic communication project addressed to solving a client's communication-related problem

SMPA 6220	Strategic Practicum
-----------	---------------------

SMPA 6298	Capstone Project
-----------	------------------

Students should consult with their advisor on their plan for the capstone in the second semester of the graduate program.

With permission of the advisor, a limited number of upper-division undergraduate courses may be taken for graduate credit; additional course work is required.

A graduate certificate in documentary film making is offered by the School of Media and Public Affairs. Contact the School of Media and Public Affairs (<http://smpa.gwu.edu>) for information.

MUSEUM STUDIES

Columbian College of Arts and Sciences offers an interdepartmental program leading to the degree of Master of Arts in the field of museum studies. The program is designed for those who seek a deepening of their primary academic interest along with training in the broad range of talents required in the successful operation of museums. The goal of the program is to produce graduates who are prepared to assume museum positions that require both scholarship and functional skills.

In preparing the academic core portion of the program of study, students draw on courses offered by the appropriate academic departments. Courses that pertain to the museum studies portion of the program are described below and are supplemented by additional courses offered by other departments, such as American Studies, Anthropology, History, Educational Leadership, Fine Arts and Art History, Interior Architecture and Design, and Theatre and Dance.

Applicants to the M.A. program must have an undergraduate major, or its equivalent, relevant to the proposed academic core and must be able to demonstrate a sufficient breadth of academic preparation to support the proposed graduate course of study. Prior museum training is strongly recommended.

Students whose career interests are primarily in museum education should refer to the Master of Arts in Teaching (p. 548) under the Graduate School of Education and Human Development.

Graduate certificates in museum studies, exhibit design, and museum collections management and care are offered as well.

GRADUATE

Master's program

- Master of Arts in the field of museum studies (p. 278)

CERTIFICATE

- Graduate certificate in museum studies
- Graduate certificate in exhibit design
- Graduate certificate in museum collections management and care (p. 279)

FACULTY

Committee on Museum Studies M. Atkin, J. Blomster, B. Brennan, M. Coughlin, M. Morris, K. Rice (*Director*), L. Schiavo, J. Wetenhall, A. Wong

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

MSTD 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the schedule of classes for more details. Restricted to First-year students in CCAS.

MSTD 6101. Museum Management. 3 Credits.

Overall operation of the museum: legal status of the museum and its obligations to the public; governance, staffing, policymaking as a nonprofit organization. Theory applied to practical situations.

MSTD 6102. NonProfit Fiscal Management. 3 Credits.

Basic concepts of general accounting; fund accounting for nonprofit organizations; budgets and budget systems; use of the budget as a management tool; long-range planning; income sources; other financial management concepts.

MSTD 6103. Leading Change. 3 Credits.

Leadership challenges and styles as they relate to organizational change efforts. Case studies of museums undergoing change; best practices in leadership at all levels of the museum.

MSTD 6104. Managing People and Projects. 3 Credits.

Organizational development and modern management concepts as applied to museums. Managing people in the organization; the importance of project management systems to museum administration.

MSTD 6201. Museum Collections. 3 Credits.

Establishing collections policies; laws, regulations, conventions, and codes that affect acquisitions, deaccessions, loans, and collection care; accountability; access problems.

MSTD 6202. Museum Collections Management. 3 Credits.

The implementation of collections policies: establishing and managing collections, management procedures and systems, documentation of collections, records preservation, collections access and storage, handling, packing and shipping, and inventory control.

MSTD 6203. Preventive Conservation Concepts. 3 Credits.

Historical development of preventive conservation in museums, conservation ethics, team approaches to conservation, interactions of various materials with agents of deterioration. Basics of materials testing, preparation of condition reports, choosing museum storage and exhibition materials, and risk assessment. Same as ANTH 6203 and AH 6286.

MSTD 6204. Preventive Conservation Techniques. 3 Credits.

Practical applications of preventive conservation of materials, monitoring environmental conditions, conducting risk assessments, evaluation of exhibit and storage areas; developing plans, policies, and procedures for collections care; grant proposal preparation for collections care initiatives. Same as ANTH 6204 and AH 6287.

MSTD 6301. Museum Exhibitions: Curatorial Research. 3 Credits.

Museum research from a curatorial point of view, with emphasis on exhibit theory and practice. Research techniques, information sources, and script production.

MSTD 6302. Museum Exhibition Design. 3 Credits.

The processes of research, conceptualization, planning, and evaluation from a designer's point of view. Focus is on individual projects with some group collaboration. The designer's vocabulary, visual thinking, design documentation, and specifications.

MSTD 6303. Advanced Exhibition Design. 3 Credits.

The processes of research, conceptualization, planning, and evaluation from a designer's point of view. Focus is on individual projects with some group collaboration. The designer's vocabulary, visual thinking, design documentation, and specifications.

MSTD 6304. Museum Exhibit Development. 3 Credits.

Research techniques; information sources; script production from a content perspective.

MSTD 6305. Visitor Perspectives: Museum Evaluation in Exhibitions. 3 Credits.

Theory and practice of museum evaluation, especially as related to exhibition development. (Same as EDUC 6706).

MSTD 6501. Museum Internship. 1-3 Credits.

Individual work experience in museums of the Washington area and possibly elsewhere. Each student should make arrangements with the Museum Studies Program staff. Museum internships are supervised by one or more members of the cooperating museum staff in the areas of museum management, object care and conservation, and exhibiting.

MSTD 6502. Directed Research. 3 Credits.

Individual research on special topics in the museum field. Topics must be approved by the director of the Museum Studies Program. May be repeated for credit.

MSTD 6601. Special Topics. 3 Credits.

May be repeated for credit provided the topic differs.

MSTD 6701. Museum Hist&Theory. 3 Credits.

Museums viewed from historical, philosophical, and practical perspectives. Examination and comparison of types of collecting organizations. Analysis of contemporary studies on the status of museums and their public programs.

MSTD 6702. Museums and the Public: Exhibiting Culture. 3 Credits.

An introduction to the wide range of problems, possibilities, and choices that are part of the cultural landscape of how museums interact with their audiences through public programs. (Same as ANTH 6202).

MASTER OF ARTS IN THE FIELD OF MUSEUM STUDIES

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

Required: a minimum of 42 credits

Required courses:

MSTD 6101	Museum Management
MSTD 6201	Museum Collections

At least 12 credits of course work must be in an academic core discipline such as American studies, anthropology, biological sciences, hominid paleobiology, history, or an appropriate interdisciplinary combination. (A formal concentration in art history is possible only in the Department of Fine Arts and Art History.)

At least 15 credits of course work must be in museum studies courses that concern such functions as museum administration, collections management, exhibiting, and object care and conservation.

At least 6 credits must be in museum internships in the Washington area or elsewhere.

The student must pass a comprehensive examination based on course work and submit a research paper.

GRADUATE CERTIFICATE IN EXHIBIT DESIGN

The 18-credit graduate certificate in exhibit design is offered by the Museum Studies Program in collaboration with the Department of Theatre and Dance and the Interior Architecture and Design Program. Additional information can be obtained from the Museum Studies Program (<http://museumstudies.columbian.gwu.edu>).

REQUIREMENTS

Required:

18 credits from the following

IAD 6205	Interior Materials
IAD 6210	Sketching Architecture and Interiors
MSTD 6302	Museum Exhibition Design
MSTD 6203	Preventive Conservation Concepts
MSTD 6204	Preventive Conservation Techniques
MSTD 6501	Museum Internship
TRDA 1330	Basics of Production Design
TRDA 6331	Intermediate Lighting Design
TRDA 6335	Intermediate Scene Design
TRDA 6340	Period Styles
TRDA 6344	Production Drafting
TRDA 6348	Techniques in Design Presentation

GRADUATE CERTIFICATE IN MUSEUM COLLECTIONS MANAGEMENT AND CARE

The 12-credit graduate certificate in museum collections management and care is offered in a distance learning format to qualified domestic applicants who have museum experience and staff-level access to a museum and its collection. Additional information can be obtained from the Museum Studies Program (<http://museumstudies.columbian.gwu.edu>).

REQUIREMENTS

Required:

MSTD 6201	Introduction to Museum Collections
MSTD 6202	Museum Collections Management
MSTD 6203	Preventive Conservation Concepts
MSTD 6204	Preventive Conservation Techniques

GRADUATE CERTIFICATE IN MUSEUM STUDIES

The 18-credit graduate certificate in museum studies is primarily for international museum professionals who wish to study museum administration, collections management, or exhibition development in the United States; this certificate is also available to U.S. students who hold at least a master's degree in an appropriate subject.

REQUIREMENTS

Required:

12 credits from the following

MSTD 6101	Museum Management
MSTD 6102	NonProfit Fiscal Management
MSTD 6103	Leading Change
MSTD 6104	Managing People and Projects
MSTD 6201	Introduction to Museum Collections
MSTD 6202	Museum Collections Management
MSTD 6203	Preventive Conservation Concepts
MSTD 6204	Preventive Conservation Techniques
MSTD 6301	Museum Exhibitions: Curatorial Research
MSTD 6302	Museum Exhibition Design

MSTD 6303	Advanced Exhibition Design
MSTD 6304	MuseumExhibitDevelopment
MSTD 6305	Visitor Perspectives: Museum Evaluation in Exhibitions
MSTD 6701	MuseumHist&Theory
MSTD 6702	Museums & the Public:Exhibiting Culture
MSTD 6710	Museums and Technology
Internship requirement:	
MSTD 6501	Museum Internship (taken for 6 credits)

MUSIC

The music program within the Columbian College of Arts and Sciences offers a broad base for understanding music as an art form and as a social, economic, and political practice. All students, regardless of their majors, may perform with vocal and instrumental jazz groups, orchestra, choruses, bands, opera productions, chamber music groups, and musical theater.

UNDERGRADUATE

Bachelor's program

- Bachelor of Arts with a major in music (p. 284)

Minors

- Minor in music (p. 285)
- Minor in jazz studies (p. 285)

FACULTY

Associate Professors K. Ahlquist, D. Boyce (*Chair*), B. Fritz

Assistant Professors R. Baker, E. Montague

Adjunct Professors J. Albertson (*Guitar*), R. Birch (*Trumpet*), F.B. Conlon (*Piano*), B. Dahlman (*Piano*), M. Findley (*Violin*), P. Fraize (*Jazz Performance/Saxophone*), S. Hilmy (*Electronic Studio*), T. Konstantinov (*Piano*), J.D. Levy (*Jazz*), C. Lornell, M. Peris (*Piano*), M. Scarlett (*Voice*)

Adjunct Instructor G. Becker (*Choral*)

Professorial Lecturers L. Barnet (*Cello*), G. Cho (*Piano*), N. D'Alimonte (*Orchestra*), M. Duhagon (*Classical Guitar*), G. Galvin (*Voice*), L. Helgert, C. Humphries (*Voice*), J. Krash (*Literature*), G. Luce (*Viola*), P. O'Donnell (*Piano*), M. Orlando (*Piano*), J. Ozment (*Jazz Piano*), B. Rice, B. Richardson (*Cello*), R. Shapiro (*Violin*), N. Tavani (*Violin*), M. Von Villas (*Opera*), J. Watson (*Piano*)

Lecturers H. Burney (*Jazz Bass*), J. Connell (*Percussion*), G. Corella (*Tuba*), A. Crockett (*Voice*), E. Dirksen (*Bassoon*), E. Drennen (*Jazz Violin*), S.M. Fearing (*French Horn*), L. Ferguson (*Clarinet*), E. Field (*Violin*), J. Gascho (*Harpichord*), E. Guenther (*Pipe Organ*), D. Jones (*Clarinet*), J. Koczela (*Bass*), C. Stabile-Libelo (*Oboe*), A. Lucini (*Latin Percussion*), R. Ocampo (*Voice*), A. Reiff (*Voice*), D. Sciannella (*Trombone*), B.R. Seidman (*Harp*), S. Stang (*Flute*), U. Wassertzug (*Viola*), S. Wellman (*Voice*), T. Wilson (*Jazz Trumpet*)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Performance Study

Performance study courses are offered both fall and spring, and may be repeated for credit. Music majors and minors, Presidential Arts Scholarship (<http://departments.columbian.gwu.edu/music/scholarships>) students, and other students with skills or potential appropriate to the department's select ensembles are eligible for private lessons. Eligibility and placement for students new to private performance study are determined at a placement fair held at the beginning of each semester. For courses numbered in the 1500s, students may not register in the same semester for both the 1- and 2-credit course in the same instrument or in voice. MUS 1051 through MUS 1095 Vocal Theater Workshop and MUS 1151 Conducting do not include individual lessons and do not require a supplementary fee. All other performance study courses include individual lessons and require a supplementary fee. Supplementary fees for private performance courses are nonrefundable after the first two weeks of the fall and spring semesters; consult the Music Department (<http://departments.columbian.gwu.edu/music>) for details. The supplementary fee is waived during the fall and spring semesters for full-time music majors and minors and for music Presidential Scholars in the Arts (<http://departments.columbian.gwu.edu/music/scholarships>).

Required practice: a minimum of three hours a week for 1-credit courses and six hours a week for 2-credit courses.

MUS 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the Schedule of Classes for more details. Restricted to First-year students in CCAS.

MUS 1052. Class Piano for Music Majors and Minors. 1 Credit.

Study of the rudiments of musical notation and piano playing in a small classroom setting. Open to majors and minors who need basic keyboard facility.

MUS 1061. Instrumental Ensemble. 1 Credit.

Chamber ensemble groups are approved by audition. Section numbers are .11 guitar ensemble, .12 percussion ensemble, .13 jazz combo, .14 keyboard ensemble, .15 string ensemble, .16 woodwind ensemble, .17 brass ensemble, .18 Baroque ensemble, .19 Latin band, .20 blues band.

MUS 1071. Jazz Band. 1 Credit.

Preparation and performance of classic and contemporary "big band" literature. Prerequisite: audition before director.

MUS 1081. Orchestra. 0-1 Credits.

Preparation and performance of orchestral literature. Prerequisite: audition before director.

MUS 1083. University Band. 0-1 Credits.

Consisting of two ensembles: The University Symphonic Band and GW Colonial Brass. See schedule of classes for section information. Audition before director required.

MUS 1091. University Singers. 0-1 Credits.

Preparation and performance of choral literature. Prerequisite: audition before director. Section .10 is University Singers; Section .11 is Chamber Choir.

MUS 1093. University Singers/Chamber Choir. 1 Credit.

Preparation and performance of choral literature. Section .10 is University Singers; Section .11 is Chamber Choir. Prerequisite: audition before director.

MUS 1095. Vocal Theater Workshop. 1 Credit.

Development of body awareness for the stage, acting improvisations, and character development. Scenes chosen from the opera, operetta, and musical theater repertoire. Musical coaching, use of makeup, and audition preparation.

MUS 1101. Elements of Music Theory. 2 Credits.

Notation, scales, keys, intervals, terms, rhythms, and chord structure and progression. Introduction to music literature, with emphasis on rudimentary aural analysis.

MUS 1102. Comprehensive Musicianship I. 3 Credits.

Aural and keyboard skills development through dictation, sight singing, and performance and improvisation at the keyboard. Prerequisite: MUS 1101, MUS 1051.

MUS 1103. Music in the Western World. 3 Credits.

Introductory history of musical styles, related to listening; study of music materials and media. Not open to music majors.

MUS 1104. Topics in Music. 3 Credits.

A rotating set of classes; topics may include: American music, a composer, the opera, and musical life in Washington, D.C.

MUS 1105. Introduction to Musical Thought and Practice. 3 Credits.

Introduction to concepts, methods, and practices that guide the study and performance of music. Old and new paradigms of musical thought are subject to discussion and critical investigation.

MUS 1106. Introduction to Musical Performance and Experience. 3 Credits.

Through discussion, writing, and performance, students engage with issues such as the putative transcendent character of music, the false divisions between interpretation, improvisation, and composition, and the impact of modernity on expressive culture. Placing their own processes of musical decision making within these conceptual frames allows students to interrogate and develop their performative and social selves. Restricted to Register for this course in the Music department.

MUS 1107. Music of the World. 3 Credits.

Introduction to music in culture through comparative study of music from a variety of cultures worldwide.

MUS 1108. History of Jazz. 3 Credits.

Introduction to the styles, composers, and performers of jazz music from its origins to the present.

MUS 1151. Conducting. 3 Credits.

Technique of conducting, score reading, rehearsal procedures, analysis, and interpretation of selected musical literature; practice in conducting. Prerequisite: MUS 2101.

MUS 1511. Piano. 1 Credit.
MUS 1512. Piano. 2 Credits.
MUS 1513. Voice. 1 Credit.
MUS 1514. Voice. 2 Credits.
MUS 1515. Organ. 1 Credit.
MUS 1516. Organ. 2 Credits.
MUS 1517. Classical Guitar. 1 Credit.
MUS 1518. Classical Guitar. 2 Credits.
MUS 1519. Violin. 1 Credit.
MUS 1520. Violin. 2 Credits.
MUS 1521. Viola. 1 Credit.
MUS 1522. Viola. 2 Credits.
MUS 1523. Cello. 1 Credit.
MUS 1524. Cello. 2 Credits.
MUS 1525. Bass. 1 Credit.
MUS 1526. Bass. 2 Credits.
MUS 1527. Flute. 1 Credit.
MUS 1528. Flute. 2 Credits.
MUS 1529. Recorder. 1 Credit.
MUS 1530. Recorder. 2 Credits.
MUS 1531. Oboe. 1 Credit.
MUS 1532. Oboe. 2 Credits.
MUS 1533. Clarinet. 1 Credit.
MUS 1534. Clarinet. 2 Credits.
MUS 1535. Saxophone. 1 Credit.
MUS 1536. Saxophone. 2 Credits.
MUS 1537. Bassoon. 1 Credit.
MUS 1538. Bassoon. 2 Credits.
MUS 1539. French Horn. 1 Credit.
MUS 1540. French Horn. 2 Credits.
MUS 1541. Trumpet. 1 Credit.
MUS 1542. Trumpet. 2 Credits.
MUS 1543. Trombone. 1 Credit.
MUS 1544. Trombone. 2 Credits.
MUS 1545. Tuba. 1 Credit.
MUS 1546. Tuba. 2 Credits.
MUS 1547. Harp. 1 Credit.
MUS 1548. Harp. 2 Credits.
MUS 1549. Percussion. 1 Credit.
MUS 1550. Percussion. 2 Credits.
MUS 1555. Lute. 1 Credit.
MUS 1556. Lute. 2 Credits.
MUS 1557. Harpsichord. 1 Credit.
MUS 1558. Harpsichord. 2 Credits.

MUS 1571. Jazz Perf. Tech. 1 Credit.
The George Washington University 2015-16 Academic Bulletin
MUS 1572. Jazz Performance Techniques. 2 Credits.

MUS 2012. Piano. 2 Credits.
Prerequisite: Open by examination.

MUS 2014. Voice. 2 Credits.
Prerequisite: Open by examination.

MUS 2016. Organ. 2 Credits.
Prerequisite: Open by examination.

MUS 2018. Classical Guitar. 2 Credits.
Prerequisite: Open by examination.

MUS 2020. Violin. 2 Credits.
Prerequisite: Open by examination.

MUS 2022. Viola. 2 Credits.
Prerequisite: Open by examination.

MUS 2024. Cello. 2 Credits.
Prerequisite: Open by examination.

MUS 2026. Bass. 2 Credits.
Prerequisite: Open by examination.

MUS 2028. Flute. 2 Credits.
Prerequisite: Open by examination.

MUS 2030. Recorder. 2 Credits.
Prerequisite: Open by examination.

MUS 2032. Oboe. 2 Credits.
Prerequisite: Open by examination.

MUS 2034. Clarinet. 2 Credits.
Prerequisite: Open by examination.

MUS 2036. Saxophone. 2 Credits.
Prerequisite: Open by examination.

MUS 2038. Bassoon. 2 Credits.
Prerequisite: Open by examination.

MUS 2040. French Horn. 2 Credits.
Prerequisite: Open by examination.

MUS 2042. Trumpet. 2 Credits.
Prerequisite: Open by examination.

MUS 2044. Trombone. 2 Credits.
Prerequisite: Open by examination.

MUS 2046. Tuba. 2 Credits.
Prerequisite: Open by examination.

MUS 2048. Harp. 2 Credits.
Prerequisite: Open by examination.

MUS 2050. Percussion. 2 Credits.
Prerequisite: Open by examination.

MUS 2058. Harpsichord. 2 Credits.
Prerequisite: Open by examination.

MUS 2071. Jazz Performance Techniques. 1-3 Credits.

MUS 2072. Jazz Performance Techniques. 2 Credits.
Prerequisite: Open by examination.

MUS 2101. Harmony. 3 Credits.
Study of tonal harmonic practice from Baroque, Classical, Romantic, and 20th-century repertoires. Concurrent registration in the weekly keyboard lab is required.
Prerequisite: MUS 1102.

MUS 2102. Comprehensive Musicianship II. 3 Credits.

Aural and keyboard skills development through dictation, sight singing, and performance and improvisation at the keyboard. Prerequisite: MUS 2101.

MUS 2105. Introduction to Ethnomusicology. 3 Credits.

Models of understanding music as a cultural endeavor. Application and critique of models in the design and execution of student independent field research. Same as ANTH 2505. Prerequisite: MUS 1101 or ANTH 1002 or ANTH 1004 or permission of instructor.

MUS 2105W. Introduction to Ethnomusicology. 3 Credits.

Models of understanding music as a cultural endeavor. Application and critique of models in the design and execution of student independent field research. Same as ANTH 2505. Prerequisite: MUS 1101 or ANTH 1002 or ANTH 1004 or permission of instructor.

MUS 2106. Music History III: 20th-Century Art Traditions. 3 Credits.

Western musical traditions and styles since Romanticism and approaches to music as art in contemporary society. Prerequisite: MUS 1101.

MUS 2122. Music in the US. 3 Credits.

History of music and musical life in the United States, emphasizing relationships among traditions of diverse origin. Prerequisite: MUS 1101 or permission of instructor.

MUS 2122W. Music in the US. 3 Credits.

History of music and musical life in the United States, emphasizing relationships among traditions of diverse origin. Prerequisite: MUS 1101 or permission of instructor.

MUS 2123. Musical Cultures of Black Americans. 3 Credits.

Musical genres and styles developed by African Americans since Reconstruction in their historical and cultural contexts. Emphasis on black musical contributions to the cultural life of Washington, D.C.

MUS 2134. Composition. 3 Credits.

Introduction to 21st-century compositional practice; concepts of post-tonal analysis; emphasis on style studies and original student works. May be repeated for credit. Prerequisite: MUS 2101.

MUS 2140. Pedagogy. 3 Credits.

Principles, materials, and methods of teaching in selected areas. Prerequisite: permission of instructor.

MUS 2173. Comprehensive Musicianship for Jazz. 2 Credits.

Aural and keyboard skills development through dictation, sight singing, and performance and improvisation at the keyboard, with emphasis given to skills associated with jazz performance. Prerequisite: MUS 1102.

MUS 2174. Introduction to Jazz Harmony. 3 Credits.

Analysis and composition of tunes in jazz/pop styles. Study of rhythmic characteristics, voice-leading, and chord/scale relationships within a jazz context. Prerequisite: MUS 1102.

MUS 2318. Orchestral Instrument. 2 Credits.

Prerequisite: Open by examination.

MUS 2661. Electronic and Computer Music I. 3 Credits.

Fundamental electronic and computer music concepts. Analog and digital sound synthesis techniques and theory, MIDI, studio recording techniques, signal processing, properties of sound, acoustics and psycho-acoustics, history and aesthetics. Laboratory fee.

MUS 2662. Electronic and Computer Music II. 3 Credits.

Continuation of MUS 2661. Fundamental electronic and computer music concepts. Analog and digital sound synthesis techniques and theory, MIDI, studio recording techniques, signal processing, properties of sound, acoustics and psycho-acoustics, history and aesthetics. Laboratory fee. MUS 2661 is prerequisite to MUS 2662.

MUS 3126. Music History I: Antiquity through Early Baroque. 3 Credits.

The development of Western European music from its earliest traceable roots to the end of the early, experimental Baroque period. Prerequisite: MUS 1102 and sophomore standing.

MUS 3127. Music History II: The Tonal Era. 3 Credits.

Styles, structures, social foundations and aesthetic change in European music of the late 17th through the late 19th centuries. Prerequisite: MUS 1102.

MUS 3127W. Music History II: Tonal Era. 3 Credits.

Styles, structures, social foundations and aesthetic change in European music of the late 17th through the late 19th centuries. Prerequisite: MUS 1102.

MUS 3139. Form and Analysis. 3 Credits.

Analysis of musical forms in representative musical literature. Prerequisite: MUS 2101.

MUS 3139W. Form and Analysis. 3 Credits.

Analysis of musical forms in representative musical literature. Prerequisite: MUS 2101.

MUS 3174. Topics in Music Theory and Composition. 3 Credits.

A seminar on variable topics in the discipline of music theory, analysis, and composition. Topics may include analysis of post-tonal music, advanced jazz arranging, analysis of 14th-century vocal music, developments in extended instrumental techniques since 1950. Prerequisites depend on the topic; consult the department.

MUS 3175. Topics in Music History and Literature. 3 Credits.

A seminar on variable topics in music history and literature in all traditions and styles. Topics may include German musical Romanticism, introduction to critical musicology, the music of Josquin des Prez, and vernacular music in Washington, D.C. Prerequisites depend on the topic; consult the department.

MUS 3175W. Topics in Music History & Lit. 3 Credits.

A seminar on variable topics in music history and literature in all traditions and styles. Topics may include German musical Romanticism, introduction to critical musicology, the music of Josquin des Prez, and vernacular music in Washington, D.C. Prerequisites depend on the topic; consult the department.

MUS 4085. Advanced Performance Study. 3 Credits.

Prerequisite: Open by examination.

MUS 4184. Advanced Composition. 3 Credits.

Private instruction in composition in tutorial format.

Prerequisite: MUS 2134.

MUS 4198. Senior Seminar. 1 Credit.

Restricted to music majors in their final spring semester. Presentations of required senior projects in process; readings and discussion to place the projects in a broader musical and intellectual context. Corequisite: MUS 4199 or any upper-division private performance study course.

MUS 4199. Independent Research. 1-4 Credits.

Under the guidance of an assigned instructor. May be repeated for credit. Majors in their senior year take MUS 4198 as a corequisite.

MUS 4199W. Independent Research. 1-4 Credits.

Under the guidance of an assigned instructor. May be repeated for credit. Majors in their senior year take MUS 4198 as a corequisite.

BACHELOR OF ARTS WITH A MAJOR IN MUSIC

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Prerequisite courses:

MUS 1101	Elements of Music Theory
MUS 1102	Comprehensive Musicianship I
MUS 1051	Class Piano for Music Majors and Minors (or equivalent) (students must achieve grades of C or better in MUS 1101 and MUS 1051 to declare the music major)

Students must achieve grades of C or better in MUS 1101 and MUS 1051 to declare the music major.

Required courses in the major:

MUS 2101	Harmony
MUS 2102	Comprehensive Musicianship II

MUS 2105	Introduction to Ethnomusicology
MUS 2106	Music History III: 20th-Century Art Traditions
MUS 3126	Music History I: Antiquity through Early Baroque
MUS 3127	Music History II: The Tonal Era
MUS 3139	Form and Analysis
MUS 4198	Senior Seminar
An approved independent project in the senior year, concurrently with registration in MUS 4198	
MUS 4199	Independent Research
4 credits of private performance study courses	
2 credits of music ensemble courses	
12 credits of music electives, at least 3 of which must be from a course numbered MUS 2662 and above. The distribution of these electives is as follows:	
3 credits in history and literature from the following:	
MUS 2121	The Opera
MUS 2122	Music in the US
MUS 3175	Topics in Music History and Literature
3 credits in theory and composition from the following:	
MUS 2174	Introduction to Jazz Harmony
MUS 2134	Composition
MUS 2661	Electronic and Computer Music I
MUS 2662	Electronic and Computer Music II
MUS 3174	Topics in Music Theory and Composition
MUS 4184	Advanced Composition

6 credits of free electives in music (because of the various options available in the B.A. program in music, students should consult with music faculty advisors at the earliest opportunity)

And/or any upper-division private performance study course

All majors are expected to attend departmental lectures, master classes, and concerts, as appropriate.

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors in music, a student must maintain a 3.5 grade-point average in music courses and at least a 3.0 average overall. The student must complete the required senior independent project for at least 3 credits with a minimum grade of A-.

MINOR IN JAZZ STUDIES REQUIREMENTS

23 credits of music courses consisting of:

MUS 1101	Elements of Music Theory
MUS 1102	Comprehensive Musicianship I
MUS 1108	History of Jazz
MUS 2173	Comprehensive Musicianship for Jazz
MUS 1051	Class Piano for Music Majors and Minors
MUS 2174	Introduction to Jazz Harmony
MUS 2661	Electronic and Computer Music I

4 credits of jazz performance techniques from the following:

MUS 1571	Jazz Perf. Tech
MUS 1572	Jazz Performance Techniques
MUS 2072	Jazz Performance Techniques

2 credits of ensemble participation:

MUS 1061	Instrumental Ensemble
or MUS 1071	Jazz Band

All minors are expected to attend departmental lectures, master classes, and concerts, as appropriate.

MINOR IN MUSIC REQUIREMENTS

21 credits of music courses including:

MUS 1101	Elements of Music Theory
MUS 1102	Comprehensive Musicianship I
MUS 1051	Class Piano for Music Majors and Minors

One of the following:

MUS 2106	Music History III: 20th-Century Art Traditions
MUS 3126	Music History I: Antiquity through Early Baroque
MUS 3127	Music History II: The Tonal Era

One of the following:

MUS 2105	Introduction to Ethnomusicology
MUS 2121	The Opera
MUS 2122	Music in the US
MUS 3126	Music History I: Antiquity through Early Baroque
MUS 3127	Music History II: The Tonal Era
MUS 3175	Topics in Music History and Literature

Three credits of private performance study or ensemble

Six credits of music electives, two of which must be upper-division

All minors are expected to attend departmental lectures, master classes, and concerts, as appropriate.

ORGANIZATIONAL SCIENCES AND COMMUNICATION

The Department of Organizational Sciences and Communication provides a multi-disciplinary home for faculty and undergraduate, masters, and doctoral students interested in the study, interpretation, and improvement of organizational and communication phenomena. At the individual, interpersonal, group, organizational, societal, and global levels, the department seeks to increase understanding of communication and organizations by incorporating a variety of epistemological and methodological approaches.

Communication

The Communication program has a history as old as the university itself, with academic work in rhetoric dating back to the original charter in 1821. The program explores how people constitute and share meaning in an abstract world. Current curricular offerings probe communication events as media-bound occurrences, studying the verbal and nonverbal, oral or written, live or mass media nature of communication phenomena. A major in communication and two minors (communication and organizational communication) are offered.

Organizational Sciences

Organizational Sciences, founded in 1981 and centered within a social systems framework, offers an undergraduate and graduate program with a focus on the for-profit, not-for-profit, government, military, service, and other sectors. The premise is that success comes with a deep understanding of the theory and practice underlying individual and organizational effectiveness. The department offers a major and minor in organizational sciences. On the graduate level the department offers an interdisciplinary program leading to the degree of Master of Arts in the field of Organizational Management. In partnership with the Department of Human and Organizational Learning in GW's Graduate School of Education and Human Development, and with the Division of Leadership at the U.S. Naval Academy (USNA), the department also offers an interdisciplinary program leading to the degree of Master of Arts in Leadership Education and Development (LEAD).

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in communication (p. 286)
- Bachelor of Arts with a major in organizational sciences (p. 287)

Minors

- Minor in communication (p. 289)
- Minor in organizational communication (p. 290)
- Minor in organizational sciences (p. 290)

GRADUATE

Master's programs

- Master of Arts in the field of organizational sciences (p. 291)
- Master of Arts in the field of leadership education and development (LEAD) (p. 290)

Doctoral program

The Doctor of Philosophy in the field of psychology with a concentration in industrial/ organizational psychology is offered through the Department of Organizational Sciences and Communication on a full-time basis only.

CERTIFICATE

A graduate certificate in organizational management is offered.

FACULTY

Professors L. Offermann, C. Warren (*Chair*)

Associate Professors T. Behrend, D.P. Costanza, G. Debebe, M. Liu

Assistant Professors J.C. Miller, J. Mote, N. Olsen, K. Pariera

Visiting Associate Professor T. Andrews

Adjunct Professor K. Froemling, J. Procopio, T. Suiter, C. Wood

Professorial Lecturers Q. Ahmed, M.A. DiMola, D. Getter, T. Hayes, E. Hoffman, L. Karimova, J. MacDoniels, D. Minionis, E. van Iersel

Adjunct Instructor C.M. Clapp

Lecturers S. Bergman, D. Coultice-Christian, S. Ewing, P. Hanke, C. Kennedy, M. Lally, G. Nair, B. Piatt, P. Schechter, P. Scott, D. Tighe, S. Tomasovic, A. Weiner

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Within the Department of Organizational Sciences and Communication, any course counted toward the major may not also be counted toward the minor. Students taking more than one minor in the department may not double-count electives.

- Communication (COMM) (p. 944)
- Organizational Sciences (ORSC) (p. 1216)

BACHELOR OF ARTS WITH A MAJOR IN COMMUNICATION

REQUIREMENTS

Applications are accepted from students up to a 75-credit hour limit. A student may apply twice for admission to the major. Criteria for admission include a GPA of 3.0 and completion of, or current enrollment in, one of three courses: COMM 1025 Introduction to Communication Studies, COMM 1040 Public Communication, or COMM 1041 Interpersonal Communication. Achievement of the stipulated GPA does not guarantee admission to the major because the application process is rigorous. Application forms and the Student Handbook for Communication Majors, which provides additional information about the major, including the application process, are available in the department office.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Required coursework (21 credits):

COMM 1025	Introduction to Communication Studies
COMM 1040	Public Communication
COMM 1041	Interpersonal Communication
COMM 2100	Communication Theory
COMM 3110	Research Methods-Communication
COMM 4150	Persuasion
COMM 4199W	Senior Seminar

Six additional communication (COMM) courses (18 credits) numbered 2000 or above

A second major or minor other than Organizational Communication

SPECIAL HONORS

Students may graduate with Special Honors if they meet the following criteria:

1. Special Honors requirements stated under University Regulations;
2. Selection to Lambda Pi Eta, the National Communication Association Honor Society, which maintains a chapter in the GW Communication Program (i.e., open to majors who have completed a minimum of 24 hours in communication course work, who hold a grade-point average of 3.3 in communication courses and a grade-point average of 3.0 overall, and who are recommended by a majority of the full-time communication faculty); and
3. A grade of A on the thesis required in COMM 4199W Senior Seminar.

BACHELOR OF ARTS WITH A MAJOR IN ORGANIZATIONAL SCIENCES

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Required courses (24 credits):

COMM 3170	Organizational Communication
ECON 1011	Principles of Economics I

or ECON 1012 Principles of Economics II

ORSC 1109 Introduction to Organizational Sciences

ORSC 2046 Global Organizations

ORSC 4161 Research Methods in Organizational Sciences

ORSC 4197 Senior Research Seminar

PSYC 2144 Industrial/Organizational Psychology

STAT 1053 Introduction to Statistics in Social Science

Five courses (15 credits) from the following:

ORSC 2116 Leading Change

ORSC 2123 Negotiation and Conflict Resolution

ORSC 2143 Leadership and Performance

ORSC 3141 Strategy in Organizations

ORSC 3159 Extreme Decisions

ORSC 3165 Organizational Network Analysis

ORSC 3190 Special Topics

ORSC 4195 Independent Study

PSYC 2160 Group Dynamics

Two courses (6 credits) from the following:

AMST 2010 Early American Cultural History

or HIST 2010 Early American Cultural History

AMST 2011 Modern American Cultural History

or HIST 2011 Modern American Cultural History

AMST 2020 Washington, D.C.: History, Culture, and Politics

or AMST 2020W Washington, D.C.: History, Culture, and Politics

or HIST 2020 Washington, D.C.: History, Culture, and Politics

MASTER OF ARTS IN THE FIELD OF LEADERSHIP EDUCATION AND DEVELOPMENT

The Department of Organizational Sciences and Communication, part of the Columbian College of Arts and Sciences, offers an interdisciplinary program leading to the degree of Master of Arts in leadership education and development (LEAD) to a cohort of designated officers from the U.S. Naval Academy. The Department awards the degree in partnership with the Department of Human and Organizational Learning in GW's Graduate School of Education and Human Development, and with the Division of Leadership at the USNA.

Students complete a 45-credit multidisciplinary master's degree in leadership education and development in one year across three academic terms (summer, fall, and spring). These credits are delivered through 14 courses and a research capstone. GW teaches 30 of the 45 credits and the U.S. Naval Academy teaches the remaining 15 credits.

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

45 credits, including 30 credits taken at GW and 15 credits taken at the U.S. Naval Academy (USNA)

Required courses taken at GW

ORSC 6209	Management Systems
-----------	--------------------

ORSC 6242	Organizational Communication and Conflict Management
ORSC 6297	Special Topics
ORSC 8261	Research Methods in Organizational Sciences
PSYC 8245	Seminar: Organizational Behavior
HOL 6701	Adult Learning
HOL 6702	Organizational Change I
HOL 6704	Leadership in Organizations
HOL 6742	Design of Adult Learning Interventions
HOL 6746	Work Groups and Teams in Organizations

Required courses taken at the USNA

LEAD 6001	The Academy and the Brigade
LEAD 6003	Foundations of Moral Reasoning
LEAD 6004	LEAD Fellows Teaching Practicum
LEAD 6005	LEAD Fellows Counseling Practicum
LEAD 6006	LEAD Research Capstone

MASTER OF ARTS IN THE FIELD OF ORGANIZATIONAL SCIENCES

The Department of Organizational Sciences and Communication offers an interdisciplinary program leading to the degree of Master of Arts in the field of organizational sciences with a concentration in organizational management. The program has been designed for public, private, and nonprofit sector professionals who wish to increase their managerial competence, enhance their leadership ability, and improve their career potential. The curriculum provides knowledge and skills in the social and behavioral sciences. In addition, a graduate certificate in organizational management is offered.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

36 credits of course work and successful completion of a Master's Comprehensive Examination. There is no thesis requirement.

Required

ECON 6219	Managerial Economics
ORSC 6209	Management Systems
ORSC 6216	Theories and Management of Planned Change
ORSC 6241	Strategic Management and Policy Formation
ORSC 6242	Organizational Communication and Conflict Management
ORSC 6243	Sem:Leadership-Complex Organanzt
PSYC 8245	Seminar: Organizational Behavior
PSYC 8259	Psychology of Individual and Group Decision Making
STAT 6104	Statistics in Management, Administration, and Policy Studies

Electives

9 credits from the following:

ORSC 6212	Current Issues in Personnel Testing and Selection
ORSC 6214	Personnel Training and Performance Appraisal Systems
ORSC 6217	Productivity and Human Performance
ORSC 6222	Theory and Practice of Compensation Management
ORSC 6223	Collective Bargaining
ORSC 6224	Persuasion & Negotiation
ORSC 6246	Comparative Management
ORSC 6248	Strategic Human Resource Planning
ORSC 6250	Leadership Coaching: Principles and Practices
ORSC 6251	Team Coaching and Facilitation
ORSC 6295	Directed Research
ORSC 6297	Special Topics
ORSC 6298	Directed Readings

PEACE STUDIES

The Peace Studies program is designed to strengthen a student's ability to explore the multiple meanings of peace, the relationship between peace and conflict, and the role of peace on local and global levels. The program fosters the study of peace in its philosophical and religious dimensions, as an important aspect of international affairs, and as a vital part of social, economic, and environmental justice. Peace Studies focuses on the examination of peace and conflict through the lens of the humanities and the liberal arts. Housed within the Department of Religion (<http://religion.columbian.gwu.edu>) in the Columbian College of Arts and Sciences, the Peace Studies program emphasizes the role of world religions in peace building and conflict resolution.

UNDERGRADUATE

Bachelor's program

- Bachelor of Arts with a major in peace studies (p. 292)

Minor

- Minor in peace studies (p. 294)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PSTD 1010. Introduction to Peace Studies and Conflict Resolution. 3 Credits.

Major thinkers and themes in the field of peace studies and conflict resolution. Focus on philosophical and religious foundations of peace and justice movements in the 20th century. Examination of peace and conflict through an interdisciplinary lens and on personal, local, and international levels.

PSTD 3190. Capstone Seminar. 3 Credits.

Capstone seminar for peace studies majors and minors in their junior or senior year. Taken concurrently with a relevant internship or as part of a long-term research project to probe the relationship between peace studies and conflict resolution in practice and in theory.

PSTD 3191. Special Topics Peace Studies. 1-3 Credits.

Topics announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

PSTD 3999. Independent Study. 1-3 Credits.

Tutorial designed by an undergraduate student under the guidance of a faculty member to pursue an academic topic in the area of Peace Studies and Conflict Resolution outside available course offerings.

BACHELOR OF ARTS WITH A MAJOR IN PEACE STUDIES

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Two years of a single foreign language, or placement into the third year of a foreign language by examination, or one year each of two modern foreign languages. Students are encouraged to study abroad

30 credits in peace studies and related fields including:

PSTD 1010	Introduction to Peace Studies and Conflict Resolution

SOC 2184	Violence and the Family
One additional elective	
An internship in a relevant agency may also count for 3 hours of credit, with advisor's prior approval, through the following:	
CCAS 2154	Elective Internship

* Lists of courses that can fulfill each category (<http://religion.columbian.gwu.edu/undergraduate-academic-programs>) are available in the Department of Religion.

PHILOSOPHY

From reading the works of Plato and Aristotle to studying logic and phenomenology, the department provides a broad-based learning experience. One of the arts and humanities disciplines in the Columbian College of Arts and Sciences, the program also examines the intersection of philosophy with other subjects, including law, biomedicine, science, and politics.

Two options are offered for the major, both designed to give a broad background in philosophy but with somewhat different emphases. The first option reflects the traditional structure of the discipline and its subfields; it is especially (but not exclusively) recommended for those considering graduate study in philosophy. The second option is designed for those primarily interested in the relationship of philosophy to public affairs.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in philosophy (p. 300)
- Bachelor of Arts with a major in philosophy (public affairs focus) (p. 301)
- Combined program (p. 311)

Minors

- Minor in philosophy (p. 313)
- Minor in logic (p. 312)
- Minor in applied ethics (p. 311)
- Minor in mind-brain studies (p. 312)

GRADUATE

Master's programs

- Master of Arts in the field of philosophy (p. 313)
- Master of Arts in the field of public policy with a concentration in philosophy and social policy (p. 313)

FACULTY

Professors R.P. Churchill, D. DeGrazia, G. Weiss (*Chair*)

Associate Professors J.C. Brand, M. Friend, T. Zawidzki

Assistant Professors L. Papish, M. Ralkowski, E.J. Saidel, J. Trullinger

Adjunct Professors A. Pedferri, M. Sigrist, C. Venner

Affiliated Faculty D. Malone-France (UWP/Religion)

Professorial Lecturers S. Aas, C. Bassiri, R. Carr, M. Davis, L. Eby, D. Kirilov, L. Okster

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students

- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PHIL 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the schedule of classes for more details. Restricted to First-year students in CCAS.

PHIL 1051. Introduction to Philosophy. 3 Credits.

Readings from major philosophers and study of their positions on the most basic questions of human life. Topics include such issues as: What is justice? What is knowledge? What is reality? Does God exist? What is the mind? Do humans have free will?.

PHIL 1062. Philosophy and Film. 3 Credits.

Philosophical problems and theories of perception, meaning, personal identity, and moral agency and their illustration in the context of cinema. Cinema and its derivatives (TV, video) as prime routes to experience of the natural and social worlds in an age of communication. Readings in classical and contemporary philosophy and in film theory; screening of a series of films.

PHIL 1153. The Meaning of Mind. 3 Credits.

Introductory course for students with no background in philosophy or the sciences of the mind. The central questions, assumptions, and hypotheses about the human mind. The nature of thought, consciousness, and self; knowledge of other minds; implications of the sciences of the mind for freedom of the will and responsibility; and the relationship between the mind and the brain.

PHIL 1193. Introduction to Existentialism. 3 Credits.

The philosophical themes of selfhood, mortality, authenticity, and ethical responsibility from an existentialist perspective, including the writings of Kierkegaard, Heidegger, Nietzsche, Camus, and Sartre. The place of existentialism in the history of philosophy.

PHIL 2045. Introduction to Logic. 3 Credits.

Introduction to informal logic, scientific argument, and formal logic. The informal logic component focuses on fallacies of reasoning and practical applications of logic. The formal logic component focuses on translation from English into propositional logic, truth tables, and proofs in propositional logic.

PHIL 2111. History of Ancient Philosophy. 3 Credits.

History of Western philosophy from the Pre-Socratics to the Stoics (6th century BCE to 1st century CE). Major emphasis on the writings of Plato and Aristotle. Among themes to be covered: knowledge and reality, political and moral philosophy.

PHIL 2111W. History of Ancient Philosophy. 3 Credits.

History of Western philosophy from the Pre-Socratics to the Stoics (6th century BCE to 1st century CE). Major emphasis on the writings of Plato and Aristotle. Among themes to be covered: knowledge and reality, political and moral philosophy.

PHIL 2112. History of Modern Philosophy. 3 Credits.

History of Western philosophy of the 16th through 18th centuries; Continental Rationalism and British Empiricism from the scientific revolution through the Enlightenment; major emphasis on Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume, and Kant. Prerequisite: PHIL 1051 .

PHIL 2124. Philosophies of Disability. 3 Credits.

Disability presents an intense and interesting challenge to traditional philosophical presuppositions and principles. This course examines various philosophical approaches to disability –historical, individual, and medical paradigms as well as those that rely on frameworks of social or human rights.

PHIL 2124W. Philosophies of Disability. 3 Credits.

Disability presents an intense and interesting challenge to traditional philosophical presuppositions and principles. This course examines various philosophical approaches to disability –historical, individual, and medical paradigms as well as those that rely on frameworks of social or human rights.

PHIL 2125. Philosophy of Race and Gender. 3 Credits.

A theoretical examination of the bodily, social, discursive, and political effects of patriarchy, racism, and classism.

PHIL 2125W. Philosophy of Race and Gender. 3 Credits.

A theoretical examination of the bodily, social, discursive, and political effects of patriarchy, racism, and classism.

PHIL 2131. Ethics: Theory and Applications. 3 Credits.

Examination of leading ethical theories (e.g., utilitarianism, deontology, virtue ethics), and methodology in ethics. Engagement with contemporary problems.

PHIL 2132. Social and Political Philosophy. 3 Credits.

Philosophical theories about how economic, political, legal, and cultural institutions should be arranged. Topics include the meaning and significance of liberty, the legitimate functions of government, the nature of rights, the moral significance of social inequality, and the meaning of democracy.

PHIL 2132W. Social and Political Philosophy. 3 Credits.

Philosophical theories about how economic, political, legal, and cultural institutions should be arranged. Topics include the meaning and significance of liberty, the legitimate functions of government, the nature of rights, the moral significance of social inequality, and the meaning of democracy.

PHIL 2133. Philosophy and Nonviolence. 3 Credits.

Violence and nonviolence in the personal and social struggle for meaningful, just, and peaceful existence; philosophical foundations of pacifism and nonviolent resistance in the thought of Tolstoy, Gandhi, King, and others; philosophical inquiry into war, terrorism, genocide, and ethnic conflict, as well as human rights, humanitarian intervention, and just war theory.

PHIL 2134. Philosophy of Human Rights. 3 Credits.

Conceptual, ethical, and theoretical analyses of human rights with emphasis on the justification of human rights, the debate over cultural relativism, and the application of human rights norms in domestic and global contexts.

PHIL 2135. Ethics in Business and the Professions. 3 Credits.

Ethical theories and basic concepts for analysis of moral issues arising in business and in professional practice.

PHIL 2136. Contemporary Issues in Ethics. 3 Credits.

Introduction to a range of debates in applied ethics, including both classic debates concerning topics such as the permissibility of abortion, animal treatment, and suicide as well as more current debates concerning our interactions with the environment and our obligations to the poor in a global context.

PHIL 2281. Philosophy of the Environment. 3 Credits.

Three models of environmental sustainability: the current paradigm in economic and cultural thinking (neoclassical economics); redistribution of resources toward greater global equity (a macroeconomic perspective); and de-growth in the developed economies (ecological economics). The models offer different perspectives on what environmental sustainability means and how it can impact the cultural, religious, moral, metaphysical, and existential situation.

PHIL 3100. Selected Topics. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

PHIL 3100W. Selected Topics. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

PHIL 3113. 19th-Century Philosophy. 3 Credits.

European philosophy of the 19th century, with major emphasis on Kant, Hegel, Schopenhauer, Kierkegaard, and Nietzsche. Prerequisite: PHIL 1051 .

PHIL 3121. Symbolic Logic. 3 Credits.

Analysis and assessment of deductive arguments, using propositional, predicate, and other logics; philosophical basis and implications of logical analysis; metatheory of logic; modal and non-standard logics. Prerequisite: Phil 1045 or permission of instructor.

PHIL 3142. Philosophy of Law. 3 Credits.

Systematic examination of fundamental concepts of law and jurisprudence; special emphasis on the relationship between law and morality.

PHIL 3142W. Philosophy of Law. 3 Credits.

Systematic examination of fundamental concepts of law and jurisprudence; special emphasis on the relationship between law and morality.

PHIL 3151. Philosophy and Science. 3 Credits.

Analysis of the structure and meaning of science, including scientific progress and theory change, objectivity in science, the drive for a unified science, and ways science relates to everyday understandings of the world. Attention given to various sciences, including physics, biology, and neuroscience. Prerequisite: PHIL 1051 or a 2000-level philosophy course.

PHIL 3151W. Philosophy and Science. 3 Credits.

Analysis of the structure and meaning of science, including scientific progress and theory change, objectivity in science, the drive for a unified science, and ways science relates to everyday understandings of the world. Attention given to various sciences, including physics, biology, and neuroscience. Prerequisite: PHIL 1051 or two semesters of college-level science.

PHIL 3152. Theory of Knowledge. 3 Credits.

Inquiry into the basis and structure of knowledge, the problems of skepticism and justification, the relations between subjectivity and objectivity, and the contributions of reason, sense experience, and language. Prerequisite: PHIL 1051 ; PHIL 2112 also recommended.

PHIL 3153. Mind, Brain, and Artificial Intelligence. 3 Credits.

Investigation of the nature of mind from a variety of perspectives, including neuroscience, cognitive psychology, and artificial intelligence, as well as traditional philosophy of mind. Possible additional topics include consciousness, mental disorders, animal minds, and the nature and meaning of dreams. Prerequisites: PHIL 1051 or PHIL 1153 or PHIL 2112 or permission of the instructor.

PHIL 3161. Philosophy and Literature. 3 Credits.

Critical investigation of the sociopolitical commitments that inform the practices of reading and writing as discussed by Sartre, Barthes, Foucault, and others. Focus on the development of existentialist themes, including authenticity, freedom, temporality, and death in the work of Kafka, Tolstoy, Mann, Woolf, and others.

PHIL 3162. Philosophy of Art. 3 Credits.

The problem of artistic representation and the nature of aesthetic experience as related to the creation, appreciation, and criticism of art. Special emphasis on nonrepresentational works of art and their interpretation. Prerequisite: PHIL 1051 or PHIL 2111 or PHIL 2112 or PHIL 3113.

PHIL 3162W. Philosophy of Art. 3 Credits.

The problem of artistic representation and the nature of aesthetic experience as related to the creation, appreciation, and criticism of art. Special emphasis on nonrepresentational works of art and their interpretation. Prerequisite: PHIL 1051 or PHIL 2111 or PHIL 2112 or PHIL 3113.

PHIL 3172. American Philosophy. 3 Credits.

A survey of American philosophical thought, focusing on the late 19th through mid-20th centuries. Covers American Pragmatism (Peirce, James, Dewey) in depth; other authors may include Thoreau, Emerson, Royce, Santayana, Mead, Quine, and Rorty.

PHIL 3172W. American Philosophy. 3 Credits.

A survey of American philosophical thought, focusing on the late 19th through mid-20th centuries. Covers American Pragmatism (Peirce, James, Dewey) in depth; other authors may include Thoreau, Emerson, Royce, Santayana, Mead, Quine, and Rorty.

PHIL 3251. Philosophy of Biology. 3 Credits.

An introduction to conceptual and methodological issues raised by contemporary biology, including teleology, reductionism, units of selection, the structure of evolutionary theory, genetics, taxonomy, and the nature of scientific explanation. Other issues may include the nature-nurture debate, creationism/intelligent design, the evolution of altruism, and the relevance of evolutionary theory to ethical questions.

PHIL 4192. Analytical Philosophy. 3 Credits.

The dominant movements of 20th-century Anglo-American philosophy, including logical positivism, British ordinary language philosophy, and neopragmatism, as represented by Russell, G.E. Moore, Wittgenstein, Ayer, Quine, Kripke, et al. Prerequisite: one other upper-division philosophy course (PHIL 2112 and PHIL 3121 recommended).

PHIL 4193. 20th-Century Continental Philosophy. 3 Credits.

An intensive, systematic introduction to the phenomenological and hermeneutic traditions in philosophy through some of their best-known representatives: Husserl, Heidegger, Gadamer, Sartre, Beauvoir, and Merleau-Ponty. Central topics of discussion include consciousness, anguish/anxiety, discourse, interpretation, the Other, death, and ambiguity. Prerequisite: PHIL 2112 or PHIL 3113.

PHIL 4193W. 20th-Century Continental Philosophy. 3 Credits.

An intensive, systematic introduction to the phenomenological and hermeneutic traditions in philosophy through some of their best-known representatives: Husserl, Heidegger, Gadamer, Sartre, Beauvoir, and Merleau-Ponty. Central topics of discussion include consciousness, anguish/anxiety, discourse, interpretation, the Other, death, and ambiguity. Prerequisites: PHIL 2112 or PHIL 3113.

PHIL 4195. Topics in Value Theory. 3 Credits.

Variable topics in ethics, political philosophy, aesthetics, and other subfields in normative philosophy. Prerequisite: one upper-division course on related subject matter or permission of the instructor.

PHIL 4195W. Topics in Value Theory. 3 Credits.

Various topics in ethics, political philosophy, aesthetics, and other subfields in normative philosophy, such as contemporary philosophy of religion. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

PHIL 4196. Topics in Theory of Knowledge. 3 Credits.

Variable topics in epistemology, philosophy of science and mathematics, philosophy of mind, and similar subfields. Prerequisite: one upper-division course on related subject matter or permission of the instructor.

PHIL 4198. Proseminar. 3 Credits.

Variable topics; preparation and presentation of a major research paper. Open only to philosophy majors in the junior and senior year as approved by major advisor. May be repeated for credit. Restricted to philosophy juniors and seniors only.

PHIL 4198W. Proseminar in Philosophy. 3 Credits.

Preparation and presentation of a major research paper. Open only to philosophy majors in the junior and senior year as approved by major advisor. May be repeated for credit provided the topic differs. Topics vary by semester. Consult the Schedule of Classes for more details. Restricted to philosophy juniors and seniors only.

PHIL 4199. Readings and Research. 1-3 Credits.

Independent study to be arranged with a faculty sponsor. Restricted to Departmental approval required.

PHIL 6201. Readings and Research. 3 Credits.

Advanced readings and reports. Investigation of special problems.

PHIL 6202. Readings and Research. 3 Credits.

Advanced readings and reports. Investigation of special problems.

PHIL 6211. Topics in the History of Ancient Philosophy. 3 Credits.

Topic announced in the Schedule of Classes. Restricted to For graduate students only.

PHIL 6212. Topics in the History of Modern Philosophy. 3 Credits.

Topic announced in the Schedule of Classes. Restricted to For graduate students only.

PHIL 6221. Advanced Logic. 3 Credits.

Intensive reading of a difficult text in an advanced logical system or a series of logical systems. Focus on analyzing reasoning under partial information, using the formal system to analyze fallacies of reasoning and analyzing quantum phenomena using the formal system. Restricted to For graduate students only. Recommended background: Good formal training in logic - propositional logic: natural deduction, tables and trees; first-order logic: language (translation from English), trees and natural deduction; some limitative results, eg, decidability, compactness, completeness, Lovenheim-Skolem properties, soundness, etc.

PHIL 6222. Philosophy of Mathematics. 3 Credits.

Examination of several philosophies of mathematics, with in-depth concentration on Field's "fictionalism." A fictionalist believes that all of the ontology of mathematics is favorably compared to a fictional object, so it does not literally exist. Students develop reactions to Field's philosophical position using the resources of alternative philosophical positions. Restricted to For graduate students only. Recommended background: Basic understanding of first-order logic.

PHIL 6223. Philosophy of Logic. 3 Credits.

Central concepts in the philosophy of logic, including truth, reasoning, inference, deduction, induction, judgment, assertion, warrant, proof, demonstration, meaning, semantics, syntax, paradox, mathematical models, and the relationship between a formal representation of logical reasoning and the philosophical ideal of the practice of reasoning. Recommended background: Some grounding in first-order logic will be presupposed.

PHIL 6225. Queer(ing) Philosophy. 3 Credits.

Examination of how queer theory, which emerged as a field in its own right in the early 1990s, has posed significant challenges to traditional, taken-for-granted understandings of time, space, the body, race, sexuality, normality, culture, violence, and disability. Restricted to For graduate students only.

PHIL 6230. Ethical Issues in Policy Arguments. 3 Credits.

Critical analysis of ethical foundations of public policy arguments, e.g., about protection of the environment or health and safety, equality of opportunity. Case studies of appeals to "welfare improvements," to norms of duty, to "the social contract," and to rights-claims. Attention to historical contexts and biases. Open to undergraduates only with permission of instructor.

PHIL 6231. Seminar: Economic Justice. 3 Credits.

Ethical and economic analysis of equity and efficiency of current U.S. income distribution patterns. Theories of justice; economic theories of distribution; assessment of redistribution policies. Open to undergraduates only with permission of instructor.

PHIL 6232. Topics in Contemporary Political Philosophy. 3 Credits.

Topic announced in the Schedule of Classes. Restricted to For graduate students only.

PHIL 6233. Contemporary Moral Philosophy. 3 Credits.

Investigation of contemporary debates in normative ethics and/or metaethics. Topics may include the virtue ethics revival in the 20th century, the distinction between the right and the good, or important metaethical positions such as fictionalism, expressivism, and constitutivist accounts of moral principles. Restricted to For graduate students only.

PHIL 6234. Consequentialism and Its Critics. 3 Credits.

An overview of the debate over consequentialism, culminating in discussion of recent literature. Forms of consequentialism (act, rule, motive, cooperative); direct versus indirect; classic objections and replies; partiality; friendship; agent-relative considerations; doctrine of doing and allowing; doctrine of double effect. Restricted to For graduate students only.

PHIL 6236. Moral Status. 3 Credits.

Examination of the question of what sorts of beings matter morally in their own right and how much they matter. While the paradigm bearers of moral status are persons, the course considers competing ways of thinking about the possible moral status of human nonpersons, nonhuman persons, great apes, dolphins, other sentient animals, nonsentient lifeforms, the environment, future people, and advanced forms of artificial intelligence. Restricted to For graduate students only.

PHIL 6237. Animal Ethics. 3 Credits.

The moral status of animals and the ethics of human use of animals. Major topics include models of moral status, animals' mental life, and specific ethical issues associated with the eating of animal products, the use of animals in research, and the keeping of animals in homes and zoos. Restricted to For graduate students only.

PHIL 6238. Feminist Ethics and Policy Implications. 3 Credits.

Feminist critiques of traditional ethical reasoning; alternative feminist ethical frameworks examined and applied to contemporary social problems (e.g., respecting cultural differences, dependency, disability). Same as WSTU 6238. Prerequisite: PHIL 2125 or PHIL 2131 or permission of instructor.

PHIL 6239. Virtue Ethics. 3 Credits.

Historical and/or contemporary approaches to virtue ethics and key readings in the virtue ethical tradition. Topics include empirical work on virtue in philosophy and psychology, the divide between "radical" virtue ethics and contemporary virtue ethics, "hybrid" approaches to virtue ethics (e.g., consequentialist virtue ethics), and meta-ethical issues relevant to the study of virtue. Restricted to For graduate students only.

PHIL 6242. Philosophy, Law, and Social Policy. 3 Credits.

Consideration of the relationship between legal interpretation and policy goals. Theories concerning the role of the judiciary in a constitutional democracy and methods of constitutional and statutory interpretation. Representative policy topics include capital punishment, pornography, affirmative action, welfare, property rights, racial gerrymandering, gun control.

PHIL 6245. Biomedical Ethics. 3 Credits.

An in-depth introduction to the field of biomedical ethics. Following a brief review of ethical theory, the course proceeds to several central topics in biomedical ethics before ending with students' presentations of their original research. The emphasis is on normative ethical reasoning, with considerable attention to the empirical assumptions underlying particular ethical judgments and to policy dimensions of several of the central topics.

PHIL 6250. Topics in Health Policy. 3 Credits.

Topics in health policy from the perspective of philosophical ethics, including human and animal research, the enhancement of human traits, justice and health care allocation.

PHIL 6251. Advanced Introduction to Philosophy of Mind. 3 Credits.

Critical examination of classical philosophical arguments pertaining to the mind/body problem, the problem of consciousness, the problem of intentionality, the problem of freedom of the will, and the problem of personal identity. Focus on careful analysis of classical philosophical writings on these topics. Restricted to For graduate students only.

PHIL 6252. Advanced Introduction to Philosophy of Cognitive Science. 3 Credits.

The emergence of cognitive phenomena in phylogeny and ontogeny, social cognition, nativist vs. empiricist approaches to cognition, models of reasoning and decision-making, representationalist vs. embodied/embedded/enactive approaches to cognition, and theories of perception, memory, and concepts. Restricted to For graduate students only.

PHIL 6253. Cognitive Science and Public Policy. 3 Credits.

The cognitive sciences are providing new insights into the nature of human decision making at an accelerating pace. Cognitive psychology, cognitive neuroscience, neuroeconomics, evolutionary psychology, and developmental and comparative psychology are rewriting theories about human nature with significant implications for public policy. The course examines recent work in the cognitive sciences with the intent of drawing out its public policy implications.

PHIL 6254. Mental Representation. 3 Credits.

Thoughts are like pictures of the world in that they represent the world. But thoughts sometimes represent the world in ways that don't correspond to the way it actually is. How do thoughts come to have representational content? Why do we have thoughts? Such questions are considered through the careful reading of recent work on the subject. Restricted to For graduate students only.

PHIL 6257. The Nature of Animal Minds. 3 Credits.

Do nonhuman animals have minds? If so, what are they like? How are they similar and how are they different from our minds? What might count as evidence that an animal has a mind? Consideration of some of the questions philosophers and scientists have been asking and issues these questions raise when we think about the possibility that nonhuman animals are thinking creatures. Restricted to For graduate students only.

PHIL 6262. Normative Issues in Foreign Policy. 3 Credits.

Selected issues on foreign policy from a normative perspective; emphasis on human rights, economic globalization, global poverty, sustainable development, and the ethics of military intervention.

PHIL 6281. Environmental Philosophy and Policy. 3 Credits.

Examination of philosophical frameworks for assessing policy approaches to environmental problems. Representative topics include duties to future generations, environmental justice, legal rights for natural objects, critiques of cost-benefit analysis, sustainability, risk measurement, the intrinsic value of nature.

PHIL 6290. Special Topics in Public Policy. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

PHIL 6293. Contemporary Continental Philosophy. 3 Credits.

Focus on several powerful philosophical concepts introduced by late 20th/early 21st-century continental scholars. Through a close reading of selected works, the influence these scholars have had upon one another is traced. Critical examination of the theoretical resources the works provide in articulating some of the most urgent ethical, social, and political demands of contemporary human existence. Restricted to For graduate students only.

PHIL 6294. Special Topics in Continental Philosophy. 3 Credits.

Topic announced in the Schedule of Classes. Restricted to For graduate students only.

PHIL 6998. Thesis Research. 3 Credits.**PHIL 6999. Thesis Research. 3 Credits.**

BACHELOR OF ARTS WITH A MAJOR IN PHILOSOPHY

REQUIREMENTS

The following requirements must be fulfilled for the traditional option:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

PHIL 1051 Introduction to Philosophy or PHIL 1051W Hist Intro-Western Philosophy is recommended.

Required courses (9 credits):

PHIL 2045	Introduction to Logic
PHIL 2111	History of Ancient Philosophy
or PHIL 2111W	History of Ancient Philosophy
PHIL 2112	History of Modern Philosophy

One course (3 credits) from the following:

PHIL 3113	19th-Century Philosophy
or PHIL 3113W	19th-Century Philosophy
PHIL 3172	American Philosophy
or PHIL 3172W	American Philosophy
PHIL 4192	Analytical Philosophy
or PHIL 4192W	Analytical Philosophy
PHIL 4193	20th-Century Continental Philosophy
or PHIL 4193W	20th-Century Continental Philosophy

Four additional philosophy (PHIL) courses (12 credit hours) numbered 2000 or above

One of the following options (6 credit hours):

A: Two Proseminar courses

PHIL 4198	Proseminar (6 credits)
-----------	------------------------

B: Honors Thesis Option (requires departmental approval and a senior thesis)

PHIL 4198	Proseminar (3 credits)
-----------	------------------------

PHIL 4199	Readings and Research (3 credits)
-----------	-----------------------------------

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, a student must

1. have at least a 3.7 grade-point average in the major and a 3.3 average overall;
2. submit an honors paper prepared under the supervision of a faculty advisor in the department.

Only if a committee of three faculty members in the department approves the honors paper will Special Honors be recommended.

BACHELOR OF ARTS WITH A MAJOR IN PHILOSOPHY (PUBLIC AFFAIRS FOCUS)

REQUIREMENTS

The following requirements must be fulfilled for the traditional option:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

PHIL 1051 Introduction to Philosophy or PHIL 1051W Hist Intro-Western Philosophy is recommended.

Required courses (3 credits):

PHIL 2045	Introduction to Logic
-----------	-----------------------

One course (3 credits) from the following:

PHIL 2111	History of Ancient Philosophy
or PHIL 2111W	History of Ancient Philosophy
PHIL 2112	History of Modern Philosophy

Two courses (6 credits) from the following:

PHIL 2131	Ethics: Theory and Applications
PHIL 2132	Social and Political Philosophy
or PHIL 2132W	Social and Political Philosophy
PHIL 2136	Contemporary Issues in Ethics

Four additional philosophy (PHIL) courses (12 credits) numbered 2000 or above

One of the following options (6 credits):

A: Two Proseminar Courses

PHIL 4198	Proseminar (6 credits)
-----------	------------------------

B: Honors Thesis Option (requires departmental approval and a senior thesis)

PHIL 4198	Proseminar (3 credits)
-----------	------------------------

or PHIL 4198W	Proseminar in Philosophy
---------------	--------------------------

PHIL 4199	Readings and Research (3 credits)
-----------	-----------------------------------

GENERAL EDUCATION

In addition to the University General Education Requirement, undergraduate students in Columbian College must complete a further, College-specific general education curriculum—Perspective, Analysis, Communication, or G-PAC. Together

with the University General Education Requirement, G-PAC engages students in active intellectual inquiry across the liberal arts. Students achieve a set of learning outcomes that enhance their analytical skills, develop their communication competencies, and invite them to participate as responsible citizens who are attentive to issues of culture, diversity, and privilege.

Coursework for the University General Education Requirement is distributed as follows:

- Writing—one approved course in university writing and two writing-in-the-disciplines (WID) courses;
- Humanities—one approved course in the humanities that involves critical thinking skills;
- Mathematics or Statistics—one approved course in either mathematics or statistics;
- Natural or Physical Science—one approved laboratory course that employs the process of scientific inquiry; and,
- Social Sciences—two approved courses in the social sciences

Coursework for the Columbian College general education curriculum is distributed as follows:

- Arts—one approved course in the arts that involves the study or creation of artwork based on an understanding or interpretation of artistic traditions or knowledge of art in a contemporary context;
- Global or Cross-Cultural Perspective—one approved course that analyzes the ways in which institutions, practices, and problems transcend national and regional boundaries;
- Humanities—one approved course in the humanities that involves critical thinking skills (in addition to the one course in this category required by the University General Education Requirement);
- Local or Civic Engagement—one approved course that develops the values, ethics, disciplines, and commitment to pursue responsible public action;
- Natural or Physical Science—one approved laboratory course that employs the process of scientific inquiry (in addition to the one course in this category required by the University General Education Requirement; and,
- Oral Communication—one course in oral communication.

Certain courses are approved to fulfill the requirement in more than one of these categories.

Courses taken in fulfillment of G-PAC requirements may also be counted toward majors or minors. Transfer courses taken prior to, but not after, admission to George Washington University may count toward the University General Education Requirement and G-PAC, if those transfer courses are equivalent to GW courses that have been approved by the University and the College.

University General Education and G-PAC Courses

- Arts (p. 302)
- Global or Cross-Cultural (p. 303)
- Humanities (p. 305)
- Local/Civic Engagement (p. 306)
- Mathematics or Statistics (p. 308)
- Natural or physical laboratory sciences (p. 309)
- Oral Communication (p. 309)
- Social Sciences (p. 310)
- Writing (p. 311)

Arts

AH 1031	Survey of Art and Architecture I
AH 1032	Survey of Art and Architecture II
AH 2071	Introduction to the Arts in America
AH 2154	American Architecture I
AH 2155	American Architecture II

Writing

UW 1020	University Writing
or HONR 1015	Honors Proseminar: UW 1020: Origins and Evolution of Modern Thought

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, a student must: have at least a 3.7 grade-point average in the major and a 3.3 average overall; and submit an honors paper prepared under the supervision of a faculty advisor in the department.

Only if a committee of three faculty members in the department approves the honors paper will Special Honors be recommended.

COMBINED PROGRAM

The Department of Philosophy offers a special program that combines the Bachelor of Arts in Philosophy and Master of Arts in Public Policy with a concentration in philosophy and social policy. The program allows students to take a specified number of graduate credits as part of their undergraduate degree, thereby decreasing the number of credits normally required for the master's degree. Students interested in the B.A./M.A. program should consult a departmental advisor as soon as possible. Undergraduates in the philosophy major (public affairs option) may apply to the program upon completing 12 credits of course work in philosophy at the 1000-level or higher, and must apply before completing 75 credits in the B.A. program.

Visit the program website (<http://philosophy.columbian.gwu.edu/combined-bama-program-philosophy>) for additional information.

MINOR IN APPLIED ETHICS REQUIREMENTS

Required courses (9 credits):

PHIL 2131	Ethics: Theory and Applications
PHIL 2135	Ethics in Business and the Professions
PHIL 2136	Contemporary Issues in Ethics

Three additional courses (9 credits) from the following:

PHIL 2124	Philosophies of Disability
or PHIL 2124W	Philosophies of Disability
PHIL 2125	Philosophy of Race and Gender
or PHIL 2125W	Philosophy of Race and Gender
PHIL 2132	Social and Political Philosophy
or PHIL 2132W	Social and Political Philosophy
PHIL 2133	Philosophy and Nonviolence

PHIL 2134	Philosophy of Human Rights
PHIL 2281	Philosophy of the Environment
PHIL 3142	Philosophy of Law
or PHIL 3142W	Philosophy of Law
PHIL 4195	Topics in Value Theory
or PHIL 4195W	Topics in Value Theory

MINOR IN LOGIC REQUIREMENTS

The following requirements must be fulfilled: 18 credits

One course (3 credits) from the following:

PHIL 2045	Introduction to Logic
PHIL 3121	Symbolic Logic

One course (3 credits) from the following:

MATH 3710	Introduction to Mathematical Logic
MATH 3720	Axiomatic Set Theory
MATH 3730	Computability Theory
or MATH 3730W	Computability Theory
MATH 3740	Computational Complexity
or MATH 3740W	Computational Complexity

Four additional courses (12 credits) from the lists above or from the following:

CSCI 1112	Algorithms and Data Structures
CSCI 3313	Foundations of Computing
CSCI 4222	Theory of Computer Translators
LING 2601	Language & Linguistic Analysis
or ANTH 2601	Language & Linguistic Analysis

No more than two courses may count toward both the student's major and the minor in logic.

For more information, contact the Philosophy Department.
(<http://philosophy.columbian.gwu.edu>)

MINOR IN MIND-BRAIN STUDIES REQUIREMENTS

Required courses (6 credits):

PHIL 3153	Mind, Brain, and Artificial Intelligence
PSYC 3122	Cognitive Neuroscience

Four courses (12 credits) from the following, with the restriction that the complete set of courses taken for the minor may include a maximum of two courses from any one department:

ANTH 1005	The Biological Bases of Human Behavior
ANTH 3413	Evolution of the Human Brain
ANTH 3601	Language, Culture, and Cognition
or LING 3601	Language, Culture, and Cognition
ANTH 3603	Psycholinguistics
or LING 3603	Psycholinguistics
BISC 2220	Developmental Neurobiology
BISC 2452	Animal Behavior
BISC 3320	Human Neurobiology
PHIL 1153	The Meaning of Mind
PHIL 3151	Philosophy and Science
or PHIL 3151W	Philosophy and Science
PHIL 3152	Theory of Knowledge
PHIL 3251	Philosophy of Biology
PSYC 2014	Cognitive Psychology
PSYC 3118	Neuropsychology
PSYC 3121	Memory and Cognition
PSYC 3124	Visual Perception
SPHR 1071	Foundations of Human Communication
or SPHR 1071W	Foundations of Human Communication
SPHR 2104	Speech and Language Disorders
or SPHR 2104W	Speech and Language Disorders
SPHR 2106	Anatomy and Physiology for Speech and Hearing II

SPHR 2131 Language Acquisition and Development

SPHR 3116 Brain & Language

For more information, contact Dr. Tad Zawidzki (Philosophy) at zawidzki@gwu.edu.

MINOR IN PHILOSOPHY REQUIREMENTS

Six philosophy courses (18 credits), at most one is numbered below 2000 and at least two are from the following:

PHIL 2111 History of Ancient Philosophy

or PHIL 2111W History of Ancient Philosophy

PHIL 2112 History of Modern Philosophy

PHIL 3113 19th-Century Philosophy

or PHIL 3113W 19th-Century Philosophy

PHIL 3172 American Philosophy

or PHIL 3172W American Philosophy

PHIL 4192 Analytical Philosophy

or PHIL 4192W Analytical Philosophy

PHIL 4193 20th-Century Continental Philosophy

or PHIL 4193W 20th-Century Continental Philosophy

MASTER OF ARTS IN THE FIELD OF PHILOSOPHY

The Master of Arts in Philosophy is intended to prepare students for admission to doctoral programs in philosophy and related disciplines such as political theory, biomedical ethics, and gender studies; educate students about the state of the art in philosophy and the history of the discipline; develop students' ability to engage in critical thinking, close reading, persuasive writing, and oral communication; and prepare students to teach philosophy and related subjects at the secondary school or two-year college level.

The curriculum focuses on four main areas:

1. Practical philosophy: applied ethics, ethical theory, political philosophy, philosophy of law, and public policy
2. Philosophies of gender, race, ethnicity, sexual orientation, and disability
3. Philosophies of mind, cognitive science, and biology

4. Continental philosophy of the twentieth and twenty-first centuries

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

Program requirements:

The MA in Philosophy program consists of 30 credits total (10 courses) without completing a thesis, or 27 credits (9 courses) plus three credits of thesis coursework. In either case, at least one of the following two courses in the history of philosophy is required:

PHIL 6211 Topics in the History of Ancient Philosophy

PHIL 6212 Topics in the History of Modern Philosophy

For their remaining coursework, students will work closely with an advisor to design a curriculum that best suits their philosophical interests and career plans. This flexible and individualized graduate program provides students with the unique opportunity to create their own Master's in Philosophy from our many graduate offerings, including our Philosophy and Social Policy courses.

MASTER OF ARTS IN THE FIELD OF PUBLIC POLICY WITH A CONCENTRATION IN PHILOSOPHY AND SOCIAL POLICY

REQUIREMENTS

The interdisciplinary program in public policy with a concentration in philosophy and social policy brings the normative, historical, and analytical-logical skills of philosophical inquiry to bear upon contemporary problems of social policy. The program is affiliated with the Trachtenberg School of Public Policy and Public Administration.

Prerequisite: a bachelor's degree from an accredited college or university. Students are expected to have completed the prerequisites to graduate courses.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

Two options are available at the discretion of the faculty:

1. a minimum of 24 credit hours of approved graduate course work plus the successful completion of a thesis (PHIL 6998 Thesis Research– PHIL 6999 Thesis Research), or
2. a minimum of 36 credit hours of graduate course work that does not include a thesis.

Required courses:

Four of the following:

PHIL 6230	Ethical Issues in Policy Arguments
PHIL 6231	Seminar: Economic Justice
PHIL 6238	Feminist Ethics and Policy Implications
PHIL 6242	Philosophy, Law, and Social Policy
PHIL 6250	Topics in Health Policy
PHIL 6262	Normative Issues in Foreign Policy
PHIL 6281	Environmental Philosophy and Policy

Public policy core: Four courses, one from each of the following groups:

Group A

PPPA 6010	Politics & The Policy Process
PSC 8212	Urban Policy Problems

Group B

ECON 6217	Survey of Economics I
ECON 6237	Economics of the Environment and Natural Resources
ECON 6248	Health Economics

Group C

PSC 6103	Approaches to Public Policy Analysis
PPPA 6006	Policy Analysis
SOC 6248	Race and Urban Redevelopment
WSTU 6240	Women and Public Policy
WSTU 6265	Women, Welfare & Poverty
HIST 6011	Rdg/Rsch:History/Public Policy

Group D

PPPA 6002	Research Methods and Applied Statistics (or substitute as approved by the advisor)
-----------	--

Electives may focus on a particular policy area (e.g., biomedical/health care, urban/welfare, or environmental policy), or may explore varied approaches and policy issues

Each candidate must pass a Master's Comprehensive Examination based on the particular interdisciplinary composition of the student's program of study. Prospective candidates should consult the program director.

PHYSICS

The physics program offers instruction in the fundamental laws of the discipline as it strengthens a student's ability to see how these laws apply to all the sciences and everyday occurrences. Physics is part of the natural, mathematical, and biomedical sciences discipline in the Columbian College of Arts and Sciences. Through courses ranging from classical mechanics to electromagnetic theory, the physics program prompts students to use mathematical logic, deductive reasoning, developed intuition, and careful observation.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in physics (p. 315)
- Bachelor of Science with a major in physics (p. 316)
- Bachelor of Science with a major in biophysics (p. 315)

Minors

- Minor in physics (p. 317)
- Minor in biophysics (p. 317)

GRADUATE

Master's program

- Master of Science in the field of physics (p. 317)

Doctoral program

- Doctor of Philosophy in the field of physics (p. 318)

FACULTY

Professors W.J. Briscoe, A. Eskandarian, G. Feldman, F.X. Lee, L.C. Maximon (*Research*), A.K. Oppen (*Chair*), M.E. Reeves, I. Strakovsky (*Research*), C. Zeng

Associate Professors A. Afanasev, K.S. Dhuga, H. Griesshammer, H. Haberzettl, W. Peng, R.L. Workman (*Research*)

Assistant Professors A. Alexandru, M. D#ring, E.J. Downie, O. Kargaltsev, B.C. Kung, G. Lan, X. Qiu, R. Teodorescu (*Teaching*)

Professorial Lecturers J.T. Broach, M.F. Corcoran, L. Medsker, A. Moscati, I. Moskowitz, C. O'Donnell

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Departmental prerequisite: Consent of a departmental graduate advisor is required for admission to all graduate courses in physics.

- Astronomy (ASTR) (p. 917)
- Physics (PHYS) (p. 1233)

BACHELOR OF ARTS WITH A MAJOR IN PHYSICS

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Required introductory courses (20 credits):

PHYS 1021	University Physics I
or PHYS 1025	University Physics I with Biological Applications

PHYS 1022 University Physics II

or PHYS 1022W University Physics 2

or PHYS 1026 University Physics II with Biological Applications

PHYS 1023 Modern Physics

or PHYS 1023W Modern Physics

MATH 1231 Single-Variable Calculus I

MATH 1232 Single-Variable Calculus II

MATH 2233 Multivariable Calculus

One course (4 credits) from the following:

CHEM 1111 General Chemistry I

BISC 1111 Introductory Biology: Cells and Molecules

BISC 1112 Introductory Biology: The Biology of Organisms

One course (3 credits) from the following:

MATH 2184 Linear Algebra I

or MATH 2185 Linear Algebra I for Math Majors

MATH 3257 Introduction to Complex Variables

MATH 3342 Ordinary Differential Equations

MATH 3343 Partial Differential Equations

MATH 3359 Introduction to Mathematical Modeling

MATH 3848 Differential Geometry

MATH 4121 Introduction to Abstract Algebra I

MATH 4239 Real Analysis I

Required advanced courses (15 credits):

PHYS 2151 Intermediate Laboratory I: Techniques and Methods

or PHYS 2152 Intermediate Laboratory II: Instrumentation

PHYS 2161 Mechanics I

PHYS 2164 Thermal and Statistical Physics

PHYS 2165 Electromagnetic Theory

PHYS 2167 Principles of Quantum Physics

Two additional physics (PHYS) courses (6 credits) numbered 2000 or above

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, a student must submit for departmental approval an honors thesis based on a two-semester research project. In addition, the student must have a cumulative grade-point average of at least 3.5 in physics courses and 3.5 overall.

BACHELOR OF SCIENCE WITH A MAJOR IN BIOPHYSICS

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Required introductory courses (20 credits):

MATH 1231	Single-Variable Calculus I
MATH 1232	Single-Variable Calculus II
MATH 2233	Multivariable Calculus
PHYS 1023	Modern Physics
or PHYS 1023W	Modern Physics
PHYS 1025	University Physics I with Biological Applications
PHYS 1026	University Physics II with Biological Applications

Required courses (33 credits):

BISC 1111	Introductory Biology: Cells and Molecules
BISC 1112	Introductory Biology: The Biology of Organisms
BISC 3209	Molecular Biology
BISC 3261	Introductory Medical Biochemistry
CHEM 1111	General Chemistry I
CHEM 1112	General Chemistry II
CHEM 2151	Organic Chemistry I
CHEM 2152	Organic Chemistry II
STAT 1127	Statistics for the Biological Sciences

One course (3 credits) from the following:

CSCI 1011	Introduction to Programming with Java
CSCI 1041	Introduction to FORTRAN Programming
CSCI 1111	Introduction to Software Development
CSCI 1112	Algorithms and Data Structures
CSCI 1131	Introduction to Programming with C

Required advanced courses (18 credits):

PHYS 2127	Biophysics: Macroscopic Physics in the Life Sciences
PHYS 2128	Biophysics: Microscopic Physics in the Life Sciences

PHYS 2151	Intermediate Laboratory I: Techniques and Methods
or PHYS 2151W	Intermediate Laboratory I: Techniques and Methods
or PHYS 2152	Intermediate Laboratory II: Instrumentation
PHYS 2161	Mechanics I
PHYS 2164	Thermal and Statistical Physics
PHYS 2165	Electromagnetic Theory
One course (3 credits) from the following:	
PHYS 4195	Physics Capstone
PHYS 4196	Undergraduate Research in Biophysics
PHYS 4197	Undergraduate Research in Nuclear Physics

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, a student must submit for departmental approval an honors thesis based on a two-semester research project. In addition, the student must have a cumulative grade-point average of at least 3.5 in physics courses and 3.5 overall.

BACHELOR OF SCIENCE WITH A MAJOR IN PHYSICS

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Required introductory courses (20 credits):

PHYS 1021	University Physics I
or PHYS 1025	University Physics I with Biological Applications
PHYS 1022	University Physics II
or PHYS 1022W	University Physics 2
or PHYS 1026	University Physics II with Biological Applications
PHYS 1023	Modern Physics
or PHYS 1023W	Modern Physics
MATH 1231	Single-Variable Calculus I

MATH 1232	Single-Variable Calculus II
MATH 2233	Multivariable Calculus
One course (4 credits) from the following:	
CHEM 1111	General Chemistry I
BISC 1111	Introductory Biology: Cells and Molecules
BISC 1112	Introductory Biology: The Biology of Organisms
One course (3 credits) from the following:	
CSCI 1011	Introduction to Programming with Java
CSCI 1041	Introduction to FORTRAN Programming
CSCI 1121	Introduction to C Programming
Two courses (6 credits) from the following:	
MATH 2184	Linear Algebra I
or MATH 2185	Linear Algebra I for Math Majors
MATH 3257	Introduction to Complex Variables
MATH 3342	Ordinary Differential Equations
MATH 3343	Partial Differential Equations
MATH 3359	Introduction to Mathematical Modeling
MATH 3553	Introduction to Numerical Analysis
MATH 3848	Differential Geometry
MATH 4121	Introduction to Abstract Algebra I
MATH 4239	Real Analysis I
or MATH 4239W	Real Analysis I
Required advanced courses (15 credits):	
PHYS 2151	Intermediate Laboratory I: Techniques and Methods
or PHYS 2152	Intermediate Laboratory II: Instrumentation
PHYS 2161	Mechanics I
PHYS 2164	Thermal and Statistical Physics
PHYS 2165	Electromagnetic Theory
PHYS 2167	Principles of Quantum Physics
One course (3 credits) from the following:	

PHYS 4195	Physics Capstone
PHYS 4196	Undergraduate Research in Biophysics
PHYS 4197	Undergraduate Research in Nuclear Physics

Two additional physics (PHYS) courses (6 credits) numbered 2000 or above

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, a student must submit for departmental approval an honors thesis based on a two-semester research project. In addition, the student must have a cumulative grade-point average of at least 3.5 in physics courses and 3.5 overall.

MINOR IN BIOPHYSICS REQUIREMENTS

Required:

PHYS 1021	University Physics I
PHYS 1022	University Physics II
PHYS 1023	Modern Physics
PHYS 2127	Biophysics: Macroscopic Physics in the Life Sciences
PHYS 2128	Biophysics: Microscopic Physics in the Life Sciences

MINOR IN PHYSICS REQUIREMENTS

Required:

PHYS 1021	University Physics I
PHYS 1022	University Physics II
PHYS 1023	Modern Physics

Two approved upper-division physics courses

MASTER OF SCIENCE IN THE FIELD OF PHYSICS REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

Prerequisite: a bachelor's degree with a major in physics at this University, or an equivalent degree.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

Required: 36 credit hours of graduate course work including:

PHYS 6110	Mathematical Methods of Theoretical Physics
PHYS 6120	Advanced Mechanics
PHYS 6210	Electrodynamics and Classical Field Theory
PHYS 6220	Quantum Mechanics I
PHYS 6310	Statistical Mechanics
PHYS 6510	Communications in Physics
PHYS 6580	Laboratory
PHYS 6130	Computational Physics I
PHYS 6230	Computational Physics II
PHYS 6330	Computational Physics III
One of the following options:	
Option A: two of the following:	
PHYS 6610	Nuclear and Particle Physics I-II
PHYS 6710	Nuclear and Particle Physics II
PHYS 6620	Biophysics I
PHYS 6720	Biophysics II
PHYS 6630	Astrophysics I
PHYS 6730	Astrophysics II
Option B: Thesis option	
PHYS 6998	Thesis Research
PHYS 6999	Thesis Research

DOCTOR OF PHILOSOPHY IN THE FIELD OF PHYSICS

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

The requirements for the Doctor of Philosophy Program (p. 71).

Required courses:

PHYS 6110	Mathematical Methods of Theoretical Physics
PHYS 6120	Advanced Mechanics
PHYS 6210	Electrodynamics and Classical Field Theory
PHYS 6220	Quantum Mechanics I
PHYS 6310	Statistical Mechanics
PHYS 6320	Quantum Mechanics II
PHYS 6130	Computational Physics I
PHYS 6230	Computational Physics II
PHYS 6330	Computational Physics III
PHYS 6510	Communications in Physics
One of the following options:	
Option A	
PHYS 6610	Nuclear and Particle Physics I-II
PHYS 6710	Nuclear and Particle Physics II
Option B	
PHYS 6620	Biophysics I
PHYS 6720	Biophysics II
Option C	
PHYS 6630	Astrophysics I
PHYS 6730	Astrophysics II

Specific course requirements can be waived on a case-by-case basis upon approval of the department's graduate advisor.

Research fields

- Nuclear physics—experimental and theoretical studies on the structure, electromagnetic, weak and strong interactions, and scattering of few-body systems at low and intermediate energies;
- Biophysics and condensed-matter physics—experimental, theoretical, and computational studies of structures and

functions of cells, biological networks and biomolecules, deciphering information encoded in genome; theoretical and observational astrophysics; interdisciplinary physics, including energy research and physics education research.

POLITICAL SCIENCE

The Department of Political Science, part of the social and behavioral sciences discipline in the Columbian College of Arts and Sciences, offers a program that examines politics in depth on both a national and international scale. Classroom study is supplemented by opportunities to intern on Capitol Hill or at government agencies.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in political science (p. 327)
- Bachelor of Arts with a major in political science (public policy focus) (p. 329)
- Combined program (p. 331)

Minors

- Minor in political science (p. 331)
- Minor in public policy (p. 331)

GRADUATE

Master's program

- Master of Arts in the field of political science (p. 332)
- Master of Arts in the field of legal institutions and theory (p. 332)

Doctoral program

- Doctor of Philosophy in the field of political science (p. 332)

FACULTY

University Professors M. Barnett, M. Finnemore

Professors S. Biddle, S. Binder, M.E. Brown, N.J. Brown, C.J. Deering, B. Dickson, H.B. Feigenbaum, C. Glaser, J.H. Lebovic, M. Lynch, F. Maltzman, C. McClintock, K.J. Morgan, H.R. Nau, S.K. Sell, D. Shambaugh, M.J. Sodaro, P. Wahlbeck (*Chair*), S.L. Wolchik

Associate Professors S.J. Ball, B. Bartels, A. Bowie, I. Creppell, A. Downes, H. Farrell, H.E. Hale, D. Hayes, E.D. Lawrence, C. McConaughy, M.M. Mochizuki, J.M. Sides, R.P. Stoker, E.J. Teitelbaum, I. White, S. Wiley

Assistant Professors R.F. Adcock, M. Allendoerfer, C. Arrington, S. Goldman, E. Grynawski, E. Finkel, S. Kaplan, E. Kramon, Y. Lupu, M. Miller, C. Mylonas, E. Saunders, R. Stein, C. Talmadge, W.J. Winstead, A. Ziegfeld

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Departmental prerequisite: PSC 1001 Introduction to Comparative Politics is prerequisite to Group A courses (comparative politics), PSC 1002 Introduction to American Politics and Government is prerequisite to Group B courses (American government and politics), and PSC 1003 Introduction to International Politics is prerequisite to Group C courses (international politics, law, and organizations). Honors course equivalents are acceptable substitutes. Students who have taken PSC 1011 Introduction to Politics I–PSC 1012W Introduction to Politics II have fulfilled prerequisites to all three groups. Elliott School students substitute IAFF 1005 Introduction to International Affairs: A Washington Perspective for PSC 1003 Introduction to International Politics as a prerequisite to Group C courses.

PSC 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the Schedule of Classes for more details. Restricted to First-year students in CCAS.

PSC 1001. Introduction to Comparative Politics. 3 Credits.

Concepts and principles of comparative analysis, with an examination of politics and government in selected countries.

PSC 1001W. Intro to Comparative Politics. 0-3 Credits.

Concepts and principles of comparative analysis, with an examination of politics and government in selected countries.

PSC 1002. Introduction to American Politics and Government. 3 Credits.

Structure, powers, and processes of the American political system and the impact on public policy.

PSC 1002W. Intro-American Politics & Govt. 3 Credits.

Structure, powers, and processes of the American political system and the impact on public policy.

PSC 1003. Introduction to International Politics. 3 Credits.

Analysis of world politics, focusing on the role of nation-states and international organizations and on selected foreign policy issues.

PSC 1011. Introduction to Politics I. 6 Credits.

Role of personal and social values in politics. Problems in the Western (especially American) tradition of political science. Admission by special selection process.

PSC 1012W. Introduction to Politics II. 6 Credits.

Continuation of PSC 1011. Role of personal and social values in politics. Thinking outside the Western state: culture, nationalism, ethnic conflict, democratization, international conflict. Admission by special selection process.

PSC 2000. Sophomore Colloquium. 3 Credits.

The Sophomore Colloquia are small seminar-style courses limited to second-year students in Columbian College. These courses engage students deeply in a discipline, focus on a narrow issue of high interest and impact, and require independent research projects of the students. Topics vary by semester. Consult the schedule of classes for more details. Restricted to Registration by instructor approval.

PSC 2099. Variable Topics. 1-12 Credits.

Use denotes upper-level transfer credit in political science.

PSC 2101. Scope and Methods of Political Science. 3 Credits.

Nature of political inquiry, approaches to the study of politics and government, empirical methods of research.

PSC 2102. Visualizing and Modeling Politics. 3 Credits.

The class builds on PSC 2101, Scope and Methods of Political Science, with emphasis on working with data to examine political questions. Prerequisites: PSC 2101 or STAT 1051 or STAT 1053 or STAT 1111.

PSC 2105. Major Issues of Western Political Thought I. 3 Credits.

Foundations of Western political thought—Plato to Aquinas.

PSC 2106. Major Issues of Western Political Thought II. 3 Credits.

History of political thought from the 16th through the late 19th century, as set forth in the works of representative thinkers.

PSC 2106W. Major Issues of Western Political Thought II. 3 Credits.

History of political thought from the 16th through the late 19th century, as set forth in the works of representative thinkers. Writing intensive.

PSC 2107. 20th-Century Political Thought. 3 Credits.

Recent Western political thought; analysis and critique of the legacies of modern political theories and ideologies.

PSC 2108. Freedom and Equality. 3 Credits.

Case analysis of major ideas related to freedom and equality in the Western political tradition.

PSC 2110. American Political Thought. 3 Credits.

Political thought in the U.S. from colonial times to the present as seen through major representative writings.

PSC 2120W. Freedom in American Thought and Popular Culture. 0-3 Credits.

An inquiry into definitions of freedom through examination of American political thought and popular culture. Writing intensive. (Same as AMST 2120W).

PSC 2211. State and Urban Politics. 3 Credits.

Comparative analysis of context, institutions, processes, and policies of state and urban political systems. Prerequisite: PSC 1002.

PSC 2212. State and Urban Policy Problems. 3 Credits.

Selected issues in state and urban policymaking, with emphasis on urban and metropolitan settings. Prerequisite: PSC 1002.

PSC 2213. Judicial Politics. 3 Credits.

An examination of judicial process and behavior. Emphasis on judicial selection, decision making, interaction with the political environment, and impact and implementation of decisions. Prerequisite: PSC 1002.

PSC 2214. U.S. Constitutional Law and Politics I. 3 Credits.

Separation of powers, federal-state relationships, economic regulation. Prerequisites: PSC 1002.

PSC 2215. U.S. Constitutional Law and Politics II. 3 Credits.

Political and civil rights. Prerequisites: PSC 1002.

PSC 2216. The American Presidency. 3 Credits.

Examination of the politics of presidential selection, the authority of the contemporary institution, the mechanisms and processes for formulating public policy, and the influences of personality on performance in office. Prerequisite: PSC 1002.

PSC 2217. Executive Branch Politics. 3 Credits.

Basic concepts in public administration; influence of bureaucratic politics on policy formulation and implementation. Prerequisite: PSC 1002. Same as PPPA 2117.

PSC 2218. Legislative Politics. 3 Credits.

Theory, structure, and process of the U.S. Congress, with emphasis on elections, party organization, committees, and floor procedure, in the context of executive-legislative relations and interest-group activities. Prerequisite: PSC 1002.

PSC 2218W. Legislative Politics. 3 Credits.

Theory, structure, and process of the U.S. Congress, with emphasis on elections, party organization, committees, and floor procedure, in the context of executive-legislative relations and interest-group activities. Writing intensive. Prerequisites: PSC 1002.

PSC 2219. Political Parties and Interest Groups. 3 Credits.

Role of parties as a linkage between mass preferences and government policies. Organization, nominations, voting, and activities in legislative and executive branches. Prerequisite: PSC 1002.

PSC 2220. Public Opinion. 3 Credits.

How public opinion is measured, how it is shaped, and its consequences for policymaking. Prerequisite: PSC 1002.

PSC 2221. African-American Politics. 3 Credits.

The evolution, nature, and role of African Americans within the U.S. political system. How the African American experience has shaped American politics (specifically public opinion, political behavior, political institutions, and salient public policy debates) and how black Americans have come to understand their position within the American political system. Prerequisites: PSC-1002 or PSC-002 or ((PSC-1011 or PSC-011) and (PSC-1012 or PSC-012 or PSC-012W or PSC-1012W)).

PSC 2222. Science, Technology, and Politics. 3 Credits.

Multiple impacts of scientific and technological developments on the political systems. Discussion of public policies for support, use, and control of science and technology. Prerequisite: PSC 1002.

PSC 2223. Campaigns and Elections. 3 Credits.

Examination of the various forms of American political participation in electoral and governmental politics and their effects on the political process. Prerequisite: PSC 1002.

PSC 2224. Issues in Domestic Public Policy. 3 Credits.

Examination of the decision-making process and the substance of various issues in domestic public policy in such areas as crime, economics, education, energy, the environment, poverty, and health. Prerequisite: PSC 1002.

PSC 2225. Women and Politics. 3 Credits.

An examination of the role and impact of women in politics, including women's interests and access to the political system; specific public policy issues with a particular focus on the role of women. Prerequisite: PSC 1002.

PSC 2228. Media, Politics, and Government. 3 Credits.

Exploration of the role played by communication, principally through the mass media, in the conduct of government and the making of public policy. Same as SMPA 3428. Prerequisite: PSC 1002.

PSC 2229. Media and Politics. 3 Credits.

The impact of the media on American politics, including the nature of coverage of political issues and campaigns, dynamics of selecting and presenting news stories, and consequences of media messages for public opinion and action. Prerequisite: PSC 1002.

PSC 2230. Law and Justice: The View from Hollywood. 3 Credits.

Analysis of films that focus on justice, the law, and the legal system. Consideration of what they tell us about political and legal culture and what messages they may have for contemporary legal issues. Focus on the relationship between law and justice, the practice of law, and the role of courts and trials in a political system. Prerequisites: PSC 1002.

PSC 2240. Poverty, Welfare, and Work. 3 Credits.

The elements and politics of America's welfare state. Social welfare policies and how they relate to work and poverty. Prerequisites: PSC 1002.

PSC 2330. Comparative Politics of Western Europe. 3 Credits.

Comparative political analysis with primary focus on the principal states of Western Europe. Prerequisite: PSC 1001.

PSC 2331. Comparative Politics of Central and Eastern Europe. 3 Credits.

Specific countries vary, to include nations of central and Eastern Europe and/or the newly independent states of the former Soviet Union. Prerequisite: PSC 1001.

PSC 2332. European Integration. 3 Credits.

The history of the European Union, its accomplishments as an international actor, and the vibrant debates over its future. Prerequisite: PSC 1001.

PSC 2334. Global Perspectives on Democracy. 3 Credits.

International experiences with the historical evolution and current nature of democratic political systems. Prerequisite: PSC 1001.

PSC 2336. State-Society Relations in the Developing World. 3 Credits.

Historically informed exploration of enduring issues of concern in state-society relations, with an empirical focus on selected countries and regions of the developing world. Prerequisite: PSC 1001.

PSC 2337. Development Politics. 3 Credits.

An examination of how and why political systems develop the way they do. Why do some countries develop into democracies, while others become authoritarian? How do class conflict, the nature of the elite, and the political culture affect the development of political institutions? Prerequisite: PSC 1001.

PSC 2338. Nationalism. 3 Credits.

Causes and the effects of nationalism, covering cases from around the world. Prerequisites: PSC 1001, PSC 1011, PSC 1012W.

PSC 2366. Russian Politics. 3 Credits.

An examination of political institutions, processes, and issues of Russian politics. Prerequisite: PSC 1001.

PSC 2367. Human Rights. 3 Credits.

Human rights theory, the various movements for human, religious, civil, political, and other rights. Prerequisite: PSC 1001.

PSC 2367W. Human Rights. 3 Credits.

Human rights theory, the various movements for human, religious, civil, political, and other rights. Writing intensive. Prerequisites: PSC 1001.

PSC 2368. Politics in the Two Koreas. 3 Credits.

An examination of political institutions, processes, and issues in South Korea and North Korea as well as in inter-Korean relations and major-power involvement in peninsular affairs. Prerequisites: PSC-1001 or PSC-001 or PSC-1001W or PSC-001W or ((PSC-1011 or PSC-011) and (PSC-1012 or PSC-012 or PSC-012W or PSC-1012W)).

PSC 2369. Comparative Politics of South Asia. 3 Credits.

A comparative examination of colonialism, economic development, and identity politics in South Asia. Prerequisite: PSC 1001.

PSC 2370. Comparative Politics of China and Northeast Asia. 3 Credits.

Political institutions and processes of China (including Taiwan), Japan, and Korea since World War II. Influence of indigenous traditions and foreign contacts. Prerequisite: PSC 1001.

PSC 2371. Politics and Foreign Policy of China. 3 Credits.

An examination of political institutions, processes, history, and issues of Chinese politics and foreign policy. Prerequisite: PSC 1001.

PSC 2373. Comparative Politics of Southeast Asia. 3 Credits.

Political forces, processes, and outcomes, using empirical examples from Southeast Asia. Prerequisite: PSC 1001.

PSC 2374. Politics and Foreign Policy of Japan. 3 Credits.

An examination of political institutions, processes, and issues of Japanese politics and foreign policy. Prerequisite: PSC 1001.

PSC 2377. Comparative Politics of the Middle East. 3 Credits.

Politics of the eastern Arab states, Turkey, Iran, and Israel. Prerequisite: PSC 1001.

PSC 2377W. Comparative Politics of the Middle East. 3 Credits.

Politics of the eastern Arab states, Turkey, Iran, and Israel. Writing intensive. Prerequisites: PSC 1001.

PSC 2379. Politics and Foreign Policy of Israel. 3 Credits.

Examination of the institutions, processes, and issues of Israeli politics and foreign policy. Prerequisite: PSC 1001.

PSC 2381. Comparative Politics of Middle and Southern Africa. 3 Credits.

Comparative analysis of political systems in selected countries of non-Mediterranean Africa. Prerequisite: PSC 1001.

PSC 2383. Comparative Politics of Latin America. 3 Credits.

The politics of selected countries in South America, Central America, and the Caribbean. Emphasis on democratization. Prerequisite: PSC 1001.

PSC 2439. International Political Economy. 3 Credits.

Analysis of the political aspects of global economic relationships, focusing on such issues as economic hegemony, interdependence, trade relations, development assistance, multinational corporations, and the role of international organizations. Prerequisite: PSC 1003.

PSC 2440. Theories of International Politics. 3 Credits.

Exploration of alternative theoretical approaches to understanding world politics in its historical and contemporary dimensions. Prerequisite: PSC 1003.

PSC 2442. International Organizations. 3 Credits.

Development and operations of international organizations working in the areas of collective security, peacekeeping, trade, finance, environment, human rights. Prerequisite: PSC 1003.

PSC 2442W. International Organizations. 3 Credits.

Development and operations of international organizations working in the areas of collective security, peacekeeping, trade, finance, environment, human rights. Writing intensive. Prerequisites: PSC 1003.

PSC 2444. Public International Law. 3 Credits.

Survey of essential principles and concepts of public international law through case analysis and with reference to political factors. Prerequisite: PSC 1003.

PSC 2446. U.S. Foreign Policy. 3 Credits.

Survey of essential principles and concepts of public international law through case analysis and with reference to political factors. Prerequisite: PSC 1003.

PSC 2449. International Security Politics. 3 Credits.

Overview of international security issues. Insights from a variety of historical periods and theoretical approaches inform the analysis. Prerequisite: PSC 1003.

PSC 2449W. International Security Politics. 3 Credits.

Overview of international security issues. Insights from a variety of historical periods and theoretical approaches inform the analysis. Writing intensive. Prerequisite: PSC 1003.

PSC 2451W. Theory of War. 3 Credits.

The nature, purposes, and conduct of war. Strategy and its relationship to politics. Major strategic variants for continental warfare, maritime conflict, strategic bombing, insurgency and counterinsurgency, and nuclear war. Prerequisites: PSC 1003.

PSC 2461. European-Atlantic Relations. 3 Credits.

International politics of the North Atlantic area, the European Union, and U.S.-European relations. Prerequisite: PSC 1003.

PSC 2468. Post-Soviet Foreign Policy. 3 Credits.

External problems and policies of Russia and the other successor states of the former USSR (especially the Baltics, Ukraine, and southern rim of the former Soviet Union). Prerequisite: PSC 1003.

PSC 2475. International Relations of East Asia. 3 Credits.

Analysis of the foreign policies of selected East Asian countries and the foreign policies of major powers toward the region. Prerequisite: PSC 1003.

PSC 2476. The Arab-Israeli Conflict. 3 Credits.

Origins, evolution, and issues of the Arab-Israeli conflict. Prerequisite: PSC 1003.

PSC 2478. International Relations of the Middle East. 3 Credits.

Analysis of the regional and international relations of the Middle East. Prerequisite: PSC 1003.

PSC 2482. African International Politics. 3 Credits.

Analysis of interstate relations in Africa and of selected aspects of African relations with the outside world. Prerequisite: PSC 1003. Recommended prerequisite: PSC 2381.

PSC 2484. International Relations of Latin America. 3 Credits.

Emphasis on U.S. foreign policy toward Latin America. Prerequisite: PSC 1003.

PSC 2987. Internship: Political Science. 1-3 Credits.

Study of political behavior and institutions through internship experience. Open to departmental majors only. Admission requires departmental approval and junior standing.

PSC 2988. Internship in Law & Society. 3 Credits.**PSC 2990. Selected Topics. 3 Credits.****PSC 2990W. Selected Topics. 3 Credits.****PSC 2991. Special Topics in Political Thought. 3 Credits.****PSC 2992. Special Topics in American Politics and Government. 3 Credits.**

Prerequisite: PSC 1002.

PSC 2993. Special Topics in Comparative Politics. 3 Credits.

Prerequisite: PSC 1001.

PSC 2994. Special Topics in International Relations. 3 Credits.

Prerequisite: PSC 1003.

PSC 2994W. Special Topics in International Relations. 3 Credits.

Writing intensive. Prerequisites: PSC 1003.

PSC 3192W. Proseminar: Political Science. 3 Credits.

Examination of selected problems in political science. Admission restricted to political science majors in their junior or senior year. May be repeated once for credit.

PSC 4991. Independent Study. 1-3 Credits.

For departmental majors. Prerequisite: senior standing, 15 credit hours of upper-division political science courses, and approval of the undergraduate program advisor and the faculty member who will direct the study.

PSC 6103. Approaches to Public Policy Analysis. 3 Credits.

Primarily for master's students. Empirical and normative foundations of systematic policy analysis: concepts, theories, models, issues, strengths, limitations, and uses and misuses in the policy process.

PSC 6113. The Constitution: History and Ideas. 3 Credits.

With a focus on the history and ideas that influenced James Madison, consideration of ideas that formed the common heritage of all the framers of the Constitution. The separate traditions of liberty that were fused together in the Constitution. Early changes in American society that placed one of those traditions at the center of America's self-understanding.

PSC 6114. Theories of Judicial Review. 3 Credits.

How and why the U.S. Supreme Court interprets the Constitution. The theory behind the practice of judicial review. Consideration of such questions as whether the Constitution intended judicial review and how the two wings of today's Court justify their own position on judicial review.

PSC 6330. Comparative Government and Politics. 3 Credits.

Open to Elliott School students only. Examination of basic approaches to comparative politics.

PSC 6333. Comparative Politics of Russia and Eurasia. 3 Credits.

Comparative analysis of politics in the post-Soviet region. Theoretical and methodological approaches to understanding important issues, frequently including democracy/autocracy, ethnic conflict, political economy, center-periphery relations, and state building.

PSC 6336. Political Economy of Developing Areas. 3 Credits.

Comparative analysis of how development problems have been defined from both political and economic perspectives and the solutions proposed by outsiders and insiders. Emphasis on the rise, demise, and recovery of development orthodoxies.

PSC 6338. U.S. Foreign Economic Policy. 3 Credits.

Exploration of ideas and issues involved in U.S. foreign economic policy, including relationship of economic and security issues, interdependence, protectionism, role of the dollar, industrial policy, and the debt crisis.

PSC 6345. Comparative Foreign Policy. 3 Credits.

The relationship of international actors with one another and with their external environment analyzed in a comparative framework. Focus on nation-states as well as non-state actors, such as international organizations. Differences and similarities in policies on economics, diplomacy, security, and global issues.

PSC 6346. The Politics of U.S. Foreign Policy. 3 Credits.

Patterns and problems in contemporary U.S. foreign policy. Special attention given to the domestic political factors shaping foreign policy.

PSC 6347. U.S. Foreign Policy Traditions. 3 Credits.

Contemporary debate about the substance of American foreign policy through the lens of alternative theoretical approaches to the study of international relations. Classical realist (national interest), neorealist (balance of power), neoliberal (international interdependence and institutions), and constructivist (national identity) interpretations are compared.

PSC 6348. Politics of U.S. National Security Policy. 3 Credits.

Examines competing theoretical approaches to the study of national security policy and tests these on a variety of substantive issue areas in the United States. (May include such topics as nuclear non-proliferation, responses to regional conflicts, definition of new security goals, etc.).

PSC 6349. International Security Politics. 3 Credits.

Overview of the major theoretical debates in international security. How different theoretical approaches inform policy decisions and options.

PSC 6350. Foreign Policy Analysis–Selected Topics. 3 Credits.

Analysis of U.S. foreign policy toward selected world regions.

PSC 6351. Civil-Military Relations. 3 Credits.

Substantive and theoretical issues and debates in the study of civil-military relations.

PSC 6360. Western European Politics. 3 Credits.

Examination of the principal characteristics of the British, French, German, and Italian political systems, comparing their institutional and behavioral adaptations to the problems of advanced industrial democracies.

PSC 6361. Politics of European Integration. 3 Credits.

The origins, institutions, and politics of West European integration, with emphasis on theories of regional integration and the development of the European Union.

PSC 6362. Nation-Building in the Balkans. 3 Credits.**PSC 6364. Comparative Governments and Politics of Central And Eastern Europe. 3 Credits.**

Comparative analysis of domestic political processes and policies in Central and Eastern Europe.

PSC 6366. Government and Politics of Russia. 3 Credits.

The politics and development of the Russian state.

PSC 6367. Post-Soviet Politics. 3 Credits.

How the study of former Soviet countries contributes to major debates in comparative politics. Focus includes regimes, political economy, revolutions, ethnic politics, nationalism.

PSC 6368. Japanese Politics and Foreign Policy. 3 Credits.

Japan's path to modernity and the impact its pattern of development has had on the nation's democratization, political economy, and political institutions in the post-1945 period.

PSC 6370. Politics of China I. 3 Credits.

Readings and discussion of the political dynamics and policy process in contemporary China.

PSC 6371. Politics of the PRC 2. 3 Credits.

Research seminar on selected topics in Chinese politics, using official and other primary sources. Prerequisites: PSC 6370 or permission of instructor.

PSC 6372. Foreign Policy of the PRC. 3 Credits.

Readings and research on the main approaches to analyzing China's foreign policy and foreign relations.

PSC 6373. Political Economy of Industrializing Asia. 3 Credits.

Comparative analysis of the relationship between economic interests and politics in East and Southeast Asia. Emphasis on industrializing economies and their integration into global trade and investment networks.

PSC 6374. Korean Politics. 3 Credits.

An examination of Korean politics from the perspectives of four major research areas: authoritarian regime and economic growth; democratic transition and consolidation; the Asian financial crisis and its consequences; and the two Koreas and international relations.

PSC 6377. Comparative Politics of the Middle East. 3 Credits.

Readings and research on selected problems of the governments and politics of the Middle East.

PSC 6379. Government and Politics of Africa. 3 Credits.

Major theories and themes of African politics considering the context shaping political and economic reforms, formal and informal institutions, and prospects for political reform.

PSC 6383. Comparative Politics of Latin America. 3 Credits.

Readings and discussion on the politics of selected countries in South America, Central America, and the Caribbean. Emphasis on the possibilities for democracy and revolution.

PSC 6388. Topics in Comparative Politics. 3 Credits.**PSC 6390. Politics and Culture. 3 Credits.****PSC 6439. International Political Economy. 3 Credits.**

Research seminar exploring alternative theoretical approaches to the study of international political economy and their application to the explanation and interpretation of historical and contemporary events in world political and economic affairs. Primarily for Elliott School degree candidates.

PSC 6440. Theory-International Relations. 3 Credits.

Open to Elliott School students only. Theories of international relations.

PSC 6442. Politics and Practice of International Institutions. 3 Credits.

The politics of international institutions in the areas of collective security, peace keeping, trade, money, development, environment, human rights.

PSC 6444. Politics of International Law. 3 Credits.

The political sources and consequences of international law and norms.

PSC 6456. Origins/Major Wars & Terrorism. 3 Credits.

An examination of the origins of major wars, including terrorism, from the 18th to the 20th centuries from the theoretical perspectives of realism, liberalism, and constructivism/identity.

PSC 6457. Arms Control & Disarmament. 3 Credits.

Major issues and trends in the postwar development of U.S. arms control and disarmament policy.

PSC 6465. The International Politics of Central and Eastern Europe. 3 Credits.

Major historical, political, social, and regional factors that have shaped the interwar, World War II, and postwar evolution of Eastern Europe; emphasis on foreign relations with outside powers and on regional East-West contacts.

PSC 6467. Asian Security. 3 Credits.

An examination of the major issues in Asian Security using various theoretical perspectives involving a mix of political science and policy analysis.

PSC 6475. International Politics of East Asia. 3 Credits.

Foreign policies and international behavior of the regional states (especially China, Japan, and Vietnam) and the extraregional powers (especially the U.S. and Russia).

PSC 6476. The Arab-Israeli Conflict. 3 Credits.

Readings and research on the origins, evolution, and issues of the Arab-Israeli conflict.

PSC 6478. International Relations of the Middle East. 3 Credits.

Readings and research on the regional and international relations of the Middle East.

PSC 6484. International Relations of Latin America. 3 Credits.

Readings and discussion on U.S.-Latin American relations and the foreign policies of selected states.

PSC 6489. Topics in International Relations. 3 Credits.**PSC 6987. Legal Internship. 3 Credits.**

Study of the interior workings of legal institutions and related organizations through an approved internship with a court, law firm, legal advocacy group, public defender's office, or legal think tank. A research paper is required.

PSC 6996. Reading. 3 Credits.

Limited to graduate degree candidates. Written permission of instructor required.

PSC 6997. Research. 3 Credits.

Limited to graduate degree candidates. Written permission of instructor required.

PSC 6998. Thesis Research. 3 Credits.**PSC 6999. Thesis Research. 3 Credits.****PSC 8101. Introduction to Empirical Political Analysis. 3 Credits.**

Statistical foundations of empirical political analysis and computer applications. Basic probability theory, exploratory and descriptive data analysis, statistical inference, and introduction to linear regression. Laboratory fee.

PSC 8102. Empirical Political Analysis. 3 Credits.

Techniques of social science data analysis. Model building, estimation, and interpretation. Linear models and extensions. Introduction to discrete choice models. Prerequisite: PSC 8101 or permission of instructor.

PSC 8103. Approaches to Policy Analysis. 3 Credits.

Primarily for doctoral students. Empirical and normative foundations of systematic policy analysis: concepts, theories, models, issues, strengths, limitations, and uses and misuses in the policy process.

PSC 8104. Qualitative Research Methods. 3 Credits.

Theoretical, practical, and ethical aspects of conducting qualitative research.

PSC 8105. Readings in Political Theory. 3 Credits.

Selected major works, both ancient and modern, that illuminate basic problems and questions of political theory.

PSC 8106. Topics in Political Theory. 3 Credits.

Advanced readings and group discussions. Analysis and interpretation of selected concepts and schools of thought.

PSC 8107. Modern Political Thought and Ideologies. 3 Credits.

Analysis of some main currents in modern political thought and ideologies.

PSC 8108. Craft of Political Inquiry. 3 Credits.

Logic of inquiry in political science: theories of knowledge, inference, and research methods.

PSC 8109. Systematic Inquiry and Research Design. 3 Credits.

Study design, data collection, and models of analysis in political science.

PSC 8120. Nonlinear Models. 3 Credits.

Introduction to maximum likelihood estimation interpretation of non-linear statistical models. Statistical inference, appropriate use, and presentation and interpretation of results.

PSC 8122. Logitudinal Analysis. 3 Credits.

Examination of two classes of statistical models for longitudinal data—(1) models for time-series, cross-sectional and panel data and (2) modeling event history (i.e., duration, survival, hazard).

PSC 8124. Multilevel Modeling. 3 Credits.

Statistical issues and models for multilevel (hierarchical) data structures, including the variance components, random intercept, and random coefficient models. Handling cross-level interactions.

PSC 8130. Game Theory I. 3 Credits.

Introduction to the core elements of game theory and how it has been utilized in political science. Applications of formal models to political phenomena and the major insights that have come from this work. Restricted to PSC graduate students only.

PSC 8131. Game Theory II. 3 Credits.

Builds on the introductory material in Game Theory I to focus on examples of formal work in political science. Students expand their knowledge of advanced games and learn the principles behind exemplary published research. Restricted to Registration restricted to PSC graduate students only.

PSC 8132. Network Analysis. 3 Credits.

Sociological and psychological foundations of network theory; network measurement and inferential tools; applications of these tools and concepts to political science. Restricted to Registration restricted to PSC graduate students only.

PSC 8185. Topics in Empirical and Formal Political Analysis. 3 Credits.

Selected topics in quantitative political methodology and formal political theory with varying emphasis on maximum likelihood estimation, nonlinear models, causal inference, formal theories, and mathematical/computational tools for the social sciences. May be repeated for credit. Prerequisite: PSC 8102 .

PSC 8187. Selected Topics in Political Theory. 3 Credits.

In-depth coverage of significant issues in political theory, including such topics as justice, toleration, and political community. For advanced students.

PSC 8210. American Political Process. 3 Credits.

A survey of American political institutions, processes, and behavior.

PSC 8211. Urban Politics. 3 Credits.

Comparative analysis of the context, institutions, processes, and policies of urban political systems.

PSC 8212. Urban Policy Problems. 3 Credits.

Analysis of public policy issues confronting urban governments; emphasis on the theoretical roots and empirical impact of past and present programs in such areas as housing, education, poverty, and crime.

PSC 8213. Judicial Politics. 3 Credits.

Introduction to the literature of judicial process and behavior studies; specific focus on selected topics. Emphasis on the major subfields of law, courts, and judicial process.

PSC 8215. Law, Politics, and Society. 3 Credits.

Role of the judiciary in policy formulation; emphasis on the U.S. Supreme Court and civil liberties issues.

PSC 8216. American Presidency. 3 Credits.

Personalized and institutionalized aspects of the presidency, with particular emphasis on the politics of contemporary policymaking.

PSC 8217. Executive Branch Politics. 3 Credits.

Structure and operation of governmental bureaucracy with particular emphasis on the politics of formulating and implementing public policy.

PSC 8218. Legislative Politics. 3 Credits.

Theory, structure, and process of the U.S. Congress, with emphasis on member-constituency relations, individual and collective decision making, party and committee activities, executive-legislative relations, and interest-group activities.

PSC 8219. Political Parties and Elections. 3 Credits.

Nature and functions of American political parties: organizational status, nominating and electoral politics, and role in governing.

PSC 8220. Public Opinion and Political Psychology. 3 Credits.

Sources and dynamics of public opinion and political socialization.

PSC 8221. Interest-Group Politics. 3 Credits.

Theory, structure, and activities of interest groups in American politics.

PSC 8226. Politics and Organizations. 3 Credits.

Theoretical approaches to understanding organizational behavior and change; applications to specific political problems in U.S., international, and comparative politics.

PSC 8229. Politics and Public Policy. 3 Credits.

Examination of political processes that influence policy formulation, policy implementation, and the uses of policy analysis.

PSC 8286. Selected Topics in American Politics. 3 Credits.

In-depth coverage of significant theoretical and empirical issues in American politics, including such topics as political behavior, electoral politics, and race and politics. For advanced students. (Offered as the demand warrants).

PSC 8331. Advanced Theories of Comparative Politics. 3 Credits.

Major concepts, methods, and theoretical debates in comparative politics, including cultural, rational, and institutional approaches.

PSC 8333. Political Violence. 3 Credits.

Theoretical and methodological approaches to studying violence, such as civil wars, ethnic riots, suicide bombings, and genocide, and the impact of violence on societies and people. Restricted to Registration restricted to PSC graduate students only.

PSC 8334. Democracy and Democratization in Comparative Perspective. 3 Credits.

Theoretical approaches to processes of democratization. Evaluation of cultural, economic, institutional, and international-actor approaches. Case analysis of recently transitioned or transitioning nations. Primarily for Ph.D. students in political science.

PSC 8337. Theories of Political Development. 3 Credits.

Examination of how and why political systems develop the way they do. Why do some countries develop into democracies, while others become authoritarian? How do class conflict, the nature of the elite, and the political culture affect the development of political institutions?.

PSC 8338. Nationalism and Nation-Building. 3 Credits.

PSC 8340. Authoritarianism. 3 Credits.

PSC 8341. Theories of Ethnic Politics. 3 Credits.

Focus on cutting-edge interdisciplinary theories of ethnicity's role in politics. Ethnicity's relationship to democracy, economy, psychology, conflict, and solutions. Cases worldwide.

PSC 8388. Selected Topics in Comparative Politics. 3 Credits.

In-depth coverage of significant theoretical and empirical issues in comparative politics, including such topics as democratization, the politics of development, the role of the state in advanced industrial societies, gender and ethnicity, and the politics of nationalism. (Offered as the demand warrants).

PSC 8441. Advanced Theories of International Politics. 3 Credits.

Perspectives examined range from realism to critical theory and focus upon a variety of explanatory variables.

PSC 8450. Topics-International Relations. 3 Credits.

PSC 8452. Theories of International Security. 3 Credits.

Focus on conflict in different systems and scenarios and on causes and consequences of different strategies. The role of ethics in international security.

PSC 8453. Advanced Theories of International Political Economy. 3 Credits.

Major theories of political economy, from classical perspectives on problems of international cooperation to modern treatments of trade, finance, investment, and regulation.

PSC 8454. Domestic Politics and International Relations. 3 Credits.

Theoretical and empirical approaches to exploring the relationship between domestic politics and international relations. Restricted to Open to PhD students in Political Science and MA students with permission of the instructor.

PSC 8460. Military Intervention. 3 Credits.

Theoretical and empirical approaches to the study of military interventions. The challenges of designing political science research on a complex and policy-relevant topic like military intervention.

PSC 8461. Military Effectiveness. 3 Credits.

Theories of military effectiveness in conventional wars. Case studies of several conflicts and brief exploration of effectiveness in unconventional wars.

PSC 8462. Civil War. 3 Credits.

Theories of causes, conduct, and termination of civil wars. Consideration of violence against civilians, rebel recruitment, counterinsurgency, and civil war outcomes.

PSC 8489. Selected Topics in International Politics. 3 Credits.

In-depth coverage of significant theoretical and empirical issues in international politics, including such topics as comparative foreign policy, ethics and norms in international politics, the politics of military intervention, and theories of security in a post-Cold War environment. For advanced students. (Offered as the demand warrants).

PSC 8997. Advanced Reading. 1-3 Credits.

Limited to students preparing for the Doctor of Philosophy general examination. May be repeated for credit.

PSC 8998. Advanced Research. 1-12 Credits.

Limited to students preparing for the Doctor of Philosophy general examination. May be repeated for credit.

PSC 8999. Dissertation Research. 2-12 Credits.

Limited to Doctor of Philosophy candidates. May be repeated for credit.

BACHELOR OF ARTS WITH A MAJOR IN POLITICAL SCIENCE

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Prerequisite:

PSC 1001	Introduction to Comparative Politics
PSC 1002	Introduction to American Politics and Government
PSC 1003	Introduction to International Politics (or the equivalent)

Two courses in either economics or history*, and an additional four courses in the social sciences chosen from the following departments: ANTH (except ANTH 1001, ANTH 1005, or 3400s), COMM, GEOG, HMSR, LING, SMPA (except SMPA 2112, SMPA 3236, SMPA 2117), ORSC, PSYC, SPHR, SOC, IAFF, PSTD*, and WSTU*. Also, students can choose from the following courses:

HONR 2043	Honors Microeconomics
HONR 2044	Honors Macroeconomics
NSC 2126	Sea Power and Maritime Affairs
NSC 2160	Evolution of Warfare
NSC 2180	Amphibious Warfare

Twelve credit hours of introductory foreign language and statistics are strongly recommended

* In addition to the CCAS General Education Requirements (<http://columbian.gwu.edu/undergraduate/advising/gpac>) list of courses in social and behavioral sciences, courses in history, peace studies, and women's studies are considered social sciences for this requirement.

Required courses in the major:

30 credits of upper-division political science courses including:	
PSC 2101	Scope and Methods of Political Science
One course selected from each of the following groups:	
Group A (comparative politics):	
PSC 2330	Comparative Politics of Western Europe

PSC 2331	Comparative Politics of Central and Eastern Europe	PSC 2220	Public Opinion
PSC 2332	European Integration	PSC 2222	Science, Technology, and Politics
PSC 2334	Global Perspectives on Democracy	PSC 2223	Campaigns and Elections
PSC 2336	State-Society Relations in the Developing World	PSC 2224	Issues in Domestic Public Policy
PSC 2337	Development Politics	PSC 2225	Women and Politics
PSC 2338	Nationalism	PSC 2228	Media, Politics, and Government
PSC 2366	State-Society Relations in the Developing World	PSC 2229	Media and Politics
PSC 2367	Human Rights	PSC 2367W	Human Rights
PSC 2368	Politics in the Two Koreas	PSC 2377W	Comparative Politics of the Middle East
PSC 2369	Comparative Politics of South Asia	PSC 2992	Special Topics in American Politics and Government
PSC 2370	Comparative Politics of China and Northeast Asia	Group C (international politics, law, and organizations):	
PSC 2371	Politics and Foreign Policy of China	PSC 2439	International Political Economy
PSC 2373	Comparative Politics of Southeast Asia	PSC 2440	Theories of International Politics
PSC 2374	Politics and Foreign Policy of Japan	PSC 2442	International Organizations
PSC 2377	Comparative Politics of the Middle East	PSC 2444	Public International Law
PSC 2379	Politics and Foreign Policy of Israel	PSC 2446	U.S. Foreign Policy
PSC 2381	Comparative Politics of Middle and Southern Africa	PSC 2449	International Security Politics
PSC 2383	Comparative Politics of Latin America	PSC 2461	European-Atlantic Relations
PSC 2993	Special Topics in Comparative Politics	PSC 2468	Post-Soviet Foreign Policy
Group B (American government and politics):		PSC 2475	International Relations of East Asia
PSC 2211	State and Urban Politics	PSC 2476	The Arab-Israeli Conflict
PSC 2212	State and Urban Policy Problems	PSC 2478	International Relations of the Middle East
PSC 2213	Judicial Politics	PSC 2482	African International Politics
PSC 2214	U.S. Constitutional Law and Politics I	PSC 2484	International Relations of Latin America
PSC 2215	U.S. Constitutional Law and Politics II	PSC 2994	Special Topics in International Relations
PSC 2216	The American Presidency	Group E (political thought):	
PSC 2217	Executive Branch Politics	PSC 2105	Major Issues of Western Political Thought I
PSC 2218	Legislative Politics	PSC 2106	Major Issues of Western Political Thought II
PSC 2219	Political Parties and Interest Groups	PSC 2107	20th-Century Political Thought
		PSC 2108	Freedom and Equality

PSC 2110	American Political Thought
PSC 2120	Freedom in American Thought and Popular Culture
PSC 2991	Special Topics in Political Thought
No more than 3 credits of the following may be credited toward the major; this course does not satisfy the distribution requirement:	
PSC 2987	Internship: Political Science
Specific group credit for offerings of the following is determined by the undergraduate advisor:	
PSC 2990	Selected Topics
Every major must complete the following (which counts toward the 30-credit requirement but does not satisfy group distribution requirements) in the junior or senior year. A graduate course may be substituted for the proseminar requirement with the written permission of the instructor and the undergraduate advisor:	
PSC 3192W	Proseminar: Political Science

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, students must have a GPA in the major of 3.5 or higher. Those with a GPA in the major of 3.8 and higher will be recommended for Special Honors. Those with a GPA in the major between 3.5 and 3.7 must complete an independent research project, usually done in PSC 3192, that has been approved as meriting Special Honors by two members of the Political Science faculty.

BACHELOR OF ARTS WITH A MAJOR IN POLITICAL SCIENCE (PUBLIC POLICY FOCUS)

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Prerequisite:

PSC 1001	Introduction to Comparative Politics
PSC 1002	Introduction to American Politics and Government
PSC 1003	Introduction to International Politics

Required courses in the major: 30 credit hours of upper-division courses in political science distributed as follows:

PSC 2101	Scope and Methods of Political Science
9 credits in policy-oriented courses from the following:	
PSC 2212	State and Urban Policy Problems
PSC 2217	Executive Branch Politics
PSC 2222	Science, Technology, and Politics
PSC 2224	Issues in Domestic Public Policy
PSC 2446	U.S. Foreign Policy
One policy-oriented proseminar	
PSC 3192W	Proseminar: Political Science (topic must be policy oriented)
3 credits from each of the following groups:	
Group A (comparative politics):	
PSC 2330	Comparative Politics of Western Europe
PSC 2331	Comparative Politics of Central and Eastern Europe
PSC 2332	European Integration
PSC 2334	Global Perspectives on Democracy
PSC 2336	State-Society Relations in the Developing World
PSC 2337	Development Politics
PSC 2338	Nationalism
PSC 2366	State-Society Relations in the Developing World
PSC 2367	Human Rights
PSC 2368	Politics in the Two Koreas
PSC 2369	Comparative Politics of South Asia
PSC 2370	Comparative Politics of China and Northeast Asia
PSC 2371	Politics and Foreign Policy of China
PSC 2373	Comparative Politics of Southeast Asia
PSC 2374	Politics and Foreign Policy of Japan
PSC 2377	Comparative Politics of the Middle East
PSC 2379	Politics and Foreign Policy of Israel

PSC 2381	Comparative Politics of Middle and Southern Africa
PSC 2383	Comparative Politics of Latin America
PSC 2993	Special Topics in Comparative Politics
Group B (American government and politics):	
PSC 2211	State and Urban Politics
PSC 2213	Judicial Politics
PSC 2214	U.S. Constitutional Law and Politics I
PSC 2215	U.S. Constitutional Law and Politics II
PSC 2216	The American Presidency
PSC 2218	Legislative Politics
PSC 2219	Political Parties and Interest Groups
PSC 2220	Public Opinion
PSC 2223	Campaigns and Elections
PSC 2225	Women and Politics
PSC 2228	Media, Politics, and Government
PSC 2229	Media and Politics
PSC 2992	Special Topics in American Politics and Government
Group C (international politics, law, and organizations):	
PSC 2439	International Political Economy
PSC 2440	Theories of International Politics
PSC 2442	International Organizations
PSC 2444	Public International Law
PSC 2446	U.S. Foreign Policy
PSC 2449	International Security Politics
PSC 2461	European-Atlantic Relations
PSC 2468	Post-Soviet Foreign Policy
PSC 2475	International Relations of East Asia
PSC 2476	The Arab-Israeli Conflict
PSC 2478	International Relations of the Middle East
PSC 2482	African International Politics
PSC 2484	International Relations of Latin America

PSC 2994 Special Topics in International Relations

Group E (political thought):

PSC 2105 Major Issues of Western Political Thought I

PSC 2106 Major Issues of Western Political Thought II

PSC 2107 20th-Century Political Thought

PSC 2108 Freedom and Equality

PSC 2110 American Political Thought

PSC 2120 Freedom in American Thought and Popular Culture

PSC 2991 Special Topics in Political Thought

3 credits in an upper-division political science elective

Six courses in other social sciences must include:

ECON 1011 Principles of Economics I

ECON 1012 Principles of Economics II

ECON 2101 Intermediate Microeconomic Theory

One of the following:

ECON 2159 Government Regulation of the Economy

ECON 3161 Public Finance: Expenditure Programs

ECON 3162 Public Finance: Taxation

SOC 2105 Social Problems in American Society

SOC 2112 Evaluation Research

SOC 2161 Sociology of Complex Organizations

SOC 2170 Class and Inequality in American Society

One of the following:

STAT 1053 Introduction to Statistics in Social Science

STAT 1129 Introduction to Computing

STAT 2118 Regression Analysis

STAT 2123 Introduction to Econometrics

STAT 2183 Statistical Computing Packages

Twelve credits of introductory foreign language and statistics are strongly recommended

COMBINED PROGRAM REQUIREMENTS

The Bachelor of Arts with a major in political science may be taken as a combined degree with the following six master's programs:

- Master of Arts in the field of political science
- Master of Arts in the field of legal institutions and theory
- Master of Professional Studies in the field of political management
- Master of Professional Studies in the field of legislative affairs
- Master of Public Policy (available only to majors in the public policy focus)
- Master of Public Administration

Departmental majors who are interested in pursuing a combined bachelor's/master's program should consult the undergraduate program advisor at the beginning of their junior year (after completing 60 credits at GW).

The combined degree program leading to the Master of Arts in the field of political science is available only to students who qualify for Special Honors. Interested students should consult the undergraduate program advisor as soon as possible in order to select courses appropriately.

MINOR IN POLITICAL SCIENCE REQUIREMENTS

Required:

PSC 1001	Introduction to Comparative Politics
----------	--------------------------------------

PSC 1002	Introduction to American Politics and Government
----------	--

PSC 1003	Introduction to International Politics (or equivalent)
----------	--

12 credits of upper-division political science courses including:

PSC 2101	Scope and Methods of Political Science
----------	--

Group E (political thought) - As part of the 12 upper-division credits, select one of the following:

PSC 2105	Major Issues of Western Political Thought I
----------	---

PSC 2106	Major Issues of Western Political Thought II
----------	--

PSC 2107	20th-Century Political Thought
----------	--------------------------------

PSC 2108	Freedom and Equality
----------	----------------------

PSC 2110	American Political Thought
----------	----------------------------

PSC 2120	Freedom in American Thought and Popular Culture
----------	---

PSC 2991	Special Topics in Political Thought
----------	-------------------------------------

9 credits in the social sciences from the following departments: ANTH (except ANTH 1001, ANTH 1005, or ANTH 3400s), COMM, GEOG, HMSR, LING, SMPA (except SMPA 2112, SMPA 3236, SMPA 2117), ORSC, PSYC, SPHR, SOC, IAFF, PSTD, and WSTU. Students can also choose from the following courses:

HONR 2043	Honors Microeconomics
-----------	-----------------------

HONR 2044	Honors Macroeconomics
-----------	-----------------------

NSC 2126	Sea Power and Maritime Affairs
----------	--------------------------------

NSC 2160	Evolution of Warfare
----------	----------------------

NSC 2180	Amphibious Warfare
----------	--------------------

MINOR IN PUBLIC POLICY

Required courses (18 credits):

PSC 1001	Introduction to Comparative Politics
----------	--------------------------------------

or PSC 1001W	Intro to Comparative Politics
--------------	-------------------------------

PSC 1002	Introduction to American Politics and Government
----------	--

or PSC 1002W	Intro-American Politics & Govt
--------------	--------------------------------

PSC 1003	Introduction to International Politics
----------	--

PSC 2101	Scope and Methods of Political Science
----------	--

ECON 1011	Principles of Economics I
-----------	---------------------------

ECON 1012	Principles of Economics II
-----------	----------------------------

Three courses (9 credits) from the following:

PSC 2212	State and Urban Policy Problems
----------	---------------------------------

PSC 2217	Executive Branch Politics
----------	---------------------------

PSC 2222	Science, Technology, and Politics
----------	-----------------------------------

PSC 2224	Issues in Domestic Public Policy
----------	----------------------------------

PSC 2446	U.S. Foreign Policy
----------	---------------------

One course (3 credits) from the following:

ECON 2101	Intermediate Microeconomic Theory
ECON 2159	Government Regulation of the Economy
ECON 3161	Public Finance: Expenditure Programs
ECON 3162	Public Finance: Taxation
SOC 2105	Social Problems in American Society
or SOC 2105W	Social Problems in Amer Society
SOC 2112	Evaluation Research
SOC 2161	Sociology of Complex Organizations
SOC 2170	Class and Inequality in American Society
or SOC 2170W	Class/Inequality-Amer Society

MASTER OF ARTS IN THE FIELD OF LEGAL INSTITUTIONS AND THEORY

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>)

Prerequisite: a bachelor's degree from an accredited college or university, or an equivalent degree, and high undergraduate scholastic standing.

The following requirements must be fulfilled. Other electives may be selected with approval of the Director of Graduate Studies.

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

Required: 30 credits consisting of:

PSC 6113	The Constitution: History and Ideas
PSC 6114	Theories of Judicial Review
At least two courses (students may take all four) from the following:	
PSC 8213	Judicial Politics
PSC 8215	Law, Politics, and Society
PSC 8388	Selected Topics in Comparative Politics
PSC 6987	Legal Internship
Four to six courses from the following:	
PSC 8210	American Political Process

PSC 8217	Executive Branch Politics
PSC 8218	Legislative Politics
PSC 8219	Political Parties and Elections
PSC 6444	Politics of International Law
HIST 6370	US Legal History

MASTER OF ARTS IN THE FIELD OF POLITICAL SCIENCE

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Prerequisite: a bachelor's degree from an accredited college or university, or an equivalent degree, and high undergraduate scholastic standing.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

Required: A research tool, which may be reading knowledge of a modern foreign language, a specified level of knowledge in statistics, or two graduate-level courses in a cognate discipline. Students must take at least five courses selected according to departmental guidelines in their chosen field and pass a comprehensive exam in that field. Four fields are available: American politics; international relations; comparative politics; and public policy. Students are required to take at least two courses outside of their primary field.

Students may elect one of the following programs:

1. 30 credits of graduate course work, including PSC 6998 Thesis Research- PSC 6999 Thesis Research, and the satisfactory completion of a master's thesis; or
2. 33 credits of graduate course work without a thesis.

1.

DOCTOR OF PHILOSOPHY IN THE FIELD OF POLITICAL SCIENCE

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Students of outstanding ability are admitted to the doctoral program upon recommendation of a departmental graduate committee and the concurrence of Columbian College.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

The requirements for the Doctor of Philosophy Program (p. 71).

Required: Two research tools, two comprehensive exams covering a primary and supporting field, an original research paper, and a dissertation demonstrating the capacity to undertake original and significant research. The research tools may be selected from reading knowledge of a modern foreign language, a specified level of knowledge in statistics, or two graduate-level courses in a cognate discipline. The research paper must display the student's ability to conduct original research and be completed by the second year in the program. Students prepare for the comprehensive exams by taking at least five courses in their primary field and at least four courses in their supporting field, selected according to departmental guidelines. Three primary fields are available: American politics; international relations; and comparative politics. In addition, political theory, public policy, and research methodology are available as supporting fields. Petitions for a self-designed minor field (e.g., political communications) composed primarily of courses not offered by the established fields can be jointly proposed by students and faculty. All students must complete a sequence of courses in research methodology comprising PSC 8101 Introduction to Empirical Political Analysis, PSC 8108 Craft of Political Inquiry, and PSC 8109 Systematic Inquiry and Research Design. Completion of PSC 8120 Nonlinear Models with a grade of *B* or higher will be taken as evidence that a student has achieved the level of knowledge in statistics necessary to satisfy one of the research tool requirements as outlined above.

A recommendation to the dean for admission to candidacy, or the dissertation research stage, will be considered upon satisfactory completion of all course work, tool requirements, research paper, field examinations, and successful defense of the dissertation prospectus. Students must pass their primary field examination with a satisfactory pass or higher and must pass their supporting field examination with a bare pass or higher in order to be considered eligible for promotion to candidacy. Admission to candidacy is permitted only if the student's performance on the examinations and in the course work gives a good indication of success in the second unit. Passing the field examinations does not in itself ensure admission to candidacy.

The dissertation prospectus must outline the central research question(s), relate the proposed research to the existing literature, detail a research methodology, and explain the nature of the original contribution that the completed project will provide. The prospectus must be presented and defended in an open forum, which all faculty and doctoral students are invited to attend. The full dissertation must be similarly defended. A dual degree program enables students to earn

the Master of Public Policy along with the Ph.D. in the field of political science.

PROFESSIONAL PSYCHOLOGY

Offered through the Columbian College of Arts and Sciences' social and behavioral sciences discipline, the Professional Psychology Program offers the graduate degrees Master of Arts in the field of forensic psychology and Doctor of Psychology (Psy.D.) in the field of clinical psychology.

The M.A. program is designed to address a growing need for criminal profilers, competency experts, psychological evaluators, and counselors. Students are immersed in courses ranging from the psychopathology of serial criminals and terrorist agents to the treatment of sex offenders and ethical issues involving interrogation. The Forensic Psychology program offers two tracks; the applied forensics track prepares students for careers in law enforcement or homeland security, while the applied psychology track prepares students for careers as providers of direct services to clients in organizations such as rehabilitational facilities and community action organizations, and can serve as a springboard for clinical work at the doctoral level. Students are required to complete 250 hours of externship training, tailored to their professional interests.

The Psy.D. program offers a substantive introduction to the basic science aspects of psychology and the skills required of a clinical psychologist. Students take a series of foundation courses outlining biological, cognitive, social, and cultural foundations; basic and more advanced clinical courses, such as psychopathology, group dynamics, assessment, psychotherapy, supervision, and consultation; and research methods, statistics, history and systems, and ethics courses. The advanced curriculum offers courses tailored within three broad tracks: adult, assessment, and child. In addition to didactic courses, students work with a diverse patient population at different public and private agencies as well as at the department's in-house clinic. Upon completion of course work and prior to receiving the Psy.D., students perform a one-year, full-time internship.

The Professional Psychology program also offers the Graduate Certificate in LGBT health policy and practice.

GRADUATE

Master's program

- Master of Arts in the field of forensic psychology (p. 334)

Doctoral program

- Doctor of Psychology in the field of clinical psychology (p. 335)

CERTIFICATE

- Graduate Certificate in LGBT health policy and practice (p. 336)

FACULTY

Professor L.J. Ingraham (*Professional Psychology Program Director*)

Associate Professors R. Cooter (*Forensic Psychology Program Director*), C. Marmarosh, R. Ruth

Assistant Professor R. Lopez Sharifi, J. Sexton

Adjunct Professors Y.E. Aleshina, P. Gedo, L. Gump, S. Hedlund, D. King, J. Viola

Professorial Lecturers J. Babcock, M. Forbes, S. Forssell, A. Gartner, D. Grasso, J. Gorin, C. Holl, S. Kane, E. Klosson, P. Magaletta, B. McConnell, J. McNamara, B. Sheppard, P. Snejevski, R. Warrior, A. Washington, N. Xenakis, H. Zelle

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Note: PSYD courses are limited to students enrolled in the Professional Psychology program except by permission of the director. See the Department of Psychology for the degree program leading to the Doctor of Philosophy in the field of clinical psychology.

- Forensic Psychology (FORP) (p. 1084)
- Professional Psychology (PSYD) (p. 1257)

MASTER OF ARTS IN THE FIELD OF FORENSIC PSYCHOLOGY

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (<http://bulletin.gwu.edu/arts-sciences/#degreeregulationtext>).

37 credits, including 25 credits in required courses, 12 credits in required and/or elective courses in one track, and successful completion of the master's comprehensive examination.

Required core

FORP 6101	Psychology and the Legal System I
FORP 6102	Psychology and the Legal System II
FORP 6103	Theories of Criminal Behavior
FORP 6104	Psychopathology
FORP 6105	Basics of Psychological Assessment
FORP 6106	Ethics in Forensic Psychology
FORP 6107	Research and Statistics
FORP 6108	Consultation and Testimony
FORP 6130	Practicum/Externship

One of the following tracks:

Applied forensics track

Four of the following recommended elective courses:

FORP 6116	Correctional Psychology
FORP 6117	Interrogation and Interviewing
FORP 6118	Psychological Profiling
FORP 6119	Police Psychology
FORP 6120	Counterintelligence
FORP 6128	Terrorism and Counterterrorism

Applied psychology track

FORP 6109	Evaluation and Treatment of Offenders
FORP 6110	Forensic Psychological Assessment

Two of the following recommended elective courses:

FORP 6111	Evaluation and Treatment of Sex Offenders
FORP 6112	Substance Abuse Evaluation and Treatment
FORP 6113	Victimology
FORP 6114	Issues in Family Law
FORP 6115	Children and Adolescents in the Legal System

A Master's Comprehensive Examination is required. The program is offered on a full- or part-time basis.

DOCTOR OF PSYCHOLOGY IN THE FIELD OF CLINICAL PSYCHOLOGY

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>)

Prerequisite: a bachelor's degree with relevant background and experience in psychology or its equivalent. Students who lack adequate preparation will be expected to complete prerequisite undergraduate courses during the first year of the program; credit for such courses does not apply to the degree.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

Successful completion of all required course work and practical requirements and the general examination.

The Degree of Master of Psychology

Students who have earned 53 credits toward the Psy.D. may receive the M.Psy. degree. Further information on the requirements of the Doctor of Psychology degree appears under Professional Psychology in the Courses of Instruction.

The three-year program includes:

The core curriculum:	
PSYD 8201	Psychological Assessment I
PSYD 8202	Psychological Assessment II
PSYD 8270	Current Topics in Clinical Psychology (Courses offered each year under PSYD 8270 include: Psychological Assessment III, Empirical Research, Prevention, Supervision)
PSYD 8203	Practicum in Clinical Psychology
PSYD 8204	Biological Bases of Clinical Psychology
PSYD 8205	Psychodynamic Psychopathology
PSYD 8206	Cognitive Bases of Clinical Psychology
PSYD 8207	Group and Organizational Dynamics
PSYD 8209	Statistics and Research Design
PSYD 8210	Ethics and Professional Issues
PSYD 8220	Psychodynamic Psychotherapy
PSYD 8221	Psychodynamic Psychotherapy

PSYD 8222	Behavioral-Cognitive Therapies
PSYD 8225	Theories of Mind I
PSYD 8226	Ego Psychology/Object Relations Theory
PSYD 8227	History and Systems of Clinical Psychology
PSYD 8260	Lifespan Development
PSYD 8231	Short-Term Psychotherapy (PSYD 8231/ Short-Term Psychotherapy or PSYD 8240/Group Psychotherapy is required)
PSYD 8240	Group Psychotherapy (PSYD 8231/ Short-Term Psychotherapy or PSYD 8240/Group Psychotherapy is required)
PSYD 8246	Community Intervention (Consultation; Choice of PSYD 8246/Community Intervention or PSYD 8270/Prevention)

Completion of the practicum seminar/PSYD 8203 for each fall and spring semester as well as two practicum during the summers

Courses chosen from the areas of adult and child psychotherapy or psychological assessment to total 83 credits

Satisfactory completion of the General Examination

In addition, successful completion of an externship—a year-long, part-time supervised clinical assignment—is required in two years of the program. A failed externship may, in exceptional circumstances and with the approval of the program director, be repeated. If the student fails a second time, no further opportunity will be provided, and the student's degree candidacy is terminated.

A one-year, full-time internship at an institution approved by the program faculty is required for completion of the degree program. If the student fails the internship, no further opportunity will be provided, and the student's degree candidacy is terminated.

The Doctor of Psychology program is offered on a full-time basis only.

General Requirements

The program leading to the degree of Doctor of Psychology requires the satisfactory completion of a minimum of 83 credits of approved graduate work. A maximum of 12 credits may be taken in courses offered by the other affiliated members of the Consortium of Universities. Doctor of Psychology students have an overall five-year time limit for completion of all degree requirements.

Transfer of Credit

Provisions are the same as those of the Doctor of Philosophy Program, above, except that up to 27 credits may be transferred into the program.

The General Examination

Each student is required to complete the General Examination no later than the beginning of the final semester of the program. A student who fails to pass any part of the General Examination may, in exceptional circumstances, and with the approval of the program, repeat the examination at the next scheduled examination date. If the student fails a second time, no further opportunity to take the examination is permitted, and the student's degree candidacy is terminated.

GRADUATE CERTIFICATE IN LGBT HEALTH POLICY AND PRACTICE

REQUIREMENTS

Specific admission requirements can be found on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

Required:

PSYD 6201	Multi-disciplinary LGBT Health
PSYD 6202	LGBT Mental Health
PSYD 6203	LGBT Health Policy
PSYD 6211	LGBT Health Capstone
PSYD 6212	LGBT Health Capstone II

Elective:

3 credits selected from the following:

PSYD 6221	LGBT Health Current Topic
PSYD 8270	Current Topics in Clinical Psychology
PSYC/WSTU 8275	Women and Health
PUBH 6099	Topics in Public Health (Designing and Evaluating HIV Prevention Programs)
PUBH 6514	Preventing Health Disparities

Students may petition to include other courses as electives with program director approval. Electives should be graduate level courses offered at GW that pertain to:

- (a) the LGBT population (specifically, not the broader minority population),
- (b) physical or mental health with a focus on minority/underserved populations, or

(c) public policy with a focus on health and/or minority/underserved populations.

PSYCHOLOGY

As part of the social and behavioral sciences division within the Columbian College of Arts and Sciences, the major in psychology exposes students to basic psychological theory, helps them develop research skills, and teaches them how to approach psychological and social issues within communities and societies.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in psychology (p. 342)
- Combined program (p. 343)

Minor

- Minor in psychology (p. 343)

GRADUATE

Doctoral program

- Doctor of Philosophy in the field of psychology (p. 343)

FACULTY

Professors P. Barratt, I.A. Bowleg, J.M. Ganiban, G. Howe, L.R. Offermann, P.J. Poppen, L.A. Rothblat, C.K. Sigelman (*Chair*), P. Wirtz, M.C. Zea

Associate Professors D.P. Costanza, T.L. Dodge, S. Dopkins, C. Gee, S. Lambert, S.D. Molock, P.J. Moore, H.N. Le, C.A. Rohrbeck, S. Shomstein, M.H. Sohn, M. Stock, A.N. Zucker

Assistant Professors C. Beil (*Research*), D.J. Kravitz, D.E. Schell, G.K. Wu

Adjunct Professor K. Ross-Kidder

Lecturers P.J. Woodruff

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Departmental prerequisite: PSYC 1001 General Psychology is prerequisite to all undergraduate psychology courses.

PSYC 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the Schedule of Classes for more details. Restricted to First-year students in CCAS.

PSYC 1001. General Psychology. 3 Credits.

Fundamental principles underlying human behavior.

PSYC 2011. Abnormal Psychology. 3 Credits.

Causes, diagnosis, treatment, and theories of various types of maladjustments and mental disorders. Prerequisite: PSYC 1001.

PSYC 2011W. Abnormal Psychology. 3 Credits.

Causes, diagnosis, treatment, and theories of various types of maladjustments and mental disorders. Prerequisite: PSYC 1001.

PSYC 2012. Social Psychology. 3 Credits.

Social foundations of behavior: cognition, motivation, role behavior, communication, small-group processes, and attitudes. Prerequisite: PSYC 1001.

PSYC 2013. Developmental Psychology. 3 Credits.

Introduction to the study of human development; theory and research concerning changes in physical, cognitive, and social functioning and influences on the developing individual. Prerequisite: PSYC 1001.

PSYC 2014. Cognitive Psychology. 3 Credits.

Introduction to the study of cognition; review of data and theories on the topics of perception, attention, memory, language, reasoning, and decision making. Prerequisite: PSYC 1001.

PSYC 2015. Biological Psychology. 3 Credits.

Introduction to the biological basis of behavior; review of data and empirical methods on the topics of neural structure and function, brain damage, neuroanatomy, genes, hormones, and their influence on behavior. Prerequisite: PSYC 1001.

PSYC 2101. Research Methods-Psychology. 3 Credits.

Survey of research designs (e.g., case studies, correlational designs, experiments), methods (e.g., questionnaires, observations), and measurement issues (e.g., reliability and validity). Prerequisite or corequisite: PSYC 1001, STAT 1053.

PSYC 2508. Humanistic Psychology. 3 Credits.

Critical examination of humanistic psychology. Emphasis on role of consciousness in human behavior. Philosophic foundations, existential, phenomenological, and transpersonal psychology. (Formerly PSYC 3108) Prerequisites: PSYC 1001.

PSYC 2514. Adult Development and Aging. 3 Credits.

Psychological aging and development during the adult years, with an emphasis on theories of adult development and research on changes in cognitive functioning and social adjustment in early, middle, and later adulthood. (Formerly PSYC 3114) Prerequisites: PSYC 1001.

PSYC 2529. Theories of Personality. 3 Credits.

Survey of personality theories; emphasis on their application to problems of individuals. (Formerly PSYC 3129) Prerequisites: PSYC 1001.

PSYC 2531. Psychological Tests. 3 Credits.

Survey of psychological tests and their more common uses in business, industry, government, law, medicine, and education. Material fee. (Formerly PSYC 3131) Prerequisites: PSYC 1001.

PSYC 2544. Industrial/Organizational Psychology. 3 Credits.

Psychological concepts and methods applied to problems of personnel management, employee motivation and productivity, supervisory leadership, and organizational development. Formerly PSYC 2144. Prerequisites: ORSC 1109 or PSYC 1001.

PSYC 2550. Psychology of Sex Differences. 3 Credits.

Relevant biological, psychological, and sociological influences on males and females in the development of sex differences; hormonal differences, gender identity, differential socialization of sons and daughters, masculinity/femininity, cultural evaluation of male and female roles. Survey of relevant psychological theory. Emphasis on empirical research and hypothesis testing. (Formerly PSYC 3150) Prerequisites: PSYC 1001.

PSYC 2554. Psychology of Crime and Violence. 3 Credits.

Examination of many psychological aspects of criminal behavior; personality of criminals and of psychological processes affecting behavior. (Formerly PSYC 3154) Prerequisites: PSYC 1001.

PSYC 2556. Psychology of Attitudes and Public Opinion. 3 Credits.

Psychology of opinion formation, measurement of opinion, social determinants of attitudes, psychological processes in propaganda, bases of receptivity to propaganda, psychological warfare. (Formerly PSYC 3156) Prerequisites: PSYC 1001.

PSYC 2560. Group Dynamics. 3 Credits.

Relationship of the individual to groups, collectivities, and larger social systems. Theory, research, and applications of group and organizational processes. Prerequisites: PSYC 1001 or ORSC 1109.

PSYC 2570. Peer Education. 3 Credits.

This is a course designed to train George Washington University undergraduate students to be health peer educators. Students will be trained in various topics related to mental health, physical health, and alcohol and/or other drugs, and will gain the skills needed for outreach programming. Prerequisites: PSYC 1001.

PSYC 2588. Attitudes Toward Death and Dying. 3 Credits.

Exploration of the many different aspects, attitudes, and experiences associated with the process of death and dying. (Formerly PSYC 3188) Prerequisites: PSYC 1001.

PSYC 2596. History and Systems of Psychology. 3 Credits.

A survey and integration of the major viewpoints and concepts of psychology. Recommended for students planning graduate study. (Formerly PSYC 4196) Prerequisites: PSYC 1001.

PSYC 2945. Psychological Study of Spirituality. 3,4 Credits.

The complex interrelationship between psychology and spirituality: health and wellness; development of a spiritual life; psychological factors involved in spirituality; therapy and multicultural issues. (Formerly PSYC 3945) Prerequisites: PSYC 1001.

PSYC 3112. Psychology of Adolescence. 3 Credits.

Psychological characteristics and problems peculiar to adolescence, with emphasis on application of psychology to the solution of such problems. Prerequisite: PSYC 2101 and PSYC 2013.

PSYC 3115. Developmental Psychopathology. 3 Credits.

The origins of child psychopathology, including developmental perspectives and the potential contributions of child-, family-, and community-based characteristics to the emergence of psychopathology. The development of specific childhood disorders. Prerequisite: PSYC 2101 AND PSYC 2011 OR PSYC 2013.

PSYC 3118. Neuropsychology. 3 Credits.

Analysis of neural processes underlying behavior. Basic structure and functions of the nervous system, with emphasis on sensory processes, learning and memory, motivation, and emotion. Prerequisite: PSYC 2101 AND PSYC 2014 OR PSYC 2015.

PSYC 3121. Memory and Cognition. 3 Credits.

An examination of the psychological processes underlying human memory and cognition. Topics cover theoretical and experimental issues involving a range of cognitive function from attention and pattern recognition to learning and memory. Prerequisite: PSYC 2101 AND PSYC 2014 OR PSYC 2015.

PSYC 3122. Cognitive Neuroscience. 3 Credits.

How the structure and functions of the brain are related to cognitive processes and their associated behaviors. The biological bases of behavior and mental activity. Research and case studies by cognitive psychologists, neuroscientists, psychiatrists, and linguists, focusing on how the brain affects pattern recognition, attention, short-term and long-term memory processes, and language. Prerequisite: PSYC 2101 AND PSYC 2014 OR PSYC 2015.

PSYC 3124. Visual Perception. 3 Credits.

An overview of human perception, ranging from the detection of simple stimuli to the identification of objects and events. Perceptions of color, motion, and spatial layout. Research methodology, biological foundations, and theoretical issues. Prerequisite: PSYC 2101 AND PSYC 2014 OR PSYC 2015.

PSYC 3125. Cross-Cultural Psychology. 3 Credits.

Introduction to the theory, methods, and research of cross-cultural psychology, with emphasis on immigrants and ethnic minorities in the United States and on other cultures. Prerequisites: PSYC 2101 and PSYC 2011 or PSYC 2012.

PSYC 3126. Multicultural Psychology. 3 Credits.

The influence of culture on major psychology concepts Current theories and research on culture, with culture being broadly defined to include race, ethnicity, gender, sexual orientation, disability status, and socioeconomic status. Empirical methodologies in cultural psychology, and appreciation of cultural groups within the United States. Issues of culture in the interpretation of personal experiences and in application of cultural diversity issues to various settings. Culturally relevant styles of communication, values from different cultures, racial identity, power and privilege, and issues around health and mental health. Multiculturalism in the modern diverse society. Prerequisite: PSYC 2101 and PSYC 2011 or PSYC 2012.

PSYC 3126W. Multicultural Psychology. 3 Credits.

The influence of culture on major psychology concepts. Current theories and research on culture, with culture being broadly defined to include race, ethnicity, gender, sexual orientation, disability status, and socioeconomic status. Empirical methodologies in cultural psychology, and appreciation of cultural groups within the United States. Issues of culture in the interpretation of personal experiences and in application of cultural diversity issues to various settings. Culturally relevant styles of communication, values from different cultures, racial identity, power and privilege, and issues around health and mental health. Multiculturalism in the modern diverse society. Prerequisites: Psysc 2101 and (Psysc 2011 or Psysc 2012).

PSYC 3128. Health Psychology. 3 Credits.

Current research in the area of health psychology, with special attention to psychological factors related to health and illness, psychological intervention with medical patients, and psychological approaches to illness prevention and health promotion. Prerequisite: PSYC 2101.

PSYC 3132. Social and Personality Development. 3 Credits.

Examination of personal, emotional, and social development from infancy to adolescence and influences on that development. Prerequisite: PSYC 2101 and PSYC 2013.

PSYC 3170. Clinical Psychology. 3 Credits.

An exploration of the history, functions, and concerns of the clinical psychologist. Assessment, treatment, community approaches, ethics. Prerequisite: PSYC 2011 and PSYC 2101.

PSYC 3172. Psychopathology & the Media. 3 Credits.

How abnormal behaviors and mental disorders are portrayed in film and the media, including analysis of the accuracy of these portrayals, focusing on symptomatology, etiology, and treatment of adult psychopathology. Prerequisite: PSYC 2101 and PSYC 2011.

PSYC 3173. Community Psychology. 3 Credits.

The origins and current practice of community psychology, and comparison of community psychological approaches with traditional clinical perspectives. The role of psychology in addressing social issues facing communities; methods for research and intervention targeting communities. Prerequisite: PSYC 2101 and PSYC 2011.

PSYC 3193. Seminar in Industrial/Organizational Psychology. 3 Credits.

Selected specialized topics in the field of psychology and work behavior, such as human ability and personality, decisions and risk behavior, organizational change, and leadership. May be repeated for credit. (Formerly PSYC 4193). Prerequisites: PSYC 1001 and PSYC 2544 or permission of instructor.

PSYC 3198. Current Research Issues. 3 Credits.

Recent studies in psychology, including studies performed by members of the class; emphasis on student participation. May be repeated once for credit. Prerequisites: PSYC 1001 and PSYC 2101.

PSYC 3199. Current Topics in Psychology. 3 Credits.

Topics vary. May be repeated once for credit provided the topic differs. Prerequisites: PSYC 1001 and PSYC 2101.

PSYC 3591. Supervised Research Internship. 1-3 Credits.

Open to qualified students with permission of a supervising faculty member. Arrangements must be made with the faculty supervisor prior to registration; a list of participating faculty members and their research specialties is available from the department. May be repeated for credit; PSYC 3591 and PSYC 4591 combined may be taken for a total of 9 credits maximum. Prerequisites: PSYC 1001, PSYC 2101.

PSYC 3592. Field Internship. 3 Credits.

Senior psychology majors spend a minimum of six hours per week in a supervised internship in a local mental health, rehabilitation, school, or community setting. Students must have weekly blocks of time available. Restricted to senior psychology majors. Prerequisites: PSYC 1001 and PSYC 2101.

PSYC 4106W. Research Lab in Sensation and Perception. 4 Credits.

Capstone course focused on the study of sensation and perception. Students examine previous research, design and carry out research projects, and write psychological research reports. Prerequisites: PSYC 1001, PSYC 2101, and PSYC 2014 or PSYC 2015.

PSYC 4107W. Research Lab in Cognitive Neuroscience. 4 Credits.

A capstone course focused on the study of cognitive neuroscience in which students examine previous research, design and carry out research projects, and write psychological research reports. Prerequisites: PSYC 1001, PSYC 2101, and (PSYC 2014 or PSYC 2015).

PSYC 4201W. Research Lab in Clinical/Community Psychology. 4 Credits.

A capstone course focused on the study of clinical/community psychology in which students examine previous research, design and carry out research projects, and write psychological research reports. Prerequisites: PSYC 1001 and PSYC 2101 and PSYC 2011 or PSYC 2012 or PSYC 2013.

PSYC 4202W. Research Lab in Applied Social Psychology. 4 Credits.

A capstone course focused on the study of topics in applied social psychology, such as discrimination and health, in which students examine previous research, design and carry out research projects, and write psychological research reports. Prerequisites: PSYC 1001 and PSYC 2101 and (PSYC 2011 or PSYC 2012 or PSYC 2013).

PSYC 4203W. Research Lab in Developmental Psychology. 4 Credits.

A capstone course focused on the study of developmental psychology in which students examine previous research, design and carry out research projects, and write psychological research reports. Laboratory fee. Prerequisites: PSYC 1001, PSYC 2101, and PSYC 2011 or PSYC 2012 or PSYC 2013.

PSYC 4591. Independent Research. 1-3 Credits.

Open to qualified students by permission to pursue an independent research project with the supervision of a faculty member; arrangements must be made with the sponsoring faculty member prior to registration. May be repeated for credit; PSYC 3591 and PSYC 4591 may be taken for a total of 9 credits maximum. (Formerly PSYC 4191) Restricted to . Prerequisites: PSYC 1001, PSYC 2101.

PSYC 4997. Honors Seminar. 3 Credits.

Selected topics in psychology that change each semester. Intended primarily for students in the Special Honors program in psychology. May be repeated once for credit. Prerequisites: PSYC 1001 and PSYC 2101. (Formerly PSYC 4197).

PSYC 6998. Thesis Research. 3 Credits.**PSYC 6999. Thesis Research. 3 Credits.****PSYC 8202. Psychological Research Methods and Procedures. 3 Credits.**

Required in all graduate psychology programs. Includes philosophy of science, types of research design, and methods of data collection. Restricted to Graduate students only. Prerequisites: graduate standing, a laboratory course in psychology, and a course in statistics.

PSYC 8203. Experimental Foundations of Psychology: Learning, Memory, and Cognition. 3 Credits.

Current conceptions of learning, memory, and cognition; the research upon which these conceptions are based; applications to practical contexts. Restricted to Graduate students only.

PSYC 8204. Experimental Foundations of Psychology: Biological Basis of Behavior. 3 Credits.

Introduction to the structure and function of the nervous system. Topics include neural communication, sensory processes, memory, neuroendocrinology of sex differences and stress, psychiatric and neurodegenerative disorders. Restricted to Graduate students only.

PSYC 8207. Psychological Assessment I. 3 Credits.

Theoretical and clinical aspects of assessment; includes interviewing, psychometric tests, and projective techniques. Two-hour laboratory—diagnostic work at clinical facilities. Material fee. Restricted to Clinical psychology graduate students only.

PSYC 8208. Psychological Assessment II. 3 Credits.

Continuation of PSYC 8207. Theoretical and clinical aspects of assessment; includes interviewing, psychometric tests, and projective techniques. Two-hour laboratory—diagnostic work at clinical facilities. Material fee. Restricted to Clinical psychology graduate students only.

PSYC 8210. Developmental Theories and Issues. 3 Credits.

Orientation to the field of developmental psychology, with emphasis on traditional and contemporary theories, fundamental concepts and issues, and methodological approaches. Restricted to Graduate students only.

PSYC 8211. Community Psychology I. 3 Credits.

Survey of the history, theories, and values guiding community psychology; models of service delivery. Restricted to Graduate students only.

PSYC 8212. Community Psychology II. 3 Credits.

Continuation of PSYC 8211. Applications of the principles and theories of community psychology to interventions and research. Restricted to Graduate students only. Prerequisites: PSYC 8211.

PSYC 8218. Evidence-Based Interventions. 3 Credits.

Introduction to theory and technique of psychotherapeutic approaches of proven effectiveness. Restricted to Graduate students only.

PSYC 8219. Group Dynamics. 3 Credits.

PSYC 8220. Ethics and Professional Issues. 3 Credits.

The foundations of ethics and ethical decision making, with an emphasis on the APA Ethics Code. Ethical conflicts and issues in the areas of research and practice. Restricted to Graduate students only.

PSYC 8223. Seminar: Human Memory. 3 Credits.

Selected topics of current research interest in the area of human memory. Emphasis on encoding and retrieval processes, amnesia, and disorders of memory. Restricted to Graduate students only.

PSYC 8225. Behavioral Approaches to Child Assessment and Therapy. 3 Credits.

Child assessment and treatment from a behavioral viewpoint. The application of conditioning, reinforcement, and shaping principles with reference to specific disorders of childhood. Restricted to Graduate students only.

PSYC 8227. Seminar: Principles of Psychotherapy. 3 Credits.

For graduate students in clinical psychology. Patient's needs and demands on the therapist. Case participation heavily relied upon. Prerequisite: PSYC 8218.

PSYC 8228. Seminar: Principles of Psychotherapy. 3 Credits.

Continuation of PSYC 8227. For graduate students in clinical psychology. Patient's needs and demands on the therapist. Case participation heavily relied upon. Prerequisite: PSYC 8218.

PSYC 8231. Development of Psychometric Instruments. 3 Credits.

Quantitative techniques and principles used in construction, standardization, and evaluation of personality and ability measures for research and practice; quantification of human judgment for measurement purposes. Prerequisite: course in tests and measurements and an elementary course in statistics. Restricted to Graduate students only.

PSYC 8236. Ethnic and Racial Diversity in Psychology. 3 Credits.

Basic theoretical models of research in ethnic, racial, and cultural diversity and new directions in the field. The impact of being an ethnic minority in the United States. Restricted to Graduate students only.

PSYC 8237. The Practice of General Psychology I. 3 Credits.

Application of psychological principles and findings to a wide spectrum of human problems. Professional issues facing the psychologist offering services. Participation in the development, implementation, and evaluation of applied psychological services and projects. Restricted to Clinical psychology graduate students only.

PSYC 8238. The Practice of General Psychology II. 3 Credits.

Continuation of PSYC 8237. Application of psychological principles and findings to a wide spectrum of human problems. Professional issues facing the psychologist offering services. Participation in the development, implementation, and evaluation of applied psychological services and projects. Restricted to Clinical psychology graduate students only.

PSYC 8239. Lifespan Developmental Psychopathology I. 3 Credits.

Infancy, childhood, and adolescence. Restricted to Graduate students only.

PSYC 8240. Lifespan Developmental Psychopathology II. 3 Credits.

Continuation of PSYC 8239 - Adulthood. Restricted to Graduate students only.

PSYC 8243. Seminar: Psychology of Leadership in Organizations. 3 Credits.

Theories and issues related to the emergence and effectiveness of leaders, with focus on leadership behaviors and processes in organizations. Restricted to Graduate students only.

PSYC 8244. Theories and Processes of Organizational Management. 3 Credits.

Basic functions and techniques of organizational management—design, control, direction, and decision making—examined from the viewpoint of behavioral science. Restricted to Graduate students only.

PSYC 8245. Seminar: Organizational Behavior. 3 Credits.

Analysis of organizational behavior; emphasis on motivation and productivity. Recent research on employee attitudes, primary group, supervisory leadership, formal and informal organization, job design. Restricted to Graduate students only.

PSYC 8246. Seminar: Personnel Evaluation Techniques. 3 Credits.

Techniques of personnel selection and performance evaluation. Employment tests, personal data, assessment interviews, performance ratings, and assessment centers. Federal guidelines in employee selection. Includes practicum. Restricted to Graduate students only.

PSYC 8248. Research Applications to Organizational Intervention and Change. 3 Credits.

Emphasis on development of models of organizational effectiveness; design of valid diagnostic instruments; implementation of research strategies; establishment of program evaluation criteria. Restricted to Graduate students only.

PSYC 8251. Behavioral Neuroscience. 3 Credits.

The neural basis of behavior, with special focus on the psychobiological determinants of learning, memory, and cognition. Methodologies used for different levels of analysis with normal and brain-impaired subjects. Restricted to Graduate students only.

PSYC 8253. Social Cognition. 3 Credits.

Social psychology theories, conceptual approaches, and their applications. Social cognition, person perception, attribution, information processing, attraction, stereotyping. Restricted to Graduate students only.

PSYC 8254. Social Influence. 3 Credits.

Social psychology theories, conceptual approaches, and their applications. Analysis of intentional and unintentional social influence processes and their effects on behavior. Current research on conformity, social power, social exchange, and impression management. Restricted to Graduate students only.

PSYC 8255. Attitudes and Attitude Change. 3 Credits.

Current theory and research on attitudes and attitude change. Restricted to Graduate students only.

PSYC 8256. Introduction to Survey Research. 3 Credits.

Theory and practice of face-to-face telephone and mail surveys. Practical experience with all stages from the formulation of research questions and hypotheses to questionnaire design, sampling, pilot, testing, interviewing, coding, and data cleaning. Prerequisite: STAT 2105 .

PSYC 8257. Current Topics in Social Psychology. 3 Credits.

Advanced seminar with focus on major theoretical approaches, research, or problem areas within field of social psychology. Topic changes each semester. Restricted to Graduate students only.

PSYC 8258. Qualitative Research and Analysis. 3 Credits.

Qualitative research and analysis with a focus on theory, didactic material relevant to qualitative methodologies, and applied qualitative research design and analysis. Restricted to Graduate students only.

PSYC 8259. Psychology of Individual and Group Decision Making. 3 Credits.

Examination of processes in organizational decision making and group behavior. Topics include group and individual decision-making approaches, decision aids and support systems, performance and decision effectiveness, and risk analysis. Restricted to Graduate students only.

PSYC 8260. Psychology of Work Group Development. 3 Credits.

Examination of theory and research on groups as task performance systems. Approaches to team development as a means of improving work group effectiveness, including goal setting, role clarification, increasing interpersonal skills, and conflict resolution. Restricted to Graduate students only.

PSYC 8268. Seminar: Neuropsychology. 3 Credits.

Selected problems in research relating the brain and behavior. Independent topics each semester, such as sensory processing, brain development and behavior, clinical aspects of nervous system function. Restricted to Graduate students only.

PSYC 8275. Women and Health. 3 Credits.

Theoretical and empirical analyses of women's health: how women's health is constructed by medical, psychological, and critical theorists; how sexism, racism, and classism contribute to women's health problems; and identification of conditions that lead to optimal health and well-being. Restricted to Graduate students only. (Same as WSTU 8275).

PSYC 8277. Health Psychology. 3 Credits.

Social psychological theories and research that relate to health and illness. Application of theories of social learning, attribution, attitude change, and social influence to topics such as health promotion and disease prevention, health compliance, and coping with illness and disability. Restricted to Graduate students only.

PSYC 8279. Special Topics in Health Psychology. 3 Credits.
May be repeated for credit provided the topic differs.
Admission by permission of instructor. Restricted to Graduate students only.

PSYC 8280. Theories and Practice of Clinical Supervision. 0 Credits.

Theory and practice of clinical supervision through instruction and a supervision practicum in the clinical facilities. Restricted to clinical psychology graduate students.

PSYC 8283. First Year Seminar I: Motivational Interviewing. 0 Credits.

This course develops in clinical psychology doctoral students basic skills necessary for therapeutic effectiveness through motivational interviewing and familiarizes them with goals and values in their clinical training. Restricted to Available only to students in the clinical psychology PhD program.

PSYC 8284. First Year Seminar II: Introduction to Therapy. 0 Credits.

Clinical psychology doctoral students gain basic familiarity with assessment and psychotherapy practices and understanding of the inner workings of the Meltzer Center clinic. Restricted to students in the clinical psychology PhD program.

PSYC 8285. History and Systems of Psychology. 0 Credits.

Clinical psychology doctoral students will engage in self-study of the history and systems of psychology. Restricted to Available only to students in the clinical psychology PhD program.

PSYC 8286. Clinical Psychology Externship. 0 Credits.

Clinical psychology doctoral students will participate in externship placements in clinical settings to develop their clinical skills and competencies. Restricted to students in the clinical psychology PhD program.

PSYC 8287. Current Topics in Clinical Psychology. 3 Credits.

Advanced seminar with focus on major theoretical approaches, research, or problem areas. Topics vary. May be repeated for credit. Restricted to Graduate students only.

PSYC 8288. Current Topics in Industrial/Organizational Psychology. 3 Credits.

Advanced seminar with focus on major theoretical approaches, research, or problem areas. Topics vary. May be repeated for credit. Restricted to Graduate students only.

PSYC 8289. Seminar: Current Topics in Experimental Psychology. 3 Credits.

Review and discussion of contemporary research and theory in a specialized field of psychological study, by leaders in the field. Independent topics each semester; may be repeated for credit. Restricted to Graduate students only.

PSYC 8291. Theories of Organizational Behavior. 3 Credits.
Examination of current theoretical models and research.
Restricted to Graduate students only.

PSYC 8295. Independent Research. 3 Credits.

Individual library or experimental research under supervision of staff member. Arrangements must be made with sponsoring faculty member prior to registration. May be repeated for credit. Restricted to Psychology graduate students only.

PSYC 8998. Advanced Reading and Research. 1-12 Credits.

Limited to students preparing for the Doctor of Philosophy major field examination. May be repeated for credit. Restricted to Psychology graduate students only. Prerequisites: Psychology graduate students only.

PSYC 8999. Dissertation Research. 3-12 Credits.

Limited to Doctor of Philosophy candidates. May be repeated for credit. Restricted to Psychology graduate students only.

BACHELOR OF ARTS WITH A MAJOR IN PSYCHOLOGY

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Required courses (9 credits):

PSYC 1001	General Psychology
STAT 1053	Introduction to Statistics in Social Science (or equivalent)
PSYC 2101	Research Methods-Psychology

Two survey courses (6 credits) from the following:

PSYC 2011	Abnormal Psychology
or PSYC 2011W	Abnormal Psychology
PSYC 2012	Social Psychology
PSYC 2013	Developmental Psychology

One survey course (3 credits) from the following:

PSYC 2014	Cognitive Psychology
PSYC 2015	Biological Psychology

One course (3 credits) from the following:

PSYC 3112	Psychology of Adolescence
PSYC 3115	Developmental Psychopathology
PSYC 3125	Cross-Cultural Psychology
PSYC 3126	Multicultural Psychology
or PSYC 3126W	Multicultural Psychology

PSYC 3128	Health Psychology
PSYC 3132	Social and Personality Development
PSYC 3170	Clinical Psychology
PSYC 3173	Community Psychology

One course (3 credits) from the following:

PSYC 3118	Neuropsychology
PSYC 3121	Memory and Cognition
PSYC 3122	Cognitive Neuroscience
PSYC 3124	Visual Perception

Two advanced research lab courses (8 credits):

PSYC 4106W	Research Lab in Sensation and Perception
or PSYC 4107W	Research Lab in Cognitive Neuroscience
PSYC 4201W	Research Lab in Clinical/Community Psychology
or PSYC 4202W	Research Lab in Applied Social Psychology
or PSYC 4203W	Research Lab in Developmental Psychology

Three additional psychology (PSYC) courses (9 credits) numbered 2000 or above

Only 3 credits of PSYC 3591 or PSYC 4591 may be applied toward the major.

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, the student must submit an application to the Psychology Department before the beginning of the senior year, take an honors seminar (PSYC 4197) and a graduate-level seminar, and complete an independent study project (PSYC 4191 or PSYC 4198) with distinction. The grade-point average in psychology required for graduation with Special Honors is 3.5.

COMBINED PROGRAM

REQUIREMENTS

The Department of Psychology offers a combined Bachelor of Arts with a major in psychology/Master of Arts in the field of art therapy program. The program allows students to take a specified number of graduate credits as part of their undergraduate degree, thereby decreasing the number of credits normally required for the master's degree.

Interested students should consult their advisor. Visit the departmental website (<http://psychology.columbian.gwu.edu/bachelors-psychologymasters-art-therapy-bama>) for deadlines and additional program information.

DOCTOR OF PHILOSOPHY IN THE FIELD OF PSYCHOLOGY

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Prerequisite: the degree of Bachelor of Arts with a major in psychology. Students whose academic preparation is in other disciplines will be expected to complete prerequisite undergraduate courses to prepare for graduate study in psychology before admission to the field.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

The requirements for the Doctor of Philosophy Program (p. 71).

Required:

PSYC 8202	Psychological Research Methods and Procedures
-----------	---

Two graduate psychology courses outside the chosen field and approved by the advisor

Appropriate statistics courses

Satisfactory completion of the General Examination in the major area of study

The Department of Psychology offers concentrations in clinical psychology, cognitive neuroscience, and applied social psychology. The concentration in industrial/organizational psychology is offered by the Department of Organizational Sciences and Communication. For specific requirements, consult the director of the concentration concerned. All programs are offered on a full-time basis only.

Graduate courses listed here are limited to graduate students in psychology, except by permission of instructor, and only if space permits.

MINOR IN PSYCHOLOGY

REQUIREMENTS

Required course (3 credits):

PSYC 1001	General Psychology
-----------	--------------------

Two survey courses (6 credits) from the following, including at least one of PSYC 2014 or PSYC 2015:

PSYC 2011	Abnormal Psychology
or PSYC 2011W	Abnormal Psychology

PSYC 2012	Social Psychology
-----------	-------------------

PSYC 2013	Developmental Psychology
-----------	--------------------------

PSYC 2014	Cognitive Psychology
-----------	----------------------

PSYC 2015	Biological Psychology
-----------	-----------------------

At least three additional psychology (PSYC) courses (9 credits) numbered 2000 or above, not including PSYC 3591 or PSYC 4591

Students considering graduate study in psychology are advised to take PSYC 2101, which is a prerequisite for 3000 and 4000 level courses.

PUBLIC POLICY AND PUBLIC ADMINISTRATION

Through its Trachtenberg School of Public Policy and Public Administration, Columbian College of Arts and Sciences offers the Master of Public Policy, Master of Public Administration, and the Doctor of Philosophy in the field of public policy and administration. The master's programs provide academic preparation toward professional careers in government, business, and the nonprofit sector. The programs are accredited and provide graduate instruction in all areas recommended by the Guidelines and Standards for Professional Master's Degree Programs issued by the National Association of Schools of Public Affairs and Administration.

GRADUATE

Master's programs

- Master of public policy (p. 349)
- Master of public administration (p. 349)

Dual programs

- Dual Master of public policy and Graduate Certificate in organizational performance improvement (p. 351)
- Dual Master of public administration and Graduate Certificate in organizational performance improvement (p. 351)
- Dual Master of public administration and Graduate Certificate in homeland security emergency preparedness and response (p. 350)

Doctoral program

- Doctor of Philosophy in the field of public policy and administration (p. 352)

CERTIFICATE

Certificate program

- Graduate certificate in nonprofit management (p. 352)

FACULTY

University Professor S.J. Trachtenberg

Professors W.C. Adams, B.S. Barnow, E. Berkowitz, J.M. Brinkerhoff, G. Brock, J.J. Cordes, S. Dudley (*Research*), A. Dor, D.L. Infeld, K.E. Newcomer (*Director*), S. Pace, S. Pandey, S. Rosenbaum, R.W. Rycroft, G.D. Squires, S.A. Tuch, N. Vonortas, P.W. Wirtz, M.J. Worth

Associate Professors S.J. Balla, L.A. Brainard, S. Cellini, D. Conger, C. Deitch, E.J. Englander, J.F. Kasle, P. Linguiti, A.S. Malik, Y. Nakib, R.P. Stoker

Assistant Professors L. Brooks, C.M. Carrigan, S. Kasdin, J. McGinnis, D.E. Rigby

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Programs in Public Administration are offered at the graduate level by the Trachtenberg School of Public Policy and Public Administration. Courses with 2000 designations are open to undergraduates.

PPPA 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the Schedule of Classes for more details. Restricted to First-year students in CCAS.

PPPA 2000. Justice and the Legal System I. 3 Credits.

The structure and function of constitutional law: the Supreme Court as an institution, how its cases are decided, and effects of its decisions on the political and social life of the country.

PPPA 2001. Justice and the Legal System II. 3 Credits.

Continuation of PPPA 2000. The structure and function of constitutional law: the Supreme Court as an institution, how its cases are decided, and effects of its decisions on the political and social life of the country. PPPA 2000 is prerequisite to PPPA 2001, which focuses on the First Amendment.

PPPA 2117. Executive Branch Politics. 3 Credits.

Contemporary concepts and issues in public administration and management. Major trends and approaches to governmental administration in the U.S., including the changing federal role, roles of the public sector in relation to the private sector, and managing public agencies at all levels. Same as PSC 2217.

PPPA 2701. Sustainability and Environmental Policy. 3 Credits.

A survey of the intersection of the principles of sustainability and the set of public policies that affect environmental management in the United States. Consideration of the idea that environmental policy is inevitably implemented in a complex interaction of both natural and human systems. Topics applicable to most environmental policy debates, such as the balance between costs and benefits of environmental protection. Introduction to a "toolkit" of environmental policy instruments ranging from highly prescriptive command-and-control regulations to flexible market-based policies.

PPPA 6000. Cross-Sectoral Governance in the U.S. Federal System. 1 Credit.

Introduction to the roles and responsibilities of the public, nonprofit, and for-profit sectors in the delivery of public goods and services.

PPPA 6001. Introduction to Public Service and Administration. 3 Credits.

Introduction to the discipline of public administration. The intellectual traditions and theoretical frames of reference that inform public administration as a field of professional practice and study. Current and continuing challenges and controversies.

PPPA 6002. Research Methods and Applied Statistics. 0-3 Credits.

Development of skills and knowledge for conducting original research and critically evaluating empirical studies. Various research designs and data collection techniques are examined. Focus on computerizing data sets for quantitative analysis, analyzing strength of relationships, selecting appropriate statistical techniques, and testing statistical hypotheses.

PPPA 6003. Economics for Public Decision Making. 3 Credits.

The basic tools and concepts in microeconomic analysis; how these tools can be useful in public decision making.

PPPA 6004. Managing Public Organizations. 3 Credits.

Organizational dynamics, management approaches, and workplace relationships that affect behavior in public organizations. Prerequisite: PPPA 6001.

PPPA 6005. Public Budgeting, Revenue, and Expenditure Analysis. 3 Credits.

Survey course that focuses on the institutions and analytical tools associated with raising revenue and allocating/managing resources at all levels of government. Hands-on budgeting skills and communication of analysis to decision makers. Prerequisite: PPPA 6003.

PPPA 6006. Policy Analysis. 3 Credits.

Development of skills in conducting and critiquing policy analyses. Application of methodologies used in analyzing possible consequences of specified alternatives as applied in the public policy decision-making process. Appropriate applications and limitations of policy analysis and its relationship to politics and the policy process.

PPPA 6008. M.P.A./M.P.P. Capstone. 3 Credits.

For M.P.A. and M.P.P. students who will complete their degree program at the end of the fall semester, this course substitutes for PPPA 6009 and 6119, respectively.

PPPA 6009. MPA Capstone. 3 Credits.

Review of concepts and issues; analysis and integration of ethical, political, economic, managerial, and personal values and issues in the field.

PPPA 6010. Politics & The Policy Process. 3 Credits.

The role of policy analysts in public policymaking. The impact that the political, economic, cultural, and bureaucratic context has on the policymaking process and outcomes. Political and ethical issues raised by the intricate interface of the private, not-for-profit, and public sectors in public policy formulation and implementation.

PPPA 6011. Introduction to Public Policy. 3 Credits.

Foundations of the field of public policy, emphasizing the role of policy analysts in the policymaking process. Topics include agenda setting, decisionmaking, policy implementation, program evaluation, and policy feedback.

PPPA 6013. Econometrics–Policy Research I. 3 Credits.

Multivariate research methods in policy analysis Prerequisite: PPPA 6002 . Laboratory fee.

PPPA 6014. Economics in Policy Analysis. 3 Credits.

The application of intermediate microeconomic theory to the study of public policy. Topics include models of individual choice in policy analysis, policy aspects of models of the firm, theory of market failure and welfare economics, and resource allocation decisions in the public sector. Credit cannot be earned for both PPPA 6014 and SMPP 6206. Prerequisites: PPPA 6085. Recommended background: An intermediate-level microeconomic theory course such as ECON 6217.

PPPA 6015. Benefit-Cost Analysis. 3 Credits.

The application of microeconomic theory and welfare economics to the empirical evaluation of public policies and programs. Applied welfare economics as a framework for policy analysis; empirical measures of welfare change; techniques of benefit-cost analysis. Prerequisite: PPPA 6014.

PPPA 6016. Public and Nonprofit Program Evaluation. 3 Credits.

Theory and practice of program evaluation and evaluative research. Exploration of scope and limitations of current practice in evaluation, considering economic, political, social, and administrative factors. Examination of methodological considerations for design, data collection, analysis, and dissemination. Prerequisite: PPPA 6002 .

PPPA 6018. Public Policy, Governance, and the Global Market. 3 Credits.

The socioeconomic foundations of government regulation and public policy cooperation for the governance of firms, markets, and globalization. The evolution of national, transatlantic, and multilateral frameworks for market and civil society governance, international competition policy cooperation, regulatory harmonization, and industry standards.

PPPA 6019. MPP Capstone. 3 Credits.

Policy theory and typologies; policy formulation, implementation, and evaluation; ethics and practice in policy analysis, processes, content, and contexts; policy linkages to multiple disciplines. Students submit an analysis of a substantive policy primarily utilizing resources in the D.C. region.

PPPA 6024. Leadership in Complex Organizations. 3 Credits.

What the manager must know and do to provide leadership and guidance in large, complex organizations. An exploration of leadership theories and the factors and processes that condition effective leadership.

PPPA 6025. Ethics and Public Values. 3 Credits.

Ethical dimensions of personal and professional judgments of public officials. Cases are used to consider the ethos of public organizations and the moral foundations of public policy.

PPPA 6031. Governing and Managing Nonprofit Organizations. 3 Credits.

Historical, legal, and social foundations of the nonprofit sector. Developing organizational strategy and capacity; managing staff, boards, and volunteers; financial management; fund raising, marketing, public advocacy, and other external relations; partnerships and entrepreneurial activities; measuring performance; and policy issues.

PPPA 6032. Managing Fund Raising and Philanthropy. 3 Credits.

Fund-raising for nonprofit organizations and the management of relationships between donors and recipient organizations. Positioning the organization for fund raising; roles of staff and volunteers; principal techniques for identifying, cultivating, and soliciting donors; ethical principles; emerging trends; and relevant policy issues.

PPPA 6033. Non-Profit Enterprise. 3 Credits.

The use of business methods by nonprofit organizations, commercialization in the nonprofit sector, and the relationship between nonprofit and for-profit entities in pursuing social purposes. Case studies.

PPPA 6034. Managing Nonprofit Boards. 3 Credits.

Overview of the responsibilities, roles, and management of nonprofit boards. The emphasis is on governing boards, but advisory councils and boards of other types are also considered.

PPPA 6042. Managing State and Local Governments. 3 Credits.

Examination of state and local governmental structures and functions, their place within the federal system, their revenue sources, their limitations, and the alternatives available to encourage more effective administration to meet public and private demands.

PPPA 6043. Land Use Planning and Community Development. 3 Credits.

Theory and practice of land use planning. Issues of competing land uses in an era of increased sprawl, population pressure, and environmental threat. Growth management techniques and practices in states and localities; the use of various regulatory controls and economic incentives to achieve desired outcomes. The idea of "sustainable community."

PPPA 6044. State Politics and Policy. 3 Credits.

Important concepts of state politics and government with emphasis on how those concepts affect the formulation and implementation of policy. The functions of state government and the political, economic, and legal factors that shape state public policies.

PPPA 6048. Financing State and Local Government. 3 Credits.

Analysis of the theory and practice of public finance in state and local governments. Includes the financing of services through municipal taxation, intergovernmental funds, debt instruments, and other revenue sources. Review of expenditures as well as financial management practices.

PPPA 6049. Urban and Regional Policy Analysis. 3 Credits.

Examination of selected national policies and their effects on urban areas and governments. Emphasis on policy dimensions of urban systems and their relationship to the social, political, and economic context. Against the background of urban politics and administration, areas of health, education, welfare, manpower, transportation, and housing are addressed.

PPPA 6051. Governmental Budgeting. 3 Credits.

Survey of the actors, institutions, and processes in the federal budgeting system. Executive budget preparation/execution, legislative review and approval of budget requirements, and independent audit of government spending.

PPPA 6052. Tax Policy Analysis. 3 Credits.

This course provides a guided, critical study of budgeting by the U.S. Government: its conceptual foundations, structure, processes, accounting, scoring, and results. This process is evaluated, as a system and by its component elements, using the criteria of performance with respect to its fundamental objectives; fiscal and economic stability and efficiency, including for those programs aimed at promoting equity. Because of the dominant role of the Congress in the budget process, attention is focused on the system and process created by the Congressional Budget Act of 1974.

PPPA 6053. Financial Management for Public and Nonprofit Organizations. 3 Credits.

Intensive analysis, using the case study approach, of concepts and principles used in the not-for-profit sector for financial management purposes. Disciplines of accounting, budgeting, operations control, management, and auditing are integrated into comprehensive management control systems and include issues of system design and implementation.

PPPA 6054. Issues in Federal Budgeting. 3 Credits.

Policy tools available to pursue social objectives, including grants, loans, contracting out, regulation, tax credits, and tax expenditures. Focus on criteria such as effectiveness, efficiency, equity, legitimacy, and administrative ease.

PPPA 6055. Contracting Out and Public-Private Partnerships. 3 Credits.

Contracting out and public-private partnerships as methods of delivering government goods and services. Policy and implementation issues, including when and how contracting out may provide a more efficient and effective method of delivering government goods and services.

PPPA 6056. Regulatory Comment Clinic. 3 Credits.

Survey of regulatory theories, institutions, policies, and procedures. Application of economic tools to analyze the effect of existing and proposed regulations on social welfare. Communication of analysis to decision makers and the public.

PPPA 6057. International Development Administration. 3 Credits.

An institutional and policy context for work in the international development industry. Mainstream policies, reform efforts, and alternative approaches. Major actors, selected policy areas, and regional and comparative perspectives.

PPPA 6058. International Development NGO Management. 3 Credits.

Provides an understanding of the primary implementers of international development assistance. Overview of NGO management, highlighting those features that are particular to NGOs active in international development, including NGO relations with government and donors. Recommended: PPPA 6057 or approval of instructor.

PPPA 6059. International Development Management Processes and Tools. 3 Credits.

Training in development management tools and processes; application of international development approaches specific to the development management profession. Key theories and perspectives of community development and development management. Recommended: PPPA 6057 or approval of instructor.

PPPA 6060. Policy Formulation and Administration. 3 Credits.

Impact of economic and political factors on public policy formulation and implementation; intensive analysis of the analytical, normative, and decision-making models of the policy process with special emphasis on their relationship to current policy problems.

PPPA 6061. Banking and Financial Institutions Policy. 3 Credits.

This course examines the broad range of policy issues applicable to banking and financial institutions – including those related to monetary policy, financial stability, consumer protection, and community reinvestment. This area includes a number of questions that are at the forefront of the current national policy debate about the appropriate role of government and how best to regulate financial institutions and financial markets.

PPPA 6062. Community Development Policy and Management. 3 Credits.

This course examines the policy and practice of community development, including how private sector developers and lenders work with nonprofits, foundations, and the public sector to promote sustainable affordable housing, economic development, and other community-based projects that meet both financial as well as social impact criteria. This category of finance and development is intended to help people and communities just outside the margins of conventional, mainstream finance join the economic mainstream – and to help the economic mainstream enter emerging opportunity markets. The course explores different types of community development opportunities, including affordable housing, charter school, community facility, small business lending, and nonprofit real estate projects. The course also addresses emerging trends that are likely to affect community development policymakers and practitioners, including transportation oriented development, “green” development, use of technology, comprehensive community initiatives, and new ways of raising capital for community development projects.

PPPA 6063. Policy Issues in Corporate Social Responsibility (CSR) and Impact Investing. 3 Credits.

This course examines the role of the public and nonprofit sectors in supporting corporate and investor activities that are intended to have social and environmental, in addition to financial, benefits. These activities – often referred to as “corporate Social Responsibility” (CSR) and “impact investing” – have been described as having significant potential to create social benefits in addition to being in the financial best interests of the corporation or investor. At the same time, some critics of these activities have said that they are less about producing social benefits and more about marketing private sector activities that are primarily designed to produce corporate financial gains. The course explores what is meant by these two terms, what steps the public and nonprofit sectors have taken to support the wide range of activities that these terms encompass, and what have been the results of this work both in the United States and in other countries. The course also addresses emerging trends that are likely to affect the public and nonprofit role in CSR and impact investing in the future.

PPPA 6065. Federalism and Public Policy. 3 Credits.

PPPA 6066. Environmental Policy. 3 Credits.

Current issues in environmental policy: biodiversity, land use including wilderness protection, climate change, environmental justice, economic growth, and ecological sustainability.

PPPA 6067. Environment, Energy, Technology, and Society. 3 Credits.

The identification, examination, and evaluation of how environment, energy, and technology are interrelated and how these interactions influence policy formulation and implementation at the international, national, regional, industrial, and organizational levels. Same as SMPP 6207.

PPPA 6072. Legislative Management and Congress. 3 Credits.

Analysis of Congress as a management system; examination of its internal administration and its role in formulating policy through legislation. Staffing practices, leadership, rules and procedures, oversight functions, and coalition building.

PPPA 6075. Law and the Public Administrator. 3 Credits.

Exploration and analysis of the functions of law in a democratic society. Emphasis is placed upon the procedural, historical, and jurisprudential dimensions of American law. This broad perspective seeks to convey understanding of the law as a legal and moral force guiding and constraining public decision making.

PPPA 6076. Federal Government Regulation of Society. 3 Credits.

Analysis of the federal regulatory process as it affects the public and private sectors. The regulatory process from legal, economic, administrative, and political perspectives.

PPPA 6077. Case Studies in Public Policy. 1-3 Credits.

Critical analysis of topical issues in public policy, using a case-study approach. Specific issues covered will vary.

PPPA 6085. Special Topics in Public Policy. 3 Credits.

Topics announced in the Schedule of Classes. May be repeated for credit, provided the topic differs.

PPPA 6097. Practicum in Public Policy and Public Administration. 0 Credits.

PPPA 6098. Independent Research. 1-12 Credits.

Prerequisite: Permission of instructor and program director.

PPPA 8022. Econometrics-Policy Research II. 3 Credits.

Advanced topics in econometrics for policy research. This course is designed for doctoral students who wish to use econometric tools in their research. The course prerequisite is PPPA 6013 or an equivalent course in introductory econometrics; however, students should expect a greater degree of difficulty and a greater reliance on self-directed study in PPPA 8022 than PPPA 6013.

PPPA 8100. Seminar: Literature of Public Administration. 3 Credits.

Contemporary and historical literature in the institutional and intellectual development of public administration.

PPPA 8101. Research Methods. 3 Credits.

Doctoral seminar on theory and practice in research methodology. Data sources and gathering, research models and designs. Critical evaluation of research studies. Emphasis on application of research methods to policy questions.

PPPA 8105. Public Finance and Human Capital. 3 Credits.

The many facets of budgeting and finance and the research approaches used to study issues in this field.

PPPA 8111. Seminar: Public-Private Sector Institutions and Relationships. 3 Credits.

An analysis and critique of alternative theoretical frameworks for describing, understanding, and predicting the nature, values, and actions of American public and private institutions. Problems, potentials, and alternatives for structuring public and private institutional arrangements to meet the needs of society. Same as SMPP 8311. Prerequisite: doctoral degree candidate status.

PPPA 8123. Seminar: The Policy Organization. 3 Credits.

Unique problems of complex organizations: public, private, and mixed. Emerging concepts and theories. Selected issues.

PPPA 8164. Seminar on Program Evaluation. 3 Credits.

Doctoral seminar on theory and practice in public and nonprofit program evaluation. The broad range of approaches undertaken, current controversies in the field, and the political and ethical context for evaluators.

PPPA 8174. Seminar: Public Management. 3 Credits.

Public organization theory and behavior. Organizational behavior, organization theory, and public management. Key traditions of inquiry in the study of public organizations. Restricted to PhD students only.

PPPA 8183. Current Topics & Research. 1 Credit.

Current scholarship discussed in a seminar setting. The conduct of research and presentation of research findings. May be repeated for credit.

PPPA 8190. Philosophical Foundations of Policy and Administrative Research. 3 Credits.

Philosophy of science as applied to research in public policy and public administration. The nature of and current problems related to epistemology, development and role of theories, and relationships among theory, methodology, and empirical data. Credit for this course may be applied toward the dissertation credit requirement. Restricted to public policy and administration doctoral candidates who have taken and passed the qualifying examination and completed all required course work in a policy or public administration field.

PPPA 8191. Dissertation Workshop. 3 Credits.

Critical analysis of current research. Formulation of a dissertation proposal and development of dissertation research strategies. Credit for this course may be applied toward the dissertation credit requirement. Restricted to public policy and administration doctoral candidates who have taken and passed the qualifying examination and completed all required course work in a policy or public administration field.

PPPA 8197. Doctoral Seminar:Special Topic. 1-3 Credits.
PPPA 8998. Advanced Reading and Research. 1-12 Credits.
Limited to students preparing for the Doctor of Philosophy general examination.
PPPA 8999. Dissertation Research. 3-12 Credits.
Limited to Doctor of Philosophy candidates. May be repeated for credit.

MASTER OF PUBLIC ADMINISTRATION

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Prerequisite: a bachelor's degree from a regionally accredited college or university.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

The Master of Public Administration is available in a joint degree program with the J.D. in the GW Law School.

Required: 40 credits consisting of:

Core:	
PPPA 6000	Cross-Sectoral Governance in the U.S. Federal System
PPPA 6001	Introduction to Public Service and Administration
PPPA 6002	Research Methods and Applied Statistics
PPPA 6003	Economics for Public Decision Making
PPPA 6004	Leadership in Public Administration and Public Policy
PPPA 6005	Public Budgeting, Revenue, and Expenditure Analysis
PPPA 6006	Policy Analysis
PPPA 6009	MPA Capstone

A three or four course policy field:

Policy fields include budget and public finance; federal policy, politics, and management; international development management; managing state and local governments; homeland security and emergency management; nonprofit management; policy analysis and evaluation; public-private policy and management. With approval, a special field may be constructed, tailored to the student's academic interests and career objectives.

An elective courses with the advisor's approval from any related program or discipline

The Columbian College of Arts and Sciences also offers related interdisciplinary M.A. programs that enable students to concentrate in a specific policy area while completing courses in economics, politics, quantitative methods, and approaches to policy analysis. For more information, see Environmental Resource Policy, Philosophy, and Women's Studies. See the School of Business and the Elliott School of International Affairs for other graduate degree programs with public policy concentrations.

MASTER OF PUBLIC POLICY

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Prerequisite: a bachelor's degree from a regionally accredited college or university.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

The Master of Public Policy is available in a dual degree program with the Ph.D. in the field of political science and a joint degree program with the J.D. in the GW Law School.

Required: 40 credits consisting of:

Policy core:	
PPPA 6002	Research Methods and Applied Statistics
PPPA 6011	Introduction to Public Policy
PPPA 6013	Econometrics–Policy Research I
PPPA 6014	Economics in Policy Analysis
PPPA 6019	MPP Capstone
Two of the following:	
PPPA 6005	Public Budgeting, Revenue, and Expenditure Analysis

PPPA 6015	Benefit-Cost Analysis
PPPA 6016	Public and Nonprofit Program Evaluation

A three-course policy field:

Policy fields include budget and public finance, education policy, environmental policy, health policy, national security and foreign policy, international development policy, program and policy evaluation, regulatory policy, social policy, and urban policy. With approval, a special field may be constructed, tailored to the student's academic interests and career objectives

Electives with approval of the advisor

PPPA 6006	Policy Analysis
PPPA 6009	MPA Capstone

Policy field

Three or four courses

Policy fields include budget and public finance; federal policy, politics, and management; international development management; managing state and local governments; homeland security and emergency management; nonprofit management; policy analysis and evaluation; public-private policy and management. With approval, a special field may be constructed, tailored to the student's academic interests and career objectives.

Requirements toward the graduate certificate fulfill the elective credits toward the Master of Public Administration degree and are as follows:

EMSE 6300	Homeland Security: The National Challenge
-----------	---

Five additional courses from the following:

EMSE 6305	Crisis and Emergency Management
-----------	---------------------------------

EMSE 6310	Information Technology in Crisis and Emergency Management
-----------	---

EMSE 6315	Management of Risk and Vulnerability for Hazards and Terrorism
-----------	--

EMSE 6320	International Disaster Management
-----------	-----------------------------------

EMSE 6325	Medical and Public Health Emergency Management
-----------	--

EMSE 6330	Management of Terrorism Preparedness and Response
-----------	---

emse 6335	
-----------	--

EMSE 6992	Special Topics
-----------	----------------

EMSE 6345	Disaster Recovery and Organizational Continuity
-----------	---

EMSE 6350	Hazard Mitigation in Disaster Management
-----------	--

EMSE 6240	Environmental Hazard Management
-----------	---------------------------------

DUAL MASTER OF PUBLIC ADMINISTRATION AND GRADUATE CERTIFICATE IN HOMELAND SECURITY EMERGENCY PREPAREDNESS AND RESPONSE

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Prerequisite: a bachelor's degree from a regionally accredited college or university.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

Master of Public Administration students can earn a graduate certificate in Homeland Security Emergency Preparedness and Response in the School of Engineering and Applied Science.

Required

PPPA 6000	Cross-Sectoral Governance in the U.S. Federal System
PPPA 6001	Introduction to Public Service and Administration
PPPA 6002	Research Methods and Applied Statistics
PPPA 6003	Economics for Public Decision Making
PPPA 6004	Managing Public Organizations
PPPA 6005	Public Budgeting, Revenue, and Expenditure Analysis

DUAL MASTER OF PUBLIC ADMINISTRATION AND GRADUATE CERTIFICATE IN ORGANIZATIONAL PERFORMANCE IMPROVEMENT

Master of Public Administration students may earn a graduate certificate in organizational performance improvement in the College of Professional Studies.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

Required: 43 credits consisting of:

Core:	
PPPA 6000	Cross-Sectoral Governance in the U.S. Federal System
PPPA 6001	Introduction to Public Service and Administration
PPPA 6002	Research Methods and Applied Statistics
PPPA 6003	Economics for Public Decision Making
PPPA 6004	Managing Public Organizations
PPPA 6005	Public Budgeting, Revenue, and Expenditure Analysis
PPPA 6006	Policy Analysis
PPPA 6009	MPA Capstone

A three or four course policy field:

Policy fields include budget and public finance; federal policy, politics, and management; international development management; managing state and local governments; homeland security and emergency management; nonprofit management; policy analysis and evaluation; public-private policy and management. With approval, a special field may be constructed, tailored to the student's academic interests and career objectives.

Requirements toward the graduate certificate fulfill the elective credits toward the Master of Public Administration degree and are as follows:

PSPL 6301	Fundamentals of Organization Performance Improvement
-----------	--

PSPL 6302	Leading Organization Performance Improvement Initiatives
PSPL 6303	Advanced Methods for Organization Performance Improvement
PSPL 6304	Advanced Applications in Organization Performance Improvement

DUAL MASTER OF PUBLIC POLICY AND GRADUATE CERTIFICATE IN ORGANIZATIONAL PERFORMANCE IMPROVEMENT

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Prerequisite: a bachelor's degree from a regionally accredited college or university.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

Master of Public Policy students can earn a graduate certificate in Organizational Performance Improvement in the College of Professional Studies.

Required

PPPA 6002	Research Methods and Applied Statistics
PPPA 6011	Introduction to Public Policy
PPPA 6013	Econometrics—Policy Research I
PPPA 6014	Economics in Policy Analysis
PPPA 6019	MPP Capstone

Two of the following:

PPPA 6005	Public Budgeting, Revenue, and Expenditure Analysis
PPPA 6015	Benefit-Cost Analysis
PPPA 6016	Public and Nonprofit Program Evaluation

Policy field

Three courses

Policy fields include budget and public finance, education policy, environmental policy, health policy, national security and foreign policy, international development policy, program and policy evaluation, regulatory policy, social policy, and urban policy. With approval, a special field may be constructed, tailored to the student's academic interests and career objectives

Requirements toward the graduate certificate fulfill the elective credits toward the Master of Public Policy degree and are as follows:

PSPL 6301	Fundamentals of Organization Performance Improvement
-----------	--

PSPL 6302	Leading Organization Performance Improvement Initiatives
-----------	--

PSPL 6303	Advanced Methods for Organization Performance Improvement
-----------	---

PSPL 6304	Advanced Applications in Organization Performance Improvement
-----------	---

DOCTOR OF PHILOSOPHY IN THE FIELD OF PUBLIC POLICY AND ADMINISTRATION

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

The requirements for the Doctor of Philosophy Program (p. 71).

Prequalifying core curriculum:

PPPA 6013	Econometrics–Policy Research I
-----------	--------------------------------

PPPA 6014	Economics in Policy Analysis
-----------	------------------------------

PPPA 8100	Seminar: Literature of Public Administration
-----------	--

PPPA 8101	Research Methods
-----------	------------------

PSC 8229	Politics and Public Policy
----------	----------------------------

A written qualifying examination

Core courses:

PPPA 8105	Public Finance and Human Capital
-----------	----------------------------------

One of the following to fulfill the quantitative course requirement

PPPA 8022	Econometrics–Plcy Research II
-----------	-------------------------------

ECON 8376	Econometrics II
-----------	-----------------

ECON 8377	Econometrics III
-----------	------------------

DNSC 6275	Advanced Statistical Modeling and Analysis
-----------	--

One of the following to fulfill the qualitative course requirement

PSC 8104	Qualitative Research Methods
----------	------------------------------

EDUC 8122	Qualitative Research Methods
-----------	------------------------------

EDUC 8131	Case Study Research Methods
-----------	-----------------------------

PUBH 8417	Qualitative Research Methods & Analysis
-----------	---

or equivalent course as approved by the program director

A minimum of 18 credits in one of the following areas:

Education policy; health policy; budgeting and public finance; program evaluation; administration and management; science and technology policy; social policy with specialization in gender, poverty and inequality, race and ethnicity, or urban policy

A written examination in a policy or public administration field

Dissertation research: 12-18 credits

PPPA 8190	Philosophical Foundations of Policy and Administrative Research
-----------	---

PPPA 8191	Dissertation Workshop
-----------	-----------------------

PPPA 8199	Dissertation Research (repeated as needed to fulfill dissertation credit requirement)
-----------	---

Students must maintain a grade-point average of at least 3.3 to remain in the program.

GRADUATE CERTIFICATE IN NONPROFIT MANAGEMENT

The graduate certificate in nonprofit management provides an overview of central concepts in managing nonprofit organizations for students who are seeking to prepare for, or advance in, careers in the nonprofit sector. The certificate serves as an alternative for students who wish to expand their knowledge in the field without committing to a master's degree program.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program webpage (<http://tspppa.gwu.edu/graduate-certificate-nonprofit-management>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 6 credits in required courses and 6 hours in elective courses.

Required courses:

PPPA 6031	Governing and Managing Nonprofit Organizations
PPPA 6032	Managing Fund Raising and Philanthropy
Two of the following electives:	
PPPA 6016	Public and Nonprofit Program Evaluation
PPPA 6033	Non-Profit Enterprise
PPPA 6034	Managing Nonprofit Boards
PPPA 6053	Financial Management for Public and Nonprofit Organizations
PPPA 6058	International Development NGO Management

Other Trachtenberg School of Public Policy and Public Administration nonprofit courses may be offered periodically. With prior approval of the field advisor, certain non-Trachtenberg School courses at GW may be counted toward the elective group.

RELIGION

The study of religion at GW promotes analysis rather than advocacy of religion or a particular tradition. At the undergraduate level, the Department of Religion offers the Bachelor of Arts with a major in Religion. The program curriculum fosters knowledge of the world's religions, as well as their history, literature, and community structure. Areas of study include Biblical literature, Judaism, Christianity, Islam, Hinduism, ethics, sociology of religion, contemporary movements in theology, and religion in American culture. A minor in religion is also offered.

At the graduate level, the Master of Arts in the field of Islamic studies focuses on the study of Islam in its classical and contemporary formations, with an emphasis on developing competence in classical Islamic intellectual traditions. The cross-disciplinary program allows students to study with a variety of faculty members who are knowledgeable about

the classical formulations of Islam, and have on-the-ground experience in Muslim-majority countries and communities. Centrally located in Washington, D.C., the program offers students the opportunity to interact with U.S. government agencies, think tanks, non-governmental institutions, and the large Muslim community residing and working in the metro area. The program also offers "non-traditional students"--such as working professionals, civil servants, and employees of international agencies--the opportunity to tailor the program to their particular needs.

The Graduate Certificate in Islamic Studies is also offered for professionals in related fields who benefit from instruction in critical aspects of Islam.

The Doctor of Philosophy in the field of American Religious History is offered by the Department of History in cooperation with the Department of Religion.

UNDERGRADUATE

Bachelor's program

- Bachelor of Arts with a major in religion (p. 358)

Minor

- Minor in religion (p. 360)

GRADUATE

Master's program

- Master of Arts in the field of Islamic studies (p. 361)

Doctoral program

- Doctor of Philosophy in the field of American religious history (p. 250)

CERTIFICATE

- Graduate certificate in Islamic studies (p. 361)

FACULTY

University Professor S.H. Nasr

Professors P.B. Duff, R.J. Eisen (*Chair*), A.J. Hildebeitel, R.W. Tuttle

Associate Professors X. Kang, I. Oh Koukios, D. Malone-France, K. Pemberton

Assistant Professors E. Aviv, J.D. Wood

Professorial Lecturers M. Faghfoory, B.N. Hebbbar, E.C. Hostetter, N. Houghtby-Haddon, P. Reddy

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses

- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

REL 1000. Dean's Seminar. 3 Credits.

The Dean’s Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the Schedule of Classes for more details. Restricted to First-year students in CCAS.

REL 1001. Introduction to World Religions: West. 3 Credits.

Examination of the religions of the ancient Mediterranean and the major religions of the West. Religious foundations of Western civilizations. The development of Judaism, Christianity, and Islam and their confrontations with secularization and political upheaval in the modern world.

REL 1002. Introduction to World Religions: East. 3 Credits.

Examination of the major religions of the East and comparison with religions in the West. Approaches to the cross-cultural study of religion. Hinduism, Buddhism, and the religions of Tibet, China, and Japan are studied with respect to their history and their encounter with modernity.

REL 1003. Introduction to World Religions. 3 Credits.

Introduction to the major religions of the world: Judaism, Christianity, Islam, Hinduism, Buddhism, Confucianism, and Daoism. Examination of the central aspects of these religions including the doctrinal, ethical, ritual, experiential, and social dimensions. Exploration of similarities and differences between these religious traditions.

REL 1009. The Hebrew Scriptures. 3 Credits.

The literature, history, and religious thought represented by the Hebrew Scriptures (Old Testament). Continuities and contrasts between Israel and the ancient Near East are considered through study of the world view, oral and literary tradition, main religious ideas, and chief figures and movements of the biblical literature.

REL 1010. The New Testament. 3 Credits.

Literature and history of earliest Christianity in the setting of the religious movements of the Greco-Roman world and developments within Judaism. The meaning of the earliest Christian proclamation about the significance of the life, teaching, and death of Jesus of Nazareth becomes the basis for tracing the formation and expansion of the Christian movement.

REL 1010W. The New Testament. 3 Credits.

Literature and history of earliest Christianity in the setting of the religious movements of the Greco-Roman world and developments within Judaism. The meaning of the earliest Christian proclamation about the significance of the life, teaching, and death of Jesus of Nazareth becomes the basis for tracing the formation and expansion of the Christian movement.

REL 2165. The Gospels. 3 Credits.

Study of the four canonical gospels (traditionally those of Matthew, Mark, Luke, and John) in terms of each presenting a distinct literary portrait of Jesus of Nazareth and each being the product of a religious community that shared at least some beliefs and practices with surrounding “pagan” and Jewish communities.

REL 2169. Lost Gospels. 3 Credits.

Examination of some of the gospels not included in the Christian canon. These include, among others, Q, the Gospel of Thomas, the Gospel of Mary, and the Gospel of Judas. These lost gospels provide a fresh perspective on the development and diversity of early Christianity.

REL 2201. Judaism. 3 Credits.

A survey of Jewish thought and practice from the biblical to the modern period; introduction to the Hebrew Bible, rabbinic Judaism, Jewish philosophy and mysticism, Judaism in the modern period; an examination of the central rituals in Judaism, including Sabbath, dietary laws, and major festivals.

REL 2211. Rabbinic Thought and Literature. 3 Credits.

The thought-world of rabbinic Judaism in its formative period, 100–500 CE, through a close reading of primary texts in translation selected from Mishnah, Talmud, and Midrash. Topics include Oral Torah, the mechanics of rabbinic law, conceptions of God, views on suffering. The influence of rabbinic Judaism on modern Jewish ethics and thought.

REL 2301. Christianity. 3 Credits.

Typical themes, patterns, and points of diversity within the Christian religion; commonly shared and contested features and complex relationship with broader culture.

REL 2314. Contemporary Philosophy of Religion. 3 Credits.

The arguments of major figures in contemporary schools of thought within the philosophy of religion, including analytic, continental, deconstructionist, and process philosophy.

REL 2401. Islam. 3 Credits.

Islam as both a religion and a civilization. The basic Islamic beliefs and practices: the Qur’an, Hadith, and Islamic intellectual legacy; and the history of Islam from 632 to the present with particular attention to its encounter with the West.

REL 2501. Hinduism. 3 Credits.

Study of continuity and change in Hinduism, with emphasis on historical development and the consolidating features of the religion. Attention to relations between classical and popular living forms.

REL 2506. Religion, Myth, and Magic. 3 Credits.

Theories of religion developed by anthropologists; survey of world religions with emphasis on non-Western societies; religious processes and change. (Same as ANTH 2506).

REL 2562. Mythologies of India. 3 Credits.

The lore of Indian gods (Vedic, Puranic), heroes (epics), and holy men (Hindu, Buddhist, Jain, Tantric); ties with Indian art, caste, cult, cosmology, and spiritual ideals.

REL 2601. Buddhism. 3 Credits.

Consideration of the Buddhist tradition both thematically and historically, focusing on topics such as Buddhist doctrine, meditation, and rituals. The lived tradition in the pre-modern and modern periods.

REL 2811. Confucian Literature in East Asia. 3 Credits.

Introduction to Confucian literature in China and other parts of East Asia, from its beginnings to the present day. The various historical, philosophical, and religious dimensions of Confucian texts and practices; the role of Confucianism in the formation and development of Chinese and East Asian political systems, family systems, and gender relationships; recent intellectual debates on Confucianism in East Asia. Same as EALL 3811.

REL 2814. Religion and Philosophy in East Asia. 3 Credits.

Historical introduction to the major religious and philosophical traditions in China, Japan, and Korea, with focuses on ancestor worship, shamanistic cults, Confucianism, Buddhism, Daoism, and Shinto. The interactions of common East Asian religious and philosophical traditions how these traditions evolved over time, and the way each cultures assimilates foreign elements. How the very ideas of religion and philosophy are formulated and practiced differently in East Asia from those in the Western tradition. Same as EALL 3814, REL 3814.

REL 2921. The Religions Wage Peace. 3 Credits.

Resources in various world religions that contribute to peacemaking in interpersonal relations and in domestic and international politics. Consideration of ways in which religions contribute to intolerance and violence. Case-based approach to religions as related to peace and conflict resolution.

REL 2922. Ethics and World Religions. 3 Credits.

Modern concepts of ethics and their relation to major world religions, religion as stimulus and barrier to moral change, and modern moral issues ranging from bioethics to war.

REL 2981. Women in Western Religion. 3 Credits.

Historical, theological, and ethical investigation of the image and role of women in Judaism and Christianity; special consideration of the Biblical experience, the sexual qualifications for religious office, use of male and female images and languages, and contemporary issues. Same as WSTU 3981.

REL 3141. Second Temple/Hellenistic Judaism. 3 Credits.

History of Judaism from the time of Ezra through the destruction of Jerusalem in 70 CE—canonization of the Pentateuch, Hellenism, Maccabean revolt, growth of sectarian movements, Herod, ferment against Rome in context of Eastern and Western political currents. Use of primary sources, especially the Bible, Josephus, and noncanonical writings.

REL 3149. Biblical Issues. 3 Credits.

May be repeated for credit provided the topic differs.

REL 3149W. Biblical Issues. 3 Credits.

May be repeated for credit provided the topic differs.

REL 3151. The Historical Jesus. 3 Credits.

Comprehensive study of the life and teachings of Jesus with critical attention to sources. Quest for the historical Jesus.

REL 3151W. The Historical Jesus. 3 Credits.

Comprehensive study of the life and teachings of Jesus with critical attention to sources. Quest for the historical Jesus.

REL 3161. The Life and Thought of Paul. 3 Credits.

Backgrounds of early Christianity, first-century religious and social conditions affecting the spread of Christianity, the life and journeys of Paul, Paul's presentation of the Christian faith.

REL 3161W. The Life and Thought of Paul. 3 Credits.

Backgrounds of early Christianity, first-century religious and social conditions affecting the spread of Christianity, the life and journeys of Paul, Paul's presentation of the Christian faith.

REL 3221. Issues in Jewish Ethics. 3 Credits.

Exploration of current debates about major ethical issues among Jewish thinkers in the Orthodox, Conservative, and Reform denominations; issues in bioethics, feminism, attitudes towards non-Jews, social action, the ethics of war.

REL 3291. Modern Jewish Thought. 3 Credits.

Jewish thought from 1800 to the present through an exploration of six preeminent Jewish theologians: Moses Mendelssohn, Hermann Cohen, Martin Buber, A.J. Heschel, J.B. Soloveitchik, and Mordecai Kaplan. The relationship between these thinkers and the major Jewish denominations: Orthodox, Conservative, Reform, and Reconstructionist.

REL 3292. Seminar: Issues in Jewish Thought. 3 Credits.

In-depth exploration of a selected thinker or issue in Jewish thought. Recommended for students with academic background in the study of religion or Judaic studies. May be repeated for credit provided the topic differs.

REL 3310. Apocalypse and Social Change. 3 Credits.

Investigation of typical ideas, patterns, and areas of social engagement associated with the genre of religious literature known as apocalypse. Why and how diverse groups within Jewish, Christian, and Muslim traditions crafted apocalypses that have shaped cultures across the globe from past to present.

REL 3321. Christian Ethics and Modern Society. 3 Credits.

Nature and principles of Christian life as developed by the Christian community; problems of personal conduct; application to various social institutions.

REL 3341. Christianity in the Ancient World. 3 Credits.

Rise and development of Christianity in relation to the culture, philosophy, mystery religions, and general religious life of the Greco-Roman world to A.D. 500.

REL 3342. Medieval Faith and Symbolism. 3 Credits.

Christian life and thought in the Middle Ages; mystics, saints, popes, and philosophers.

REL 3343. Religion in the Renaissance and Reformation. 3 Credits.

Transformation of the Western understanding of human identity and destiny from the end of the Middle Ages to the Age of Reason.

REL 3344. Christianity in the Modern World. 3 Credits.

Changes in Christian life and thought since 1700, as seen in theology, literature, political life, and religious institutions.

REL 3405. Shi'ite Islam. 3 Credits.

This course examines the emergence and development of Shi'ism as a branch of Islamic orthodoxy with particular emphasis on its doctrine, practices, theology, the law, politics, and the geographical and political context within which a distinct Shi'i identity developed.

REL 3414. Islamic Philosophy and Theology. 3 Credits.

The major schools of Islamic philosophy and theology, considered in both a morphological and historical manner. The relation between revelation and reason, determination and free will, and divine and human knowledge as well as the relation among science, philosophy, and religion. The development of various schools of thought, from the classical period to the present.

REL 3425. Islamic Political Thought. 3 Credits.

In contrast to many courses on this topic that focus on modern period, this course investigates Islamic political thought from its inception during the lifetime of the Prophet to its elaboration and expansion by philosophers, theologians and political theorists, and to its encounter with political thought coming from the Western world in modern period.

REL 3431. Sufism (Islamic Mysticism). 3 Credits.

The foundation of Sufism in the Quranic revelation, its subsequent development, and its significance within Islamic civilization. Doctrines and practices of Sufism; history of the Sufi orders; Sufi literature, particularly in Arabic and Persian. The influence of Sufism upon social and political life and its state and role in the contemporary world, both Islamic and non-Islamic.

REL 3432. Persian Sufi Literature East and West. 3 Credits.

The teachings of Sufism as reflected in the history of Persian Sufi literature. The influence of that literature on literary figures outside of the Islamic world, especially in the West, but also in India and China, from the 18th to the 20th centuries.

REL 3475. Islamic Religion and Art. 3 Credits.

Investigation of major forms of Islamic art, such as calligraphy, architecture, and urban design; Quranic chanting, poetry, and music in relation to the principles of Islamic revelation. Same as AH 4119.

REL 3481. Women in Islam. 3 Credits.

The ways in which Islam has articulated gender identity and male-female relationships, and conversely, how women have constructed, interpreted, and articulated Islam and their places within it. Same as WSTU 3481.

REL 3482. Gender and Piety in Islam. 3 Credits.

Issues related to gender, sainthood, and piety in Islam. Reading of classical primary texts and historical, ethnographic, and philosophical works. Focus on mysticism and metaphysics in Sufi and Shi'i traditions. Final projects are creative or research oriented.

REL 3566. Dharma in Hinduism and Buddhism. 3 Credits.

Development of working definitions of dharma as it is used in law, religion, ethics, and narrative in Buddhist and Brahmanical/Hindu texts of India's classical period.

REL 3611. South Asian Buddhism. 3 Credits.

The life of Buddha, the Buddhist Councils, doctrines of the schools of Hinayana Buddhism, philosophies of the schools of Indian Mahayana Buddhism, history of Buddhism in Sri Lanka, early history of Tibetan Buddhism, and the decline of Buddhism in India.

REL 3614. Buddhist Philosophy. 3 Credits.

Development of working definitions of dharma as it is used in law, religion, ethics, and narrative in Buddhist and Brahmanical/Hindu texts of India's classical period.

REL 3666. The Book of Revelation and Other Apocalypses. 3 Credits.

Examination of the Book of Revelation in its original historical context. This includes investigation of the origins of apocalyptic thought within Judaism and comparison of the Book of Revelation with other apocalypses such as Daniel, 1 Enoch, and 4 Ezra.

REL 3701. Religion in the United States. 3 Credits.

Growth of religious groups and institutions in relation to American culture, development of religious thought, and analysis of the contemporary religious scene.

REL 3711. Religion in Contemporary America. 3 Credits.

Trends and currents in American religion in the past fifty years. The nature and meaning of religious pluralism in the United States.

REL 3711W. Religion in Contemporary America. 3 Credits.

Trends and currents in American religion in the past fifty years. The nature and meaning of religious pluralism in the United States.

REL 3814W. Religion&Philosophy/East Asia. 3 Credits.

General introduction to the religions and philosophical tradition of China, Japan, and Korea. Same as EALL 3814.

REL 3831. Daoism in East Asia. 3 Credits.

Study of the early history of the formation and development of Daoism, its growth into an institutionalized religious organization in China, and its role in the religious and philosophical history of Japan and Korea. Same as EALL 3831.

REL 3831W. Daoism in East Asia. 3 Credits.

Study of the early history of the formation and development of Daoism, its growth into an institutionalized religious organization in China, and its role in the religious and philosophical history of Japan and Korea. Same as EALL 3831.

REL 3832. Myth, Ritual, and Popular Religion in China. 3 Credits.

Key aspects of popular religious myths, symbols, rituals, and practices in China, such as ancestor worship, spirit possession, fengshui theories, and pilgrimage.

REL 3841. Religion in Modern China. 3 Credits.

The changes, destructions, and reconstructions of Chinese religions from the late 19th century to the present day. The relationship between the (re)making of Chinese religions and the making of a modern Chinese nation-state. Same as CHIN 3841.

REL 3881. Women, Gender, and Religion in China. 3 Credits.

A historical introduction to the concepts of body, gender, and womanhood in Confucian, Daoist, Buddhist, and popular Chinese religious traditions. Women's roles in religious ritual and practices; the influence of Christianity and modernity. Same as WSTU 3881, EALL 3881.

REL 3901. Thinking About Religion: Classic and Contemporary Approaches. 3 Credits.

Analysis of different ways in which religious phenomena can be approached. Readings and discussion of some of the epoch-making books in the development of the study of religion.

REL 3910. Perennial Philosophy. 3 Credits.

The meaning of the concept of 'perennial philosophy' as understood by various scholars of thought throughout Eastern and Western history, including its contemporary significance. Perennial philosophy as it concerns the nature of the 'divine reality,' the human state, the cosmos, the arts, and relations between religions.

REL 3915. Islam and Hinduism in South Asia. 3 Credits.

Investigation of the historical development and contemporary practice of Islam in South Asia (India, Nepal, Pakistan, Bangladesh, and Afghanistan). Particular attention to devotional traditions within Sufism and Bhakti Hinduism.

REL 3923. Violence and Peace in Judaism, Christianity, and Islam. 3 Credits.

Historical analysis of the violent and peaceful dimensions of the three Abrahamic faiths, with focus on the relationship of the scriptures of each of the three traditions to the later interpretations that supported both violent and peaceful readings of those texts.

REL 3931. Interfaith Dialogue in World Religions. 3 Credits.

Comparison of certain families of religions and the doctrinal debates in which they have engaged, including Hindu-Buddhist, inter-Hindu, inter-Buddhist, Buddhist-Confucian, Jewish-Christian, inter-Christian (Catholic-Protestant), Christian-Islamic, and inter-Islamic debates.

REL 3945. The Psychological Study of Spirituality. 3 Credits.

The complex interrelationship between psychology and spirituality: health and wellness; development of a spiritual life; psychological factors involved in spirituality; therapy and multicultural issues. Same as PSYC 3945.

REL 3951. Myth, Epic and Novel. 3 Credits.

Religious themes and images of the hero and their cultural significance in literature: e.g., Indo-European, Biblical, Babylonian narrative traditions; Greek epic and drama; Dante, Milton, Dostoevsky, Kafka, Hesse, Faulkner, Beckett.

REL 3989. The Goddess in India and Beyond. 3 Credits.

The goddess traditions of Hinduism, with some attention to goddess traditions in the ancient Near East and the Mediterranean. Classical Sanskrit, Tantric, and popular expressions of Hindu goddess worship. Comparative studies and issues of gender.

REL 3990. Selected Topics in Religion. 3 Credits.

Critical examination of religious phenomena rendered timely by current events or special resources. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

REL 3990W. Selected Topics in Religion. 3 Credits.

Critical examination of religious phenomena rendered timely by current events or special resources. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

REL 3999. Readings and Research. 2-3 Credits.**REL 4101. Senior Capstone Seminar. 3 Credits.**

Required of and open to students majoring in religion.

REL 4191W. Senior Honors Thesis. 3 Credits.**REL 5701. Selected Topics. 0-4 Credits.****REL 6201. Special Topics in Religion. 3 Credits.**

May be repeated for credit provided the topic differs.

REL 6401. Islamic Historiographies. 3 Credits.

Muslim historiographic traditions from the 7th to 15th centuries, including what they looked like and how they developed; the development of scholarly methods used to evaluate the source materials for these traditions in the formative and classical periods of Islam; key developments in postclassical, non-Arabic Muslim historiographic traditions in the Indian Subcontinent, Ottoman Turkey, and the Persian lands.

REL 6402. Qur'an and Hadith. 3 Credits.

The structure, major themes, and literary aspects of the twin sources of Islam. Commentaries written by Muslim scholars and their part in spreading the teachings of the sacred book of Islam. The general principle elements of Islamic theology, law, politics, ethics, philosophy, and art and architecture. The science of Hadith, its types, its relation to the Qur'an, and methods used for authentication of the sayings of the Prophet. The historical role of the Qur'an and Hadith both in classical as well as modern period with particular emphasis on its part in forming Muslim perception of society, history, and politics.

REL 6441. Islamic Law. 3 Credits.

Islamic positive law in the contemporary context. The family law of Islam (marriage, dowry, custody, guardianship and various forms of divorce); the law of inheritance and public trust (waqf) as two selected topics of Islamic private law. Examination of theories of jihad and siyar in the contemporary context of nation-state systems of international relationships. Islamic rituals ('ibadat) whose spirituality prevails the totality of the Islamic set of laws and regulations.

REL 6460. Topics in the Study of Islam. 3 Credits.

Study of sources and approaches to the investigation of Islam by both Western Islamicists and Muslim scholars, with discussion of the main controversial issues and differences in methods used by various schools of scholarship. Prerequisite: A course on Islam or permission of instructor.

REL 6461. Topics in Islamic Thought. 3 Credits.

Perennial major issues in Islamic theology, philosophy, and Sufism such as Divine Unity, prophetology, eschatology, religious knowledge, sacred law, and ethics. Prerequisite: A course on Islam or permission of instructor.

REL 6511. Currents of Modern Hinduism. 3 Credits.

Hinduism since the early seventeenth century. Colonialism, the impact of missionaries, orientalism, reform, relations between Brahmanical and popular Hinduism, Sanskrit and vernacular traditions, regionalism, communalism, nationalism, fundamentalism, politicized "syndicated" Hinduism, and secularism.

REL 6557. India's Great Epics. 3 Credits.

The Mahabharata and the Ramayana are treated in alternate offerings of the course. These founding epic texts of devotional (bhakti) Hinduism are taught in English translation. Vernacular and performative versions of the epics and Western adaptations.

REL 6771. American Religion to 1830. 3 Credits.

Religious thought and life during the Colonial and early National periods.

REL 6773. American Religion Since 1830. 3 Credits.

Religious thought and life from the Civil War to the present.

REL 6911. Myth, Ritual and Language. 3 Credits.

Method and theory in the interpretation of myth and narrative, ritual and sacrifice, and symbolism, with primary reference to the history of religions.

REL 6997. Readings and Research. 2-3 Credits.

Investigation of special problems.

REL 6998. Thesis Research. 3 Credits.

REL 6999. Thesis Research. 3 Credits.

BACHELOR OF ARTS WITH A MAJOR IN RELIGION

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Prerequisite courses: REL 1003 or both REL 1001 and REL 1002

Required courses (12 credits):

REL 1009	The Hebrew Scriptures (or another course in Hebrew Scriptures, such as:)
or REL 3149	Biblical Issues
or REL 3149W	Biblical Issues
REL 1010	The New Testament (or another course in New Testament, such as:)
or REL 1010W	The New Testament
or REL 2165	The Gospels
or REL 3151	The Historical Jesus
or REL 3151W	The Historical Jesus
or REL 3161	The Life and Thought of Paul
or REL 3161W	The Life and Thought of Paul
or REL 3666	The Book of Revelation and Other Apocalypses
REL 3901	Theories and Methods in the Study of Religion (to be taken in the Fall semester of junior year)
REL 4101	Senior Capstone Seminar (to be taken in the Fall semester of senior year)
Four additional courses (12 credits) from one of the following religious traditions:	
Buddhism	
REL 2601	Buddhism
REL 3566	Dharma in Hinduism and Buddhism
REL 3611	South Asian Buddhism

REL 3614	Buddhist Philosophy
Christianity	
REL 2165	The Gospels
REL 2169	The Lost Gospels
REL 2301	Christianity
REL 3151	The Historical Jesus
or REL 3151W	The Historical Jesus
REL 3161	The Life and Thought of Paul
or REL 3161W	The Life and Thought of Paul
REL 3321	Christian Ethics and Modern Society
REL 3341	Christianity in the Ancient World
REL 3342	Medieval Faith and Symbolism
REL 3343	Religion in the Renaissance and Reformation
REL 3344	Christianity in the Modern World
REL 3666	The Book of Revelation and Other Apocalypses
Hinduism	
REL 2562	Mythologies of India
REL 3501	Hinduism
REL 3566	Dharma in Hinduism and Buddhism
REL 3915	Islam and Hinduism in South Asia
REL 3989	The Goddess in India and Beyond
Islam	
REL 2401	Islam
REL 3405	Shi'ite Islam
REL 3414	Islamic Philosophy and Theology
REL 3425	Islamic Political Thought
REL 3431	Sufism (Islamic Mysticism)
REL 3475	Islamic Religion and Art
REL 3481	Women in Islam
REL 3482	Gender and Piety in Islam
REL 3915	Islam and Hinduism in South Asia

Judaism	
REL 2201	Judaism
REL 2211	Rabbinic Thought and Literature
REL 3141	Second Temple/Hellenistic Judaism
REL 3221	Issues in Jewish Ethics
REL 3291	Modern Jewish Thought
REL 3292	Seminar: Issues in Jewish Thought
East Asian Religions	
REL 2811	Confucian Literature in East Asia
or EALL 3811	Confucian Literature in East Asia
REL 2814	Religion and Philosophy in East Asia
REL 3831	Daoism in East Asia
or REL 3831W	Daoism in East Asia
REL 3832	Myth, Ritual, and Popular Religion in China
or EALL 3832	Myth, Ritual, and Popular Religion in China
REL 3841	Religion in Modern China
or CHIN 3841	Religion in Modern China
REL 3881	Women, Gender, and Religion in China
or EALL 3881	Women, Gender, and Religion in China
or WSTU 3881	Women, Gender, and Religion in China
Three additional religion (REL) courses (9 credits) numbered 2000 or above and outside the chosen tradition	

It is recommended that students include the study of foreign languages in their undergraduate program, including a language crucial to one of the religious traditions.

See course listing (p. 1288) for a complete list of course offerings in the Religion Department.

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, students must maintain a grade-point average of 3.5 in courses in the major, and receive a grade of A- or better in REL 4101 Senior Capstone Seminar.

MINOR IN RELIGION

REQUIREMENTS

Six courses (18 credits), of which no more than three may be taken from any one major religious tradition listed below:

Buddhism	
REL 2601	Buddhism
REL 3566	Dharma in Hinduism and Buddhism
REL 3614	Buddhist Philosophy
Christianity	
REL 2165	The Gospels
REL 2169	The Lost Gospels
REL 2301	Christianity
REL 3151	The Historical Jesus
or REL 3151W	The Historical Jesus
REL 3161	The Life and Thought of Paul
or REL 3161W	The Life and Thought of Paul
REL 3321	Christian Ethics and Modern Society
REL 3341	Christianity in the Ancient World
REL 3342	Medieval Faith and Symbolism
REL 3343	Religion in the Renaissance and Reformation
REL 3344	Christianity in the Modern World
REL 3666	The Book of Revelation and Other Apocalypses
Hinduism	
REL 2562	Mythologies of India
REL 3501	Hinduism
REL 3566	Dharma in Hinduism and Buddhism
REL 3915	Islam and Hinduism in South Asia
REL 3989	The Goddess in India and Beyond
Islam	
REL 2401	Islam
REL 3405	Shi'ite Islam

REL 3414 Islamic Philosophy and Theology

MASTER OF ARTS IN THE FIELD OF ISLAMIC STUDIES

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

36 credits, including 12 credits in required courses and 24 credits in pre-approved elective courses.

Prerequisite: a bachelor's degree from an accredited college or university and two years of Arabic language study (which may be taken early on in the coursework).

Required

REL 6401	Islamic Historiographies
----------	--------------------------

REL 6402	Qur'an and Hadith
----------	-------------------

REL 6441	Islamic Law
----------	-------------

REL 6460	Topics in the Study of Islam
----------	------------------------------

REL 6998	Thesis Research
----------	-----------------

REL 6999	Thesis Research
----------	-----------------

6 additional courses chosen from a pre-approved list in a variety of disciplines, most of which should focus on Islam in the contemporary world.

A concentration in Hinduism and Islam is available through GW's participation in the Consortium of Universities.

Depending on their focus of study, students may be asked to take courses in other languages; language courses will not count toward the degree.

See departmental website (<http://religion.columbian.gwu.edu/master-arts-islamic-studies>) for a full program description.

DOCTOR OF PHILOSOPHY IN THE FIELD OF AMERICAN RELIGIOUS HISTORY

REQUIREMENTS

This program is offered in cooperation with the Department of Religion.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63), and the specific requirements of the Doctor of Philosophy in the field of history (p. 250).

The General Examination must include one of the major American fields listed below and one from the Department of Religion (typically history of religion in America).

Candidates in American history must select two major fields from early America (to 1815), 19th-century America (1815–1900), and 20th-century America (1900–). The minor field will normally be topical (e.g., U.S. social, U.S. diplomatic, historic preservation).

All candidates may choose to be examined in one minor field other than history if it is relevant to the program of study.

GRADUATE CERTIFICATE IN ISLAMIC STUDIES

REL 6460	Topics in the Study of Islam
----------	------------------------------

Electives

Two additional courses chosen from an approved list in a variety of disciplines, most of which focus on Islam in the contemporary world

ROMANCE, GERMAN, AND SLAVIC LANGUAGES AND LITERATURES

The Department of Romance, German, and Slavic Languages and Literatures offers undergraduate instruction in French, German, Italian, Portuguese, Russian, and Spanish. In general, Romance language courses are conducted entirely in the language concerned. The proficiency-based curriculum emphasizes skills in aural comprehension, speaking, reading, and writing. Culture, an essential dimension of language acquisition, is integrated from the start.

The undergraduate program is designed to strengthen a student's ability to communicate, reason, and understand the linguistic, social, cultural, and physical environments that inform the lives of the people who speak the target language. Course

work fosters critical thinking, based in the linguistic, cultural, and historical roots of the locations where the language is spoken. The curriculum prepares students for careers in academia, business, diplomacy, government, medicine, and law, among other fields.

Classroom and laboratory study is supplemented by the diverse resources of Washington, D.C., through field trips, foreign films, lectures, and cultural programs at embassies. Contact the Department (<http://rgsll.columbian.gwu.edu>) concerning eligibility, requirements, and procedures for the wide variety of opportunities to study abroad (<http://rgsll.columbian.gwu.edu/study-abroad-and-transfer-credit>).

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in French language, literature, and culture (p. 362)
- Bachelor of Arts with a major in Spanish and Latin American languages, literatures, and cultures (p. 365)
- Bachelor of Arts with a major in German language and literature (p. 363)
- Bachelor of Arts with a major in Russian language and literature (p. 364)

Minors

- Minor in French language, literature, and culture (p. 366)
- Minor in Italian language and literature (p. 367)
- Minor in German language and literature (p. 366)
- Minor in Russian language and literature (p. 367)
- Minor in Spanish and Latin American languages, literatures, and cultures (p. 367)

FACULTY

Professors P. Rollberg, R. Robin (*Chair*), S. Waisman

Associate Professors M. Belenky, C. Britt, Y. Captain, L. Chang, M. de la Fuente, M.R. Gonglewski, D.B. Marshall (*Teaching*), M.B. Stein, I.R. Vergara, L.L. Westwater

Assistant Professors J. Brant, P. Granja-Falconi (*Teaching*), K. Kleppinger, G. Shatalina, A. Waberi

Instructors D.G. Perillan (*Teaching*), A. Serrano-Ripoll, A. Suarez-Touzon

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work

- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Placement examinations: A student who has not been granted advanced standing and who wishes to continue in college the language begun in high school must take a placement examination (<http://departments.columbian.gwu.edu/rgsll>) before registration. Upon completion of the examination, assignment is made to the appropriate course.

Note: In general, Romance language courses are conducted entirely in the language concerned. Oral comprehension, speaking, reading, and writing are the basis of all courses through FREN 2006 Language, Culture & Society II/ITAL 2006 Language, Culture & Society II/PORT 2006 Applied Portuguese Grammar/SPAN 2006 Advanced Spanish II, with culture integrated from the start as an essential dimension of language acquisition.

- French (FREN) (p. 1091)
- Germanic Language and Literature (GER) (p. 1097)
- Italian (ITAL) (p. 1140)
- Portuguese (PORT) (p. 1250)
- Slavic Language and Literature (SLAV) (p. 1299)
- Spanish (SPAN) (p. 1305)

BACHELOR OF ARTS WITH A MAJOR IN FRENCH LANGUAGE, LITERATURE, AND CULTURE

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Prerequisite courses:

FREN 1001	Basic French I
FREN 1002	Basic French II
FREN 1003	Intermediate French I
FREN 1004	Intermediate French II
FREN 2005	Language, Culture & Society I

Required for the major:

30 credits including:	
FREN 3100	Introduction to French Literature

FREN 4910	Proseminar: Rdgs for the Major
FREN 4920W	Proseminar II
Select seven additional upper-division courses numbered 2006 and above, of which four must be in French literature and culture and, with approval of the major advisor, two may be in a related field. Two of the six additional courses must be from the French 4000 series.	
FREN 3100W	Introduction to French Literature
FREN 3210	Medieval and Early Modern French Literature in Context

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, candidates must have attained a 3.5 grade-point average in the major and at least a 3.0 average overall. Students must apply for honors candidacy by the end of the first semester of the junior year; must attain speaking proficiency at the advanced level, as measured by the ACTFL (American Council on the Teaching of Foreign Languages) Oral Proficiency Interview; and must successfully complete an honors thesis (GER 4197 Senior Honors Thesis I-GER 4198 Senior Honors Thesis II).

BACHELOR OF ARTS WITH A MAJOR IN RUSSIAN LANGUAGE AND LITERATURE

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Prerequisite courses:

Select one of the following options:

Option A:

SLAV 1012	Intensive Basic Russian I
SLAV 1034	Intensive Basic Russian II

Option B:

SLAV 1001	First-Year Russian I
SLAV 1002	First-Year Russian II
SLAV 1003	Second-Year Russian I
SLAV 1004	Second-Year Russian II

Required courses in the major:

SLAV 1391	Introduction to Russian Literature I
SLAV 1392	Introduction to Russian Literature II
SLAV 2005	Intermediate Russian I
SLAV 2006	Intermediate Russian II
SLAV 2007	Russia Today: Topics in Advanced Russian I
SLAV 2008	Russia Today: Topics in Advanced Russian II

SLAV 2361	Russian Culture
SLAV 2362	Russian Culture

Two of the following:

SLAV 2471	19th-Century Russian Prose
SLAV 2472	19th-Century Russian Poetry
SLAV 2473	20th-Century Russian Prose
SLAV 2474	20th-Century Russian Poetry

Two of the following:

SLAV 2365	20th-Century Russian Literature to World War II
SLAV 2366	Russian Literature from World War II to the Present
SLAV 2785	Introduction to Russian Cinema I
SLAV 2786	Introduction to Russian Cinema II
SLAV 4595W	Special Topics

Proficiency requirements for the Russian major: By the end of SLAV 2006 Intermediate Russian I, students consult their advisor to choose one of the following two proficiency tracks:

1. Emphasis on proficiency in speaking—students choosing this track must attain speaking proficiency at the Intermediate High level, as measured by the ACTFL Oral Proficiency Interview; a semester of intensive language study in Russia on an approved program is required unless waived by the department.
2. Emphasis on proficiency in reading—students choosing this track must attain reading proficiency at the Advanced level on the ACTFL scale, as measured by a departmental examination; SLAV 2015 Readings in the Russian Press I-SLAV 2016 Readings in the Russian Press II is required, unless waived by the department.

1.

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, a candidate must have attained a 3.5 grade-point average in the major and at least a 3.0 average overall. Students must apply for honors candidacy by the end of the first semester of the junior year; must attain speaking proficiency at the advanced level, as measured by the ACTFL (American Council on the Teaching of Foreign Languages) Oral Proficiency Interview; and must successfully complete an honors thesis (SLAV 4597 Senior Honors Thesis I-SLAV 4598 Senior Honors Thesis II).

Note: No more than three courses taken abroad may count toward the minor (excluding GW Study Centers in Chile and Spain).

SOCIOLOGY

One of the social and behavioral sciences disciplines in the Columbian College of Arts and Sciences, the sociology program offers undergraduate and graduate degree programs and a range of courses, from deviant behavior to sociology of sport. It is designed to strengthen a student's knowledge about human social structure and activity. By living in a city that offers a rich social laboratory, students gain real-life experience conducting quantitative and qualitative research and developing skills in sociological observation and analysis.

Visit the Department of Sociology website (<http://sociology.columbian.gwu.edu/ba-sociology>) for additional information.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in sociology (p. 370)
- Bachelor of Arts with a major in criminal justice (p. 369)
- Bachelor of Arts with a major in human services and social justice (p. 370)
- Combined programs (p. 371)

Minors

- Minor in sociology (p. 372)
- Minor in criminal justice (p. 371)
- Minor in law and society (p. 371)
- Minor in human services and social justice (p. 371)

GRADUATE

Master's programs

- Master of Arts in the field of sociology (p. 372)

- Master of Arts in the field of criminology (p. 372)

FACULTY

University Professor A. Etzioni

Professors R.J. Cottrol, P.H.M. Lengermann (*Research*), G.D. Squires (*Chair*), S.A. Tuch, R. Weitzer, R. Whitaker

Associate Professors C. Deitch, D.S. Eglitis, I. Ken

Assistant Professors F. Buntman, H. Ishizawa, A. Jones, M. Kelso, D. Martinez, E. Morrison, V. Rankin (*Research*)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Note: A student majoring in sociology may not declare a second major or a minor in criminal justice, or vice versa.

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, students must maintain a 3.5 grade-point average in the major, must be registered for 3 credits of SOC 3195 Research during the senior year, and must receive a grade of A on the research paper.

BACHELOR OF ARTS WITH A MAJOR IN HUMAN SERVICES AND SOCIAL JUSTICE

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63)

Prerequisite courses:

SOC 1001	Introduction to Sociology
or SOC 1002	The Sociological Imagination
HSSJ 1100	Introduction to Human Services and Social Justice

Required courses in the major:

HSSJ 1177	Organizing for Social Justice in Human Services
HSSJ 2170	Interpersonal Relationships in Human Services
HSSJ 2171	Human Interactions: Child and Adolescent Development
HSSJ 2172	Human Interactions: Adult Development
HSSJ 2200	Principles of Ethical Leadership
HSSJ 3100W	Program Planning & Evaluation
HSSJ 3110	Nonprofit and Organizational Management
or HSSJ 3110W	Nonprofit and Organizational Management
HSSJ 3152	Fact, Field & Fiction in HSSJ
HSSJ 4193	Research and Independent Study (Only required for Special Honors)
HSSJ 4195	Capstone Seminar
SOC 2101	Social Research Methods
Two of the following four courses must be completed: At least one must be SOC 2170 or SOC 2179; the second course can be any of the other three courses listed below.	
SOC 2170	Class and Inequality in American Society
or SOC 2179	Race and Minority Relations

SOC 2104	Contemporary Sociological Theory
SOC 2175	Sociology of Sex and Gender

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, students must maintain a 3.5 grade-point average in the major, must be registered in HSSJ 4193 Research and Independent Study during the senior year (fall and spring), and must receive an A grade on the research paper.

BACHELOR OF ARTS WITH A MAJOR IN SOCIOLOGY

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Prerequisite course:

SOC 1001	Introduction to Sociology
or SOC 1002	The Sociological Imagination

Required courses in the major:

SOC 2101	Social Research Methods (recommended to be taken before the senior year)
SOC 2102	Techniques of Data Analysis (recommended to be taken before the senior year)
SOC 2103	Classical Sociological Theory
SOC 2104	Contemporary Sociological Theory
SOC 4195	Senior Research Seminar

Seven additional upper-division sociology courses, including at least two courses chosen from the 2160s or 2170s groups

Note: A student majoring in sociology may not declare a second major or a minor in criminal justice, or vice versa.

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, students must maintain a 3.5 grade-point average in the major, must be registered in SOC 4195 Senior

Research Seminar during the senior year, and must receive an A grade on the research paper.

COMBINED PROGRAM

REQUIREMENTS

The Department of Sociology offers three programs leading to combined bachelor's and master's degrees. The programs allow students to take a specified number of graduate credits as part of their undergraduate degree, thereby decreasing the number of credits normally required for the master's degree.

- Bachelor of Arts and Master of Arts in Sociology
- Bachelor of Arts and Master of Arts in Criminal Justice/Criminology
- Bachelor of Arts in Human Services and Social Justice and Master of Arts in Public Administration

Interested students should contact their advisor. Visit the departmental website (<http://sociology.columbian.gwu.edu/combined-degree-bama-programs>) for application deadlines and other program information.

MINOR IN CRIMINAL JUSTICE

REQUIREMENTS

18 credits of course work are required including:

SOC 1001 Introduction to Sociology

or SOC 1002 The Sociological Imagination

SOC 1003 Introduction to Criminal Justice

SOC 2136 Criminology

SOC 2145 Criminal Law

Two of the following electives (at least one elective must be a sociology courses):

SOC 2135 Youth and Delinquency

SOC 2167 Sociology of Law

SOC 2178 Deviance and Control

SOC 2184 Violence and the Family

SOC 2189 Special Topic-Criminal Justice

PSYC 2011 Abnormal Psychology

PSYC 3154 Psychology of Crime and Violence

PSC 2213 Judicial Politics

or PSC 2215 U.S. Constitutional Law and Politics II

or PSC 2217 Executive Branch Politics

FORS 2104 Introduction to Forensic Sciences

PPPA 2117/
PSC 2217 Executive Branch Politics

ANTH 3513 Anthropology of Human Rights

HIST 3370 US Constitutional History

Note: A student majoring in sociology may not declare a second major or a minor in criminal justice, or vice versa.

MINOR IN HUMAN SERVICES AND SOCIAL JUSTICE

REQUIREMENTS

A minimum of 18 credits of HSSJ courses are required including:

HSSJ 1100 Introduction to Human Services and Social Justice

HSSJ 3152 Fact/Field/Fiction: Intersections in HSSJ

3 additional courses (for a total of at least 9 credits) within HSSJ, with no more than one additional course at the 1000-level beyond the required HSSJ 1100

MINOR IN LAW AND SOCIETY

REQUIREMENTS

Admission to this minor requires a minimum 3.3 GPA, based on at least 30 hours of course work at GW. The minor is constituted of 18 hours excluding prerequisites, with a maximum of two courses from any one department. No more than two courses may be counted both for this minor and any other major or minor.

Required:

SOC 2167 Sociology of Law (must be taken prior to or concurrently with PSC 2988)

UW 2031 Equality & the Law (must be taken prior to or concurrently with PSC 2988)

PSC 2988 Internship in Law & Society

One of the following:

AMST 1160 Race, Gender and Law

PHIL 3142 Philosophy of Law

PSC 2214 U.S. Constitutional Law and Politics I

Two courses from any of the four courses immediately preceding and from the following:

BADM 4101 Business Law and Ethics

ECON 3190 Law and Economics

HIST 3370 US Constitutional History

MAE 3171 Patent Law for Engineers

PSC 2213 Judicial Politics

PSC 2444 Public International Law

PUBH 3136 Health Law

SMPA 2173 Media Law

SOC 2145 Criminal Law

MINOR IN SOCIOLOGY REQUIREMENTS

18 credits of courses are required including:

SOC 1001 Introduction to Sociology

or SOC 1002 The Sociological Imagination

SOC 2103 Classical Sociological Theory

or SOC 2104 Contemporary Sociological Theory

Four upper-division sociology courses excluding:

SOC 4192 Advanced Seminar in Criminal Justice

SOC 4195 Senior Research Seminar

Note: A student majoring in sociology may not declare a second major or a minor in criminal justice, or vice versa.

MASTER OF ARTS IN THE FIELD OF CRIMINOLOGY REQUIREMENTS

This program is a joint offering of the Department of Sociology and the Department of Forensic Sciences.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Prerequisite: a bachelor's degree in sociology, criminal justice, criminology, or a related field.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 70).

Students have two options for earning the degree:

A) Complete at least 30 credits of graduate course work and a thesis

B) Complete at least 36 credits of graduate course work and a comprehensive examination

The following courses are required for the degree:

SOC 6230 Sociological Research Methods

SOC 6231 Data Analysis

SOC 6238 Development of Sociological Theory

or SOC 6239 Contemporary Sociological Theory

SOC 6258 Deviance and Control

SOC 6259 Criminology

SOC 6232 Qualitative Methodology: Doing Field Research

or SOC 6240 Field Research in Organizational Settings

Five elective courses in criminology, of which at least two are in forensic sciences and at least one is selected from the following:

SOC 6260 Special Topics in Criminal Justice

SOC 6261 Sociology of Law

SOC 6262 Corrections

SOC 6263 Race and Crime

SOC 6264 Organized Crime

SOC 6266 Gender & Criminal Justice

SOC 6273 The Sex Industry

Students opting for a thesis substitute the following for two of the elective courses:

SOC 6998 Thesis Research

SOC 6999 Thesis Research

MASTER OF ARTS IN THE FIELD OF SOCIOLOGY REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

Prerequisite: a bachelor's degree.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 70).

All students must complete at least 30 credit hours of graduate course work plus a thesis: SOC 6998 Thesis Research (fall) and SOC 6999 Thesis Research (spring).

The following courses are required for the degree:

SOC 6230	Sociological Research Methods
SOC 6231	Data Analysis
SOC 6238	Development of Sociological Theory
SOC 6239	Contemporary Sociological Theory
SOC 6232	Qualitative Methodology: Doing Field Research
or SOC 6240	Field Research in Organizational Settings

Two courses in a major field and one course in a minor field. Fields of specialization are criminology, social inequality, and urban sociology. For SOC 6295 Research, no more than 3 credits may be applied toward the degree requirements. With the consent of an advisor, one graduate course in a related department or program can be used for either one of the major courses or for the minor course requirement.

Plus a thesis:

SOC 6998	Thesis Research
SOC 6999	Thesis Research

SPEECH AND HEARING SCIENCE

Whether learning about communication sciences or the relationship between language and society, students studying speech and hearing sciences at GW receive in-depth knowledge of all aspects of communication. As part of the social and behavioral sciences discipline in the Columbian College of Arts and Sciences, the program provides deep knowledge of language and communication, including the consequences of speech and hearing challenges on individuals and society, and the treatment of communication impairments.

UNDERGRADUATE

Bachelor's program

- Bachelor of Arts with a major in speech, language, and hearing science (p. 377)s

Minor

- Minor in speech, language, and hearing sciences (p. 378)

GRADUATE

Master's programs

- Master of Arts in the field of speech-language pathology (p. 378), for students with an undergraduate degree in speech-language pathology
- Master of Arts in the field of speech-language pathology post-baccalaureate (p. 378) program, for students with an undergraduate degree in another field

FACULTY

Professors L. Bernstein, C.W. Linebaugh, J. Mahshie (*Chair*), G.M. Schulz

Associate Professors S. Brundage, F. Subiaul

Assistant Professors S. Campbell (*Teaching*), C. Core, A.B. Hancock, M. Thothathiri, G. Wallace

Teaching Instructor M.E. O'Donnell

Professorial Lecturer M. Bamdad, M.E. Moody

Clinical Instructors K. Comer, G. Greenman, L. Jacobs-Condit, J. Kumar, J. McHugh, R. Neuman, L. Siegfried

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

SPHR 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the Schedule of Classes for more details. Restricted to First-year students in CCAS.

SPHR 1011. Voice and Diction. 3 Credits.

Development of naturalness, correctness, and clarity in conversation through the study of phonetics, rate, volume, pitch, and quality in preparation for performance. Laboratory fee.

SPHR 1071. Foundations of Human Communication. 3 Credits.

An introduction to the fundamental principles of the biology of speech, hearing and language, language structure and use, and human communicative interaction. Practice in the identification of specific verbal and nonverbal aspects of communication behavior.

SPHR 1071W. Foundations of Human Communication. 3 Credits.

An introduction to the fundamental principles of the biology of speech, hearing and language, language structure and use, and human communicative interaction. Practice in the identification of specific verbal and nonverbal aspects of communication behavior.

SPHR 1072. Multicultural Issues in Human Communication. 3 Credits.

Consideration of the influences of culture and bilingualism on language development and use and on communicative interaction; experimental and ethnographic methods for studying language and communication in a multicultural society.

SPHR 1081. American Sign Language I. 3 Credits.

Development of basic communication skills, with appropriate vocabulary and grammatical structures; emphasis on comprehension skills.

SPHR 1082. American Sign Language II. 3 Credits.

Continuation of SPHR 1081. Development of basic communication skills, with appropriate vocabulary and grammatical structures; emphasis on comprehension skills. Prerequisite: SPHR 1081.

SPHR 1084. Perspectives in Deaf Culture. 3 Credits.

Introduction to the Deaf community as a linguistic and cultural minority group. The roles of deaf people in the larger society, including political activism. Generational differences concerning education, socioeconomic status, medical issues, and language.

SPHR 2083. American Sign Language III. 3 Credits.

Continuation of SPHR 1082. Development of basic communication skills, with appropriate vocabulary and grammatical structures; emphasis on comprehension skills. Prerequisite: SPHR 1082.

SPHR 2101. Research Methods. 3 Credits.

Introduction to fundamental research principles (e.g., hypothesis testing, sampling, validity and reliability), designs (e.g., experiments, case studies), and methods (e.g., behavioral observations, acoustic and physiologic measurements, neuro-imaging) used in the study of speech, language, and hearing. Prerequisites: SPHR 1071.

SPHR 2102. Neural Substrates-SpHr & Lang. 3 Credits.

SPHR 2104. Speech and Language Disorders. 3 Credits.

Survey of the nature and causes of developmental and acquired disorders of speech and language. Emphasis on prevention and effective communication with persons having a speech-language impairment.

SPHR 2104W. Speech and Language Disorders. 3 Credits.

Survey of the nature and causes of developmental and acquired disorders of speech and language. Emphasis on prevention and effective communication with persons having a speech-language impairment.

SPHR 2105. Anatomy and Physiology for Speech and Hearing I. 3 Credits.

Anatomy and physiology of the respiratory, phonatory, articulatory, and resonatory subsystems of speech; swallowing; and the cranial nerves.

SPHR 2106. Anatomy and Physiology for Speech and Hearing II. 3 Credits.

Anatomy of the auditory and vestibular systems; physiology of hearing; anatomy of the brain and spinal cord; physiology of the nervous system.

SPHR 2107. Acoustics. 0-3 Credits.

This course focuses on speech acoustics, with emphasis on how the speech signal is produced and the elements of speech important for speech perception. Recommended background: Students are advised to complete, or currently be taking, Phonetics (SPHR 2136) and Anatomy and Physiology (SPHR 2105) with this course.

SPHR 2108. Introduction to Audiology. 3 Credits.

Survey of the field of audiology, including the measurement of hearing, the nature and causes of hearing impairment, hearing aids and habilitation/rehabilitation of the hearing impaired. Prerequisite: SPHR 2107; prerequisite or corequisite: SPHR 2106. Laboratory fee.

SPHR 2117. Hearing & Perception. 3 Credits.

Consideration of the psychoacoustics of the normal auditory system in terms of auditory sensitivity, loudness, pitch, masking, and binaural hearing. Topics in speech perception that build upon psychoacoustics and speech acoustics. Prerequisite: SPHR 2108.

SPHR 2130. Phonetics and Phonological Development. 3 Credits.

Detailed study of English phonetics and phonology; prespeech vocalization and phonological development; multicultural issues in phonological development; intensive practice in phonetic transcription. Prerequisite or corequisite: SPHR 2105. Laboratory fee.

SPHR 2131. Language Acquisition and Development. 3 Credits.

Theories of language acquisition; development of language from birth through adolescence; emphasis on development of semantics, syntax, morphology, and pragmatics; multicultural issues in language development. Laboratory fee. Prerequisite: SPHR 2135.

SPHR 2132. Literacy. 3 Credits.

An overview of literacy development (thinking, listening, speaking, reading, spelling, writing) with emphasis on reading and writing development. Laboratory fee. Prerequisite: SPHR 1071.

SPHR 2133. Autism. 3 Credits.

How the study of autism and related disorders may shed light on the characteristics of the mind. The broad characteristics of autism spectrum disorders, including cognitive, behavioral, and neural aspects; definitions of typical vs. atypical development; and difficulties associated with diagnosis and treatment.

SPHR 2135. Language: Structure, Meaning, and Use. 3 Credits.

A survey of basic linguistic terminology and the components of language structures. Major topics will include language structure (syntax, morphology, phonology), meaning (semantics), and the use of language as a means of communication among individuals (pragmatics).

SPHR 2136. Phonetics. 2 Credits.

An overview of phonetics of American English and an introduction to sounds of languages of the world. General principles of phonetic description and analysis, speech production mechanisms, classification of consonants and vowels of English and other languages, suprasegmental aspects of speech, and acoustic characteristics of speech sounds. Allophonic variation and phonetic characteristics of connected speech and social and regional phonetic variation. Instruction and practice in transcription using the International Phonetic Alphabet. Restricted to none. Prerequisites: none. Recommended background: None required.

SPHR 3116. Brain & Language. 3 Credits.

How the brain operates for language production and understanding and how damage to the brain can interrupt neural processes with a variety of neurolinguistic consequences. Neuroimaging and behavioral research that informs the understanding of the bases of neurolinguistic communication disorders. Prerequisite or corequisite: SPHR 2106.

SPHR 3199. Selected Topics. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

SPHR 4118. Senior Seminar. 3 Credits.

Critical evaluation of the research literature on speech and hearing; the process of scientific writing and analysis; how research can inform and improve clinical practice. For departmental majors in the senior year. Prerequisite: SPHR 1071 or SPHR 1071W or SPHR 2104 or SPHR 2104W.

SPHR 4118W. Senior Seminar. 3 Credits.

Critical evaluation of the research literature on speech and hearing; the process of scientific writing and analysis; how research can inform and improve clinical practice. For departmental majors in the senior year. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Laboratory fee. Prerequisites: SPHR 1071 or SPHR 1071W or SPHR 2104 or SPHR 2104W.

SPHR 4119. Analysis and Modification of Communication Disorders. 3 Credits.

For department majors in their senior year. Assessment of speaker-listener behavior; acoustic, behavioral, and linguistic properties of speaker intelligibility and credibility; observation, analysis, and modification of speech and language comprehension and expression. Prerequisite: senior standing. Laboratory fee.

SPHR 4196. Independent Study. 1-6 Credits.

Independent research and special projects. Before students are permitted to register for SPHR 4196, they must submit a written proposal of the plan of study and obtain approval of the staff member who will direct the study and of the department chair.

SPHR 6201. Clinical Practicum in Speech-Language Pathology. 1-6 Credits.

Supervised clinical practice in the evaluation and treatment of speech and language disorders; counseling of clients and families; development of treatment plans and writing of evaluation and progress reports. Admission by permission of the instructor. May be repeated for up to 6 credit hours.

SPHR 6202. Clinical Practicum in Audiology. 1-6 Credits.

Supervised clinical practice in behavioral and electrophysiologic assessment of hearing, hearing aid assessment and fitting, and aural rehabilitation; counseling clients and families; writing evaluation and progress reports. Admission by permission of the instructor. May be repeated, but may not be taken for more than 6 credit hours.

SPHR 6205. Professional and Clinical Issues in Speech and Hearing. 1 Credit.

SPHR 6207. Diagnostic Procedures in Speech and Hearing. 3 Credits.

Fundamental philosophical and conceptual issues in the assessment of speech-language functioning across a wide range of disorders and diverse populations. Consideration of how assessment procedures guide treatment decisions.

SPHR 6210. Research in Communication Sciences and Disorders. 1,3 Credit.

Fundamental issues and methods in clinical research; group and single-subject experimental designs; application of clinical research methodology and findings to assessment and treatment. Non-thesis students register for 3 credits; thesis students register for 1 credit concurrent with SPHR 6211. Restricted to graduate students in speech and hearing sciences.

SPHR 6211. Preparing the Thesis Prospectus. 2 Credits.

For first-year graduate students. Introduction to the fundamentals of quantitative research design and procedures in the speech and hearing sciences. Critical evaluation of research in speech and hearing sciences; scientific writing skills; the process and expectations for conducting thesis research. Students register for SPHR 6210 for 1 credit. Restricted to speech and hearing sciences master's thesis students.

SPHR 6220. Disorders of Articulation and Phonology. 3 Credits.

Survey of the nature and causes of impairments of speech sound production in children and adults. Differential diagnosis of oral motor versus phonological disorders; treatment approaches; identification and modification of regional dialects and foreign accents. Laboratory fee.

SPHR 6221. Neurodevelopmental Disorders of Speech Production. 2 Credits.

Evaluation and treatment of infants and children with neurodevelopmental speech disorders, including cerebral palsy. Emphasis on management of prespeech oral motor and feeding impairments. Laboratory fee.

SPHR 6222. Acquired Neuromotor Disorders of Speech Production. 2 Credits.

Examination of the neuroanatomical and neurophysiological bases and acoustic and perceptual characteristics of acquired dysarthrias and apraxia of speech. Evidence-based approaches to the assessment, differential diagnosis, and treatment of these disorders. Laboratory fee.

SPHR 6230. Pediatric Language and Speech Disorders I. 3 Credits.

Survey of current approaches for assessing and treating language delays and disorders in infants, toddlers, preschoolers, school-age children, and adolescents. Review of standardized, observational, and ethnographic approaches used in language assessment; current models of intervention and service delivery. Laboratory fee.

SPHR 6231. Pediatric Language and Speech Disorders II. 3 Credits.**SPHR 6240. Neurogenic Communication Disorders. 3 Credits.**

Differential diagnosis of acquired speech and language disorders, with an emphasis on the aphasia acquired in adulthood. Evidence-based approaches to the assessment and treatment of adult neurogenic language disorders. Laboratory fee.

SPHR 6241. Applied Neuroanatomy. 3 Credits.

Neuroanatomy and neurophysiology of systems underlying speech, language, and hearing. Neuroimaging techniques and investigations. Applications to the assessment and treatment of communication disorders. Laboratory fee.

SPHR 6250. Eval/Treatment-Speech Disorder. 3 Credits.**SPHR 6251. Seminar: Speech Fluency Disorders. 3 Credits.**

Consideration of stuttering and other disorders of speech rate and rhythm from developmental, linguistic, physiological, and psychosocial points of view. Investigation of evidence-based approaches to assessment and treatment.

SPHR 6260. Voice Disorders: Evaluation and Treatment. 3 Credits.

Normal anatomy and physiology of the human vocal mechanism. Nature, causes, and clinical management of functional and organic voice disorders, including laryngectomy. Laboratory fee.

SPHR 6261. Seminar: Voice Disorders. 2 Credits.**SPHR 6276. Aural Rehabilitation. 3 Credits.**

Habilitation/rehabilitation of the hearing impaired, including auditory training, speech reading, hearing aids, assistive listening devices, communication strategies, and counseling. Laboratory fee.

SPHR 6277. Psychoeducational Management of Children With Hearing Impairment. 3 Credits.**SPHR 6281. Dysphagia. 2 Credits.**

Anatomy and physiology of normal swallowing. Nature and causes of dysphagia in adults. Assessment, including clinical examination and radiologic methods; treatment. Laboratory fee.

SPHR 6282. Augmentative Communication and Computer Applications in Communication Disorders. 2 Credits.

Principles of assessment, development, and selection of augmentative and alternative communication systems; application through case studies. Computer applications, including review of selected hardware and software and selection criteria. Laboratory fee.

SPHR 6283. Multicultural Perspectives in Communication Development and Disorders. 2 Credits.

Application of culturally appropriate and theoretically based speech and language procedures to clinical assessment and intervention with multilingual/multicultural populations.

SPHR 6290. Selected Topics in Clinical Audiology. 1-3 Credits.

Advanced study of selected theoretical and clinical issues. May be repeated, but may not be taken for more than a total of 6 credits.

SPHR 6291. Selected Topics in Speech-Language Pathology. 1-3 Credits.

Advanced study of selected theoretical and clinical issues regarding various aspects of practice in speech-language pathology. May be repeated but not for more than a total of 6 credit hours.

SPHR 6295. Independent Research in Speech, Language, and Hearing. 1-12 Credits.**SPHR 6998. Thesis Research. 2 Credits.****SPHR 6999. Thesis Research. 2 Credits.**

BACHELOR OF ARTS WITH A MAJOR IN SPEECH, LANGUAGE, AND HEARING SCIENCES

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Required (20 credits)

SPHR 1071	Foundations of Human Communication
SPHR 2101	Research Methods
SPHR 2131	Language Acquisition and Development
SPHR 2135	Language: Structure, Meaning, and Use
SPHR 2136	Phonetics
SPHR 4118W	Senior Seminar
STAT 1053	Introduction to Statistics in Social Science

Students must complete a concentration in either communication sciences and disorders, hearing and deafness, or language and communication sciences.

Communication Sciences and Disorders Concentration

Required

SPHR 2104 or SPHR 2104W	Speech and Language Disorders
SPHR 2105	Anatomy and Physiology for Speech and Hearing I
SPHR 2106	Anatomy and Physiology for Speech and Hearing II
SPHR 2107	Acoustics
SPHR 2108	Introduction to Audiology
SPHR 4119	Analysis and Modification of Communication Disorders
Two electives from the following:	

SPHR 1072 Multicultural Issues in Human Communication

SPHR 1081 & SPHR 1082	American Sign Language I and American Sign Language II
SPHR 2132	Literacy
SPHR 2133	Autism
SPHR 3116	Brain & Language

Hearing and Deafness Concentration

Required

SPHR 1081	American Sign Language I
SPHR 1084	Perspectives in Deaf Culture
SPHR 2106	Anatomy and Physiology for Speech and Hearing II
SPHR 2107	Acoustics
SPHR 2108	Introduction to Audiology
SPHR 2117	Hearing & Perception
Two electives from the following:	

SPHR 1072 Multicultural Issues in Human Communication

SPHR 2104 Speech and Language Disorders

SPHR 2132 Literacy

SPHR 3116 Brain & Language

Language and Communication Sciences Concentration

Required

PSYC 2014	Cognitive Psychology
SPHR 1072	Multicultural Issues in Human Communication
SPHR 2106	Anatomy and Physiology for Speech and Hearing II
SPHR 3116	Brain & Language
Four electives from the following:	

ANTH 1004 Language in Culture and Society

ANTH 3601 Language, Culture, and Cognition

ANTH 3602 Ethnographic Analysis of Speech

or ANTH 3602W Ethnographic Analysis of Speech

ANTH 3603	Psycholinguistics
PSYC 2013	Developmental Psychology
PSYC 3118	Neuropsychology
PSYC 3121	Memory and Cognition
PSYC 3122	Cognitive Neuroscience
SPHR 2104	Speech and Language Disorders
SPHR 2105	Anatomy and Physiology for Speech and Hearing I
SPHR 2117	Hearing & Perception
SPHR 2132	Literacy
SPHR 2133	Autism

SPECIAL HONORS

To qualify for graduation with Special Honors, the student must fulfill the general requirements stated under University Regulations, submit an application to the department before the beginning of the senior year, register for at least 1 credit of SPHR 4196 Independent Study, and complete an independent study honors project with distinction. Students must confer with an advisor before beginning the work. A 3.75 grade-point average in the major and overall is required both for acceptance and for graduation with Special Honors.

MINOR IN SPEECH, LANGUAGE, AND HEARING SCIENCES

REQUIREMENTS

18 credits including:

SPHR 1071	Foundations of Human Communication
or SPHR 1071W	Foundations of Human Communication
SPHR 2105	Anatomy and Physiology for Speech and Hearing I
SPHR 2107	Acoustics
SPHR 2135	Language: Structure, Meaning, and Use
Two of the following:	
SPHR 2104	Speech and Language Disorders
or SPHR 2104W	Speech and Language Disorders
SPHR 2106	Anatomy and Physiology for Speech and Hearing II
SPHR 2108	Introduction to Audiology

SPHR 2131	Language Acquisition and Development
SPHR 2132	Literacy
SPHR 2133	Autism
SPHR 2136	Phonetics
SPHR 3116	Brain & Language

MASTER OF ARTS IN THE FIELD OF SPEECH-LANGUAGE PATHOLOGY

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Prerequisite: the degree of Bachelor of Arts with a major in speech and hearing science from this University, or an equivalent degree, and an appropriate score on the Aptitude Test of the Graduate Record Examination

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

Required

42 credits of approved course work without a thesis or, with the approval of the department, 36 credits of approved course work with a thesis (SPHR 6295 Independent Research in Speech, Language, and Hearing and SPHR 6998 Thesis Research-SPHR 6999 Thesis Research).

All students must satisfy the academic and supervised practicum requirements of the Certificate of Clinical Competence awarded by the American Speech-Language-Hearing Association and satisfactorily complete a master's comprehensive examination.

SPEECH-LANGUAGE PATHOLOGY POST-BACCALAUREATE PROGRAM

The Master of Arts in the field of speech-language pathology post-baccalaureate program is designed for persons wishing to enter the profession of speech-language pathology, but whose undergraduate major was in another field.

Students wishing to participate in the post-baccalaureate program apply to the master's degree program and may be granted "conditional admission" to the graduate program. Conditional admission requires that students complete nine prerequisite courses (scheduled on Tuesdays and

Thursdays). Completion of the post-baccalaureate program, including the master's degree, usually requires 33 months of full-time study. The courses of the post-baccalaureate program must be completed with a grade of B- or better in each course and a cumulative GPA of 3.0 or better, within a student's first year of the graduate program. No other grades, including I (incomplete), W (authorized withdraw), or Z (unauthorized withdraw) are acceptable for these courses. Failure to meet these conditions will result in the termination of a student's degree candidacy.

The post-baccalaureate program of study includes the following courses:

Required

SPHR 2104	Speech and Language Disorders
SPHR 2105	Anatomy and Physiology for Speech and Hearing I
SPHR 2106	Anatomy and Physiology for Speech and Hearing II
SPHR 2107	Acoustics
SPHR 2131	Language Acquisition and Development
SPHR 2135	Language: Structure, Meaning, and Use
SPHR 2136	Phonetics
SPHR 4119	Analysis and Modification of Communication Disorders

STATISTICS

Statistics is one of the natural, mathematical, and biomedical sciences programs in the Columbian College of Arts and Sciences. The curriculum emphasizes the important role of statistics as it provides methodologies for making advances in medicine, genetics, and other research arenas, and for making decisions in business and public policy. The program prompts students to learn the reasoning and methods for analyzing and understanding data as they explore how these skills can be applied to develop new initiatives.

UNDERGRADUATE

Bachelor's program

- Bachelor of Science with a major in statistics (p. 383)

Minor

- Minor in statistics (p. 384)

GRADUATE

Master's programs

- Master of Science in the field of biostatistics (p. 753) (jointly administered by the Department of Statistics in CCAS and the Department of Epidemiology and Biostatistics in SPH)
- Master of Science in the field of statistics (p. 384)

Doctoral programs

- Doctor of Philosophy in the field of biostatistics (p. 758) (jointly administered by the Department of Statistics in CCAS and the Department of Epidemiology and Biostatistics in SPH)
- Doctor of Philosophy in the field of statistics (p. 385)

CERTIFICATE

- Graduate certificate in survey design and data analysis (p. 385)

FACULTY

Professors E. Bura, J. Chandra (*Research*), J.L. Gastwirth, J.M. Lachin III, Z. Li, D.L. Lipscomb (*Chair*), H.M. Mahmoud, R. Modarres, T.K. Nayak

Associate Professors S. Bose, S. Kundu, Y. Lai, M. Larsen, J.R. Stroud

Assistant Professors T. Apanasovich, S. Balaji, W. Barta, J. Landon, Q. Pan

Professorial Lecturers P. Chandhok, C.M. Fleming, F. Ponti

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Note: STAT 1051 Introduction to Business and Economic Statistics, STAT 1053 Introduction to Statistics in Social Science, STAT 1111 Business and Economic Statistics I, and STAT 1127 Statistics for the Biological Sciences are related in their subject matter, and credit for only one of these courses may be applied toward a degree. One entrance unit in algebra is prerequisite to all courses in statistics.

STAT 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. See the Schedule of Classes for more details. Restricted to First-year students in CCAS.

STAT 1051. Introduction to Business and Economic Statistics. 3 Credits.

Lecture (3 hours), laboratory (1 hour). Frequency distributions, descriptive measures, probability, probability distributions, sampling, estimation, tests of hypotheses, regression and correlation, with applications to business.

STAT 1053. Introduction to Statistics in Social Science. 3 Credits.

Lecture (3 hours), laboratory (1 hour). Frequency distributions, descriptive measures, probability, sampling, estimation, tests of hypotheses, regression and correlation, with applications to social sciences.

STAT 1091. Principles-Statistical Methods. 3 Credits.**STAT 1111. Business and Economic Statistics I. 3 Credits.**

Descriptive statistics, graphical methods, probability, special distributions, random variables, sampling, estimation and confidence intervals, hypothesis testing, correlation and regression.

STAT 1127. Statistics for the Biological Sciences. 3 Credits.

Introduction to statistical techniques and reasoning applicable to the biomedical and related sciences. Properties of basic probability functions: binomial, Poisson, and normal. Data analysis, inference, and experimental design.

STAT 1129. Introduction to Computing. 3 Credits.

Introduction to elements of computer programming and problem-solving using Pascal. Hands-on experience will be acquired through computer programming projects, including some simple statistical applications.

STAT 2105. Statistics in the Behavioral Sciences. 3 Credits.

Lecture (3 hours), laboratory (1 hour). Advanced study of statistical techniques for research problems. Analysis of variance, correlation techniques, nonparametric techniques, sampling theory. Prerequisite: an introductory statistics course and satisfactory performance on a placement examination.

STAT 2112. Business and Economic Statistics II. 3 Credits.

Continuation of STAT 1111. Emphasis on techniques of regression, chi-square, nonparametric inference, index numbers, time series, decision analysis, and other topics relevant to economics and business. Prerequisite: STAT 1111.

STAT 2118. Regression Analysis. 3 Credits.

Lecture (3 hours), laboratory (1 hour). Simple and multiple linear regression, partial correlation, residual analysis, stepwise model building, multicollinearity and diagnostic methods, indicator variables. Prerequisites: STAT 1111 or equivalent.

STAT 2123. Introduction to Econometrics. 3 Credits.

Same as Econ 2123.

STAT 2183. Intermediate Stat Lab/Packages. 3 Credits.

Application of program packages (e.g., SAS, SPSS) to the solution of one-, two- and k-sample parametric and nonparametric statistical problems. Basic concepts in data preparation, modification, analysis and interpretation of results. Prerequisite: an introductory statistics course.

STAT 2183W. Intermediate Statistical Laboratory: Statistical Computing Packages. 3 Credits.

Application of program packages (e.g., SAS, SPSS) to the solution of one-, two- and k-sample parametric and nonparametric statistical problems. Basic concepts in data preparation, modification, analysis and interpretation of results. Prerequisite: an introductory statistics course.

STAT 3119. Analysis of Variance. 3 Credits.

Lecture (3 hours), laboratory (1 hour). Introduction to the design of experiments and analysis of variance; randomized block, factorial, Latin square designs, and analysis of covariance. Prerequisite: STAT 2118.

STAT 3187. Introduction to Sampling. 3 Credits.

Problems of sampling and sample design. Simple random, stratified, systematic, cluster, and multistage designs; control of sampling and non-sampling errors. Prerequisite: STAT 1051 .

STAT 4157. Introduction to Mathematical Statistics I. 3 Credits.

Basic concepts of probability theory, including random variables, independence, distribution theory, and sampling theory. Prerequisite: MATH 1232 .

STAT 4158. Introduction to Mathematical Statistics I. 3 Credits.

Continuation of STAT 4157. Inference procedures, including estimation, hypothesis testing, regression analysis, and experimental design. Prerequisite: MATH 1232 .

STAT 4181. Applied Time Series Analysis. 3 Credits.

Autoregressive integrated moving average (ARIMA) modeling and forecasting of univariate time series. Estimation of spectral density functions, white noise tests, and tests for periodicities. Theory and applications using SAS. Prerequisite: MATH 2233, STAT 4157- STAT 4158 or STAT 2118.

STAT 4188. Nonparametric Stat Inference. 3 Credits.

Statistical inference when the form of the underlying distribution is not fully specified. Nonparametric procedures for estimation and testing hypotheses. An introduction to robust procedures. Prerequisite: STAT 1051 .

STAT 4189. Mathematical Probability and Applications I. 3 Credits.

Probability theory, including combinatorial analysis, conditional probability, and stochastic independence. Random variables and their distributions; laws of large numbers and central limit theorem. Application of concepts to elementary stochastic processes (coin-tossing sequences, branching processes, Markov chains). Prerequisite: MATH 1232 .

STAT 4190. Mathematical Probability and Applications II. 3 Credits.

Continuation of STAT 4189. Probability theory, including combinatorial analysis, conditional probability, and stochastic independence. Random variables and their distributions; laws of large numbers and central limit theorem. Application of concepts to elementary stochastic processes (coin-tossing sequences, branching processes, Markov chains). Prerequisite: MATH 1232 .

STAT 4195. Reading and Research. 1-12 Credits.

May be repeated once for credit. Admission by permission of department chair.

STAT 4197. Fundamentals of SAS Programming for Data Management. 3 Credits.

Fundamentals of the SAS system for data management, statistical analysis, and report writing. Data modification; programming; file handling; and macro writing. Prerequisite: An introductory statistics course and STAT 1129.

STAT 4198. Special Topics. 3 Credits.

Topic to be announced in the Schedule of Classes. May be repeated for credit provided the content differs.

STAT 6104. Statistics in Management, Administration, and Policy Studies. 3 Credits.

Introductory study of statistical techniques for research problems. For graduate students in fields other than statistics who have no previous statistics training. May not be taken by graduate students in statistics.

STAT 6201. Mathematical Statistics I. 3 Credits.

Probability, distribution theory, sampling theory, estimation, sufficient statistics, hypothesis testing, analysis of variance, multivariate normal distribution. Prerequisite: MATH 2233, MATH 2184.

STAT 6202. Mathematical Statistics II. 3 Credits.

Continuation of STAT 6201. Probability, distribution theory, sampling theory, estimation, sufficient statistics, hypothesis testing, analysis of variance, multivariate normal distribution. Prerequisite: MATH 2233, MATH 2184.

STAT 6207. Methods of Statistical Computing I. 3 Credits.

Error analysis, computational aspects of linear models, sweep operator, random number generation, simulation, resampling. Optimization, numerical integration (Gaussian quadrature, Simpson's rule); E-M algorithm. Prerequisite: STAT 2118, STAT 4157- STAT 4158; MATH 2184; knowledge of a programming language.

STAT 6208. Methods of Statistical Computing II. 3 Credits.

Numerical linear algebra, matrix decomposition and eigenvalue problems. Smoothing and density estimation. Graphics, interactive and dynamic techniques for data display. Object-oriented programming. Prerequisite: STAT 2118, STAT 4157- STAT 4158; MATH 2184; knowledge of a programming language.

STAT 6210. Data Analysis. 3 Credits.

Review of statistical principles of data analysis, using computerized statistical procedures. Multiple regression and the general linear model, analysis of contingency tables and categorical data, logistic regression for qualitative responses. Prerequisite: STAT 2118, STAT 4157 or STAT 6201, and STAT 2183 .

STAT 6213. Intermediate Probability and Stochastic Processes. 3 Credits.

Discrete and continuous random variables and their distributions, conditional distributions and conditional expectation, generating functions and their applications, convergence of random variables; introduction to Brownian motion, homogeneous and nonhomogeneous Poisson processes and martingales. Prerequisite: STAT 6201- STAT 6202 .

STAT 6214. Applied Linear Models. 3 Credits.

Introduction to regression techniques for discrete and continuous response variables. The course includes a computing component using SAS and S> Prerequisite: MATH 2233 and MATH 2184.

STAT 6215. Applied Multivariate Analysis I. 3 Credits.

Application of multivariate statistical techniques to multidimensional research data from the behavioral, social, biological, medical, and physical sciences. Prerequisite: STAT 3119, STAT 4157- STAT 4158; MATH 2184.

STAT 6216. Applied Multivariate Analysis II. 3 Credits.

Continuation of STAT 6215. Application of multivariate statistical techniques to multidimensional research data from the behavioral, social, biological, medical, and physical sciences. Prerequisite: STAT 3119, STAT 4157- STAT 4158; MATH 2184.

STAT 6217. Design of Experiments. 3 Credits.

Design and analysis of single- and multiple-factor experiments. Includes block designs, repeated measures, factorial and fractional factorial experiments, response surface experimentation. Prerequisite: STAT 4157-STAT 4158; MATH 2184.

STAT 6218. Linear Models. 3 Credits.

Theory of the general linear parametric model. Includes least squares estimation, multiple comparisons procedures, variance components estimation. Prerequisite: STAT 6201- STAT 6202; MATH 2184.

STAT 6221. Design of Experiments for Behavioral Sciences. 3 Credits.

Applications of advanced experimental design to research problems in behavioral sciences and education. Prerequisite: STAT 2105 or STAT 2118 and permission of instructor. Not open to graduate students in statistics.

STAT 6223. Bayesian Statistics: Theory and Applications. 3 Credits.

An overview of Bayesian statistics, including its foundational issues, decision under uncertainty, linear models, expert opinion, and computational issues. Prerequisite: STAT 6201–STAT 6202.

STAT 6227. Survival Analysis. 3 Credits.

Parametric and nonparametric methods for the analysis of events observed in time (survival data), including Kaplan–Meier estimate of survival functions, logrank and generalized Wilcoxon tests, the Cox proportional hazards model and an introduction to counting processes. Prerequisite: STAT 6201–STAT 6202 or permission of instructor.

STAT 6231. Contingency Table Analysis. 3 Credits.

A study of the theoretical bases underlying the analysis of categorical data. Measures and tests of association; Mantel–Haenszel procedure; weighted least squares and maximum likelihood estimators in linear models; estimating equations; logistic regression; loglinear models. Prerequisite: STAT 6201–STAT 6202.

STAT 6233. Questionnaire Design. 3 Credits.

Questionnaire development from the perspective of cognitive techniques. Questionnaire issues range from choosing the mode of data collection (mail, telephone, or in-person) to selecting the respondent to the differences between asking attitude and factual questions. Pretesting the instrument chosen.

STAT 6234. Intermediate Statistical Laboratory: Statistical Computing Packages. 3 Credits.

Application of program packages (e.g., SAS, SPSS) to the solution of one-, two- and k-sample parametric and nonparametric statistical problems. Basic concepts in data preparation, modification, analysis and interpretation of results. Prerequisite: an introductory statistics course.

STAT 6236. Applied Sampling Techniques. 3 Credits.

Problems of sampling and sample design. Simple random, stratified, systematic, cluster, and multistate designs; control of sampling and non-sampling errors. Prerequisite: STAT 1051.

STAT 6238. Survey Management. 3 Credits.

Tools used in the management of a survey operation from the initial customer contacts through training, fieldwork, data processing, data analysis, report writing, and presentation of results. Issues in budgeting, staffing, and scheduling, with emphasis on quality management.

STAT 6242. Regression Graphics/Nonparametric Regression. 3 Credits.

Linear regression, nonparametric regression, smoothing techniques, additive models, regression trees, neural networks, and dimension reduction methods. Prerequisite: STAT 2118; MATH 2233, MATH 2184.

STAT 6251. Risk and Reliability. 3 Credits.

STAT 6252. Statistical Methods in Bioinformatics and Computational Biology. 3 Credits.

STAT 6253. Legal Statistics. 3 Credits.

STAT 6254. Statistical Genetics. 3 Credits.

STAT 6282. Foundational Issues in Risk Analysis. 3 Credits.

Descriptive statistics, classical probability, Venn diagrams, conditional probability, Bayes' law and law of total probability. Independence and interdependence, discrete and continuous random variables. Probability models, correlation, interpretation of probability (physical, logical, personal, and subjective). The likelihood function and personal probability. Statistical inference (frequentist and Bayesian).

STAT 6283. Essentials of Risk Analysis. 3 Credits.

Utility and risk. The psychology of risk. Decision trees and decision making under uncertainty. Fault and event trees. Decision trees in risk, safety analysis, infrastructure protection. Simulating rare events. The failure rate functions. The cumulative hazard and survival function. Univariate and multivariate failure models. Causal, cascading, and interdependent failure events. Graphical analysis. Network survivability assessments.

STAT 6284. 9/11 Case Studies. 3 Credits.

Focus on 9/11-like risks to U.S. Critical Infrastructure Key Resources (CIKR). Critical overview of many approaches used in estimating risk in the CIKR arena. Real-time statistical and computer risk modeling. Topics include 18 CIKR sectors, basic risk models for CIKR assets, risk of complex targets and systems, and current state of practice.

STAT 6285. Case Studies: Environmental, Health, and Financial Risk. 3 Credits.

Risks encountered in financial markets, sustainability and climate change, and drug safety and health delivery systems. Development of models and reliable tools for optimal decision-making.

STAT 6287. Modern Theory of Sample Surveys. 3 Credits.

Application of statistical theory to the sampling of finite populations. Simple, stratified, cluster, double and subsampling. Special topics, including super-populations and randomized response. Prerequisite: STAT 4157–STAT 4158.

STAT 6289. Topics in Statistics. 3 Credits.

STAT 6290. Principles of Demography. 3 Credits.

Introduction to basic demographic perspectives and data; methods for analysis of population size, distribution, and composition; determinants and consequences of population trends. Departmental prerequisite waived. Same as ECON 6290.

STAT 6291. Methods of Demographic Analysis. 3 Credits.

Basic methods for analysis of mortality, natality, and migration; population estimates and projections; estimation of demographic measures from incomplete data. Departmental prerequisite waived. Same as ECON 6291.

STAT 6295. Reading and Research. 3 Credits.

May be repeated once for credit.

STAT 6298. Seminar: Special Topics. 3 Credits.**STAT 6998. Thesis Research. 3 Credits.****STAT 6999. Thesis Research. 3 Credits.****STAT 8226. Advanced Biostatistical Methods. 3 Credits.**

Statistical methods for the analysis of longitudinal data: nonparametric, fixed effects, mixed effects, generalized estimating equations. Methods for the analysis of emerging data: group sequential analysis, Brownian motion, Bayesian methods, and stochastic curtailment. Other advanced topics of current research in biostatistics. Prerequisite: STAT 6201-STAT 6202 or permission of instructor.

STAT 8257. Probability. 3 Credits.

Probabilistic foundations of statistics, probability distributions, random variables, moments, characteristic functions, modes of convergence, limit theorems, probability bounds. Prerequisite: STAT 6201- STAT 6202, knowledge of calculus through functions of several variables and series.

STAT 8258. Distribution Theory. 3 Credits.

Special distributions of statistics, small and large sample theory, order statistics, and spacings. Prerequisite: STAT 8257.

STAT 8259. Advanced Probability. 3 Credits.

Conditional expectation and martingales; weak convergence in general metric spaces and functional central limit theorems for i.i.d. random variables and martingales; applications to biostatistics. Prerequisite: STAT 8257 or an equivalent measure-theoretic introduction to probability.

STAT 8262. Nonparametric Inference. 3 Credits.

Inference when the form of the underlying distribution is unspecified. Prerequisite: STAT 6201- STAT 6202.

STAT 8263. Advanced Statistical Theory I. 3 Credits.

Decision theoretic estimation, classical point estimation, hypothesis testing. Prerequisite: STAT 6201- STAT 6202.

STAT 8264. Advanced Statistical Theory II. 3 Credits.

Asymptotic theory, hypothesis testing, confidence regions. Prerequisite: STAT 8257, STAT 8263.

STAT 8265. Multivariate Analysis. 3 Credits.

Multivariate normal distribution. Hotelling's T2 and generalized T20, Wishart distribution, discrimination and classification. Prerequisite: STAT 6201- STAT 6202.

STAT 8266. Topics-Multivariate Analysis. 3 Credits.**STAT 8271. Foundational and Philosophical Issues in Statistics. 3 Credits.**

Axiomatic underpinnings of Bayesian statistics, including subjective probability, belief, utility, decision and games, likelihood principle, and stopping rules. Examples from legal, forensic, biological, and engineering sciences. Students are expected to have a background in computer science, economics, mathematics, or operations research. Prerequisite: STAT 6201- STAT 6202.

STAT 8273. Stochastic Processes I. 3 Credits.

Fundamental notions of Markov chains and processes, generating functions, recurrence, limit theorems, random walks, Poisson processes, birth and death processes, applications. Prerequisite: STAT 6201- STAT 6202.

STAT 8274. Stochastic Processes II. 3 Credits.

Continuation of STAT 8273. Fundamental notions of Markov chains and processes, generating functions, recurrence, limit theorems, random walks, Poisson processes, birth and death processes, applications. Prerequisites: STAT 6201- STAT 6202.

STAT 8281. Advanced Time Series Analysis. 3 Credits.

Autoregressive integrated moving average (ARIMA) modeling and forecasting of univariate and multivariate time series. Statespace or Kalman filter models, spectral analysis of multiple time series. Theory and applications using the University computer. Prerequisite: MATH 2233, STAT 6201- STAT 6202 .

STAT 8288. Modern Theory/Sample Surveys. 3 Credits.**STAT 8289. Seminar. 3 Credits.**

Admission by permission of instructor.

STAT 8375. Econometrics I. 3 Credits.

Statistical foundations for econometrics; standard methods of estimation and inference for classical and generalized regression models. Same as ECON 8375.

STAT 8376. Econometrics II. 3 Credits.

Topics may include asymptotic theory, statistical endogeneity, instrumental variables estimation, discrete and limited dependent variable models, and time-series models. Same as ECON 8376. Prerequisite: STAT 8375.

STAT 8998. Advanced Reading and Research. 1-12 Credits.

Limited to students preparing for the Doctor of Philosophy general examination. May be repeated for credit.

STAT 8999. Dissertation Research. 3-12 Credits.

Limited to Doctor of Philosophy candidates. May be repeated for credit.

BACHELOR OF SCIENCE WITH A MAJOR IN STATISTICS

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Prerequisite courses:

MATH 1231	Single-Variable Calculus I
MATH 1232	Single-Variable Calculus II
MATH 2233	Multivariable Calculus
STAT 1051	Introduction to Business and Economic Statistics (or equivalent)

or STAT 1053 Introduction to Statistics in Social Science

STAT 1129 Introduction to Computing (or equivalent)

or CSCI 1121 Introduction to C Programming

Required courses in the major:

MATH 2184 Linear Algebra I

or MATH 2185 Linear Algebra I for Math Majors

STAT 2118 Regression Analysis

STAT 3119 Analysis of Variance

STAT 4157 Introduction to Mathematical Statistics I

STAT 4158 Introduction to Mathematical Statistics I

STAT 2183 Statistical Computing Packages

or STAT 4197 Fundamentals of SAS Programming for Data Management

Four approved upper-division courses, some of which, in special circumstances, may be taken in other departments. To assure a balanced program, departmental approval of electives is required for all majors. Some suggested electives are:

STAT 2112 Business and Economic Statistics II

STAT 3187 Introduction to Sampling

STAT 4181 Applied Time Series Analysis

STAT 4188 Nonparametric Stat Inference

STAT 4189 Mathematical Probability and Applications I

STAT 4198 Special Topics

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, students who seek Special Honors in statistics should check with the Department.

MINOR IN STATISTICS

REQUIREMENTS

18 credits of approved courses in this department:

An introductory statistics course from the following:

STAT 1051 Introduction to Business and Economic Statistics

STAT 1053 Introduction to Statistics in Social Science

STAT 1111 Business and Economic Statistics I

STAT 1127 Statistics for the Biological Sciences

Required:

STAT 2118 Regression Analysis

or STAT 2123 Introduction to Econometrics

STAT 2183 Statistical Computing Packages

or STAT 4197 Fundamentals of SAS Programming for Data Management

9 additional credits of approved statistics courses

MASTER OF SCIENCE IN THE FIELD OF STATISTICS

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

General prerequisite: coursework in multivariate calculus, matrix theory, and at least two undergraduate statistics courses.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

Required:

The program of study consists of 30 credit hours of graduate course work without a thesis.

The department may also approve a program of study consisting of 24 credit hours of course work plus a thesis (STAT 6998 Thesis Research-STAT 6999 Thesis Research).

All candidates must take STAT 6201 Mathematical Statistics-STAT 6202 Mathematical Statistics.

Courses may be chosen in related fields (economics, mathematics, finance, management, computer science, engineering, public health) with approval of the advisor.

DOCTOR OF PHILOSOPHY IN THE FIELD OF STATISTICS

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Prerequisite: a master's degree in statistics or a related discipline. The main requirement is a strong background in mathematics, including courses in advanced calculus, linear algebra, probability and mathematical statistics. Some deficiencies may be made up concurrently during the student's first year. In some instances, a student may enter the Ph.D. program with a bachelor's degree.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

The requirements for the Doctor of Philosophy Program (p. 71)

Required

STAT 6201	Mathematical Statistics I
STAT 6202	Mathematical Statistics II
STAT 6223	Bayesian Statistics: Theory and Applications
STAT 8257	Probability
STAT 8258	Distribution Theory
STAT 8263	Advanced Statistical Theory I
STAT 8264	Advanced Statistical Theory II

At least two of the following:

STAT 6218	Linear Models
STAT 8226	Advanced Biostatistical Methods
STAT 8259	Advanced Probability
STAT 8262	Nonparametric Inference
STAT 8265	Multivariate Analysis
STAT 8273	Stochastic Processes I
STAT 8274	Stochastic Processes II
STAT 8281	Advanced Time Series Analysis

A minimum of 21 additional credits as determined by consultation with the departmental doctoral committee

The General Examination, consisting of two parts:

A. A written qualifying examination that must be taken within 24 months from the date of enrollment in the program and is based on:

STAT 6201	Mathematical Statistics I
STAT 6202	Mathematical Statistics II
STAT 8257	Probability
STAT 8263	Advanced Statistical Theory I

B. An examination to determine the student's readiness to carry out the proposed dissertation research

A dissertation demonstrating the candidate's ability to do original research in one area of probability or statistics.

GRADUATE CERTIFICATE IN SURVEY DESIGN AND DATA ANALYSIS

REQUIREMENTS

Specific admission requirements can be found on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

Required:

STAT 6233	Questionnaire Design
STAT 6234	Intermediate Statistical Laboratory: Statistical Computing Packages
STAT 6236	Applied Sampling Techniques
STAT 6238	Survey Management

Additional information can be found on the Department of Statistics, Graduate Certificate in Survey Design and Data Analysis website (<http://statistics.columbian.gwu.edu/graduate-certificate-survey-design-and-data-analysis>).

THEATRE AND DANCE

The Department of Theatre and Dance, an interdisciplinary liberal arts program, offers instruction in how to acquire the tools and knowledge to fully appreciate the value of theatre and dance. It strengthens a student's ability to apply critical thinking and discussion to the creation and understanding of theatre and dance, as well as the understanding of other peoples and cultures. The curriculum is supplemented as students create live performances and original productions that stimulate and involve the university community, as well as the community beyond the campus. Through creative endeavor and scholarly research, the program also develops the interests

and talents of students seeking careers or advanced study in theatre and dance.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in theatre (p. 391)
- Bachelor of Arts with a major in dance (p. 390)

Minors

- Minor in theatre (p. 392)
- Minor in dance (p. 392)

GRADUATE

Master's programs

- Master of Fine Arts in the field of dance (p. 393)
- Master of Fine Arts in the field of production design (p. 393)

FACULTY

Professors L.B. Jacobson, A.G. Wade, M.R. Withers

Associate Professors M.A. Buckley, D.T.S. Burgess (*Chair*), C.F. Gudenius, J.I. Kanter

Assistant Professors S. Johannesdottir, J. Traub, T. Wetenhall

Adjunct Professors E. Kitsos-Kang, A.C. Stokes

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Note: Courses in the 1000s series are primarily for nonmajors.

Departmental prerequisite: Prerequisite to all graduate TRDA courses: M.F.A. candidacy and permission of instructor.

TRDA 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the Schedule of Classes for more details. Restricted to First-year students in CCAS.

TRDA 1015. Understanding the Dance. 3 Credits.

The art of dance—a lecture and experiential approach to its cultural importance, history, and creative processes. The contributions of the choreographer and dancer to society. Attendance at performances and presentations, and viewing video. Laboratory fee.

TRDA 1020. Women and the Creative Process. 3 Credits.

Consideration of questions of aesthetics and creativity through the study of art produced by women since the mid-20th century. The creation, meaning, and impact of work across the fields of visual art, dance, theatre, and music.

TRDA 1025. Understanding the Theatre. 3 Credits.

The art of the theatre; its literature, history, aesthetics, and mechanics. Contributions of the playwright, actor, director, and designer. Attendance at assigned theatrical performances.

TRDA 1035. Theatre Production. 3 Credits.

Understanding of the basic elements of theatrical production (performance, technical and management) and the collaborative artist/artisan process through discussion, observation, and practical application. Laboratory fee.

TRDA 1152. Beginning Modern/Postmodern Dance. 1 Credit.

Introduction to modern dance technique inclusive of basic concepts of dynamic alignment, stretch, strength, improvisation and musicality. Laboratory fee.

TRDA 1153. Beginning/Intermediate Modern/Postmodern Dance. 1 Credit.

Introduction to modern dance technique inclusive of basic concepts of dynamic alignment, stretch, strength, improvisation and musicality. Laboratory fee.

TRDA 1170. Intermediate Modern/Postmodern Dance I. 2-3 Credits.

Recommended for students with previous dance experience in jazz, ballet, hip hop, modern, or other styles. May be repeated for credit. Laboratory fee.

TRDA 1171. Intermediate Modern/Postmodern Dance II. 2-3 Credits.

Continuation of TRDA 1170. Recommended for students with previous dance experience in jazz, ballet, hip hop, modern, or other styles. May be repeated for credit. Prerequisite: TRDA 1170, or permission of instructor. Laboratory fee.

TRDA 1214. Beginning Acting. 3 Credits.

An introduction to the process of acting. Students will learn to make choices using various acting techniques to create characters and learn about the process.

TRDA 1240. Performance Theory. 3 Credits.

Examination of the ways in which the practices and heuristics of performance have been used to understand a wide range of cultural activities; expansion of the notion of aesthetic performance proper to include sources, subjects, and forms historically considered non-dramatic; and underlying questions concerning what performance is, what it does, and what value it holds.

TRDA 1330. Basics of Production Design. 3 Credits.

Basic elements of production design and technical execution. Laboratory required. Laboratory fee.

TRDA 2172. Intermediate/Advanced Modern/Postmodern Dance I. 2-3 Credits.

May be repeated for credit. Prerequisite: TRDA 1171, or permission of instructor. Laboratory fee.

TRDA 2173. Intermediate/Advanced Modern/Postmodern Dance II. 2-3 Credits.

Continuation of TRDA 2172. May be repeated for credit. Prerequisite: TRDA 2172, or permission of instructor. Laboratory fee.

TRDA 2179. Contact Improvisation. 2 Credits.

A movement form that arises from the point of contact between partners who explore gravity, space, and timing in the spontaneous moment-to-moment exchange of the dance. Exploring the improvisational state of body/mind through the use of imagery, tuning the senses, mindfulness practices, and play. Laboratory fee.

TRDA 2180. Movement Improvisation/Perform. 3 Credits.

Exploring the body and its surroundings in movement, use of language, narrative, environments and contexts for creative expression, developing event and performance structures from improvisation. May be repeated for credit. Laboratory fee.

TRDA 2185. Trends in Performance. 3 Credits.

Study of the theory and practice of contemporary performance art movements and artists; political and artistic activism; scripting and scoring to create performance works based on a single art discipline or interdisciplinary arts. Laboratory fee.

TRDA 2188. African Dance. 1 Credit.

African/Caribbean dance styles and techniques, with warm-ups and center floor work of long and short movement phrases. Basic/modern/jazz terminology and definitions appropriate to intermediate/advanced/African dance are used. Emphasis on alignment, execution, musical phrasing, and the importance of rhythmic timing and nuance.

TRDA 2189. World Dance. 3 Credits.**TRDA 2190. Gender/Indian Classical Dance. 3 Credits.****TRDA 2191. Dance History. 3 Credits.**

The history of Western theatrical dance from the late 18th century to the present. The major choreographers and their dance works through readings, lectures, video, and discussion.

TRDA 2191W. Dance History. 3 Credits.

The history of Western theatrical dance from the late 18th century to the present. The major choreographers and their dance works through readings, lectures, video, and discussion.

TRDA 2192. Repertory/Performance. 1,2 Credit.

Participation in the processes of learning and performing dance repertory or new dance works. Audition required. Laboratory required. May be repeated for credit. Laboratory fee.

TRDA 2193. Dance Styles I. 1-12 Credits.

Forms of theatrical dance other than ballet or modern, including African dance, Angola Capoeira, music theatre, Spanish dance, world dance, Middle Eastern dance, and others. May be repeated for credit provided the topic differs. Laboratory fee.

TRDA 2194. Dance Styles II. 1-12 Credits.

Continuation of TRDA 2193. Forms of theatrical dance other than ballet or modern, including African dance, Angola Capoeira, music theatre, Spanish dance, world dance, Middle Eastern dance, and others. May be repeated for credit provided the topic differs. Laboratory fee.

TRDA 2195. Global Dance History. 3 Credits.

The role of dance globally in relation to socio-cultural and artistic histories. Importance of certain artists and dance forms contextualized by major world events as seen through the geography of immigration. Perspectives from the Americas, Africa, the Middle East, and Asia.

TRDA 2215. Intermediate Acting. 3 Credits.

Students continue to develop acting techniques introduced in TRDA 1214 through scripted scene work. Students learn to make choices through text exploration, use various acting techniques to create characters and develop clear character relationships, and stage completed scenes. Prerequisites: TRDA 1214 or HONR 2059.

TRDA 2216. Scene Study: Voice & Character. 3 Credits.

The practice and application of voice production with reference to skeletal alignment, breathing, resonance, and articulation. Emphasis on the process of voice production and its application to performance through work on scenes and monologues. Prerequisite: TRDA 2215. Laboratory fee.

TRDA 2240. Play Analysis. 3 Credits.

Traditional and nontraditional (Aristotelian and non-Aristotelian) approaches to the analysis of dramatic literature; literary and theatrical techniques used by playwrights. Same as ENGL 2240.

TRDA 2250. Dramatic Writing. 3 Credits.

A workshop in playwriting and screenwriting, with emphasis on dramatic structure. Same as ENGL 2250. Recommended preparation: ENGL 1210 and two semesters of literature courses.

TRDA 2339. Theatre Practicum. 1 Credit.

Participation in department mainstage productions in a production or management capacity under the supervision of a member of the faculty. Prerequisite: TRDA 1330. After two practicums have been completed, participation may also include performance positions, for which TRDA 1214 is prerequisite. May be repeated for a total of 6 credits. Laboratory fee.

TRDA 3131W. Theatre of Social Change. 3 Credits.

Focuses on theatre of social change as practiced in the second half of the 20th and in the early 21st centuries; exploring additional case studies from South Africa, Europe, and the US.

TRDA 3156. Dance & Arts Management. 3 Credits.

Examination of dance in Washington area communities. Students are required to site visit and engage with individuals and organizations that focus on dance as it pertains to performance, therapy, management, and education. Participation in activities with a dance artist/practitioner or with a producing/service organization is required. Laboratory fee.

TRDA 3174. Advanced Modern/Postmodern Dance I. 2-3 Credits.

May be repeated for credit. Prerequisite: TRDA 2173, or permission of instructor. Laboratory fee.

TRDA 3175. Advanced Modern/Postmodern Dance II. 2-3 Credits.

Continuation of TRDA 3174. May be repeated for credit. Prerequisite: TRDA 3174, or permission of instructor. Laboratory fee.

TRDA 3182. Dance Composition I. 3 Credits.

Problems in structural and conceptual aspects of constructing dances and shaping and forming movement materials. Prerequisite: TRDA 2180; recommended: TRDA 2185. Laboratory fee.

TRDA 3183. Dance Composition II. 3 Credits.

Continuation of TRDA 3182. Emphasis on intention and content in making dances. Prerequisite: TRDA 2180; recommended: TRDA 2185. Laboratory fee.

TRDA 3186. Dance Anatomy & Kinesiology. 3 Credits.

An experiential and theoretical approach to dynamic anatomy and kinesiology as they pertain to the dancer. The student is encouraged to reach full movement potential in relation to contemporary dance techniques, performance, and injury prevention. Laboratory fee.

TRDA 3222. Topics in Advanced Acting. 3 Credits.

The actor's approach to various styles and genres and to non-literary theatrical forms. Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Studio fee. Prerequisite: TRDA 2215.

TRDA 3223. Physical Performance Skills. 3 Credits.

Introduction to a variety of techniques needed by actors and performers, including mime, clowning, slapstick, mask work, and basic stage combat skills. Prerequisite: TRDA 2215. Laboratory fee.

TRDA 3229. Audition Techniques. 3 Credits.

All aspects of the audition process, including selection and rehearsal of audition monologues and handling of cold reading. Laboratory fee. Prerequisite: TRDA 2215.

TRDA 3240. Introduction to Dramaturgy. 3 Credits.

Fundamentals of classical and contemporary dramaturgical practice, including analyzing plays, doing research, supporting directors and actors in rehearsal, writing program notes, and leading post-show discussions. Same as ENGL 3240.

TRDA 3245. History of the Theatre I. 3 Credits.

A dramaturg's approach to case studies of theatre in historical context. Ancient Greece through the 17th century.

TRDA 3245W. History of the Theatre I. 3 Credits.

A dramaturg's approach to case studies of theatre in historical context. Ancient Greece through the 17th century.

TRDA 3246. History of the Theatre II. 3 Credits.

Continuation of TRDA 3245. A dramaturg's approach to case studies of theatre in historical context. The 18th century through the present.

TRDA 3246W. History of the Theatre II. 3 Credits.

Continuation of TRDA 3245. A dramaturg's approach to case studies of theatre in historical context. The 18th century through the present.

TRDA 3248. Theatre Criticism. 3 Credits.

Discussion and witnessing of plays in performance, resulting in written criticism modeled on contemporary journalistic practices. Prerequisite: TRDA 3245 or TRDA 3246 or TRDA 2240/ ENGL 2240. Laboratory fee.

TRDA 3248W. Theatre Criticism. 3 Credits.

Discussion and witnessing of plays in performance, resulting in written criticism modeled on contemporary journalistic practices. Prerequisite: TRDA 3245 or TRDA 3246 or TRDA 2240/ ENGL 2240. Laboratory fee.

TRDA 3250. Intermediate Dramatic Writing. 3 Credits.

A workshop developing scripts for both theatre and film. Same as ENGL 3250. Prerequisite: ENGL 2250 or equivalent. May be repeated for credit with departmental approval.

TRDA 3331. Introduction to Lighting. 3 Credits.

Lecture (2 hours), laboratory (1 hour). Theories and practicum in lighting for theatre and dance. Laboratory fee. Prerequisite: TRDA 1330.

TRDA 3332. Theatrical Makeup Design. 3 Credits.

Theory and practicum in the art of makeup design, including latex and crepe hair. Laboratory fee. Prerequisite: TRDA 1330.

TRDA 3333. Stage Management. 3 Credits.

The role and function of the stage manager in theatrical production. The basic skills needed to begin work in stage management. Emphasis on organization, documentation, and dissemination of information. Prerequisite: TRDA 1330. Laboratory fee.

TRDA 3335. Introduction to Scene Design. 3 Credits.

Fundamental study of scenic design, including historic overview, basic drawing, and rendering techniques, through the use of various mediums and script analysis. Laboratory fee. Prerequisite: TRDA 1330.

TRDA 3336. Introduction to Costuming. 3 Credits.

History of fashion in Western civilization from ancient Greece to the 20th century. Fundamental study of costume construction through specific projects. Costume construction. Prerequisite: TRDA 1330. Laboratory fee.

TRDA 3710W. Contemporary Drama. 3 Credits.

TRDA 4184. Choreography and Performance. 1-3 Credits.

Create a dance or a performance work of individual design, including casting, rehearsal procedures, staging aspects, and public presentation. Prerequisite: TRDA 3182; recommended: TRDA 1330, TRDA 2185. May be repeated for credit. Laboratory fee.

TRDA 4191. Paris Modernism & the Arts. 3 Credits.

TRDA 4275. Directing for the Theatre. 3 Credits.

Fundamentals of script analysis, staging, casting, and rehearsal techniques. Prerequisite: TRDA 1214, TRDA 1330; TRDA 2240/ ENGL 2240 or TRDA 3240/ ENGL 3240. Laboratory fee.

TRDA 4338. Scene Painting. 3 Credits.

The techniques and materials used in creating character in the various elements of set design. Methods include set preparation, coating, mixing, palette preparation, spraying, transfer, texturing, finishing, and wallpapering. Prerequisite: TRDA 1330. Laboratory fee.

TRDA 4595. Selected Topics. 1-3 Credits.

Topics of current interest in theatre or dance. Topics (and course fee, when charged) announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

TRDA 4595W. Selected Topics. 1-3 Credits.

Topics of current interest in theatre or dance. Topics (and course fee, when charged) announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Laboratory fee.

TRDA 4596. Independent Study. 1-6 Credits.

Independent research and special projects. Open to qualified juniors or seniors majoring or minoring in theatre or dance. Before students are permitted to register for TRDA 4596, they must submit a written proposal of the plan of study and obtain approval of the faculty member who is directing the study and the department chair.

TRDA 4598. Internship. 3,6 Credits.

Open to qualified seniors majoring or minoring in theatre or dance. Work placements with not-for-profit and commercial theatre and dance organizations for an approved number of hours per week. Admission requires departmental approval. May be taken for a maximum of 6 credits.

TRDA 4599. Honors Thesis. 3 Credits.

Directed research and/or creative project. Open to qualified seniors by permission. Arrangements must be made with a sponsoring faculty member in the department and applications must be completed early in the second semester of the junior year.

TRDA 6200. Portfolio I: Performance. 1-5 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6201. Personal Aesthetics I: The Body. 5 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6202. Contemporary Dance History and Criticism. 4 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6203. Portfolio II: Choreography/Creativity. 1-5 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6204. Personal Aesthetics II: The Environment. 2 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6205. Choreography. 4 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6206. Dance Pedagogy. 4 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6207. Portfolio III: Artistic Initiative. 1-5 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6208. New Media & Dance. 5 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6209. Cultural Communities of Dance. 4 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6210. Personal Aesthetics III: Integration. 4 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6211. Career Networks in Dance. 4 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6212. Portfolio Review I: Performance. 1-5 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6213. Portfolio Review II: Choreography/Creativity. 1-5 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6214. Portfolio Review III: Artistic Initiatives. 1-5 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6296. Research Project I. 4 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6299. Research Project II. 5 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6331. Intermediate Lighting Design. 3 Credits.

Theory and execution of lighting design for theatre and dance. May be repeated for credit. Prerequisite: M.F.A. candidacy and permission of instructor. Laboratory fee.

TRDA 6335. Intermediate Scene Design. 3 Credits.

Development of advanced skills of scenic design, including script analysis, needs assessment, research techniques, conceptual design development, drawing/ rendering techniques, preparation of construction documentation and fabrication management. Prerequisite: M.F.A. candidacy and permission of instructor. Laboratory fee.

TRDA 6336. Intermediate Costume. 3 Credits.

Basic techniques of costume design through specific projects. Various rendering techniques consistent with the historical period concerned. May be repeated for credit. Prerequisite: M.F.A. candidacy and permission of instructor. Laboratory fee.

TRDA 6338. Scene Painting. 3 Credits.

Development of the skills of painting needed for the reproductive craft of theatrical painting. Prerequisite: M.F.A. candidacy and permission of instructor. Laboratory fee.

TRDA 6340. Period Styles. 3 Credits.

A broad perspective of major European and American cultures through analysis of the interiors, furniture, textiles, fashion, and architecture of major civilizations/ historical periods from Egypt to the present. Prerequisite: M.F.A. candidacy and permission of instructor. Laboratory fee.

TRDA 6342. Pattern Making. 3 Credits.

Pattern drafting and draping methods, based on contemporary and historical clothing. Prerequisite: M.F.A. candidacy and permission of instructor. Laboratory fee.

TRDA 6344. Production Drafting. 3 Credits.

Development of drafting skills for production: groundplans and shop documents. Traditional hand drafting and computer assisted design. Prerequisite: M.F.A. candidacy and permission of instructor. Laboratory fee.

TRDA 6346. Advanced Studies in Design: Collaborative Studies. 3 Credits.

Development of an ability to design and work within a collaborative or teambased environment through visual and verbal communication, script analysis, concept development, and research techniques. Prerequisite: M.F.A. candidacy and permission of instructor. Laboratory fee. May be taken for a total of 15 credits.

TRDA 6348. Techniques in Design Presentation. 3 Credits.

The various techniques used in costume and scenic design presentations, such as rendering with paint, pencil, ink, and electronic media. Prerequisite: M.F.A. candidacy and permission of instructor. Laboratory fee.

TRDA 6595. Selected Topics. 1-3 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor. May be repeated for credit.

TRDA 6596. Independent Research in TRDA. 1-12 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor. May be repeated for credit.

TRDA 6598. Internship. 1-12 Credits.

Internships with theatre companies or arts organizations, including conference and/or seminar. May be taken for a total of 12 credit hours. Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6998. Thesis Research. 3 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

TRDA 6999. Thesis Research. 3 Credits.

Prerequisite: M.F.A. candidacy and permission of instructor.

BACHELOR OF ARTS WITH A MAJOR IN DANCE

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Required courses (34 credits):

TRDA 1330	Basics of Production Design
TRDA 1170	Intermediate Modern/Postmodern Dance I
TRDA 1171	Intermediate Modern/Postmodern Dance II
TRDA 2172	Intermediate/Advanced Modern/Postmodern Dance I
TRDA 2173	Intermediate/Advanced Modern/Postmodern Dance II
TRDA 3174	Advanced Modern/Postmodern Dance I
TRDA 3175	Advanced Modern/Postmodern Dance II
TRDA 2180	Movement Improvisation/Perform
TRDA 2185	Trends in Performance
TRDA 2191	Dance History
or TRDA 2191W	Dance History
TRDA 3156	Dance & Arts Management
TRDA 3182	Dance Composition I
TRDA 3183	Dance Composition II
TRDA 4184	Choreography and Performance
Five additional credits from the following:	
TRDA 1000	Dean's Seminar
TRDA 1015	Understanding the Dance
TRDA 2188	African Dance
TRDA 2189	World Dance
TRDA 2192	Repertory/Performance
TRDA 2193	Dance Styles I
TRDA 2194	Dance Styles II

TRDA 2339	Theatre Practicum
TRDA 3186	Dance Anatomy & Kinesiology
TRDA 3331	Introduction to Lighting
TRDA 4204	Personal Aesthetics II: The Environment
TRDA 4595	Selected Topics
or TRDA 4595W	Selected Topics
TRDA 4596	Independent Study
TRDA 4598	Internship
TRDA 4599	Honors Thesis

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors in Theatre or Dance, students must have a grade-point average of 3.4 in the major and complete TRDA 4599 Honors Thesis with a grade of A. They must consult a faculty advisor at the beginning of the second semester of the junior year to determine eligibility, area of study, and the director of the research or creative project.

BACHELOR OF ARTS WITH A MAJOR IN THEATRE

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Required courses (24 credits):

TRDA 1214	Beginning Acting
TRDA 1240	Performance Theory
TRDA 1330	Basics of Production Design
TRDA 2240	Play Analysis
TRDA 2339	Theatre Practicum (3 credit hours)
TRDA 3245	History of the Theatre I
or TRDA 3245W	History of the Theatre I
TRDA 3246	History of the Theatre II
or TRDA 3246W	History of the Theatre II
TRDA 4597	Senior Project

or TRDA 4599 Honors Thesis

Two courses (6 credits) from the following:

TRDA 3331	Introduction to Lighting
TRDA 3333	Stage Management
TRDA 3335	Introduction to Scene Design
TRDA 3336	Introduction to Costuming
TRDA 4338	Scene Painting

Four courses (12 credits) from the following:

TRDA 2180	Movement Improvisation/Perform
TRDA 2185	Trends in Performance
TRDA 2215	Intermediate Acting
TRDA 2216	Scene Study: Voice & Character
TRDA 3222	Advanced Acting
TRDA 3223	Physical Performance Skills
TRDA 3229	Audition Techniques
TRDA 3231W	Theatre of Social Change
TRDA 3240	Introduction to Dramaturgy
TRDA 3248	Theatre Criticism
TRDA 3332	Makeup Design
TRDA 3710W	Contemporary Drama
TRDA 4275	Directing for the Theatre
TRDA 4595	Selected Topics
TRDA 4596	Independent Study
TRDA 4598	Internship

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors in Theatre, candidates must have a grade-point average of 3.4 in the major and complete TRDA 4599 Honors Thesis with a grade of A. They must consult with a faculty advisor at the beginning of the second semester of the junior year to determine eligibility, area of study, and the director of the research or creative project.

MINOR IN DANCE

REQUIREMENTS

One course (3 credits) from the following:

TRDA 1000	Dean's Seminar
TRDA 1015	Understanding the Dance
TRDA 2180	Movement Improvisation/Perform
TRDA 2185	Trends in Performance
TRDA 2191	Dance History
or TRDA 2191W	Dance History
TRDA 3156	Dance & Arts Management
TRDA 3182	Dance Composition I
TRDA 3183	Dance Composition II
TRDA 3186	Dance Anatomy & Kinesiology

Six additional credits from the list above or from the following:

TRDA 1330	Basics of Production Design
TRDA 2188	African Dance
TRDA 2189	World Dance
TRDA 2192	Repertory/Performance
TRDA 2193	Dance Styles I
TRDA 2194	Dance Styles II
TRDA 2195	Global Dance History
TRDA 2339	Theatre Practicum
TRDA 4184	Choreography and Performance
TRDA 4204	Personal Aesthetics II: The Environment
TRDA 4595	Selected Topics
TRDA 4596	Independent Study
TRDA 4598	Internship

Nine additional credits from either list above or from the following:

TRDA 1170	Intermediate Modern/Postmodern Dance I
TRDA 1171	Intermediate Modern/Postmodern Dance II

TRDA 2172	Intermediate/Advanced Modern/Postmodern Dance I
TRDA 2173	Intermediate/Advanced Modern/Postmodern Dance II
TRDA 3174	Advanced Modern/Postmodern Dance I
TRDA 3175	Advanced Modern/Postmodern Dance II

At least 9 credits must be numbered 2000 or above

MINOR IN THEATRE

REQUIREMENTS

Required courses (6 credits):

TRDA 3245	History of the Theatre I
or TRDA 3245W	History of the Theatre I
TRDA 3246	History of the Theatre II
or TRDA 3246W	History of the Theatre II

Four additional courses (12 credits), at least one of which is numbered 2000 or above, from the following:

TRDA 1025	Understanding the Theatre
TRDA 1035	Theatre Production
TRDA 1214	Beginning Acting
TRDA 1240	Performance Theory
TRDA 1330	Basics of Production Design
TRDA 2215	Intermediate Acting
TRDA 2216	Scene Study: Voice & Character
TRDA 2240	Play Analysis
TRDA 2250	Dramatic Writing
or ENGL 2250	Dramatic Writing
TRDA 2339	Theatre Practicum
TRDA 3131W	Theatre of Social Change
TRDA 3222	Advanced Acting
TRDA 3223	Physical Performance Skills
TRDA 3225	Stage Dialects
TRDA 3227	Acting for the Media

TRDA 3229	Audition Techniques
TRDA 3231W	Theatre of Social Change
TRDA 3240	Introduction to Dramaturgy
or ENGL 3240	Introduction to Dramaturgy
TRDA 3248	Theatre Criticism
or TRDA 3248W	Theatre Criticism
TRDA 3260	Adaptation for Performance
TRDA 3331	Introduction to Lighting
TRDA 3332	Makeup Design
TRDA 3333	Stage Management
TRDA 3335	Introduction to Scene Design
TRDA 3336	Introduction to Costuming
TRDA 3710W	Contemporary Drama
TRDA 4275	Directing for the Theatre
TRDA 4338	Scene Painting

MASTER OF FINE ARTS IN THE FIELD OF DANCE

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Prerequisite: the degree of Bachelor of Arts or Bachelor of Fine Arts, preferably in dance, from a regionally accredited college or university; if the bachelor's degree was earned in another field, appropriate dance experience is a prerequisite.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

The full-time program of study consists of 60 credits including:

TRDA 6200	Portfolio I: Performance
TRDA 6201	Personal Aesthetics I: The Body
TRDA 6202	Contemporary Dance History and Criticism
TRDA 6203	Portfolio II: Choreography/Creativity
TRDA 6204	Personal Aesthetics II: The Environment

TRDA 6205	Choreography
TRDA 6206	Dance Pedagogy
TRDA 6207	Portfolio III: Artistic Initiative
TRDA 6208	New Media & Dance
TRDA 6209	Cultural Communities of Dance
TRDA 6210	Personal Aesthetics III: Integration
TRDA 6211	Career Networks in Dance
TRDA 6296	Research Project I
TRDA 6299	Research Project II
Up to 15 credits of accelerated placement for high-level work is possible through three portfolio review courses:	
TRDA 6212	Portfolio Review I: Performance (for TRDA 6200)
TRDA 6213	Portfolio Review II: Choreography/Creativity (for TRDA 6203)
TRDA 6214	Portfolio Review III: Artistic Initiatives (for TRDA 6207)

A committee consisting of dance faculty and an outside professional administer the portfolio review, using a strict assessment rubric to assist students with tracking their growth and placement level. Students who qualify for the full 5 credits for any/all of these courses through the portfolio review are not required to take the corresponding portfolio course (TRDA 6200 Portfolio I: Performance, TRDA 6203 Portfolio II: Choreography/Creativity, and/or TRDA 6207 Portfolio III: Artistic Initiative); students who receive fewer than 5 credits must take the remaining credits. More information is available at the department's website (<http://theatredance.gwu.edu>).

MASTER OF FINE ARTS IN THE FIELD OF PRODUCTION DESIGN

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>)

Prerequisite: the degree of Bachelor of Arts from this University, or an equivalent degree.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

The program of study consists of 54 credits of graduate and upper-division undergraduate course work in theatre and dance and in art, planned in consultation with the

advisor, including a creative thesis (TRDA 6998 Thesis Research and TRDA 6999 Dance Thesis Research). The program may emphasize scenery, lighting, or costume. For listings of upper-division undergraduate courses, see the Undergraduate Programs Bulletin.

UNIVERSITY WRITING

The University Writing Program (<http://www.gwu.edu/~uwp>) provides comprehensive writing instruction to all bachelor's degree-seeking students in all schools and colleges of the University. In their freshman year, undergraduate students take UW 1020 University Writing, which is offered in a variety of topic-specific sections. Students subsequently take two Writing in the Disciplines (WID) courses—regular, content-area courses that include a writing component and are offered by departments and programs throughout the University. Ideally, students complete WID courses during their sophomore and junior years. Courses indicated with “W” in the Schedule of Classes fulfill the WID University Writing Program requirements. WID courses must total a minimum of 6 credits.

FACULTY

Associate Professors C. Gamber, D. Malone-France (*Executive Director*), M. Mullen, R. Riedner (*Chair*), P. Ryder, C. Smith, A. Wilkerson

Assistant Professors J. Donovan, J. Dueck, W. Fletcher (Teaching), S. Friedman, C. Hayes, R. Kristensen, G. Mantler, J. McCaughey, S. Salchak, H. Schell, M. Svoboda, P. Troutman, Z. Wolfe, C. Zink

Teaching Instructors K.A. Larsen, R.A. Marcus, D.P. Myers, P.S. Presser, M. Riley

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

UW 1010. College Academic English. 3 Credits.

UW 1015. Writing Sem. Summer Scholars. 3 Credits.

UW 1020. University Writing. 4 Credits.

University-level, independent research and writing. Learning to frame research questions, identify and analyze supportive and contradictory evidence, employ a variety of research methods, and use the ideas of other writers appropriately. Developing strategies to draft and revise clear, engaging prose for a variety of purposes and audiences. Thematically oriented seminars; texts and course topics vary among instructors. For topics see www.gwu.edu/~uwp/fyw/uw20-courses.html.

UW 2020. Advanced Topics in Writing. 3 Credits.

For a variety of purposes and audiences, students frame scholarly research questions, identify and analyze supportive and contradictory evidence, employ a variety of research methods, and use the ideas of other writers appropriately. Focus on the norms of writing in particular fields, including rhetorical approaches and stylistic conventions.

UW 2020W. Advanced Topics in Writing. 3 Credits.

For a variety of purposes and audiences, students frame scholarly research questions, identify and analyze supportive and contradictory evidence, employ a variety of research methods, and use the ideas of other writers appropriately. Focus on the norms of writing in particular fields, including rhetorical approaches and stylistic conventions.

UW 2031. Equality & the Law. 3 Credits.

Introduction to how lawyers and legal scholars research and write about specific disputes that arise in the context of complex social issues. The institutional assumptions about the content and style of legal writings. Briefs, legal memoranda, law review articles, resolutions, and many other specialized legal writing forms.

UW 2031W. Equality & the Law. 3 Credits.

UW 2111. Preparation for Peer Tutors in Writing. 3 Credits.

For undergraduates accepted as tutors in the Writing Center: study and practice of techniques for prewriting, writing, and revision; readings on collaborative learning, the composing process, composition theory, cognitive psychology, critical thinking, and the teaching of writing; observation and exercises in writing, peer review, and tutoring. Limited to 15 students.

UW 2111W. Preparation for Peer Tutors in Writing. 3 Credits.

For undergraduates accepted as tutors in the Writing Center: study and practice of techniques for prewriting, writing, and revision; readings on collaborative learning, the composing process, composition theory, cognitive psychology, critical thinking, and the teaching of writing; observation and exercises in writing, peer review, and tutoring. Limited to 15 students.

UW 6213. Theory/Prac. Teaching Writing. 3 Credits.

WOMEN'S STUDIES

Part of the Columbian College of Arts and Sciences' arts and humanities programs, Women's Studies examines women's

lives, literature, histories, and cultures through the lens of feminist theory and practice. The program strengthens a student's ability to gain knowledge of contemporary feminist theories and research methods. Classroom study is supplemented by the diverse resources of the Nation's capital as students experience and participate in the making of women's history in Washington, D.C.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in women's studies (p. 398)
- Combined program (p. 400)

Minors

- Minor in women's studies (p. 402)
- Minor in LGBT and sexuality studies (p. 401)

GRADUATE

Master's programs

- Master of Arts in the field of women's studies (p. 401)
- Master of Arts in the field of public policy with a concentration in women's studies (p. 400)

CERTIFICATE

- Graduate certificate in women's studies (p. 400)

FACULTY

Associate Professors E. Chapman, C. Deitch, K. Mikyong, D. Moshenberg (*Director*), K. Pemberton, R. Riedner

Assistant Professor J. Nash

Adjunct Professors B. Morris, T. Ramlow

Professorial Lecturer M. Frost

Committee on Women's Studies N. Cahn, E. Chacko, L. Chang, K. Daiya, C. Deitch, C. Gamber, B. Gault, C.E. Harrison, H. Hartmann, L. Jacobson, D. Moshenberg, J. Nash, B. Obler, K. Pemberton, R. Riedner, G. Weiss, S. Wolchik, A. Zucker

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students

- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Note: Excluding students enrolled in the Women's Studies Program, completion of WSTU 2120 Intro to Women's Studies and WSTU 2125 Varieties of Feminist Theory or equivalent, or permission of instructor, is prerequisite to all graduate-level women's studies courses.

WSTU 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the Schedule of Classes for more details. Restricted to First-year students in CCAS.

WSTU 1020. Approaches to Women's History. 3 Credits.

Exploration of critical periods of intellectual and cultural change in Western societies as influenced by and affecting women. Examination of images of women and of changing ideal types of femininity and masculinity. Aspects of law, religion, art, culture, work, and politics in relation to these topics. Same as HIST 1020.

WSTU 2120. Intro to Women's Studies. 3 Credits.

A multidisciplinary examination of historical conditions, cultural norms, and social institutions that define women's status in Western culture. Experiences of girls and women in various racial-ethnic, class, and age groups. Alternative visions for women's (and, by implication, men's) roles and status.

WSTU 2120W. Intro to Women's Studies. 3 Credits.

A multidisciplinary examination of historical conditions, cultural norms, and social institutions that define women's status in Western culture. Experiences of girls and women in various racial-ethnic, class, and age groups. Alternative visions for women's (and, by implication, men's) roles and status. Sophomore standing required.

WSTU 2121. The Anthropology of Gender: Cross-Cultural Perspectives. 3 Credits.

Anthropological representations of gender relations in "other" cultures have provided important case material for feminist theorizing of sex differences and gender roles and statuses. How a cross-cultural approach can inform our understanding of gender. Same as ANTH 2501.

WSTU 2125. Varieties of Feminist Theory. 3 Credits.

Classical and contemporary texts on feminist explanations of women's status. Relationships within the sex/gender system and arrangements based on class and race. Evaluation, through the lens of feminist theory, of several academic disciplines in the sciences, social sciences, and humanities. Prerequisite: WSTU 1020 or WSTU 2120 or permission of instructor.

WSTU 2135. A Study of Women and Media. 3 Credits.

The role media plays in women's lives. The limits and effects of a "dominant" media; representations of women in print media and television, especially advertising, and in books and film. How women have attempted to articulate a culture that serves their personal, political, and social interests.

WSTU 2380. Sexuality in US Cultural Hist. 3 Credits.

Examination of the changing social organization and meaning of sexual practices and desires in American culture, with particular attention to the relationship between sexuality and gendered racial and class identities and politics. Same as AMST 2380/ HIST 2380.

WSTU 3136. Chinese Women in Myth, Literature, and Film. 3 Credits.

Women's position in Chinese cultural and political life from prehistoric myth to the present time. Confucian writing, traditional theatre, and films and novels set in China. A general survey of Chinese history establishes the context for discussions of cultural and political phenomena, such as foot binding and the one-child policy. Course conducted in English. Same as CHIN 3136.

WSTU 3136W. Chinese Women in Myth, Literature, and Film. 3 Credits.

Women's position in Chinese cultural and political life from prehistoric myth to the present time. Confucian writing, traditional theatre, and films and novels set in China. A general survey of Chinese history establishes the context for discussions of cultural and political phenomena, such as foot binding and the one-child policy. Course conducted in English. (Same as CHIN 3136W).

WSTU 3170. Selected Topics. 0-4 Credits.

Examination and analysis of central issues in women's studies, such as women and difference, women in media, women and violence, athletics and gender. Topic changes each semester; may be repeated for credit.

WSTU 3170W. Selected Topics. 0-4 Credits.

Examination and analysis of central issues in women's studies, such as women and difference, women in media, women and violence, athletics and gender. Topic changes each semester; may be repeated for credit.

WSTU 3195. Undergraduate Research. 1-3 Credits.

A written proposal approved by the member of the faculty who will supervise the research is required prior to registration.

WSTU 3235. Women and Law. 3 Credits.

Contemporary legal issues that affect women in the United States. Using legal texts and related articles, the course considers a range of theories and documents that are relevant to issues such as violence against women, marriage and divorce, employment, immigration, and reproductive rights.

WSTU 3281. Women in Judaism. 3 Credits.

Jewish women's spirituality as reflected in personal writings, ritual, liturgy, and midrash. Jewish women's history and legal status. Same as REL 3281.

WSTU 3352. Women in the United States I. 3 Credits.

Survey of women's experience in U.S. history, the way gender has organized relations of power, and the impact of race, region, class, and ethnicity on women and on gender roles. (Same as AMST 3352, HIST 3352).

WSTU 3352W. Women in the United States I. 3 Credits.

Survey of women's experience in U.S. history, the way gender has organized relations of power, and the impact of race, region, class, and ethnicity on women and on gender roles. Same as HIST 3352/ AMST 3352.

WSTU 3353. Women in the United States II. 3 Credits.

Continuation of WSTU 3352. Survey of women's experience in U.S. history, the way gender has organized relations of power, and the impact of race, region, class, and ethnicity on women and on gender roles. (Same as AMST 3353, HIST 3353).

WSTU 3362. African American Women's History. 3 Credits.

Addresses the history of African American women's labor, cultural expression, institution-building, activism and strategies to combat oppression from the antebellum period through the late 20th century. Investigates the intersection of race, gender, and class as it has shaped U.S. society, racism, the black freedom movement and African American women's experiences. (Same as HIST 3362, AMST 3362).

WSTU 3362W. African American Women's History. 3 Credits.

Addresses the history of African American women's labor, cultural expression, institution-building, activism and strategies to combat oppression from the antebellum period through the late 20th century. Investigates the intersection of race, gender, and class as it has shaped U.S. society, racism, the black freedom movement and African American women's experiences. (Same as HIST 3362W, AMST 3362W).

WSTU 3410. Lesbian History and Culture. 3 Credits.

Examination of lesbian identity, community, and legal rights from a scholarly feminist perspective.

WSTU 3435. Queer Politics. 3 Credits.

The history of "Lesbian, Gay, Bisexual, Transgender, and Queer" (LGBTQ) politics in the United States. Analysis of influences and intersections of race and ethnicity, class, gender identity and expression, sexuality, sex, and age. Contemporary policy debates relevant to Queer politics.

WSTU 3470. Sexuality and Law. 3 Credits.

Exploration of the ways in which the law has affected individuals' ability to express their sexuality, with a primary focus on sexual orientation and issues such as marriage, adoption, voting rights, sexual harassment, and military service.

WSTU 3481. Women in Islam. 3 Credits.

The ways in which Islam has articulated gender identity and male-female relationships, and conversely, how women have constructed, interpreted, and articulated Islam and their places within it. Same as REL 3481.

WSTU 3530. Women in Africa. 3 Credits.

African women from prehistory to the present, focusing on culture, the role of gender, and outside influences and their impact on women's history. Same as HIST 3530.

WSTU 3820. Global Domestic Labor. 3 Credits.

Consideration of women's paid and unpaid domestic labor, including care work, in the context of global and globalizing political and cultural economies.

WSTU 3845. Global Women's Prison. 3 Credits.

This course examines women's confinement and incarceration in the context of global and globalizing political and cultural economies.

WSTU 3881. Women, Gender, and Religion in China. 3 Credits.

A historical introduction to the concepts of body, gender, and womanhood in Confucian, Daoist, Buddhist, and popular Chinese religious traditions. Women's roles in religious ritual and practices; the influence of Christianity and modernity. Same as REL 3881.

WSTU 3981. Women in Western Religion. 3 Credits.**WSTU 4183. Practicum in Women's Studies. 3 Credits.**

Study of the changing status of women through supervised placement in public and private agencies engaged in policymaking, education, political action, and research. Usually for seniors. Placement arrangements must be made the semester prior to registration; departmental permission is required. (Same as WSTU 6283).

WSTU 4199. Senior Seminar. 3 Credits.

For students completing a major or minor in women's studies. Writings of contemporary scholars and writers whose work provides critical frameworks for feminist scholarship and research. Individual or collaborative research projects are presented and submitted as written papers.

WSTU 6220. Fundamentals of Feminist Theory. 3 Credits.

A survey of historical theories significant to feminist thought, such as liberalism, socialism, evolution, psychoanalysis, and gendered spheres of social action. How these theories were revived and revised by the Second Wave of feminism since the 1960s. Brief examination of postmodernist and Third Wave feminist theorizing.

WSTU 6221. Research Issues in Women's Studies. 3 Credits.

Analysis of the contribution of feminist or gender-relations perspectives from humanities and social science disciplines to the issues and methods of social research and social policy and practice. Topics include a review of feminist frameworks, a critique and re-evaluation of traditional academic disciplines, and analysis of current research on and for women.

WSTU 6225. Contemporary Feminist Theory. 3 Credits.

Developments in feminist theory in the past ten years, with a primary focus on American feminism and its relationship to queer theory and sexuality studies.

WSTU 6230. Global Feminisms. 3 Credits.

The individuals, groups, and policies that shape global agenda for women; local and international fora in which global feminisms are forged.

WSTU 6238. Feminist Ethics and Policy Implications. 3 Credits.

Feminist critiques of traditional ethical reasoning; alternative feminist ethical frameworks examined and applied to contemporary social problems (e.g., respecting cultural differences, dependency, disability). Same as PHIL 6238. Prerequisite: Phil 2125 or 2131 or permission of instructor.

WSTU 6240. Women and Public Policy. 3 Credits.

Analysis of gender-related U.S. policy issues, such as domestic violence, military service, abortion rights, equal employment opportunity, child and dependent care, welfare, social security, and international development assistance.

WSTU 6241. Women and the Law. 3 Credits.

Legal status of women in the United States on both the federal and state levels. Emphasis on constitutional equality, employment law, family law, reproduction and sexuality, and the criminal justice system.

WSTU 6251. Women and Writing. 3 Credits.

Selected topics in the traditions, theory, and texts of women's literary production and culture. Same as ENGL 6540.

WSTU 6257. Gender and Sexuality. 3 Credits.

Study of new theoretical and methodological approaches developed in the anthropology of gender. Topics include postcolonialism, sexuality, and literary representations of gender. Same as ANTH 6501.

WSTU 6265. Women, Welfare & Poverty. 3 Credits.

Examination of how the causes and consequences of poverty differ for women and men; how race, class, and gender shape policy responses to poverty. The history of family assistance policy in the United States and the impact of various welfare reform efforts. Same as SOC 6265.

WSTU 6266. Gender & Criminal Justice. 3 Credits.

How understandings, practices, and theories of gender shape the workings of criminal justice systems, including issues of criminality and responses to crime, victimization and violence, and definitions of illegal behaviors. Same as SOC 6266.

WSTU 6268. Race, Gender and Class. 3 Credits.

How social structures are constructed through race, gender, and class and how they shape experience. The intersections of race, gender, and class in education, science, politics, labor markets, and social welfare policies. Same as SOC 6268.

WSTU 6270. Seminar: Selected Topics. 3 Credits.

Investigation of a current policy issue of particular concern to women, or consideration of women's status in a particular social system. Topics have included women and health; sexualities; women and Judaism; black women; gender, race, and class. May be repeated for credit.

WSTU 6271. Gender and Society. 3 Credits.
 Examination of current empirical and theoretical work on gender as an organizing principle of social relations. Consideration of the relationship of gender to sex and sexuality. Same as SOC 6271.

WSTU 6280. Independent Study. 3 Credits.
 May be repeated for credit. Arrangements must be made with sponsoring faculty member prior to registration.

WSTU 6283. Practicum in Women's Studies. 3-6 Credits.
 Study of the changing status of women through supervised assignment to public and private agencies engaged in policymaking, education, political action, and research. Placement arrangements must be made the semester prior to registration; departmental permission is required. Graduate students may take the course for either 3 or 6 credits, with substantial additional research and writing of a case study required for 6 credits. (Same as WSTU 4183).

WSTU 6295. Independent Research in Women's Studies. 1-3 Credits.
 Individual library or field research. Arrangements must be made with the sponsoring faculty member prior to registration; a written proposal is required.

WSTU 6430. Gender, Sexuality, and American Culture. 3 Credits.
 The changing social organization, cultural representation, and meaning of gender and sexuality in the United States, with emphasis on their relationship to race, class, region, nationality, empire, and globalization. Pre-Columbian settlement to 1876. Same as AMST 6430/ HIST 6430.

WSTU 6431. Gender, Sexuality, and American Culture. 3 Credits.
 Continuation of WSTU 6430. The changing social organization, cultural representation, and meaning of gender and sexuality in the United States, with emphasis on their relationship to race, class, region, nationality, empire, and globalization. 1877 to present. Same as AMST 6431/ HIST 6431.

WSTU 6435. Readings on Women in American History. 3 Credits.
 Important works in American women's history; evolution of the field in historiographical context. Same as AMST6435/HIST 6435.

WSTU 6998. Thesis Research. 3 Credits.

WSTU 6999. Thesis Research. 3 Credits.

WSTU 8275. Women and Health. 3 Credits.
 Theoretical and empirical analyses of women's health: how women's health is constructed by medical, psychological, and critical theorists; how sexism, racism, and classism contribute to women's health problems; and identification of conditions that lead to optimal health and well-being. Same as PSYC 8275.

BACHELOR OF ARTS WITH A MAJOR IN WOMEN'S STUDIES

REQUIREMENTS

The following requirements must be fulfilled:
 The general requirements stated under Columbian College of Arts and Sciences, Undergraduate Programs (p. 63).

Required courses (9 credits):

WSTU 2120	Intro to Women's Studies
or WSTU 2120W	Intro to Women's Studies
WSTU 2125	Varieties of Feminist Theory
or AMST 2125	Varieties of Feminist Theory
WSTU 4199	Senior Seminar

One course from each of the five groups (15 credits):

Race, ethnicity, and class:	
WSTU 3362	African American Women's History
or WSTU 3362W	African American Women's History
or AMST 3362	African American Women's History
or AMST 3362W	Black Women in U.S. History
or HIST 3362	African American Women's History
or HIST 3362W	African American Women's History
AMST 2410	20th-Century U.S. Immigration
or HIST 2410	20th-Century U.S. Immigration
ENGL 1610	Introduction to Black American Literature I
or ENGL 1610W	Introduction to Black American Literature I
ENGL 1611	Introduction to Black American Literature II
or ENGL 1611W	Introduction to Black American Literature II
ENGL 3570	19th-Century Black Literature
ENGL 3960	Asian American Literature
or ENGL 3960W	Asian American Literature
HIST 3360	African American History to 1865
or AMST 3360	African American History to 1865
HIST 3361	African American History Since 1865

or AMST 3361	African American History II
PHIL 2125	Philosophy of Race and Gender
or PHIL 2125W	Philosophy of Race and Gender
Global/transnational:	
CHIN 3136W	Chinese Women in Myth, Literature, and Film
or WSTU 3136W	Chinese Women in Myth, Literature, and Film
WSTU 2121	The Anthropology of Gender: Cross-Cultural Perspectives
or ANTH 2501	The Anthropology of Gender: Cross-Cultural Perspectives
WSTU 3310	Women and War
WSTU 3481	Women in Islam
or REL 3481	Women in Islam
WSTU 3881	Women, Gender, and Religion in China
or REL 3881	Women, Gender, and Religion in China
WSTU 3820	Global Domestic Labor
WSTU 3845	Global Women's Prison
WSTU 3530	Women in Africa
or HIST 3530	Women in Africa
ENGL 1710	Introduction to Postcolonial Literature and Film I
or ENGL 1710W	Introduction to Postcolonial Literature and Film I
ENGL 1711	Introduction to Postcolonial Literature and Film II
or ENGL 1711W	Introduction to Postcolonial Literature and Film II
ENGL 3730	Topics in Postcolonial Literature
or ENGL 3730W	Topics in Postcolonial Literature
SPAN 3570	Latin American Women Writers
Sexualities:	
WSTU 2380	Sexuality in US Cultural Hist
or HIST 2380	Sexuality in US Cultural Hist
or AMST 2380	Sexuality in US History

WSTU 3410	Lesbian History and Culture
WSTU 3435	Queer Politics
WSTU 3470	Sexuality and Law
ENGL 3910	Disability Studies
ENGL 3980	Queer Studies
or ENGL 3980W	Queer Studies
WSTU 3210	Athletics and Gender
Humanities:	
WSTU 1020	Approaches to Women's History
or HIST 1020	Approaches to Women's History
WSTU 2135	A Study of Women and Media
CHIN 3136W	Chinese Women in Myth, Literature, and Film
or WSTU 3136W	Chinese Women in Myth, Literature, and Film
WSTU 2380	Sexuality in US Cultural Hist
or HIST 2380	Sexuality in US Cultural Hist
or AMST 2380	Sexuality in US History
WSTU 3352	Women in the United States I
or HIST 3352	Women in the United States to 1865
or AMST 3352	Women in the United States to 1865
WSTU 3353	Women in the United States II
or HIST 3353	Women in the United States II
or AMST 3353	Women in the United States II
WSTU 3362	African American Women's History
or HIST 3362	African American Women's History
or AMST 3362	African American Women's History
WSTU 3481	Women in Islam
or REL 3481	Women in Islam
WSTU 3530	Women in Africa
or HIST 3530	Women in Africa
WSTU 3981	Women in Western Religion
or REL 2981	Women in Western Religion
ENGL 3730	Topics in Postcolonial Literature

or ENGL 3730W	Topics in Postcolonial Literature
ENGL 3840	Gender and Literature
or ENGL 3840W	Gender and Literature
ENGL 3980	Queer Studies
or ENGL 3980W	Queer Studies
SPAN 3570	Latin American Women Writers
PHIL 2125	Philosophy of Race and Gender
or PHIL 2125W	Philosophy of Race and Gender
Social science:	
SOC 2175	Sociology of Sex and Gender
or SOC 2175W	Sociology of Sex and Gender
PSYC 3150	Psychology of Sex Differences
WSTU 2121	The Anthropology of Gender: Cross-Cultural Perspectives
or ANTH 2501	The Anthropology of Gender: Cross-Cultural Perspectives
PSC 2225	Women and Politics
ANTH 3504	Illness, Healing, and Culture
ANTH 3507	Kinship, Family, and Community
ANTH 3513	Anthropology of Human Rights
or ANTH 3513W	Anthropology of Human Rights
WSTU 4183	Practicum in Women's Studies
Three additional courses (9 credits) from any of the above lists or any women's studies (WSTU) course	

No one course may count for more than one category.

SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, students must attain a grade-point average of at least 3.7 in courses counted for the Women's Studies major and 3.3 overall; receive a grade of A in WSTU 4199 Senior Seminar; and submit an honors paper to the Women's Studies Program. Upon faculty review of the honors paper, students may be recommended for graduation with Special Honors.

COMBINED PROGRAM

REQUIREMENTS

Combined Bachelor of Arts with a Major in Women's Studies and Master of Arts in the field of women's studies or in the field of public policy with a concentration in women's studies

Students interested in either of these combined degree programs should consult the Women's Studies Program office (<http://womensstudies.columbian.gwu.edu>) for requirements by the beginning of their junior year.

GRADUATE CERTIFICATE IN WOMEN'S STUDIES

REQUIREMENTS

Specific admission requirements can be found on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

The graduate certificate in women's studies requires a minimum of 12 credits.

Required courses:

WSTU 6220	Fundamentals of Feminist Theory
-----------	---------------------------------

WSTU 6221	Research Issues in Women's Studies
-----------	------------------------------------

The remaining two courses must be chosen, in consultation with the Women's Studies graduate certificate advisor, from graduate-level Women's Studies and relevant departmental courses that will support the student's area of specialization in graduate study (or their professional development interests for non-degree students). The courses selected should form a coherent program of study related to the student's academic goals, and must be approved by a Women's Studies advisor.

MASTER OF ARTS IN THE FIELD OF PUBLIC POLICY WITH A CONCENTRATION IN WOMEN'S STUDIES

Specific admission requirements are shown on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>)

Prerequisite: a bachelor's degree from an accredited college or university.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 63).

The Master of Arts program in the field of public policy is affiliated with the School of Public Policy and Public Administration.

Required: 36 credits of course work with or without a thesis

Policy-oriented students take:

WSTU 6220	Fundamentals of Feminist Theory (or alternative approved by advisor)
WSTU 6240	Women and Public Policy
WSTU 6221	Research Issues in Women's Studies

Public policy core:

PPPA 6002	Research Methods and Applied Statistics
PPPA 6006	Policy Analysis
ECON 6217	Survey of Economics I
PPPA 6010	Politics & The Policy Process (Advisor will approve alternatives when PPPA 6010 is not offered)

9 credits of electives

One of the following options:

Option A:

WSTU 6998	Thesis Research
WSTU 6999	Thesis Research

Option B:

WSTU 6283	Practicum in Women's Studies (for 6 credits)
-----------	--

Option C

WSTU 6295	Independent Research in Women's Studies (plus 3 credits of WSTU 6283)
-----------	---

All candidates are required to pass a Master's Comprehensive Examination.

MASTER OF ARTS IN THE FIELD OF WOMEN'S STUDIES

Specific admission requirements are shown on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>)

Prerequisite: a bachelor's degree from an accredited college or university.

The following requirements must be fulfilled:

Required:

WSTU 6220	Fundamentals of Feminist Theory (or alternative approved by advisor)
WSTU 6221	Research Issues in Women's Studies
WSTU 6225	Contemporary Feminist Theory (or alternative approved by advisor)

12 credits in a discipline or topical concentration approved by advisor

9 additional elective credits

One of the following options:

Option A

WSTU 6998	Thesis Research
WSTU 6999	Thesis Research

Option B

WSTU 6283	Practicum in Women's Studies (for 6 credits)
-----------	--

Option C

WSTU 6295	Independent Research in Women's Studies (plus 3 credits of WSTU 6283)
-----------	---

All candidates are required to pass a Master's Comprehensive Examination.

MINOR IN LGBT AND SEXUALITY STUDIES

REQUIREMENTS

Two courses (6 credits) from the following:

WSTU 2120	Intro to Women's Studies
or WSTU 2120W	Intro to Women's Studies
WSTU 2380	Sexuality in US Cultural Hist
or AMST 2380	Sexuality in US History
or HIST 2380	Sexuality in US Cultural Hist
ENGL 3830	Topics in Literary Theory and Cultural Studies
or ENGL 3830W	Topics in Literary Theory and Cultural Studies
ENGL 3980	Queer Studies

or ENGL 3980W Queer Studies

Four courses (12 credits) from the following:

ENGL 3840 Gender and Literature

or ENGL 3840W Gender and Literature

PHIL 2125 Philosophy of Race and Gender

or PHIL 2125W Philosophy of Race and Gender

SOC 2175 Sociology of Sex and Gender (*)

(*) Indicates course requires prerequisites or permission of instructor.

Note: No more than two courses (6 credits) may count towards a student's major and the LGBT and Sexuality Studies minor.

MINOR IN WOMEN'S STUDIES REQUIREMENTS

Required courses (6 credits):

WSTU 2120 Intro to Women's Studies

or WSTU 2120W Intro to Women's Studies

WSTU 2125 Varieties of Feminist Theory

or AMST 2125 Varieties of Feminist Theory

Four additional courses (12 credits), at least three must be Women's Studies (WSTU) courses numbered 2000 or above, or from the following:

ENGL 3560 American Realism

or ENGL 3560W American Realism

ENGL 3730 Topics in Postcolonial Literature

or ENGL 3730W Topics in Postcolonial Literature

SCHOOL OF MEDICINE AND HEALTH SCIENCES

Dean J. Akman

Senior Associate Dean for Health Sciences J. Bocchino

Associate Dean M. Corcoran

Assistant Dean C. Golden

The George Washington University School of Medicine and Health Sciences is dedicated to improving the health of our local, national, and global communities by:

- **Educating** a diverse workforce of tomorrow's leaders in medicine, science, and health sciences;
- **Healing** through innovative and compassionate care;
- **Advancing** biomedical, translational, and health services delivery research with an emphasis on multidisciplinary collaboration; and
- **Promoting** a culture of excellence through inclusion, service, and advocacy.

As a globally recognized academic medical center, GW embraces the challenge of eliminating health disparities and transforming health care to enrich and improve the lives of those we serve.

The School of Medicine and Health Sciences offers a broad range of undergraduate and graduate programs in medicine and health sciences. For information about the medical programs, please refer to the medicine and health sciences website (<http://smhs.gwu.edu>).

GW Health Sciences (<http://smhs.gwu.edu/academics/health-sciences>) is comprised of three academic departments: Clinical Research and Leadership (<http://smhs.gwu.edu/crl>), Physician Assistant Studies (<http://smhs.gwu.edu/pas>), and Physical Therapy and Health Care Sciences (<http://smhs.gwu.edu/pths>). All Health Sciences academic programs are housed within these departments. GW Health Sciences programs prepare professionals for roles in selected specialties within health care. These programs emphasize the interdependent roles and responsibilities of the network of health professionals who bring a variety of skills and expertise to health care practice, research and leadership. The mission of GW Health Sciences is built upon five tenets:

1. Interdisciplinary education provides a foundation for the future of health care delivery and generates collaborative structure and models for benchmarking and improvement;
2. Clinical training is a foundation for professional development in clinical practice;
3. Community service learning applies to communities broadly and is an important component of education for the transformation of communities of practice, research, and access in health care;

4. GW Health Sciences is uniquely positioned to cultivate leadership capacity development within the health sciences, medical, and scientific communities that we serve; and
5. Scholarship among faculty, staff, and students alike contribute to the process of new knowledge creation and are a foundation for advancing translational science in health care.

REGULATIONS

Admission

To be considered for admission, applicants must submit a completed application form online, together with all required supporting documentation and a non-refundable application fee.

Bachelor of Science in Health Sciences (BSHS) programs are designed for upper-division transfer students; applicants are expected to have completed a minimum of 60 credit hours of coursework from a regionally accredited post-secondary institution prior to entry. Applicants to the post-baccalaureate and graduate programs must hold a bachelor's degree from a regionally accredited college or university. Official transcripts must be submitted from each academic institution attended, regardless of whether credit was earned or is desired. The transcript(s) must indicate a minimum cumulative grade-point average of 2.5 on a scale of 4.0 for undergraduate and post-baccalaureate applicants, and a 3.0 on a scale of 4.0 for graduate students, with the exception of the BSHS in Pharmaceutical Sciences (minimum 2.75) and the post-baccalaureate in pre-medicine (minimum 3.0). The applicant must be in good standing and eligible to return to the academic institution most recently attended. Dual degree applicants must have a minimum cumulative grade-point average of 3.3 on a scale of 4.0. With evidence of special promise, an applicant whose academic record falls short of the minimum GPA may be accepted on a conditional basis; see Conditional Admission, below. Students who have been academically dismissed or suspended will not be considered for admission for at least one year from the date of their last suspension or dismissal.

Applicants should refer to the individual program descriptions for information on prerequisites and supporting documents, since these vary by program. It is the responsibility of applicants to ensure that all required application materials are submitted by the designated deadlines. Unofficial copies, facsimiles, or photocopies of transcripts, certificates, or diplomas will not be accepted. All records become the property of the University and cannot be returned.

Conditional Admission—Admission with conditions to one of the health sciences programs may be offered at the discretion of the director of admissions and the program director. The terms of admission will be outlined in the letter of acceptance from the University. When conditions have been not been met, notification is sent from the Office of

Admissions. Students dismissed for not meeting the conditions of their admission from non-clinical programs must sit out one calendar year before re-applying. Readmission is not guaranteed. Students enrolled in clinical programs should consult their program handbook for program-specific dismissal policies and procedures.

Advance Tuition Deposit—Upon notification of acceptance, an advance tuition deposit will be required of students in selected programs, including those re-admitted. The deposit is credited toward tuition and is non-refundable. Payment of the orientation fee, if applicable, must be submitted along with the tuition deposit and is also non-refundable.

International Applicants

The following additional requirements pertain to international applicants:

Required Records—Official copies of all required documentation (transcripts, diplomas, and certificates as well as any other records listing subjects studied, grades received, examinations taken, the results of state examinations, and degrees received) must be submitted in the language in which the institution keeps its official records. If these documents are in a language other than English, they must be accompanied by a certified English translation. In addition, an evaluated copy completed by an acceptable international evaluation service must be submitted regardless of whether or not the official record is in English.

Language Tests—Applicants whose native language is not English or who are not citizens of countries where English is the official language must submit official test scores for either academic IELTS or TOEFL or PTE. The following are the minimum scores for admission consideration.

1. Academic IELTS: an overall band score of 7.0, with no individual band score below 6.0.
2. TOEFL: 600 paper-based or 100 Internet-based.
3. PTE: overall score of 68

The IELTS/TOEFL/PTE requirement may be waived for applicants who hold a baccalaureate degree or higher from a U.S. regionally accredited college or university; applicants who hold a baccalaureate degree or higher from an international higher education institution, must demonstrate through an evaluation that the institution is equivalent to a U.S. regionally accredited college or university, and the language of instruction at the institution where the degree was completed is English. Waivers may exist for citizens of countries where the official language is English, as determined by the GW International Services Office.

Financial Certificate—A Financial Certificate must be completed and submitted with the application for admission by all international students planning to study at the University under the authorization of either a student (F) or exchange

visitor (J) visa. Satisfactory completion and submission of the Financial Certificate is required for the issuance of a Form I-20 or IAP-66.

Unclassified Students

A student who wishes to take individual courses in health sciences programs must obtain permission to register as an unclassified student in the School of Medicine and Health Sciences. Application is made to the Office of Admissions, Health Sciences Programs. The dean's office, in conjunction with the appropriate department chair and program director, will determine if permission to register will be granted to an unclassified student. Permission to take individual courses, if granted, will generally be limited to a total of 6 credit hours.

Credit earned for courses taken as an unclassified student may be transferred to a degree program at the University if the courses are applicable to the program, have been taken for credit, and have been completed with the minimum grade required in the program. This should not exceed 6 credit hours. Successful completion of course work taken as an unclassified student does not guarantee admission to a degree program.

Readmission

Students who were previously registered in a health sciences program at the University but who did not register during the immediate preceding semester (summer sessions excluded), and who did not receive an approved leave of absence must apply for readmission. Students who have attended other academic institutions while not enrolled at this University must have complete official transcripts sent directly to the Office of Admissions, Health Sciences Programs, from each institution attended. Applications for readmission are considered on the basis of regulations and curricula currently in effect.

Transfer Credit for Graduate Students

The University reserves the right to refuse transfer credit in part or in whole or to allow credit provisionally. A maximum of one quarter of the credit hours of graduate coursework required for a degree may be approved for transfer to a graduate program in the Health Sciences. These credits may come from enrollment in non-degree coursework at GW, or from another degree granting school of GW, or another accredited college or university. Eligible coursework must be: (a) graduate-level credit, (b) not applied toward completion of requirements for another degree, and (c) earned with a minimum acceptable grade of a B (B- grades and lower do not transfer). Requests for transfer credit must be submitted in writing and approved by the program director and the Health Sciences Dean's Office after admission to the program. Students in clinical programs should refer to their program handbook for program-specific transfer credit policies and procedures.

Transfer Credit/Advanced Standing for Undergraduates

Advanced standing may be awarded for appropriate course work completed at other regionally accredited institutions

provided minimum grade requirements have been met. The minimum acceptable grade is C for course work to be applied toward an undergraduate degree (C- grades and lower do not transfer). Advanced standing may also be awarded for non-traditional classroom or clinical experience as determined by the individual programs. The University reserves the right to refuse transfer credit in part or in whole or to allow credit provisionally. Health sciences degree programs vary in the amount of advanced standing they will award. For bachelor's programs, no more than 66 credit hours can be accepted as advanced standing from a two-year institution.

Degree candidates who are currently enrolled at this institution and plan to take courses at other regionally accredited institutions for transfer credit must first submit a course approval form for approval by the program director, department chair, and the appropriate dean.

Information regarding Academic Policies and Regulations information specific to Health Sciences can be found at <http://smhs.gwu.edu/academics/health-sciences/students/forms-policies>.

Evaluation of Academic Performance

Faculty are responsible for evaluating the performance of students in a meaningful, useful, and timely manner and for assigning grades on a basis that is rational, just, and unbiased. The authority for assignment of grades rests with academic departments or with faculty in the respective programs. Official grades for course work can be obtained from the Office of the Registrar each semester and are not given out by instructors.

Grades in Undergraduate Degree or Certificate and Post-Baccalaureate Certificate Programs—The following grading system is used: A, Excellent; B, Good; C, Satisfactory; D, Low Pass; F, Fail. At the discretion of the program and individual faculty, "+" or "-" grades may also be assigned. Except for courses that specifically state that repetition for credit is permitted, a candidate for an undergraduate degree or undergraduate-level certificate (including post-baccalaureate certificate) at this University may not repeat a course in which a grade of D or better was received, unless a petition to do so is approved by the appropriate dean and/or chair upon recommendation of the program director. If a course is repeated, the first grade remains on the student's record and is included in the cumulative GPA. Symbols that may appear include CR, Credit; AU, Audit; P, Pass; NP, No Pass; I, Incomplete; IPG, In Progress; W, Authorized Withdrawal; Z, Unauthorized Withdrawal. These symbols are not considered in determining the GPA.

Grades in Graduate Degree and Certificate Programs—The following grading system is used: A, Excellent; B, Good; C, Minimum Pass; F, Fail. At the discretion of the program and individual faculty, "+" or "-" grades may also be assigned. Except for courses that specifically state that repetition is permitted, a candidate for a graduate degree or certificate at this University may not repeat a course in which a grade of C or

better was received, unless a petition to do so is approved by the appropriate dean and/or chair upon recommendation of the program director. For graduate courses where a grade of C- or below was received, the course must be repeated for credit. If a course is repeated, the first grade remains on the student's record and is included in the cumulative GPA. Symbols that may appear include CR, Credit; AU, Audit; P, Pass; NP, No Pass; I, Incomplete; IPG, In Progress; W, Authorized Withdrawal; Z, Unauthorized Withdrawal. These symbols are not considered in determining the GPA.

Incomplete/In Progress—The symbol of I indicates that the instructor has received a satisfactory explanation for the student's inability to complete the required work of the course. The grade may be used only if the student's prior performance in the course has been satisfactory. Any failure to complete the work of a course that is not satisfactorily explained to the instructor before the date when grades must be turned in will be graded F. Incomplete work must be made up by a date agreed upon by the instructor and the student but no later than the last day of the examination period for the semester immediately following the semester or summer session in which the notation of I is assigned. An extension of one additional semester can be requested by the student and may be approved by the program director. When work for the course is completed, the earned grade earned will be posted. An incomplete that is not changed within the allotted time reverts to F.

The symbol of IPG is reserved for courses (such as special projects) in which the final class date extends beyond the official University deadline for submitting grades. Once the course has been completed, the IPG will be removed from the transcript and the earned grade recorded.

Unauthorized Withdrawal—The symbol of Z is assigned when students are registered for a course that they have not attended or have attended only briefly, and in which they have done no graded work. At the end of the academic year, students' records are reviewed; if there is more than one Z per semester, a student's record may be encumbered until released by the student's advisor or academic dean. The symbol of Z is not a grade, but an administrative notation.

The Grade-Point Average—Scholarship is computed in terms of the grade-point average, based only on the student's record in this University. The grade-point average is computed from grades as follows: A, 4.0; A-, 3.7; B+, 3.3; B, 3.0; B-, 2.7; C+, 2.3; C, 2.0; C-, 1.7; D+, 1.3; D, 1.0; D-, 0.7; F, 0, for each credit hour for which the student has registered in a degree program. In undergraduate courses, grades of F will be computed in the grade-point average but will not be considered as fulfilling degree requirements. In graduate programs, final course grades below C- are recorded as F.

Appeal Procedures for Cases of Alleged Improper Academic Evaluation—Students who believe that a grade or

evaluation is unjust or inaccurate may use the following appeal procedures:

1. The student must submit a written appeal to the relevant faculty member within 10 calendar days of the time the grade is posted, with a copy to the program director.
2. Resolution should be sought first at the program and departmental levels. A review shall be conducted by the program director and chair, consulting as appropriate the student and faculty involved.
3. If a mutually satisfactory resolution is not achieved, the student may, within 5 days of the decision being rendered, submit a written letter of appeal to the senior associate dean for health sciences. In considering the student's appeal, the senior associate dean will determine whether or not the grading procedures employed were fair, equitable, objective and consistent.
4. The senior associate dean may refer the appeal to the Health Sciences Evaluation Committee chair, who will form a three-person committee to serve as a peer review body. The committee will consist of the director of the program and two other members of the Health Sciences Evaluation Committee who are not involved in the case. Should the chair of the Health Sciences Evaluation Committee be the member of the faculty alleged to have made the improper academic evaluation, the appropriate dean will choose the three members of the peer review body from the members of the Health Sciences Evaluation Committee. If a sufficient number of faculty is not available from within the Committee, other faculty from the health sciences programs will be appointed.
5. The peer review body will review the student and course materials in order to render a recommendation to the senior associate dean. In the event that the peer review body chooses to conduct a hearing, the student may not have legal representation present. Students will be allowed to move forward in didactic coursework until the grade appeal is resolved and a final decision rendered. However, students will not be allowed to move forward in clinical coursework until the grade appeal is resolved and a final decision rendered.
6. The peer review body will advise the senior associate dean on the outcome of their review and recommendations. Final action rests with the dean of the School of Medicine and Health Sciences.

Academic Standing

An enrolled student is considered to be in good academic standing by the School of Medicine and Health Sciences provided that he or she is not on probation or suspended. The following policies apply to all students within Health Sciences programs. In addition, Medical Laboratory Sciences, Physician Assistant, and Physical Therapy students must comply with policies and procedures outlined in their respective student handbooks.

Warning—An undergraduate whose GPA falls between 2.5 and 2.69, and a graduate student whose GPA falls between 3.0 and 3.2 will receive a warning notification from the program. The warning may be in the form of an email. A record of warning notifications will be kept with program records and Health Sciences student services.

Academic Probation—A full- or part-time undergraduate degree candidate whose cumulative GPA falls below 2.5 will be placed on academic probation. A notation will be added to the student's transcript indicating probation. This probation extends over the period in which the student attempts an additional 12 credit hours of course work. Students while on probation will be allowed to register for no more than 12 credit hours per semester, unless approved by the program director and the appropriate dean.

A full- or part-time graduate degree candidate whose cumulative GPA falls below 3.0 will be placed on academic probation. For full-time students, probation extends for one semester of full-time course work as defined by the program; for part-time students, probation extends during the period in which the student attempts 9 credit hours of course work. Students while on probation will be allowed to register for no more than 9 credit hours total, unless approved by the program director and the appropriate dean. For full-time students, this means no more than 9 credit hours per semester. For part-time students, they may register for a combination of 9 credit hours, but may not take additional courses (e.g. a part-time student on probation who attempts 6 credits one-term, would be restricted to 3 credits in the next semester of coursework).

If the program director and department chair determine that extenuating and valid circumstances exist, a student may be granted an extension on the probation period. If granted, the student will be notified by the program director outlining conditions to be met by the student. The student must return a statement to the program director by email or mail confirming that he/she has read, understands, and agrees to the conditions.

If the student fails to attain the conditions in the time specified, the student will be suspended (see *Suspension*). If the student succeeds in raising his/her cumulative GPA to the minimum scholarship requirements, academic probation will be lifted. A student who has been placed on probation more than one time will be recommended for dismissal.

Suspension—Students previously on probation who have not raised their cumulative GPA within the allowed number of credit hours (12 for undergraduate, and 9 for graduates) may be suspended. A student suspended for poor scholarship may not register for any course work at the University, even as an auditor. The program director mails or emails a Letter of Suspension notifying the student of suspension.

A student who is suspended for failure to raise the cumulative GPA may apply for readmission after the lapse of one calendar year. Evidence must then be presented to the student's

program director, demonstrating that the student is now better prepared to pursue academic course work. Any student suspended twice for poor scholarship will not be readmitted. If the student fails to achieve the minimum GPA at the end of the semester following readmission, the program director may recommend the student be dismissed and further enrollment prohibited. This will be reviewed by the appropriate dean, whose recommendation will then be forwarded to the dean of the School of Medicine and Health Sciences.

Dismissal—Any student who has received one or more failing grades during a semester, or who has been placed on probation more than one time, may be recommended for dismissal by the program director. If the program recommends dismissal, an email or letter will be sent to the student informing him/her that the recommendation for dismissal is being reviewed by the senior associate dean for Health Sciences in consultation with the program director and chair. At the discretion of the senior associate dean, the recommendation may also be forwarded to the Health Sciences Evaluation Committee before sending to the dean of the School of Medicine and Health Sciences. The final decision about dismissal rests with the dean of the School of Medicine and Health Sciences. A student who is dismissed from non-clinical programs may apply for readmission after the lapse of one calendar year. Readmission is not guaranteed. Students enrolled in clinical programs should consult their program handbook for program-specific dismissal policies and procedures.

Programs of Study (<http://smhs.gwu.edu/academics/health-sciences>)

Students enrolled in undergraduate degree, or undergraduate-level certificate (including post-baccalaureate certificate) programs must meet with their faculty advisor (in person or electronically) to review a program of study, listing all course work required for the degree or certificate, including applicable transfer credit. Changes to the program of study can be made through petition to the program. Changes may require approval of senior associate dean for health sciences.

Transfer Within Health Sciences Programs—To apply for a transfer from one health sciences program to another, a written request must be submitted to the Office of Student Services, Health Sciences Programs, along with the necessary supporting documentation required by the program. To change from certificate to degree program may require an admissions application.

Transfer Outside Health Sciences Programs—No internal transfers are permitted from a health sciences program to another GW school or college. To transfer outside of the health sciences, a student must follow the full admission processes for the other GW program.

Changes Within Health Sciences Programs—A student may not substitute one course for another without approval of the program director, the department chair, and the appropriate dean. After the deadlines for adding or dropping courses, a student must obtain the permission of the course instructor, the program director, and the appropriate dean to withdraw from a course or to change status from credit to audit or audit to credit.

Adding and Dropping Courses—During the registration period (before the end of the second week of classes) students may add or drop courses using GWeb. After the second week of classes, students who wish to add or drop a course must complete a Registration Transaction Form (<http://smhs.gwu.edu/academics/health-sciences/students/forms-policies>) and submit the form to the Student Services Office. Adding a course after the second week requires a signature of the instructor or other authorized member of the department.

A course dropped during the first four weeks of classes will not appear on the student's transcript. A course dropped after the fourth week but before the end of the eighth week will be assigned a notation of W (Authorized Withdrawal). Deadlines for a summer or short course may vary.

The deadline for dropping a course without academic penalty is the end of the eighth week of classes. After the end of the eighth week of classes, dropping a course without academic penalty is only possible after the student presents a petition to the senior associate dean and receives written permission. Deadlines for a summer or short course may vary.

All charges for courses from which the student withdraws are subject to the refund policy listed under Fees and Financial Regulations in this Bulletin. Failure to withdraw by these procedures can result in an extended financial obligation and the recording of a grade of F (Failure) or a notation of Z (Unauthorized Withdrawal).

Policies and Definitions

Credit—Credit is awarded only after registration for a course and satisfactory completion of the required work, or upon assignment of advanced standing.

Auditing—A student who has been admitted to a health sciences program may register as an auditor in a class only with the permission of the instructor, the faculty advisor, and the appropriate dean. An auditor receives no academic credit and is not required to take active part in the class or to pass examinations. A student who takes a course as an auditor may not repeat it later for credit. The regular program tuition rate is charged for audited courses.

Attendance—Students may attend only those classes for which they are officially registered. Regular attendance is expected. A student suspended for any cause may not attend classes during the period of suspension. Students are held responsible for all of the work of the courses in which they are registered, and all

absences must be excused by the instructor before provision is made to make up the work missed.

Transcripts of Record—Official transcript of student records are issued by the Office of the Registrar and may be requested through GWeb by any student or former student who has paid all charges, including any outstanding student loan installments, due the University at the time of the request. A fee is charged for each transcript. Partial transcripts are not issued.

Continuous Enrollment—Once entered in a degree or certificate program, a student is expected to be continuously enrolled and actively engaged in fulfilling the requirements each semester of the academic year until such time as the degree is conferred or certificate completed. Students who break continuous enrollment at the University and do not request and receive a leave of absence (see below) must apply for readmission and, if granted, are subject to the requirements and regulations then in force. Students who plan to attend other institutions and apply credit earned toward graduation from this University must first obtain written approval from the program director and the appropriate dean.

Leave of Absence—A student who must interrupt active pursuit of the degree or certificate may petition the appropriate dean, through the program director, for a leave of absence for a specified period of time, generally limited to one calendar year. If the petition is approved, the student must register for leave of absence in each fall and spring semester, following regular registration procedures. The request should be made using the Petition Request Form (<http://smhs.gwu.edu/academics/health-sciences/students/forms-policies>). Students who discontinue their studies without being granted a leave of absence and students granted leaves who do not return to active study at the close of the period of approved absence must apply for readmission and are subject to the regulations and requirements then in force. The right to use University facilities is suspended while the leave is in effect.

Policy Regarding Students Called to Active Military Duty—

Any student who is a member of a military reserve unit or the National Guard and is activated or called to active duty early in a semester or summer session automatically will be entitled to a full refund of all tuition and fees that he or she has paid toward the expenses of that academic term. If the notification of the call to active duty comes after the mid-term examinations or after other substantial graded work has been completed, the student will have the option of either taking a full refund of tuition and fees or taking an Incomplete in his or her courses with the privilege of returning to complete all required coursework at some future date without payment of any further tuition and fee charges. It is the responsibility of the student to present evidence of his or her activation to the Health Sciences Student Services and the Office of Student Accounts and to request the appropriate refund.

Should a degree student called up for active duty find it necessary to interrupt active pursuit of the degree he or she

may petition the senior associate dean of health sciences for a leave of absence for a specified period of time, generally limited to one calendar year. Deans are encouraged to grant any request to extend the leave of absence for longer than the customary period should military service require an absence of more than one year.

All students on active duty will be automatically exempted from the request for a \$50 voluntary library contribution without requiring any communication from them or their initials on the bill.

Right to Change Rules and Programs—The University reserves the right to modify or change requirements, rules, and fees. Such regulations shall go into force whenever the proper authorities may determine. The right is reserved by the University to make changes in programs without notice whenever circumstances warrant such changes. For the most up to date requirements, rules, and fees contact the Health Sciences Dean's Office (<http://smhs.gwu.edu/academics/health-sciences>).

Complete Withdrawal From the University—A student who wishes to withdraw from all courses, and the university must complete a Complete Withdrawal Form (<http://registrar.gwu.edu>) and submit it to the Office of the Registrar. The deadline for complete withdrawal from all courses without academic penalty is the end of the eighth week of classes, with the exception of summer and short courses, which may have different deadlines. Complete withdrawal after the eighth week requires a petition to the dean. A student who wishes to withdraw from one or all courses, but not the university, should submit a Registration Transaction Form. A student who wishes to withdraw from the University upon completion of currently registered courses should notify their program director and Health Sciences Student Services.

All charges for courses from which the student withdraws are subject to the refund policy listed under Fees and Financial Regulations in this Bulletin. Failure to complete a Complete Withdrawal Form can result in an extended financial obligation and the recording of grades of F (Failure) or notations of Z (Unauthorized Withdrawal).

Graduation Requirements

Degrees are conferred in January, May, and August. Graduating health sciences students may participate in the commencement ceremony held each year in May.

To be recommended for graduation by the faculty, students must have met admission requirements; have completed satisfactorily the scholarship, curriculum, residence, and other requirements for the degree; have filed an application for graduation prior to the published deadline; and be free from all indebtedness to the University. Registration, either for course work or for continuous enrollment, is required for the

semester or summer session at the close of which the degree is to be conferred.

Applications for graduation must be filed by October 1 for fall graduation, February 1 for spring graduation, and July 1 for summer graduation.

Residence Requirements—The minimum number of credit hours that must be satisfactorily completed in residence in the School of Medicine and Health Sciences are listed; specific programs may establish higher residency requirements. Bachelor of Science in Health Sciences programs require that 30 of the last 60 credit hours be completed in residence. In Master of Science in Health Sciences and Doctor of Physical Therapy programs, all but 6 of the total required credit hours must be completed in residence. Courses applicable to the degree taken while registered in any division of The George Washington University in the semester immediately prior to admission to degree candidacy in the health sciences are counted as courses in residence.

Honors—Bachelor's degrees with honors are awarded to students whose academic records give evidence of particular merit. The student's grade-point average determines the level of honors as follows: *cum laude*, 3.4-3.59; *magna cum laude*, 3.6-3.79; *summa cum laude*, 3.8-4.0. The grade-point average includes all course work completed at GW and is not rounded off. To be eligible for an honors designation, a student must complete at least 60 hours of coursework at GW.

The grade-point average is calculated by the Office of the Registrar, and the honors designation is entered on the transcript and the diploma of those students who earn an honors designation. If honors are entered in the commencement program, honors status will be determined on the basis of work completed by the end of the seventh term and entered only for those students who have completed seven-eighths of the credit hours required for the degree. Honors indicated on the diploma are calculated on the basis of all course work completed. The diploma and transcript are the official indication that a degree was conferred and honors awarded.

Financial Aid

The George Washington University financial assistance for undergraduate students is described in *Financial Aid Sourcebook* from The George Washington University Office of Student Financial Assistance (<http://financialaid.gwu.edu>). Undergraduate aid consists of two basic types: awards for academic achievement or talent without reference to financial circumstances (merit scholarships) and scholarships, grants, loans, and employment based on academic achievement and demonstrated financial need. All undergraduate gift aid (institutional scholarships and grants, and federal grants) requires that the recipient be working on the first undergraduate degree and be registered for a full-time course load at GW. Students are limited to eight semesters of institutional aid. Institutional aid is not available for online

programs nor graduate programs. Loans and resident assistantships not based on financial need are available.

Several offices on campus provide information on financial assistance for graduate and certificate students. Information about funding opportunities is provided by the Office of Graduate Student Assistantships and Fellowships (<http://www.gwu.edu/~fellows>). Forms and information on federal loans for graduate students can be obtained from the Office of Student Financial Assistance. (<http://financialaid.gwu.edu>) Information on the Federal Work-Study Program, cooperative education opportunities, and on- and off-campus employment is available from the GW Career Center (<http://careerservices.gwu.edu>). Gift aid (scholarships, grants, fellowships, assistantships, etc.) is taxable to the extent that it exceeds the allowable costs of tuition, fees, and required books and supplies or is dedicated to other costs, such as room and board. Federal grants may be taxable if, together with other gift assistance, they exceed the allowable costs. In the case of a student who is awarded tuition scholarships, grants, or awards from more than one source, the combined amount cannot exceed tuition charges; institutional aid will be adjusted to this limit.

In general, consideration for financial aid is restricted to students in good academic standing who meet the minimum grade-point average for particular awards and are not financially encumbered by any other University office. Applications for institutional or federal aid cannot be processed if the relevant tax returns have not been filed in accordance with the IRS Code. Documents submitted as part of aid applications become the property of the University and cannot be returned. Federal regulations require that the University report suspected cases of fraud or misrepresentation to the appropriate federal, state, and local authorities.

Information on financial aid is accurate at the time each Bulletin is prepared for press. Future changes in federal regulations or institutional policies may alter the application requirements or program guidelines.

UNDERGRADUATE

Associate's programs

- Associate in Science in the field of health sciences (p. 412)
- Associate in Science in the field of health sciences laboratory technology (p. 413)

Bachelor's programs

- Bachelor of Science in Health Sciences with a major in clinical health sciences (p. 414)
- Bachelor of Science in Health Sciences with a major in clinical management and leadership (p. 415)
- Bachelor of Science in Health Sciences with a major in clinical research administration

- Bachelor of Science in Health Sciences with a major in emergency medical services management
- Bachelor of Science in Health Sciences with a major in health intervention and disaster response
- Bachelor of Science in Health Sciences with a major in medical laboratory science
- Bachelor of Science in Health Sciences with a major in pharmaceutical sciences

Dual degree programs

- Bachelor of Science in Health Sciences and Master of Science in Health Sciences in the field of clinical management and leadership
- Bachelor of Science in Health Sciences in the field of clinical management and leadership and Master of Science in Health Sciences in the field of health care quality
- Bachelor of Science in Health Sciences in the field of clinical management and leadership and Master of Science in Health Sciences in the field of emergency medical services leadership (p. 423)
- Bachelor of Science in Health Sciences and Master of Science in Health Sciences in the field of clinical research administration
- Bachelor of Science in Health Sciences in the field of clinical research administration and Master of Science in Health Science in the field of regulatory affairs
- Bachelor of Science in Health Sciences in the field of emergency medical services management and Master of Science in Health Sciences in the field of clinical management and leadership
- Bachelor of Science in Health Sciences in the field of emergency medical services management and Master of Science in Health Sciences in the field of emergency medical services leadership (p. 427)

Minors

- Minor in anatomy (p. 428)
- Minor in clinical research administration (p. 428)
- Minor in emergency health services
- Minor in health sciences (p. 429)

Military contract programs

- Bachelor of Science in Health Sciences in the field of cytotechnology (p. 416)(military contract)

GRADUATE

Master's programs

- Master of Science in Health Sciences in the field of clinical management and leadership (p. 429)
- Master of Science in Health Sciences in the field of clinical microbiology (p. 430)
- Master of Science in Health Sciences in the field of clinical and translational microbiology ([http://bulletin.gwu.edu/](http://bulletin.gwu.edu/medicine-health-sciences/graduate-programs/ms-clinical-translational-microbiology)

[medicine-health-sciences/graduate-programs/ms-clinical-translational-microbiology](http://bulletin.gwu.edu/medicine-health-sciences/graduate-programs/ms-clinical-translational-microbiology))

- Master of Science in Health Sciences in the field of clinical research administration
- Master of Science in Health Sciences in the field of clinical and translational research
- Master of Science in Health Sciences in the field of emergency medical services leadership
- Master of Science in Health Sciences in the field of health care quality (p. 432)
- Master of Science in Health Sciences in the field of immunohematology and biotechnology (<http://bulletin.gwu.edu/medicine-health-sciences/graduate-programs/mshs-immunohematology-biotechnology>)
- Master of Science in Health Sciences in the field of integrative medicine (<http://bulletin.gwu.edu/medicine-health-sciences/graduate-programs/ms-integrative-medicine>)
- Master of Science in Health Sciences in the field of medical laboratory science (p. 433)
- Master of Science in Health Sciences in the field of molecular diagnostic science (p. 434)
- Master of Science in Health Sciences in the field of regulatory affairs (p. 435)
- Master of Science in Health Sciences in the field of physician assistant (p. 434)
- Master of Science in Health Sciences in the field of translational microbiology (p. 435)

Dual degree program

- Master of Science in Health Sciences in the field of physician assistant and Master of Public Health (Milken Institute School of Public Health) (<http://bulletin.gwu.edu/medicine-health-sciences/graduate-programs/dual-pa-mph>)

Military contract programs

- Master of Science in Health Sciences in the field of immunohematology (p. 433)

Doctoral programs

- Doctor of Philosophy in the field of translational health sciences (<http://bulletin.gwu.edu/medicine-health-sciences/graduate-programs/phd-translational-health-sciences>)
- Doctor of Physical Therapy (p. 436)
- Advanced Practice Clinical Doctorate in Occupational Therapy (<http://bulletin.gwu.edu/medicine-health-sciences/graduate-programs/advanced-practice-clinical-doctorate-occupational-therapy>)

CERTIFICATES

Post-baccalaureate certificates

- Post-baccalaureate certificate in medical laboratory science (p. 439)

- Post-baccalaureate certificate in blood banking for medical laboratory science (p. 437)
- Post-baccalaureate certificate in chemistry for medical laboratory science (p. 438)
- Post-baccalaureate certificate in hematology for medical laboratory science (p. 438)
- Post-baccalaureate certificate in microbiology for medical laboratory science (p. 439)
- Post-baccalaureate certificate in pre-medicine (p. 439)

Graduate certificates

- Graduate certificate in clinical research administration (p. 440)
- Graduate certificate in clinical and translational research (p. 440)
- Graduate certificate in clinical research practice (p. 440)
- Graduate certificate in health care quality (p. 441)
- Graduate certificate in integrative medicine (p. 441)
- Graduate certificate in regulatory affairs (p. 441)

Military contract programs

- Undergraduate certificate in the field of health sciences laboratory science (military contract)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
- Anatomy & Regenerative Biology (ANAT) (p. 899)
- Clinical Management Leadership (CML) (p. 941)
- Clinical Research and Administration (CRA) (p. 942)
- Emergency Health Services (EHS) (p. 1054)
- Health Care Quality (HCQ) (p. 1100)
- Health Sciences (HSCI) (p. 1101)
- Medical Laboratory Science (MLS) (p. 1201)
- Physician Assistant (PA) (p. 1230)
- Pharmacogenomics (PHRG) (p. 1220)
- Physical Therapy (PT) (p. 1226)
- Regulatory Affairs (RAFF) (p. 1287)
- Translational Health Sciences (THS) (<http://bulletin.gwu.edu/courses/thhs>)

UNDERGRADUATE PROGRAMS

Associate's programs

- Associate in Science in the field of health sciences (p. 412)
- Associate in Science in the field of health sciences laboratory technology (p. 413)

Bachelor's programs

- Bachelor of Science in Health Sciences with a major in clinical health sciences (p. 414)
- Bachelor of Science in Health Sciences with a major in clinical management and leadership (p. 415)
- Bachelor of Science in Health Sciences with a major in clinical research administration
- Bachelor of Science in Health Sciences with a major in emergency medical services management
- Bachelor of Science in Health Sciences with a major in health intervention and disaster response
- Bachelor of Science in Health Sciences with a major in medical laboratory science
- Bachelor of Science in Health Sciences with a major in pharmaceutical sciences

- Bachelor of Science in Health Sciences and Master of Science in Health Sciences in the field of clinical management and leadership
- Bachelor of Science in Health Sciences in the field of clinical management and leadership and Master of Science in Health Sciences in the field of health care quality
- Bachelor of Science in Health Sciences in the field of clinical management and leadership and Master of Science in Health Sciences in the field of emergency medical services leadership (p. 423)
- Bachelor of Science in Health Sciences and Master of Science in Health Sciences in the field of clinical research administration
- Bachelor of Science in Health Sciences in the field of clinical research administration and Master of Science in Health Sciences in the field of regulatory affairs
- Bachelor of Science in Health Sciences in the field of emergency medical services management and Master of Science in Health Sciences in the field of clinical management and leadership
- Bachelor of Science in Health Sciences in the field of emergency medical services management and Master of Science in Health Sciences in the field of emergency medical services leadership (p. 427)

Minors

- Minor in anatomy (p. 428)
- Minor in clinical research administration (p. 428)
- Minor in emergency health services

- Minor in health sciences (p. 429)

Military contract programs

- Bachelor of Science in Health Sciences in the field of cytotechnology (p. 416)(military contract)

ASSOCIATE IN SCIENCE IN THE FIELD OF HEALTH SCIENCES

REQUIREMENTS

The Associate in Science (AS) in Health Sciences (<http://smhs.gwu.edu/crl/military>) is a degree completion program that requires successful completion of **78 credits**. It is restricted to candidates who have earned 60 credits of college-level military courses. Eligible candidates include current (and former) Army 18D, Navy IDCs, Air Force IDMTs, Army or Navy MLTs; additional occupations may be reviewed for consideration. See the program website (<http://smhs.gwu.edu/crl/military>) for more information about eligibility.

The following requirements must be fulfilled:

The Associate in Science (AS) in Health Sciences (<http://smhs.gwu.edu/crl/military>) is a degree completion program that requires successful completion of **78 credits**. It is restricted to candidates who have earned 60 credits of college-level military courses. Eligible candidates include current (and former) Army 18D, Navy IDCs, Air Force IDMTs, Army or Navy MLTs; additional occupations may be reviewed for consideration. See the program website (<http://smhs.gwu.edu/crl/military>) for more information about eligibility.

The following requirements must be fulfilled:

60 credits of advanced standing

Advanced standing for military courses will be noted on the student's record and applied towards the associate's degree during the first semester the student is enrolled in the program.

12 credits of general education including:

6 credits of English composition

3 credits of mathematics or statistics

3 credits or humanities or social science

For students needing general education coursework, GW offers online classes that satisfy all of the requirements. Students planning to apply to B.S.H.S. programs are strongly encouraged to complete general education courses at GW by following the 'Recommended Coursework at GW' curriculum.

6 credits of Health Sciences distance education courses

Recommended general education courses at GW (if needed):

Two English composition courses from the following:

HSCI 2100 Writing and Composition in the Health Sciences

HSCI 2112W Writing in the Health Sciences

HSCI 4112W Rsrch/Wrtng in Health Sciences

Students are eligible for HSCI 4112W only if they have completed HSCI 2112W.

One mathematics or statistics course

HSCI 2115 Intro Biostatistics-Health Sci

One humanities or social sciences from the following:

HSCI 2101 Psychosocial Aspects of Health and Illness

HSCI 2103 Health Policy and the Health Care System

HSCI 2105 Current Issus in Bioethics

HSCI 2107 Health Care in Literature

HSCI 2111 Dev/Health Care Professions

Required GW health sciences distance education

Two of the following:

HSCI 2101 Psychosocial Aspects of Health and Illness

HSCI 2102 Pathophysiology

HSCI 2103 Health Policy and the Health Care System

HSCI 2104 Management of Health Science Services

HSCI 2105 Current Issus in Bioethics

HSCI 2108 QualityImprovement/HealthCare

HSCI 2109 Trends&Innovations/HealthCare

HSCI 2113 Informatics in the HSci

HSCI 2103 and HSCI 2105 cannot be double-counted for a Humanities or Social Science requirement and a GW major course; they may only be used to complete one requirement.

Transferring credits

For an assessment on the transferability of your previous coursework contact the program office (<http://smhs.gwu.edu/>)

crl/programs/chs/curriculum/as). Coursework will be evaluated for transfer using the following criteria:

- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a grade of C or better (C- grades do not transfer)

ASSOCIATE IN SCIENCE IN THE FIELD OF HEALTH SCIENCES LABORATORY TECHNOLOGY REQUIREMENTS

This program is restricted and available only for students who completed their Undergraduate Certificate Program in Health Science Laboratory Technology, at GW, within the last five years. The Associate in Science (AS) in Health Science Laboratory Technology (HSLT) (<http://smhs.gwu.edu/crl/military>) offers Army and Navy MLTs the opportunity to enhance their skills, obtain the credentials to pursue advanced study, and be eligible for promotion within the military.

The Associate of Science (AS) in Health Sciences Laboratory Science for MLTs is a 75 credit degree program: 60 credits are awarded for completion of the MLT undergraduate certificate, and 15 credits of general education courses must be completed to meet the associate's degree requirements. The general education requirements may be completed by taking coursework at a regionally accredited institution or at GW.

The following requirements must be fulfilled:

This program is restricted and available only for students who completed their Undergraduate Certificate Program in Health Science Laboratory Technology, at GW, within the last five years. The Associate in Science (AS) in Health Science Laboratory Technology (HSLT) (<http://smhs.gwu.edu/crl/military>) offers Army and Navy MLTs the opportunity to enhance their skills, obtain the credentials to pursue advanced study, and be eligible for promotion within the military.

The Associate of Science (AS) in Health Sciences Laboratory Science for MLTs is a 72 credit degree program: 60 credits are awarded for completion of the MLT undergraduate certificate, and 12 credits of general education courses must be completed to meet the associate degree requirements. The general education requirements may be completed by taking coursework at a regionally accredited institution or at GW.

The following requirements must be fulfilled:

60 credits of advanced standing (Students who earned the undergraduate certificate in HSLT at GW prior to Summer 2014 meet the advanced standing requirement. Students who completed the undergraduate certificate in HSLT at GW in or after Summer 2014 should contact the program office for more information.)

12 credits of general education including:

6 credits of English composition

3 credits of mathematics (college algebra or higher) or statistics

3 credits of humanities or social sciences

GW offers general education courses online that will satisfy these requirements. (Students planning to apply to B.S.H.S. programs are strongly encouraged to complete general education courses at GW by following the recommended coursework at GW curriculum.)

Recommended general education courses offered at GW:

Two of the following English composition courses:

HSCI 2100	Writing and Composition in the Health Sciences
-----------	--

HSCI 2112W	Writing in the Health Sciences
------------	--------------------------------

HSCI 4112W	Rsrch/Wrtng in Health Sciences
------------	--------------------------------

Students may enroll in HSCI 4112W Rsrch/Wrtng in Health Sciences only if they have completed HSCI 2112W Writing in the Health Sciences.

3 credits of mathematics or statistics

HSCI 2115	Intro Biostatistics-Health Sci
-----------	--------------------------------

One of the following humanities or social sciences courses:

HSCI 2101	Psychosocial Aspects of Health and Illness
-----------	--

HSCI 2103	Health Policy and the Health Care System
-----------	--

HSCI 2105	Current Issus in Bioethics
-----------	----------------------------

HSCI 2107	Health Care in Literature
-----------	---------------------------

HSCI 2111	Dev/Health Care Professions
-----------	-----------------------------

Transferring credits

For an assessment on the transferability of your previous coursework, please contact the program office (<http://smhs.gwu.edu/crl/programs/military/as-mlt>). Coursework will be evaluated for transfer using the following criteria:

- College-level

- Academic in nature
- Completed at a regionally accredited institution
- Earned with a grade of C or better (C- grades do not transfer)

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN CLINICAL HEALTH SCIENCES

REQUIREMENTS

This program is restricted based on military occupation and status. Please see the program website for more information on eligibility. The BSHS with a major in Clinical Health Sciences (<http://smhs.gwu.edu/crl/military>) is a degree completion program that requires successful completion of **120 credit hours**, divided into three degree components

The following requirements must be fulfilled:

Advanced standing and electives (60 credits):

During the first semester the student is enrolled in the program, advanced standing for eligible military courses will be noted on the student's record and applied towards the bachelor's degree.

General education (24 credits):

3 credits of English composition

4 credits of natural or physical science with lab

8 credits of mathematics, science, or statistics

6 credits of social sciences

3 credits of humanities

If a student still needs general education coursework, GW offers online coursework for some of these requirements.

Recommended coursework at GW (for those missing general education requirements)

General education

English composition

HSCI 2100	Writing and Composition in the Health Sciences
-----------	--

Humanities

HSCI 2107	Health Care in Literature
-----------	---------------------------

Social sciences: Up to two of the following:

HSCI 2103	Health Policy and the Health Care System
-----------	--

HSCI 2111	Dev/Health Care Professions
-----------	-----------------------------

HSCI 4103	Health Care Law/Regulation
-----------	----------------------------

Coursework at GW (36 credits minimum)

Foundation courses:

HSCI 2101	Psychosocial Aspects of Health and Illness
-----------	--

HSCI 2102	Pathophysiology
-----------	-----------------

HSCI 2105	Current Issues in Bioethics
-----------	-----------------------------

HSCI 2112W	Writing in the Health Sciences
------------	--------------------------------

HSCI 2115	Intro Biostatistics-Health Sci
-----------	--------------------------------

HSCI 2130	Primary Care Skills Practicum *
-----------	---------------------------------

HSCI 2131	Adult Primary Care Practicum *
-----------	--------------------------------

HSCI 2133	Specialized Clinical Experience *
-----------	-----------------------------------

HSCI 4102	Human Physiology/Extreme Enviro
-----------	---------------------------------

HSCI 4112W	Rsrch/Wrtng in Health Sciences
------------	--------------------------------

MLS 4141	Immunology and Serology
----------	-------------------------

Capstone: One of the following:

CML 4144	Seminar/Health Sci Leadership
----------	-------------------------------

EHS 4101	Humanitarian Relief Ops
----------	-------------------------

Elective - one course selected from the following (advisor approval required):

EHS 2211	Intro to Telemedicine
----------	-----------------------

HSCI 2103	Health Policy and the Health Care System
-----------	--

HSCI 2108	Quality Improvement in Health Care
-----------	------------------------------------

HSCI 2110	Disease Prev/Health Promotion
-----------	-------------------------------

HSCI 2114	Healthcare/Developing Nations
-----------	-------------------------------

HSCI 4106	Intro to Epidemiology for HS
-----------	------------------------------

*Must be completed while on active-duty. Students arrange rotations at their current duty stations. All rotations require a MD or PA preceptor.

HSCI 2103 Health Policy and the Health Care System cannot be double-counted for a general education requirement and an elective; it may only be used to complete one requirement.

Transferable Coursework (84 credit hour maximum)

For an assessment on the transferability of your previous coursework, please contact the program office. Coursework will be evaluated for transfer using the following criteria:

- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a C or better (C- grades do not transfer)

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN CLINICAL MANAGEMENT AND LEADERSHIP REQUIREMENTS

The Bachelor of Health Sciences with a major in the field of clinical management and leadership (<http://smhs.gwu.edu/crl/programs/cml>) is a degree completion program that requires successful completion of 120 credits, 60 of which must be completed at GW. Up to 60 credits of course work may be transferable from course work taken elsewhere.

The following requirements must be fulfilled:

The following requirements must be fulfilled:

60 credits of general education and advanced standing:

3 credits of English composition

4 credits of natural or physical science with lab

6 credits of social sciences

3 credits of humanities

44 credits of advanced standing*

* Additional academic coursework. Non-traditional credit sources may be considered on a case-by-case basis (i.e. military coursework, credit-by-exam, and non-college based health programs).

Requirements for the major:

At least 60 credits of GW coursework including:

CML 2140 Mgt of HR in Health Sci Org

CML 2141 Planning&Mktg/Health Sciences

CML 2142 Financial Mgt/Health Sciences

CML 2143 Current Issues/Hlth Sci Mgt

CML 4144 Seminar/Health Sci Leadership

HSCI 2103 Health Policy and the Health Care System

HSCI 2104 Management of Health Science Services

HSCI 2105 Current Issus in Bioethics

HSCI 2107 Health Care in Literature

HSCI 2108 Quality Improvement in Health Care

HSCI 2112W Writing in the Health Sciences

HSCI 2113 Informatics in the HSci

HSCI 2115 Intro Biostatistics-Health Sci

HSCI 4103 Health Care Law/Regulation

HSCI 4105 Case Studies in Health Care

HSCI 4106 Intro to Epidemiology for HS

HSCI 4112W Rsrch/Wrtng in Health Sciences

Three courses selected from the following (advisor approval is required):

HSCI 2101 Psychosocial Aspects of Health and Illness

HSCI 2102 Pathophysiology

HSCI 2110 Disease Prev/Health Promotion

HSCI 2111 Dev/Health Care Professions

Transferring credits

Up to 60 credits may be transferrable from courses taken elsewhere. For an assessment on the transferability of your previous coursework, please contact the program office. Coursework will be evaluated for transfer using the following criteria:

- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a grade of C or better (C- grades do not transfer)

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN CLINICAL RESEARCH ADMINISTRATION

REQUIREMENTS

The Bachelor of Science in the Health Sciences with a major in clinical research administration (<http://smhs.gwu.edu/crl/programs/cra>) is a degree completion program that requires successful completion of **120 credits**, 60 credits of which must be completed at GW. Up to 60 credits of coursework may be transferable from coursework taken elsewhere.

The following requirements must be fulfilled:

60 credits of general education and advanced standing including:

3 credits of English composition

4 credits of natural or physical science with lab

6 credits of social sciences

3 credits of humanities

44 credits of advanced standing*

* Additional academic coursework. Non-traditional credit sources may be considered on a case-by-case basis (i.e. military coursework, credit-by-exam, and non-college based health programs).

Requirements for the major:

At least 60 credits of GW coursework including:

CRA 2101 Basics of Clinical Research

CRA 2102 Processes of Clinical Research

CRA 2103 Good Clinical Practices

CRA 2104 Business of Clinical Research

CRA 2105 Topics in Clinical Research

CRA 2107 Intro Monitoring Clin. Trials

HSCI 2102 Pathophysiology

HSCI 2103 Health Policy and the Health Care System

HSCI 2105 Current Issus in Bioethics

HSCI 2107 Health Care in Literature

HSCI 2112W Writing in the Health Sciences

HSCI 2113 Informatics in the HSci

HSCI 2115 Intro Biostatistics-Health Sci

HSCI 4103 Health Care Law/Regulation

HSCI 4105 Case Studies in Health Care

HSCI 4106 Intro to Epidemiology for HS

HSCI 4112W Rsrch/Wrtng in Health Sciences

Three elective courses selected from the following (advisor approval is required):

CML 2143 Current Issues/Hlth Sci Mgt

HSCI 2104 Management of Health Science Services

HSCI 2108 Quality Improvement in Health Care

HSCI 2110 Disease Prev/Health Promotion

Transferring credits

Up to 60 credits of coursework may be transferable from coursework taken elsewhere. For an assessment on the transferability of your previous coursework, please contact the program office. Coursework will be evaluated for transfer using the following criteria:

- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a grade of C or better (C- grades do not transfer)

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN CYTOTECHNOLOGY REQUIREMENTS

This is a restricted program. The Medical Education Training Campus (METC) Cytotechnology Program (<http://smhs.gwu.edu/crl/military>) is a contract program for pre-selected military service members, established between GW and the METC. This contract program provides GW educational services to eligible active duty U.S. Army servicemembers. These services include:

- Academic advising for students who have outstanding prerequisites for eligibility
- Application and registration services
- Academic record maintenance
- Conferral of a Bachelor of Science in Health Sciences to students upon successful completion of 126 semester hours of credit hours from the program of study.

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN EMERGENCY MEDICAL SERVICES MANAGEMENT

REQUIREMENTS

The Bachelor of Science in the Health Sciences with a major in the field of emergency medical services management (<http://smhs.gwu.edu/crl/programs/ems>) is an online degree completion program that requires successful completion of **120 credits**, 60 credits of which must be completed at GW. Up to 60 credits of coursework may be transferable from coursework taken elsewhere.

The following requirements must be fulfilled:

60 credits of general education and advanced standing including:

3 credits of English composition

4 credits of natural or physical science with lab

6 credits of social sciences

3 credits of humanities

44 credits of advanced standing*

* Additional academic coursework. Non-traditional credit sources may be considered on a case-by-case basis (i.e. military coursework, credit-by-exam, and non-college based health programs).

Requirements for the major:

At least 60 credits of GW coursework including:

CML 2140 Mgt of HR in Health Sci Org

CML 2142 Financial Mgt/Health Sciences

EHS 2174 Foundations of Emergency Health Services Systems

EHS 2175 Community Risk Management and Safety in EHS

EHS 4110 Operations Mgt in EHS Systems

EHS 4111 Leadership Concepts in EHS

EHS 4112 Special Ops and Disaster Mgt

EHS 4144 Seminar in EHS Leadership

HSCI 2103 Health Policy and the Health Care System

HSCI 2104 Management of Health Science Services

HSCI 2105 Current Issus in Bioethics

HSCI 2108 Quality Improvement in Health Care

HSCI 2112W Writing in the Health Sciences

HSCI 2115 Intro Biostatistics-Health Sci

HSCI 4103 Health Care Law/Regulation

HSCI 4106 Intro to Epidemiology for HS

HSCI 4112W Rsrch/Wrtng in Health Sciences

Three elective courses from the following (advisor approval is required):

EHS 2211 Intro to Telemedicine

EHS 4101 Humanitarian Relief Ops

HSCI 2101 Psychosocial Aspects of Health and Illness

HSCI 2102 Pathophysiology

HSCI 2105 Current Issus in Bioethics

HSCI 2110 Disease Prev/Health Promotion

HSCI 2111 Dev/Health Care Professions

HSCI 4102 HumanPhysiology/ExtremeEnviro

HSCI 4105 Case Studies in Health Care

Transferring credits

Up to 60 credits of coursework may be transferable from coursework taken elsewhere provided it is:

- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a grade of C or better (C- grades do not transfer)
-

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN HEALTH INTERVENTION AND DISASTER RESPONSE

REQUIREMENTS

The Bachelor of Science in Health Sciences with a major in health intervention and disaster response (HIDR) (<http://smhs.gwu.edu/crl/programs/hidr>) is an online degree completion program that requires successful completion of **120 credits**, 60 of which must be completed at GW. Up to 60 credits of coursework may be transferred from coursework taken elsewhere.

The following requirements must be fulfilled:

60 credits of general education and advanced standing including:

3 credits of English composition

4 credits of natural or physical science with lab

6 credits of social sciences

3 credits of humanities

44 credits of advanced standing*

Required

At least 60 credits of GW courses including

CML 2143 Current Issues/Hlth Sci Mgt

EHS 2211 Intro to Telemedicine

EHS 4101 Humanitarian Relief Ops

HSCI 2101 Psychosocial Aspects of Health and Illness

HSCI 2102 Pathophysiology

HSCI 2104 Management of Health Science Services

HSCI 2105 Current Issue in Bioethics

HSCI 2110 Disease Prev/Health Promotion

HSCI 2112W Writing in the Health Sciences

HSCI 2113 Informatics in the HSci

HSCI 2114 Healthcare/Developing Nations

HSCI 2115 Intro Biostatistics-Health Sci

HSCI 4102 Human Physiology/Extreme Enviro

HSCI 4106 Intro to Epidemiology for HS

HSCI 4112W Rsrch/Wrtng in Health Sciences

MLS 4114 Clinical Microbiology

MLS 4115 Parasitology and Mycology

MLS 4141 Immunology and Serology

Elective

Three of the following (advisor approval required)

CML 2142 Financial Mgt/Health Sciences

EHS 2175 Community Risk Management and Safety in EHS

EHS 4112 Special Ops and Disaster Mgt

HSCI 2103 Health Policy and the Health Care System

HSCI 2111 Dev/Health Care Professions

HSCI 4105 Case Studies in Health Care

*Additional academic coursework. Non-traditional credit sources may be considered on a case-by-case basis (i.e., military coursework, credit-by-exam, and non-college based health programs).

Transferring credits

Up to 60 credits of coursework may be transferable from coursework taken elsewhere. For an assessment on the transferability of your previous coursework, please contact the program office. Coursework will be evaluated for transfer using the following criteria:

- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a grade of C or better (C- grades do not transfer)

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN MEDICAL LABORATORY SCIENCE

REQUIREMENTS

The Bachelor of Science in Health Sciences with a major in medical laboratory science (MLS) (<http://smhs.gwu.edu/crl/programs/mls>) is a degree completion program that is

offered in two formats: distance learning or a hybrid of distance learning/on campus.

The following requirements must be fulfilled: 120 credits, including a minimum 60 credits in required courses completed at GW and up to 60 credits of transfer credits in courses taken elsewhere. Eligible students admitted through approved SMHS Guaranteed Admission Agreements (<http://smhs.gwu.edu/academics/health-sciences-programs/guaranteed-admission-agreements>) partnerships must complete a minimum of 52 required credits at GW; eligibility is reviewed on a case-by-case basis.

60 credits of general education and advanced standing, including:

3 credits in English composition

8 credits in biology with lab*

8 credits general or inorganic chemistry with lab*

4 credits in microbiology with lab*

3 credits in organic chemistry or biochemistry*

3 credits in college mathematics (college algebra, statistics or higher)

3 credits in humanities

6 credits in social sciences

22 credits of advanced standing**

Requirements for the major

HSCI 2112W Writing in the Health Sciences

HSCI 4112W Rsrch/Wrtng in Health Sciences

MLS 4114 Clinical Microbiology

MLS 4115 Parasitology and Mycology

MLS 4118 Laboratory Operations

MLS 4120 Urinalysis & Body Fluids

MLS 4124 Clinical Microbiology II

MLS 4128 Hematology I

MLS 4129 Hematology II

MLS 4140 Clinical Laboratory Mgt

MLS 4141 Immunology and Serology

MLS 4145 Clinical Biochemistry

MLS 4150 Immunohematology

MLS 4151 Molecular Diagnostics

MLS 4155 Clinical Biochemistry II

MLS 4159 Capstone Seminar

Additional requirements for students in the fully online BSHS program

HSCI 2102 Pathophysiology

HSCI 2105 Current Issues in Bioethics

MLS 4136 Clinical Experience I

MLS 4137 Clinical Experience II

MLS 4138 Clinical Experience III

MLS 4139 Clinical Experience IV

One of the following:

HSCI 2101 Psychosocial Aspects of Health and Illness

HSCI 2107 Health Care in Literature

HSCI 4106 Intro to Epidemiology for HS

Additional requirements for students in the hybrid BSHS program

MLS 4160 Blood Bank Practicum

MLS 4161 Clinical Biochemistry Practicum

MLS 4162 Hematology Practicum

MLS 4164 Clinical Microbiology Practicum

MLS 4165 Urinalysis Practicum

MLS 4166 Coagulation Practicum

9 additional credits from the following:

MLS 4214 Clinical Microbiology I Laboratory

MLS 4215 Clinical Parasitology and Mycology Laboratory

MLS 4224 Clinical Microbiology II Laboratory

MLS 4228 Hematology I Laboratory

MLS 4229 Hematology II Laboratory

MLS 4250 Immunohematology Laboratory

MLS 4251 Molecular Diagnostics Laboratory

MLS 4245 Clinical Biochemistry I Laboratory

*Medical laboratory technicians (MLTs) may receive transfer credit for biological sciences, general microbiology, general chemistry, and organic chemistry/biochemistry courses.

**Additional academic coursework. Non-traditional credit sources may be considered on a case-by-case basis (i.e. military coursework, credit-by-exam, and non-college based health programs). Students should have previous coursework in ethics, and cultural or global perspectives.

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN PHARMACEUTICAL SCIENCES

REQUIREMENTS

The Bachelor of Science in Health Sciences with a major in pharmaceutical sciences (<http://smhs.gwu.edu/pths/programs/pharmaceutical-sciences>) is a degree completion program that requires successful completion of **129 credit hours**, 69 credits of which must be completed at GW. Up to 60 credits of coursework may be transferable from coursework taken elsewhere.

The following requirements must be fulfilled:

60 credits including:

3 credits of Calculus

3 credits of Communication

8 credits of Biology with lab

4 credits of Electives

6 credits of English Composition

8 credits of General Chemistry with lab

12 credits of Humanities and/or Social Sciences

4 credits of Microbiology with lab

8 credits of Organic Chemistry with lab

4 credits of Physics with lab

At least 69 credits of GW coursework including:

CRA 2101 Basics of Clinical Research

HSCI 2102 Pathophysiology

HSCI 2105 Current Issues in Bioethics

HSCI 2112W Writing in the Health Sciences

HSCI 2115 Intro Biostatistics-Health Sci

HSCI 3116 Genome-Based Med & Pharmacology

HSCI 4112W Rsrch/Wrtng in Health Sciences

PHAR 3170 Intro- Pharmacology/Toxicology

PHAR 3190 Prin of Molecular Medicine

PHRG 2141 Mol. Bio for Pharmacogenomics

PHRG 2142 Mol. Tech for Pharmacogenomics

PHRG 4152 Pharmaceutics I *

PHRG 4153 Pharmaceutics II *

PHRG 4154 Integrated Basic Hlth Sciences I *

PHRG 4155 Integrated Basic Hlth Sciences II *

PHRG 4156 Integrated Basic Hlth Sciences III *

PHRG 4157 Integrated Basic Hlth Sciences IV *

PHRG 4160 Integrated Basic Hlth Sci Lab I *

PHRG 4161 Integrated Basic Hlth Sci Lab II *

PHRG 4163 Pharmacogenomics Essentials *

PHRG 4169 Nonprescription Products *

PHRG 4172 Clin. Drug Info. Skills *

Elective tracks (one of the following)

Pharmacy practical skills track (required for SU's PharmD)

PHRG 4151 Intro to Pharmacy Practice Lab *

PHRG 4165 Patient Counseling and Comm *

PHRG 4167 Intro. Pharm. Pract. Exp. I *

PHRG 4168 Intro. Pharm. Pract. Exp. II *

PHRG 4170 Out. Pharm. Prac. Lab *

PHRG 4171 Sterile Compounding Lab *

Research track (recommended if pursuing Ph.D.)

HSCI 2103 Health Policy and the Health Care System

HSCI 4198 Mentored Res. I

HSCI 4199 Mentored Res. II

* Course taught by SU faculty and applied towards SU's PharmD.

Transferring credits

Up to 60 credits of coursework may be transferable from coursework taken elsewhere. For an assessment on the transferability of your previous coursework, please contact the program office. Coursework will be evaluated for transfer using the following criteria:

- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a grade of C or better (C- grades do not transfer)

DUAL BACHELOR OF SCIENCE IN HEALTH SCIENCES AND MASTER OF SCIENCE IN HEALTH SCIENCES IN CLINICAL RESEARCH ADMINISTRATION

REQUIREMENTS

This multi-level online dual degree program offers academically qualified individuals a seamless and accelerated pathway for completing both the Bachelor of Science in Health Sciences (BSHS) in Clinical Research Administration and the Master of Science in Health Sciences (MSHS) in Clinical Research Administration (CRA) (<http://smhs.gwu.edu/crl/programs/cra>). Undergraduate and graduate degrees will be conferred sequentially, with the BSHS awarded upon completion of 120 credits (nine of which are taken for graduate credit). The MSHS is awarded following completion of an additional 27 credits of graduate course work.

BSHS in Clinical Research Administration

The BSHS with a major in Clinical Research Administration is a degree completion program that requires successful completion of 120 credits, divided into three degree components, 60 credits of which must be completed at GW. Up to 60 credits of course work may be transferable from course work taken elsewhere.

The following requirements must be fulfilled:

60 credits of general education and advanced standing including:

3 credits of English composition

4 credits of natural or physical science with lab

6 credits of social science

3 credits of humanities

44 credits of advanced standing*

*Additional academic coursework. Non-traditional credit sources may be considered on a case-by-case basis (i.e. military coursework, credit-by-exam, and non-college based health programs).

Requirements for the major:

At least 60 credits of GW coursework including:

Health sciences distance education courses

CRA 2101	Basics of Clinical Research
CRA 2102	Processes of Clinical Research
CRA 2103	Good Clinical Practices
CRA 2104	Business of Clinical Research

DUAL BSHS IN EMERGENCY HEALTH SERVICES MANAGEMENT AND MSHS IN CLINICAL MANAGEMENT AND LEADERSHIP

REQUIREMENTS

Emergency Medical Services Management (<http://smhs.gwu.edu/crl/programs/ems>) students study up-to-date information on issues, theories and practices in emergency medicine, and investigate emergency service's role among other medical disciplines. Most courses have an applied project where the student role play as managers or administrators and handle a complex current issue. Students take core courses in the health sciences covering issues, trends and topics in health care systems, enterprises and leadership. Emergency Medical Services Leadership coursework focuses on response to high-impact emergencies, analysis of systems, the legal, regulatory and public information aspects of emergency management and strategic emergency management.

This multi-level dual degree program offers academically qualified individuals a seamless and accelerated pathway for completing both the Bachelor of Science in Health Sciences (BSHS) in Emergency Medical Services Management and the Master of Science in Health Sciences (MSHS) in either Clinical Management and Leadership or Emergency Medical Services Leadership (beginning in Summer/Fall 2014).

DUAL BSHS IN EMERGENCY MEDICAL SERVICES MANAGEMENT AND MSHS IN EMERGENCY MEDICAL SERVICES LEADERSHIP

BSHS in Emergency Medical Services Management

60 credits in general education and advanced standing electives completed prior to admission.

MINOR IN ANATOMY

The Department of Anatomy and Regenerative Biology (<http://smhs.gwu.edu/anatomy>) in the School of Medicine and Health Sciences (<http://smhs.gwu.edu>) offers courses that pertain to the 12-credit minor in human anatomy that is available to undergraduates across the University:

ANAT 2130	Human Embryology
ANAT 2150	Human Microscopic Anatomy
ANAT 2160	Human Functional Neuroanatomy
ANAT 2181	Human Gross Anatomy

MINOR IN CLINICAL RESEARCH ADMINISTRATION

REQUIREMENTS

Students must complete the required coursework with a 2.5 GPA or better. The minor requires successful completion of 15 credits.

Required

CRA 2101	Basics of Clinical Research
CRA 2102	Processes of Clinical Research
CRA 2103	Good Clinical Practices
HSCI 2105	Current Issus in Bioethics

Elective (choose one with advisor approval)

CRA 2104	Business of Clinical Research
HSCI 2103	Health Policy and the Health Care System

MINOR IN EMERGENCY HEALTH SERVICES

REQUIREMENTS

The minor in Emergency Health Services requires successful completion of at least 15 credits in two areas. Students must complete the required coursework with a 2.5 GPA or better.

Required

EHS 1040	Emergency Medical Tech-Basic *
EHS 1041	EMT - Basic Lab *
EHS 2174	Foundations of Emergency Health Services Systems
EHS 2175	Community Risk Management and Safety in EHS

Electives

At least five credits from the following:

EHS 1002	CPR & First Aid
EHS 2107	Theory&Prac ofRsch/ClinclSetng
EHS 2108	Emergency Med Clinical Scribe
EHS 2110	EmergDeptCritCareAsses&Proced.
EHS 2162	Intro Princpls/Tactical Med

EHS 2211	Intro to Telemedicine
EHS 4110	Operations Mgt in EHS Systems
EHS 4112	Special Ops and Disaster Mgt

*For students who already have EMT-Basic Certification, an elective can be used to replace the EHS 1040 and EHS 1041 requirement; the student needs a minimum of 4 additional elective credits to account for the waiver of EHS 1040 and EHS 1041. Please contact the program office for more information.

MINOR IN HEALTH SCIENCES REQUIREMENTS

Students must successfully complete 15 credits of approved, health sciences courses. Students must complete the required coursework with a 2.5 GPA or better.

Required

HSCI 2101	Psychosocial Aspects of Health and Illness
HSCI 2102	Pathophysiology
HSCI 2103	Health Policy and the Health Care System
HSCI 2105	Current Issues in Bioethics

Elective

Selected in consultation with academic advisor

HSCI 4103	Health Care Law/Regulation
or HSCI 4105	Case Studies in Health Care

GRADUATE PROGRAMS

Master's programs

- Master of Science in Health Sciences in the field of clinical management and leadership (p. 429)
- Master of Science in Health Sciences in the field of clinical microbiology (p. 430)
- Master of Science in Health Sciences in the field of clinical and translational microbiology (<http://bulletin.gwu.edu/medicine-health-sciences/graduate-programs/ms-clinical-translational-microbiology>)
- Master of Science in Health Sciences in the field of clinical research administration
- Master of Science in Health Sciences in the field of clinical and translational research
- Master of Science in Health Sciences in the field of emergency medical services leadership

- Master of Science in Health Sciences in the field of health care quality (p. 432)
- Master of Science in Health Sciences in the field of immunohematology and biotechnology (<http://bulletin.gwu.edu/medicine-health-sciences/graduate-programs/mshs-immunohematology-biotechnology>)
- Master of Science in Health Sciences in the field of integrative medicine (<http://bulletin.gwu.edu/medicine-health-sciences/graduate-programs/ms-integrative-medicine>)
- Master of Science in Health Sciences in the field of medical laboratory science (p. 433)
- Master of Science in Health Sciences in the field of molecular diagnostic science (p. 434)
- Master of Science in Health Sciences in the field of regulatory affairs (p. 435)
- Master of Science in Health Sciences in the field of physician assistant (p. 434)
- Master of Science in Health Sciences in the field of translational microbiology (p. 435)

Dual degree program

- Master of Science in Health Sciences in the field of physician assistant and Master of Public Health (Milken Institute School of Public Health) (<http://bulletin.gwu.edu/medicine-health-sciences/graduate-programs/dual-pa-mph>)

Military contract programs

- Master of Science in Health Sciences in the field of immunohematology (p. 433)

Doctoral programs

- Doctor of Philosophy in the field of translational health sciences (<http://bulletin.gwu.edu/medicine-health-sciences/graduate-programs/phd-translational-health-sciences>)
- Doctor of Physical Therapy (p. 436)
- Advanced Practice Clinical Doctorate in Occupational Therapy (<http://bulletin.gwu.edu/medicine-health-sciences/graduate-programs/advanced-practice-clinical-doctorate-occupational-therapy>)

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF CLINICAL MANAGEMENT AND LEADERSHIP

REQUIREMENTS

The MSHS in the field of clinical management and leadership requires successful completion of 36 credits, including: 6 credits of research coursework, 9 credits of strategic leadership courses, 18 credits in the field of clinical management and leadership, and 3 credits of elective.

Required:

6 credits in graduate research

HSCI 6270 Resear Meth Hlth Prof I

HSCI 6271 Rsch Meth Hlth Prof II

9 credits in strategic leadership

HSCI 6223 Topics -Health Care Leadership

HSCI 6240 Issues & Trends in Health Syst

HSCI 6241 The Health Care Enterprise

18 credits in clinical management and leadership

CML 6202 Human Resource Development

CML 6203 Health Info Quality & Outcomes

CML 6204 Marketing Clinical Services

CML 6205 CaseStudies/ClinicMgt&Ldrshp

CML 6274 Health Economics and Finance

CML 6275 Ldrshp&Change in Clinical Mgt

Elective:

One of the following

HCQ 6201 Building a Quality Culture

HCQ 6202 Health Care Quality Landscape

HCQ 6203 Quality Improvement Science

HCQ 6204 Health Care Quality Analysis

HCQ 6205 Patient Safety Systems

HSCI 6263 Biostatistics Transl Research

HSCI 6264 Epidemiology Translational Res

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF CLINICAL MICROBIOLOGY

REQUIREMENTS

The Master of Science in Health Sciences in the field of clinical microbiology (<http://smhs.gwu.edu/crl/programs/mls>) requires the completion of 36 credits of graduate work. This online program provides students with clinical microbiology and laboratory science coursework, a hands-on microbiology practicum that will prepare students for a diagnostic microbiology laboratory position, and eligibility for national certification examinations in clinical microbiology. The program includes additional graduate coursework to prepare students for careers in research institutions, public health laboratories, biotechnology firms, pharmaceutical companies, or governmental agencies.

Required

HSCI 6263 Biostatistics Transl Research

HSCI 6264 Epidemiology Translational Res

MLS 4118 Laboratory Operations

MLS 4164 ClinicalMicrobiology Practicum

MLS 6114 Advanced Clinical Microbiology I

MLS 6115 Advanced Clinical Parasitology and Mycology

MLS 6124 Advanced Clinical Microbiology II

MLS 6140 Advanced Laboratory Management

MLS 6141 Advanced Immunology and Serology

MLS 6151 Advanced Molecular Diagnostics

MLS 6216 Microbial Pathogenesis

MLS 6217 Medical Biotechnology

MLS 6244 Research Ethics & Integrity

HSCI or MLS elective selected in consultation with advisor

Transfer credits

Up to six credits of previously earned graduate-level coursework may be accepted as transfer credit. Contact the program office for the full policy and guidelines.

Official transfer credit evaluations are conducted only for admitted students.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF CLINICAL RESEARCH ADMINISTRATION

REQUIREMENTS

The MSHS in the field of clinical research administration (CRA (<http://smhs.gwu.edu/crl/programs/cra>)) requires successful completion of 36 credits, including: 18 credits in clinical research administration, 9 credits of strategic leadership courses, 6 credits of graduate research coursework, and a 3 credits of elective.

Required

Clinical research administration courses

CRA 6201	Critical Analysis Clin Rsch
CRA 6202	Medicines Development
CRA 6203	Partnerships w/Human Subjects
CRA 6204	The Clinical Research Industry
CRA 6210	MedicalWriting/ClinicalResrch
CRA 6275	Ldrshp&Change in ClinRschrAdmin

Strategic leadership courses

HSCI 6223	Topics -Health Care Leadership
HSCI 6240	Issues & Trends in Health Syst
HSCI 6241	The Health Care Enterprise

Graduate research courses

HSCI 6263	Biostatistics Transl Research
HSCI 6264	Epidemiology Translational Res

Elective

One of the following

CRA 6208	International Clinical Rsrch
CRA 6209	Monitoring Clinical Research

Transfer credits

Up to six credits of previously earned graduate-level coursework may be accepted as transfer credit. Please contact the program office for the full policy and guidelines.

Official transfer credit evaluations are conducted only for admitted students.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF CLINICAL AND TRANSLATIONAL RESEARCH

REQUIREMENTS

The Master of Science in Health Sciences in the field of clinical and translational research (<http://smhs.gwu.edu/crl/programs/ctr>) is 36 credits:

The core (27 credits) program is designed to build researchers' necessary competencies in the field of translational research.

Elective courses (9 credits) are drawn from the four domains of basic and biomedical sciences, clinical research and administration, community health research, and health services research and policy. Students will choose their courses in consultation with an academic advisor.

Required

Clinical research courses

CRA 6201	Critical Analysis Clin Rsch
CRA 6205	Clinical Investigation

Graduate research courses

HSCI 6263	Biostatistics Transl Research
HSCI 6264	Epidemiology Translational Res
HSCI 6273	Bioinformatics for Genomics

Translational research courses

HSCI 6261	Fdtn in Clinical/Trans.Rsrch
HSCI 6262	Transdisciplinary Sem/Pract.
HSCI 6265	Grantsmanship in Trans Res
HSCI 6275	Transdisciplinary Rsrch Prop.

Electives

Nine credits selected in consultation with academic advisor

Transfer credits

Up to six credits of previously earned graduate-level coursework may be accepted as transfer credit. Please contact the program office for the full policy and guidelines.

Official transfer credit evaluations are conducted only for admitted students.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF EMERGENCY MEDICAL SERVICES LEADERSHIP

REQUIREMENTS

The Master of Science in Health Sciences in the field of emergency medical services leadership (<http://smhs.gwu.edu/crl/programs/ems>) requires successful completion of 36 credits, including 6 credits of research coursework, 9 credits of strategic leadership courses, and 21 credits in the field of emergency medical services.

Required

Graduate research courses

HSCI 6263 Biostatistics Transl Research

HSCI 6264 Epidemiology Translational Res

Strategic leadership courses

HSCI 6223 Topics -Health Care Leadership

HSCI 6240 Issues & Trends in Health Syst

HSCI 6241 The Health Care Enterprise

Emergency medical services courses

EHS 6201 Response /High Impact Emergenc

EHS 6203 Legal&RegltryOblig/Emer Svcs

EHS 6210 EMS Systems Design and Analysis

EHS 6274 Health Economics and Finance

EHS 6275 Ldrshp&Change/EmergSvcsMgt

HSCI 6212 Teaching Strategies in the Health Professions

HSCI 6213 Curriculum Development in the Health Professions

Transfer credits

Up to six credits of previously earned graduate-level course work may be accepted as transfer credit. Please contact the program office for the full policy and guidelines.

Official transfer credit evaluations are conducted for admitted students only.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF HEALTH CARE QUALITY

REQUIREMENTS

The Master of Science in Health Sciences in the field of health care quality (<http://smhs.gwu.edu/crl/programs/health-care-quality>) requires successful completion of 36 credits, including: 6 credits of research coursework, 9 credits of strategic leadership courses, 18 credits in the field of health care quality, and 3 credits of a clinical management and leadership elective.

Required

Graduate research courses

HSCI 6263 Biostatistics Transl Research

HSCI 6264 Epidemiology Translational Res

Professional courses

CML 6203 Health Info Quality & Outcomes

HSCI 6223 Topics -Health Care Leadership

HSCI 6241 The Health Care Enterprise

Health care quality courses

HCQ 6200 Introduction to Health Care Quality

HCQ 6201 Building a Quality Culture

HCQ 6202 Health Care Quality Landscape

HCQ 6203 Quality Improvement Science

HCQ 6204 Health Care Quality Analysis

HCQ 6205 Patient Safety Systems

HCQ 6275 Leadership and Change

Transfer credits

Up to six credits of previously earned graduate-level coursework may be accepted as transfer credit. Contact the program office for the full policy and guidelines.

Official transfer credit evaluations are conducted only for admitted students.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF IMMUNOHEMATOLOGY

REQUIREMENTS

Mission

The primary goal of the Master of Science in Health Sciences in the field of Immunohematology (<http://smhs.gwu.edu/crl/programs/military/immunohematology>) is to provide Blood Banking Specialists with an advanced degree. This is a military contract program. Our mission is to:

- Provide graduate courses in immunohematology through distance learning
- Facilitate the development of research skills
- Foster research in the area of immunohematology

Coursework

This degree program incorporates aspects of transfusion medicine at the graduate level with research methods, current topics in transfusion medicine, immunology, and molecular biology, as well as research in an area of immunohematology that culminates in a research project. Students pursuing the degree are required to complete 21 credits of GW online and research coursework and a total of 55 credits.

Required:

HSCI 6263	Biostatistics Transl Research
HSCI 6297	Indpendnt Study/Health Profess
MLS 6140	Advanced Laboratory Management
MLS 6141	Advanced Immunology and Serology
MLS 6151	Advanced Molecular Diagnostics
MLS 6203	Clinical Immunohematology I
MLS 6204	Clinical Immunohematology II
MLS 6207	Clinicl Pract: Blood Banking I
MLS 6208	Clinicl Pract: Blood BankingII
MLS 6209	Clinicl Pract:Blood BankingIII
MLS 6211	Hematopoiesis &Blood Pathophys
MLS 6212	Organiz & Mgt of Blood Banks
MLS 6213	Seminar in Immunohematology
MLS 6214	Specialized Practicum
MLS 6245	Current Topics in MLS

MLS 6246

Capstone Project

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF MEDICAL LABORATORY SCIENCE

REQUIREMENTS

The Master of Science in Health Sciences in the field of medical laboratory science (MLS) (<http://smhs.gwu.edu/crl/programs/mls>) consists of 36 credits, including 15 credits in the field of medical laboratory science and a mentored research project, 6 credits of strategic leadership courses, 12 credits of graduate research coursework, and 3 credits of an elective.

Required

Medical laboratory science courses

MLS 6242	Molecular Pathology
MLS 6243	Education & Assessment in MLS
MLS 6244	Research Ethics & Integrity
MLS 6245	Current Topics in MLS
MLS 6246	Capstone Project

Strategic leadership courses

HSCI 6223	Topics -Health Care Leadership
HSCI 6241	The Health Care Enterprise

Graduate research courses

HSCI 6263	Biostatistics Transl Research
HSCI 6264	Epidemiology Translational Res
HSCI 6270	Resear Meth Hlth Prof I
HSCI 6271	Rsch Meth Hlth Prof II

Elective

3 credits selected, in consultation with program advisor, from existing online graduate courses in Medical Laboratory Sciences, Clinical Management and Leadership, Health Care Quality, Regulatory Affairs and Clinical Research Administration.

Transfer credits

Up to six credits of previously earned graduate-level coursework may be accepted as transfer credit. Contact the program office for the full policy and guidelines.

Official transfer credit evaluations are conducted only for admitted students.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF MOLECULAR DIAGNOSTIC SCIENCE

REQUIREMENTS

The Master of Science in Health Sciences (MSHS) in the field of molecular diagnostic science consists of 36 credits, including 27 credits of MLS coursework to develop a foundational understanding of molecular biology and biotechnology and to apply this knowledge through an internship or mentored research project, 3 credits of quantitative data analysis, 3 credits of leadership concepts in a clinical setting, and 3 credits in ethical implications and research.

Required

MLS 4118	Laboratory Operations
MLS 6141	Advanced Immunology and Serology
MLS 6219	Molecular Biology
MLS 6218	Genetics
MLS 6216	Microbial Pathogenesis
MLS 6242	Molecular Pathology
MLS 6217	Medical Biotechnology
HSCI 6263	Biostatistics Transl Research
MLS 6140	Advanced Laboratory Management
MLS 6244	Research Ethics & Integrity
MLS 6166	Molecular Diagnostics Practicum *
MLS 6245	Current Topics in MLS
MLS 6246	Capstone Project

* May be substituted with an elective for students with current clinical molecular laboratory experience.

The MSHS in Molecular Diagnostic Science prepares students with the theoretical knowledge and practical skills for positions in diagnostic clinical laboratories, public health laboratories, biotechnology companies, government agencies, law enforcement agencies, and research institutes. In addition, students who complete this program will be eligible to take the Molecular Biology Board of Certification examination offered by the American Society for Clinical pathology (ASCP). The curriculum will also ensure that graduates will be prepared to

pursue an advanced degree beyond the Master's level if they so choose.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF PHYSICIAN ASSISTANT

REQUIREMENTS

Master of Science in Health Sciences physician assistant program (<http://smhs.gwu.edu/pas>) focuses on preparing health professionals who will extend and complement the capabilities of physicians in the delivery of health care. The curriculum emphasizes a scholarly approach to medicine, development of organizational and critical-thinking skills, and evidence-based medicine.

Required

ANAT 6215	Anatomy for Health Sciences Students
PA 6101	Clinical Assessment I
PA 6102	Clinical Assessment II
PA 6103	Clinical Assessment III
PA 6104	Integration into Clinical Concepts I
PA 6105	Integration into Clinical Concepts II
PA 6106	Integration into Clinical Concepts III
PA 6109	Foundations of Medicine
PA 6110	Evidence Based Practice for PA Students
PA 6111	Evidence Based Practice for PA/MPH Students
PA 6112	Clinical Medicine I
PA 6113	Clinical Medicine II
PA 6116	Clinical Skills I
PA 6117	Clinical Skills II
PA 6118	Health, Justice, and Society I
PA 6119	Health, Justice, and Society II
PA 6120	Human Behavior
PA 6121	Clinical Specialties
PA 6122	Role of PA in American Health Care
PA 6259	Introduction to Clinical Education

PA 6261	Inpatient Med Clinical Practic
PA 6262	Primary Care Clinical Practicum
PA 6263	Surg Inpatient Clinical Practi
PA 6264	Women's Health Clin Pract
PA 6265	Pediatrics Clinical Practicum
PA 6266	Emergency Medicine Clinical Pr
PA 6267	Behav Med Clin Pract
PA 6268	Elective Clinical Practicum I
PA 6300	Introduction to Professional Practice
PHAR 6207	Basic Principles of Pharmacol.
PHAR 6208	Pharm in Dis. Pathophysiology
PHYL 6211	Physiology for Health Sciences Students

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF REGULATORY AFFAIRS

REQUIREMENTS

The Master of Science in Health Sciences in the field of Regulatory Affairs (RAFF) requires successful completion of 36 credits, including: 9 credits of the research coursework, 6 credits of strategic leadership courses, 18 credits in the field of regulatory affairs, and 3 credits of an elective.

Required

Regulatory affairs courses

RAFF 6201	Introduction to Global Regulatory Affairs
RAFF 6202	Regulatory Drug Biologics
RAFF 6203	Regulatory Device Diagnostics
RAFF 6204	Clinical Research for Regulatory Affairs
RAFF 6205	Regulatory Affairs Compliance
RAFF 6275	Leadership in Regulatory Affairs

Graduate research courses

HSCI 6263	Biostatistics Transl Research
HSCI 6264	Epidemiology Translational Res

Strategic leadership courses

HSCI 6223	Topics -Health Care Leadership
HSCI 6240	Issues & Trends in Health Syst
HSCI 6241	The Health Care Enterprise

Electives

One of the following:

CML 6274	Health Economics and Finance
CRA 6203	Partnerships w/Human Subjects
CRA 6208	International Clinical Rsrch
CRA 6209	Monitoring Clinical Research
CRA 6210	Medical Writing/Clinical Resrch
HCQ 6201	Building a Quality Culture

Transfer credits

Up to six credits of previously earned graduate-level coursework may be accepted as transfer credit. Contact the program office for the full policy and guidelines.

Official transfer credit evaluations are conducted only for admitted students.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF TRANSLATIONAL MICROBIOLOGY

REQUIREMENTS

The Master of Science in Health Sciences in the field of translational microbiology consists of 36 credits, including 18 credits of MLS coursework to develop a foundational understanding of microbiological sciences and to apply this knowledge through a mentored research project, 12 credits of quantitative data analysis, 3 credits of strategic leadership concepts, and 3 credits in ethical implications and research.

Required

HSCI 6263	Biostatistics Transl Research
HSCI 6264	Epidemiology Translational Res
HSCI 6270	Resear Meth Hlth Prof I
HSCI 6271	Rsch Meth Hlth Prof II
MLS 6245	Current Topics in MLS
MLS 6246	Capstone Project

MLS 6244	Research Ethics & Integrity
MLS 6216	Microbial Pathogenesis
MLS 6115	Advanced Clinical Parasitology and Mycology
MLS 6217	Medical Biotechnology
One of the following	
HSCI 6241	The Health Care Enterprise
HSCI 6223	Topics -Health Care Leadership
HSCI 6240	Issues & Trends in Health Syst

Electives

Six credits of MLS electives selected with approval of program director

The MSHS in Translational Microbiology prepares students with the theoretical knowledge and practical skills for research positions in public health microbiology laboratories, biotechnology companies, government agencies and research institutes. By completing course work from various programs within Health Sciences, students will gain a working knowledge of both basic and clinical aspects of infectious disease and will graduate with the credentials needed to work in a clinical, basic or applied research setting. The curriculum will also ensure that graduates will be prepared to pursue an advanced degree beyond the Master's level if they so choose.

DOCTOR OF PHYSICAL THERAPY REQUIREMENTS

The DPT Program provides quality graduate education committed to developing generalist practitioners who are: reflective practitioners, who think critically and use best evidence to effectively solve problems; compassionate practitioners, who demonstrate excellence in communication and interpersonal skills, a respect for individual and cultural differences and the core values of the profession; and dedicated practitioners who value the tenets of lifelong learning.

The curriculum consists of 109 credits of professional course work requiring thirty-three months of full-time study beginning in the fall semester. It combines content from the foundational sciences, behavioral sciences, clinical sciences, professional practice expectations, practice management expectations, and critical inquiry. Students develop the skills needed to examine, evaluate, diagnose, prognose, develop a plan of care and implement and re-evaluate that plan of care for patients with dysfunction in the cardiopulmonary, musculoskeletal, neuromotor and integumentary systems across the lifespan.

The curriculum is built on the overarching principles of integration and application. Information is integrated and applied through a series of integrative units using "standardized patients" and Simulation Experiences. Clinical experiences are introduced early in the curriculum in the second and fourth semesters. Three full-time clinical internships occur in semesters six, seven, and eight for a total of 34 weeks of full time clinical experience. Internships are located regionally, nationally, and internationally providing depth and breadth to each student's unique educational experience.

Program of Study

Fall I Semester I

PT 8201	Functional Anatomy
PT 8311	Foundations of Examination
PT 8312	Foundations of Interventions
PT 8351	Professional Issues in Physical Therapy Health Care Management I
PT 8361	Clinical Conference I

Spring I Semester II

PT 8202	Applied Physiology
PT 8313	Therapeutic Modalities
PT 8352	Teaching in Physical Therapy Practice
PT 8203	Neuroscience in Rehabilitation I
PT 8271	Research in Practice
PT 8362	Clinical Conference II
PT 8483	Integrated Clinical Experience I
PT 8204	Movement Science I

Summer I Semester III

PT 8205	Movement Science II
PT 8206	Neuroscience in Rehabilitation II
PT 8207	Clinical Medicine and Pharmacology
PT 8363	Clinical Conference III
PT 8481	Interprofessional Community Practicum

Fall II Semester IV

PT 8315	Management of Musculoskeletal Dysfunction I
---------	---

PT 8208	Medical Imaging
PT 8318	Management of Neuromotor Dysfunction
PT 8323	Prosthetics & Orthotics
PT 8364	Clinical Conference IV
PT 8272	Research Seminar
PT 8484	Integrated Clinical Experience II

Spring II Semester V

PT 8316	Management of Musculoskeletal Dysfunction II
PT 8320	Management of the Pediatric Client
PT 8322	Management of the Aging Adult
PT 8314	Management of Cardiopulmonary Dysfunction
PT 8317	Management of Integumentary Dysfunction
PT 8365	Clinical Conference V

Summer II Semester VI

PT 8491	Clinical Internship I
PT 8366	Clinical Conference VI
PT 8321	Women's Health

Fall III Semester VII

PT 8492	Clinical Internship II
PT 8355	Professional Issues in Physical Therapy Health Care Management II
PT 8357	Capstone Seminar
PT 8356	Health Promotion and Wellness

Spring III Semester VIII

PT 8493	Clinical Internship III
---------	-------------------------

Full-time physical therapy clinical experience in a range of clinical settings. Integration and implementation of all aspects of patient/client management, professional practice expectations, and professional management expectations. Progress from advanced beginner to entry-level performance in the management of patients with non-complex problems across the life span.

CERTIFICATE PROGRAMS

Post-baccalaureate certificates

- Post-baccalaureate certificate in medical laboratory science (p. 439)
- Post-baccalaureate certificate in blood banking for medical laboratory science (p. 437)
- Post-baccalaureate certificate in chemistry for medical laboratory science (p. 438)
- Post-baccalaureate certificate in hematology for medical laboratory science (p. 438)
- Post-baccalaureate certificate in microbiology for medical laboratory science (p. 439)
- Post-baccalaureate certificate in pre-medicine (p. 439)

Graduate certificates

- Graduate certificate in clinical research administration (p. 440)
- Graduate certificate in clinical and translational research (p. 440)
- Graduate certificate in clinical research practice (p. 440)
- Graduate certificate in health care quality (p. 441)
- Graduate certificate in integrative medicine (p. 441)
- Graduate certificate in regulatory affairs (p. 441)

Military contract programs

- Undergraduate certificate in the field of health sciences laboratory science (military contract)

POST-BACCALAUREATE CERTIFICATE IN BLOOD BANKING FOR MEDICAL LABORATORY SCIENCE

REQUIREMENTS

The post-baccalaureate certificate in blood banking for medical laboratory science (MLS) requires completion of 17 credits of coursework. Completion of the certificate qualifies the graduate to take the Technologist in Blood Banking examination offered by national certifying agencies.

Admitted students complete required courses either on a part-time or full-time basis. Courses in the major are designed to broaden the student's foundation in the sciences in preparation

for the clinical phase of the program. All courses are taught online, with the exception of the clinical practica.

The clinical practica are usually taken on a full-time basis upon completion of didactic coursework. Students are typically in a clinical laboratory eight hours per day (daytime hours), five days per week. Admitted students must be able to fulfill the necessary time requirement for the practica.

Required

MLS 4118	Laboratory Operations
MLS 4141	Immunology and Serology
MLS 4128	Hematology I
MLS 4160	Blood Bank Practicum
MLS 4151	Molecular Diagnostics
MLS 4140	Clinical Laboratory Mgt

Clinical rotations, lasting between one to four weeks each, are completed at an approved clinical site. They may vary in length.

POST-BACCALAUREATE CERTIFICATE IN CHEMISTRY FOR MEDICAL LABORATORY SCIENCE

REQUIREMENTS

The post-baccalaureate certificate in chemistry for medical laboratory science (MLS) requires completion of 19 credits. Completion of the certificate qualifies the graduate to take the Technologist in Chemistry examination offered by national certifying agencies.

Admitted students complete required courses either on a part-time or full-time basis. Courses in the major are designed to broaden the student's foundation in the sciences in preparation for the clinical phase of the program. All courses are taught online, with the exception of the clinical practicum.

The clinical practicum is usually taken on a full-time basis upon completion of didactic coursework. Students are typically in a clinical laboratory eight hours per day (daytime hours), five days per week. Admitted students must be able to fulfill the necessary time requirement for the practicum.

Required

MLS 4118	Laboratory Operations
MLS 4141	Immunology and Serology
MLS 4145	Clinical Biochemistry
MLS 4155	Clinical Biochemistry II

MLS 4151	Molecular Diagnostics
MLS 4161	Clinical Biochemistry Practicum
MLS 4140	Clinical Laboratory Mgt

Clinical rotations are completed at an approved clinical site and vary in length, lasting between 1 to 4 weeks each.

POST-BACCALAUREATE CERTIFICATE IN HEMATOLOGY FOR MEDICAL LABORATORY SCIENCE

REQUIREMENTS

The post-baccalaureate certificate in hematology for medical laboratory science (MLS) requires completion of 17 credits. Completion of the certificate qualifies the graduate to take the Technologist in Hematology examination offered by national certifying agencies.

Admitted students complete required courses either on a part-time or full-time basis. Courses in the major are designed to broaden the student's foundation in the sciences in preparation for the clinical phase of the program. All courses are taught online, with the exception of the clinical practicum.

The clinical practicum is usually taken on a full-time basis upon completion of didactic coursework. Students are typically in a clinical laboratory eight hours per day (daytime hours), five days per week. Admitted students must be able to fulfill the necessary time requirement for the practicum.

Required

MLS 4118	Laboratory Operations
MLS 4141	Immunology and Serology
MLS 4128	Hematology I
MLS 4129	Hematology II
MLS 4151	Molecular Diagnostics
MLS 4162	Hematology Practicum
MLS 4166	Coagulation Practicum
MLS 4140	Clinical Laboratory Mgt

Clinical rotations are completed at an approved clinical site and vary in length, lasting between 1 to 4 weeks each.

POST-BACCALAUREATE CERTIFICATE IN MEDICAL LABORATORY SCIENCE

REQUIREMENTS

The Post-Baccalaureate Certificate in medical laboratory science (MLS) requires completion of 45 credits, divided into two components, 29 credits of MLS Courses and 16 credits of clinical practicum courses.

Admitted students complete required courses either on a part-time or full-time basis. Courses in the major are designed to broaden the student's foundation in the sciences in preparation for the clinical phase of the program. All courses are taught online, with the exception of the four months of clinical practica.

The clinical practica are usually taken on a full-time basis upon completion of didactic coursework. Students are typically in a clinical laboratory eight hours per day (daytime hours), five days per week. Admitted students must be able to fulfill the necessary time requirement for the practica.

Required

MLS 4114	Clinical Microbiology
MLS 4115	Parasitology and Mycology
MLS 4118	Laboratory Operations
MLS 4120	Urinalysis & Body Fluids
MLS 4124	Clinical Microbiology II
MLS 4128	Hematology I
MLS 4129	Hematology II
MLS 4140	Clinical Laboratory Mgt
MLS 4141	Immunology and Serology
MLS 4145	Clinical Biochemistry
MLS 4155	Clinical Biochemistry II
MLS 4150	Immunohematology
MLS 4151	Molecular Diagnostics
MLS 4159	Capstone Seminar
MLS 4160	Blood Bank Practicum
MLS 4161	Clinical Biochemistry Practicum
MLS 4162	Hematology Practicum

MLS 4164 Clinical Microbiology Practicum

MLS 4165 Urinalysis Practicum

MLS 4166 Coagulation Practicum

POST-BACCALAUREATE CERTIFICATE IN MICROBIOLOGY FOR MEDICAL LABORATORY SCIENCE

REQUIREMENTS

The post-baccalaureate certificate in microbiology for medical laboratory science (MLS) requires completion of 19 credits. Completion of the certificate qualifies the graduate to take the Technologist in Microbiology examination offered by national certifying agencies.

Admitted students complete required courses either on a part-time or full-time basis. Courses in the major are designed to broaden the student's foundation in the sciences in preparation for the clinical phase of the program. All courses are taught online, with the exception of the clinical practicum.

The clinical practicum is usually taken on a full-time basis upon completion of didactic coursework. Students are typically in a clinical laboratory eight hours per day (daytime hours), five days per week. Admitted students must be able to fulfill the necessary time requirement for the practicum.

Required

MLS 4114	Clinical Microbiology
MLS 4115	Parasitology and Mycology
MLS 4118	Laboratory Operations
MLS 4124	Clinical Microbiology II
MLS 4140	Clinical Laboratory Mgt
MLS 4141	Immunology and Serology
MLS 4151	Molecular Diagnostics
MLS 4164	Clinical Microbiology Practicum

Clinical rotations are completed at an approved clinical site and vary in length, lasting between 1 to 4 weeks each.

POST-BACCALAUREATE CERTIFICATE IN PRE-MEDICINE

The Post-Baccalaureate Certificate in Pre-Medicine (<http://smhs.gwu.edu/programs/postbac-premed>) is designed to provide students with the foundational coursework,

standardized test preparation, and access to real-world experience necessary for a successful medical school application. The full-time, 35 credit program on the Virginia Science and Technology Campus can be completed in a 12-month period.

Required

HSCI 3101	General Chemistry I
HSCI 3102	General Chemistry II
HSCI 3103	Organic Chemistry I
HSCI 3104	Organic Chemistry II
HSCI 3105	Biochemistry
HSCI 3201	Biology I
HSCI 3202	Biology II
HSCI 3301	Physics I
HSCI 3302	Physics II

GRADUATE CERTIFICATE IN CLINICAL RESEARCH ADMINISTRATION

REQUIREMENTS

Students in the Graduate Certificate in Clinical Research Administration (CRA) (<http://smhs.gwu.edu/crl/programs/cra>) program must successfully complete 15 credits in CRA and a 3 credit elective. All courses in this program are transferable to Master of Science in Health Sciences (MSHS) in CRA.

Required

CRA 6201	Critical Analysis Clin Rsch
CRA 6202	Medicines Development
CRA 6203	Partnerships w/Human Subjects
CRA 6204	The Clinical Research Industry
CRA 6210	MedicalWriting/ClinicalResrch

Elective

One of the following	
CRA 6208	International Clinical Rsrch
CRA 6209	Monitoring Clinical Research
HCQ 6201	Building a Quality Culture

HSCI 6263 Biostatistics Transl Research

HSCI 6264 Epidemiology Translational Res

GRADUATE CERTIFICATE IN CLINICAL RESEARCH PRACTICE

REQUIREMENTS

The graduate certificate in Clinical Research Practice capitalizes on the foundational courses of clinical research, health informatics, epidemiology, and biostatistics to prepare the graduate with the requisite knowledge and skills to conduct clinical research in collaboration with sponsored research programs. The program requires successful completion of 18 credits, including 6 credits in clinical research, 9 credits in graduate research, and 3 credits in electives.

The program of study has been drawn from the core program of study of the MSHS program (<http://smhs.gwu.edu/crl/programs/ctr/curriculum/mshs>).

Required

CRA 6201	Critical Analysis Clin Rsch
CRA 6205	Clinical Investigation
HSCI 6263	Biostatistics Transl Research
HSCI 6264	Epidemiology Translational Res
HSCI 6273	Bioinformatics for Genomics

Electives

3 credits of electives selected in consultation with the academic advisor

GRADUATE CERTIFICATE IN CLINICAL AND TRANSLATIONAL RESEARCH

REQUIREMENTS

The graduate certificate in Clinical and Translational Research has been designed to meet the professional development needs of researchers who cannot make the time commitment needed to fulfill the requirements of the full master's degree program. The program requires successful completion of 18 credits, including 6 credits of clinical research coursework and 12 credits of translational research coursework. All courses from the graduate certificate are transferable into the MSHS program (<http://smhs.gwu.edu/crl/programs/ctr/curriculum/mshs>).

The program of study has been drawn from the core program of study of the MSHS program (<http://smhs.gwu.edu/crl/programs/ctr/curriculum/mshs>).

Required

CRA 6201	Critical Analysis Clin Rsch
CRA 6205	Clinical Investigation
HSCI 6261	Fdtn in Clinical/Trans.Rsrch
HSCI 6262	Transdisciplinary Sem/Pract.
HSCI 6265	Grantsmanship in Trans Res
HSCI 6275	Transdisciplinary Rsrch Prop.

Electives

3 credits of electives selected with academic advisor

GRADUATE CERTIFICATE IN HEALTH CARE QUALITY

REQUIREMENTS

The graduate certificate in health care quality requires successful completion of 18 credits, including: 3 credits of a professional core course and 15 credits in the field of health care quality. All semester credits earned in this program are transferable to the Master of Science in Health Sciences program in Health Care Quality.

Required

HCQ 6200	Introduction to Health Care Quality
HCQ 6201	Building a Quality Culture
HCQ 6202	Health Care Quality Landscape
HCQ 6203	Quality Improvement Science
HCQ 6204	Health Care Quality Analysis
HCQ 6205	Patient Safety Systems

GRADUATE CERTIFICATE IN INTEGRATIVE MEDICINE

REQUIREMENTS

Required

HSCI 6241	The Health Care Enterprise
INTM 6201	Foundations in Integrative Medicine

INTM 6202	Self Care Methods in Integrative Medicine
INTM 6203	Nutritional Metabolism and Environmental Exposure
INTM 6204	Metabolic Networks in Integrative Medicine
INTM 6205	Clinical Genomics, Proteomics, & Metabolomics
INTM 6206	Legal and Medical Ethics in Integrative Medicine
INTM 6210	Practical Application of Integrative Medicine I

GRADUATE CERTIFICATE IN REGULATORY AFFAIRS

REQUIREMENTS

The graduate certificate in Regulatory Affairs requires successful completion of 18 credits including 15 credits in regulatory affairs and 3 credits of graduate research. All credits earned in this program are transferable to the Master of Science in Health Sciences in the field of Regulatory Affairs.

Required

HSCI 6263	Biostatistics Transl Research
RAFF 6201	Introduction to Global Regulatory Affairs
RAFF 6202	Regulatory Drug Biologics
RAFF 6203	Regulatory Device Diagnostics
RAFF 6204	Clinical Research for Regulatory Affairs
RAFF 6205	Regulatory Affairs Compliance

SCHOOL OF ENGINEERING AND APPLIED SCIENCE

Dean D.S. Dolling

Associate Deans R. Riffat, B. Narahari, C.E. Korman

The School of Engineering and Applied Science (SEAS) was organized in 1884 as the Corcoran Scientific School of Columbia University, named in honor of William W. Corcoran, president of the University's Board of Trustees from 1869 to 1888. The school was among the first to accept women for degree candidacy in engineering. While the organization and offerings of the school have evolved over the years, throughout most of its history its programs have been characterized by an emphasis on principles guiding the advancement of technology.

The School offers the Bachelor of Science, Bachelor of Arts, Master of Science, Doctor of Philosophy, Doctor of Engineering and the professional degrees of Engineer and Applied Scientist through its six departments—Biomedical Engineering, Civil and Environmental Engineering, Computer Science, Electrical and Computer Engineering, Engineering Management and Systems Engineering, and Mechanical and Aerospace Engineering. In addition, the school offers several graduate certificate programs, as well as a combined bachelor's/master's degree program.

Research centers and institutes provide opportunities for students and faculty to strengthen ties with counterparts in government and industry and contribute to the development and harnessing of emerging technology. Extensive and varied laboratories and computing facilities support the academic programs. The School strongly supports co-curricular activities to broaden and deepen its students' overall educational programs, including an extensive array of internship opportunities at government laboratories and private companies in the Washington, D.C., area and elsewhere. Other co-curricular opportunities include engineering-type team competitions, research projects, and the SEAS student government organization, the Engineers' Council.

REGULATIONS

- Undergraduate Programs (p. 442)
- Master's Programs (p. 444)
- Professional Degrees (p. 447)
- Doctoral Programs (p. 447)

Undergraduate Programs

Residence

The Residence Requirement under University Regulations (<http://bulletin.gwu.edu/university-regulations>) is applicable to all SEAS undergraduate students.

Advising

SEAS practices a hybrid advising system. Every entering undergraduate student is assigned a professional advisor to assist with the transition to the University. Faculty advisors are assigned at the end of the first year to counsel students on their programs of study, achievement and maintenance of satisfactory scholastic performance, professional development, and extracurricular activity as part of the educational process. Until all work required for the degree is completed, students must consult with their faculty advisors in all academic matters, including obtaining the advisor's approval of their program of study prior to registration for each academic semester and summer session. The faculty advisor also must approve any course that the student wishes to take at another institution before the student may register for the course. The faculty advisor represents the student in all cases requiring faculty action. However, the faculty advisor may not deny entry into any course or activity to which the student is entitled under the regulations of the School. Students may consult other members of the faculty on an informal basis.

Assignment of Transfer Credit

See Earning Transfer Credit after Matriculation under University Regulations (<http://bulletin.gwu.edu/university-regulations>).

Credit by Examination

See the Undergraduate Admissions website for information on bringing credit to GW (<https://undergraduate.admissions.gwu.edu/bringing-credit-gw>).

Mathematics Placement

All incoming first-year students are required to take a proficiency examination, which places them in either MATH 1220 or MATH 1231. Visit the math placement exam webpage (<https://math.columbia.gwu.edu/gw-mathematics-placement-test>) for more information.

Makeup of Credit for Waived Courses

Waiver of a required course requires approval of the student's faculty advisor and department chair. If a course required by the SEAS curriculum is waived, the corresponding credits must be earned by satisfactory completion of a university-level academic course, either technical or nontechnical, approved by the student's faculty advisor. The grade earned will be used in determining the SEAS GPA only if the substituted course would normally be considered part of the student's curriculum.

Scholarship Requirements

To be eligible for graduation a student in SEAS must have:

- A minimum overall GPA of 2.0.
- A minimum overall GPA of 2.0 in their SEAS program.
- A minimum GPA of 2.2 for technical courses required in the fifth through eighth semesters.

- Completed all degree and University General Education requirements.

All computer science courses taken to meet the degree requirements of the Bachelor of Arts or Bachelor of Science in computer science are considered technical for this purpose.

Academic Standing

All students are required to maintain a minimum GPA and adhere to certain grade thresholds to remain in good academic standing. Refer to Academic Standing regulations outlined under University Regulations for more information.

Incompletes

Conditions under which the symbol *I* (Incomplete) may be assigned are described under University Regulations. If the *I* is not changed to a letter grade within 30 days, decisions on probation, removal from probation, and suspension will be made with the information on hand, in conformance with SEAS regulations. Although the *I* may remain on the record for a maximum of one year, the instructor should normally set a much briefer period within which the uncompleted work (usually the final examination or required paper) must be made up. The *I* cannot be removed by the student's re-registering for the course at GW or taking its equivalent elsewhere. An *I* that is not removed after one calendar year or at the time of the student's graduation, whichever occurs first, will be changed on the permanent record to a grade of *F*. As of fall 2014, when the *I* is changed to a letter grade the letter grade will appear on the student's record. The grade for which the *I* is changed will be applied to the grade report for the semester or summer session during which the change is made for the purposes of determining probation, suspension, GPA, and Dean's and other honor lists.

Pass/No Pass Grading System

SEAS students may not take required courses on the Pass/No Pass grading system. They may, however, take courses outside their regular SEAS academic program on a *P/NP* basis.

Academic Workload

SEAS adheres to all academic workload regulations outlined under University Regulations. In exceptional cases these limits may be exceeded with the faculty advisor's approval of the student's Petition for Exception to Academic Policy (<http://www.seas.gwu.edu/forms>).

Humanities and Social Science Electives

With the assistance of the advisor, each student in a SEAS B.S. program chooses a set of elective courses in the humanities and social sciences. For most B.S. curricula, these normally consist of a minimum of 18 credits, divided equally between the humanities and social sciences. At least one of the humanities and two of the social science electives must be selected from a list of approved general education courses.

Since the SEAS curricula are, by necessity, oriented toward technical subjects, the humanities and social sciences electives should be courses that broaden the student's outlook. This includes courses in areas such as anthropology, economics, foreign languages, geography, history, literature, philosophy, political science, psychology, and sociology. A full menu of courses is available on the SEAS website (<http://www.seas.gwu.edu/forms>).

In addition, when a foreign language is taken as part of the humanities requirement, the following rules apply:

- The foreign language studied may not be a native language of the student, unless the courses taken are literature courses.
- If the student has studied the language previously, he or she must first take a placement test given by the language department concerned and enroll in a course recommended by that department.
- The advisor must approve the program.

Bachelor of Science Degree Programs

Students should consult the department concerned for total credit requirements for the degree programs. The listed curricula assume that all elective courses are offered for at least 3 credits. Credits for Lifestyle, Sport, and Physical Activity (LSPA) courses cannot be counted toward the degree.

Bachelor of Arts Degree Programs

SEAS offers a Bachelor of Arts degree with majors in applied science and technology and in computer science. Each program provides a strong and level base for students who intend to make their careers in fields allied to science and technology or computer science. The curriculum requirements for these programs can be viewed under the Undergraduate tab in this section of the Bulletin.

Special Programs

A number of combined 5-year degree programs are available to select SEAS students. These include a B.S./M.S. in civil engineering, mechanical engineering, and systems engineering; B.A. or B.S. and M.S. in computer science or in cybersecurity in computer science; B.S./M.S. in biomedical engineering, computer engineering, or electrical engineering; and B.S. in computer engineering, computer science, electrical engineering, or systems engineering and M.S. in engineering management. In addition, students may complete a 5-year degree in the following cross disciplines: B.S. in biomedical engineering and M.S. in computer engineering, B.S. in electrical engineering and M.S. in computer engineering, and B.S. in computer engineering and M.S. in electrical engineering.

Double Major

Information on declaring and graduating with a double major is outlined under University Regulations. Students who complete the requirements for two SEAS majors may graduate with a double major, provided the majors are in different

departments. SEAS students may also pursue a second major in another school in the University but must adhere to any requirements outlined by that school or department. SEAS students must consult both their SEAS faculty advisor and an advisor in the department offering the second degree. To officially declare a second major, students must complete a Declaration of Second Major (<http://www.seas.gwu.edu/forms>) form and have it signed by both their SEAS faculty advisor and the second major department advisor.

Students from other schools of the University may pursue a second major in one of the six SEAS departments. However, they must consult the department for both eligibility and curriculum requirements before planning to declare the second major. There is a limitation on how many courses may be double counted, which is outlined under University Regulations.

The degree is earned from the home school, and students must complete the major in their own school in order to graduate. In no case will a double major result in two degrees.

For more information see Double Majors and Double Counting Credits Toward Two Majors or Minors under University Regulations.

Minors

SEAS offers to all students a variety of minors, including biomedical engineering, computer engineering, computer science, and electrical engineering. The School may require students to meet certain eligibility requirement to declare the minor. SEAS also offers minors in systems engineering and mechanical engineering, which are available to SEAS students only. SEAS students may only declare a minor outside their department and must consult their faculty advisor before enrolling in a minor in another school of the University.

SEAS students who wish to declare a minor officially should complete a Declaration of Minor form (<http://www.seas.gwu.edu/forms>), which must be signed by both their SEAS faculty advisor and the minor department advisor. Depending on the student's major, additional credits beyond the minimum required for the minor may be required. Student from schools other than SEAS should email seasadvising@gwu.edu for more information about requirements and eligibility criteria before requesting to declare a minor through the department.

Internal Transfer to SEAS

Current GW students wanting to transfer to SEAS must complete all requirements outlined on the Registrar's website for Undergraduate Internal Transfers by the specified deadlines.

University Regulations

All SEAS students are required to review the University Regulations (<http://bulletin.gwu.edu/university-regulations>)

as outlined in the Bulletin, as they are responsible for understanding and adhering to this document.

Graduate Programs

Degree Programs

Fields of graduate study offered by SEAS include biomedical engineering, civil and environmental engineering, computer engineering, computer science, electrical engineering, engineering management, mechanical and aerospace engineering, systems engineering, and (at the M.S. level only) cybersecurity in computer science and telecommunications engineering. Degree requirements and representative areas of focus within each field are listed in this section of the Bulletin. In some fields, students may choose to focus their course work in other specialties as well. For information on certificate, professional and, doctoral degree studies in a given field, students should contact the relevant department.

Entrance requirements are outlined under individual degree programs. The following information pertains to all SEAS graduate and certificate programs.

Transfer of Credit

With the approval of the student's advisor and department chair, graduate credit earned at a level of study equivalent to that being pursued at GW may be transferred, when applicable, to meet degree requirements of the School. For a master's or professional degree candidate, or a doctoral candidate whose highest earned degree is a master's, up to 6 credits may be transferred. For a doctoral candidate whose highest earned degree is a bachelor's, up to 24 credits may be transferred. In all cases, credits must have been completed with a minimum GPA of 3.0 at another accredited and recognized institution. The professional and doctoral degree programs require that the credit be earned no more than five years prior to admission to the GW program, and some departments require that it be earned more recently. Credit applied toward a previously earned degree may not be transferred. Transfer of credit regulations apply to courses taken as a non-degree student through GW's Office of Non-Degree Students; that is, up to 6 credits may be taken in non-degree status before applying for admission to degree status. For purposes of transfer of credit, SEAS graduate certificate programs are not considered prior degrees. At the discretion of the department concerned, the credits earned in a SEAS certificate program may be applied to a subsequent master's degree program.

English Language Requirements for International Students

Applicants who are not citizens of countries where English is the official language or who do not hold a degree from a regionally accredited U.S. institution of higher learning are required to submit scores from the Test of English as a Foreign Language (TOEFL), the academic International English Language Testing System (IELTS), or the Pearson Test of English-Academic (PTE). Visit the SEAS Graduate

Admissions website (<http://graduate.seas.gwu.edu/admissions-requirements>) for possible exemptions from this policy. The required minimum score for admission is 550 paper-based or 80 Internet-based on the TOEFL, an overall band score of 6.0 on the IELTS with no individual band score below 5.0, or a score of 53 on the PTE. The Department of Engineering Management and Systems Engineering requires a TOEFL score of 600 paper-based or 100 internet-based, or an overall band score of 7.0 on the IELTS with no individual band score below 6.0, or a score of 68 on the PTE. Applicants for graduate teaching assistantships must have a minimum score of 600 paper-based or 100 Internet-based on the TOEFL, an overall band score of 7.0 on the IELTS with no individual band score below 6.0, or a score of 68 on the PTE.

Undergraduate and graduate international students whose TOEFL, IELTS, or PTE scores fall below established cut-off points are required to take one or more courses in the English for Academic Purposes (EAP) Program. Both undergraduate and graduate students receive credit for EAP courses; however, in most cases graduate EAP credits cannot be applied to a degree. Graduate students placed in EAP courses should anticipate additional tuition expenses as well as possible extension of time needed to complete their degree programs. For detailed information concerning this requirement consult the English for Academic Purposes Program website.

Grades

Information on grades and computing the grade-point average (GPA) is found under University Regulations (<http://bulletin.gwu.edu/university-regulations>).

Incompletes

At the option of the instructor, the symbol of *I* (Incomplete) may be recorded if a student, for reasons beyond his or her control, is unable to complete the work of the course and if the instructor is informed of and approves such reasons before the date when grades must be reported. The symbol *I* may be recorded only if the student's prior performance and class attendance in the course have been satisfactory. Any course in which a student fails to complete the work of the course and does not provide the instructor with a satisfactory explanation before the date when grades must be turned in will be graded *F*. If acceptable reasons are later presented, the instructor may initiate an appropriate grade change. Although the *I* may remain on the record for a maximum of one year, the instructor should normally set a much briefer period within which the uncompleted work must be made up. The *I* cannot be removed by the student's reregistering for the course at GW or taking its equivalent elsewhere. An Incomplete that is not removed within one calendar year or at the time of the student's graduation, whichever occurs first, is automatically changed to an *IF*. As of fall 2014, when the *I* is changed to a letter grade the *I* will be replaced by the letter grade on the transcript. Engineering Management and Systems Engineering students with two or more outstanding Incompletes are

barred from further course enrollment; see Incompletes under University Regulations regarding continuous enrollment.

Credit/No Credit Grading System

SEAS students may take SEAS courses under the credit/no credit grading system, but credit for such courses cannot be applied toward any degree program in SEAS.

Educational Planner

In consultation with the academic advisor, each student develops an Educational Planner through DegreeMAP that governs the student's degree requirements. The Educational Planner should be established soon after matriculation and must be completed before the end of the student's first semester. The Educational Planner must be approved by the advisor and department chair.

Residence and Continuous Enrollment

All work for the degree must be done in residence unless an exception is granted by the department chair. Students in a degree program are expected to be continuously enrolled in the School until the degree is conferred. To maintain continuous enrollment, students may register in one of the following categories. See Residence and Continuous Enrollment under University Regulations (<http://bulletin.gwu.edu/university-regulations>).

Leave of Absence

This status is available to students who, with special permission, are attending classes at another institution; who are temporarily transferred out of the area, e.g., for military TDY; or who are having temporary medical problems. A leave of absence is usually limited to two semesters. See Leave of Absence under University Regulations (<http://bulletin.gwu.edu/university-regulations>).

Continuing Research

Students who have completed their research credits, but are not yet ready to defend a thesis or dissertation, must register for 1 credit of SEAS 0920 (Continuing Research-Master's) each semester as appropriate.

Examination Preparation

Students who are studying for a comprehensive or qualifying examination for the current or following semester, and are not taking any courses, must register for 1 credit of SEAS 0930 (Examination Preparation) as appropriate. A student who breaks his or her registration must apply for readmission to the degree program under whatever conditions and regulations are in force at that time.

Master of Science

The M.S. degree is offered in the fields of biomedical engineering, civil and environmental engineering, computer engineering, computer science, electrical engineering,

engineering management, mechanical and aerospace engineering, systems engineering, cybersecurity in computer science, and telecommunications engineering. Each field in turn encompasses several areas of focus. The course of study responds to the unique interests of the student, who designs an individual program in close consultation with an assigned advisor. In most areas, students follow a prescribed core and approved elective courses from within SEAS and from other schools of the University. Because engineering expertise includes a broad foundation in technology, engineering students may profit from study in other academic areas to sharpen their focus in practice. Students must satisfy, through undergraduate studies or otherwise, either the prerequisites specified for the desired field or approved equivalents.

Entrance Requirements

Admission to the Master of Science degree program requires an appropriate bachelor's degree from a recognized institution and evidence of a strong academic background and capacity for productive work in the field selected. All applicants must submit scores from the Graduate Record Examination (GRE) general test, with the exception of applicants from SEAS undergraduate programs and those applying to special cohort and contract programs. In general, a minimum GPA of 3.0 (on a 4.0 scale) in the last 60 hours of undergraduate course work is required. Students must submit a statement of purpose and a minimum of two letters of recommendation, which may be from the student's advisor, faculty member(s) from the institution where the highest degree was earned, and/or workplace supervisor. Visit the Graduate Admissions website (<http://www.gwu.edu/gradapply>) for more information.

Graduation Requirements

To meet graduation requirements, courses specified in a student's Educational Planner through DegreeMAP must be completed with a minimum GPA of 3.0. This is in addition to the requirements specified for graduation under University regulations. Courses specified upon admission as deficiency or prerequisite courses do not form part of the program of study. Students who receive two grades of *F* or three grades below *B-* are barred from further enrollment in graduate courses and will not be readmitted as a degree candidate. Students may not repeat for credit a course in which they have received a grade of *C-* or above, unless required to do so by the department chair. A written statement requiring a student to repeat such a course for credit must be submitted to the registrar by the department chair. See further graduation policies under University Regulations (<http://bulletin.gwu.edu/university-regulations>).

Time Limits

Full-time students in the master's program are allowed a maximum of three calendar years from the date of first registration as a degree candidate in prerequisite or graduate courses to complete all degree requirements; this time limit excludes any time spent taking English for Academic Purposes

courses only. Part-time students in the master's program are allowed a maximum of five calendar years. The time limit does not include any period of registration as an unclassified student before admission to degree candidate status or any period spent on approved leave of absence. Students on F1 or J1 visas and students with external funding may have different time limits. Students who do not complete degree requirements within the allowed time will have their degree candidate status terminated. They may be readmitted to degree candidate status under conditions specified by the department chair and approved by the dean.

Master's Thesis

The master's thesis must demonstrate a students' ability to make independent use of the knowledge and discipline of thought acquired through graduate study, to undertake constructive work in a given field, and to communicate the results of the work in writing. Suitable work for which the student has professional responsibility may be considered, whether done on or off campus, provided no significant amount of work is completed without faculty supervision. An accepted thesis is the property of the University.

To register for the thesis course sequence, students must submit their advisor-approved thesis area to the appropriate department chair. At the beginning of the semester of expected graduation, students must submit their thesis title to the dean. Both submissions must be made on the appropriate form available in the Graduate Student Services Center. While registered in the thesis course sequence, students are entitled to the advice of the faculty member under whom the thesis is to be written. Students may consult with their advisors, but they have primary responsibility for their own thesis. Students defend their theses orally before a committee of SEAS faculty members.

Graduate Certificates

Entrance Requirements

Admission to SEAS certificate programs requires an appropriate bachelor's degree from a recognized institution and evidence of a strong academic background and capacity for productive work in the field selected. All applicants must provide an online application, statement of purpose, and resume and/or curriculum vitae. In general, a minimum GPA of 3.0 (on a 4.0 scale) in the last 60 hours credits of undergraduate course work is required. Certificate applicants are not required to submit letters of recommendation. Visit the Graduate Admissions website (<http://www.gwu.edu/gradapply>) for more information.

Graduation Requirements

In order to receive the graduate certificate students must have a minimum GPA in courses specified in their Educational Planner through DegreeMAP. Courses specified upon admission as deficiency or prerequisite courses do not form part of the program of study. Students who receives two

grades of *F* or three grades below *B–* are barred from further enrollment in graduate courses, and will not be readmitted as a candidate. Students may not repeat for credit a course in which they have received a grade of *C–* or above, unless required to do so by the department chair. A written statement requiring a student to repeat such a course for credit must be submitted to the registrar by the department chair. Additional information regarding graduation requirements may be found under University Regulations (<http://bulletin.gwu.edu/university-regulations>).

The thesis in final form must be submitted by the stated deadline. In the event a thesis is unfinished on the date specified, the student must register for SEAS 0920 (Continuing Research – Master’s). The overall time limit for earning the degree (see Time Limits, above) may not be exceeded. All theses must be submitted electronically and meet the formatting and other requirements set forth on GW’s Electronic Theses and Dissertations Submission website (<http://library.gwu.edu/etds>). Additional information regarding thesis requirements and dates may be found under University Regulations (<http://bulletin.gwu.edu/university-regulations>).

Professional Degrees

The SEAS professional degree programs are designed for those students who wish to pursue course work beyond the master’s degree with emphasis on applied subject material rather than on basic research. Successful completion of the professional degree program leads to the degree of Engineer or of Applied Scientist.

For admission to the degree of Engineer, an applicant must have earned both a bachelor’s and master’s degree in an area of engineering. For the degree of Applied Scientist, an applicant must possess a master’s degree in engineering, computer science, natural science, or mathematics. Applicants who have an equivalent quantitative background may be considered as special cases by the respective departments.

Entrance requirements may vary by department within SEAS. A minimum GPA of 3.0 in graduate work is usually required, although individual departments often set higher admission standards. Some programs have specified prerequisites. An applicant who has significant deficiencies in preparation may be required to take prerequisite courses, which do not count toward any part of the requirements for the professional degree. The Departments of Computer Science and Electrical and Computer Engineering require applicants for the professional degree to have had two years of professional experience after receiving the master’s degree. For specific entrance and application requirements see Master’s Degree.

The professional degree programs consist of a minimum of 30 credits in approved graduate-level courses beyond a master’s degree. Programs of study are determined by established prerequisites and the requirements of the department in which the student wishes to enroll. The student’s program must be approved by the faculty advisor and the department chair.

Departments may require degree candidates to undertake and defend the results of a technical design project or development problem, or to prepare a comprehensive technical report to demonstrate the candidate’s ability to make independent use of the knowledge and discipline of thought acquired through graduate study. When applicable, the student will be informed of this requirement by the faculty advisor at the time when the student’s program is being formulated. The project may not account for more than 6 credits.

If a student studying for the professional degree receives two grades of *F* or three grades below *B–*, study is terminated and further enrollment prohibited. A student must have a minimum of GPA of 3.0 in order to receive the degree. The Department of Engineering Management and Systems Engineering requires a final GPA of at least 3.4.

A full-time student in the master’s program is allowed a maximum of three calendar years from the date of first registration as a degree candidate in prerequisite or graduate courses to complete all degree requirements. A part-time student is allowed a maximum of five calendar years. The time limit does not include any period of registration as an unclassified student before admission to degree candidate status or any period spent on approved leave of absence. Students who do not complete degree requirements within the allowed time will have their degree candidate status terminated. Such students may be readmitted to degree candidate status under conditions specified by the department chair.

Doctoral Programs

Doctor of Philosophy

The doctoral program is designed to prepare students for careers of creative scholarship by providing a broad but balanced background of knowledge and guidance in the performance of research. The program is divided into two stages: the first comprises a study of related fields of learning that support the general area of research concentration and culminates in a qualifying examination; the second, composed of original research and the presentation of findings in a written dissertation, culminates in a final examination.

Admission to the Ph.D. program requires an appropriate bachelor’s or master’s degree from a recognized institution, evidence of a strong academic or relevant professional background, course work designated by the department as pertinent to the field to be studied, and capacity for research. With the exception of applicants from SEAS B.S. and M.S. programs, applicants must submit scores from the Graduate Record Examination (GRE) general test and a minimum of three letters of recommendation, at least one of which should be from the advisor and/or faculty members at the institution(s) from which a degree was earned. Students for whom the bachelor’s is the highest earned degree must have a minimum GPA of 3.3 (on a 4.0 scale) in undergraduate

work. Students for whom the master's is the highest earned degree, departmental requirements for the GPA in course work leading to that degree are as follows (on a 4.0 scale): Civil and Environmental Engineering, Electrical and Computer Engineering, and Mechanical and Aerospace Engineering—3.4; Computer Science, and Engineering Management and Systems Engineering—3.5. Consult the department concerned for field-specific admission requirements.

Upon admission to the first stage of the program—study of related fields culminating in the qualifying examination—students are assigned a faculty advisor who directs his or her studies. In some departments, a faculty committee may be appointed instead of a single advisor. Programs of study are structured to include a major field and two minor or supporting fields. Consult the department concerned for requirements.

For students who enter the program with a master's degree, the formal program of study consists of a minimum of 30 graduate-level credits. For students who enter with a bachelor's degree only, the program of study consists of a minimum of 54 graduate-level credits. These credits include both course and dissertation research credit. Individual requirements may vary by department. In many cases, particularly when the student undertakes a doctoral program in a field other than that in which the earlier degree was earned, the program of study exceeds the minimum number of credits stated above. Departments may establish a tool requirement, such as an examination in a computer language. Consult the department concerned for specific curriculum requirements.

If a doctoral student receives two grades of *F* or three grades below *B–*, graduate study is terminated and further enrollment prohibited. Courses in which the student earned grades below *B–* are not included in the total credit requirement for the degree. Students who receive any grade below *B–* are required to review their programs of study with their advisors.

In general, one year of full-time study is the minimum amount of time needed to prepare for the qualifying examination. Students should consult the individual department for specific timelines and regulations. The qualifying examination must be completed within five years of the date of admission, and the entire degree program must be completed within seven years, unless the department grants an extension. Approval of an extension is conditional on satisfactory progress. The time period for completion of the degree may be adjusted by the department for an approved leave of absence. A minimum of two years of full-time study and research should be expected. All time periods indicated here are increased by two years for students entering the doctoral program without a master's degree.

Full-time doctoral students must register for a minimum of 9 credits per semester until the minimum number of credits are completed, and 1 credit of SEAS 0940 (Continuing Research – Doctoral) each semester thereafter until satisfactory completion of the final examination. Part-time doctoral students usually

register for a minimum of 6 credits per semester until the minimum number of credits is completed, and 1 credit of Continuing Research each semester thereafter until satisfactory completion of the final examination. No minimum course load is required during the summer sessions.

Preliminary and Qualifying Examinations

The Department of Computer Science requires a preliminary examination that must be passed within four semesters of starting the program. It comprises material from the areas of algorithms and theory, and software and systems.

The Department of Electrical and Computer Engineering requires a preliminary examination that must be taken before completing 18 credits after initial registration. The examination is guided by, but not limited to, the core material of the GW master's program. Specific details regarding the structure of the exam are available in the department.

To be admitted to the qualifying examination that is required of all doctoral students, students must have a minimum cumulative GPA of 3.2 in the Departments of Civil and Environmental Engineering and Computer Science, and of 3.4 in the Departments of Mechanical and Aerospace Engineering, Engineering Management and Systems Engineering, and Electrical and Computer Engineering.

The qualifying examination is the principal means of determining whether a student will qualify as a candidate for the doctoral degree and progress to the second stage of the program. Its purpose is to ascertain whether the student's background and intellectual development are adequate to support doctoral research in the central field.

Preliminary and qualifying examinations may be written or oral or both. They are conducted on dates established by the departments and are administered by a faculty committee. Upon favorable report of the examiners following the qualifying examination, students are admitted to candidacy for the degree. Students then begin specialized study and research under the supervision of a designated member of the full-time faculty. At the discretion of the committee that prepared the examination, students who fail any part of the qualifying examination may be given a second opportunity to qualify for candidacy. Usually, the entire examination must be retaken. Students who fail to qualify for candidacy in a doctoral program of the School will be considered to have failed on a school-wide basis and will not be admitted to further doctoral study within the School.

The Dissertation and Final Examination

Students admitted to candidacy for the degree of Doctor of Philosophy choose the faculty member under whom they wish to conduct research. The faculty member may accept or reject the request to serve as the student's director of research. The research area must be approved by the director, under whom the candidate conducts dissertation research throughout the remainder of the doctoral program. Students

may consult other members of the faculty on an informal basis. In the Departments of Engineering Management and Systems Engineering and Civil and Environmental Engineering, students are required to present a written dissertation proposal to a committee of three full-time faculty members and to successfully defend the proposal in an oral defense prior to performing the bulk of their dissertation research. Work on the dissertation encompasses a minimum of 12 to 24 credits, depending on the department.

The dissertation should embody the results of extended original study and include material deemed worthy of publication in recognized scientific and engineering journals. Students are expected to attempt to have the results of the research published as soon as possible after they receive the degree and to submit copies of the published material to the dean. The Department of Computer Science requires that at least one article be accepted for publication by a refereed conference or journal prior to completion of degree requirements. The Department of Engineering Management and Systems Engineering requires that an article be accepted for review by a refereed journal prior to completion of degree requirements. The Department of Electrical and Computer Engineering requires the submission of a paper to a refereed journal and its acceptance for publication prior to the completion of degree requirements. Credit must be given in the publication to the fact that the material is abstracted, summarized, or developed from a dissertation submitted to The George Washington University in partial fulfillment of the requirements for the Ph.D.

All dissertations must be submitted electronically and meet the formatting and other requirements set forth at GW's Electronic Theses and Dissertations Submission website (<http://library.gwu.edu/etds>). Regulations regarding the form of the dissertation and preparation of the abstract are available in department offices. The dissertation, with accompanying files, becomes the property of the University.

Upon acceptance of the dissertation by the research committee, the candidate is presented for the final examination. The final examination is oral and is open to the public. The candidate must demonstrate a mastery of the special field of study and of the materials and techniques used in the research. The committee of examiners may include qualified experts brought to the University especially to participate in the examination. The director of research usually serves as advocate for the candidate. Students should consult department regulations concerning the formation of the committee and scheduling of the examination. When the examining committee is convinced of the quality and originality of the candidate's contribution to knowledge as well as his or her mastery of the scholarship and research techniques of the field, the committee recommends the candidate for the degree of Doctor of Philosophy. Students completing their degree program should refer to the sections on Eligibility for

Graduation and Participation in the Commencement Ceremony under University Regulations.

Doctor of Engineering

The School of Engineering and Applied Science is launching a new off-campus Doctor of Engineering (D.Eng.) degree program. The Doctor of Engineering program addresses the widespread need for practitioners who can apply the knowledge they gain in the program of study within a business or technical environment, wherein the constant challenge is to create useful applications of the latest engineering principles and lead organizations that are occupied in this work.

The Doctor of Engineering degree currently is offered only in Engineering Management (EM).

Doctor of Engineering in Engineering Management

The D.Eng. (EM) program demands that research be applied to the solution of a real-world problem using the latest engineering concepts and tools—in other words, research toward the D.Eng. program is applied, rather than basic. Its purpose is to empower students, who are likely to be practicing engineers, to create advanced, practice-based solutions.

Admission to the D.Eng.(EM) program requires: (1) bachelor's and master's degrees from accredited institutions in engineering, applied science, mathematics, computer science, business administration, or information technology; (2) a minimum of two college-level calculus courses passed with grades of C or better; and (3) a minimum graduate-level GPA of 3.5 (on a 4.0 scale).

The D.Eng. (EM) program consists of 45 credits divided into a classroom phase of 10 graduate-level, three-credit courses, and a research phase during which a practice-based case study is undertaken on a topic related to engineering management, chosen by the student and approved by the adviser. Research for the case study comprises 15 credits. Prospective students are advised to contact the Engineering Management and Systems Engineering Department for additional information.

Transfer Between Degree Programs

Candidates for the professional or Doctor of Philosophy degree who are in good academic standing may, with the approval of the faculty advisor and department chair, transfer from one degree program to the other within their department if they meet the qualifications and requirements specified by the department. In the Department of Engineering Management and Systems Engineering, only one such transfer is permitted.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in applied science and technology (p. 508)
- Bachelor of Arts with a major in computer science (p. 489)

- Bachelor of Science with a major in biomedical engineering (p. 454)
- Bachelor of Science with a major in civil engineering (p. 463)
- Bachelor of Science with a major in civil engineering, environmental engineering option (p. 466)
- Bachelor of Science with a major in civil engineering, medical preparation option (p. 468)
- Bachelor of Science with a major in civil engineering, sustainability engineering option (p. 469)
- Bachelor of Science with a major in civil engineering, transportation engineering option (p. 471)
- Bachelor of Science with a major in computer engineering (p. 503)
- Bachelor of Science with a major in computer science (p. 491)
- Bachelor of Science with a major in electrical engineering (p. 505)
- Bachelor of Science with a major in mechanical engineering (p. 522)
- Bachelor of Science with a major in mechanical engineering, aerospace option (p. 524)
- Bachelor of Science with a major in mechanical engineering, biomechanical option (p. 525)
- Bachelor of Science with a major in mechanical engineering, medical preparation option (p. 526)
- Bachelor of Science with a major in mechanical engineering, patent law option (p. 527)
- Bachelor of Science with a major in mechanical engineering, robotics option (p. 529)
- Bachelor of Science with a major in systems engineering (p. 509)

GRADUATE

Master's programs

- Master of Science in the field of biomedical engineering (p. 455)
- Master of Science in the field of civil and environmental engineering (p. 478)
- Master of Science in the field of computer science (p. 492)
- Master of Science in the field of computer engineering (<http://bulletin.gwu.edu/engineering-applied-science/electrical-computer-engineering/computer-engineering>)
- Master of Science in the field of cybersecurity in computer science (p. 493)
- Master of Science in the field of electrical engineering (<http://bulletin.gwu.edu/engineering-applied-science/electrical-computer-engineering/electrical-engineering>)
- Master of Science in the field of engineering management (p. 511)
- Master of Science in the field of mechanical and aerospace engineering (p. 530)
- Master of Science in the field of systems engineering (p. 513)
- Master of Science in the field of telecommunications engineering (<http://bulletin.gwu.edu/engineering-applied-science/electrical-computer-engineering/telecommunications-engineering>)
- Doctor of Philosophy (<http://bulletin.gwu.edu/engineering-applied-science/doctoral-programs>) (<http://bulletin.gwu.edu/engineering-applied-science/doctoral-programs>)
- Doctor of Engineering in the field of Engineering Management (p. 513)

Doctoral programs

CERTIFICATES

The School of Engineering and Applied Science offers graduate certificate programs in several fields. At the discretion of the respective departments, credit earned in the certificate program can be applied to a subsequent master's degree program. Scholarship requirements are the same as those for the master's degree program. Details are available in the Office of the Dean.

- Graduate certificate in computer-integrated design in mechanical and aerospace engineering
- Graduate certificate in computer security and information assurance
- Graduate certificate in emergency management and public health
- Graduate certificate in energy engineering and management
- Graduate certificate in engineering and technology management
- Graduate certificate in enterprise information assurance
- Graduate certificate in environmental engineering
- Graduate certificate in geoenvironmental engineering
- Graduate certificate in greenhouse gas management (p. 514)
- Graduate certificate in high-performance computing (p. 506)
- Graduate certificate in homeland security emergency preparedness and response
- Graduate certificate in knowledge and information management
- Graduate certificate in structural engineering
- Graduate certificate in systems engineering
- Graduate certificate in transportation engineering

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
- Applied Sciences (APSC) (p. 908)
- Biomedical Engineering (BME) (<http://bulletin.gwu.edu/courses/bme>)
- Civil Engineering (CE) (p. 934)
- Computer Science (CSCI) (p. 1014)
- Electrical and Computer Engineering (ECE (p. 1046)) (p. 1046)
- Engineering Management and Systems Engineering ((p. 1056)EMSE (p. 1056))
- Mechanical and Aerospace Engineering ((p. 1194)MAE (p. 1194))
- School of Engineering and Applied Sciences ((p. 1292)SEAS (p. 1292))

BIOMEDICAL ENGINEERING

OVERVIEW

Mission

The mission of the Department of Biomedical Engineering is to motivate and inspire students by providing high-caliber, fully integrated programs to prepare them to lead and participate in advancing the state of the art in health care technologies. In addition, graduates earn advanced degrees and further knowledge in the discipline by actively pursuing scholarly research for publication and dissemination.

Biomedical Engineering Program Educational Objectives

The biomedical engineering program prepares graduates who achieve employment in biomedical and related industry, government, or organizational fields using skills and knowledge learned while an undergraduate student as evidenced by:

- Employment history and/or career advancement
- Professional visibility (e.g., patents, invention disclosures, honors or awards, refereed journal articles, conference papers and other publications, involvement in professional associations)

- Entrepreneurial activities

Student Outcomes

The Department of Biomedical Engineering aims to produce graduates who have the ability to:

- Apply knowledge of mathematics, science, and engineering
- Design and conduct experiments, as well as to analyze and interpret data
- Design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- Function on multidisciplinary teams
- Identify, formulate, and solve engineering problems
- Understand professional and ethical responsibility
- Communicate effectively
- Understand the impact of engineering solutions in a global, economic environment
- Engage in life-long learning necessary to thrive in the profession
- Keep abreast of contemporary issues while maintaining breadth and depth of knowledge
- Use the techniques, skills, and modern engineering tools necessary for engineering practice

UNDERGRADUATE

Bachelor's program

- Bachelor of Science with a major in biomedical engineering (p. 454)

GRADUATE

Master's program

- Master of Science in the field of biomedical engineering (p. 455)

Doctoral program

- Doctor of Philosophy in the field of biomedical engineering (p. 456)

FACULTY

Professors I. Efimov (Chair), M. Kay, Z. Li, M. Loew, J. Zara, V. Zderic

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work

- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

BME 1010. Introduction to Biomedical Engineering. 1 Credit.

Basic and emerging concepts in electrical, computer, and biomedical engineering. Hands-on experiments and projects. Introduction to the professional literature and available resources and to technical writing, speaking, and presentation skills. (Fall).

BME 1020. Introduction to Biomedical Engineering. 1 Credit.

Continuation of BME 1010. Basic and emerging concepts in electrical, computer, and biomedical engineering. Hands-on experiments and projects. Introduction to the professional literature and available resources and to technical writing, speaking, and presentation skills. Prerequisite: BME 1010. (Same as ECE 1020) (Spring).

BME 2810. Biomedical Engineering Seminar I. 1 Credit.

BME 2810 and BME 2815 are taken in sequence by students in the biomedical engineering major. Overview of the field of biomedical engineering, including biomechanics, bioinformatics, telemedicine, instrumentation, and medical imaging. Prerequisite: BME 1020. (Fall).

BME 2815. Biomedical Engineering Seminar II. 1 Credit.

BME 2810 and BME 2815 are taken in sequence by students in the biomedical engineering major. Overview of the field of biomedical engineering, including biomechanics, bioinformatics, telemedicine, instrumentation, and medical imaging. (Fall and spring).

BME 2820. Biomedical Engineering Programming I. 3 Credits.

Introduction to Matlab Programming and fundamentals of programming in general with a focus on biomedical engineering problems. Functions, input/output, selection statements, loop statements, string manipulation, and debugging techniques will be covered; manipulation of vectors and matrices and the use of vectorized code. (Fall).

BME 2825. Biomedical Engineering Programming II. 3 Credits.

Introduction to C Programming and fundamentals of data structures with a focus on biomedical engineering problems; the use of data structures, pointers, and linked lists and discuss concepts such as binary trees and sorting algorithms. Students are expected to understand the basics of programming concepts such as the use of functions, input/output, selection statements, loop statements, string manipulation, and debugging techniques are understood, but no prior knowledge of C is required. Prerequisite: BME 2820; equivalent course may be substituted at instructor's discretion. (Fall).

BME 3820. Principles and Practice of Biomedical Engineering. 4 Credits.

Introduction to engineering principles applicable to medicine; medical measurements for clinical use and research; anatomy and physiology of the human body from system and cellular approaches. Principles of biomedical engineering are reinforced by determining and analyzing physiological measurements in laboratory exercises. Prerequisites: ECE 2110 and APSC 2113. (Fall).

BME 3907. Special Topics in Biomechanical Engineering. 3 Credits.

Topics vary by semester. May be repeated for credit if topic differs. See the Schedule of Classes for more details. (Fall, spring, and summer).

BME 3910. Capstone Design Preparation. 1 Credit.

Elements of project design; formulation of project ideas.

Prerequisites: BME 2810, BME 2815. (Same as ECE 3910) (Fall).

BME 3915W. Biomedical Engineering Capstone Project Lab I. 1 Credit.

BME 3915, BME 4920, and BME 4925 are taken in sequence by departmental majors beginning in the second semester of the junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project. Prerequisite: BME 3910. (Same as ECE 3915W) (Spring).

BME 4820. Anatomy and Physiology for Engineers. 3 Credits.

Human anatomy and physiology from an engineering viewpoint. Analysis of functions of major physiological systems. Biopotentials, mechanics, gas exchange, chemical balance, electrical and chemical signaling, nervous control, voluntary and reflex factors. (Same as BME 6820) (Fall).

BME 4825. Biomedical Properties Laboratory. 1 Credit.

Introduction to biophysical concepts in a laboratory setting. Experiments are included from the random walk model of diffusion, macroscopic diffusion processes, optical extinction in tissue, carrier-mediated transport (CMT), spectroscopy, hearing measurement, DNA identification, bioinformatics, and data mining. (Spring).

BME 4830. Introduction to Medical Imaging Methods. 3 Credits.

Common imaging modalities, including ultrasound, X-ray, MRI, CT, SPECT, and PET. Overview of linear systems, basic properties of an imaging system, the physics and instrumentation behind each modality, and their respective advantages, disadvantages, and applications. May be taken for graduate credit. Prerequisites: ECE 3220, BME 3820. (Spring).

BME 4920W. Biomedical Engineering Capstone Project Lab II. 3 Credits.

BME 3915, BME 4920, and BME 4925 are taken in sequence by departmental majors beginning in the second semester of the junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project. (Fall).

BME 4925W. Biomedical Engineering Capstone Project Lab III. 2 Credits.

BME 3915, BME 4920, and BME 4925 are taken in sequence by departmental majors beginning in the second semester of the junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project. (Spring).

BME 4990. Research. 1-3 Credits.

Applied research and experimentation projects, as arranged. Prerequisites: junior or senior status. (Fall and spring).

BME 6045. Special Topics. 1-3 Credits.

Topics to be announced in the Schedule of Classes. (Fall and spring).

BME 6050. Research. 1-12 Credits.

Applied research and experimentation projects, as arranged. May be repeated for credit.

BME 6065. Colloquium. 0 Credits.

Lectures by outstanding authorities in biomedical engineering. Topics to be announced each semester. (Fall and spring).

BME 6481. Regulatory Law for Medical Devices. 3 Credits.

An introduction to legal issues pertinent to medical device regulation; device classification, general and special controls, quality system regulation, 510(k) submissions, premarket approval applications (PMAs), clinical trials, investigational device exemptions (IDEs) and medical device reporting (MDR), recalls, labeling and advertising, enforcement, and emerging legal issues. Pharmaceutical regulation. (Fall).

BME 6482. Medical Measurements. 3 Credits.

Theory of measurements in biological areas and techniques for electronic measurements on biological specimens. Experiments in acquisition, processing, and measurement of physiological signals, ECG, EEG, and EMG. (Fall).

BME 6483. Medical Instrumentation Design. 3 Credits.

The medical device design process and many of its key aspects, including needs assessment, regulatory processes and concerns, intellectual property, patient safety, and market analysis. Prerequisites: BME 6482. (Spring).

BME 6484. Biomedical Signal Analysis. 3 Credits.

Origin, acquisition, and analysis of physiological signals. Deterministic and probabilistic modeling; fitting models; sequences and time series. Feature extraction from EEG and ECG; Fourier analysis and filtering; modeling. Noise and artifact removal and signal compensation. Prerequisites: BME 6482. (Spring).

BME 6485. Medical Imaging I. 3 Credits.

Principles of projection radiography, fluoroscopy, tomography, ultrasound and nuclear sources; biomagnetic imaging. Source and object; recorder resolution and noise; scatter and attenuation. Ultrasound techniques and instrumentation, including physics of ultrasound, transducers, ultrasound imaging, hemodynamics, Doppler techniques. Prerequisite: BME 4830. (Fall).

BME 6486. Clinical Medicine for Engineers. 3 Credits.

Overview of clinical medicine with emphasis on those areas most affected by engineering and technology. Prerequisites: BME 6482. (Spring, even years).

BME 6487. Rehabilitation Medicine Engineering. 3 Credits.

Cross-sectional view of those areas of medicine most involved with the treatment of handicapped individuals. Application of engineering theory and techniques to the rehabilitation of handicapped individuals. Major problem areas and general solutions, solutions to some specific problems. Prerequisites: BME 6482. (Spring, odd years).

BME 6820. Anatomy and Physiology for Engineers. 3 Credits.

Human anatomy and physiology from an engineering perspective. Analysis of functions of major physiological systems. Biopotentials, mechanics, gas exchange, chemical balance, electrical and chemical signaling, nervous control, voluntary and reflex factors. (Same as BME 4820) (Fall).

BME 6840. Digital Image Processing. 3 Credits.

Properties of images and visual systems. Image acquisition, sampling, quantization. One- and two-dimensional image transform techniques; enhancement and restoration. Image coding and data compression. Segmentation, representation, boundary and shape, texture, matching. Image understanding. Prerequisites: ECE 6800. (Same as ECE 6840) (Spring, odd years).

BME 6842. Image Engineering. 3 Credits.

Sensor/camera design and analysis as a system. Detection and noise processes underlying the sensing of optical radiation; the engineering and physics of image formation. Topics covered include radiometry/photometry, optics and image formation, device and camera characterization, and image quality metrics and system design trades. Prerequisites: ECE 6010, ECE 6015. (Same as ECE 6842) (Fall).

BME 6850. Pattern Recognition. 3 Credits.

Random vectors, transformations. Hypothesis testing, error probability: bias, variance, and sample size, resampling; sequential methods. Bayes, other linear classifiers. Discriminant functions, support vector machines, maximum-likelihood and parameter estimation, dimensionality reduction. Nonparametric methods; unsupervised learning and clustering; feature selection and ordering. Applications in industry and medicine. Student projects. Learning is reinforced by homework problems and in-class and at-home computer examples. Prerequisites: ECE 6015. (Same as ECE 6850) (Fall, spring, and summer).

BME 6885. Computer Vision. 3 Credits.

Image processing; edge detection, segmentation, local features, shape and region description in 2D and 3D. Insights from human vision studies. Representation for vision: object models, synthetic images, matching, gaps, algorithms. Interference, production system, syntactic networks. Planning spatial reasoning for robot vision. Prerequisites: BME 6840 or ECE 6840 or equivalent. (Same as ECE 6855) (Fall, spring, and summer).

BME 6998. Thesis Research. 3 Credits.

Thesis research. (Fall and spring).

BME 6999. Thesis Research. 3 Credits.

Thesis research. (Fall and spring).

BME 8999. Dissertation Research. 0-12 Credits.

Limited to Doctor of Philosophy candidates. May be repeated for credit. (Fall, spring, and summer).

BACHELOR OF SCIENCE WITH A MAJOR IN BIOMEDICAL ENGINEERING

The Department of Biomedical Engineering offers an Accreditation Board for Engineering and Technology (ABET) accredited bachelor's degree in biomedical engineering. The curriculum provides students the opportunity to select a subset of courses to suit their interests and needs through a variety of technical electives. These electives include courses in leading-edge biomedical engineering topics, as well as advanced courses in computer science, electrical engineering, mechanical engineering, cell biology, physiology, and the physical sciences and mathematics.

Visit the program website (<http://www.bme.seas.gwu.edu/programs-degrees>) for additional information.

REQUIREMENTS

Recommended program of study

First semester

BISC 1111	Introductory Biology: Cells and Molecules *
BME 1010	Introduction to Biomedical Engineering
CHEM 1111	General Chemistry I *
MATH 1231	Single-Variable Calculus I *
SEAS 1001	Engineering Orientation
UW 1020	University Writing *

Second semester

BISC 1112	Introductory Biology: The Biology of Organisms *
-----------	--

BME 1020	Introduction to Biomedical Engineering
CHEM 1112	General Chemistry II *
MATH 1232	Single-Variable Calculus II *
PHYS 1025	University Physics I with Biological Applications *

Third semester

APSC 2113	Engineering Analysis I
BME 2810	Biomedical Engineering Seminar I
ECE 2110	Circuit Theory
MATH 2233	Multivariable Calculus *
PHYS 1026	University Physics II with Biological Applications *

Fourth semester

BME 2815	Biomedical Engineering Seminar II
ECE 1120	C Programming for ECE
ECE 2115	Engineering Electronics
ECE 2140	Design of Logic Systems I
ECE 2210	Circuits, Signals, and Systems
Humanities or social sciences elective **	

Fifth semester

BME 3820	Principles and Practice of Biomedical Engineering
BME 4820	Anatomy and Physiology for Engineers
ECE 1125	Data Structures&Algorithms ECE
ECE 3220	Intro to Digital Signal Proces
Technical elective	

Sixth semester

APSC 3115	Engineering Analysis III
BME 3915W	Biomedical Engineering Capstone Project Lab I
Two humanities or social sciences electives **	
Two technical electives	

Seventh semester

BME 4920W	Biomedical Engineering Capstone Project Lab II
MAE 4168	Intro. to Biomaterials
PHYS 2127	Biophysics: Macroscopic Physics in the Life Sciences
Humanities or social sciences elective **	
Technical elective	
Eighth semester	
BME 4925W	Biomedical Engineering Capstone Project Lab III
PHIL 2135	Ethics in Business and the Professions
PHYS 2128	Biophysics: Microscopic Physics in the Life Sciences
Humanities or social sciences elective **	
Technical elective	

*Course satisfies the university general education requirement in math, science, and writing.

**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 29); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list (p. 29); the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list. (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf)

All technical electives must be approved by the academic advisor.

MASTER OF SCIENCE IN THE FIELD OF BIOMEDICAL ENGINEERING

The Department of Biomedical Engineering administers the Master of Science degree in the field of biomedical engineering. Both thesis and non-thesis options are available.

The program is designed to prepare students to apply engineering principles to problems in medicine and biology, to understand and model multiple attributes of living systems, and to synthesize biomedical systems and devices. Students choose between two areas of focus: medical imaging and medical instrumentation. The program is offered on the main

campus in Foggy Bottom, with the School of Engineering and Applied Science and the GW School of Medicine and Health Sciences and Hospital separated by just one city block. Students entering the program must have a bachelor's degree in biomedical engineering (or closely related field) and be adequately prepared in the basic physical sciences and mathematics. Depending on the field of study of the incoming student, deficiency courses may be assigned by the student's academic advisor.

Specific admission requirements are shown on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

Visit the program website (<http://www.bme.seas.gwu.edu/master-science-biomedical-engineering>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 12 credits in required courses and 18 credits in electives.

Students select one of the following areas of focus to receive the Master of Science degree in biomedical engineering:

Medical Imaging

Required

BME 4830	Introduction to Medical Imaging Methods
----------	---

BME 6065	Colloquium
----------	------------

BME 6482	Medical Measurements
----------	----------------------

BME 6484	Biomedical Signal Analysis
----------	----------------------------

Two of the following:	
-----------------------	--

BME 6842	Image Engineering
----------	-------------------

BME 6485	Medical Imaging I
----------	-------------------

BME 6486	Clinical Medicine for Engineers
----------	---------------------------------

BME 6487	Rehabilitation Medicine Engineering
----------	-------------------------------------

Electives

15 credits selected in consultation with program director and can include 6 credits of thesis research	
--	--

Medical Instrumentation

Required

BME 6065	Colloquium
----------	------------

BME 6482	Medical Measurements
----------	----------------------

BME 6483	Medical Instrumentation Design
BME 6484	Biomedical Signal Analysis
Two of the following:	
BME 6486	Clinical Medicine for Engineers
BME 6487	Rehabilitation Medicine Engineering
BME 6842	Image Engineering
Electives	

Remaining credits selected in consultation with program director and can include 6 credits of thesis research

A maximum of three BME courses at the 3000 and 4000 level may be counted toward the requirements for the degree, provided that an indication of "May be taken for graduate credit" is in the course description.

DOCTOR OF PHILOSOPHY IN THE FIELD OF BIOMEDICAL ENGINEERING

Program Overview

The doctoral program in Biomedical Engineering is designed to prepare students for a career of creative scholarship by providing a broad but balanced background of knowledge and guidance in the performance of research. This interdisciplinary program provides course work and research that draw on resources from across the School of Engineering and Applied Science. Existing research partnerships with GW's School of Medicine and Applied Sciences and Hospital, as well as NIH and U.S. FDA, offer unique research opportunities and laboratory facilities.

Areas of Focus

There are a number of areas in which program students focus their dissertation research. These include cardiac electrophysiology, therapeutic ultrasound and drug delivery, image analysis and image processing, medical imaging and computer-aided diagnosis, and microfluidics and lab-on-a-chip technology.

Specific admission requirements are shown on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

Visit the program website (<http://www.graduate.seas.gwu.edu/programs/biomedical-engineering>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: completion of a minimum of 30 credits in a formal program of study at the graduate level beyond master's study or, for students without a master's degree, a minimum of 54 credit hours in

a formal program of study at the graduate level beyond the baccalaureate. In some cases, particularly when the student undertakes a doctoral program in a field other than that in which the earlier degree was earned, the program of study exceeds the minimum number of credit hours.

No specific courses are required; the student and advisor design the curriculum to meet the student's needs and goals.

CIVIL AND ENVIRONMENTAL ENGINEERING

Mission Statement

The mission of the Department of Civil and Environmental Engineering is to provide an academic environment where professional education can be pursued, scholarly research in science and technology can be conducted, and the interest of the public can be served through the advancement of knowledge.

In pursuit of this mission the administration, faculty, and staff join to provide a broad-based, rigorous professional education in civil engineering at the undergraduate level; a graduate education at the master's level in major areas of civil engineering; and doctoral programs in selective areas of excellence within civil engineering.

Educational Objectives of the Bachelor of Science Program

The civil engineering undergraduate program of study prepares its graduates with the following capabilities necessary to attain career and professional accomplishments:

- **Technical knowledge:** students are able to use their technical knowledge and expertise in mathematics, science, and engineering to identify, formulate, and solve problems involving design, experimentation, and analysis of a wide variety of civil engineering applications.
- **Team skills:** students develop leadership skills, demonstrate proficiency in all forms of communication, and perform well in a multidisciplinary team environment.
- **Continuous education:** students recognize the need for continuing their education through graduate studies, continuous education opportunities, and/or self-education.
- **Professionalism:** students are prepared to exercise the highest standards of personal and professional integrity, demonstrate an understanding of the ethical and professional issues related to the procurement of work, and provide coordination between the design and construction aspects of the civil engineering profession.

These objectives are accomplished through a rigorous curriculum that emphasizes fundamentals in basic sciences, mathematics, humanities, and engineering in five major areas of civil engineering: environmental engineering, geotechnical engineering, structural engineering, water

resources engineering, and transportation engineering. The curriculum enables students to use modern engineering tools to work both individually and in teams. The curriculum contains a well-structured set of courses that enable students to develop the required analytical, experimental, and design skills.

Educational Outcomes of the Bachelor of Science Program

The civil engineering undergraduate program of study prepares its graduates so that they have the following capabilities for career and professional advancement:

- Apply knowledge of mathematics, science, and engineering; design and conduct experiments and analyze and interpret data;
- Design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, health and safety, manufacturability, and sustainability constraints;
- Identify, formulate, and solve engineering problems;
- Use the techniques, skills, and modern engineering tools necessary for engineering practice;
- Function on multidisciplinary teams; and
- Communicate effectively.

Students are provided with the broad education necessary to understand the impact of engineering solutions in a global economic, environmental, and social context; a knowledge of contemporary issues; an understanding of professional and ethical responsibility; and a recognition of the need for and ability to engage in lifelong learning.

The civil engineering undergraduate program curriculum includes coverage of proficiency in mathematics through differential equations, probability and statistics, calculus-based physics, and general chemistry; proficiency in a minimum of four recognized major civil engineering areas; the ability to conduct laboratory experiments and to critically analyze and interpret data in more than one of the recognized major civil engineering areas; the ability to perform civil engineering design by means of design experiences integrated throughout the professional component of the curriculum; and an understanding of professional practice issues such as procurement of work, bidding versus quality-based selection processes, how the design professionals and the construction professions interact to construct a project, the importance of professional licensure and continuing education, and/or other professional practice issues.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Science with a major in civil engineering (p. 463)
- Bachelor of Science with a major in civil engineering, environmental engineering option (p. 466)

- Bachelor of Science with a major in civil engineering, medical preparation option (p. 468)
- Bachelor of Science with a major in civil engineering, sustainability option (p. 469)
- Bachelor of Science with a major in civil engineering, transportation engineering option (p. 471)

Combined programs

- Combined Bachelor of Science with a major in civil engineering and Master of Science in the field environmental engineering (p. 473)
- Combined Bachelor of Science with a major in civil engineering and Master of Science in the field structural engineering (p. 475)
- Combined Bachelor of Science with a major in civil engineering and Master of Science in the field transportation engineering (p. 476)

GRADUATE

Master's program

- Master of Science in the field of civil and environmental engineering (p. 478)

Doctoral program

See the School of Engineering and Applied Science for programs leading to the doctoral degree.

CERTIFICATE

The department offers graduate certificate programs in environmental engineering, geoenvironmental engineering, structural engineering, and transportation engineering.

FACULTY

Professors K.H. Digges (*Research*), A. Eskandarian, M.I. Haque, S. Lerman, M.T. Manzari (*Chair*), R. Riffat, K. Roddis

Associate Professors S.S. Badie, P.F. Silva

Assistant Professors L. Farhadi, S.H. Hamdar, T. Li, D. Shuai

Professorial Lecturers M.O. Critchfield, G.C. Everstine, K. Garrahan, F. Sadek

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students

- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CE 1010. Introduction to Civil and Environmental Engineering. 1 Credit.

An introduction to the profession of civil and environmental engineering. Field visits and laboratory exercises complement classroom instruction. (Fall).

CE 1020. Introduction to a Sustainable World. 1 Credit.

The science underlying the basic processes that gave rise to the world we live in and that maintain its viability for human life. Ecosystem-functioning environmental issues, such as greenhouse gas emission and ozone, with current efforts to resolve them. Technological innovations in the context of sustainability.

CE 1098. Variable Topics. 1-36 Credits.

CE 2210. Engineering Computations. 3 Credits.

Numerical methods for engineering applications. Methods for solving systems of linear equations, root finding, curve fitting, and data approximation. Numerical differentiation and integration and numerical solution of differential equations. Computer applications. Prerequisites: CSCI 1121, APSC 2113. (Spring).

CE 2220. Introduction to the Mechanics of Solids. 3 Credits.

Stress and strain, axial load problems, torsion, shear force and bending moment, pure bending of beams, shearing stresses in beams, compound stresses, analysis of plane stress and plane strain, combined stresses, deflection of beams, statically indeterminate problems, columns, energy methods. Prerequisite: APSC 2057, APSC 2113.

CE 2510. Environmental Sustainability. 3 Credits.

An introduction to environmental sustainability with focus on the nexus of water, energy, and climate; energy demands of water systems, water footprints of energy generation, and how the two valuable resources are limiting each other; technologies and research frontiers toward a sustainable water and energy supply.

CE 2710. Introduction to Transportation Engineering. 3 Credits.

Transportation system components; roadway traffic capacity and network performance measures; signalized and unsignalized intersections; monitoring techniques, instruments and data processing. Sustainability issues and environmental impact of transportation systems with focus on urban design, planning and regulation. Prerequisites: Math 2233. (Spring).

CE 3110W. Civil Engineering Materials. 2 Credits.

Mechanical properties and behavior of civil engineering materials such as metals, concrete, and fiber-reinforced polymer composites. Properties range from plastic deformations of metallic materials to crushing of confined and unconfined concrete. Basis of the strength of materials. Concepts of creep, fatigue, fracture, and crack propagation. Prerequisite: CE 2220. (Fall).

CE 3111W. Civil Engineering Materials Lab. 1 Credit.

Measurement of stress-strain characteristics and study of failure modes in ductile steel, brittle concrete, and anisotropic composite materials. Experiments include data collection, data analysis, and interpretation and presentation of results regarding tension, compression, bending, impact, and shear properties. Prerequisite or corequisite: CE 3110W. Prerequisites: CE 3110W. (Fall).

CE 3140. Sustainability in Engineering Materials. 2 Credits.

Sustainable engineering: overall materials energy needs/properties and impacts; load resistance and aging, thermodynamics, water conservation, heat transfer, use of energy-efficient materials in construction, life-cycle assessment. Prerequisite: CE 3110, CE 3111.

CE 3230. Structural Theory I. 3 Credits.

Theory of statically determinate structures; stability and determinacy; influence lines and moving loads. Analysis of beams, frames, trusses, and arches. Calculation of deflections. Prerequisites: CE 2210, CE 2220. (Fall).

CE 3240. Structural Theory 2. 3 Credits.

Theory of statically indeterminate structures using matrix methods and classical approaches such as moment distribution and slope-deflection; influence lines; energy methods. Prerequisite: CE 3230.

CE 3310. Reinforced Concrete Structures. 3 Credits.

Properties of concrete and reinforcement; design of flexural reinforcement, shear reinforcement; development of reinforcement; design of columns, floor slabs; ethics and professionalism in design. A design project, including the use of computer software and a detailed report, is required. Prerequisite or corequisite: CE 3240.

CE 3520. Environmental Engineering I: Water Resources and Water Quality. 3 Credits.

Physical and chemical analyses of water quality and characteristics. Microbiology of water and pathogens. Introduction to water treatment processes involving coagulation, flocculation, filtration, and disinfection. Prerequisite or corequisite: CE 3610.

CE 3521. Environmental Engineering Laboratory. 1 Credit.

Laboratory experiments for physical and chemical analyses of water and wastewater. Measurement of turbidity, alkalinity, dissolved oxygen, BOD, COD, suspended solids, and optimum coagulant dose using jar tests. Corequisite: CE 3520.

CE 3610. Hydraulics. 3 Credits.

Fluid statics: pressure forces, buoyancy, and flotation. Application of kinematic principles; flow fields, stream tubes, and flow nets. Fluid dynamics: applications to pipe flow, hydraulic models, measurement of pressure, and velocity. Open channel flow: applications to water resources engineering. Prerequisite: MAE 3126.

CE 3611. Hydraulics Laboratory. 1 Credit.

Laboratory experiments and demonstrations of hydraulics in pipe and open-channel flow. Topics include center of pressure, floating bodies, Bernoulli's theorem, discharge coefficients, velocity profile, and head losses. Prerequisite or corequisite: CE 3610.

CE 3720. Highway Engineering and Design. 3 Credits.

Road vehicle performance. Principles of highway design: horizontal and vertical alignments, roadside design; drainage and drainage structures, earthwork, intersections, interchanges, parking facilities; basic traffic models; highway materials. Application of safety standards. Prerequisite: MATH 2233; prerequisite or corequisite: APSC 3115 and CE 2220.

CE 3730. Sustainable Urban Planning Dynamics. 3 Credits.

Human and physical processes shaping urban environments; human-environment interactions in the context of an urban region; urban design, materials, transport, planning, and regulation. Prerequisite: CE 2710.

CE 4320. Metal Structures. 3 Credits.

Principles of the design of metal structures, structural elements, connections, specific problems of analysis including the use of computer software, methods of construction, professionalism in design. Prerequisite: CE 3240.

CE 4330W. Contracts and Specifications. 2 Credits.

Law of contracts, construction contracts, specifications, bidding, insurance and bonds, professional liability, arbitration of disputes, litigation. Prerequisite: junior standing.

CE 4340. Design and Cost Analysis of Civil Engineering Structures. 0-3 Credits.

Total structural systems concepts. Design of civil engineering structures such as piers, wharves, bulkheads, offshore platforms, dams, and other special structures. Principles of cost analysis for timber, steel, and reinforced concrete structures. Project and report are required. Prerequisites: CE 3310, CE 4320, CE 4410. (Spring).

CE 4410. Introduction to Geotechnical Engineering. 3 Credits.

Soils and rock formation, soil composition, permeability, seepage and flow net analysis, stresses in soil medium, consolidation and settlement, shear strength of soil, analysis of lateral earth pressures, soil compaction. Prerequisite: CE 2220, MAE 3126.

CE 4411. Geotechnical Engineering Laboratory. 1 Credit.

Laboratory experiments to evaluate liquid and plastic limits, grain-size distribution, shear strength, compressibility, permeability, and moisture-density relationship of soils. Prerequisite or corequisite: CE 4410.

CE 4450. Introduction to Geo-environmental Engineering. 3 Credits.

Characterization of soils and wastes, engineering properties of soils and geo-synthetics, fundamental concepts of fate and transport of contaminants, common practice in design and construction of waste containment systems, current methods for remediation of contaminated groundwater and soils. Prerequisite: CE 3520, CE 4410.

CE 4530. Environmental Engineering II: Water Supply and Pollution Control. 3 Credits.

Introduction to wastewater treatment systems including clarification, suspended and attached growth processes. Use of dissolved oxygen models. Water supply and wastewater collection systems, applied hydraulics of pipelines and pumps. Planning to meet quality needs and regulatory requirements. Prerequisite: CE 3520.

CE 4620. Hydrology and Hydraulic Design. 3 Credits.

Descriptive hydrology: hydrologic cycle, precipitation, stream flow, evaporation, and transpiration. Quantitative hydrology: hydrograph analysis, hydrographs of basin outflow, storage routing. Probability concepts in hydrology: flood frequency, rainfall frequency, stochastic hydrology. Culverts and stilling basins. Prerequisite or corequisite: APSC 3115, CE 3610.

CE 4810. Research. 1-3 Credits.

Applied research and experimentation projects, as arranged. Prerequisite: junior or senior status.

CE 4820. Special Topics. 1-6 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

CE 6101. Numerical Methods in Engineering. 3 Credits.

Eigenvalue problems. Numerical solution of systems of equations and ordinary differential equations. Solution techniques for elliptic, parabolic, and hyperbolic partial differential equations. Numerical methods for solving finite element equations. Introduction to solution of fluid-flow problems. Prerequisite: CE 2210.

CE 6102. Application of Probability Methods in Civil Engineering. 3 Credits.

Uncertainty in real-world information; basic probability concepts and models; random variables; useful probability distributions, statistical estimation of distribution parameters from observed data; empirical determination of distribution models; testing hypothesis; regression and correlation analyses; decision theory. Prerequisite: APSC 3115.

CE 6201. Advanced Strength of Materials. 3 Credits.

Deflection of beams using singular functions, unsymmetrical bending of beams, beams on elastic foundation. Beam-column problems, shear center for thin-walled beam cross sections, curved beams. Applications of energy methods, torsion, basic equations for theory of elasticity, thin- and thick-walled cylinders, stress concentration, and failure criteria. Prerequisites: CE 2220, CE 3240. (Spring).

CE 6202. Methods of Structural Analysis. 3 Credits.

Modern methods of analysis of statically indeterminate structures, matrix analysis based on flexibility, stiffness, energy and variational methods, substructuring techniques; consideration of plastic collapse of structures; introduction to the finite element method. Prerequisites: CE 2220, CE 3240. (Fall).

CE 6203. Reliability Analysis of Engineering Structures. 3 Credits.

Probability theory, theory of structural reliability, probabilistic analysis of strength and loads, risk and reliability function, empirical distribution, probability plot. The design service life, method of perturbation, Monte Carlo simulation. Fatigue and fracture, proof testing, inspection and repair-replacement maintenance. Prerequisite: APSC 3115.

CE 6204. Analysis of Plates & Shells. 3 Credits.

Bending and stretching of thin elastic plates under loading with various boundary conditions, continuous plates and plates on elastic foundations, theory of folded-plate structures. Theory of curved surfaces; general linear bending theory and its simplification to membrane theory; bending stresses in shells of revolution, shallow-shell theory. Prerequisites: CE 2220, CE 3240. (Spring, odd years).

CE 6205. Theory of Structural Stability. 3 Credits.

General criteria for stability, buckling of elastic and inelastic columns and frames, torsional and lateral buckling, variational methods. Buckling of plates and shells under static loads, stability of stiffened structures, effect of imperfections and boundary conditions. Prerequisites: CE 2220, CE 3240. (Fall).

CE 6206. Continuum Mechanics. 3 Credits.

Introduction to the mechanics of continuous media. Tensor calculus; kinematics; stress and stress rate, conservation of mass, conservation of linear and angular momentum, energy balance, second law of thermodynamics; constitutive theory; linear and nonlinear elasticity, newtonian fluids, micropolar elasticity. Prerequisites: CE 2220. (Fall, spring, and summer, even years).

CE 6207. Theory of Elasticity I. 3 Credits.

Introduction to Cartesian tensors; deformation, stress, constitutive relations for linear elasticity; formulation of boundary value problems, variational principles, torsion and bending of prismatic rods, plane problems. Prerequisites: CE 2220. (Same as MAE 6207) (Spring).

CE 6208. Plasticity. 3 Credits.

Introduction to the continuum theory of plastic deformation. Physical basis of rate-independent plasticity. Concepts of yield, strain hardening and softening, reverse yield, and cyclic plasticity. Constitutive equations describing plastic deformation. Prerequisite: CE 6201 or CE 6206.

CE 6209. Mechanics of Composite Materials. 3 Credits.

Stress-strain relationship for orthotropic materials, invariant properties of an orthotropic lamina, biaxial strength theory for an orthotropic lamina. Mechanics of materials approach to stiffness, elasticity approach to stiffness. Classical lamination theory, strength of laminates. Statistical theory of fatigue damage. Same as MAE 6233. Prerequisite: CE 3240.

CE 6210. Introduction to Finite Element Analysis. 3 Credits.

Calculus of variations. Variational formulation of the finite element method. Weighted residual techniques. Computer implementation of the finite element method. Application to problems in heat transfer, stress analysis, fluid flow, and structural analysis. Prerequisites: proficiency in one computer language, CE 2220, CE 3240. (Fall).

CE 6301. Design of Reinforced Concrete Structures. 3 Credits.

Structural behavior of reinforced concrete structures, ultimate strength and deformation characteristics; design of structural components including beams, columns, floor slabs, deep beams, corbels, and composite slab/beam systems. Prerequisite: CE 3310.

CE 6302. Prestressed Concrete Structures. 3 Credits.

Structural behavior and failure modes of prestressed concrete structures; design in prestressed concrete, including long-span structures, bridges, and precast systems. Prerequisite: CE 3310.

CE 6310. Advanced Reinforced Concrete Structures. 3 Credits.

Conception, analysis, and design of low-rise and high-rise buildings by ultimate-strength methods, precast systems, progressive collapse, earthquake considerations, domes, folded plates, shell-type structures, and special topics. Prerequisite: CE 6301.

CE 6311. Bridge Design. 3 Credits.

Application of basic design procedures for reinforced and prestressed concrete bridges, according to AASHTO bridge specifications. Various types of concrete bridges, design superstructure bridge elements (deck slab, girders, bearing pads), and development of superstructure/substructure details. Prerequisite: CE 6302.

CE 6320. Design of Metal Structures. 3 Credits.

Structural behavior of metal structures and composite girders. Conception, analysis, and design of low-rise and high-rise buildings by elastic and inelastic methods. Earthquake considerations and special topics. Prerequisite: CE 4320.

CE 6321. Advanced Metal Structures. 3 Credits.

Conception and design of advanced structural components and systems, hysteretic behavior, plastic design principles, box-type girders, cable systems, and unique structural systems. Prerequisite: CE 6320. (As arranged).

CE 6340. Structural Dynamics. 3 Credits.

Vibration of continuous systems: membranes, beam plates, and shells; approximate methods of vibration analysis; methods of integral transform; analysis of nonlinear systems; wave propagation. Prerequisites: APSC 2058, CE 3240. (Fall, odd years).

CE 6341. Random Vibration of Structures. 3 Credits.

Introduction to random processes, responses of linear structures to stationary and nonstationary random inputs. Structural responses to earthquakes, waves, boundary-layer turbulences, wind loads, etc. Failure analysis of structures under random loads. Prerequisites: APSC 3115, CE 6340. (Spring, even years).

CE 6342. Structural Design to Resist Natural Hazards. 3 Credits.

Prediction of forces due to earthquakes and strong winds; generalized codes; pseudostatic methods for preliminary design; codes based on spectra, energy absorption and ductility; influence of foundations; ground failures; static and aeroelastic effects of strong winds. Design project. Prerequisites: CE 3240, CE 4340, either CE 6340 or CE 6701. (Spring).

CE 6350. Intro to Biomechanics. 3 Credits.

Fundamentals of continuum mechanics as they apply to biological materials: concepts of stress, strain, and equilibrium; elastic and viscoelastic properties of solids; physiological fluid mechanics and bioheat and mass transfer. Fundamentals of solid mechanics of soft tissues and bone structures. Development of computer models and applications. Prerequisite: CE 2220.

CE 6401. Fundamentals of Soil Behavior. 3 Credits.

Soil mineralogy, clay-water-electrolyte systems, soil composition, fabric, structure, volume change behavior, permeability, coupled phenomena, in-situ evaluation of soil behavior. Prerequisite: CE 4410.

CE 6402. Theoretical Soil Mechanics. 3 Credits.

Porous media, stress-strain behavior of soil skeleton, elastic and elastoplastic models for soil behavior, critical state concept, cam clay, strength of soils, stress-dilatancy, stress paths. (Fall, odd years).

CE 6403. Geotechnical Engineering. 3 Credits.

Principles of soil mechanics applied to the analysis and design of mat foundations, pile foundations, retaining structures including sheeting and bracing systems, and waterfront structures. Foundations on difficult soils and reinforced earth structures. Prerequisite: CE 4410.

CE 6404. Geotechnical Earthquake Engineering. 3 Credits.

Ground motion, wave propagation, foundation isolation, site response analysis, seismic stability of retaining structures, soil structure interaction. Prerequisite: graduate standing.

CE 6405. Rock Engineering. 3 Credits.

Classification and properties of rock; nature of rock masses and rock discontinuities; field exploration; methods of excavation; design and applications to foundation slopes, tunnels, and chambers in rock. Prerequisite: CE 4410.

CE 6501. Environmental Chemistry. 3 Credits.

Principles of chemistry of natural waters, water supplies, wastewaters, hazardous wastes. Stoichiometry, equilibrium, solubility, kinetics, organic chemistry, biochemistry, analytical techniques. Examples from water/wastewater practice to illustrate applications. Prerequisites: CHEM 1111, CHEM 1112. (Fall).

CE 6502. Advanced Sanitary Engineering Design. 3 Credits.

Elements of design including basic parameters and hydraulic requirements. Layout and design of water supply and wastewater systems, pumping stations, and treatment plants. Plant expansions and modifications. Prerequisite: CE 4530.

CE 6503. Principles of Environmental Engineering. 3 Credits.

Basic concepts of water, air, and terrestrial environments and interrelationships among them. Principles of environmental chemistry and microbiology. Assessment of environmental quality and impacts. Environment and health. Water and wastewater systems. Legal and regulatory controls. Prerequisites: CE 3520. (Fall).

CE 6504. Water and Wastewater Treatment Processes. 3 Credits.

Theory and application of commonly used processes. Sedimentation, coagulation, filtration, disinfection, gas transfer, activated sludge, trickling filters, oxidation ponds, sorption, and sludge stabilization and disposal. Process combinations to produce treatment systems. Prerequisite: CE 6503.

CE 6505. Environmental Impact Assessment. 3 Credits.

Public policy and legislation on environmental quality. Methods for assessing impacts of engineering projects. Technology for assessing impacts on air, water, and land environments, applied to transportation facilities, water and wastewater facilities, industrial and community development. Prerequisites: CE 3520. (Fall).

CE 6506. Microbiology for Environmental Engineers. 3 Credits.

Principles and applications of advanced treatment systems for water, wastewater, and hazardous wastes, including: biological nutrient removal, oxidation-reduction processes, stripping, sorption, membrane processes, chemical precipitation, others. Prerequisites: CE 3520. (Spring, even years).

CE 6507. Advanced Treatment Processes. 3 Credits.

Principles and applications of advanced treatment systems for water, waste-water, and hazardous wastes, including: biological nutrient removal, oxidation-reduction processes, stripping, sorption, membrane processes, chemical precipitation, others. Prerequisite: CE 6504.

CE 6508. Industrial Waste Treatment. 3 Credits.

Types of industries, waste sources. Characteristics, measurements, and evaluation. Minimization and reuse. Treatment process selection, development, and design. Regulations, permits, standards, monitoring, and pretreatment. (Fall).

CE 6509. Introduction to Hazardous Wastes. 3 Credits.

Regulations, including RCRA and Superfund. Transport and fate of hazardous substances. Elements of environmental toxicology, risk assessment, and hazard ranking. Monitoring, data collection, and evaluation. Waste minimization. Case histories. Prerequisites: CE 3520. (Spring).

CE 6601. Open Channel Flow. 3 Credits.

Types and regimes of flow; energy and momentum principles, uniform flow, gradually varied flow, spatially and rapidly varied flow. Flow in nonprismatic channels. Unsteady flow; dam break problem, flood routing. Prerequisite: CE 3610.

CE 6602. Hydraulic Engineering. 3 Credits.

Hydraulic design of conveyance, regulating, and measurement structures. Design for spillways, energy dissipators, inlet and outlet works related to dams. Forces on hydraulic structure and stability analysis. Hydraulic turbines and pumps. Design considerations for flow through pipes. Transients and cavitation. Prerequisite: CE 3610.

CE 6603. Design of Dams. 3 Credits.

Project planning and investigations. Types of dams; design of earth-rock fill dams; stability analysis, foundation treatment, wind-wave protection. Construction methods for dams. Reservoir sedimentation. Safety inspection of dams. Prerequisite: CE 3610.

CE 6604. Advanced Hydrology. 3 Credits.

Precipitation, evaporation, and transpiration. Soil physics; stream flow, drainage basins, hydrograph analysis, and stream-flow routing. Design criteria, flood frequency statistics and analysis, flood forecasting and control, water supply forecasting. Prerequisite: CE 4620.

CE 6605. Ground Water and Seepage. 3 Credits.

Permeability theory of groundwater flow, flow nets, analogs, computer solutions; applications to engineering problems such as excavation dewatering, flow through dams, stabilization of earth slopes. Prerequisites: CE 4410. (Spring).

CE 6606. Mechanics of Water Waves. 3 Credits.

Irrrotational theory for deep- and shallow-water waves, reflexion, refraction, diffraction, attenuation. Water waves of finite amplitude: shallow-water theory, tides, bores, long-waves theory, conoidal and solitary waves. Wave generation by wind. Wave breaking and reflexion. Prerequisite: APSC 6213 and permission of instructor.

CE 6607. Water Resources Planning and Control. 3 Credits.

The parameters of water resources planning and control, economics of water resources and related natural resources, economics of water-quality control, physical parameters of water resource development, water resources law. Prerequisite: approval of department.

CE 6608. Hydraulic Modeling. 3 Credits.

Dimensional analysis and similitude. Types of models—physical, mathematical. Distortions in physical models. Erodible bed models. Prerequisite: CE 3610.

CE 6609. Numerical Methods in Environmental and Water Resources. 3 Credits.

Use of microcomputers in water resources. Elements of finite difference schemes, basic operations, convergence, stability, and consistency. Nonuniform flow and error analysis; unsteady laminar flow; diffusion problems; unsteady flow in open channels; water hammer, seepage flow, and diffusion-dispersion problems. Prerequisites: CE 2210, MAE 3126. (Spring).

CE 6610. Pollution Transport Systems. 3 Credits.

Distribution of pollutants in natural waters and atmosphere, diffusive and advective transport, mathematics for stream pollutant deoxygenation rates, groundwater pollution transport, sediment transport, thermal transport, numerical simulation of pollutant transports in streams and estuaries. Prerequisite: CE 3610, MAE 2131.

CE 6701. Analytical Mechanics. 3 Credits.

Fundamental principles, particle and rigid-body dynamics, generalized coordinates, variational principles and Lagrange's equations, nonholonomic systems, Hamilton's equations, theory of small oscillations. Prerequisites: APSC 2058, APSC 2113. (Fall).

CE 6702. Vehicle Dynamics. 3 Credits.

Engineering principles and analytical methods explaining the performance of an automotive vehicle. Basic mechanics governing vehicle dynamic performance in longitudinal, ride, and handling modes. Engineering analysis techniques applied to basic systems and subsystems to derive the governing equations. Prerequisite or corequisite: CE 6701. Prerequisites: CE 6701 (either prerequisite or corequisite). (Spring, even years).

CE 6705. Nonlinear Finite Element Modeling and Simulation. 3 Credits.

Rigid and flexible body methods for modeling crashes. Application of dynamic nonlinear finite element methods with contact algorithms for modeling crash phenomena. Modeling and simulation of vehicles, airbags, safety restraining systems, and highway barriers. (Spring).

CE 6706. Pavement & Runway Design. 3 Credits.

Pavement types, wheel-load characteristics; stresses in pavements and subgrades; empirical methods of design of flexible and rigid highway and airfield pavements; general principles of runway design. (Spring, odd years).

CE 6707. Systems Dynamics Modeling and Control. 3 Credits.

Introduction of concepts in control theory and applications to solve problems in civil and transportation engineering dealing with single-input/single-output and multi-input/multi-output systems. Review of classical control theory in the frequency and time domain, state-space analysis, system optimization, and non-linear control. (Fall).

CE 6721. Traffic Engineering and Highway Safety. 3 Credits.

Roadway traffic capacity and network performance measures; steady and unsteady traffic flow phenomena; traffic control signalization theory and practical implementation; monitoring techniques, instruments, and data processing for highway safety. Traffic related highway safety design concepts. (Fall).

CE 6722. Intelligent Transportation Systems. 3 Credits.

Commands, controls and communications in modern multimodal transportation; infrastructure/highway and vehicle automation, advanced traffic management, vehicle control and safety systems; information, data, and sensory requirements; practical applications and projects. Prerequisites: CE 2710 or CE 3720. (Spring).

CE 6800. Special Topics. 1-6 Credits.

Topic to be announced in the Schedule of Classes.

CE 6801. Civil and Environmental Engineering Graduate Internship. 1 Credit.

For graduate students in the department. May be repeated once for credit. Prerequisite: required courses in the area of focus and department approval. Additional prerequisites may be required for a specific internship as determined by the research supervisor.

CE 6808. Research. 1-12 Credits.

Basic research projects, as arranged. May be repeated for credit.

CE 6998. Thesis Research. 3 Credits.

CE 6999. Thesis Research. 3 Credits.

CE 8320. Theory of Elasticity II. 3 Credits.

Application of integral transform and analytic function theory to solution of plane problems; elastic wave propagation. Three-dimensional elasto-statics. Prerequisite: APSC 6211; CE 6207.

CE 8321. Nonlinear Mechanics of Continua. 3 Credits.

Polar decomposition, invariance, isotropy, representation theorems for invariants and isotropic tensor functions. Deformation, kinematics, stress, balance principles. Principles for constitutive relations. Applications to nonlinear elasticity and non-Newtonian fluids. Prerequisite: CE 6206.

CE 8330. Advanced Finite Element Analysis. 3 Credits.

Review of variational formulation of the finite element method. Formulation of various continuum and structural elements. Application to static and dynamic problems in elasticity, plasticity, large deflection, and instability in plates and shells. Recent developments in finite element methods. Same as MAE 6288. Prerequisite: CE 6206, 6210; or MAE 6210, MAE 6286.

CE 8350. Sedimentation Engineering. 3 Credits.

Problems of erosion and sedimentation. Properties of sediment. Initiation of motion. Suspension of sediment and sediment discharge theories. Sedimentation measurements. Economic and legal aspects. Prerequisite: CE 6601 or approval of department.

CE 8351. Mechanics of Alluvial Channels. 3 Credits.

Physical processes in drainage basins and channels. Channel forms and bed forms. Hydraulics and sediment transport in alluvial channels. Design of stable channels. Qualitative and quantitative response of rivers. Channel stabilization, navigation channels. Case studies including environmental impacts. Prerequisite: CE 6601 or approval of department.

CE 8352. Advanced Hydraulics. 3 Credits.

Theory of unsteady flow. Diffusion and dispersion through pipes and open channels. Numerical solutions using finite element and finite difference methods. Prerequisite: CE 6601 or approval of department.

CE 8370. Intelligent Systems Theory and Applications. 3 Credits.

Overview of artificial intelligence, neural networks, genetic algorithms, fuzzy systems, and hybrid intelligent systems and their integration with other information processing methods. Intelligent systems applications; examples are drawn from ITS and traffic engineering, vehicle safety, remote sensing, and structural design optimization. Prerequisite: CE 6707.

CE 8380. Advanced Biomechanics. 3 Credits.

Historical overview of biomechanics and biomaterials. Fundamental concepts in mechanics as applied to the treatment of biological systems. Approaches to the mechanical analysis of the human structure under physiological and non-physiological loading conditions. Constitutive laws for biological materials. Finite element applications. Prerequisite: CE 6206 or 6350. (As arranged).

CE 8998. Advanced Reading and Research. 1-12 Credits.

Limited to students preparing for the Doctor of Philosophy qualifying examination. May be repeated for credit.

CE 8999. Dissertation Research. 1-12 Credits.

Limited to Doctor of Philosophy candidates. May be repeated for credit.

BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING

Civil engineering encompasses those branches of engineering most closely related to the control and improvement of our environment and of the physical conditions of life. Civil engineers apply many technical specialties in order to plan, design, and construct projects that range from buildings and transportation systems to space stations and space habitats.

Visit the program website (<http://www.cee.seas.gwu.edu/programs-degrees>) for additional information.

REQUIREMENTS

Recommended program of study

First semester

CE 1010 Introduction to Civil and Environmental Engineering

UW 1020 University Writing *

SEAS 1001 Engineering Orientation

MATH 1231 Single-Variable Calculus I *

CHEM 1111 General Chemistry I *

One humanities or social sciences elective **

Second semester

PHYS 1021 University Physics I *

MATH 1232 Single-Variable Calculus II *

MAE 1004 Engineering Drawing and Computer Graphics

CSCI 1121 Introduction to C Programming

One humanities or social sciences elective **

Third semester

APSC 2057 Analytical Mechanics I

APSC 2113 Engineering Analysis I

MATH 2233 Multivariable Calculus

PHYS 1022 University Physics II *

One humanities or social sciences elective **

Fourth semester

APSC 2058 Analytical Mechanics II

CE 2210 Engineering Computations

CE 2220 Introduction to the Mechanics of Solids

CE 2710 Introduction to Transportation Engineering

GEOL 1001 Physical Geology *

One humanities or social sciences elective **

Fifth semester

APSC 3115 Engineering Analysis III

CE 3110W Civil Engineering Materials

CE 3111W Civil Engineering Materials Lab

CE 3230 Structural Theory I

CE 3720 Highway Engineering and Design

MAE 3126 Fluid Mechanics I

One humanities or social sciences elective **

Sixth semester

CE 3240 Structural Theory 2

CE 3310 Reinforced Concrete Structures

CE 3611 Hydraulics Laboratory

CE 3520 Environmental Engineering I: Water Resources and Water Quality

CE 3610 Hydraulics

CE 3521 Environmental Engineering Laboratory

One humanities or social sciences elective **

Seventh semester

CE 4410 Introduction to Geotechnical Engineering

CE 4411 Geotechnical Engineering Laboratory

CE 4320 Metal Structures

CE 4620 Hydrology and Hydraulic Design

CE 4530 Environmental Engineering II: Water Supply and Pollution Control

One engineering elective selected from list below

Eighth semester

CE 4330 Contracts and Specifications

CE 4340 Design and Cost Analysis of Civil Engineering Structures

CE 6403 Geotechnical Engineering

Two engineering electives from the list below

Engineering electives

CE 4810 Research

CE 4820 Special Topics

CE 6102 Application of Probability Methods in Civil Engineering

CE 6201	Advanced Strength of Materials
CE 6202	Methods of Structural Analysis
CE 6203	Reliability Analysis of Engineering Structures
CE 6204	Analysis of Plates & Shells
CE 6205	Theory of Structural Stability
CE 6206	Continuum Mechanics
CE 6207	Theory of Elasticity I
CE 6208	Plasticity
CE 6209	Mechanics of Composite Materials
CE 6301	Design of Reinforced Concrete Structures
CE 6302	Prestressed Concrete Structures
CE 6320	Design of Metal Structures
CE 6321	Advanced Metal Structures
CE 6401	Fundamentals of Soil Behavior
CE 6402	Theoretical Soil Mechanics
CE 6403	Geotechnical Engineering
CE 6404	Geotechnical Earthquake Engineering
CE 6405	Rock Engineering
CE 6501	Environmental Chemistry
CE 6502	Advanced Sanitary Engineering Design
CE 6503	Principles of Environmental Engineering
CE 6504	Water and Wastewater Treatment Processes
CE 6505	Environmental Impact Assessment
CE 6506	Microbiology for Environmental Engineers
CE 6507	Advanced Treatment Processes
CE 6508	Industrial Waste Treatment
CE 6509	Introduction to Hazardous Wastes
CE 6601	Open Channel Flow
CE 6602	Hydraulic Engineering
CE 6603	Design of Dams

CE 6604	Advanced Hydrology
CE 6605	Ground Water and Seepage
CE 6606	Mechanics of Water Waves
CE 6607	Water Resources Planning and Control
CE 6608	Hydraulic Modeling
CE 6609	Numerical Methods in Environmental and Water Resources
CE 6610	Pollution Transport Systems
CE 6701	Analytical Mechanics
CE 6702	Vehicle Dynamics
CE 6703	Vehicle Standards and Crash Test Analysis
CE 6704	Crash Investigation and Analysis
CE 6705	Nonlinear Finite Element Modeling and Simulation
CE 6706	Pavement & Runway Design
CE 6707	Systems Dynamics Modeling and Control
CE 6721	Traffic Engineering and Highway Safety
CE 6722	Intelligent Transportation Systems
CE 6800	Special Topics
EMSE 6410	Survey of Finance and Engineering Economics

*Course satisfies the university general education requirement in math, science, and writing.

**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list; (p. 29) the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list; (p. 29) the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list. BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING, ENVIRONMENTAL ENGINEERING OPTION

Graduates with the degree of Bachelor of Science in Civil Engineering, Environmental Engineering Option, can identify, formulate, and solve problems involving design, experimentation, and analysis of a wide variety of civil engineering applications. The program of study prepares students to understand the impact of engineering solutions in a global economic, environmental, and social context. The well-structured curriculum enables students to design systems, components, or processes to meet desired needs within realistic constraints such as economic, environmental, social, political, health and safety, manufacturability, and sustainability.

Visit the program website (<http://www.cee.seas.gwu.edu/programs-degrees>) for additional information.

BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING, MEDICAL PREPARATION OPTION

The degree program for the Bachelor of Science in Civil Engineering, Medical Preparation Option, focuses on proficiency in mathematics through differential equations, probability and statistics, calculus-based physics, and general chemistry; and the ability to conduct laboratory experiments and to critically analyze and interpret data. The curriculum prepares students to use their technical knowledge and expertise in mathematics, science, and engineering to identify, formulate, and solve problems involving design, experimentation, and analysis of a wide variety of civil engineering applications with special emphasis on the medical field.

Visit the program website (<http://www.cee.seas.gwu.edu/programs-degrees>) for additional information.

REQUIREMENTS

A complete list of engineering electives can be found on the department's website (<http://www.cee.seas.gwu.edu/programs-degrees>).

BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING, SUSTAINABILITY OPTION

Civil engineering encompasses those branches of engineering most closely related to the control and improvement of our environment and the physical conditions of life. The Bachelor of Science in Civil Engineering prepares graduates to design systems, components, or processes to meet desired needs within realistic constraints such as sustainability. The University defines sustainability as the balance of environmental resources, social equity, and economic prosperity across the globe and across generations. The curriculum for the Bachelor of Science in Civil Engineering, Sustainability Option, enables students to develop the required analytical, experimental, and design skills. Students can apply interdisciplinary methods and approaches to sustainability to analyze challenges, and develop and implement solutions.

Visit the program website (<http://www.cee.seas.gwu.edu/programs-degrees>) for additional information.

BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING, TRANSPORTATION ENGINEERING OPTION

Civil engineering encompasses those branches of engineering most closely related to the control and improvement of our environment and the physical conditions of life. The Bachelor of Science in Civil Engineering, Transportation Engineering Option, prepares students to design systems, components, or processes to meet desired needs within realistic constraints such as economic, environmental, social, political, health and safety, manufacturability, and sustainability. Students are able to use their experience with interdisciplinary methods and approaches to transportation engineering and design to develop the required analytical, experimental, and design skills. Graduates understand issues involving professional practice such as procurement of work, bidding versus quality-based selection processes, and how construction professionals and civil engineers interact to design and construct a project.

COMBINED BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING AND MASTER OF SCIENCE IN THE FIELD OF ENVIRONMENTAL ENGINEERING

Civil engineering encompasses those branches of engineering most closely related to the control and improvement of our environment and the physical conditions of life. Civil engineers apply many technical specialties in order to plan, design, and

construct projects that range from buildings and transportation systems to space stations and space habitats. This combined BS/MS program will allow civil engineering students to specialize in the field of environmental engineering.

REQUIREMENTS

Recommended program of study

First semester

CE 1010	Introduction to Civil and Environmental Engineering
CHEM 1111	General Chemistry I *
MATH 1231	Single-Variable Calculus I *
SEAS 1001	Engineering Orientation
UW 1020	University Writing *

One humanities or social sciences elective **

Second semester

CHEM 1112	General Chemistry II *
CSCI 1121	Introduction to C Programming
MAE 1004	Engineering Drawing and Computer Graphics
MATH 1232	Single-Variable Calculus II *
PHYS 1021	University Physics I *

Third semester

APSC 2057	Analytical Mechanics I
APSC 2113	Engineering Analysis I
MATH 2233	Multivariable Calculus *
PHYS 1022	University Physics II *

One humanities or social sciences elective **

Fourth semester

APSC 2058	Analytical Mechanics II
CE 2210	Engineering Computations
CE 2220	Introduction to the Mechanics of Solids
CE 2710	Introduction to Transportation Engineering
GEOL 1001	Physical Geology *

One humanities or social sciences elective **

Fifth semester

APSC 3115	Engineering Analysis III
CE 3110W	Civil Engineering Materials
CE 3111W	Civil Engineering Materials Lab
CE 3230	Structural Theory I
MAE 3126	Fluid Mechanics I

Two humanities or social sciences electives **

Sixth semester

CE 3240	Structural Theory 2
CE 3310	Reinforced Concrete Structures
CE 3520	Environmental Engineering I: Water Resources and Water Quality
CE 3521	Environmental Engineering Laboratory
CE 3610	Hydraulics
CE 3611	Hydraulics Laboratory

One humanities or social sciences elective **

Seventh semester

CE 4320	Metal Structures
CE 4410	Introduction to Geotechnical Engineering
CE 4411	Geotechnical Engineering Laboratory
CE 4530	Environmental Engineering II: Water Supply and Pollution Control
CE 4620	Hydrology and Hydraulic Design

One engineering elective

Eighth semester

CE 4330W	Contracts and Specifications
CE 4340	Design and Cost Analysis of Civil Engineering Structures
CE 6502	Advanced Sanitary Engineering Design

Two engineering electives

One CE master of science course

Ninth semester

Four CE master of science courses

Tenth semester

Four CE master of science courses

*Course satisfies the university general education requirement in math, science, and writing.

**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 29); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list (p. 29); the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list. (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf)

A complete list of engineering electives can be found on the department's website (<http://www.cee.seas.gwu.edu/programs-degrees>).

COMBINED BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING AND MASTER OF SCIENCE IN THE FIELD OF STRUCTURAL ENGINEERING

Civil engineering encompasses those branches of engineering most closely related to the control and improvement of our environment and the physical conditions of life. Civil engineers apply many technical specialties in order to plan, design, and construct projects that range from buildings and transportation systems to space stations and space habitats. This combined BS/MS program will allow civil engineering students to specialize in the field of structural engineering.

REQUIREMENTS

Recommended program of study

MASTER OF SCIENCE IN THE FIELD OF CIVIL AND ENVIRONMENTAL ENGINEERING

The Master of Science in the field of civil and environmental engineering program is designed to provide students with the fundamentals and knowledge about the various specializations within environmental engineering. These include water, wastewater, hazardous wastes, industrial wastes, and pertinent regulatory requirements. As one of the fastest growing fields in the U.S. and developing countries, new methods and technologies are emerging in civil and environmental engineering. Environmental engineering students use one of the world's largest wastewater treatment plants as a real-world laboratory to improve the water quality of the Potomac River and the Chesapeake Bay watershed. Structural engineering students study earthquake engineering, extreme event design of structures, and bridge design on a state-of-the-art, six-degrees-of-freedom earthquake simulator. And transportation engineering students learn from faculty and experts at GW's National Crash Analysis Center and the Federal Outdoor Impact Laboratory.

Specific admission requirements are shown on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

More information can be found on the departmental website (<http://www.cee.seas.gwu.edu/master-science-program>).

REQUIREMENTS

The following requirements must be fulfilled:

Minimum requirements for the degree are 33 credits of coursework, or 24 credits of coursework and 6 credits of thesis.

Required courses

Engineering Mechanics:

APSC 6213 Analytical Methods in Engineering III

CE 6206 Continuum Mechanics

CE 6210 Introduction to Finite Element Analysis

Environmental engineering:

CE 6503 Principles of Environmental Engineering

CE 6601 Open Channel Flow

CE 6609 Numerical Methods in Environmental and Water Resources

Geotechnical engineering:

CE 6210 Introduction to Finite Element Analysis

CE 6402 Theoretical Soil Mechanics

CE 6605 Ground Water and Seepage

Structural engineering:

CE 6201 Advanced Strength of Materials

CE 6202 Methods of Structural Analysis

CE 6210 Introduction to Finite Element Analysis

Transportation safety engineering:

CE 6210 Introduction to Finite Element Analysis

CE 6701 Analytical Mechanics

CE 6102 Application of Probability Methods in Civil Engineering

or CE 6722 Intelligent Transportation Systems

Water resources engineering:

CE 6503 Principles of Environmental Engineering

CE 6601

Open Channel Flow

CE 6609

Numerical Methods in Environmental and Water Resources

COMPUTER SCIENCE

Mission Statement

The mission of the Department of Computer Science is to serve the global community by providing high-quality computer science education, research, and professional services and to advance computer technology in selective areas while upholding standards of excellence.

Educational Objectives

The undergraduate program of study is designed to prepare graduates to earn an advanced degree in computer science or related disciplines; for a professional degree such as law, business, or medicine; or for employment in the computer or IT industry, where they will apply the skills and knowledge learned in the program. Graduates will conduct themselves professionally and ethically, work effectively in teams, and communicate effectively with both technical and non-technical audiences.

Educational Outcomes

A graduate in computer science will have the ability to do the following:

- Apply knowledge of computing and mathematics appropriate to the discipline;
- Analyze a problem and identify and define the computing requirements appropriate to its solution;
- Design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs;
- Function effectively on teams to accomplish a common goal;
- Understand professional, ethical, legal, security, and social issues and responsibilities;
- Communicate effectively with a range of audiences;
- Analyze the local and global impact of computing on individuals, organizations, and society;
- Recognize the need to engage in continuing professional development;
- Use current techniques, skills, and tools necessary for computing practice;
- Apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the trade-offs involved in design choices; and
- Apply design and development principles in the construction of software systems of varying complexity.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in computer science (p. 489)
- Bachelor of Science with a major in computer science (p. 491)

GRADUATE

Master's programs

- Master of Science in the field of computer science (p. 492)
- Master of Science in the field of cybersecurity in computer science (p. 493)

Doctoral program

See the School of Engineering and Applied Science for programs leading to the doctoral degree.

CERTIFICATES

- Certificate in computer security and information assurance (p. 494)

FACULTY

Professors S.Y. Berkovich, H.A. Choi, J.K. Hahn, R.S. Heller, B. Narahar, R. Simha, A. Youssef (*Chair*),

Associate Professors A. Bellaachia, X. Cheng, M. Diab, S. Rotenstreich, P. Vora, N. Zhang

Assistant Professors E. Drumwright, C. Monteleoni, G.A. Parmer, T. Wood

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Note: With the exception of CSCI 1010, CSCI courses numbered CSCI 1041 and below may not normally be counted toward degree requirements for computer science majors, unless approved by a department advisor. Credit may be earned for only one course in each of the following pairs of courses:

CSCI 2441	Database Systems and Team Projects
-----------	------------------------------------

or CSCI 6441	Database Management Systems
CSCI 3362	Probability for Computer Science
or CSCI 6362	Probability for Computer Science
CSCI 4223	Principles of Programming Languages
or CSCI 6223	Principles of Programming Languages
CSCI 4331	Cryptography
or CSCI 6331	Cryptography
CSCI 4341	Continuous Algorithms
or CSCI 6341	Continuous Algorithms
CSCI 4364	Machine Learning
or CSCI 6364	Machine Learning
CSCI 4431	Computer Networks I
or CSCI 6431	Computer Networks
CSCI 4521	Introduction to Mobile Robotics
or CSCI 6521	Introduction to Mobile Robotics
CSCI 4525	Autonomous Robotics: Manipulation
or CSCI 6525	Autonomous Robotics: Manipulation
CSCI 4527	Introduction to Computer Vision
or CSCI 6527	Introduction to Computer Vision
CSCI 4531	Computer Security
or CSCI 6531	Computer Security
CSCI 4532	Information Policy
or CSCI 6532	Information Policy
CSCI 4541	Network Security
or CSCI 6541	Network Security

CSCI 1010. Computer Science Orientation. 1 Credit. Introduction to the field of computer science. Basic and emerging concepts and applications of computer science. Hands-on experiments and team projects. Technical resources, professional ethics, writing, and presentation.

CSCI 1011. Introduction to Programming with Java. 3 Credits. An introductory course in programming a computer, using the Java language. Object-oriented programming, classes, applets, methods, control structures, inheritance, overriding, GUI widgets, containers, and exceptions.

CSCI 1020. Applications Software. 3 Credits.

Introduction to the use of microcomputer hardware and software for word processing (e.g., Word), spreadsheets (e.g., Excel), and database management (e.g., Access), with emphasis on the use of computers to solve typical problems in academia and business.

CSCI 1021. Introduction to Computers and the Internet. 3 Credits.

Survey of computers and languages. Introduction to computer programming. History of computing and networking. The effects of computing and the Internet on our lives. E-commerce and new technologies. Concepts of web page design. (Fall and spring).

CSCI 1022. Introduction to Internet Technology. 3 Credits.

An introductory course for non-technical students who wish to obtain a better understanding of the hardware and software that comprise the Internet. Information transfer over fiber, routing and switching of packets, methods of information transfer, protocols, software, ISP, web pages and multimedia.

CSCI 1023. Introduction to Web Software Development. 3 Credits.

Introduction to the Internet. Topics include address and URL to find your way, linking to a URL, HTML and web programming, building a web page, building a home page, client-server techniques. (Fall and spring).

CSCI 1030. Technology and Society. 3 Credits.

Historical, social, and ethical issues of the technological age. Ethical principles and skills and social analysis skills needed to evaluate the design and implementation of complex computer systems. Privacy, computer crime, equity, intellectual property, professional ethics. Data collection, analysis, and presentation; technical writing and oral communication skills.

CSCI 1030W. Technology and Society. 3 Credits.

Historical, social, and ethical issues of the technological age. Ethical principles and skills and social analysis skills needed to evaluate the design and implementation of complex computer systems. Privacy, computer crime, equity, intellectual property, professional ethics. Data collection, analysis, and presentation; technical writing and oral communication skills.

CSCI 1041. Introduction to FORTRAN Programming. 3 Credits.

Structured programming with high-level language using FORTRAN. Control structures. Different data types with emphasis on real and complex number computations. Arrays used with vector and matrix manipulation to solve simultaneous equations. External subroutines for mathematical and graphical applications. Prerequisite or corequisite: Math 1220 or MATH 1231.

CSCI 1111. Introduction to Software Development. 3 Credits.

Introduction to the solution of problems on a digital computer using the Java language. Object-oriented programming concepts; documentation techniques; design of test data. Writing, debugging, and running programs in an interactive computing environment.

CSCI 1112. Algorithms and Data Structures. 3 Credits.

Object-oriented software. Inheritance, exceptions, development of classes, event-driven programming. Data structures such as trees, lists, stacks, queues, and strings. Sorting and searching. Introduction to algorithm performance prediction. May be taken for graduate credit by students in fields other than computer science. Prerequisites: CSCI 1111 with a grade of C or higher; and MATH 1220 or MATH 1231. (Spring).

CSCI 1121. Introduction to C Programming. 3 Credits.

Structured programming with the C language. Control structures. Data types. Use of pointers. Matrix manipulation to solve simultaneous equations. External subroutines for mathematical and graphical applications. Introduction to C> Complex number representation. Corequisite: MATH 1220 or MATH 1231.

CSCI 1131. Introduction to Programming with C. 3 Credits.

Intensive introductory course for students with a science, mathematics, or other quantitative background. Solution of numerical and nonnumerical problems on a digital computer using C programming language in a Unix environment. Recommended for graduate and advanced undergraduate students in other departments. Prerequisite: MATH 1232 .

CSCI 1132. Data Structures and Software Design. 3 Credits.

Data structures such as trees, lists, stacks, queues, and strings. Big-O notation and introduction to algorithm performance analysis. Solutions of numerical and non-numerical problems. Use of I/O libraries. Application development and software testing. Prerequisite: CSCI 1121.

CSCI 1311. Discrete Structures I. 3 Credits.

Mathematics for computer science. Sets, functions, sequences. Propositional and predicate calculus, formal proofs, mathematical induction. Matrices, semigroups, groups, isomorphism. Relations, partitions, equivalence relations, trees, graphs. May be taken for graduate credit by students in fields other than computer science. Prerequisites: MATH 1220 or MATH 1231. (Fall).

CSCI 2113. Software Engineering. 3 Credits.

Programming techniques and software development in one or more programming languages. Application development with GUIs, database access, threads, Web programming. Prerequisites: CSCI 1112 with a grade of C or higher; MATH 1231. (Fall).

CSCI 2312. Discrete Structures II. 3 Credits.

Basic discrete techniques in computer science. Proofs, algebraic structures, number theory, graph theory, (coloring and planar graphs, communication networks), advanced recurrences, advanced sums, approximations and asymptotics. Prerequisites: CSCI 1311 with a grade of C or higher; MATH 1231. (Fall).

CSCI 2441. Database Systems and Team Projects. 3 Credits.

Design of relational database systems, relational query languages, normal forms, design of database applications. Team software development, integration, and testing. Professional code of ethics, intellectual property, privacy, software copyrights. Corequisite: CSCI 2113.

CSCI 2441W. Database Systems and Team Projects. 3 Credits.

Design of relational database systems, relational query languages, normal forms, and design of database applications. Team software development, integration, and testing. Professional code of ethics, intellectual property, privacy, and software copyrights. Corequisite: CSCI 2113. (Spring).

CSCI 2461. Computer Architecture I. 3 Credits.

Number representation, computer arithmetic, digital logic and circuit design. Computer organization, micro-architecture and processor datapath, assembly and machine language programming. Introduction to memory organization and the hardware-software interface. Implementation of high-level language constructs. Prerequisites: CSCI 1112 with a grade of C or higher; CSCI 1311. (Fall).

CSCI 3212. Algorithms. 4 Credits.

Core concepts in design and analysis of algorithms, data structures, and problem-solving techniques. Hashing, heaps, trees. Graph algorithms, searching, sorting, graph algorithms, dynamic programming, greedy algorithms, divide and conquer, backtracking. Combinatorial optimization techniques. NP-completeness. Prerequisite: CSCI 1311, CSCI 2113.

CSCI 3221. Programming Languages. 3 Credits.

Programming language and software design fundamentals. Writing programs in a non-procedural programming language. Closures; procedure and data abstraction; object-oriented, procedural, and declarative programming; continuation compilation and interpretation, and syntactic extension. Advanced control structures appropriate for parallel programming. Prerequisite: CSCI 2113.

CSCI 3240. Pre-Senior Design with Research. 3 Credits.

For students who wish to combine a research project with their Senior Design project. The goal is to complete the research, under a faculty mentor, within three semesters. Prerequisite: CSCI 3212, CSCI 3313, CSCI 3411, and permission of instructor.

CSCI 3313. Foundations of Computing. 4 Credits.

Theoretical foundations. Formal languages and automata; regular expressions, context-free languages; finite state automata and pushdown automata; Turing machines and computability, recursive function theory, undecidability. Compiler construction. Lexical and syntax analysis; parsing and parsing techniques; lexical and parsing tools. Prerequisite: CSCI 2461, CSCI 2113.

CSCI 3362. Probability for Computer Science. 3 Credits.

Introduction to probability and statistics for computer scientists. Random variables. Conditional probability, independence, correlation. Applications to computer science, including information theory, data compression, coding, inference, Markov chains, introduction to randomized algorithms. Prerequisite: Math 1232, CSCI 1311; or permission of instructor.

CSCI 3410. Systems Programming. 3 Credits.

Concepts underlying all computer systems. Processor operation, hierarchical memory systems, embedded boards, data acquisition, actuation, and systems software such as compilers, linkers, and operating systems from the programmer's perspective. Use of embedded platforms to examine how programs interact with and are constrained by hardware. Prerequisite: CSCI 2461, CSCI 2113.

CSCI 3411. Operating Systems. 4 Credits.

Process management, process state, concurrent processing, synchronization, events. Operating system structure, the kernel approach, processor scheduling, task switching, monitors, threads. System management, memory management, process loading, communication with peripherals. File systems. Socket programming, packets, Internet protocols. Prerequisite: CSCI 2461, CSCI 2113.

CSCI 3462. Computer Architecture II. 3 Credits.**CSCI 3571. Introduction to Bioinformatics. 3 Credits.**

Same as BiSc 2584.

CSCI 3907. Special Topics. 1-3 Credits.

Topic to be announced in the Schedule of Classes. (Fall and spring).

CSCI 3908. Research. 1-3 Credits.

Applied research and experimentation projects, as arranged. Prerequisite: junior or senior status.

CSCI 4222. Theory of Computer Translators. 3 Credits.

Lexical and syntax analysis, regular expressions, context-free grammars, parsing techniques, top-down parsing, efficient parsing, syntax-directed translation, intermediate formats, flow of control, block structures, procedure calls, symbol tables, run-time storage, error-detection and recovery, code optimization, code generation. Prerequisite: CSCI 3462, CSCI 3313.

CSCI 4223. Principles of Programming Languages. 3 Credits.

Fundamental concepts underlying design of programming languages. Detailed study of functional and object-oriented computational models. Types, evaluation, abstraction, control flow, modules, mutation, laziness, polymorphism, subtyping, inheritance. Practice learning new languages. Prerequisite: CSCI 1311, CSCI 2113.

CSCI 4235. Development of Open-Source Software. 3 Credits.

Design, process, tools, and culture of open-source software development. Cross-platform development and testing. Geographic dispersal, social and team dynamics, licenses (GPL, BSD, other); code reuse (modular code, shared libraries); very-large-scale distributed development techniques (CVS, Bugzilla, release-management, mailing-lists). May be taken for graduate credit. Prerequisite: CSCI 2113 or CSCI 6221.

CSCI 4237. Software Design for Handheld Devices. 3 Credits.

Design of interactive software for handheld devices. Event driven programming, user interface design practices, memory management, handheld debugging techniques. May be taken for graduate credit. Prerequisite: CSCI 2113 or CSCI 6221.

CSCI 4243. Capstone Design Project I. 3 Credits.

Planning, design, and construction of the capstone project. Economic analysis of the project. Application of software engineering principles, including software requirements, specification, requirements engineering, reuse, documentation, verification/validation, testing, configuration management. Report writing and presentations. Prerequisite: senior status.

CSCI 4243W. Capstone Design Project I. 4 Credits.

Planning, design, and construction of the capstone project. Economic analysis of the project. Application of software engineering principles, including software requirements, specification, requirements engineering, reuse, documentation, verification/validation, testing, configuration management. Report writing and presentations. Prerequisite: senior status.

CSCI 4244. Capstone Design Project II. 4 Credits.

Continuation of CSCI 4243. Planning, design, and construction of the capstone project. Economic analysis of the project. Application of software engineering principles, including software requirements, specification, requirements engineering, reuse, documentation, verification/validation, testing, configuration management. Report writing and presentations. Prerequisite: senior status.

CSCI 4314. Discrete Analysis-Computer Sci. 3 Credits.

Combinatorial theory: permutations and combinations, generating functions, recurrence relations, the principle of inclusion and exclusion. Block designs. Applications to the analysis of algorithms, computer organization, VLSI placement, coding theory, simulation, and other problems. May be taken for graduate credit. Prerequisite: CSCI 1311 or permission of instructor.

CSCI 4331. Cryptography. 3 Credits.

Algorithmic principles of cryptography from Julius Caesar to public key cryptography. Key management problems and solutions. Cryptographic systems and applications. Prerequisite: CSCI 2312, CSCI 3313, CSCI 3212.

CSCI 4341. Continuous Algorithms. 3 Credits.

Overview of structures in continuous mathematics from a computational viewpoint. Main topics include continuous system simulation, computational modeling, probability, statistical techniques, next-event simulation, algorithms for continuous optimization, machine learning, neural networks, statistical language processing, robot control algorithms. Prerequisite: CSCI 1311, CSCI 2113.

CSCI 4342. Computational Linear Algebra and Applications. 3 Credits.

Application of linear algebra to computer science and engineering, with a computational perspective. Topics include points, vectors, matrices, and their programming representations; algorithms for 3D transformations, pose and viewpoint estimation; linear equations, independence, rank; algorithms for matrix decompositions, reduction of dimension; computation with large matrices, under and over-determined systems; applications to large data, computer vision, text processing. Prerequisite: CSCI 2113.

CSCI 4361. Simulation Methods. 3 Credits.

Computational methods for continuous and discrete system simulation. Effects of computer software and hardware architectures on computational precision and accuracy requirements. Random-number generation and testing. Calibration and scaling technique. Verification and validation technique. May be taken for graduate credit. Prerequisite: CSCI 2113.

CSCI 4364. Machine Learning. 3 Credits.

Overview of core machine learning techniques: nearest-neighbor, regression, classification, perceptron, kernel methods, support vector machine (SVM), logistic regression, ensemble methods, hidden Markov models (HMM), non-parametrics, online learning, active learning, clustering, feature selection, parameter tuning, and cross-validation.

CSCI 4415. Real-Time and Embedded Systems. 3 Credits.

Development of software for real-time control of physical systems. Reliability and fault tolerance, exceptions and exception handling, reliability and concurrent processes, timeouts, deadline scheduling, shared-memory and message-based device drivers. May be taken for graduate credit. Prerequisite: CSCI 2113.

CSCI 4417. UNIX System Programming. 3 Credits.

Exposure to UNIX internals. Use of UNIX system calls and utilities in conjunction with script and C programs. RFCs, GNU project, and other collaborative traditions in the UNIX community. May be taken for graduate credit. Prerequisite: Senior status or 1 year of C programming and UNIX user experience.

CSCI 4418. UNIX System Administration. 3 Credits.

System administration for the stand-alone system or small networks. Installation of two or more UNIX variants (Linux, FreeBSD, Solaris) on Intel or Sparc platforms. Configuration of mail, name services, and other network utilities. Backup and recovery, security and ethics. May be taken for graduate credit. Prerequisite: CSCI 4417.

CSCI 4431. Computer Networks I. 3 Credits.

Higher-layer protocols and network applications on the Internet, such as session layer, presentation layer, data encryption, directory services and reliable transfer services, telnet, network management, network measurements, e-mail systems, and error reporting. Prerequisite: CSCI 2461, CSCI 2113.

CSCI 4431W. Computer Networks I. 3 Credits.

Higher-layer protocols and network applications on the Internet, such as session layer, presentation layer, data encryption, directory services and reliable transfer services, telnet, network management, network measurements, e-mail systems, and error reporting. Prerequisite: CSCI 2461, CSCI 2113.

CSCI 4432. Computer Networks II. 3 Credits.

Computer networks and open system standards. Network configurations and signals, encoding and modulation, transmission media, connection interfaces, error detection and correction, signal compression, switching, link layer control, ISDN, X.25, frame relay, ATM, and Sonet. Bridges, routers, and routing algorithms. Prerequisite: CSCI 4431.

CSCI 4455. Computer Game Design and Programming. 3 Credits.

Principles, techniques, and design of computer games. Graphic game engines, modeling, motion, AI and interaction; sound design and synthesis; real-time software and hardware issues. May be taken for graduate credit. (Fall).

CSCI 4511. Artificial Intelligence Algorithms. 3 Credits.

Knowledge representation and reasoning, propositional logic and predicate calculus. Logic programming. Search, game trees, backtracking. Planning. May be taken for graduate credit. Prerequisite: CSCI 3221, CSCI 3212.

CSCI 4521. Introduction to Mobile Robotics. 3 Credits.

Overview of autonomous mobile robotics. Sensing, localization, calibration, mapping, perception, decision making, planning, and control. Emphasis on algorithmic rather than hardware aspects of robotics. Development of algorithms that can operate autonomous mobile platforms in complex, real-world environments. Prerequisite: MATH 1232, MATH 2184; CSCI 3362 or CSCI 4341.

CSCI 4525. Autonomous Robotics: Manipulation. 3 Credits.

Introduction to robot manipulation. Core principles necessary to program robots for autonomous operation in dynamic and typically human-centric environments. Transdisciplinary concepts from computer science (reinforcement learning, perception), mechanical engineering (kinematics, dynamics), and electrical engineering (control theory). Prerequisite: permission of instructor.

CSCI 4527. Introduction to Computer Vision. 3 Credits.

Introduction and overview of computer vision. Image-formation signal processing and filtering. Saliency, image features and feature extraction, tracking, stereo disparity estimation, structure from motion, photogrammetry, optic flow, homography estimation and warping, scene segmentation, place recognition, object recognition, robust estimation, and camera calibration. Prerequisite: MATH 1232, MATH 2184; CSCI 4362 or CSCI 4341.

CSCI 4531. Computer Security. 3 Credits.

Risk analysis, cryptography, operating system security, identification and authentication systems, database security. Prerequisite: CSCI 3411; corequisite: CSCI 4431.

CSCI 4532. Information Policy. 3 Credits.

Roles, issues, and impacts of computer-based information systems in national and international arenas, focusing on privacy, equity, freedom of speech, intellectual property, and access to personal and governmental information. Professional responsibilities, ethics, and common and best practices in information use.

CSCI 4541. Network Security. 3 Credits.

Security protocols and applications in local, global, and wireless networks; IPSec and packet-level communication security systems; network authentication and key-exchange protocols; intrusion detection systems and firewalls; secure network applications; network worms and denial-of-service attacks. Prerequisite: CSCI 4531.

CSCI 4551. Concepts and Applications of Computer Graphics. 3 Credits.

Introduction to computer graphics without programming; building 3-D geometry and rendering; computer animation; virtual reality and computer games; hands-on projects in modeling, rendering, and animation using commercial software; hands-on projects in photo and video manipulation.

CSCI 4552. Design of Computer Animation I. 3 Credits.

Use of commercial 3-D computer animation packages to create digital artistic works. Principles of animation, including timing, exaggeration of motion, and anticipation; use of a storyboard; modeling; motion; rendering and editing. Prerequisite: CSCI 4551.

CSCI 4553. Design of Computer Animation II. 3 Credits.

Use of commercial 3-D animation packages to create artistic works and visualizations. Process-spanning concepts of development through pre-production, production, and post-production. Emphasis on developing original content and attaining high production values. Prerequisite: CSCI 4552.

CSCI 4554. Computer Graphics 1. 3 Credits.

Hardware; concepts of graphics subroutine packages; programming concepts for interaction, display, and data structuring; basic clipping and scan-conversion algorithms; homogeneous coordinates; three-dimensional viewing transforms; basic rendering. May be taken for graduate credit. Prerequisite: CSCI 2113 or CSCI 6221.

CSCI 4561. Design of User-Interface Programs. 3 Credits.

Structure of interactive programs. Widgets, windows, and input devices. Client-server model, event-driven programming, and callbacks. Window systems (e.g., Xwindows) and dialog control. May be taken for graduate credit. Prerequisite: CSCI 2113 or CSCI 6221.

CSCI 4572. Computational Biology. 3 Credits.

Pairwise alignment and scoring. Multiple sequence alignment. Fragment assembly, physical mapping of DNA. Phylogenetic trees. Molecular structure prediction and protein folding. Microarrays and microarray data, image comparison. Clustering. Overview of biological databases, PDB, MMDB, GenBank. Draft genomes and genome browsers. Pathway databases. May be taken for graduate credit. Prerequisite: CSCI 3571 and CSCI 3212 or CSCI 6212.

CSCI 4576. Introduction to Biomedical Computing. 3 Credits.

A survey of the problems and solutions in biomedical computing. Application of computers in medicine. Patient care and monitoring systems, electronic medical records, digital imaging and analysis. Telemedicine, medical ethics, health care regulations and organizations.

CSCI 4577. Biomedical Computing. 3 Credits.

Computing issues in epidemiology and biosurveillance, decision support, medical imaging and visualization, image-guided surgery; medical databases, issues in system integration, mobile medical computing. May be taken for graduate credit. Prerequisite: CSCI 2113, CSCI 4576; corequisite: CSCI 2441.

CSCI 6010. Introduction to Computer Science Fundamentals. 3 Credits.

Review of programming in a high-level language using Java or C++ Introduction to objects and object-oriented programming: static and dynamic objects, inheritance, dynamic method invocation. Data structures: 2D-arrays, linked-lists, stacks, queues, trees, hashing. Discrete structures: sets, graphs, permutations and combinations. Prerequisite: one year of course work in programming in C, C++ or Java.

CSCI 6011. Introduction to Computer Systems. 3 Credits.

Introduction to basic concepts underlying all computer systems. Processor operation, hierarchical memory systems, elementary logic circuits, and systems software such as compilers, linkers, and operating systems from the programmer's perspective. Prerequisite: one year of course work in programming in C, C++ or Java.

CSCI 6212. Design and Analysis of Algorithms. 3 Credits.

Design and analysis of algorithms. Turing machines; NP-Complete theory. Algorithmic techniques: divide-and-conquer, greedy, dynamic programming, graph traversal, backtracking, and branch-and-bound. Applications include sorting and searching, graph algorithms, and optimization. Prerequisite: CSCI 1311, CSCI 1112.

CSCI 6213. Advanced Data Structures. 3 Credits.

Sparse matrix transpose and multiplication. List insertion and deletion, lists of available space. In-order, preorder, and postorder traversal of trees. Topological sorting. Binary search trees, including AVL trees, B-trees, and tries. Dynamic hashing. Prerequisite: CSCI 6212.

CSCI 6221. Advanced Software Paradigms. 3 Credits.

Object-oriented, procedural, functional, and concurrent software design paradigms; design patterns; software life-cycle concepts. Tradeoffs between compiled and interpreted languages. Examples from Java, C, C++ and Perl. Prerequisites: CSCI 1112 and CSCI 1311 or graduate status.

CSCI 6223. Principles of Programming Languages. 3 Credits.

Fundamental concepts underlying design of programming languages. Detailed study of functional and object-oriented computational models. Types, evaluation, abstraction, control flow, modules, mutation, laziness, polymorphism, subtyping, inheritance. Practice learning new languages. Prerequisite: CSCI 1311, CSCI 2113.

CSCI 6231. Software Engineering. 3 Credits.

The life-cycle model. Requirements and specifications. Design models, structured and object-oriented design. Program development, PDL's tools, configuration control. Program, unit, and integration testing. Program verification. Other development models. Development metrics. Computer-aided software engineering (CASE). Prerequisite: CSCI 6221, CSCI 6212.

CSCI 6232. Software Engineering Development. 3 Credits.

Formal methods in software engineering. First-order logic, basic specification elements, rigorous proofs, formal development process, concurrency. Prerequisite: CSCI 6461, CSCI 6212.

CSCI 6233. Software Testing & Quality. 3 Credits.

Flow graphs and path testing, transaction flow testing, data flow testing, software metrics, system testing, test planning and documentation, reliability, statistical testing. Prerequisite: CSCI 6231.

CSCI 6234. Object-Oriented Design. 3 Credits.

Object-oriented systems, software reusability, software modularity, top-down and bottom-up approaches, object classification, genericity, metaprogramming, concurrent object-oriented programming languages. Prerequisite: CSCI 6221.

CSCI 6235. Component-Based Enterprise Software Development. 3 Credits.

Component-based software development for enterprise applications. Component models, multi-tier architecture. Specific case studies may include topics such as Enterprise Java Beans, DCOM, and COBRA. Prerequisite: CSCI 6221.

CSCI 6311. Theory of Computation. 3 Credits.

Theoretical foundations of computer science. Formal languages and automata; regular expressions, context-free languages, parsing; Turing machines and complexity; partial recursive functions; undecidability; program correctness; fixed-point theory; formal specifications of software. Prerequisite: CSCI 6212.

CSCI 6312. Graph Theory & Applications. 3 Credits.

Undirected and directed graphs. Connectivity, partitions, cycles and matchings. Edge and vertex coloring, chromatic polynomials, and the four-coloring problem. Planar graphs and Kuratowski's theorem. Properties of random graphs. Applications to a variety of problems. Prerequisite: CSCI 6212.

CSCI 6313. Advanced Discrete Structures. 3 Credits.

Discrete techniques in computer science. Algebraic structures, vector spaces, linear transforms, norms, matrices, complex numbers, convolution and polynomial multiplication, Fourier analysis, discrete Fourier transform, number theory. Applications to computer security, coding theory, and audiovisual signal processing. Prerequisites: CSCI 1311, MATH 1232 or graduate status. (Fall).

CSCI 6318. Complex Systems. 3 Credits.

The edge-of-chaos phenomenon, phase transitions, power laws, small-world networks, Boolean networks, cellular automata, and complex dynamics. Applications to networks and biological systems. Prerequisite: CSCI 6212.

CSCI 6331. Cryptography. 3 Credits.

Review of mathematical theory for cryptography. Classical ciphers. Modern block and stream ciphers. Symmetric and asymmetric systems. Digital signatures. Public key infrastructure. Authentication. Prerequisite: CSCI 6212.

CSCI 6341. Continuous Algorithms. 3 Credits.

Overview of structures in continuous mathematics from a computational viewpoint. Main topics include continuous system simulation, computational modeling, probability, statistical techniques, next-event simulation, algorithms for continuous optimization, machine learning, neural networks, statistical language processing, robot control algorithms. Prerequisite: CSCI 1311, CSCI 2113.

CSCI 6342. Computational Linear Algebra and Applications. 3 Credits.

Linear algebra applied to computational problems in computer science and engineering. Topics include points, vectors, matrices, and their programming abstractions; 3D transformations, pose and viewpoint estimation; linear equations; algorithms for matrix decompositions, dimension reduction, computation with large matrices, under- and over-determined systems; applications to big data, computer vision, text processing. Prerequisite: CSCI 2113.

CSCI 6343. Numerical Solutions of Algebraic Systems. 3 Credits.

Numerical solutions of linear algebraic equations and the algebraic eigenvalue problem. Sparse matrix techniques. Solutions of nonlinear simultaneous equations. Interpolation and extrapolation. Prerequisite: CSCI 6212.

CSCI 6351. Data Compression. 3 Credits.

Background on signals, information theory, transforms, human vision, and metrics. Lossless and lossy compression techniques. Video compression. Compression standards. Progressive transmission. Prerequisite: CSCI 6212.

CSCI 6362. Probability for Computer Science. 3 Credits.

Concepts of probability and statistics used in computer science. Random variables. Conditional probability, independence, correlation. Law of large numbers, central limit theorem. Applications to computer science, including entropy, information theory, data compression, coding, inference, Markov chains, randomized algorithms. Prerequisite: MATH 1232, CSCI 1311; or permission of instructor.

CSCI 6364. Machine Learning. 3 Credits.

Machine learning algorithms: nearest-neighbor, regression, classification, perceptron, kernel methods, support vector machine (SVM), logistic regression, ensemble methods, boosting, graphical models, hidden Markov models (HMM), non-parametrics, online learning, active learning, clustering, feature selection, parameter tuning, and cross-validation. Prerequisite: CSCI 6212; CSCI 6362, MATH 2184; or permission of instructor.

CSCI 6365. Advanced Machine Learning. 3 Credits.

Theory and algorithms for machine learning research. In-depth focus on advanced machine learning topics such as clustering, learning from data streams, and Climate Informatics. Prerequisite: CSCI 4364, CSCI 6212, CSCI 6362, MATH 2184; or permission of instructor.

CSCI 6411. Advanced Operating Systems. 3 Credits.

Fundamentals of operating system design and structure, resource management, and system support for multi-core. Topics include scheduling, synchronization, system structure, virtual address spaces, memory management, I/O management, and systems abstractions for modern multi-core architectures. The course involves an implementation component and requires substantial programming experience. This course can be taken for credit by undergraduates who have taken CSCI 3411. Prerequisite: CSCI 6461 or CSCI 2461.

CSCI 6412. OS Design & Implementation. 3 Credits.

Builds on CSCI 6411 to provide students with the knowledge to build parts of modern operating systems, which will be studied and motivated from the viewpoint of practical design and implementation. Students will learn how operating system's components for resource management and abstraction are built from the ground up and integrated into working systems considering the challenges of reliability, multi-core, and security. The course has a significant implementation component; substantial low-level programming experience is required. Prerequisite: CSCI 6411.

CSCI 6421. Distributed and Cluster Computing. 3 Credits.

In-depth study of the algorithmic and implementation challenges in building large scale distributed applications. Topics include distributed coordination, scheduling, consistency issues, and fault tolerance algorithms. The course will cover how fundamental distributed systems concepts are applied to both high performance computing and cloud computing environments. The course will mix algorithmic concepts and practical implementation concerns; substantial programming experience is recommended. Prerequisite: CSCI 6212, CSCI 3411.

CSCI 6431. Computer Networks. 3 Credits.

Fundamental concepts in the design and implementation of computer communication networks and internet, their protocols, and applications. Layered network architectures, applications, network programming interfaces, transport, routing, data link protocols, local area networks, network management, and network security. Prerequisite: CSCI 6461.

CSCI 6433. Internet Protocols. 3 Credits.

Understanding of the layered protocols for the Internet. Interconnection of networks. The IP protocol and routing algorithms, switches, bridges, and routers. The transmission control protocol (TCP). Addressing and names. Application-specific protocols, FTP, TELNET, SMTP, SNMP, HTTP. Domain name services. Prerequisite: CSCI 6221, CSCI 6431.

CSCI 6434. Design of Internet Protocols. 3 Credits.

Protocol specifications and formal description methods. Finite-state descriptions of Internet protocols. Specification and Description Language. Implementation of protocol specifications. Prerequisite: CSCI 6212, CSCI 6433.

CSCI 6441. Database Management Systems. 3 Credits.

Design and architecture of relational database management systems; query languages, data models, index structures, database application design. Prerequisite: CSCI 6221, CSCI 6461.

CSCI 6442. Database Systems II. 3 Credits.

Concepts in database systems. Relational database design. Editing, report generation, updating, schema refinement, tuning. Construction of database management systems. Conceptual and logical design of a database. Prerequisite: CSCI 6441.

CSCI 6443. Data Mining. 3 Credits.

Fundamental concepts of data mining. Algorithm techniques for data mining, including classification, clustering, association rules mining. Prerequisite: CSCI 6441 or permission of instructor.

CSCI 6448. Scientific Databases and Knowledge Formation. 3 Credits.

Database management and information retrieval. Relational algebra and SQL query language. Advanced retrieval capabilities. Data mining. Rules of inductive inference. Classification, clustering, and machine learning techniques. Confronting the problems of complexity. Prerequisite: CSCI 1311 and either CSCI 1132 or CSCI 1112.

CSCI 6451. Information Retrieval Systems. 3 Credits.

Information organization and retrieval of natural language data by digital computer systems; statistical, syntactic, and logical analysis of natural language; dictionary and thesaurus systems; searching strategies and cataloging. Large-scale file structures. Prerequisite: CSCI 6221, CSCI 6461.

CSCI 6461. Computer System Architecture. 3 Credits.

Concepts in processor, system, and network architectures; architecture of pipeline, superscalar, and VLIW/EPIC processors; multiprocessors and interconnection networks. Cache coherence and memory subsystem design for multiprocessor architectures. Parallel and distributed system architecture; internetworking. Prerequisite: CSCI 1311, CSCI 1112, CSCI 2461.

CSCI 6511. Artificial Intelligence. 3 Credits.

Representation and space search. Heuristic search. Predicate calculus. Knowledge representation and knowledge engineering for expert systems. Rule-based, hybrid, and O-O systems. Semantic nets, frames, and natural language. Theorem provers. Overview of planning, learning, neural nets. Use of AI languages. Prerequisite: CSCI 4511, CSCI 6212.

CSCI 6512. Adaptive Learning Systems I. 3 Credits.

Learning as an alternative to rule-based schemes for artificial intelligence. Deterministic and probabilistic simulation of games. Markovian and bounded-context systems. The algedonic process. Introduction to collective learning systems theory. Design, simulation, and evaluation of collective learning automata. Prerequisite: CSCI 4511, CSCI 6212.

CSCI 6515. Natural Language Understanding. 3 Credits.

The state of the art of natural language parsing and semantic understanding by computer systems. Review of formal, context-free, and transformational grammars and parsing. Augmented transition networks: problems of complexity, semantics, and context. Deterministic parsing and semantic parsing. Prerequisite: CSCI 6511.

CSCI 6519. Models of Cognition. 3 Credits.

The central nervous system as a natural precedent for AI: structure and function of the neuron and neural networks; sensors and actuators; modular brain function. The cognitive process. Intelligence metrics. Genetics and self-organizing systems. Memory mechanisms. The psychological basis of learning and behavior. Prerequisite: CSCI 4511, CSCI 6212.

CSCI 6521. Introduction to Mobile Robotics. 3 Credits.

Concepts of autonomous mobile robotics with emphasis on algorithmic aspects. Sensing, sensor fusion, localization, calibration, mapping, perception, decision making, planning, behavior-based control, world modeling, and navigation. Development of algorithms that can operate autonomous mobile platforms in complex, real-world environments. Prerequisite: MATH 1232, MATH 2184; CSCI 6362 or CSCI 4341.

CSCI 6525. Autonomous Robotics: Manipulation. 3 Credits.

Manipulation and autonomous operation in dynamic, human-centric environments. Reinforcement learning, perception, optimization algorithms, kinematics, dynamics, control theory. Prerequisite: CSCI 6362, MATH 2184; or permission of instructor.

CSCI 6527. Introduction to Computer Vision. 3 Credits.

Image signal processing and filtering. Saliency, features and feature extraction, tracking, stereo disparity estimation, structure from motion, photogrammetry, optic flow, homography estimation and warping, scene segmentation, place recognition, object recognition, robust estimation, and camera calibration. Current research topics. Prerequisite: MATH 1232, MATH 2184; CSCI 6362 or CSCI 6341.

CSCI 6531. Computer Security. 3 Credits.

Functional description of cryptographic primitives. Risk analysis. Policy models: security, confidentiality, integrity, hybrid. Design principles: access control, information flow, confinement. Assurance: formal methods, evaluation. Malicious logic: security effects of programming languages. Prerequisite: CSCI 6461.

CSCI 6532. Information Policy. 3 Credits.

Roles, issues, and impacts of computer-based information systems in national and international arenas, focusing on privacy, equity, freedom of speech, intellectual property, and access to personal and governmental information. Professional responsibilities, ethics, and common and best practices in information use.

CSCI 6534. Information Security in Government. 3 Credits.**CSCI 6541. Network Security. 3 Credits.**

Security protocols and applications in local, global, and wireless networks; IPsec and packet-level communication security systems; network authentication and key-exchange protocols; intrusion detection systems and firewalls; secure network applications; network worms and denial-of-service attacks. Prerequisite: CSCI 6531.

CSCI 6542. Computer Network Defense. 3 Credits.

Offensive and defensive information warfare operations. Simulation of various attacks on and defenses of computer systems. Laws related to information warfare. History and literature related to information warfare attacks. Prerequisite: CSCI 6541.

CSCI 6545. Software Security. 3 Credits.

Security for software systems. Theory and practice of designing and implementing secure software. Security in the context of software engineering. Practical experience with building a software system and securing it, with emphasis on correctness and robustness. Requires substantial prior programming experience. Prerequisite: CSCI 6461 or CSCI 6411; CSCI 6531 or EMSE 6540 or permission of instructor.

CSCI 6547. Wireless and Mobile Security. 3 Credits.

Mobile Agents, Wireless Web, WAP, WEP, Peer-to-Peer Computing; secure routing; intrusion detection and authentication on wireless networks; security for handheld devices; encryption and cryptographic measures for wireless; real-time wireless security; security measures for embedded devices. Prerequisite: CSCI 6431, CSCI 6531.

CSCI 6548. E-Commerce Security. 3 Credits.

Advanced technical topics in e-commerce security. X.500 registration systems, X.509/PKIX certification systems, secure payment methods, smart cards, authorization models in open distributed environments. Secure web systems, technologies, and applications. Prerequisite: CSCI 6541.

CSCI 6554. Computer Graphics II. 3 Credits.

Curves and surfaces. Spatial sampling and aliasing. Visible surface algorithms. Illumination and shading models, raytracing and radiosity. Image manipulation and texture mapping. Procedural models. Prerequisite: CSCI 4554.

CSCI 6555. Computer Animation. 3 Credits.

Euler angles and quaternions; articulated figure motion; forward and inverse kinematics; kinematic, physics based, and behavioral motion control; rendering problems (temporal aliasing); sound synthesis and synchronization; recording and editing techniques. Prerequisite: CSCI 4554 or permission of instructor.

CSCI 6561. Design of Human-Computer Interface. 3 Credits.

Design of dialogues for interactive systems. Psychological, physiological, linguistic, and perceptual factors. Advantages and disadvantages of various interaction techniques, command language syntaxes, and data presentations. Design methodology and guidelines. Case studies, research readings, and projects. Prerequisite: CSCI 6221.

CSCI 6562. Design of Interactive Multimedia. 3 Credits.

History, theory, and development of multimedia concepts. Hardware components, platforms, and authoring tools. Scientific, technical, and cognitive foundations of various media including text, sound, graphics, and video. Interface design. Use of a media taxonomy as a design and evaluation tool. Completion of a multimedia portfolio required. Prerequisite: CSCI 6221.

CSCI 6572. Computational Biology Algorithms. 3 Credits.

Algorithms and models for DNA and protein sequence alignments, gene finding, identification of gene regulatory regions, sequence evolution and phylogenetics, RNA and protein structure, microarray and/or proteomics data analysis. Prerequisite: CSCI 6212 ; programming experience in C/C or Java.

CSCI 6900. Colloquium. 0 Credits.

Lectures by outstanding authorities in computer science. Topics to be announced each semester. (Fall and spring).

CSCI 6907. Special Topics. 1-3 Credits.

Topics to be announced in the Schedule of Classes. (Fall and spring).

CSCI 6908. Research. 1-12 Credits.

Applied research and experimentation projects, as arranged. May be repeated for credit.

CSCI 6998. Thesis Research. 3 Credits.**CSCI 6999. Thesis Research. 3 Credits.****CSCI 8211. Advanced Topics in Algorithms. 3 Credits.**

Graph algorithms, strongly connected components, biconnected components, dominators in acyclic graphs, ordered trees, network flow, planarity testing, bipartite matching, theory of NP completeness, NP-complete problems. Design and analysis of approximation algorithms for NP-complete problems. Prerequisite: CSCI 6212.

CSCI 8231. Advanced Topics in Software Engineering. 3 Credits.

Seminar on current research and developments in software engineering. Students develop a software package with the aid of available software tools such as requirement tool, design tool, code generators, testing tools, measurement tools, cost estimation tools. Prerequisite: CSCI 6232, CSCI 6233.

CSCI 8331. Advanced Cryptography. 3 Credits.

Linear and differential cryptanalysis. Cryptanalysis of AES. Factorization and primality. Computational and information-theoretic secrecy. Theory of secrecy. Zero-knowledge proofs. Secret sharing. Cooperative distributed cryptography. Provable security. Prerequisite: CSCI 6331.

CSCI 8401. Advanced Topics in Systems. 3 Credits.

Seminar on current research and developments in computer operating systems. May be repeated for credit. (Spring, even years).

CSCI 8431. Advanced Topics in Computer Networks and Networked Computing. 3 Credits.

Seminar on current research and developments in computer networks, Internet, networked computing, mobile computing and pervasive computing. May be repeated for credit. Prerequisites: CSCI 6461, CSCI 6212, CSCI 6433.

CSCI 8440. Advanced Topics in Data Management. 3 Credits.

Seminar on current research and developments in computer database systems and information retrieval. May be repeated for credit. Prerequisite: CSCI 6442 or CSCI 6451.

CSCI 8511. Advanced Topics in Artificial Intelligence. 3 Credits.

Seminar on current research and developments in machine intelligence and cognitive science. May be repeated for credit. Prerequisite: Permission of the instructor.

CSCI 8531. Advanced Topics in Security. 3 Credits.

Seminar on current research and developments in information assurance. May be repeated for credit. Prerequisite: CSCI 6531.

CSCI 8554. Advanced Topics in Computer Graphics. 3 Credits.

Seminar on current research and developments in computer graphics. Spatial and temporal anti-aliasing: hidden-surface algorithms: illumination models, radiosity, textural mapping. May be repeated for credit. Prerequisite: CSCI 6554.

CSCI 8900. Advanced Selected Topics. 3 Credits.

Topics announced in the Schedule of Classes.

CSCI 8901. Research and Evaluation Methods. 3 Credits.

Required for all computer science doctoral candidates. The scientific method; research/design requirements and objectives: qualitative, quantitative, and case studies; performance metrics; design procedures and control; sources of error and bias; evaluation tools; formal validation methods; documentation standards. Prerequisite: APSC 3115.

CSCI 8998. Computer Science Research. 1-12 Credits.

Limited to students preparing for the Doctor of Philosophy qualifying examination. May be repeated for credit.

CSCI 8999. Dissertation Research. 1-12 Credits.

Limited to Doctor of Philosophy candidates. May be repeated for credit.

BACHELOR OF ARTS WITH A MAJOR IN COMPUTER SCIENCE

The Bachelor of Arts major in computer science provides a broad-based liberal arts curriculum for students who wish to augment technical knowledge with humanities, social sciences, business, communication, or management skills. Foundation courses focus on mathematics, science, software design and programming, computer systems and architecture, and algorithm design. Additional breadth or depth is afforded by selection of technical track courses that build on the foundations to provide in-depth exposure to a specific field in computer science. The program is designed for those with

interests in two or more disciplines; students complete a second major or two minors in another academic department.

Second Major or Minor in Computer Science:

Students who are not enrolled in the School of Engineering and Applied Science (SEAS) but wish to declare a second major in computer science must apply and be admitted to the second major program in computer science.

Criteria for admission:

To be considered for admission to the second major or minor in computer science, a student must satisfy the following criteria:

- A minimum grade of *B* or above in CSCI 1111 or CSCI 1101 or CSCI 1121; and a *B-* or above in Math 1220 and Math 1221 or a *B-* in Math 1231;
- A minimum overall grade-point average of 3.0 at the time of application to the major or minor;
- The application is due no later than the start of the 5th semester of study at GW or completion of the 60th credit, whichever comes first.

Credits in residence requirement:

- For a second major at least 24 credits in computer science courses must be completed in SEAS.
- For students pursuing a minor, at least 15 credits in computer science courses must be completed at GW.

Graduation grade-point average criteria:

- To satisfactorily complete a second major or minor in computer science, a student must have a minimum grade-point average of 2.2 in all the computer science courses. See the department webpage (<http://www.seas.gwu.edu/department-computer-science>) for more information on curriculum requirements for the second major in computer science.

REQUIREMENTS

The minimum number of credits required for the major in computer science is 120; the credit total depends on the second major or minors chosen by the student. Students interested in pursuing a computer science major with preparation for application to medical school can also choose the medical preparation option. Additional information about the Bachelor of Arts major in computer science is available online (http://www.cs.gwu.edu/academics/undergraduate_programs/ba).

Students in this program complete a second major or two minors in another department outside engineering.

Recommended program of study

First semester

CSCI 1010	Computer Science Orientation
CSCI 1111	Introduction to Software Development

SEAS 1001	Engineering Orientation
-----------	-------------------------

UW 1020	University Writing *
---------	----------------------

Math requirement *

Social and behavioral sciences elective **
--

Second semester

CSCI 1112	Algorithms and Data Structures
-----------	--------------------------------

CSCI 1311	Discrete Structures I
-----------	-----------------------

Math requirement *

Science requirement *

Social and behavioral sciences elective **
--

Third semester

CSCI 2113	Software Engineering
-----------	----------------------

CSCI 2461	Computer Architecture I
-----------	-------------------------

Science requirement *

Humanities elective ***

Statistics requirement - one of the following:
--

APSC 3115	Engineering Analysis III
-----------	--------------------------

CSCI 3362	Probability for Computer Science
-----------	----------------------------------

CSCI 4341	Continuous Algorithms
-----------	-----------------------

STAT 1051	Introduction to Business and Economic Statistics
-----------	--

STAT 1053	Introduction to Statistics in Social Science

Unrestricted elective

Second major electives (6 credits)

*Course satisfies the university general education requirement in math, science, and writing.

**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 29); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf).

***At least one humanities course must be selected from the University General Education Requirement list (p. 29); the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf).

BACHELOR OF SCIENCE WITH A MAJOR IN COMPUTER SCIENCE

The program combines software development, computer systems and architecture, algorithms, project design, science, and mathematics to provide a strong foundation in the underpinnings of computer science. Students are prepared to design and implement software needed for Internet operations, computer graphics and animation, secure systems, and applications for small, large, and embedded systems. In consultation with the advisor, students choose a technical

track and a non-technical track. The technical track provides depth in a particular area of computer science, while the non-technical track enables students to stay current with the rapidly evolving field and to establish the relevance of their studies in the ever-changing global environment. The B.S. in Computer Science program is accredited by the Accreditation Board for Engineering and Technology (ABET).

Medical Preparation Option in Computer Science

This option is for students interested in pursuing a computer science major as they prepare to apply to a medical school. The degree program combines additional natural science course work with computer science course requirements.

Visit the program website (<http://www.cs.seas.gwu.edu/bachelor-science-program>) for additional information.

REQUIREMENTS

Recommended program of study

First semester

UW 1020	University Writing *
CSCI 1010	Computer Science Orientation
CSCI 1111	Introduction to Software Development
SEAS 1001	Engineering Orientation
Math requirement *	
Humanities or social sciences elective **	

Second semester

CSCI 1311	Discrete Structures I
CSCI 1112	Algorithms and Data Structures
Math requirement *	
Science requirement *

Non-technical track elective	
Humanities or social sciences elective **	
Unrestricted elective	
Eighth semester	
CSCI 4244	Capstone Design Project II
Technical track elective	
Non-technical track elective	
Two unrestricted electives	

*Course satisfies the university general education requirement in math, science, or writing.

**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 29); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list (p. 29); the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list. (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf)

Mathematics requirements can be met by taking MATH 1220 Calculus with Precalculus I-MATH 1221 Calculus with Precalculus II and MATH 1232 Single-Variable Calculus II or by taking MATH 1231 Single-Variable Calculus I and MATH 1232 Single-Variable Calculus II. All students must take two math courses not counting MATH 1220 Calculus with Precalculus I; students who take MATH 1220 Calculus with Precalculus I must take it as one of their unrestricted electives. Science requirements can be met by choosing from BISC 1111 Introductory Biology: Cells and Molecules-BISC 1112 Introductory Biology: The Biology of Organisms, CHEM 1111 General Chemistry I-CHEM 1112 General Chemistry II, and PHYS 1021 University Physics I-PHYS 1022 University Physics II. The three science requirement courses must include a two-course sequence.

CSCI 4341 Continuous Algorithms and CSCI 3362/6362 Probability for Computer Science can count towards the Statistics Requirement or the Math/Science Elective, but not both. Students who were admitted prior to fall 2014 may count STAT 1051 Introduction to Business and Economic Statistics and STAT 1053 Introduction to Statistics in Social Science towards the Statistics Requirement, if they took the course prior to the start of the Spring 2015 semester.

Some examples of technical tracks include computer security and information assurance, digital media, foundations and theory, biomedical computing, systems, software engineering and applications and research. Examples of non-technical tracks include business, project management, global engineering, pre-law,, and environment and climate change. Students may define their own non-technical track in consultation with their advisor. More information on the tracks and track requirements may be found on the program website (<http://www.cs.seas.gwu.edu/bachelor-science-program>).

MASTER OF SCIENCE IN THE FIELD OF COMPUTER SCIENCE

The Department of Computer Science offers a graduate program leading to the Master of Science in computer science. After completing core requirements, students select

electives in topics such as computer security and information assurance, database and information retrieval systems, software engineering and systems, biomedical computing, digital media and computer graphics, networking and mobile computing, computer architecture, pervasive computing and embedded systems, machine intelligence, robotics, and algorithms and theory.

Both thesis and non-thesis options are available. In addition to the entrance requirements, students are expected to be adequately prepared in the basic physical sciences and in mathematics (one year each of university laboratory science and of math beyond precalculus), and to have taken a course in computer programming using a structured language and CSCI 1112, CSCI 1311, and CSCI 2461 or their equivalents.

Graduate students are required to attend several department colloquia each semester. These are intended to broaden the student's professional outlook and to encourage interaction with the faculty.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://www.cs.seas.gwu.edu/master-science-computer-science>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 9 credits in required courses and 21 credits in electives.

Required

CSCI 6212	Design and Analysis of Algorithms
CSCI 6221	Advanced Software Paradigms
CSCI 6461	Computer System Architecture

Electives

21 credits determined in consultation with the advisor. As a general rule, no more than two courses may be taken outside of those offered by the department.

At least 24 of the 30 credits required for this program must be at the 6000 level.

MASTER OF SCIENCE IN THE FIELD OF CYBERSECURITY IN COMPUTER SCIENCE

The Master of Science in cybersecurity in computer science degree program was created in response to the significant and fast-growing need for technical cybersecurity experts, both nationally and internationally. Students in the program acquire up-to-date knowledge and skills in cybersecurity, a field with

increasing importance to national security, the economy, and private citizens. Students take courses in computer security, software security, network security, cryptography, security management, among others. They also gain a firm grounding in computer science and take courses in related disciplines such as cybersecurity law and digital forensics.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

More information can be found on the departmental website (<http://www.cs.seas.gwu.edu/master-science-cybersecurity-computer-science>).

REQUIREMENTS

Students are expected to be adequately prepared in the basic physical sciences and in mathematics (one year each of university laboratory science and of math beyond precalculus), and to have taken a course in computer programming using a structured language; and CSCI 1112, CSCI 1311, and CSCI 2461 or their equivalents.

The following requirements must be fulfilled: 30 credits, including 12 credits in required courses and 18 credits in electives. Both thesis and non-thesis options are available.

Required

CSCI 6212	Design and Analysis of Algorithms
CSCI 6221	Advanced Software Paradigms
CSCI 6461	Computer System Architecture
EMSE 6540	Management of Information and Systems Security

Electives

18 credits from designated cybersecurity-related courses; two courses must be from the Department of Computer Science, and at least one of those must be indicated as applied cryptography.

.

Normally, no more than three courses may be taken outside of those offered by the department.

At least 24 of the 30 credits required for the degree must be at the 6000 level.

GRADUATE CERTIFICATE IN COMPUTER SECURITY AND INFORMATION ASSURANCE

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Required:

CSCI 6531	Computer Security
-----------	-------------------

CSCI 6541	Network Security
-----------	------------------

Two elective courses selected from the following:

CSCI 6532	Information Policy
-----------	--------------------

CSCI 6331	Cryptography
-----------	--------------

CSCI 8331	Advanced Cryptography
-----------	-----------------------

CSCI 6542	Computer Network Defense
-----------	--------------------------

CSCI 6548	E-Commerce Security
-----------	---------------------

CSCI 8531	Advanced Topics in Security
-----------	-----------------------------

CSCI 6547	Wireless and Mobile Security
-----------	------------------------------

ELECTRICAL AND COMPUTER ENGINEERING

OVERVIEW

Mission Statement

The mission of the Department is to motivate and inspire students by providing high-caliber, fully integrated programs in electrical and computer engineering. These programs prepare graduates to provide leadership in a rapidly evolving global information society and to serve the greater good. The programs are also designed to allow students to advance the state of knowledge in our disciplines by actively pursuing scholarly research for publication and dissemination.

Educational Objectives

The objectives of the electrical and computer engineering undergraduate program of study are to educate students in the principles of engineering, as well as ensure awareness of their social responsibilities. The engineering education is based on the sciences and the principles of design. A balanced program in the humanities and social sciences as well as coverage of specific topics in professional ethics and social responsibilities, further instills a sense of social responsibilities. The programs provide students with a solid foundation in electrical and computer engineering through a balanced curriculum

integrating the underlying scientific and mathematical knowledge with the latest technological developments. The curriculum is designed to produce engineers capable of functioning in the present technological environment and of adapting to future directions of the profession. Specifically, the programs aim to teach students how to analyze and implement complex interdisciplinary engineering projects; to give students a strong foundation for graduate studies in their field; to prepare students for competitive and challenging industrial applications; to teach students how to use state-of-the-art computer tools for solving engineering problems; to expose students to hands-on engineering experience through laboratory courses; to cultivate students' abilities to communicate and work effectively in teams; and to help students develop an understanding of the ethical issues and global perspectives arising in the practice of the engineering profession.

Educational Outcomes

The Department of Electrical and Computer Engineering aims to produce graduates who will have the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context, as well as professional and ethical responsibility; and a recognition of the need for, and an ability to engage in life-long learning.

Graduates will also have the ability to:

- Apply knowledge of mathematics, science, and engineering
- Design and conduct experiments, as well as analyze and interpret data
- Design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- Function on multidisciplinary teams
- Identify, formulate, and solve engineering problems
- Communicate effectively
- Use the techniques, skills, and modern engineering tools necessary for engineering practice.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Science with a major in computer engineering (p. 503)
- Bachelor of Science with a major in electrical engineering (p. 505)

GRADUATE

Master's programs

- Master of Science in the field of computer engineering (<http://bulletin.gwu.edu/engineering-applied-science/electrical-computer-engineering/computer-engineering>)

- Master of Science in the field of electrical engineering (<http://bulletin.gwu.edu/engineering-applied-science/electrical-computer-engineering/electrical-engineering>)
- Master of Science in the field of telecommunications engineering (<http://bulletin.gwu.edu/engineering-applied-science/electrical-computer-engineering/telecommunications-engineering>)

Professional programs

See the School of Engineering and Applied Science for programs leading to the professional degree.

Doctoral programs

See the School of Engineering and Applied Science for programs leading to the doctoral degree.

CERTIFICATES

- Graduate certificate in high-performance computing (p. 506)

FACULTY

Professors S. Ahmadi (*Teaching*), L. Bennett (*Research*), R.L. Carroll, K.B. Eom, T. El-Ghazawi, R.J. Harrington, H.J. Helgert, E. Della Torre, C.E. Korman, N. Kyriakopoulos, R.H. Lang, M.H. Loew (*Courtesy*), Jr., S. Subramaniam, B. Vojcic, W. Wasylkiwski, M.E. Zaghloul,

Associate Professors M. Doroslovacki, H.H. Huang, M.W. Kay, G.P. Venkataramani, J.M. Zara, V. Zderic

Assistant Professors A. Etemadi, T. Lan, E. Simsek, V. Sorger

Professorial Lecturers A. Mehrotra, D. Nagel, S.A. Torrico

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ECE 1010. Introduction to Electrical, Computer, and Biomedical Engineering. 1 Credit.

Basic and emerging concepts in electrical, computer, and biomedical engineering. Hands-on experiments and projects. Introduction to the professional literature and available resources and to technical writing, speaking, and presentation skills.

ECE 1020. Introduction to Electrical, Computer, and Biomedical Engineering. 1 Credit.

Continuation of ECE 1010. Basic and emerging concepts in electrical, computer, and biomedical engineering. Hands-on experiments and projects. Introduction to the professional literature and available resources and to technical writing, speaking, and presentation skills.

ECE 1120. C Programming for ECE. 3 Credits.

Basic programming concepts including algorithmic thinking and structured programming, control flow, data types, pointers, functions, algorithms, I/Os, threads, and performance evaluation and optimization. Concurrency and multicore programming using threads, processes as well as parallel C programming paradigms. Controlling hardware devices and fine control via interfacing with assembly language.

ECE 1125. Data Structures&Algorithms ECE. 3 Credits.

Fundamentals of algorithms and data structures for electrical and computer engineering. Topics include techniques to solve problems through programming in C/C++ languages, linked lists, stacks, queues and trees; searching methods such as binary trees, hashing, and multi-way trees; design and analysis of algorithms and their space and time complexity. (Fall).

ECE 2110. Circuit Theory. 4 Credits.

Lecture (3 hours), laboratory (3 hours). Circuit elements, techniques of circuit analysis; circuit theorems; operational amplifiers; RLC circuits; natural and step responses; series, parallel and resonant circuits; sinusoidal steady-state analysis; phasers; power calculations; transformers; two-port circuits. CAD tools used in circuit projects. Corequisite: APSC 2113, PHYS 1022.

ECE 2115. Engineering Electronics. 4 Credits.

Lecture (3 hours), laboratory (3 hours). Solid-state devices used in electronic engineering. Physics of their operation. Application to electronic circuits. Primary emphasis on application of these elements in power supplies and in linear amplifiers. Design concepts through use of SPICE and graphical techniques. Prerequisite: ECE 2110.

ECE 2120. Engineering Seminar. 0-1 Credits.

This seminar course provides electrical and computer engineering students with a detailed view of the electrical and computer engineering professions. Speakers from within and outside of the department discuss facets of ECE, engineering education, and other important department, college, or university topics of interest. (Fall).

ECE 2140. Design of Logic Systems I. 4 Credits.

Lecture (3 hours), laboratory (3 hours). Boolean algebra; combinational and sequential circuits; minimization techniques; design-and-build logic subsystems, such as decoders, multiplexers, adders, and multipliers; use of CAD tools. Corequisite: ECE 2115.

ECE 2210. Circuits, Signals, and Systems. 3 Credits.

Circuit analysis using Laplace transforms; transfer functions; poles and zeroes; Bode diagrams; effects of feedback on circuits; convolution; Fourier series and Fourier transforms; design of filters; CAD tools used in design of projects. Prerequisite: ECE 2110.

ECE 3125. Analog Electronics Design. 4 Credits.

Design, testing, and measurement of analog electronic circuits. Differential and multistage amplifiers. Output stages and power amplifiers. Frequency response of amplifiers, high-frequency models of FETs and BJTs. Introduction to feedback circuit topologies. Use of electronic CAD tools, such as P-SPICE. Prerequisite: ECE 2115.

ECE 3130. Digital Electronics and Design. 4 Credits.

Lecture (3 hours), laboratory (3 hours). Design and testing of logic gates, regenerative logic circuits, and semiconductor memory circuits. Implementation of such circuits with NMOS, CMOS, TTL, and other integrated circuit technologies. Use of electronic CAD tools, such as SPICE. Prerequisite: ECE 2140.

ECE 3135. Design of Logic Systems II. 4 Credits.

Lecture (3 hours), laboratory (3 hours). Introduction of ASIC design techniques; design and programming of FPGAs using CAD tools; timing in sequential circuits; essential hazards; races in sequential circuits; design-and-build FPGA project. Prerequisite: ECE 2140.

ECE 3220. Intro to Digital Signal Proces. 3 Credits.

Signal representation, sampling and quantization, discrete-time signals, z-transforms and spectra, difference equations. Fourier analysis. Discrete Fourier transform, IIR and FIR filter design. Prerequisite: ECE 2210.

ECE 3225. Signal and Image Analysis. 3 Credits.

Introduction and clinical applications; characteristics of biomedical problems, time- and frequency-domain techniques for signal feature analysis; spectral estimation and analysis; autoregressive modeling; detection and estimation of periodicity; digital images as two-dimensional signals; 2-D Fourier transform. Corequisite: ECE 2210, ApSc 3115.

ECE 3310. Introduction to Electromagnetics. 3 Credits.

Maxwell's equations, pulse propagation in one dimension, transmission line equations, reflection coefficient, capacitance and inductance calculations, Smith chart, plane waves, reflection from a dielectric of fiber and integrated optics. Prerequisite: APSC 2113, PHYS 1022.

ECE 3315. Fields and Waves I. 3 Credits.

Complex phasor notation, uniform transmission lines, standing wave ratio, power, reflection coefficient, impedance matching. Review of vector analysis and numerical methods. Electrostatics, generalizations of Coulomb's law, Gauss's law, potential, conductors, dielectrics, capacitance, energy. Prerequisite: APSC 2113; PHYS 1022.

ECE 3410. Communications Engineering. 3 Credits.

Fourier series and Fourier transform in relation to signal analysis. Convolution and linear filtering. Signal bandwidth and sampling theorem. Analog modulation. Random variables and stochastic processes; power spectrum. Digital modulation: BPSK, QPSK, MSK. Pulse code modulation, DPCM and delta modulation. Prerequisite: APSC 3115, ECE 2210.

ECE 3420. Communications Laboratory. 1 Credit.

Experiments supporting communications systems. Fourier analysis and Fourier transform. Sampling theorem, filtering, and aliasing. Amplitude modulation (AM), frequency modulation (FM), quantization, and pulse code modulation (PCM). Delta modulation. Binary phase shift keying (BPSK). Quadrature phase shift keying (PSK). Prerequisite or corequisite: ECE 3410.

ECE 3515. Computer Organization. 3 Credits.

Structure and operation of a digital computer. Design of computer arithmetic units, data and instruction paths. Microprogramming; memory technology; virtual memory; caches; pipelined computer organization; characteristics of secondary storage; I/O interfacing. May be taken for graduate credit. Prerequisites: ECE 3135; corequisite: ECE 3525. (Spring).

ECE 3520. Microprocessors: Software, Hardware, and Interfacing. 3 Credits.

Microprocessor architecture, assembly language, address decoding, hardware interrupt, parallel and serial interfacing with various circuits, timer/counters, direct memory access, microprocessor-based system. Hands-on laboratory experience is an integral part of this course. Prerequisite: ECE 2140.

ECE 3525. Introduction to Embedded Systems. 3 Credits.

Microcontrollers and their application in embedded systems. Topics include assembly and C for microcontroller programming, serial and parallel I/O interfacing, and multimedia interfacing. Students perform laboratory experiments and a final project to develop a microcontroller-based embedded system. Prerequisite: CSCI 1121, ECE 3520.

ECE 3530. Introduction to Parallel and Distributed Computer Systems. 3 Credits.

Shared and distributed memory computer systems. Parallel computation. Interprocess communication and synchronization. Terminal, file transfer, and message handling protocols. Algorithms for deadlock detection, concurrency control, and synchronization in distributed systems. Network security and privacy. Resource control and management. Prerequisite: ECE 3515.

ECE 3915W. Electrical, Computer, and Biomedical Engineering Capstone Project Lab I. 1 Credit.

ECE 3915, ECE 4920, and ECE 4925 are taken in sequence by departmental majors beginning in the second semester of the junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project.

ECE 4140. VLSI Design and Simulation. 3 Credits.

Study of VLSI circuit design including PMOS and NMOS transistor analysis, switch and gate logic design, understanding of semiconductor fabrication processes and design rules, CAD system, speed and power considerations, scaling of transistors to the nano-scale, and designing with highly variable process parameters. Each student will design a VLSI chip, simulate the design and submit a GDS II file for chip fabrication. Prerequisites: ECE 3130, ECE 3135. Same as ECE 6240. (Fall).

ECE 4145. Micro & Nano Fabrication Tech. 3 Credits.

Modern process technologies associated with various types of processing. Silicon fabrication process, micro- and nanofabrications. Limitation at nano-scale, and other available technologies. Alternatives approach. May be taken for graduate credit.

ECE 4150. ASIC Design and Testing of VLSI Circuits. 3 Credits.

ASIC and mixed-signal design methodology, use of ASIC design CAD tools. Logic synthesis, styles of synthesis, power/area/speed constraints. VLSI testing, fault models, design for testability techniques, scan path, built-in self-test. Testing of chips designed in ECE 4140 and of nano-scale circuits. May be taken for graduate credit. Prerequisite: ECE 4140.

ECE 4155. Modern Measurements and Sensors. 3 Credits.

Measurement of dc, ac, and high-frequency signals. Interface electronic circuits. Sensors for measurement of mechanical, optical, magnetic, electromagnetic, thermal, chemical, and biochemical signals. Prerequisite: ECE 4320, ECE 3125, ECE 2140. May be taken for graduate credit.

ECE 4160. Introduction to Nano-electronics. 3 Credits.

Technology development beyond CMOS; trends in nano-fabrication and nano-metrology. Current flow in 1-D, 2-D, and 3-D electronic structures and their energy levels. Nano-structures such as nano-wire (Silicon or other material), Carbon Nano Tube (CNT), and Graphene. Nano-scale transistors. May be taken for graduate credit. Prerequisites: ECE 2115. (Fall).

ECE 4320. Fields and Waves II. 3 Credits.

Magneto-stationary fields, Lorentz force torques, Biot-Savart law, Ampere's law, magnetic materials, inductance, energy. Maxwell's equations, Faraday's law, charge-current continuity, vector potential. Time-harmonic fields, plane waves, polarization, skin effect, dielectric boundaries, and fiber optics. Radiation, dipole, gain, effective area. Prerequisite: APSC 2114, ECE 3315.

ECE 4325. Microwave and Optics Laboratory. 1 Credit.

Experiments in transmission lines, network analyzer measurements of scattering parameters, microwave systems, fiber-optic systems and antennas. Introduction to the characteristics of laser and optical systems. Prerequisite: ECE 4320.

ECE 4435. Fiber Optical Communications. 3 Credits.

Lightwave fundamentals. Integrated optics. Optical fiber waveguides. Light sources and detectors. Distribution networks and fiber components. Modulation. Noise and detection. System design. Prerequisite: APSC 2114; ECE 3310 or ECE 4320.

ECE 4535. Computer Architecture and Design. 3 Credits.

Design of bus-based digital computer systems, memory subsystems, caches, and multiple processors. Comparison of RISC and CISC processors and standard buses. Bus transfer and control signals. Performance, memory management, architectural support for protection, task switching, exception handling, instruction pipelines. Prerequisite: ECE 3515.

ECE 4610. Electrical Energy Conversion. 3 Credits.

Three-phase and single-phase AC rotating machines and transformers, DC machines, rotating machines as circuit elements, power semiconductor converters. Renewable generation, utility grid integration, smart grid applications. May be taken for graduate credit by students in fields other than electrical engineering. Prerequisite: ECE 2210, ECE 3315.

ECE 4615. Electrical Power Laboratory. 1 Credit.

Experiments in support of the analysis and design of electrical power systems. Measurements of the characteristics of devices to generate electric power. Rectification and inversion processes for power systems and drives. Prerequisite or corequisite: ECE 4610.

ECE 4620. Electrical Power Systems. 3 Credits.

AC power grids, transmission line parameters, load flow, economic dispatch voltage, frequency and power flow control. Voltage, current and power limitations. Fault analysis and stability considerations. Effect of independent power producers and variable energy sources and energy storage. (Same as ECE 6620) (Fall).

ECE 4710. Control Systems Design. 3 Credits.

Mathematical models of linear systems; steady-state and transient analyses; root locus and frequency response methods; synthesis of linear feedback control systems. Prerequisite: APSC 2114, ECE 2210 or MAE 3134.

ECE 4715. Control Systems Laboratory. 1 Credit.

Experiments in support of control theory, involving the use of the digital computer for process control in real time. Design of feedback and compensation with computer implementation. Digital simulation of linear and nonlinear systems. Prerequisite or corequisite: ECE 4710.

ECE 4730. Robotic Systems. 3 Credits.

Modeling and analysis of robot designs. Kinematics of mechanical linkages, structures, actuators, transmissions, and sensors. Design of robot control systems, computer programming, and vision systems. Use of artificial intelligence. Current industrial applications and limitations of robotic systems. Same as MAE 3197. Prerequisite: computer programming, APSC 2058, ECE 4710.

ECE 4735. Robotics Laboratory. 1 Credit.

Experiments illustrating basic principles and programming of robots and other automated machinery. Design and writing of computer programs to use a robot's arm, vision, and data files to accomplish tasks. Prerequisite or corequisite: ECE 4730/MAE 3197.

ECE 4920W. Electrical, Computer, and Biomedical Engineering Capstone Project Lab II. 3 Credits.

ECE 3915, ECE 4920, and ECE 4925 are taken in sequence by departmental majors beginning in the second semester of the junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project.

ECE 4925W. Electrical, Computer, and Biomedical Engineering Capstone Project Lab III. 2 Credits.

ECE 3915, ECE 4920, and ECE 4925 are taken in sequence by departmental majors beginning in the second semester of the junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project.

ECE 4980. Special Topics. 1-3 Credits.

Topic to be announced in the Schedule of Classes. (Fall and spring).

ECE 4990. Research. 1-3 Credits.

Applied research and experimentation projects, as arranged. Prerequisite: junior or senior status.

ECE 6005. Microcomputer Systems Architecture. 3 Credits.

Advanced microprocessor-based systems CISC and RISC. Buses, timing, and system interface protocols. Advanced memory designs. Multilevel cache designs. Architectural support for memory management, protection, task switching, and exception handling. Multiprocessor systems. Prerequisite: ECE 3515.

ECE 6010. Linear Systems Theory. 3 Credits.

Introduction to linear systems theory. Topics include linear vector spaces and linear operators, mathematical representation of dynamic linear systems, concept of state and solution of the state equation, controllability and observability, canonical forms of the state equation, state feedback, and state estimation. Prerequisite: ECE 2210.

ECE 6015. Stochastic Processes in Engineering. 3 Credits.

Basic concepts of modeling of random phenomena in electrical and computer systems: probability framework, stationarity, linear filtering. Optimization of discrete and continuous stochastic processes. Elements of performance analysis. Prerequisite: ECE 2210, APSC 3115.

ECE 6020. Applied Electromagnetics. 3 Credits.

Review of Maxwell's equations; electromagnetics of circuits, plane wave propagation; transmission lines; waveguides; radiating systems; receiving antennas and pattern reciprocity, array antennas; electromagnetic properties of materials: conductors, crystals, devices; optical transmission. Prerequisite: ECE 4320.

ECE 6025. Signals and Transforms in Engineering. 3 Credits.

Representation of discrete and analog signals as sums of canonical elementary functions; normal equations and the LMS approximation theory, singular value decomposition for discrete and continuous signals; application of classical transform theory to the study of linear systems. Prerequisite: ECE 2210; APSC 2114.

ECE 6030. Device Electronics. 3 Credits.

Semiconductor device concepts; doping, drift diffusion, recombination. Analysis of Schottky and Ohmic contacts, pn junctions, MOS systems. Modeling and analysis of semiconductor devices such as MOSFET and bipolar transistors. Hot electron and short and narrow channel effects. Prerequisite: ECE 6221.

ECE 6035. Introduction to Computer Networks. 3 Credits.

Layered protocol architectures. Digital transmission, fundamental limits. Error detection and ARQ protocols. Data link layer and control. Multiple access protocols. Circuit and packet switching. Multiplexing. Routing. Flow and congestion control, queue management. LAN standards. TCP/IP. Next-generation Internet. May not be taken for credit by students who have taken ECE 3415. Prerequisite: APSC 3115.

ECE 6045. Special Topics. 1-3 Credits.

Topics to be announced in the Schedule of Classes. (Fall and spring).

ECE 6050. Research. 1-12 Credits.

Applied research and experimentation projects, as arranged. May be repeated for credit.

ECE 6060. Electric Power Generation. 3 Credits.

Overview of primary traditional and alternative energy sources and storage. Analysis of machinery employed in energy conversion processes. Effect of independent power producers on long-term and short-term stability of large grids. Prerequisite: ECE 4620 or permission of course director.

ECE 6065. Colloquium. 0 Credits.

Lectures by outstanding authorities in electrical and computer engineering. Topics to be announced each semester. (Fall and spring).

ECE 6105. Introduction to High-Performance Computing. 3 Credits.

Taxonomy and classifications of computers and parallel computers. Parallel thinking and parallel algorithms. Domain decomposition and load balancing. Programming parallel computers using the message passing, global address space, and partitioned global address space paradigms. Prerequisite: graduate standing in science or engineering or consent of instructor.

ECE 6120. High-Performance Processors. 3 Credits.

Processor microarchitecture and instruction-level parallelism. Superpipelines and superscalar processors. Multiple-instruction fetching, aligning, merging, and issuing. Hardware and software solutions to structural and data and control hazards. Branch prediction and static and dynamic speculation. Register renaming, Tomasulo's algorithm. VLIWs. Prerequisite: ECE 6005.

ECE 6125. Parallel Computer Architecture. 3 Credits.

Architectural classifications and taxonomies of parallel computers; enabling technologies, including advanced processor concepts, interconnection networks, high-speed memory architectures and protocols; parallel performance and scalability; and introduction to parallel algorithms and parallel programming. Prerequisite: ECE 6005 or ECE 6105.

ECE 6130. Grid and Cloud Computing. 3 Credits.

Introduction to grid, cloud, and distributed computing. Large-scale computing and storage systems. Network protocols, quality-of-service and security issues. Hardware infrastructure and middleware. Distributed algorithms, programming tools, operating and file systems. Prerequisite: ECE 6105.

ECE 6140. Embedded Systems. 3 Credits.

Architectural advances and instruction sets for embedded microprocessors. Real-time operating systems and real-time scheduling, use of pre-designed software and hardware cores. Sensors, actuators, and data acquisition. System-on-chip (SoC). Design case studies. Prerequisite: ECE 6005.

ECE 6213. Design of Vlsi Circuits. 3 Credits.

Top-down ASIC-FPGA design methodology. Modeling of VLSI circuits using HDL. Behavioral, structural, and RTL modeling techniques; validation and verification techniques. Introduction to logic synthesis. Intellectual property usage. Students design and simulate a project using state-of-the-art commercial VLSI CAD tools. Prerequisite: ECE 4140.

ECE 6214. High-Level VLSI Design Methodology. 3 Credits.

High-level ASIC-FPGA design methodology. RTL modeling of VLSI circuits, using HDL for synthesis. Detailed discussion of logic synthesis. Architectural tradeoff for large VLSI circuits. Advanced optimization techniques. VLSI design flow, using the state-of-the-art, front-end design entry and simulation tools and back-end logic synthesis. Prerequisite: ECE 6213.

ECE 6215. Introduction to MEMS. 3 Credits.

MicroElectroMechanical Systems. Micro/nano fabrication techniques, bulk micromachining, surface micromachining. Examples of mechanical sensors and actuators, examples of microsystems, interface circuits and MEMS applications. Use of the CAD tools to design MEMS devices. May be taken by undergraduates. Prerequisite: ECE 4140.

ECE 6216. RF/VLSI Circuit Design. 3 Credits.

Introduction to radio frequency systems: RF design, noise, amplifiers, specifications, matching concepts, mixers, oscillators, system-level design. Prerequisite: ECE 4140.

ECE 6218. Advanced Analog VLSI Circuit Design. 3 Credits.

MOS technology: building blocks, devices, capacitors, limitations. Operational amplifiers and other analog systems. Layout examples and design principles. Mixed-signal A/D and D/A. Students use the CAD VLSI laboratory to design and simulate circuits. Prerequisite: ECE 4140.

ECE 6221. Introduction to Physical Electronics. 3 Credits.

Theoretical principles underlying the operation of electronic devices. Postulates of quantum mechanics: wave-particle duality, uncertainty relations, electronic band structure. Free-carrier statistics; electron-photon interaction. Physical principles of semiconductor and optoelectronic devices. Prerequisite: ECE 4320.

ECE 6240. VLSI Design and Simulation. 3 Credits.

Study of VLSI circuit design including PMOS and NMOS transistor analysis, switch and gate logic design, understanding of semiconductor fabrication processes and design rules, CAD system, speed and power considerations, scaling of transistors to the nano-scale, and designing with highly variable process parameters. Each student will design a VLSI chip, simulate the design and submit a GDS II file for Chip fabrication. (Same as ECE 4140) (Fall).

ECE 6250. ASIC Design and Testing of VLSI Circuits. 3 Credits.

ASIC and mixed-signal design methodology, use of ASIC design CAD tools. Logic synthesis, styles of synthesis, power/area/speed constraints. MIPS CPU HDL implementation/verification/testing. VLSI testing, fault models, design for testability techniques, scan path, built-in self-test. Testing of chips designed and fabricated in ECE 4140 or equivalent chips. (Same as ECE 4150) (Spring).

ECE 6260. Introduction to Nanoelectronics. 3 Credits.

Nanoscience and technology and nanoelectronics. Basic nanofabrication steps; techniques to build devices such as carbon nanotubes, graphene device, and other 2D nanoelectronic devices. Tools for performing design and characterizations of nanodevices, including scanning electron microscopy (SEM), atomic force microscopy (AFM), and transmission electron microscope (TEM). (Same as ECE 4160) (Fall).

ECE 6500. Information Theory. 3 Credits.

The concepts of source and channel. Measure of information, entropy, mutual information. The noiseless coding theorem. The noisy coding theorem. Channel capacity: symmetric and nonsymmetric channels, Gaussian and binary symmetric channels. Rate-distortion theory. Basics of multiple-user information theory. Prerequisite: ECE 6015.

ECE 6505. Error Control Coding. 3 Credits.

Algebraic coding theory: finite fields, linear block codes, cyclic and Reed-Solomon codes. Error detection using CRC codes. Convolutional codes and trellis-coded modulations: structure, properties, performance bounds. Capacity achieving codes; soft-input-soft-output decoding; computationally efficient decoding algorithms. Prerequisite: ECE 6015.

ECE 6510. Communication Theory I. 3 Credits.

Principles of digital communications. Channels, digital modulation; optimum receivers and algorithms in the AWGN; coherent, non-coherent, and fading channels. Correlation detectors, matched filters; diversity. Bounds on performance of communications, comparison of communications systems and implementation issues. Prerequisite: ECE 6015.

ECE 6520. Mobile & Wireless Comm Systems. 3 Credits.

Mobile channel characterization. Modulation and coding techniques. Code division multiple access. Fading countermeasures; coding, equalization, and multiple transmit/receive antennas. Power control. Capacity of cellular and ad hoc networks. Structure and evolution of mobile communications networks. Evolving technologies and standards. Prerequisite: ECE 6510.

ECE 6525. Satellite Communication Systems. 3 Credits.

Low earth orbit and geostationary satellite systems. Transmission systems. RF link budgets. Modulation and multiplexing. Multiple access techniques: FDMA, TDMA, CDMA. Satellite transponders, antennas, and earth stations. Prerequisite: ECE 6510.

ECE 6530. Electronic Warfare. 3 Credits.

Electronic attack and protection of information. Countermeasures and counter-countermeasures. Electronic attacks on ranging and tracking radar systems, jamming and jamming defense. Electronic attack on communications systems. Defensive techniques, signal design, spread spectrum. Attack and defense of optical and high-energy systems. Prerequisite: ECE 6510.

ECE 6550. Advanced Network Architectures. 3 Credits.

Review of packet and circuit switching. Introduction to the Internet architecture. High-speed, wide-area networks: Frame Relay, ATM. High-speed switched LANs: Gigabit Ethernet. Switching architectures. Blocking and nonblocking switches. Quality-of-service and traffic engineering, MPLS. Overview of wireless and optical networks. Prerequisite: ECE 3415 or ECE 6035.

ECE 6555. Networks Protocols. 3 Credits.

Layering, OSI, and Internet architectures. Link-layer protocols: PPP, HDLC, SONET. Cell-switching, ATM, and adaptation protocols. MAC layer protocols: Ethernet, 802.11. IP addressing, routing protocols: RIP, OSPF. Multi-domain routing: CIDR, BGP. End-to-end protocols: UDP, TCP. TCP congestion control. Application layer protocols: DNS, HTTP, SMTP, FTP. Prerequisite: ECE 3415 or ECE 6035.

ECE 6560. Network Performance Analysis. 3 Credits.

Telecommunications traffic models: arrival and service time distributions, Poisson and Erlang formulas. Topological design algorithms. Delay and blocking models and probabilities for packet switched networks. Routing, relaying, and flow control algorithms: delay and cost minimization, throughput optimization. Prerequisite: ECE 6015 and any of ECE 6035, ECE 6545, or ECE 6555.

ECE 6565. Telecommunications Security. 3 Credits.

Speech and data scrambling. Linear and nonlinear transformations. Cryptographic techniques. Block and stream ciphers. The Data Encryption Standard (DES). Key management, digital signatures, message authentication, hash functions. Public key algorithms. Prerequisite: graduate standing in science or engineering or consent of instructor.

ECE 6570. Telecommunications Security Protocols. 3 Credits.

The OSI security architecture: services and mechanisms, risk analysis. Internet protocol mechanisms. Ipv4 and Ipv6 security, security associations, authentication, MD5. Encapsulating security payload. E-mail security: PGP, S/MIME, PEM, MSP. Secure voice communications algorithms. Security in Internet commerce: SSL, SET. Prerequisite: ECE 6565, ECE 6555.

ECE 6575. Optical Communication Networks. 3 Credits.

Wave propagation through fiber, dispersion, polarization. Multiplexing techniques, WDM. Optical networking components. Optical transmission systems design. All-optical networking, broadcast star and wavelength routing networks. Performance analysis, survivability, control and management. Optical access networks. Prerequisite: APSC 3115.

ECE 6580. Wireless Networks. 3 Credits.

Wireless channels and transmission fundamentals. Wide area networks: CDMA (UMTS/cdma2000) and OFDMA-based networks. Physical, MAC, and link layer protocols for wireless networks. Satellite systems. Broadcast systems. Wireless LANs, sensor and ad-hoc networks. Mobility support: handoffs and Mobile IP. Prerequisite: ECE 3415.

ECE 6610. Electrical Energy Conversion. 3 Credits.

Three-phase and single-phase AC rotating machines and transformers, DC machines, rotating machines as circuit elements, power semiconductor converters. Renewable generation, utility grid integration, smart grid applications. May be taken for graduate credit by students in fields other than electrical engineering. Prerequisites: ECE 2210 and ECE 3315. (Same as ECE 4610) (Spring).

ECE 6620. Electrical Power Systems. 3 Credits.

AC power grids, transmission line parameters, load flow, economic dispatch voltage, frequency, and power flow control. Voltage, current, and power limitations. Fault analysis and stability considerations. Effect of independent power producers and variable energy sources and energy storage. (Same as ECE 4620) (Fall).

ECE 6662. Power Electronics. 3 Credits.

Power semiconductors and applications to power supply, frequency control, uninterruptibility, and the design of HVDC power transmission. Multiphase power electronic circuits for AC and DC machines and industrial processes. Role of power electronics for renewable energy sources interconnected to distribution grids. Prerequisite: ECE 4625.

ECE 6666. Power System Transmission, Control, and Security. 3 Credits.

Analysis of AC networks, load flow, economic dispatch, voltage and frequency control. N-1 contingency and its role in assessing and maintaining system integrity. Analysis of loss of critical generating units and transmission capabilities under severe threats. Rapid restoration techniques based on historical data and heuristic approaches. Prerequisite: ECE 4620 or permission of course director.

ECE 6667. Nuclear Power Generation. 3 Credits.

Review of Nuclear Reactor Engineering, traditional and developing reactor design, issues regarding the safe operation of nuclear plant, control and regulatory aspects of nuclear power generation. Prerequisites: ECE 4620 or permission of course director. (Fall, even years).

ECE 6668. Power Distribution Grids. 3 Credits.

Equipment for power distribution for industrial, commercial, and residential applications. Switching and safety at the distribution voltage level. Bulk insulation level and insulation coordination principles. Smart grid innovations. Remote metering. Prerequisites: ECE 4620 or permission of course director. (Fall, odd years).

ECE 6669. Developing Trends in Electrical Power Networks. 3 Credits.

Planning and operating efficient electric utility power systems. Economics, finance, and regulation; industrial power economics; load demand and management. Reliability of the generation system, capacity and transmission planning. Prerequisites: ECE 4620 or permission of course director. (Spring, odd years).

ECE 6670. Power System Protection. 3 Credits.

Main philosophy for protection of power systems. Protection systems and approaches. Reliability and Security of Protection Systems. Protection of Generators, Transformers, Motors and Transmission Lines. Requirements for Distributed Source Generation (DSG's). Requirements for system protection, to prevent grid blackouts and to enhance power system security. Prerequisites: ECE 4620 or permission of course director. (Spring, even years).

ECE 6690. Power Systems Economics. 3 Credits.

Overview of electrical power market economics and market participants. Production pricing and market clearing pricing. Market ancillary service pricing. Location marginal pricing and zonal pricing schemes. New electrical generation entrant impact. Investing in generation and in transmission. Independent power producers and independent transmission owners. Prerequisites: ECE 6060 or permission of course director. (Fall).

ECE 6691. Power Systems Reliability. 3 Credits.

Overview of probability theory and basic power market reliability modeling and evaluation. Generation supply reliability techniques. Reliability of transmission system and delivery of supply. Loss of load probability evaluation. Forced and maintenance outages. Load forecasting and probability of interconnected systems. Risk evaluation and operating reserves. Prerequisites: ECE 4620 or permission of course director. (Spring, even years).

ECE 6699. Energy and Sustainability. 3 Credits.

Energy sources, consumption, and the societal and environmental impacts. Energy generation and harvesting technology. Thermodynamics and efficiency limits. Nanotechnology for sustainability. Emission and pollution. Growth models; learning curves. Life-cycle analysis. Energy in an international perspective: origins, crises, and solutions. Recommended background: Basic understanding of energy and thermodynamics, such as ECE 4620, MAE 2131, or with permission from the course director. (Fall, even years).

ECE 6705. Introduction to Microwave Engineering I. 3 Credits.

Transmission lines, scattering parameters, microwave networks, resonators. Modes in uniform waveguides, general characteristics of waveguide junctions. Transfer representations, filters, couplers, symmetrical waveguide junctions. Prerequisite: ECE 6020.

ECE 6710. Introduction to Microwave Engineering II. 3 Credits.

Active microwave components, amplifiers, oscillators, and mixers. Design of microwave amplifiers and oscillators, microwave transmitters and receivers. Introduction to microwave systems: radar, wireless communication systems, and radiometer systems. Prerequisite: ECE 6705.

ECE 6715. Antennas. 3 Credits.

Antenna circuits, radiation pattern, reciprocity, gain, receiving cross-section, scattering by antennas, mutual coupling, arrays. Polarization. Radiation from current distributions, equivalent aperture currents, dipoles, patch antennas, large phased arrays. Prerequisite: ECE 6020.

ECE 6720. Remote Sensing. 3 Credits.

Active and passive remote-sensing systems: scatterometers, real-aperture imaging, and synthetic-aperture radars. Sensing of surface, subsurface, and atmospheric parameters at microwave, infrared, and optical frequencies. Analysis of radiometric techniques using radiative transport theory, inverse scattering methods, profile inversion. Prerequisite: ECE 6020.

ECE 6725. Electromagnetic Radiation and Scattering. 3 Credits.

Alternative representations of solutions to Maxwell equations, Fourier transforms and spherical mode representations, field equivalence principles, dyadic Green's functions, radiation and scattering by simple shapes, geometrical theory of diffraction, integral equations and the moment method. Prerequisite: ECE 6020, ECE 6025.

ECE 6730. Waves in Random Media. 3 Credits.

Propagation and scattering of electromagnetic, optical, and acoustic waves in random media, scattering from rough surfaces and randomly distributed particles, turbulence. Applications to propagation through rain and fog. Laser beam scintillations, remote sensing, and communications channel modeling. Monte Carlo simulation. Prerequisite: ECE 6015, ECE 6725.

ECE 6735. Numerical Electromagnetics. 3 Credits.

Numerical methods for the solution of electromagnetic scattering and radiation problems. Major techniques: method of moments, T-matrix and finite element methods, geometrical theory of diffraction and hybrid approaches to solve scattering and radiation by wire structures, surfaces, and composite bodies. Prerequisite: ECE 6020, ECE 6025, ECE 6800.

ECE 6745. Analysis of Nonlinear and Multivalued Devices. 3 Credits.

Numerical techniques for modeling semiconductor and magnetic devices. Modeling multivalued behavior of memory materials. Optimization of geometry. Prerequisite: ECE 6020.

ECE 6750. Introduction to Radar Systems. 3 Credits.

The radar range equation. Radar cross section of targets, target detection and parameter estimation, detection in clutter. Resolution, ambiguities, and signal design. Moving-target indicators. Pulse Doppler radar. Radar antennas, phased arrays. Synthetic aperture and space-based radar. Prerequisite: ECE 4320, ECE 6015.

ECE 6760. Propagation Modeling in Wireless Communications. 3 Credits.

Wireless communication channel modeling, propagation mechanisms, terrestrial fixed links, satellite fixed links, macrocells, fading models, micro-cells, picocells, diversity, equalizers. Prerequisite: ECE 6020 or permission of instructor.

ECE 6765. Photonics and Fiber Optics. 3 Credits.

Propagation of light in optical fibers and planar waveguides, absorption and material dispersion effects, polarization, birefringence, spatial and temporal coherence. Components in fiber optic networks: directional couplers, power splitters, tunable filters and diffraction gratings. Prerequisite: ECE 6020.

ECE 6770. Applied Magnetism. 3 Credits.

Classification of magnetic materials. Magnetic measurements. Soft and hard magnetic materials. Applications to microwave, magnetic recording, permanent magnets, magneto-optics, magnetostrictive devices. Magnetic sensors. Electric power. Superconducting devices. Prerequisite: ECE 6020.

ECE 6800. Computational Techniques in Electrical Engineering. 3 Credits.

Introduction to linear algebra and vector spaces as applied to networks and electrical systems. Orthogonal bases, projections, and least squares. Fast Fourier transforms. Eigenvalues and eigenvectors with applications. Computations with matrices. Constrained optimization in electrical systems. Network models and applications. Prerequisite: ECE 2210, APSC 2114.

ECE 6810. Speech and Audio Processing by Computer. 3 Credits.

Acoustic sensor technologies and characteristics. Speech coding: waveform coding, voice source coding. Speech enhancement and noise reduction. Speech analysis and synthesis, audio formats and compression standards. Speech recognition: isolated word recognition, continuous speech recognition, language identification. Models for speech and audio. Prerequisite: graduate standing.

ECE 6815. Microarchitect/Multimedia Proc. 3 Credits.

Introduction to multimedia. Multimedia formats, conversion, and combinations. Delivery and trends. Servers and networks. Hardware and architecture. End-user devices. Digital libraries, video conferencing and collaboration. Educational and health applications. Case studies and trials. Prerequisite: ECE 6005.

ECE 6820. Real Time DSP. 3 Credits.

Digital signals, binary number representation, fixed-point and floating-point DSP architectures. Q-format for data representation, bit allocation and arithmetic. Portability of arithmetic expressions: floating point vs. fixed point. Applications to signal parameter estimation, signal generation, filtering, signal correlation, spectral estimation (FFT). Prerequisite: ECE 6005.

ECE 6825. Computer Control Systems. 3 Credits.

Analysis of automatic control systems in which the control procedure uses on-line digital computation. Topics include single- and multirate sampling, z-transforms, responses of discrete systems, stability criteria, and discrete control design. Prerequisite or concurrent registration: ECE 6010.

ECE 6830. System Optimization. 3 Credits.

Parameter optimization problems, theory of minima and maxima. Optimization problems for dynamic systems, calculus of variations, the maximum principle and the Hamilton-Jacobi equation. Optimization problems with constraints, optimal feedback systems. Numerical solution of optimal problems. Prerequisite: ECE 6010.

ECE 6835. Nonlinear Systems. 3 Credits.

Definition of linear and nonlinear systems; introduction to approximate analysis of nonlinear systems—describing functions, Krylov and Bogoliubov asymptotical method, and Tsytkin locus. Forced oscillations—jump resonance. Stability analysis—Liapunov criterion. Luré problem and Popov method. Prerequisite: ECE 6010.

ECE 6840. Digital Image Processing. 3 Credits.

Properties of images and visual systems. Image acquisition, sampling, quantization. One- and two-dimensional image transform techniques; enhancement and restoration. Image coding and data compression. Segmentation, representation, boundary and shape, texture, matching. Image understanding. Prerequisite: ECE 6800.

ECE 6842. Image Engineering. 3 Credits.

Sensor/camera design and analysis as a system. Detection and noise processes underlying the sensing of optical radiation; the engineering and physics of image formation. Topics covered include radiometry/photometry, optics and image formation, device and camera characterization, and image quality metrics and system design trades. Prerequisites: ECE 6010, ECE 6015. (Fall, even years).

ECE 6845. Image Synthesis. 3 Credits.

Image synthesis techniques, mathematical image models, image reconstruction techniques, color texture synthesis, synthesis of three-dimensional scenes. Prerequisite: ECE 6015.

ECE 6850. Pattern Recognition. 3 Credits.

Random vectors, transformations. Hypothesis testing, error probability, sequential methods. Bayes, other linear classifiers. Discriminant functions, parameter estimation, learning, and dimensionality reduction. Nonparametric methods; clustering; feature selection and ordering. Computer applications and projects. Prerequisite: ECE 6015.

ECE 6855. Digital Signal Processing Techniques. 3 Credits.

Signal and system representation, sampling and quantization, transform techniques. Recursive and nonrecursive digital filter design, recursive estimation, linear predictive filtering. Fast algorithms for signal processing. Current topics. Prerequisite: ECE 3220 or ECE 6025, and ECE 6015.

ECE 6860. Compression Techniques for Data, Speech, and Video. 3 Credits.

Lossless and lossy coding theorems, rate distortion bound. Data compression algorithms: Huffman coding, run-length coding. Differential coding. Transform coding. Voice, audio, image and video coding techniques: CELP, JPEG, MPEG, MP3. Data coding standards: G.722, G.726, G.728, H.261, H.323. Prerequisite: ECE 6015, ECE 6025.

ECE 6865. Signal Detection & Estimation. 3 Credits.

Minimum variance unbiased estimation. Cramer-Rao bound, statistical modeling, sufficient statistics, maximum likelihood estimation, efficient estimators, least squares. Bayesian estimators. Wiener and Kalman filters, complex data and parameters. Applications to radar, speech, image, biomedicine, communications, control. Prerequisite: ECE 6010, ECE 6015, ECE 6025.

ECE 6875. Wavelets and Their Applications. 3 Credits.

Time-frequency analysis. Continuous, discrete, and discrete-time wavelet transform. Multirate filter banks. Multiband wavelets, two-dimensional wavelets. Wavelet packets and matching pursuit. Wavelets in noise filtering, compression, modeling of fractals, communications, detection, adaptive systems, neural networks, and fast computation. Prerequisite: ECE 6025, ECE 6855.

ECE 6880. Adaptive Signal Processing. 3 Credits.

Adaptation criteria. On-line adaptive filtering algorithms: least mean square and recursive least square. Adaptation in transform domain. Convergence of adaptive algorithms and tracking. Applications in system identification, adaptive channel equalization, interference cancellation and suppression, and adaptive antenna arrays. Blind deconvolution. Prerequisite: ECE 6865.

ECE 6885. Computer Vision. 3 Credits.

Image processing; edge detection, segmentation, local features, shape and region description in 2D and 3D. Insights from human vision studies. Representation for vision: object models, synthetic images, matching, gaps, algorithms. Interference, production system, syntactic networks. Planning spatial reasoning for robot vision. Prerequisite: CSCI 6511; ECE 6850.

ECE 6998. Thesis Research. 3 Credits.**ECE 6999. Thesis Research. 3 Credits.****ECE 8150. Advanced Topics in Computer Architecture. 3 Credits.**

Examples of topics are interconnection networks, fault tolerance, load balancing, workload characterization, and performance modeling of advanced computer systems. Prerequisite: ECE 6120, ECE 6125.

ECE 8999. Dissertation Research. 0-12 Credits.

Limited to Doctor of Philosophy candidates. May be repeated for credit.

BACHELOR OF SCIENCE WITH A MAJOR IN COMPUTER ENGINEERING

Computer engineering combines electronic design, computer architecture, programming of computing systems, computer networks, and applied mathematics. The program prepares students in the theory and application of hardware and software design, computer networks, embedded systems, and very large scale integrated (VLSI) circuit design and applications. Students can take electives in advanced topics, such as optical networks, broadband wireless networks, and technologies for the next generation of information systems.

Visit the program website (<http://www.ece.seas.gwu.edu/bachelor-science-computer-engineering>) for additional information.

REQUIREMENTS

Recommended program of study

First semester

CHEM 1111	General Chemistry I *
ECE 1010	Introduction to Electrical, Computer, and Biomedical Engineering

MATH 1231	Single-Variable Calculus I *
SEAS 1001	Engineering Orientation
UW 1020	University Writing *
Humanities or social sciences elective **	
Second semester	
CSCI 1311	Discrete Structures I
ECE 1020	Introduction to Electrical, Computer, and Biomedical Engineering
ECE 1120	C Programming for ECE
MATH 1232	Single-Variable Calculus II *
PHYS 1021	University Physics I *
Humanities or social sciences elective **	
Third semester	
APSC 2113	Engineering Analysis I
ECE 1125	Data Structures&Algorithms ECE
ECE 2110	Circuit Theory
ECE 2120	Engineering Seminar
MATH 2233	Multivariable Calculus *
PHYS 1022	University Physics II *
Fourth semester	
APSC 3115	Engineering Analysis III
ECE 2115	Engineering Electronics
ECE 2140	Design of Logic Systems I
ECE 2210	Circuits, Signals, and Systems
Humanities or social sciences elective **	
Fifth semester	
CSCI 3411	Operating Systems
ECE 3130	Digital Electronics and Design
ECE 3220	Intro to Digital Signal Proces
ECE 3515	Computer Organization
ECE 3520	Microprocessors: Software, Hardware, and Interfacing
Sixth semester	

ECE 3135	Design of Logic Systems II
ECE 3310	Introduction to Electromagnetics
ECE 3415	Introduction to Computer Networks
ECE 3425	Data Communications Laboratory
ECE 3525	Introduction to Embedded Systems
ECE 3915	Electrical, Computer, and Biomedical Engineering Capstone Project Lab I
Humanities or social sciences elective **	
Seventh semester	
ECE 4140	VLSI Design and Simulation
ECE 4535	Computer Architecture and Design
ECE 4920	Electrical, Computer, and Biomedical Engineering Capstone Project Lab II
Humanities or social sciences elective **	
Technical elective	
Eighth semester	
ECE 4150	ASIC Design and Testing of VLSI Circuits
ECE 4925	Electrical, Computer, and Biomedical Engineering Capstone Project Lab III
PHIL 2135	Ethics in Business and the Professions
Two technical electives	

*Course satisfies the university general education requirement in math, science, and writing.

**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list; (p. 29) the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list (p. 29); the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list. (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf)

Three 3-credit technical courses must be chosen with the approval of the advisor from advanced undergraduate or graduate courses in engineering, computer science, mathematics, physical sciences, or biological sciences. At least

one of the technical electives must be an upper level math or science course.

BACHELOR OF SCIENCE WITH A MAJOR IN ELECTRICAL ENGINEERING

Electrical engineers design the enabling technology for all applications of electricity; examples include energy, telecommunications, the Internet, biomedical instrumentation, and electromagnetic applications. The program in electrical engineering focuses on signal processing; communication theory and practice; voice, data, video and multimedia communication networks; very large scale integrated (VLSI) circuit design and applications; and control and power systems. Students can take electives in advanced topics, such as optical networks, broadband wireless networks, and technologies for the next generation of information systems.

Visit the program website (<http://www.ece.seas.gwu.edu/bachelor-science-electrical-engineering>) for additional information.

REQUIREMENTS

Recommended program of study

First semester

CHEM 1111	General Chemistry I *
ECE 1010	Introduction to Electrical, Computer, and Biomedical Engineering
MATH 1231	Single-Variable Calculus I *
SEAS 1001	Engineering Orientation
UW 1020	University Writing *
Humanities or social sciences elective **	

Second semester

ECE 1020	Introduction to Electrical, Computer, and Biomedical Engineering
ECE 1120	C Programming for ECE
MATH 1232	Single-Variable Calculus II *
PHYS 1021	University Physics I *
Two humanities or social sciences electives **	

Third semester

APSC 2113	Engineering Analysis I
ECE 1125	Data Structures&Algorithms ECE

ECE 2110 Circuit Theory

ECE 2120 Engineering Seminar

MATH 2233 Multivariable Calculus *

PHYS 1022 University Physics II *

Fourth semester

APSC 2114	Engineering Analysis II
ECE 2115	Engineering Electronics
ECE 2140	Design of Logic Systems I
ECE 2210	Circuits, Signals, and Systems
Humanities or social sciences elective **	

Fifth semester

APSC 3115	Engineering Analysis III
ECE 3130	Digital Electronics and Design
ECE 3220	Intro to Digital Signal Proces
ECE 3315	Fields and Waves I
ECE 3520	Microprocessors: Software, Hardware, and Interfacing

Sixth semester

ECE 3125	Analog Electronics Design
ECE 3135	Design of Logic Systems II
ECE 3410	Communications Engineering
ECE 3915	Electrical, Computer, and Biomedical Engineering Capstone Project Lab I
ECE 4320	Fields and Waves II

Seventh semester

ECE 4710	Control Systems Design
ECE 4920	Electrical, Computer, and Biomedical Engineering Capstone Project Lab II
Technical elective	
Two ECE restricted electives	

Eighth semester

ECE 4610	Electrical Energy Conversion
ECE 4925	Electrical, Computer, and Biomedical Engineering Capstone Project Lab III

Two technical electives

Humanities or social sciences elective **

*Course satisfies the university general education requirement in math, science, and writing.

**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 29); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list; the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list.

The Electrical and Computer Engineering electives must be selected from upper level ECE courses. Three 3-credit technical courses must be chosen with the approval of the advisor from advanced undergraduate or graduate courses in engineering, computer science, mathematics, physical sciences, or biological sciences.

The Department of Electrical and Computer Engineering also offers the Bachelor of Science major in electrical engineering with the options listed below.

Visit the program website (<http://www.ece.seas.gwu.edu/bachelor-science-electrical-engineering>) for additional information.

Energy Option in Electrical Engineering

The energy option leads to a bachelor's degree in electrical engineering and prepares the student to work in technical energy fields such as electric utility companies and in research into improved methods of generation, transmission, and distribution of electrical energy.

Medical Preparation Option in Electrical Engineering

The medical preparation option leads to a bachelor's degree in electrical engineering and prepares the student for application to medical school. The student is also prepared to work in various health sciences fields, to conduct research toward development of electronic equipment to assist in diagnosing and treating disease, or to continue as a graduate student in engineering with exceptional qualifications for biomedical engineering.

GRADUATE CERTIFICATE IN HIGH-PERFORMANCE COMPUTING

The Graduate Certificate in the field of high-performance computing (HPC) program provides a mechanism for practicing interdisciplinary computational engineers and scientists to acquire up-to-date knowledge in the advances of computer systems, in particular, the rapidly growing use of multicore processors, parallel computers, hardware accelerators, and networked computing platforms in applications. The program is tailored to provide students with necessary knowledge in all aspects of high performance computing including programming, applications, performance, architectures, and systems.

The certificate program may serve as an alternative to a Master of Science degree program for professionals who may not have the time to commit to a full graduate degree program, but who wish to align their background with the rapid changes in computing technologies and to expand their education beyond the bachelor's degree. All courses taken as part of this program may be transferred to the Department of Electrical and Computer Engineering's M.S. and/or Ph.D. programs. While the HPC certificate can be coupled with a graduate degree program, interested students must be admitted to and complete the HPC certificate program separately.

Specific admission requirements are shown on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

Visit the program website (<http://www.ece.seas.gwu.edu/graduate-certificate-high-performance-computing>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 6 credits in required courses and 6 credits in elective courses.

Required

ECE 6105	Introduction to High-Performance Computing
----------	--

At least one of the following:

ECE 6125	Parallel Computer Architecture
----------	--------------------------------

ECE 6130	Grid and Cloud Computing
----------	--------------------------

Electives

Six additional credits from the following:

CE 6210	Introduction to Finite Element Analysis
---------	---

CE 6705	Nonlinear Finite Element Modeling and Simulation
CE 8330	Advanced Finite Element Analysis
CSCI 3571	Introduction to Bioinformatics
CSCI 4572	Computational Biology
CSCI 6421	Distributed and Cluster Computing
ECE 6005	Microcomputer Systems Architecture
ECE 6045	Special Topics
ECE 6050	Research
ECE 6120	High-Performance Processors
ECE 6140	Embedded Systems
ECE 6213	Design of Vlsi Circuits
ECE 6214	High-Level VLSI Design Methodology
ECE 6735	Numerical Electromagnetics
ECE 6800	Computational Techniques in Electrical Engineering
MAE 6225	Computational Fluid Dynamics
MAE 6291	Special Topics in Mechanical Engineering
PHYS 6130	Computational Physics I
PHYS 6230	Computational Physics II
PHYS 6330	Computational Physics III
PHYS 8110	Selected Topics in Theoretical Nuclear Physics

Credits taken for the certificate may be used towards a graduate degree, with academic advisor approval.

ENGINEERING MANAGEMENT AND SYSTEMS ENGINEERING

Mission Statement

The mission of the Department of Engineering Management and Systems Engineering is to deliver an integrated program of research, teaching, and public service to the technology community. The Department develops creative leadership to bridge dynamic, complex technologies and societal needs. This includes delivering instruction in the management of technology and in systems engineering, operations research, and allied fields to undergraduate and graduate students who are preparing to assume leadership roles as technology professionals. The Department's programs provide an

understanding of the managerial role, analysis of the diverse functions of technology-based organizations, and instruction in modern management and mathematical analysis and modeling tools as they apply to formulating and executing decisions in engineering and scientific organizations. In addition, research programs feature the study of the management of technology; fundamental and applied research in systems engineering and operations, with a particularly strong interest in stochastic analysis and system optimization; sponsorship from government, industry, and the technology community; and a strong presence in refereed professional journals and leadership in professional societies.

Educational Objectives

The systems engineering undergraduate program of study prepares graduates for work as systems engineers in a variety of professional fields and for continuing study at the graduate level. The educational objectives include conveying the expectations of an ethical and professional work environment where graduates fully engage with both technical and non-technical colleagues.

Educational Outcomes

A systems engineering graduate will have achieved the knowledge and the skills to:

1. Apply the fundamentals of systems engineering, including needs elicitation, requirements elaboration, design option analyses, architectural trade studies, system traceability methods, configuration baseline and management, and engineering change process;
2. Understand the complexity in large systems development and operations;
3. Communicate effectively to convey complex systems information to a variety of audiences;
4. Participate effectively in team-based projects; and
5. Demonstrate the application of systems engineering skills through the development and completion of a large capstone project.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in applied science and technology (p. 508)
- Bachelor of Science with a major in systems engineering (p. 509)

GRADUATE

Master's programs

- Master of Science in the field of engineering management (p. 511)
- Master of Science in the field of systems engineering (p. 513)

Doctoral program

- Doctor of Engineering in the field of Engineering Management (p. 513)

CERTIFICATES

Certificate programs offered by the Department of Engineering Management and Systems Engineering include:

- Graduate certificate in homeland security emergency preparedness and response
- Graduate certificate in emergency management and public health
- Graduate certificate in engineering and technology management
- Graduate certificate in greenhouse gas management (p. 514)
- Graduate certificate in knowledge and information management
- Graduate certificate in systems engineering

FACULTY

Professors J.P. Deason, J.R. van Dorp, T.A. Mazzuchi (*Chair*), S. Sarkani

Associate Professors H. Abeledo, J.A. Barbera, M.R. Duffey, J.J. Ryan, G.L. Shaw

Assistant Professors D. Broniatowski, R.A. Francis, E. Gralla, J.R. Santos, E. Shittu, Z. Szajnfarber,

Professorial Lecturers R.M. Andersen, M.J. Armstrong, J.H. Chang, T.H. Holzer Jr., D.J. Ryan, J.V. Shah, J.S. Wasek, R.C. West

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
- Applied Sciences (APSC) (p. 908)
- Engineering Management and Systems Engineering (p. 1056) EMSE (p. 1056)

BACHELOR OF ARTS WITH A MAJOR IN APPLIED SCIENCE AND TECHNOLOGY

The Bachelor of Arts major in applied science and technology is a broad-based, engineering-oriented program that includes significant exposure to the liberal arts. It is designed for students who intend to make their careers in fields allied to science and technology and/or continue their education toward professional careers in law, medicine, business, teaching, or the media.

The program can be enhanced with a second major in either the Columbian College of Arts and Sciences or the Elliott School of International Affairs. A second major in SEAS is also possible. A concentration in general business through the School of Business is available.

Visit the program website (<http://www.emse.seas.gwu.edu/bachelor-arts-applied-science-technology>) for additional informational.

REQUIREMENTS

Recommended program of study

First semester

CHEM 1111	General Chemistry I *
EMSE 1001	Introduction to Systems Engineering
SEAS 1001	Engineering Orientation
MATH 1231	Single-Variable Calculus I *
UW 1020	University Writing *

Humanities or social sciences elective **

Second semester

CHEM 1112	General Chemistry II *
CSCI 1121 or CSCI 1112	Introduction to C Programming Algorithms and Data Structures
MATH 1232	Single-Variable Calculus II *

Humanities or social sciences elective **

Arts elective ?

Third semester

CSCI 1132 or CSCI 1112	Data Structures and Software Design Algorithms and Data Structures
PHYS 1011	General Physics I *

or PHYS 1021 University Physics I

Literature elective [?]

Two unrestricted electives

Fourth semester

APSC 3115 Engineering Analysis III

EMSE 4410 Survey of Finance and Engineering Economics

PHYS 1012 General Physics II ^{*}

or PHYS 1022 University Physics II

Literature elective [?]

Unrestricted elective

Fifth semester

BISC 1111 Introductory Biology: Cells and Molecules

EMSE 3850 Quantitative Models in Systems Engineering

COMM 1040 Public Communication ^{*}

or COMM 1041 Interpersonal Communication

or COMM 1042 Business and Professional Speaking

MAE 1004 Engineering Drawing and Computer Graphics

Allied minor elective

Sixth semester

BISC 1112 Introductory Biology: The Biology of Organisms ^{*}

ISTM 4121 Database Design and Applications

Two allied minor electives

Humanities or social sciences elective ^{**}

Seventh semester

MAE 3192 Manufacturing Processes and Systems

EMSE 3740 Systems Thinking and Policy Modeling I

EMSE 6005 Organizational Behavior for the Engineering Manager

Allied minor elective

SEAS elective

Eighth semester

CE 4330 Contracts and Specifications

Allied minor elective

Humanities or social sciences elective ^{**}

Three unrestricted electives

Electives

Students choose electives in specified categories from lists of courses available from the advisor. Allied minor electives are selected, with the approval of the advisor, to form a coherent and meaningful program of 15 credits. Popular selections include biology, communication, computer science, design, economics, engineering, environmental studies, finance, international business, management, mathematics, medical preparation, psychology, statistics, and operations research.

^{*}Course satisfies the university general education requirement in math, science, and writing.

^{**}At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 29); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list; the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list.

BACHELOR OF SCIENCE WITH A MAJOR IN SYSTEMS ENGINEERING

The multidisciplinary field of systems engineering applies engineering techniques and mathematical methods to improve planning and decision-making in organizational systems composed of people, machines, and procedures. By observing, understanding, modeling, and predicting the behavior of such systems, practitioners of systems engineering assist the decision-making process that seeks to design and operate the systems optimally. Systems engineering finds application in many areas, including communications, energy, environment, finance, health care, information technology, marketing, national defense, project management, software development, and transportation.

The systems engineering program is designed to provide the student with a broad and solid education in the basics of mathematical modeling, software and information systems, and the treatment of uncertainty. Analytical thinking is stressed in order to prepare the student for graduate education or productive professional employment. The program fosters

communication skills and awareness of the current professional world.

Each student must participate in an appropriate internship/co-op experience during the last two years of the program. This requirement may be satisfied by an approved full-time summer position after the second or third year, or by one or two approved part-time positions requiring 15-20 hours per week during two of the final four semesters. A position obtained through the GW Career Center (<http://gwired.gwu.edu/career>) will usually be acceptable; the position may be either paid or unpaid.

REQUIREMENTS

Recommended program of study

First semester

CSCI 1111 Introduction to Software Development

EMSE 1001 Introduction to Systems Engineering

MATH 1231 Single-Variable Calculus I *

SEAS 1001 Engineering Orientation

UW 1020 University Writing *

Science elective *

Second semester

CSCI 1112 Algorithms and Data Structures

or BADM 2301 Management Information Systems Technology

or ISTM 4120 Business Systems Development

or ISTM 4121 Database Design and Applications

ECON 1011 Principles of Economics I *

MATH 1232 Single-Variable Calculus II *

Science elective *

Humanities or social sciences elective **

Third semester

APSC 2113 Engineering Analysis I

COMM 1040 Public Communication

or COMM 1041 Interpersonal Communication

or COMM 1042 Business and Professional Speaking

CSCI 2113 Software Engineering

or BADM 2301 Management Information Systems Technology

or ISTM 4120 Business Systems Development

or ISTM 4121 Database Design and Applications

MATH 2233 Multivariable Calculus *

Science elective *

Fourth semester

CSCI 2441W Database Systems and Team Projects

or BADM 2301 Management Information Systems Technology

or ISTM 4120 Business Systems Development

or ISTM 4121 Database Design and Applications

EMSE 2705 Mathematics in Operations Research

EMSE 2801 Fundamentals of Systems Engineering

Humanities or social sciences elective **

Fifth semester

EMSE 3850 Quantitative Models in Systems Engineering

EMSE 3740 Systems Thinking and Policy Modeling I

EMSE 3815 Requirements Analysis and Elicitation

EMSE 4755 Quality Control and Acceptance Sampling

Humanities or social sciences elective **

Professional elective

Sixth semester

EMSE 4770 Techniques of Risk Analysis and Management

EMSE 3820 Project Management for Engineering Systems

EMSE 3855W Critical Infrastructure Systems

EMSE 4410 Survey of Finance and Engineering Economics

Professional elective

Humanities or social sciences elective **

Seventh semester

EMSE 3760 Discrete Systems Simulation

EMSE 4190	Senior Project in Systems Engineering I
EMSE 4710	Applied Optimization Modeling
STAT 2118	Regression Analysis
Professional elective	
Eighth semester	
EMSE 4191	Senior Project in Systems Engineering II
STAT 2183W	Intermediate Statistical Laboratory: Statistical Computing Packages
Three professional electives	

Science requirements can be met by the following:

BISC 1111 & BISC 1112	Introductory Biology: Cells and Molecules and Introductory Biology: The Biology of Organisms *
CHEM 1111 & CHEM 1112	General Chemistry I and General Chemistry II *
PHYS 1021 & PHYS 1022	University Physics I and University Physics II *

*Course satisfies the university general education requirement in math, science, and writing.

**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 29); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list (p. 29); the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list. (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf)

Technical electives

Each systems engineering major will gain specific expertise in a chosen technical area by taking a six-course sequence leading to a minor from another department of the University. Technical electives are selected with the approval of the student's academic advisor. Areas frequently chosen are computer science, economics, finance, management, mathematics, naval science, statistics, or specific fields of engineering. Consult the advisor for other approved areas and requirements.

Medical preparation option

The medical preparation option leads to a bachelor's degree in systems engineering and quantitatively prepares students for medical careers through a program that emphasizes decision modeling. Decision modeling is increasingly applicable to the medical field because of the growing use of computers and information systems in medicine and the interplay of diagnosis, treatment, and economics.

MASTER OF SCIENCE IN THE FIELD OF ENGINEERING MANAGEMENT

The Master of Science in engineering management is designed for the technical manager who needs a broad education to keep an organization operating efficiently and working ahead of its competitors. The program provides graduate education in the most current management techniques for technological and scientific organizations. Students can pursue their degree by selecting electives in one of five areas of focus: crisis, emergency, and risk management; economics, finance and cost engineering; engineering and technology management; environmental and energy management; and knowledge and information management.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://www.emse.seas.gwu.edu/master-science-engineering-management>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 12 credits in required courses, 12 to 15 credits in a focus area, and 3 to 9 credits in elective courses, depending on which focus area is selected.

Focus areas (select one): Crisis, Emergency, and Risk Management, Engineering and Technology Management, Environmental and Energy Management, and Economics, Finance, and Cost Engineering.

Required:

EMSE 6001	The Management of Technical Organizations
EMSE 6020	Decision Making with Uncertainty
EMSE 6410	Survey of Finance and Engineering Economics
EMSE 6801	Systems Engineering I

Crisis, Emergency, and Risk Management

Required:

EMSE 6305	Crisis and Emergency Management
EMSE 6310	Information Technology in Crisis and Emergency Management
EMSE 6315	Management of Risk and Vulnerability for Hazards and Terrorism
EMSE 6325	Medical and Public Health Emergency Management
or EMSE 6330	Management of Terrorism Preparedness and Response
Two of the following:	
EMSE 6240	Environmental Hazard Management
EMSE 6300	Homeland Security: The National Challenge
EMSE 6345	Disaster Recovery and Organizational Continuity
EMSE 6350	Hazard Mitigation in Disaster Management
EMSE 6540	Management of Information and Systems Security
EMSE 6820	Program and Project Management
EMSE 6992	Special Topics (with program advisor approval)

Electives:

Two additional Engineering Management and Systems Engineering departmental courses with program advisor approval

Engineering and Technology Management

Required:

EMSE 6005	Organizational Behavior for the Engineering Manager
EMSE 6820	Program and Project Management
EMSE 6099	Problems in Engineering Management and Systems Engineering
Two of the following:	
EMSE 6010	HR for Engineering Managers
EMSE 6014	Management of Engineering Contracts

EMSE 6018	Engineering Law
EMSE 6023	Technology Issue Analysis
EMSE 6026	Technical Enterprises
EMSE 6030	Technological Forecasting and Management
EMSE 6035	Marketing of Technology
EMSE 6070	Management of Research and Development
EMSE 6430	Finance for Engineers
EMSE 6505	Knowledge Management I
EMSE 6760	Discrete Systems Simulation
EMSE 6805	Systems Engineering II
EMSE 6992	Special Topics (with program advisor approval)

Electives:

Three additional Engineering Management and Systems Engineering departmental courses with program advisor approval

Environmental and Energy Management

Required:

EMSE 6220	Environmental Management
EMSE 6225	Air Quality Management
EMSE 6235	Water Quality Management
EMSE 6260	Energy Management
Two of the following:	
EMSE 6200	Policy Factors in Environmental and Energy Management
EMSE 6230	Hazardous Waste Management and Cleanup
EMSE 6240	Environmental Hazard Management
EMSE 6245	Analytical Tools for Environmental Management
EMSE 6285	Analytical Tools for Energy Management
EMSE 6290	Climate Change: Policy, Impact
EMSE 6295	Environmental Security

EMSE 6992	Special Topics (with program advisor approval)
-----------	--

Electives:

Two additional Engineering Management and Systems Engineering departmental courses with program advisor approval

Economics, Finance, and Cost Engineering

Required:

EMSE 6420	Economic Analysis in Engineering Planning
-----------	---

EMSE 6430	Finance for Engineers
-----------	-----------------------

EMSE 6450	Quantitative Methods in Cost Engineering
-----------	--

EMSE 6820	Program and Project Management
-----------	--------------------------------

Two of the following:

EMSE 6014	Management of Engineering Contracts
-----------	-------------------------------------

EMSE 6018	Engineering Law
-----------	-----------------

EMSE 6026	Technical Enterprises
-----------	-----------------------

EMSE 6701	Operations Research Methods
-----------	-----------------------------

EMSE 6840	Applied Enterprise Systems Engineering
-----------	--

EMSE 6850	Quantitative Models in Systems Engineering
-----------	--

EMSE 6992	Special Topics (with program advisor approval)
-----------	--

Electives:

Two additional Engineering Management and Systems Engineering departmental courses with program advisor approval

MASTER OF SCIENCE IN THE FIELD OF SYSTEMS ENGINEERING

The Master of Science in systems engineering program provides broad knowledge of the "systems approach" for designing and managing large-scale engineering systems throughout the lifecycle, with faculty and students exploring case studies and methodologies from NASA, the U.S. Department of Defense, and U.S. corporations. Students can pursue their degrees by selecting electives in one of three areas of focus: operations research and management science,

systems engineering and integration, or enterprise information assurance.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the department website (<http://www.emse.seas.gwu.edu/master-science-systems-engineering>) for more information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 12 credits in required courses and 24 credits in approved elective courses.

Required

EMSE 6001	The Management of Technical Organizations
-----------	---

EMSE 6020	Decision Making with Uncertainty
-----------	----------------------------------

EMSE 6410	Survey of Finance and Engineering Economics
-----------	---

EMSE 6801	Systems Engineering I
-----------	-----------------------

Electives

24 credits selected in consultation with the program advisor

DOCTOR OF ENGINEERING IN THE FIELD OF ENGINEERING MANAGEMENT

The Doctor of Engineering (D.Eng.) in the field of Engineering Management (EM) is designed for students who seek a practice- or praxis-oriented doctoral degree. Such students typically have professional needs that the traditional Ph.D. degree does not meet. The D.Eng. (EM) focuses on solutions to real-world problems. Unlike the Ph.D., for which fundamental research leads to foundational work that is published and contributes to the basic understanding of a field, the D.Eng. (EM) is applied, not basic.

In a broad-based program of study, the D.Eng. (EM) course work culminates in the student's production of a praxis for use by practicing engineers. The D.Eng. (EM) is ideal for individuals doing advanced engineering in the workplace, who want to update their knowledge with cutting-edge techniques from the engineering disciplines, and cap it with a formal degree that recognizes their contributions to the field.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://emse.offcampus.gwu.edu/doctor-engineering-degree-program>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 30 credits in required courses and 15 credits in research culminating in a practice-based case study.

Required

EMSE 6030	Technological Forecasting and Management
EMSE 6506	Knowledge Management II
EMSE 6573	Managing E-Commerce Technologies
EMSE 6765	Data Analysis for Engineers and Scientists
EMSE 6770	Techniques of Risk Analysis and Management
EMSE 6790	Logistics Planning
EMSE 6830	Human Factors Engineering
EMSE 6992	Special Topics (Quantitative Methods for Engineering Managers)
EMSE 6992	Special Topics (Entrepreneurship)
EMSE 6992	Special Topics (Research Methods for the Case Study)
EMSE 8998	Adv Reading & Research

GRADUATE CERTIFICATE IN GREENHOUSE GAS MANAGEMENT

The Graduate Certificate in Greenhouse Gas (GHG) Management, which was developed in cooperation with experts at the Greenhouse Gas Management Institute, provides an alternative for professionals who wish to expand their knowledge in the field without committing to the requirements of a master's degree program. The program addresses the engineering, economic, legal, and logistical considerations for implementing GHG management in compliance with existing and planned GHG mitigation. The focus is on managing GHG emissions from energy-related activities in a business setting, through the measurement, reporting, analysis, reduction, trading, and verification of GHG emissions from these activities.

Specific admission requirements are shown on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

REQUIREMENTS

The following requirements must be fulfilled:

Required

EMSE 6290	Climate Change: Policy, Impact
EMSE 6291	Greenhouse Gas Measurement and Reporting
EMSE 6292	Greenhouse Gas Mitigation
EMSE 6293	Greenhouse Gas Management Assurance and Information Systems Design

MECHANICAL AND AEROSPACE ENGINEERING

Mission Statement

The mission of the Department of Mechanical and Aerospace Engineering is to educate students to become professional mechanical and aerospace engineers who are confident in their understanding of science and technology and creative in the face of new challenges. Graduates of the mechanical engineering program have the analytical skill and thirst for lifelong learning that will expand career horizons. The program prepares students to conduct relevant research at the forefront of mechanical and aerospace engineering knowledge. Students learn through faculty mentoring and go on to practice mechanical engineering as skilled, responsible, and ethical professionals.

Educational Objectives

The mechanical engineering program provides an integrated curriculum designed to produce graduates who develop successful careers in mechanical engineering or in science and technology. Graduates will be prepared to accomplish the following objectives within a few years after graduation:

1. Practice mechanical engineering in industry or government, applying knowledge and skills acquired in the program to the design of engineering systems and devices, and the analysis and solution of engineering problems of complex scope; and/or
2. Succeed in advanced education, research and development, or other creative efforts in engineering, science, and technology; and/or
3. Apply engineering skills while pursuing careers in other professions, such as law, medicine, business, or public policy (this objective reflects the program's patent law and medical preparation options and will apply to a selected group of graduates);

4. Conduct themselves in a responsible and ethical manner, cognizant of the social, environmental, and economic impact of engineering and technology on society;
5. Embark upon a process of lifelong learning in their profession; and
6. Enter into leadership roles in technological development or local, national, or global economic development.

Student Outcomes

Students acquire knowledge of the following disciplines:

- Chemistry and calculus-based physics with depth in at least
- Advanced mathematics through multivariate calculus and differential equations; familiarity with statistics and linear algebra
- Thermal, fluid, and mechanical systems areas.

In addition, students gain the ability to fulfill the following professional responsibilities:

- Understand professional and ethical responsibility
- Apply knowledge of mathematics, science, and engineering, and familiarity with materials science, electrical circuits, and electromechanical control theory
- Design and conduct experiments, as well as analyze and interpret data
- Design a mechanical engineering system, component, or process to meet desired needs within realistic constraints
- Identify, formulate, and solve engineering problems
- Use the techniques, skills, and modern engineering tools necessary for engineering practice
- Use computer systems and knowledge of computer programming
- Apply computer software used in engineering practice, such as computer-aided engineering packages and mathematical software, to the solution of mechanical engineering problems
- Apply manufacturing techniques to realize mechanical engineering designs
- Communicate effectively both orally and graphically
- Write technical reports in a professional manner
- Function on multidisciplinary teams.

The program prepares graduates who have the broad education necessary to practice mechanical engineering, including the following fundamentals:

- An understanding of the impact of engineering solutions in a global, economic, environmental, and societal context.
- A recognition of the need for, and an ability to engage in life-long learning
- A knowledge of contemporary issues.

For more information contact the Department of Mechanical and Aerospace Engineering. (<http://www.mae.seas.gwu.edu>)

UNDERGRADUATE

Bachelor's programs

- Bachelor of Science with a major in mechanical engineering (p. 522)
- Bachelor of Science with a major in mechanical engineering, aerospace option (p. 524)
- Bachelor of Science with a major in mechanical engineering, biomechanical option (p. 525)
- Bachelor of Science with a major in mechanical engineering, medical preparation option (p. 526)
- Bachelor of Science with a major in mechanical engineering, patent law option (p. 527)
- Bachelor of Science with a major in mechanical engineering, robotics option (p. 529)

GRADUATE

Master's program

- Master of Science in the field of mechanical and aerospace engineering (p. 530)

Doctoral program

See the School of Engineering and Applied Science for programs leading to the doctoral degree.

CERTIFICATE

- Graduate certificate in the field of computer-integrated design in mechanical and aerospace engineering (p. 531)

FACULTY

Professors E. Balaras, A.D. Cutler, D.S. Dolling, C.A. Garriss, S.M. Hsu, M. Keidar, J.D.-Y. Lee, M.W. Plesniak (*Chair*), K. Sarker, Y.-L. Shen, M. Snyder

Associate Professors L. Barba, Y. Leng, S. Solares

Assistant Professors P.M. Bardet, P. Ben-Tzvi, S. LeBlanc, T. Lee, M. Leftwich, C. Liang, A.M. Wickenheiser, L. Zhang

Professorial Lecturers M.A. Busby, K. Bulusu, T. Conway, S.S. Dodbele, G.C. Everstine, J.M. Fleming, D.R. Gerk, T.M. Krafchak, R. Krishnamurthy, J.H. Milgram, A. Rao, J. Silver, J.K. Soldner

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students

- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

MAE 1001. Introduction to Mechanical and Aerospace Engineering. 1 Credit.

Careers in mechanical and aerospace engineering and the necessary academic program. Teamworking and problem-solving skills for solution of design problems. Analytical and design problems and correlations between academic skills and the mechanical and aerospace engineering professions. Basic aspects of engineering ethics. (Fall).

MAE 1004. Engineering Drawing and Computer Graphics. 0-3 Credits.

Introduction to technical drawing, including use of instruments, lettering, geometric construction, sketching, orthographic projection, section view, dimensioning, tolerancing, and pictorial drawing. Introduction to computer graphics, including topics covered in manual drawing and computer-aided drafting. (Fall and spring).

MAE 2117. Engineering Computations. 3 Credits.

Numerical methods for engineering applications. Round-off errors and discretization errors. Methods for solving systems of linear equations, root finding, curve fitting, numerical Fourier transform, and data approximation. Numerical differentiation and integration and numerical solution of differential equations. Computer applications. Prerequisite: CSCI 1121 or CSCI 1041.

MAE 2124. Linear Systems Analysis for Robotics. 3 Credits.

Properties of linear systems. Mathematical modeling of dynamic systems. State space, state variables, and their selection. Linearization of non-linear behavior. Matrix functions. Solution of state equations in the time domain and using transformations. System stability and frequency response.

MAE 2131. Thermodynamics. 3 Credits.

Fundamentals of equilibrium thermodynamics; Zeroth, First, and Second Laws. Work, heat, internal energy, enthalpy, thermodynamic potential functions; heat transfer mechanisms, phase diagrams, equations of state and property tables, power systems, refrigeration, heat pump systems. Reversible and irreversible processes, Carnot cycle, entropy, exergy. Prerequisite: PHYS 1021.

MAE 2170. History and Impact of the U.S. Patent System. 3 Credits.

Economic systems and emergence of the free market; role of the patent system in the industrial development of the United States; constitutional foundations; evolution of the U.S. patent system; landmark litigation; impact on future innovation; international aspects; the likely future of the patent system.

MAE 3120. Methods of Engineering Experimentation. 0-3 Credits.

Acquisition and analysis of experimental data. Laws of modeling and simulation. Report formulation and presentation. Basic principles of measuring instruments and sensors. Fundamentals of digital data acquisition and use of computer-based data systems. Strain gages, oscilloscopes, transducers, and computerized data systems. Prerequisite: MAE 2117.

MAE 3126. Fluid Mechanics I. 0-3 Credits.

Fluid properties, fluid statics, integral and differential formulations of conservation of mass, momentum, and energy. Bernoulli's equation. Dimensional analysis and similitude. Inviscid flow. Viscous flow. Experimental and computational methods in fluid mechanics. Prerequisite: APSC 2058.

MAE 3128. Biomechanics I. 3 Credits.

Mechanical analysis of biological systems. Characterization of living tissue. Applications of statics, solid mechanics, kinematics, and elementary dynamics to the human musculoskeletal system. May be taken for graduate credit with approval of department. Prerequisite: APSC 2057, CE 2220.

MAE 3134. Linear System Dynamics. 3 Credits.

Modeling of linear mechanical, electrical, and fluid systems as transfer functions and in state space. Linearization, discretization. Laplace and z-transforms. Natural frequencies and damping, free vibration, forced vibration. Measurement techniques, parameter estimation, and computer simulation. Time and frequency domain analysis. Prerequisite: APSC 2113; corequisite: APSC 2058.

MAE 3145. Orbital Mechanics and Spacecraft Dynamics. 3 Credits.

Coordinate systems and transformations, rocket equation, two-body problem, orbit transfers, orbit perturbations, attitude dynamics and stability of symmetric spacecraft, environmental and control torques. Prerequisite: APSC 2058. (Fall).

MAE 3155. Aerodynamics. 3 Credits.

Subsonic and supersonic aerodynamics: potential flow, lift and form drag, viscous effects, compressible flow. Prerequisite: MAE 3126.

MAE 3162. Aerospace Structures. 3 Credits.

Basic structural theory of lightweight aerospace structures. Development of shear and bending moment diagrams and stresses. Analysis of typical monocoque structures. External airloads and their distribution. Mechanical properties of metal and advanced composite structures. Design of members in tension, bending or torsion, and design of webs in shear. Prerequisite: APSC 2057 and CE 2220. (Spring).

MAE 3166W. Materials Science and Enginrg. 3 Credits.

Mechanical properties, plastic deformation dislocation theory, yielding, strengthening mechanisms, microstructure and properties, heat treatment of steel, composites, amorphous materials, viscoelastic deformation, creep, fracture, fatigue, fatigue crack propagation. Prerequisite or concurrent registration: CHEM 1111, PHYS 1022.

MAE 3167W. Mechanics of Materials Lab. 1 Credit.

Measurement of strains and study of failure resulting from applied forces in ductile, brittle, anisotropic, elastomeric, plastic, and composite materials. Tension, compression, bending, impact, and shear failures. Prerequisites: MAE 3166W. (Spring).

MAE 3171. Patent Law for Engineers. 3 Credits.

Types of patents; international patents; inventorship; prosecution process; basic references for patents; detailed structure of a patent; patentability requirements; reexamination and reissue; litigation; infringement and invalidity; copyrights, trademarks, and trade dress. May be taken for graduate credit with approval of department.

MAE 3184. Robotics Lab. 1 Credit.

Forward and inverse kinematics modeling of robots, control design, trajectory planning, and force rendering. Corequisite: MAE 3197.

MAE 3187. Heat Transfer. 3 Credits.

Steady- and unsteady-state heat conduction problems. Analytical and numerical solution methods. Convective heat transfer, boundary-layer approach, analogy between heat and momentum transfer. Thermal radiation; fundamental concepts and laws. Heat-exchanger design. Prerequisite: MAE 3126, MAE 2131.

MAE 3190. Analysis and Synthesis of Mechanisms. 3 Credits.

Kinematics and dynamics of mechanisms. Displacements, velocities, and accelerations in linkage, cam, and gear systems by analytical, graphical, and computer methods. Synthesis of linkages to meet prescribed performance requirements. Prerequisite: APSC 2058. (Fall).

MAE 3191. Mechanical Design. 3 Credits.

Integration of knowledge of strength of materials in a design context. Stresses and deflections in engineering structures. Theories of failure. Introduction to the design of mechanical components, such as fasteners, shafts, springs. Introduction to the use of computers in mechanical engineering design. Prerequisite: CE 2220, MAE 2117.

MAE 3192. Manufacturing Processes and Systems. 3 Credits.

Introduction to manufacturing techniques for metals, polymers, ceramics, and composites. Relationships between properties of materials and techniques for processing them. Process selection, design, control, and integration. Computer-integrated manufacturing, robotics and assembly automation. Prerequisite or concurrent registration: MAE 1004.

MAE 3195. Computer-Aided Engineering of Mechanical Systems. 3 Credits.

Presentation of the major elements of computer-aided engineering systems: interactive computer graphics, finite element analysis, and design optimization. Consideration of economics, safety, and reliability factors. Prerequisite: MAE 4193; concurrent registration: MAE 3196.

MAE 3196. Computer-Aided Engineering Laboratory. 1 Credit.

Instruction and hands-on applications of computer-aided engineering systems to the design, analysis, and optimization of mechanical engineering components and systems. Concurrent registration: MAE 3195.

MAE 3197. Robotic Systems Design and Applications. 3 Credits.
